**Abstract:** In the late 1980's, rogue scientists from Pakistan's nuclear weapons program used German go- betweens to sell their secrets to Iran, a high-level government source in Islamabad claimed last week. The scientists, motivated entirely by money, were also helped by two Sri Lankan businessmen based in Dubai when they passed on details of Pakistani nuclear technology. **The disclosure follows reports that four scientists have been questioned over suspected links with Iran and lends credence to claims in Washington that Pakistan poses some of the biggest international security problems of the year ahead.** Pakistan has long been suspected of responsibility for the proliferation of nuclear know-how, not only to Iran but also to North Korea. The illegal sale of nuclear secrets came to light when Musharraf visited Tehran after the Iranian government's decision to allow inspectors from the International Atomic Energy Agency to see its facilities. **"It is only Musharraf's personal credibility with the US and the world that has prevented a horrible backlash," said one source in the Pakistani government.** The embarrassment was compounded when a former army chief suggested that Pakistan sell its nuclear technology to Iran for a sum in the region of \$20 billion. The Pakistani scientists who were subsequently questioned included two men regarded as being close to Dr Abdul Qadeer Khan, the so-called father of Pakistan's nuclear bomb. **A report from 2003 by the Brookings Institution, the independent policy analysts, warned that Pakistan had taken more risks than other nations in the war on terror, yet remained insecure about its relations with Washington.** "Insecurity can lead nations to monumental irrationality," the report said. "Pakistanis have been made to feel their nation is being bullied into working against its own interests" (Gauhar, 2003).

**Title/Headline:** *Dodging the Nuclear 9/11*

**Abstract:** Osama bin Laden may soon have his hands on three Agosta 90B next-generation stealth submarines capable of carrying sixteen sea-to-land cruise missiles each. Those missiles can deliver atomic warheads. And Osama, I suspect, will have access to the forty nuclear warheads constructed by Pakistan. Washington and New York, two primary targets for Al Qaeda, are near bodies of water from which these nuclear-tipped missiles can be launched. So are many other major American cities. In 1994, DCN, the government-owned company that builds France's naval vessels, agreed to help the Pakistanis build and learn to operate a rather amazing shipyard. It was a next-generation facility building next-tech, Agosta 90B stealth submarines. Each Agosta 90B is able to carry sixteen Harpoon Stand-Off Land Attack cruise missiles. According to the Pakistani Navy Captain Iftikhar Riaz Qureshi, who commanded both of these subs in their test phases, **Pakistan purchased its Agosta 90Bs to provide itself with "second strike nuclear capability."** Qureshi's words imply that from day one, Pakistan's intention has been to tip these missiles with atomic warheads. And guess what? Since Pakistan tested its first nuclear bomb in 1998, every nuclear device it's made has been a missile warhead. According to Defence Journal, Pakistan's subs have a range of close to twelve thousand miles and **they can travel to the Hudson River or the Chesapeake Bay, unleash their missiles on New York and Washington,** then still be able to take refuge in mid-ocean, lay low and threaten other world capitals with a similar fate. The United States operates a network of hydrophones scattered all over the Atlantic and Pacific seabed. We are listening for subs like these. But we may not be able to hear them. The Pakistani subs use a methanol-and-liquid-oxygen engine bedded on a suspension system that quiets its purr to a whisper. We may not be able to detect their silent running beneath the sounds of zebrafish fanning their tails. **Many a Pakistani would love to see the nuclear destruction of America's key cities. Pakistan has one of the most violently fundamentalist and anti-American populations of any of the world's 57 Islamic states.** And that's saying something. **From 1979 to 1995, Pakistan was the headquarters for a group of "Afghan freedom fighters" who were not Afghans at all. They were an international army paid for by the US, Saudi Arabia, and China, armed by the CIA, and trained, in part, by China's Peoples Liberation Army.** We trained an army of 50,000 men from 30 nations to bring down the Soviet Union's most advanced tanks, jets, and helicopters. Why? Our mutual goal was to embarrass a common enemy--the Russians. **Chief among the recruits to our proxy Jihad were Osama bin Laden and the founding members of Al Qaeda.** Pakistan is the nation whose citizens rioted in the streets in 1989 over the title of a novel they didn't like--The Satanic Verses. It was Pakistan's street activists who forced the Ayatollah Khomeini to issue a Fatwa offering five million dollars to the Moslem who killed Salman Rushdie. **The Pakistanis were more extreme than the most extremist Islamic leader of his day.** And that was fifteen years ago! Since then anti-Americanism and anti-Westernism has grown. Pakistan is also the nation that educated a generation of Afghan refugees who later went home to take over their country in the name of Islamic purity and justice. We know those refugees as the Taleban. **Today, Osama bin Laden is one of Pakistan's two biggest pop-culture heroes. The other is "The Father of the Islamic Bomb", Dr Abdul Qadeer Khan. Khan and Osama have reportedly met in Afghanistan. Khan is the weapons expert. Osama is the weapons user. Many a Pakistani militant fundamentalist cell identifies itself as an Osama ally. One of the strongest among these Osama-loyalists is arguably Pakistan's most popular leader, Fazlur Rahman Khalil, the man who told 60 Minutes that: "God has ordered us to build nuclear weapons."** On the other hand, the base of Pakistan's military dictator, Pervez Musharraf, is a slender reed. According to Syed Adeeb, head of Information Times, a militant Pakistani press outlet based in the National Press Building in Washington DC, "an Urdu-language letter written by Pakistan Army officers on a Pakistan Army letterhead and sent to many members of the Pakistan Parliament" calls, "'Pervez Musharraf and his clique...a band of thieves and looters...imposed on this nation'" by the United States. Adeeb himself calls Musharraf, "a self-appointed 'President,' military dictator, army tyrant, human rights abuser, traitor and highly paid mercenary of war criminal George W. Bush". Musharraf has been the target of at least five assassination

attempts. The latest took place the very day Saddam Hussein was captured in December 2003. **Yet only he stands between Osama and the Islamic submarines. Only Musharraf stands between Osama and the cruise missiles Pakistan's subs can carry. And only Musharraf stands between Osama and the 40 or more nuclear warheads** Pakistan has built since it exploded the first Islamic atomic bomb. Which means that only Pervez Musharraf stands between Osama and what bin Laden, in a January 2004 speech broadcast on Al Jazeera, called, "a surprising blow...one that...due to its magnitude...will change the international balances of powers..." **Here's what I strongly suspect is Osama's dream endgame: Nuke a few key cities in the United States. Blind and devastate the Great Satan. Then watch while France, Germany, Italy, and England capitulate. Capitulate to what? To Osama's dream, his passion, his vision of truth and freedom--to a global Islamic caliphate.** I want a world of peace. So do you. But until our understanding of ourselves goes a good deal farther, we have to face the fact that we live in a world of violence. If we pledge to remain non-violent, those who've declared themselves our enemies and who love "death more than you love life" will chuckle at our weakness...and use it to cheer their comrades on to new atrocities. They will fight the battle of the faithful and the good--the fight for what **Osama calls "justice, manners, and purity"--the battle for the truth of God's messenger. They will assert the truth expressed by an al-Qaeda-allied author, Seif Al-Din Al-Ansari, that we live on an expendable "speck of dust called Planet Earth."** They will use our reticence to make the mother of all wars. And it will not be environmentally friendly (Bloom, 2004).

**Title/Headline:** *Tick, Tick, Tick: Pakistan Is A Nuclear Time Bomb—Perhaps The Greatest Threat To American Security Today*

**Abstract:** Not since the Cuban Missile Crisis of October 1962 have I been as frightened by a single news story as I was by the revelation late last year that **Abdul Qadeer Khan, the founder of Pakistan's nuclear-weapons program, had been selling nuclear technology and services on the black market.** The story began to break last summer, after U.S. and British intelligence operatives intercepted a shipment of parts for centrifuges (which are used to enrich uranium for nuclear bombs as well as fuel) on its way from Dubai to Libya. **The centrifuges turned out to have been designed by Khan, and before long investigators had uncovered what the head of the International Atomic Energy Agency has called a "Wal-Mart of private-sector proliferation"—a decades-old illicit market in nuclear materials, designs, technologies, and consulting services, all run out of Pakistan.** The Pakistani government's response to the scandal was not reassuring. Khan made a four-minute televised speech on February 4 asserting that "there was never any kind of authorization for these activities by the government." He took full responsibility for his actions and asked for a pardon, which was immediately granted by President Pervez Musharraf, who essentially buried the affair. **Today Pakistan's official position remains that no member of Musharraf's government had any concrete knowledge of the illicit transfer—an assertion that U.S. intelligence officials in Pakistan and elsewhere dismiss as absurd. Meanwhile, Pakistani investigators have reportedly questioned a grand total of eleven people from among the country's 6,000 nuclear scientists and 45,000 nuclear workers, and have refused to allow either the United States or the IAEA access to Khan for questioning. Pakistan's nuclear complex poses two main threats.** The first—highlighted by Khan's black-market network—is that nuclear weapons, know-how, or materials will find their way into the hands of terrorists. **For instance, we have learned that in August of 2001, even as the final planning for 9/11 was under way, Osama bin Laden received two former officials of Pakistan's atomic-energy program—Sultan Bashiruddin Mahmood and Abdul Majid—at a secret compound near Kabul. Over the course of three days of intense conversation bin Laden and his second-in-command, Ayman al-Zawahiri, grilled Mahmood and Majid about how to make weapons of mass destruction. After Mahmood and Majid were arrested, on October 23, 2001, Mahmood told Pakistani interrogation teams, working in concert with the CIA, that Osama bin Laden had expressed a keen interest in nuclear weapons and had sought the scientists' help in recruiting other Pakistani nuclear experts who could provide expertise in the mechanics of bomb-making. CIA Director George Tenet found the report of Mahmood and Majid's meeting with bin Laden so disturbing that he flew directly to Islamabad to confront President Musharraf. This was not the first time that Pakistani agents had rendered nuclear assistance to dangerous actors: In 1997 Pakistani nuclear scientists made secret trips to North Korea, providing technical support for that country's nuclear-weapons program in exchange for Pyongyang's help in developing long-range missiles. According to American intelligence, another Pakistani nuclear scientist negotiated with Libyan agents over the price of nuclear-bomb designs. Pakistan's nuclear program has long been a leaky vessel; the Carnegie Endowment for International Peace has deemed the country "the world's No. 1 nuclear proliferator."** Clearly, there is a significant danger that the black market will put Pakistani nukes (or nuclear material and technical knowledge) in terrorist hands—if it hasn't already. **But there is a second, equally significant danger: that a coup might topple Musharraf and leave all or some of Pakistan's nuclear weapons under the control of al-Qaeda, the Taliban, or some other militant Islamic group (or, indeed, under the control of more than one).** Part of the problem is that in order to keep its focal enemy, India, from destroying its arsenal in a pre-emptive strike, Pakistan has hidden its nuclear weapons throughout the country; some of them may be in regions that are effectively under fundamentalist Muslim control. **Moreover, Pakistan's official alliance with the United States in the war on terror has only increased the danger posed by Al Qaeda sympathizers within its nuclear establishment. Although Musharraf has pledged his "unstinting cooperation in the fight against terrorism," not all the thousands of officers in Pakistan's military and intelligence agencies have signed on. After all, until 9/11 some of them were working closely with members of Al Qaeda and the Taliban. Nor, for that matter, does Pakistan's general population support Musharraf's alliance with the United States. A poll this past March asked Pakistani citizens which leaders in international affairs they viewed favorably. Only seven percent said George W. Bush—and 65 percent said Osama bin Laden.** The uneasy contradiction between Musharraf's pro-American foreign policy and the widespread anti-Americanism within Pakistan has forced Pakistani policymakers to walk a razor's edge. Musharraf faces the clear and present threat of assassination: twice in the past year he has narrowly escaped attempts on his life. When I spoke to him not long after the second of those attempts, he said he thought he had used up many of his nine lives. **It may not take a bullet to wrest control over Pakistan's nuclear arsenal from Musharraf. In local elections held in October of 2002 a coalition of fundamentalist parties won command of the government in the North West Frontier Province. The group, known as Muttahida Majlis-e-Amal (MMA), offered a simple platform: pro-Taliban, anti-American, and against all Pakistani involvement in the war on terror. MMA is now the third largest party in Pakistan's parliament; from its new position of strength it has spoken vigorously about the need to regain the honor Pakistan has lost through its subservience to the United**

States and its struggle with India, with which it has been engaged in a harrowing game of nuclear brinkmanship. **The region the MMA controls happens to be the very one where Osama bin Laden and Ayman al-Zawahiri are currently believed to be hiding. Under these conditions the emergence of a nuclear-equipped splinter group from within the Pakistani establishment looks disturbingly plausible. The actions required to neutralize the threat of Pakistani proliferation are ambitious; a measure of realism is necessary. But realism need not mean defeatism. The challenge now is to achieve similar success in blocking the seemingly inexorable path to a nuclear 9/11** (Allison, 2004).

**Source:** World Net Daily

**Title/Headline:** *How Pakistan's Dr. X Sold Al-Qaida Islamic Bomb*

**Abstract:** Dr. Abdul Qadeer Khan, the "father of the Islamic bomb" and the "godfather of nuclear proliferation," provided nuclear expertise, nuclear materials, and designs for atomic weapons to Osama bin Laden and Ayman al-Zawahiri to assist in the realization of the "American Hiroshima." The American Hiroshima plan represents al-Qaida's plan for the nuclear destruction of the United States. It calls for the detonation of seven tactical nuclear devices in seven U.S. cities at the same time. Each device, according to the plan, must be equipped to produce an explosive yield of 10 kilotons to equal the 1945 blast in Hiroshima that killed 242,437 Japanese civilians. News about Dr. Khan's involvement with al-Qaida and the American Hiroshima plan first emerged with the capture of several al-Qaida operatives in Afghanistan in October 2001, during the first phase of Operation Enduring Freedom, and, later, with the arrest of Khalid Sheikh Mohammad, bin Laden's military operations chief, in Karachi, Pakistan, March 2, 2003. From Khalid Mohammad's laptop, CIA officials uncovered details of al-Qaida's plan to create a series of "nuclear hell storms" throughout the United States. After days of interrogation coupled with severe sleep deprivation, Khalid Mohammad told U.S. intelligence officials that the chain of command for the "American Hiroshima" answered directly to bin Laden, al-Zawahiri, and a mysterious scientist whom he, at first, referred to as "Dr. X," but later identified as Dr. Khan. Tim Burger and Tim McGirk in the May 12, 2003, edition of Time managed to confirm that at least one meeting between Dr. Khan and bin Laden occurred within a safe house in Kabul.

**The Real Dr. Strangelove:** Dr. A.Q. Khan spearheaded Pakistan's effort to build nuclear weapons to stabilize the nuclear threat from India. Five atomic bombs, developed by Khan, were successfully detonated beneath the scorched hills of the Baluchistan desert in 1998. Khan, who went on to work on the successful firings of the nuclear-capable Ghaudi I and II missiles, remains a revered figure in Afghanistan and Pakistan, where his birthday is celebrated in mosques. After gaining a place for Pakistan within the elite nuclear club of nations along with the United States, Russia, China, Great Britain, France, India and Israel, **Khan proceeded to sell his centrifuge technology for the enrichment of uranium and his designs for atomic weapons to such countries as Egypt, Saudi Arabia, Nigeria, and Sudan, and such rogue nations as North Korea, Iran, and Libya. Abundant evidence exists that the list of Khan's customers should be expanded to include Brazil, Malaysia, Indonesia, Algeria, Kuwait, Myanmar, and Abu Dubai.** More information was squeezed out of Khalid Mohammad in subsequent months, including accounts of continuous visits by bin Laden and company to the **A.Q. Khan Research Laboratories in Pakistan, where they gained the assistance of such renowned nuclear physicists, including Dr. Sultan Bashiruddin Mahmood, chairman of Pakistan's Atomic Energy Commission.**

**Dr. Mahmood's Confession:** Mahmood was taken into custody by Pakistani Inter Service Intelligence and CIA agents Oct. 23, 2001. After months of questioning, Mahmood at last admitted that he had met with bin Laden, al-Zawahiri and other al-Qaida officials on several occasions, including the fateful morning of Sept. 11, 2001, to discuss the means of speeding up the process of manufacturing nukes from the highly enriched uranium that al-Qaida had obtained from the Islamic Movement of Uzbekistan and other sources. Mahmood insisted that he had provided answers to technical questions concerning tactical nuclear weapons but declined to provide bin Laden actual hands-on help for the creation of such devices. Upon voicing this denial, Mahmood was subjected to six lie-detector tests. He failed them all.

**The Nuclear Nest:** Throughout 2002, CIA and ISI officials obtained more and more information concerning the involvement of scientists from the A.Q. Khan Research Laboratories in the plans for the American Hiroshima. **After being threatened with seven years in prison under Pakistan's Official Secrets Act, Dr. Chaudry Abdul Majid, PAEC's chief engineer, admitted that he met with bin Laden and other al-Qaida officials on a regular basis to provide technical assistance for the construction and care of its nuclear weapons.** Dr. Mirza Yusuf Baig, another PAEC engineer, made a similar confession. Yet a host of other leading scientists and technicians from Khan's facility have managed to elude arrest and interrogation by quietly slipping out of the country. **Dr. Mohammad Ali Mukhtar and Dr. Suleiman Assad, nuclear engineers and close colleagues of Khan and Mahmood, escaped to Myanmar, where they are currently engaged in building a 10-megawatt nuclear reactor for the Third World country.** Others have made off for unknown destinations. The list of such "absconders" includes the names of Muhammad Zubair, Murad Qasim, Tariq Mahmood, Saeed Akhther, Imtaz Baig, Waheed Nasir, Munawar Ismail, Shaheen Fareed, and Khalid Mahmood.

**The Missing Nukes:** Still, the interrogations of the Pakistani scientists, coupled with findings from Dr. Mahmood's office for "charitable affairs" in Kabul, verified for the CIA that al-Qaida had produced several nuclear weapons from highly enriched uranium and plutonium pellets the size of silver dollars at Khan's facilities. At least one of these weapons was transported to Karachi where it

**was shipped to the United States in a cargo container.** The story of the deployed nuke was reported by Arnaud de Borchgrave of the Washington Times Dec. 10, 2001. It was carried by United Press International but received little play in the national press and garnered scant attention from such major news outlets as ABC, NBC, CBS and CNN. The whereabouts of the weapon remains a mystery. There are more than 18 million potential delivery vehicles that could be used to bring the nuke into the U.S. This figure represents the number of cargo containers that arrive into the country every year. Of these containers, only 3 percent are inspected. Moreover, the bills of lading do not have to be produced until the containers reach their place of destination. News about other tactical nuclear weapons developed by Khan's facilities for bin Laden came with the arrest of Sharif al Masri in Pakistan in November 2004. Al Masri, an al-Qaida operative with close ties to Ayman al-Zawahiri, informed CIA interrogators that a number of nukes had been deployed to Mexico where arrangements had been made with a Latino street gang for their safe transport into the U.S. This story, which appeared in the Nov. 17 issue of the Nation, also failed to capture widespread press attention.

**Khan's 'Mea Culpa':** On Feb. 4, 2004, Khan, after being confronted with telltale evidence obtained by inspectors from the International Atomic Energy Agency, issued a public statement in which he confessed that he had sold blueprints for nuclear weapons to Libya, North Korea and Iran. He expressed "the deepest sense of sorrow and anguish" that he had placed Pakistan's national security in jeopardy. "I have much to answer for," he said. **Pakistan's federal cabinet and President Pervez Musharraf responded to Khan's confession by granting the esteemed scientist a full pardon for his acts of nuclear proliferation.** Musharraf said that Khan and the scientists who worked with him were motivated by "money." **The pardon, according to many observers, represented an attempt by the Musharraf government to appease Islamic extremists and senior Pakistani military officials who believe that Musharraf had become a traitor to the Muslim people by providing military support and assistance to the Bush administration.** Khan remains a free and honored citizen of Pakistan, where neither U.S. military officials nor CIA agents can obtain the right to approach or question him. This situation has prompted Robert Gallucci, former U.N. weapons inspector and dean of Georgetown University's School of Foreign Service, to observe: **"The most dangerous country for the U.S. now is Pakistan. ... We haven't been this vulnerable since the British burned Washington in 1814."**

**Coda:** The story of Dr. A.Q. Khan's relationship with al-Qaida comes with a coda. Acclaimed French journalist Bernard-Henri Levy amassed considerable evidence that **ISI officials executed Wall Street Journal reporter Daniel Pearl after Pearl obtained inside information on the close relationship between Khan and bin Laden, the trafficking of nuclear materials from Khan's facility near Islamabad to al-Qaida cells in Afghanistan and the North West Frontier Province of Pakistan, and the plans for the American Hiroshima** (WorldNetDaily, 2005).

**Source:** Sky News, Haydon Wallace

**Title/Headline:** *White House Fears Of Nuclear Terrorist Threat*

**Abstract:** There are real fears in White House circles that Al Qaeda could get hold of a nuclear bomb from Pakistan. Former US Ambassador to the UN, John Bolton, a confidante of the Administration declared: "I think there is a very real threat that if Musharraf falls or is assassinated, that a radical Islamic government will take control. Then you would have a very grave threat of Pakistan's nuclear arsenal being used for international terrorist purposes." The report went on to state that Osama bin Laden has always said he hopes to detonate a nuclear device in Western cities. Pakistan has enough material for 70 nuclear weapons, an unstable military regime, strong Islamic fundamentalism in military and government circles and groups like Al Qaeda on its territory (Wallace, 2008).

**Title/Headline:** *Next Terrorist Attack Against US Will Originate From Pakistan*

**Abstract:** A top U.S. Congressional panel **described Pakistan as "the intersection of nuclear weapons and terrorism,"** the next terror attack on America is likely to originate in its ally's tribal areas. While observing that Pakistan is a U.S. ally, the commission on weapon of mass destruction (WMD) and terrorism said **"the next terrorist attack against the United States is likely to originate from within the Federally Administered Tribal Areas" in Pakistan.** The U.S. says the tribal areas in northwest Pakistan, where the government exerts little control, are a haven for militants from both Pakistan and neighboring Afghanistan. It warned that **there is a threat of nuclear**

**terrorism**, both because more countries are developing nuclear weapons and because some existing nuclear powers are expanding their arsenals. **"Terrorist organizations are intent on acquiring nuclear weapons,"** said the report. It cited testimony before the commission from former Senator Sam Nunn, who said that the **"risk of a nuclear weapon being used today is growing, not receding."** The commission was created in line with a recommendation from the 9/11 Commission on the September 11th, 2001, terrorist attacks on the US. But **terrorists are likely to use a weapon of mass destruction somewhere in the world in the next five years**, former Senator Bob Graham, chairman of the commission stated to CNN (Thaindian, 2008).

**Headline:** *Obama's Worst Pakistan Nightmare*

**Abstract:** To get to the headquarters of the Strategic Plans Division, the branch of the Pakistani government charged with keeping the country's growing arsenal of nuclear weapons away from insurgents trying to overrun the country, you must drive down a rutted, debris-strewn road at the edge of the Islamabad airport, dodging stray dogs and piles of uncollected garbage. Just past a small traffic circle, a tan stone gateway is manned by a lone, bored-looking guard loosely holding a rusting rifle. He oversees a security structure intended to protect Pakistan's nuclear arsenal from outsiders — Islamic militants, Qaeda scientists, Indian saboteurs and those American commando teams that Pakistanis imagine, with good reason, are waiting just over the horizon in Afghanistan, ready to seize their nuclear treasure if a national meltdown seems imminent. **"When you map WMD and terrorism, all roads intersect in Pakistan,"** Graham Allison, a Harvard professor and a leading nuclear expert on the commission, told me. **"The nuclear security of the arsenal is now a lot better than it was. But the unknown variable here is the future of Pakistan itself, because it's not hard to envision a situation in which the state's authority falls apart and you're not sure who's in control of the weapons, the nuclear labs, the materials."** Nov. 6, which is when J. Michael McConnell, the director of national intelligence, showed up in Chicago to give the president-elect his first full presidential daily brief. For obvious reasons, neither Obama nor McConnell will talk about the contents of those highly classified briefings. But interviews over the past year with senior intelligence officials and with nuclear experts in Washington and South Asia and at the International Atomic Energy Agency in Vienna provide strong indications of what Obama has probably heard. By now Obama has almost surely been briefed about an alarming stream of intelligence that began circulating early last year to the top tier of President George W. Bush's national-security leadership in Washington. **The highly restricted reports described how foreign-trained Pakistani scientists, including some suspected of harboring sympathy for radical Islamic causes, were returning to Pakistan to seek jobs within the country's nuclear infrastructure** — presumably trying to burrow in among the 2,000 or so people who have what Kidwai calls "critical knowledge" of the Pakistani nuclear infrastructure. **"I have two worries," one of the most senior officials in the Bush administration, who had read all of the intelligence with care, told me one day last spring. One is what happens "when they move the weapons," "And the second," the official said, choosing his words carefully, "is what I believe are steadfast efforts of different extremist groups to infiltrate the labs and put sleepers and so on in there."** As Obama's team of nuclear experts have discovered in their recent briefings, it is Pakistan's laboratories — one of which still bears A. Q. Khan's name — that still pose the greatest worries for American intelligence officials. It is relatively easy to teach Kidwai's security personnel how to lock down warheads and store them separately from trigger devices and missiles — training that the United States has conducted, largely in secret, at a cost of almost \$100 million. It is a lot harder for the Americans to keep track of nuclear material being produced inside laboratories, where **it is easier for the Pakistanis to underreport how much nuclear material has been produced, how much is in storage or how much might be "stuck in the pipes" during the laborious enrichment process. And it is nearly impossible to stop engineers from walking out the door with the knowledge of how to produce fuel, which Khan provided to Iran, and bomb designs.** An autodidact intellectual with grand aspirations, Mahmood was fascinated by the links between science and the Koran. He wrote a peculiar treatise arguing that when morals degrade, disaster cannot be far behind. Over time, his colleagues began to wonder if Mahmood was mentally sound. They were half amused and half horrified by his fascination with the role sunspots played in triggering the French and Russian Revolutions, World War II and assorted anticolonial uprisings. **"This guy was our ultimate nightmare," an American intelligence official told me in late 2001, when The New York Times first reported on Mahmood. "He had access to the entire Pakistani program. He knew what he was doing. And he was completely out of his mind."** While Khan appeared to be in the nuclear-proliferation business chiefly for the money, Mahmood made it clear to friends that his interest was religious: Pakistan's bomb, he told associates, was "the property of a whole Ummah," referring to the worldwide Muslim community. **He wanted to share it with those who might speed "the end of days" and lead the way for Islam to rise as the dominant religious force in the world.** There is little doubt that Mahmood talked to the two Qaeda leaders about nuclear weapons, or that Al Qaeda desperately wanted the bomb. George Tenet, the CIA chief, wrote later that intelligence reports of the meeting were "frustratingly vague." **They included an account that there was talk of how to design a simple firing mechanism, and that a senior Qaeda leader displayed a canister that may have contained some nuclear material (though almost certainly not bomb-grade).** Rolf Mowatt-Larssen, a longtime CIA nuclear expert, was given perhaps the most daunting job at the agency in the aftermath of 9/11: **to make sure that Al Qaeda did not have a weapon of mass destruction at its disposal.** "The worst nightmare we had at that time was that A. Q. Khan and Osama bin Laden were somehow working together," Mowatt-Larssen. In Pakistan, the problem is made worse by the fact that the universities — where the nuclear program draws its young talent — are now more radicalized than at any time in memory, and the nuclear program itself has greatly expanded. Kidwai estimated that there are roughly 70,000 people who work in the nuclear complex in Pakistan, including 7,000 to 8,000 scientists and the 2,000 or so with "critical knowledge." If even 1 percent of those employees are willing to spread Pakistan's nuclear knowledge to outsiders with a cause, Kidwai — and the United States — have a

problem. Just as Kidwai fears, every few months someone in Washington — either at the Pentagon, or the Energy Department, or on the campus of the National Defense University — runs a simulation of how the United States should respond if a terrorist group infiltrates the Pakistani nuclear program or manages to take over one or two of its weapons. **"Most of them don't end well." "Only one of those countries has a hundred nuclear weapons,"** a primary author of the report said to me. **For Al Qaeda and the other Islamists, he went on to say, "this is the home game."** He paused, before offering up the next thought: **For anyone trying to keep a nuclear weapon from going off in the United States, it's our home game, too** (Sanger, 2009).

**Source:** The Washington Post, Joby Warrick

**Title/Headline:** *Pakistani Nuclear Scientist A.Q. Khan Is Freed From House Arrest*

**Abstract:** The Pakistani scientist at the center of one of history's worst nuclear scandals walked out of his Islamabad villa to declare his vindication after five years of house arrest. "The judgment, by the grace of God, is good," a smiling Abdul Qadeer Khan told a throng of reporters and TV crews. Moments earlier, a Pakistani court had ordered the release of the metallurgist who had famously admitted selling nuclear secrets to Iran, Libya and North Korea. Through years of legal limbo, Khan, 72, had never been charged, and now he never will be. "The so-called A.Q. Khan affair is a closed chapter," a Pakistani government spokesman said. **Worst of all, the recent discovery of nuclear weapons blueprints on computers found in Switzerland and Dubai has prompted questions about whether the damage inflicted by the network was truly contained -- or even understood.** It is possible, U.S. officials concede, that Khan and his allies shared nuclear secrets with still-unknown countries and, perhaps, terrorist groups, as well. Khan himself remains a hero in his homeland, immune from further prosecution and free now to travel abroad as he wishes. That discovery was the culmination of more than a decade of secret investigation by the CIA and other agencies of the business dealings of Khan, one of Pakistan's best-known scientists and the father of the country's nuclear weapons program. At the State Department, spokesman Gordon K. Duguid said yesterday that **Khan remains a "serious proliferation risk," and the White House asked for assurances from Pakistan that the scientist will never be allowed to resume his former work.** Jeffrey G. Lewis, director of the Nuclear Strategy and Nonproliferation Initiative at the New America Foundation, said Khan's ability to essentially walk away from nuclear-smuggling charges "makes a mockery of our efforts to stop the spread" of nuclear weapons. **While the investigation has yielded few arrests, it has provided disturbing insight into the sophistication of 21st-century smuggling networks and their ability to move the most sensitive weapons technology across international borders, weapons experts said.** David Albright, the former nuclear inspector, said it is likely that other smugglers will eventually seek to take Khan's place, and some may already have done so. If fact, he said, it would be unwise even to count Khan out. **"He likely still has or can access sensitive nuclear technology. He certainly knows how to organize nuclear smuggling internationally,"** Albright said. **"Khan remains a serious proliferation risk"** (Warrick, 2009).

**Title/Headline:** *Rising Tide Of Militancy Feeds Fears About Pakistan's Nukes*

**Abstract:** Advisers to U.S. President Barack Obama's administration say their worst security nightmare is the possibility that Pakistan -- a nuclear-armed country -- might fall under the control of Al-Qaeda militants. Pakistani Prime Minister Yousuf Raza Gilani insists that no group will be allowed to challenge the authority of the government. Pakistani officials also insist that the country's nuclear arsenal is secure. But U.S. officials including Secretary of State Hillary Clinton this week highlighted concerns about the security situation in Pakistan. **Clinton described advances by Islamic militants in Pakistan as a "mortal threat" to the security and safety of the world.** George Perkovich, director of the Nonproliferation Program at the Carnegie Endowment for International Peace, says he has never been more concerned about the possibility of Pakistan's nuclear weapons falling into the hands of Islamist extremists. **"I would say that I thought [the threat] was exaggerated -- that there were 10 or 12 other [threats] in Pakistan that were more probable and were also very grave -- [but] it's gotten much worse in the last few years, and you have a sense of parts of Pakistan now becoming ungovernable by the Pakistani state,"** Perkovich says. **"Today I'm feeling like we really, really have to focus on the nuclear danger in a way that I wouldn't have said was the case until recently. It's not an exaggeration to say that there is a risk."**

**Locked Up Tight?:** Most experts say they have no doubt that Pakistan's nuclear arsenal is now under tight control by Pakistan's Strategic Plan Division -- the security structure headed by 58-year-old General Khalid Kidwai and intended to keep the weapons from falling into the hands of Islamic militants, Al-Qaeda scientists, or Indian saboteurs. Jeff Lightfoot, assistant director of the Atlantic Council's program on international security, says he is not so worried about militants obtaining Pakistan's nuclear weapons under the army's current system of safeguards. Lightfoot tells RFE/RL that he sees the recent extremist advances as a danger primarily to Pakistan itself -- and by extension, the wider region with Afghanistan and India. **He describes "the greatest threat" as a "gradual bleeding of Pakistani authority" that would leave large parts of the country outside central government control.** Lightfoot calls the military the "glue of the country" but questions its ability to demonstrate that it can control and defend Pakistan's borders and ensure sovereignty, something he labels "an ideology problem." **"In terms of the nuclear weapons and them falling into the hands of terrorists, the army may not necessarily be able to control all of Pakistan,"** Lightfoot adds, "but I don't think that necessarily translates into a breakdown of their nuclear-weapons command-and-control system."

**Key Figure:** Perkovich says current safeguards should ensure that any possible collapse of the civilian government in Islamabad would not affect the security of Pakistan's nuclear weapons -- at least, he says, as long as General Kidwai remains in control. **"The civil government is not relevant to the control of nuclear weapons in Pakistan; it is entirely an army issue,"** Perkovich says. "We do have a strong sense that [Pakistan's nuclear weapons] are controlled by elements in the army that have been selected and are reliable. As long as that control by this current military leadership remains strong, then I think one can have pretty good confidence that these weapons won't be used crazily."

But Perkovich says his concern centers around what could happen if pro-Islamist elements within Pakistan's military and security forces turned against Kidwai. **"The risk on the nuclear side is that the country falls apart or has a civil war that the bad guys win,"** Perkovich says. **"The fear comes if there is a coup within the military so that, somehow, the people now in charge within the military get dispossessed of their nuclear weapons by other people in the military who would be less responsible."** To that "first fear," however, Perkovich adds another alarming scenario: "The second fear is [if] there is basically just a takeover by the Taliban and somehow the military crumbles and flees."

**Guessing Game:** The size of Pakistan's nuclear arsenal is classified information in Islamabad. Pakistan has not signed the Nuclear Non-Proliferation Treaty and has been careful not to disclose the exact number or locations of its nuclear weapons. Estimates by experts and researchers range from around 50 nuclear weapons to as many as 150. Former President General Pervez Musharraf declared in 2007 that the weapons were in a "disassembled state" -- most likely meaning that the warheads were kept separately from the ballistic missiles capable of delivering them to targets as far away as New Delhi, India. General Kidwai has said that the nuclear warheads could be assembled very quickly with land- and air-delivery systems. **Seth Jones, a political scientist who is currently in Pakistan doing research for the RAND Corporation, tells RFE/RL that Pakistan has "dozens" of nuclear weapons dispersed in or near major cities throughout the country.** He says that his recent visits to nuclear facilities in Pakistan suggest the country's weapons are still in a disassembled state. "I've visited a number of the nuclear facilities [in Pakistan] and I'm fairly confident that security procedures are actually pretty good," Jones says. "The ones I've visited have included sites that hold fissile material and also that hold ballistic-missile technology - where one could put nuclear weapons on and [that] would give Pakistan a range to target countries like India if there was an exchange." **He likens those facilities to "what one might see in China or, frankly, in the United States."**

**Dangerous Precedent:** With his firsthand views of security for Pakistan's nuclear arsenal, Jones says he is most concerned about how a destabilized government in Pakistan might promote the spread of nuclear-weapons technology out of the country or to Al-Qaeda militants. **"In most of these scenarios, still, the likelihood that nuclear weapons are going to be used or come in the hands of militants or terrorists is highly unlikely,"** Jones says. But he is quick to add that "where one might get concerned...is elements of the A.Q. Khan network that were involved in building Pakistan's atomic capability -- a range of scientists that have proliferated nuclear material to North Korea, Iran, and several other places." In that respect, he cites a lesson that was learned under previous leadership in Islamabad, before the international community was fretting publicly about any "existential threat" to the Pakistani state posed by extremists. **"We know in the past that there have been talks between members of the A.Q. Khan network and militants, including Al-Qaeda several years ago,"** Jones says. **"So is it possible that some technology at some point falls into the hands of terrorists? I think that's a more likely scenario than actual nuclear weapons coming out of [the Pakistan army's] control"** (Synovitz, 2009).

**Title/Headline:** *Why USA Overlooks Pakistan's Nuclear Plans?*

**Abstract:** In the annals of diplomacy, and now the war-on-terror, the USA's continued overlooking of Pakistan's dangerous role in proliferating nuclear arms within the country, and among rogue states, would remain a great mystery. A recent MSNBC report details more alarming news. "Without any public U.S. reproach, Pakistan is building two of the developing world's largest plutonium production reactors, which experts say could lead to improvements in the quantity and quality of the country's nuclear arsenal, now estimated at 60 to 80 weapons. **"On the dusty plain 110 miles southwest of Islamabad, not far from an area controlled by the Taliban, two large new structures are rising, structures that in light of Pakistan's internal troubles must be considered ominous for the stability of South Asia and, for that matter, the world."** 'Pakistan is really the only country rapidly building up its nuclear forces,' says a U.S. intelligence official. Moreover, he and other U.S. officials say, there long have been concerns about those who run the facility where the reactors are being built near the town of Khushab. "They note that a month before the Sept. 11 terrorist attacks, Khushab's former director met with Osama bin Laden and his deputy, Ayman al-Zawahiri, and offered a nuclear weapons tutorial around an Afghanistan campfire. **"Then there are the billions in U.S. economic and military aid that have permitted Pakistan's military to divert resources to nuclear and other weapons projects."** Now some important questions? **Why did USA kept silent for years when Abdul Qadeer Khan, described as Father of Pakistan Nuclear bomb, pedalled nuclear technology to rogue states (with open support from Pakistan government).** In 2004 Qadeer Khan admitted to hawking nuclear secrets to Iran, Libya and North Korea. Is the USA silent because taking on Pakistan on this issue would endanger its delicate relationship with China, which has supplied the nuclear technology to Pakistan? **Are there business interests within the USA that gain from proliferation of nuclear arms?** What are the implications of all this with the Taliban gaining ground? Latest reports suggest that there is a looming refugee crisis in Pakistan. Thousands of families have begun fleeing from an army offensive against Taliban militants in the Shamuzai area of Pakistan's Swat Valley yesterday. More than half a million refugees have been registered, reports *The Independent*. "Hundreds of thousands of people are pouring out of Swat and the surrounding neighbourhoods as the military and the government of President Asif Ali Zardari -- under intense pressure from Washington -- move to drive the Taliban out from what, until two years ago, was a largely peaceful region. **"Aid officials say that at this point, the overwhelming majority of the displaced -- 428,789 of the 510,496 registered by the authorities since 2 May -- are staying with relatives or friends or else in rented rooms."** Meanwhile in Afghanistan there are no indications that Obama administration would leave the suicidal path which the Bush administration had been following. Obama administration seems to be opting for cosmetic changes (Chauhan, 2009).

**Title/Headline:** *Al-Qaeda Plans For Nuke Takeover In Pak*

**Abstract:** Even as Pakistan plans for its second nuke strike, reports suggested that Jihads backed by the al-Qaeda are preparing to take over the Pak's nuclear arsenal. Senior al-Qaeda leader Abu Yahya al-Libi has released a book called 'Sharpening blades against Pakistan', in which al-Libi has said that it's only a matter of time before the Taliban takes full control of Pakistan. **Libi adds that the Mujahideen should prepare countermeasures against US' plans to prevent the fall of Pakistan's 24-48 nuclear warheads to the US by seizing, dismantling and smuggling Pakistan's nuclear arsenal. Libi is confident the Mujahideen would not only control Pakistan's weapons of mass destruction, but would also gain control of copies of all the secret Pakistan-India agreements designed to prevent the targeting of nuclear facilities in any confrontation between the two countries.** According to Libi preplanning for nuclear arsenal control is a lot better than planning for 30 years of Jihad (The Times Of India, 2009).

**Title/Headline:** *Al Qaeda & Pakistan's Nukes: Apocalypse Soon?*

**Abstract:** It sounds like a routine alarm, but the things are getting serious. The question being asked in this part of the world is: **Who would grab Pakistan's nuclear weapons first...the Al Qaeda or the USA? To this speculation one may add an Aesop's fable: Would it be the "monkey" India/Israel combo snatching the nukes away from the Al Qaeda/USA "cat" ?** Here is a categorical statement from Mustafa Abu al-Yazid (photo above), the leader of al Qaeda's in Afghanistan, in an interview with *Al Jazeera* television: **"Al Qaeda would use Pakistan's nuclear weapons in its fight against the United States."** Considering the increasing overt and covert support that the extremist fringe enjoys within the Pakistan polity, including the Army, this Al Qaeda threat assumes menacing proportions. **All the generous aid that the US administration is pouring out to Pakistan in the hope of winning over this radicalized section is unlikely to work.** Expressing concern over Pakistan's rapidly expanding nuclear arsenal, General Deepak Kapoor, India's chief of army staff, recently called on the international community to prevail on Pakistan to cap its warheads at present levels. India's *DNA* newspaper comments: **"Pakistan's nuclear command and control passed into army hands when General Zia-ul-Haq overthrew Zulfikar Ali Bhutto in a military coup d'etat on July 5, 1977 and has remained with the army ever since. "With Taliban and jihadi terrorism having taken hold of large parts of Pakistan's polity, there are serious doubts whether Pakistan's nuclear warheads are safe from falling into jihadi hands. "As long as the warheads are under the custody of the Pakistan army, such reservations are misplaced. However, in case there is ever a successful coup led by radical extremists with the support of disgruntled elements in the Pakistan army, or a colonels' coup, it will be necessary to either capture the nuclear warheads or bomb the suspected nuclear storage sites to render the warheads ineffective."** Pakistan's *Dawn* newspaper writes: "The correct position convincingly stated by scientist Pervez Hoodbhoy and human rights activists (call them pacifists if you like) is that nuclear weapons, in our situation, are not an asset as is generally said but a liability. "Hillary Clinton's declaration that a nuclear Pakistan is a 'mortal threat to international security' leaves one wondering whether one day, if the Taliban are not exterminated, America will intervene militarily to save the weapons from falling into their hands. "After all the Americans keep firing missiles at the Taliban's suspected hideouts in Pakistan but our army cannot, or does not want to, stop them. And our political leaders keep protesting only for the record." Meanwhile an American think tank says: "Pakistan's military establishment remains focused on conventional conflict with its neighbor India, and cooperation between civilian and military leaders on counterterrorism action remains mixed, despite increasing domestic anxiety about the actions of militants in the country's northwest." (Chauhan, 2009).

**Title/Headline:** *Al Qaeda Says Would Use Pakistani Nuclear Weapons*

**Abstract:** If it were in a position to do so, Al Qaeda would use Pakistan's nuclear weapons in its fight against the United States, a top leader of the group said in remarks aired Sunday. Pakistan has been battling al Qaeda's Taliban allies in the Swat Valley since April after their thrust into a district 100 km (60 miles) northwest of the capital raised fears the nuclear-armed country could slowly slip into militant hands. **"God willing, the nuclear weapons will not fall into the hands of the Americans and the mujahideen would take them and use them against the Americans,"** Mustafa Abu al-Yazid, the leader of al Qaeda's in Afghanistan, said in an interview with *Al Jazeera* television. Abu al-Yazid was responding to a question about U.S. safeguards to seize control over Pakistan's nuclear weapons in case Islamist fighters came close to doing so. **"We expect that the Pakistani army would be defeated (in Swat) ... and that would be its end everywhere, God willing."** Asked about the group's plans, the Egyptian militant leader said: **"The strategy of the (al Qaeda) organization in the coming period is the same as in the previous period: to hit the head of the snake, the head of tyranny -- the United States. "That can be achieved through continued work on the open fronts and also by opening new fronts in a manner that achieves the interests of Islam and Muslims and by increasing military operations that drain the enemy financially."** The militant leader suggested that naming a new leader for the group's unit in the Arabian Peninsula, Abu Basir al-Wahayshi, could revive its campaign in Saudi Arabia, the world's top oil exporter. "Our goals have been the Americans ... and the oil targets which they are stealing to gain

power to strike the mujahideen and Muslims." "There was a setback in work there for reasons that there is no room to state now, but as of late, efforts have been united and there is unity around a single leader." **Abu al-Yazid, also known as Abu Saeed al-Masri, said al Qaeda will continue "with large scale operations against the enemy" -- by which he meant the United States. "We have demanded and we demand that all branches of al Qaeda carry out such operations," he said, referring to attacks against U.S.-led forces in Iraq and Afghanistan.** The militant leader said al Qaeda would be willing to accept a truce of about 10 years' duration with the United States if Washington agreed to withdraw its troops from Muslim countries and stopped backing Israel and the pro-Western governments of Muslim nations. Asked about the whereabouts of al Qaeda's top leaders, he said: "Praise God, sheikh Osama (bin Laden) and sheikh Ayman al-Zawahri are safe from the reach of the enemies, but we would not say where they are; moreover, we do not know where they are, but we're in continuous contact with them" (Ersan, 2009).

**Title/Headline:** *Loose Nukes Greatest Danger In Pakistan'*

**Abstract:** The threat of insiders in the nuclear establishment working with outsiders seeking a bomb is nowhere greater than in Pakistan, according to a former officer of the Central Intelligence Agency (CIA). **"Pakistani authorities have a dismal track record in thwarting insider threats,"** writes Rolf Mowatt-Larssen, who served as a CIA officer for 23 years, in the July/August issue of Arms Control Today, published by the Arms Control Association. For example, the network run by the father of the Pakistani bomb, Abdul Qadeer Khan, channeled sensitive nuclear technologies to Iran, Libya, and North Korea for years under the noses of the establishment before it was taken down in 2003, to the best of our knowledge, he noted. **"The Umma-Tameer-e-Nau (UTN), founded by Pakistani nuclear scientists with close ties to Al Qaeda and the Taliban, was headed by Sultan Bashiruddin Mahmood, who had been in charge of Pakistan's Khushab reactor."** Mahmood discussed Al Qaeda's nuclear aspirations with Osama bin Laden, Mowatt-Larssen wrote. **He also cites Mahmood as saying, bin Laden asked him how he could construct a bomb if the group already had the material.** "It is stunning to consider that two of the founding fathers of Pakistan's weapons programme embarked independently on clandestine efforts to organize networks to sell their country's most precious secrets for profit," he says. "There are troubling indications that these insider threats are not anomalies," writes Mowatt-Larssen, a senior fellow at Harvard University's Belfer Centre for Science and International Affairs, who until January 2009 headed the US Department of Energy's intelligence and counterintelligence office. **"In the Khan and UTN cases, the rogue senior officers and their cohorts in the nuclear establishment were not caught by Pakistan's security establishment. It would be foolhardy to assume that such lapses could not happen again,"** he says. The Pakistani military, intelligence, and nuclear establishments are not immune to rising levels of extremism in the country, Mowatt-Larssen says suggesting, **"there is a lethal proximity between terrorists, extremists, and nuclear weapons insiders."** Thus **"The greatest threat of a loose nuke scenario stems from insiders in the nuclear establishment working with outsiders, people seeking a bomb or material to make a bomb. Nowhere in the world is this threat greater than in Pakistan. As Pakistan moves forward to face an uncertain future, the government faces an ongoing challenge to its authority and myriad threats against which it must defend, the US expert says. "With the passage of time, the odds steadily increase that Pakistan will face a serious test of its nuclear security,"** he says suggesting, **"for its part, the United States must be fully prepared to respond to this eventuality."** "Increasing the level of transparency and predictability between India and Pakistan is (also) absolutely vital," Mowatt-Larssen says. "Neither party can afford to make a miscalculation in the heat of the moment that might escalate into a nuclear confrontation" (Kumar, 2009).

**Source:** The Sunday Times, Rhys Blakely

**Title/Headline:** *Terrorists 'Have Attacked Pakistan Nuclear Sites Three Times'*

**Abstract:** Terrorists have attacked three of Pakistan's military nuclear facilities in the past two years and there is a serious danger that they will gain access to the country's atomic arsenal, according to a journal published by the US Military Academy at West Point. The report, written by Professor Shaun Gregory, a security specialist at Bradford University, comes amid **mounting fears that the Taleban and al-Qaeda will breach Pakistan's military nuclear sites – most of which are in or near insurgent strongholds in the north and west of the country. The most serious attack was a strike by two suicide bombers on the Wah Cantonment Ordnance Complex, thought to be one of Pakistan's main nuclear weapons assembly plants, about 18 miles northwest of Islamabad, in August 2008. The incident, which claimed 70 lives, was widely reported but little mention was made of the nuclear risk. Other attacks included the suicide bombing of a nuclear missile storage facility at Sargodha, in central Punjab, in November 2007 and a suicide attack on Pakistan's nuclear airbase at Kamra, near Wah, on December 10, 2007. In the Counter Terrorism Center Sentinel,** Professor Gregory writes that the attacks illustrate "a clear set of weaknesses and vulnerabilities" in Pakistan's nuclear security regime. **The strikes occurred as Pakistan sought to ramp up its nuclear capability — and as US special forces formulated contingency plans in the event of the country falling to insurgents. In June of 2009, Mustafa Abu al-Yazid, an al-Qaeda commander in Afghanistan, suggested that the group would show no hesitation in using nuclear weapons. "God willing... the mujahideen would take them and use them against the Americans,"** he told al-Jazeera television. **Pakistan's security regime is modeled on the American system and includes the separation of warheads from detonators, which are stored in underground bunkers staffed by highly vetted personnel. Many details of the country's nuclear program — including the location of many warheads and their exact number — remain unknown. However, most of the country's nuclear weapons sites were built in the north and west of the country in the 1970s and 1980s, mainly to distance them from India — a ploy which now means many are located in insurgent areas. There are also concerns that vetting programs may not identify Islamist sympathizers, whose influence extends far up Pakistan's military hierarchy. Professor Gregory writes: "There is already the well-known case of two senior Pakistan Atomic Energy Commission scientists, Sultan Bashiruddin Mahmood and Chaudhry Abdul Majeed, who travelled to Afghanistan in 2000 and again shortly before 9/11 for meetings with Osama bin Laden himself, the content of which has never been disclosed"** (Blakely, 2009).

**Title/Headline:** *Al-Qaeda Seeking Nuclear Secrets From Pakistan: Holbrooke*

**Abstract:** Al-Qaeda is trying to seek nuclear secrets from Pakistan and it remains as dangerous as ever, Special US Representative for Pakistan and Afghanistan Richard Holbrooke said on Wednesday. "Al-Qaeda is still there in the region, ever dangerous and publicly asking people to attack the US and publicly asking nuclear engineers to give them nuclear secrets from Pakistan," Holbrooke said at a reception hosted by the Congressional Caucus on Afghanistan at the Capitol Hill. Holbrooke ? The point man of the Obama Administration for Afghanistan and Pakistan - said the US is not in Afghanistan to support the elections, but it is there for its own national interest and security. "We are not in Afghanistan for the election" (Indian Express, 2009).

**Date:** November 13, 2009

**Source:** The Washington Post, R. Jeffrey Smith, Joby Warrick

**Title/Headline:** *A Nuclear Power's Act Of Proliferation*

**Abstract:** A.Q. Kahn asserted that China gave Pakistan enough enriched uranium in '82 to make nuclear 2 bombs. Worst of all, the recent discovery of nuclear weapons blueprints on computers found in Switzerland and Dubai has prompted questions about whether the damage inflicted by the network was truly contained -- or even understood. It is possible, U.S. officials concede, that **Khan and his allies shared nuclear secrets with still-unknown countries and, perhaps, terrorist groups, as well.** In 1982, a Pakistani military C-130 left the western Chinese city of Urumqi with a highly unusual cargo: enough weapons-grade uranium for two atomic bombs, **according to accounts written by the father of Pakistan's nuclear weapons program, Abdul Qadeer Khan, and provided to The Washington Post.** The uranium transfer in five stainless-steel boxes was part of a broad-ranging, secret nuclear deal approved years earlier by Mao Zedong and Prime Minister Zulfikar Ali Bhutto **that culminated in an exceptional, deliberate act of proliferation by a nuclear power, according to the accounts by Khan. According to Khan, the uranium cargo came with a blueprint for a simple weapon that China had already tested, supplying a virtual do-it-yourself kit that significantly speeded Pakistan's bomb effort. The transfer also started a chain of proliferation: U.S. officials worry that Khan later shared related Chinese design information with Iran; in 2003, Libya confirmed obtaining it from Khan's clandestine network. U.S. officials say they have known about the transfer for decades and once privately confronted the Chinese -- who denied it -- but have never raised the issue in public or sought to impose direct sanctions on China for it.** "Upon my personal request, the Chinese Minister had gifted us 50 kg [kilograms] of weapon-grade enriched uranium, enough for two weapons," Khan wrote in a previously undisclosed 11-page narrative of the Pakistani bomb program that he prepared after his January 2004 detention for unauthorized nuclear commerce. "The Chinese gave us drawings of the nuclear weapon, gave us kg50 enriched uranium," he said in a separate account sent to his wife several months earlier. Pakistan has never allowed the U.S. government to question Khan or other top Pakistani officials directly, **prompting Congress to demand in legislation approved in September that future aid be withheld until Obama certifies that Pakistan has provided "relevant information from or direct access to Pakistani nationals" involved in past nuclear commerce.** "The speed of our work and our achievements surprised our worst enemies and adversaries and the West stood helplessly by to see a Third World nation, unable even to produce bicycle chains or sewing needles, mastering the most advanced nuclear technology in the shortest possible span of time," Khan boasts in the 11-page narrative he wrote for Pakistani intelligence officials about his dealings with foreigners while head of a key nuclear research laboratory. **According to one of the documents, a five-page summary by Khan of his government's dealmaking with China, the terms of the nuclear exchange were set in a mid-1976 conversation between Mao and Bhutto. Two years earlier, neighboring India had tested its first nuclear bomb, provoking Khan -- a metallurgist working at a Dutch centrifuge manufacturer -- to offer his services to Bhutto. Mohammed Zia ul-Haq, the nation's military ruler, "was worried," Khan said, and so he and a Pakistani general who helped oversee the nation's nuclear laboratories were dispatched to Beijing with a request in mid-1982 to borrow enough bomb-grade uranium for a few weapons. After winning Chinese leader Deng Xiaoping's approval, Khan, the general and two others flew aboard a Pakistani C-130 to Urumqi.** Khan says they enjoyed barbecued lamb while waiting for the Chinese military to pack the small uranium bricks into lead-lined boxes, 10 single-kilogram ingots to a box, for the flight to Islamabad, Pakistan's capital (Smith & Warrick, 2009).

THE SUNDAY TIMES

**Date:** January 17, 2010

**Source:** The Sunday Times, Christina Lamb

**Title/Headline:** *Elite US Troops Ready To Combat Pakistani Nuclear Hijacks*

**Abstract:** The US army is training a crack unit to seal off and snatch back Pakistani nuclear weapons in the event that militants, possibly from inside the country's security apparatus, get their hands on a nuclear device or materials that could make one. The specialized unit would be charged with recovering the nuclear materials and securing them. The move follows growing anti-Americanism in Pakistan's military, a series of attacks on sensitive installations over the past two years, several of which housed nuclear facilities, and rising tension that has seen a series of official complaints by US authorities to Islamabad in the past fortnight. "What you have in Pakistan is nuclear weapons mixed with the highest density of extremists in the world, so we have a right to be concerned," said Rolf Mowatt-Larssen, a former CIA officer who used to run the US energy department's intelligence unit. "There have been attacks on army bases which stored nuclear weapons and there have been breaches and infiltrations by terrorists into military facilities."

Professor Shaun Gregory, director of the Pakistan security research unit at Bradford University, has tracked a number of attempted security breaches since 2007. “The terrorists are at the gates,” he warned. The Al-Qaeda leadership has made no secret of its desire to get its hands on weapons for a “nuclear 9/11”. “I have no doubt they are hell-bent on acquiring this,” said Mowatt-Larssen. “These guys are thinking of nuclear at the highest level and are approaching it in increasingly professional ways.” Nuclear experts and US officials say the biggest fear is of an inside job amid growing anti-American feeling in Pakistan. Last year 3,021 Pakistanis were killed in terrorist attacks, more than in Afghanistan, yet polls suggest Pakistanis consider the United States to be a greater threat than the Taliban. “You have 8,000-12,000 [people] in Pakistan with some type of role in nuclear missiles — whether as part of an assembly team or security,” said Gregory. “It’s a very large number and there is a real possibility that among those people are sympathisers of terrorist or jihadist groups who may facilitate some kind of attack.” Pakistan is thought to possess about 80 nuclear warheads. Although the weapons are well guarded, the fear is that materials or processes to enrich uranium could fall into the wrong hands. “All it needs is someone in Pakistan within the nuclear establishment and in a position of key access to become radicalized,” said Mowatt-Larssen. “This is not just theoretical. It did happen — Pakistan has had inside problems before” (Lamb, 2010).

**Title/Headline:** *Al-Qaida Seeking Tools For Nuclear 9/11: Intel Agents 'Certain' Terrorists Will Try For Pakistan's Bombs*

**Abstract:** Agents for Britain's MI6 Secret Intelligence Service say they are "certain" al-Qaida is poised to try and grab some of the 80 nuclear weapons that Pakistan possesses, according to a report from Joseph Farah's G2 Bulletin. The al-Qaida leadership — Osama bin Laden and Ayman a-Zawahri — are believed to have spent the winter months in Pakistan's Tribal Areas finalizing their plans for an attack. It will spearhead al-Qaida's global network and its capability to carry out a wide range of terrorist onslaughts. **The MI6 analysis is based on what the agency calls "al-Qaida's zone of terrorism." It includes the Afghan Taliban, the Islamic Movement of Uzbekistan in East Turkistan and al-Shabaab in Somalia. In the Sahara region al-Qaida has reformed Islamic Magreb (AQIM) which has grown out of Algerian resistance movement. But nothing poses more of a threat than al-Qaida's plan to steal Pakistan's nuclear weapons.** MI6 agents in Pakistan say there is mounting evidence "the leadership is thinking of a nuclear 9/11 and are approaching it in increasingly professional ways." Nuclear experts have told the Secret Intelligence Service that the biggest fear is of "an inside job." One analyst said, "There are up to 12,000 people in Pakistan with some kind of role which brings them into nuclear facilities, whether as part of a team of scientists or working in security." Professor Shaun Gregory, director of the Pakistan security research center at Bradford University in England, has tracked a number of attempted security breaches in the past four years at Pakistan's nuclear facilities. Past attacks have included a suicide bomber striking Kamra where Pakistan Air Force F-16 jet aircraft are stationed with nuclear bombs. Another attack was against a nuclear weapons complex in Punjab where a nuclear warhead assembly plant is based (World Net Daily, 2010).

**Title/Headline:** *Al Qaeda Seeking To Provoke New India-Pakistan War – Gates*

**Abstract:** Defense Secretary Robert Gates stated that Al Qaeda is seeking to destabilize the entire South Asia region and could trigger a new war between Pakistan and India, and that under Al Qaeda's "syndicate" in Afghanistan and Pakistan are trying "to destabilize not just Afghanistan, not just Pakistan, but potentially the whole region by provoking a conflict perhaps between India and Pakistan through some provocative act" (Dow Jones, 2010).

**Date:** January 21, 2010

**Source:** Bloomberg, Viola Gienger

**Title/Headline:** *Gates In Pakistan To Discuss New Strikes On Taliban*

**Abstract:** Secretary Gates stated that that Islamists working under “the umbrella of Al Qaeda” want to destabilize the entire South Asian region by provoking a conflict between India and Pakistan. That law requires a cutoff of aid if Pakistan fails to provide civilian control of its military, cooperate with the U.S. on counter-terrorism, protect its nuclear arsenal and enforce international nuclear non-proliferation rules. Those conditions triggered accusations from opposition politicians and Pakistan’s military of interference in the country’s internal affairs. Such conditions on U.S. aid evoke bitter memories in Pakistan of the 1990s, when the so-called Pressler amendment forced a halt to most U.S. aid because of evidence that Pakistan was developing nuclear weapons. The cutoff in U.S. military aid hampered American efforts to influence Pakistan’s powerful armed forces, and led many Pakistani leaders to call the U.S. an unreliable ally. Al Qaeda leaders are believed to have holed up in ungoverned tribal areas along the Pakistan-Afghanistan border since the U.S. toppled the group’s Taliban protectors in the wake of the September 11th attacks. Obama last year ordered 30,000 more U.S. troops to Afghanistan to battle the Taliban insurgency. The U.S. is trying to balance its rapidly expanding ties with India, the world’s largest democracy and the fastest-growing economy after China, even as the Obama administration strengthens links with Pakistan (Gienger, 2010).

**Title/Headline:** *Pakistan Rules Out Nuclear Fissile Talks*

**Abstract:** Pakistan informed world powers that it cannot accept the start of global negotiations to halt production of nuclear bomb-making fissile material in the near future, diplomats told *Reuters*. The move represents a potential setback for efforts by both the Obama administration and United Nations to forge ahead with what is widely seen as the next step in multilateral nuclear disarmament. Zamir Akram, Pakistan's ambassador to the U.N. in Geneva, disclosed Islamabad's position during a diplomatic lunch hosted by Chinese ambassador Wang Qun. "We are not in a position to accept the beginning of negotiations on a cut-off treaty in the foreseeable future," Akram was quoted as saying. The U.N.-sponsored Conference on Disarmament (CD) is trying to launch negotiations to halt production of fissile material (highly-enriched uranium and plutonium) and clinch what is known in the jargon as a fissile material "cut-off" treaty or FMCT. Pakistan is resisting U.S. pressure to dismantle militant groups, including Afghan Taliban based on its soil, because it sees them as potential allies in its rivalry with India. "Clearly they have very strong concerns," a diplomat said, referring to the fissile issue. "This is a very fundamental and sensitive issue back in Pakistan." Pakistan blocked adoption of the conference's agenda for 2010, calling for the inclusion of additional items, after holding up negotiations last year because of national security concerns about the focus of the talks. U.S. Defense Secretary Robert Gates sought to build bridges with the next generation of military leaders in Islamabad on Friday and end a "trust deficit" he said has hampered cooperation against Islamist militancy (Nebehay, 2010).

**Title/Headline:** *India And Pakistan Are Nuclear States – Time To Accept It*

**Abstract:** In May 1998, surprise nuclear tests by India and Pakistan transformed regional strategic calculations and added a dangerous new dimension to tensions between the two. According to Taylor Branch, writing in *The Clinton Tapes: Wrestling History with the President*, Indian officials who spoke with Bill Clinton were fully aware of the potential devastation a clash between the two nations could lead to, calculating that a doomsday nuclear volley would kill 300 to 500 million Indians while annihilating all 120 million Pakistanis (although the Pakistani side insisted its rugged mountain terrain would shield more survivors than the exposed plains of India). But regardless of the accuracy of these numbers, and although the two countries' military strategies differ, (India's is based on conventional superiority, while Pakistan tends to emphasize nuclear deterrence to cancel out this advantage) **one thing is clear—the threat of nuclear terrorism looms large over both.** In December 1998, Osama Bin Laden told *Time* magazine that acquiring weapons for the defence of Muslims is a religious duty. 'If I have indeed acquired these weapons, then I thank God for enabling me to do so. And if I seek to acquire these weapons, I am carrying out a duty,' he is reported as saying. Even if the statement was merely rhetoric, it demonstrates intent. However, a number of reports suggest that Bin Laden's statement was more than just talk. **In August 2001, two Pakistani scientists, Sultan Bashiruddin Mahmood and Chaudary Abdul Majeed, met Bin Laden and Mullah Omar in Afghanistan. The two scientists were detained on October 23, 2001, 'for questioning.'** Majid was a retired nuclear fuel expert from the Pakistan Institute of Nuclear Science and Technology, while Mahmood worked on the secret Pakistani gas centrifuge program that ultimately produced the highly enriched uranium used in Pakistan's nuclear weapons. But even without acquiring access to weapons, there are other means of groups such as al-Qaeda engaging in nuclear terrorism. Radioactive dispersal devices, for example, are particularly suited to non-state actors as they are portable and can be used to meet one of the common aims of terrorism, which is to cause significant economic damage. Combined with an explosive device, RDDs can be used to create dirty bombs, which can cause both immediate casualties from their explosions and long-term health and psychological damages from radiation. **Many analysts see Pakistan, and specifically Punjab province, as the most likely source of materials for extremists to undertake such attacks, and the precision of the recent terrorist attacks in Punjab on several Pakistani military facilities suggest there has been some inside help for militants. On October 10, for example, terrorists dressed as Pakistani soldiers entered the Pakistani Army's headquarters at Rawalpindi and killed six soldiers, including a brigadier.** Subsequent investigations pointed to Ilyas Kashmiri, who once served in the Army, as a potential suspect. Back in 2003, meanwhile, there was a suicide assassination attempt on then-Pakistani President Pervez Musharraf's convoy, from which he narrowly escaped. **The investigation, as recorded in a book authored by Musharraf, led to the arrest of low-level army officers who had conspired with Islamists, and who were angry over his co-operation with the United States in cracking down on extremists in the tribal areas.** In India, though, the threats have been more recent, and point to the bigger danger of the link between nuclear facilities and militants. **Earlier this month, it was reported that the Lashkar-e-Taiba, an extremist group, is planning to target nuclear scientists (security has reportedly been tightened around several of the alleged targets) while there have also been reports of plans to strike the country's nuclear infrastructure.** This all comes as India works to expand its nuclear capacity after receiving a waiver from the Nuclear Suppliers Group's rules that allow its civilian nuclear deal with the United States to proceed, following strong US lobbying. India has signed treaties with several countries that will help it expand its nuclear infrastructure, but such an expansion needs to be matched by upgrades in security. Meanwhile, Bangladesh is also working to establish a civilian nuclear power plant after signing a memorandum of understanding on peaceful use of nuclear energy with Russia. **Like India and Pakistan, it also faces the challenge of dealing with radicalized groups. Bringing India into the non-proliferation regime will be crucial if Pakistan is also to be drawn in, moves that would both help reduce the risk of nuclear conflict as well as the risk of nuclear materials falling into the wrong hands.** India and Pakistan made a good start in the field of nuclear cooperation when they signed an agreement in 1989 not to attack each other's nuclear facilities. And in a more recent positive sign, in November 2008, Pakistani President Asif Ali Zardari stated Pakistan was willing to commit to a no first-use policy for its nuclear weapons—a policy he said he could secure backing from parliament for. However, only 4 days after the suggestion terrorists struck Mumbai, killing 176 people and stirring up tensions between the two. **Pakistan's refusal to join the nuclear proliferation regime is also linked to India's rejection of the same system. Both countries are not bound by the conditions reached after the Nuclear Non-Proliferation Treaty was agreed, such as the 1997 Additional Protocol, to strengthen the non-proliferation regime.** As a consequence, the continued exclusion of Pakistan and India

from the non-proliferation regime is actually intensifying the nuclear arms race in South Asia. Bringing India into the regime will mean addressing its objections to becoming part of the arrangement-it believes that the non-proliferation regime is discriminatory as it is rooted in the NPT, which only gives nuclear weapons status to five countries. The United States has already taken a significant step toward accepting India through the Indo-US civilian nuclear agreement, the framework for which was agreed in 2005. Here, the US defended the exception for India because of its impeccable record in non-proliferation. But the move in turn upset Pakistan, which argued the exceptional treatment for India risked triggering an arms race. **It seems clear then that granting both countries de-facto nuclear weapons state status through suitable amendments to the NPT would be the best way of curbing the on-going arms race and reducing the threat of nuclear terrorism by making it easier for the International Atomic Energy Agency to hold the nuclear infrastructures of both countries to the highest scrutiny.** Many nations may balk at such a move. But the stakes are too high to not let pragmatism be the guiding basis for policy (Puri, 2010).

**Source:** Press TV

**Title/Headline:** *Biden: Pakistan Is My Greatest Concern*

**Abstract:** U.S. Vice President Joe Biden expressed serious concerns over the growing militancy in Pakistan and the fate of that country's nuclear weapons. Biden stated that, "I think it's a big country. **It has nuclear weapons that are able to be deployed. It has a real significant minority of radicalized population.**" Biden added that Pakistan is not a completely functional democracy. "It is not a completely functional democracy in the sense we think about it, and so that's my greatest concern." His remarks came as the US Director of National Intelligence Dennis Blair reassured that the Pakistani military is aware of the consequences of its nuclear arsenal falling into the wrong hands. **Senior officials in Washington have long accused elements in the Pakistani Inter-Services Intelligence (ISI) of supporting extremists.** President Barack Obama's administration has accused Pakistan of not doing enough to stem the flow of arms and support to the Taliban and Al-Qaeda across its borders (Press TV, 2010).

**Title/Headline:** *Pakistan's Nuclear Weapons: Proliferation And Security Issues*

**Abstract:** Pakistan's nuclear arsenal consists of approximately 60 nuclear warheads, although it could be larger. Islamabad is producing fissile material, adding to related production facilities, and deploying additional delivery vehicles. These steps will enable Pakistan to undertake both quantitative and qualitative improvements to its nuclear arsenal. **Whether and to what extent Pakistan's current expansion of its nuclear weapons-related facilities is a response to the 2008 U.S.-India nuclear cooperation agreement is unclear.** Islamabad does not have a public, detailed nuclear doctrine, but its "minimum credible deterrent" is widely regarded as primarily a deterrent to Indian military action. **Pakistan has in recent years taken a number of steps to increase international confidence in the security of its nuclear arsenal. In addition to dramatically overhauling nuclear command and control structures since September 11, 2001, Islamabad has implemented new personnel security programs.** Moreover, Pakistani and some U.S. officials argue that, since the 2004 revelations about a procurement network run by former Pakistani nuclear official A.Q. Khan, Islamabad has taken a number of steps to improve its nuclear security and to prevent further proliferation of nuclear-related technologies and materials. A number of important initiatives, such as strengthened export control laws, improved personnel security, and international nuclear security cooperation programs have improved Pakistan's security situation in recent years. Instability in Pakistan has called the extent and durability of these reforms into question. **Some observers fear radical takeover of a government that possesses a nuclear bomb, or proliferation by radical sympathizers within Pakistan's nuclear complex in case of a breakdown of controls.** While U.S. and Pakistani officials continue to express confidence in controls over Pakistan's nuclear weapons, continued instability in the country could impact these safeguards.

**Background:** Chronic political instability in Pakistan and the current offensive against the Taliban in the northwest of the country have called attention to the issue of the security of the country's nuclear weapons. Some observers fear that Pakistan's strategic nuclear assets could be obtained by terrorists, or used by elements in the Pakistani government. Chair of the Joint Chiefs of Staff Admiral Michael Mullen described U.S. concern about the matter during a September 22, 2008, speech: To the best of my ability to

understand it—and that is with some ability—the weapons there are secure. And that even in the change of government, the controls of those weapons haven't changed. That said, they are their weapons. They're not my weapons. And there are limits to what I know. **Certainly at a worst-case scenario with respect to Pakistan, I worry a great deal about those weapons falling into the hands of terrorists and either being proliferated or potentially used. And so, control of those, stability, stable control of those weapons is a key concern.** And I think certainly the Pakistani leadership that I've spoken with on both the military and civilian side understand that. U.S. officials continue to be concerned about the existential threat posed by nuclear weapons in a destabilized Pakistan. General David H. Petraeus, Commander, U.S. Central Command, testified March 31, 2009, that **"Pakistani state failure would provide transnational terrorist groups and other extremist organizations an opportunity to acquire nuclear weapons and a safe haven from which to plan and launch attacks."** Nevertheless, U.S. officials have generally expressed confidence in the security of Pakistan's nuclear weapons. President Obama addressed this issue in an April 29, 2009, press conference, stating, **"I'm confident that we can make sure that Pakistan's nuclear arsenal is secure, primarily, initially, because the Pakistani army, I think, recognizes the hazards of those weapons falling into the wrong hands. We've got strong military-to-military consultation and cooperation."** He also recognized the sensitivity of the issue for Pakistan, saying, **"We want to respect their sovereignty, but we also recognize that we have huge strategic interests, huge national security interests in making sure that Pakistan is stable and that you don't end up having a nuclear-armed militant state."** Declining to engage in "hypotheticals" when asked if the United States is ready to secure the nuclear arsenal if the Pakistani government could not do so, President Obama said he felt **"confident that that nuclear arsenal will remain out of militant hands."** General Petraeus reaffirmed this confidence on May 10, 2009: **"With respect to the—the nuclear weapons and—and sites that are controlled by Pakistan ... we have confidence in their security procedures and elements and believe that the security of those sites is adequate."** Admiral Mullen echoed this assessment during a May 14, 2009, hearing before the Senate Armed Services Committee. More recently, Director of National Intelligence Dennis Blair told the House Permanent Select Committee on Intelligence February 3, 2010, that **"from what we see of measures that they take," Pakistan is keeping its nuclear weapons secure. Former Pakistani President Pervez Musharraf told a journalist that Islamabad has "given State Department nonproliferation experts insight into the command and control of the Pakistani arsenal and its onsite safety and security procedures," but U.S. knowledge of Pakistan's arsenal remains limited, according to U.S. officials. Mullen stated that "we're limited in what we actually know" about Islamabad's nuclear arsenal. Leon Panetta, Director of the Central Intelligence Agency, similarly acknowledged in a May 18 speech that the United States does not possess the intelligence to locate all of Pakistan's nuclear weapons-related sites. Pakistani efforts to improve the security of its nuclear weapons have been on-going and include some cooperation with the United States. Since the 1998 Pakistani and Indian nuclear tests, the international community has increased attention to reducing the risk of nuclear war in South Asia. The two countries most recently came to the brink of full-scale war in 1999 and 2002, and, realizing the dangers, have developed some risk reduction measures to prevent accidental nuclear war. Islamabad has also developed its command and control systems and improved security of military and civilian nuclear facilities. Since the 2004 revelations of an extensive international nuclear proliferation network run by Pakistani nuclear official Abdul Qadeer Khan, as well as possible connections between Pakistani nuclear scientists and Al Qaeda, Islamabad has made additional efforts to improve export controls and monitor nuclear personnel. The main security challenges for Pakistan's nuclear arsenal are keeping the integrity of the command structure, ensuring physical security, and preventing illicit proliferation from insiders. Pakistan continues to produce fissile material for weapons and appears to be augmenting its weapons production facilities, as well as deploying additional delivery vehicles—steps that will enable both quantitative and qualitative improvements in Islamabad's nuclear arsenal.**

**Nuclear Weapons:** Pakistan's nuclear energy program dates back to the 1950s, but it was the loss of East Pakistan (now Bangladesh) in a bloody war with India that probably triggered a political decision in January 1972 (just one month later) to begin a secret nuclear weapons program.<sup>4</sup> Deterring India's nuclear weapons and augmenting Pakistan's inferior conventional forces are widely believed to be the primary missions for Islamabad's nuclear arsenal. Observers point to India's 1974 "peaceful" nuclear explosion as the pivotal moment that gave additional urgency to the program. **Pakistan produced fissile material for its nuclear weapons using gas-centrifuge-based uranium enrichment technology, which it mastered by the mid-1980s. Highly-enriched uranium (HEU) is one of two types of fissile material used in nuclear weapons; the other is plutonium.** The country's main enrichment facility is a centrifuge plant located at Kahuta; Pakistan may have other enrichment sites. Islamabad gained technology from many sources. This extensive assistance is reported to have included uranium enrichment technology from Europe, blueprints for a small nuclear weapon from China, and missile technology from China. **The United States had information during the 1970s and early 1980s that Pakistan was pursuing nuclear weapons designs, but exactly when Pakistan produced a workable nuclear explosive device is unclear. A 1985 National Intelligence Council report stated that Pakistan "probably has a workable design for a nuclear explosive device" and was "probably ... a year or two away from a capacity to produce enough" highly enriched uranium for such a device. A 1987 National Security Council (NSC) memorandum described Pakistan's "continued pursuit ... of its nuclear weapons option."** A 1993 NSC report to Congress stated that Islamabad's nuclear weapons efforts "culminated with the capability to rapidly assemble a nuclear device if necessary by the end of the 1980s." A.Q. Khan stated in an interview published in May 1998 that Islamabad "attained" the capability to detonate such a device "at the end of 1984." Similarly, **Khan reportedly stated during a January 2010 speech that Pakistan "had become a nuclear power" in 1984 or 1985. U.S. and Pakistani officials who were in government in 1990 indicated during a 1994 meeting that Islamabad decided sometime after October 1989 to resume producing HEU<sup>11</sup> (Pakistan had previously told the United States that it would produce only LEU<sup>12</sup>). However, another Pakistani official suggested during the same meeting that the decision may have happened sooner. In any case, President Bush's failure to certify in 1990 that Pakistan did not "possess a nuclear explosive device" led to a cut-off in military and financial aid under the Pressler Amendment. When India conducted nuclear weapon tests on May 12, 1998, Pakistan's government responded two weeks later on May 28 and May 30 with six tests in western Pakistan. Test yields were about 10 kilotons and 5 kilotons, according to seismic analysis.<sup>15</sup> The United States imposed additional sanctions after the tests, but these were lifted after the September 11, 2001, terrorist attacks on the United States. According to most public estimates, **Pakistan has about 60 nuclear weapons, though it could have more;<sup>16</sup> a recent public estimate from two prominent experts on the subject stated that the country has between 70 and 90 nuclear weapons.<sup>17</sup> Pakistan's nuclear warheads use an implosion design with a solid core of approximately 15-20 kilograms of HEU. Islamabad reportedly continues to produce HEU for weapons at a rate of at least 100 kilograms per year. Pakistan has also pursued plutonium-based****

warheads and continues to produce plutonium for weapons. Islamabad has received Chinese and European assistance for at least some of its plutonium program. The 40-50 megawatt heavy-water Khushab plutonium production reactor has been operating since 1998.<sup>20</sup> It appears that Islamabad is constructing two additional heavy-water reactors, which will expand considerably Pakistan's plutonium production capacity, at the same site. Additionally, Pakistan has a reprocessing facility<sup>22</sup> at the Pakistan Institute of Science and Technology (PINSTECH) and is apparently constructing other such facilities. *Nuclear Fuel* reported in 2000 that, according to "senior U.S. government officials," Islamabad had begun operating a "pilot-scale" reprocessing facility at the New Laboratories facility at PINSTECH. Pakistan also appears to be constructing a second reprocessing facility at the site and may be completing a reprocessing facility located at Chasma. Islamabad's construction of additional nuclear reactors and expansion of its reprocessing capabilities could indicate plans to increase and improve Pakistan's nuclear weapons arsenal in the near future. Indeed, Defense Intelligence Agency Director Michael Maples told the Senate Armed Services Committee on March 10, 2009, that "Pakistan continues to develop its nuclear infrastructure, expand nuclear weapon stockpiles and seek more advanced warheads and delivery systems." Similarly, Admiral Mullen confirmed during the May 14 hearing that the United States has "evidence" that Pakistan is expanding its nuclear arsenal.

**Responding To India?:** Pakistani officials have indicated that they have already determined the arsenal size needed for a minimum nuclear deterrent and that they will not engage in an arms race with India. The government's National Command Authority (NCA) "expressed satisfaction" regarding "the effectiveness of Pakistan's strategic deterrence," according to a January 13, 2010, statement. Nevertheless, Pakistan appears to be increasing its fissile production capability and improving its delivery vehicles in order to hedge against possible increases in India's nuclear arsenal. Islamabad may also accelerate its current nuclear weapons efforts. India has stated that it needs only a "credible minimum deterrent," but New Delhi has never defined what it means by such a deterrent and has refused to sign the Comprehensive Test Ban Treaty. Furthermore, both the agreement and associated 2008 decision by the Nuclear Suppliers Group (NSG) to exempt India from some of its export guidelines will renew New Delhi's access to the international uranium market. This access will result in more indigenous Indian uranium available for weapons because it will not be consumed by India's newly safeguarded reactors. Pakistani officials have stated that the government may need to increase significantly its nuclear arsenal in response to possible Indian plans to do the same. According to an April 2006 television broadcast, Pakistani officials from the government's NCA expressed "concern" that the 2008 U.S.-India nuclear cooperation agreement could tilt the strategic balance between India and Pakistan in favor of the former. The officials suggested that Islamabad may need to increase or improve its nuclear arsenal in order to "to meet all requirements of minimum credible defence deterrence." Similarly, Pakistan's Permanent Representative to the International Atomic Energy Agency (IAEA) wrote in July 2008 that the agreement could cause a nuclear arms race between Pakistan and India. Moreover, a Foreign Ministry spokesperson indicated during a May 21, 2009, press briefing that, despite the government's continued opposition to a "nuclear or conventional arms race in South Asia," Pakistan may need to increase its nuclear arsenal in response to Indian conventional and nuclear arms expansion. Illustrating this point, a Pakistani Foreign Office spokesperson reacted to India's July 26, 2009, launch of its first indigenously built nuclear-powered submarine by asserting that "continued induction of new lethal weapon systems by India is detrimental to regional peace and stability," adding that "[w]ithout entering into an arms race with India, Pakistan will take all appropriate steps to safeguard its security and maintain strategic balance in South Asia." The submarine, which has not yet been deployed, will reportedly be capable of carrying nuclear-armed ballistic missiles. Similarly, according to the January 2010 statement, the NCA identified "developments detrimental to the objectives of strategic stability in the region," including India's acquisition of "advanced weapons systems" and missile defense systems. The NCA also noted that the 2008 NSG decision described above, as well as subsequent nuclear fuel supply agreements that New Delhi has concluded with several governments, "would enable India to produce substantial quantities of fissile material for nuclear weapons by freeing up its domestic resources." The statement suggests that Pakistan could increase or improve its nuclear weapons in response to these developments, but does not explicitly say so. Whether and to what extent Pakistan's current expansion of its nuclear weapons-related facilities is a response to the U.S.-India agreement is unclear, partly because descriptions of the government's decisions regarding those facilities are not publicly available. In addition to making qualitative and quantitative improvements to its nuclear arsenal, Pakistan could increase the number of circumstances under which it would be willing to use nuclear weapons. For example, Peter Lavoy has argued that India's efforts to improve its conventional military capabilities could enable New Delhi to achieve "technical superiority" in intelligence, surveillance, and reconnaissance, as well as precision targeting, providing India with "the capability to effectively locate and efficiently destroy strategically important targets in Pakistan." Islamabad could respond by lowering the threshold for using nuclear weapons, according to Lavoy. Indeed, a Pakistan Foreign Ministry spokesperson warned in May 2009 that Islamabad could take this step. Nevertheless, Islamabad's nuclear weapons program apparently faces some budget constraints. Maples testified that "the economic decline will likely slow" the government's progress in improving its nuclear and conventional military forces. Furthermore, Pakistan's nuclear weapons program is reportedly facing "severe financial cuts."

**Delivery Vehicles:** Pakistan has two types of delivery vehicles for nuclear weapons: aircraft controlled by the Pakistan Air Force and surface-to-surface missiles controlled by the Pakistan Army. Pakistan could deliver its nuclear weapons using F-16s purchased from the United States, provided that modifications are made. It is widely believed that Islamabad has made modifications to the F-16s previously sold to them.<sup>33</sup> Although concerns have been raised about the impact of these sales on the strategic balance in South Asia,<sup>34</sup> the U.S. government maintains that the sale of additional F-16s to Pakistan will not alter the regional balance of power. The contract for provision of an additional 36 aircraft was signed on September 30, 2006, as was the contract for the weapons for those aircraft and a contract to perform the mid-life upgrade on Pakistan's F-16A/B model aircraft. Pakistan's F-16 fleet will therefore be expanded, but it is unclear what portion of the fleet will be capable of a nuclear mission. Mirage III and V aircraft could also be used, although would have limited range. A-5's may have been modified to carry a nuclear payload. After India's first test of its *Prithvi* ballistic missile in 1988, Pakistan jump-started its own missile program and has three types of ballistic missiles thought to be nuclear-capable: the solid-fuel *Hatf-III* (*Ghaznavi*), with a range of about 400 kilometers; the solid-fuel *Hatf-IV* (*Shaheen*), with a range of over 450 kilometers; and the liquid-fuel *Hatf-V* (*Ghauri*), with an approximate range of almost 1,300 kilometers. The solid-fuel *Hatf-VI* (*Shaheen-2*) missile, when deployed, will be "capable of reaching targets out to 2,000 kilometers," Maples stated March 10, adding that Islamabad has made "significant progress" on the missile. A 2009 National Air and Space Intelligence Center report appears to

support this conclusion, stating that the missile “probably will soon be deployed.” Islamabad continues to carry out ballistic missile tests, but notifies India in advance in accordance with an October 2005 bilateral missile pre-notification pact.<sup>41</sup> Maples also indicated that Pakistan is developing nuclear-capable cruise missiles; the *Babur* (groundlaunched) and the *Ra’ad* (air-launched), both of which will have estimated ranges of 320 kilometers.

**Nuclear Doctrine:** Pakistan’s strategic doctrine is undeclared, and will probably remain so, but prominent officials and analysts have offered insights concerning its basic tenets. Describing the guiding principle as minimum credible nuclear deterrence, high-level officials’ statements point to four policy objectives for Islamabad’s nuclear weapons: deter all forms of external aggression; deter through a combination of conventional and strategic forces; deter counterforce strategies by securing strategic assets and threatening nuclear retaliation; and stabilize strategic deterrence in South Asia. Pakistani officials have also indicated that this nuclear posture is designed to preserve territorial integrity against Indian attack, prevent military escalation, and counter its main rival’s conventional superiority. **Pakistan has pledged no-first-use against non-nuclear-weapon states, but has not ruled out firstuse against a nuclear-armed aggressor, such as India.** Some analysts say this ambiguity serves to maintain deterrence against India’s conventional superiority; the Foreign Ministry spokesperson stated May 21 that “there are acquisitions of sophisticated weaponry by our neighbour which will disturb the conventional balance between our two countries and hence, lower the nuclear threshold.” Other analysts argue that keeping the first-use option against New Delhi allows Islamabad to conduct sub-conventional operations, such as support for low intensity conflict or proxy war in Kashmir, while effectively deterring India at the strategic level. **Pakistan has reportedly addressed issues of survivability through pursuing a second strike capability, possibly building hard and deeply buried storage and launch facilities, deploying road-mobile missiles, deploying air defenses around strategic sites, and utilizing concealment measures.**

**Command & Control:** Pakistan’s command and control over its nuclear weapons is compartmentalized and includes strict operational security. The government’s command and control system is based on “C4I2SR” (command, control, communication, computers, intelligence, information, surveillance and reconnaissance). Islamabad’s Strategic Command Organization has a three-tiered structure, consisting of the National Command Authority (NCA), the Strategic Plans Division (SPD), and the Strategic Forces Commands. **The NCA, established in 2000, supervises the functions and administration of all of Pakistan’s organizations involved in nuclear weapons research, development, and employment, as well as the military services that operate the strategic forces.** The Prime Minister, as Head of Government, is Chairperson of the NCA. The NCA also includes the chair of the joint chiefs of staff, the Ministers of Defense, Interior, and Finance, the Director General of the SPD, and the Commanders of the Army, Air Force, and Navy. **The final authority to launch a nuclear strike requires consensus within the NCA; the Chairperson must cast the final vote. The NCA is comprised of two committees, the Employment Control Committee (ECC) and the Development Control Committee (DCC), each of which includes a mix of civilian and military officials.** The ECC’s functions include establishing a command and control system over the use of nuclear weapons. **The DCC “exercises technical, financial and administrative control over all strategic organisations, including national laboratories and research and development organisations associated with the development and modernisation of nuclear weapons.”** The SPD is headed by a Director General from the Army and acts as the secretariat for the NCA. The SPD’s functions include formulating Islamabad’s nuclear policy, strategy, and doctrine; developing the nuclear chain of command; and formulating operational plans at the service level for the movement, deployment, and use of nuclear weapons. The Army, Air Force, and Navy each have their own strategic force command, but operational planning and control remains with the NCA. The SPD coordinates operational plans with the strategic forces commands. **According to current and former Pakistani officials, Islamabad employs a system which requires that at least two, and perhaps three, people authenticate launch codes for nuclear weapons. On December 13, 2007, then-President Musharraf formalized these authorities and structure in the “National Command Authority Ordinance, 2007.” The NCA was established by administrative order, but now has a legal basis.** Analysts point out that the timing of this ordinance was meant to help the command and control system weather political transitions and potentially preserve the military’s strong control over the system. The ordinance also addresses the problems of the proliferation of nuclear expertise and personnel reliability. It outlines punishable offenses related to breach of confidentiality or leakage of “secured information,” gives the SPD authority to investigate suspicious conduct, states that punishment for these offenses can be up to 25 years imprisonment, and applies to both serving and retired personnel, including military personnel, notwithstanding any other laws. As a result, **Pakistani authorities say that the ordinance should strengthen their control over strategic organizations and their personnel.**

**Security Concerns:** According to a 2001 Department of Defense report, Islamabad’s nuclear weapons “are probably stored in component form,” which suggests that the nuclear warheads are stored separately from delivery vehicles. According to some reports, the fissile cores of the weapons are separated from the non-nuclear explosives. But whether this is actually the case is unclear; **one report states that the warheads and delivery vehicles are probably stored separately in facilities close to one another, but says nothing about the fissile cores.** And, according to an account of a 2008 experts’ group visit to Pakistan, Lt. Gen. Khalid Kidwai, the head of the SPD, suggested that the nuclear warheads (containing the fissile cores) may be mated with their delivery vehicles. According to Kidwai, the report says, the SPD’s official position is **that the weapons “will be ready when required, at the shortest notice; [but] the Pakistani doctrine is not endorsing a US-USSR model with weapons on hair trigger alert.”** The 2001 Defense Department report says that Pakistan can probably assemble its weapons fairly quickly. It warrants mention that, although separate storage may provide a layer of protection against accidental launch or prevent theft of an assembled weapon, it may be easier for unauthorized people to remove a weapon’s fissile material core if it is not assembled. Dispersal of the assets may also create more potential access points for acquisition and may increase the risk of diversion. **As the United States prepared to launch an attack on the Afghan Taliban after September 11, 2001, President Musharraf reportedly ordered that Pakistan’s nuclear arsenal be redeployed to “at least six secret new locations.”** This action came at a time of uncertainty about the future of the region, including the direction of U.S.-Pakistan relations. Islamabad’s leadership was uncertain whether the United States would decide to conduct military strikes against Pakistan’s nuclear assets if the government did not assist the United States against the Taliban. Indeed, President Musharraf cited protection of Pakistan’s nuclear and missile assets as one of the reasons for Islamabad’s dramatic policy shift. These events, in combination with the 1999 Kargil crisis, the 2002 conflict with India at the Line of Control, and revelations about the A.Q. Khan proliferation network, inspired a variety of reforms to

secure the nuclear complex. **Risk of nuclear war in South Asia ran high in the 1999 Kargil crisis, when the Pakistani military is believed to have begun preparing nuclear-tipped missiles. It should be noted that, even at the high alert levels of 2001 and 2002, there were no reports of Pakistan mating the warheads with delivery systems.** In the fall of 2007 and early 2008, some observers expressed concern about the security of the country's arsenal if political instability were to persist. Former Prime Minister Benazir Bhutto said in a November 5, 2007, interview that, although then-President Musharraf claimed to be in firm control of the nuclear arsenal, she feared this control could weaken due to instability in the country. Similarly, Michael Krepon of the Henry L. Stimson Center has argued that "a prolonged period of turbulence and infighting among the country's President, Prime Minister, and Army Chief" could jeopardize the army's unity of command, which "is essential for nuclear security." During that time, U.S. military officials also expressed concern about the security of Pakistan's nuclear weapons. **Director General of the International Atomic Energy Agency (IAEA), Mohamed ElBaradei, also has expressed fears that a radical regime could take power in Pakistan, and thereby acquire nuclear weapons.** Experts also worry that while nuclear weapons are currently under firm control, with warheads disassembled, technology could be sold off by insiders during a worsened crisis. However, U.S. intelligence officials have expressed greater confidence regarding the security of Islamabad's nuclear weapons. Deputy Secretary of State John D. Negroponte in testimony to Congress on November 7, 2007 said he believed that there is "plenty of succession planning that's going on in the Pakistani military" and that Pakistan's nuclear weapons are under "effective technical control." **Similarly, Donald Kerr, Principal Deputy Director of National Intelligence, told a Washington audience May 29, 2008, that the Pakistani military's control of the nuclear weapons is "a good thing because that's an institution in Pakistan that has, in fact, withstood many of the political changes over the years."** A Department of Defense spokesperson told reporters December 9, 2008, that Washington has "no reason at this point to have any concern with regards to the security" of Islamabad's nuclear arsenal. More recently, Maples stated March 10, 2009, that Islamabad "has taken important steps to safeguard its nuclear weapons," although he pointed out that "vulnerabilities exist." **Secretary of Defense Robert Gates stated in a January 21, 2010, interview that the United States is "very comfortable with the security of Pakistan's nuclear weapons."** Other governments have also voiced opinions regarding the security of Pakistan's nuclear arsenal. For example, Indian National Security Adviser M. K. Narayanan said that the arsenal is safe and has adequate checks and balances. Similarly, Secretary of State for Foreign and Commonwealth Affairs David Miliband told the *Charlie Rose Show* December 15, 2008, that Islamabad's nuclear weapons "are under pretty close lock and key." Russian Deputy Prime Minister Sergei Ivanov, however, sounded somewhat less optimistic in a March 24, 2009, television interview, stating that Moscow is "very much concerned" about the security of Pakistan's arsenal. **Pakistani officials have consistently expressed confidence in the security of the country's nuclear arsenal.** Then-President Musharraf stated in November 2007 that Pakistan's nuclear weapons are under "total custodial controls." More recently, **President Asif Ali Zardari told CNN December 2, 2008, that the country's nuclear command and control system "is working well."** Additionally, a Pakistani Foreign Ministry spokesperson stated May 21, 2009, that "there is simply no question of our strategic assets falling into the wrong hands. We have full confidence in our procedures, mechanisms and command and control systems." In addition to the above scenarios, the security of Pakistan's nuclear weapons could also be jeopardized by another conflict between India and Pakistan, **Michael Krepon argued, explaining that an "escalating war with nuclear forces in the field would increase the probability of accidents, miscalculations, and the use of nuclear weapons."** This is because [w]hen tensions rise precipitously with India, the readiness level of Pakistan's nuclear deterrent also rises. Because the geographical coordinates of Pakistan's main nuclear weapon storage sites, missile, and air bases can be readily identified from satellites—and therefore targeted by opposing forces—the dictates of deterrence mandate some movement of launchers and weapons from fixed locations during crises. Nuclear weapons on the move are inherently less secure than nuclear weapons at heavily-guarded storage sites. **Weapons and launchers in motion are also more susceptible to "insider" threats and accidents.** Such a war, Krepon added, would also place stress on the army's unity of command. Krepon has also pointed out that Islamabad faces a dilemma, because less-dispersed nuclear weapons may be more vulnerable to a disarming military strike from India.

**U.S. Assistance & Pakistani Nuclear Security:** U.S. plans to secure Pakistani nuclear weapons in case of a loss of control by the Pakistani government were famously addressed during Secretary of State Condoleezza Rice's confirmation hearing in January 2005. In response to a question from Senator John Kerry asking what would happen to Pakistan's nuclear weapons in the event of a radical Islamic coup in Islamabad, Secretary Rice answered, **"We have noted this problem, and we are prepared to try to deal with it."** On November 12, 2007, responding to press reports about this contingency, a Pakistan Foreign Office spokesperson said, **"Pakistan possesses adequate retaliatory capacity to defend its strategic assets and sovereignty,"** emphasizing that Islamabad's nuclear weapons have been under **"strong multi-layered, institutionalized decision-making, organizational, administrative and command and control structures since 1998."** The issue of U.S. contingency plans to take over Pakistani strategic assets was raised again in the press following Benazir Bhutto's assassination, and was met with similar assurances by Pakistan's government. More recently, a Pakistan Foreign Office spokesperson, responding to a report detailing alleged U.S.-Pakistani discussions regarding contingency plans for U.S. forces to help secure Islamabad's nuclear weapons, stated November 8, 2009, that **Pakistan "does not require any foreign assistance in this regard."** Pakistan will never **"allow any country to have direct or indirect access to its nuclear and strategic facilities,"** the spokesperson said, adding that **"no talks have ever taken place on the issue of the security of Pakistan's nuclear arsenal with US officials."** U.S. Ambassador to Pakistan Anne Patterson stated the same day that the United States **"has no intention to seize Pakistani nuclear weapons or material."** **Gates stated during the January 2010 television interview that the United States has "no intention or desire to take over any of Pakistan's nuclear weapons."** The United States reportedly offered Pakistan nuclear security assistance soon after September 11, 2001. U.S. assistance to Islamabad, which must comply with nonproliferation guidelines, has reportedly included the sharing of best practices and technical measures to prevent unauthorized or accidental use of nuclear weapons, as well as contribute to physical security of storage facilities and personnel reliability. **Some press reports say that the United States provided Pakistan with Permissive Action Links (PALs) in 2003, although former Pakistani military officials have said Pakistan has developed PALs for its warheads without assistance.** PALs require a code to be entered before a weapon can be detonated. As noted above, Islamabad employs a system requiring that at least two, and perhaps three, people authenticate launch codes for nuclear weapons. Security at nuclear sites in Islamabad is the responsibility of a 10,000-member security force, commanded by a two-star general. Former Deputy Secretary of State Richard Armitage confirmed in a November 2007 interview that there has been U.S. assistance in this area, explaining that the United States was unlikely to intervene militarily in a crisis in Pakistan because **"we have spent**

considerable time with the Pakistani military, talking with them and working with them on the security of their nuclear weapons. I think most observers would say that they are fairly secure. They have pretty sophisticated mechanisms to guard the security of those.” Rolf Mowatt-Larssen, former Director of the Office of Intelligence and Counterintelligence at the U.S. Department of Energy, pointed out in May 2009 that “there’s not a lot of transparency into” how Islamabad spends the U.S. funds, but he nevertheless characterized them as “money well spent.” A Pakistani official said in November 2009 that Pakistan reserves the right to “pick and choose” the nuclear security measures it will undertake, adding that Islamabad will only accept such measures that are “nonintrusive.” **The extent to which Pakistan has shared information about its nuclear arsenal with the United States is unclear. Although, as noted, former President Musharraf has acknowledged Islamabad’s sharing of some information, General Tariq Majid, Chair of Pakistan’s Joint Chiefs of Staff Committee, stated November 9, 2009, that “there is absolutely no question of sharing or allowing any foreign individual, entity or a state, any access to sensitive information about our nuclear assets.”** The U.S. government has also reportedly offered assistance to secure or destroy radioactive materials that could be used to make a radioactive dispersal device, and to ship highly enriched uranium used in the Pakistani civilian nuclear sector out of the country. **Pakistan’s response to these proposals is unclear. It is worth noting that, according to some observers, spent fuel from Pakistan’s Karachi and Chasma nuclear power plants could be vulnerable to theft or attack. Pakistani officials have expressed confidence in the security of its facilities, however.**

**Proliferation Threat:** Many observers are concerned that other states or terrorist organizations could obtain material or expertise related to nuclear weapons from Pakistan. Beginning in the 1970s, Pakistan used clandestine procurement networks to develop its nuclear weapons program. Former Pakistani nuclear official A.Q. Khan subsequently used a similar network to supply Libya, North Korea, and Iran with materials related to uranium enrichment. **Al-Qaeda has also sought assistance from the Khan network. According to former Director of Central Intelligence George Tenet, the United States “received fragmentary information from an intelligence service” that in 1998 Osama bin Laden had “sent emissaries to establish contact” with the network. Other Pakistani sources could also provide nuclear material to terrorist organizations.** According to a 2005 report by the Commission on the Intelligence Capabilities of the United States Regarding Weapons of Mass Destruction, **al-Qaeda “had established contact with Pakistani scientists who discussed development of nuclear devices that would require hard-to-obtain materials like uranium to create a nuclear explosion.”** Tenet explains that these scientists were affiliated with a different organization than the Khan network. **The current status of Pakistan’s nuclear export network is unclear, although most official U.S. reports indicate that, at the least, it has been damaged considerably.** Director of National Intelligence John D. Negroponte implied that the network had been dismantled when he asserted in a January 11, 2007, statement to the Senate Select Committee on Intelligence that “Pakistan had been a major source of nuclear proliferation until the disruption of the A.Q. Khan network.” More recently, a January 12, 2009, State Department press release said that the network “is no longer operating.” For its part, Pakistan’s Foreign Office stated February 7, 2009, that **Pakistan “has dismantled the nuclear black market network.”** Asked during a July 20, 2009, interview whether North Korea was transferring “nuclear weapons” or related advice to North Korea, Secretary of State Hillary Clinton replied that there is “no evidence” that Pakistan is doing so. However, when asked about the network’s current status during a July 25, 2007, Senate Foreign Relations Committee hearing, Undersecretary for Political Affairs Nicholas Burns replied that: **I cannot assert that no part of that network exists, but it’s my understanding based on our conversations with the Pakistanis that the network has been fundamentally dismantled. But to say that there are no elements in Pakistan, I’m not sure I could say that.** Similarly, the London-based International Institute for Strategic Studies found in a May 2007 report that “at least some of Khan’s associates appear to have escaped law enforcement attention and could ... resume their black-market business.” Asked about Pakistan’s cooperation in investigating the network, Burns acknowledged **that the United States has not had “personal, consistent access” to Khan, but added that he did not “have all the details of everything we’ve done.”** Similarly, the IAEA has not yet been able to interview Khan directly, according to an agency official. However, Islamabad has responded to written questions from the IAEA and has been cooperative with the agency’s investigation of Iran’s nuclear program. Khan himself told *Dawn News TV* May 29, 2008, that he would not cooperate with U.S. or IAEA investigators. A Pakistani Foreign Office spokesperson told reporters in May 2006 that the government considered the Khan investigation “closed”—a position an Office spokesperson reiterated February 6, 2009. The State Department announced January 12, 2009, that it was imposing sanctions on 13 individuals and three companies for their involvement in the Khan network. The sanctions were imposed under the Export-Import Bank Act, the Nuclear Proliferation Prevention Act, and Executive Orders 12938 and 13382.

**Pakistan’s Response To The Proliferation Threat:** Undersecretary Burns testified in July 2007 that the Bush administration has “told the Pakistani government that it is its responsibility ... to make sure” that neither the Khan network nor a “similar organization” resurfaces in the country. Since the revelations about the Khan network, Pakistan appears to have increased its efforts to prevent nuclear proliferation. But whether and to what extent these efforts have been successful is not yet clear. It is worth noting that, because Khan conducted his proliferation activities as a government official, they do not necessarily indicate a failure of Islamabad’s export controls. Pakistani officials argue that Islamabad has taken a number of steps to prevent further proliferation of nuclear-related technologies and materials. For example, **Islamabad adopted in September 2004 new national export controls legislation which includes a requirement that the government issue control lists for “goods, technologies, material, and equipment which may contribute to designing, development, stockpiling, [and] use” of nuclear weapons and related delivery systems.** According to a February 2008 presentation by Zafar Ali, Director of Pakistan’s Strategic Export Controls Division (SECDIV), the lists, which were issued in October 2005 and are to be periodically updated, include items controlled by multilateral export control regimes, such as the Nuclear Suppliers Group, the Australia Group, and the Missile Technology Control Regime. **The export controls legislation also includes a catch-all clause, which requires exporters to notify the government if they are aware or suspect that goods or technology are intended by the end-user for use in nuclear or biological weapons, or missiles capable of delivering such weapons. The legislation includes several other important elements, such as end-use and end-user certification requirements and new penalties for violators.** Since its adoption, Pakistan has established the SECDIV and an associated Oversight Board. The SECDIV is responsible for formulating rules and regulations for implementing the legislation. The board is comprised of officials from multiple agencies and is headed by Pakistan’s Foreign Secretary. Islamabad says that it has also taken several other steps to improve its nuclear security. For example, the government announced in June 2007 that it is “implementing a National Security Action Plan with the [IAEA’s] assistance.” That same month, Pakistan also joined the

U.S.- and Russian-led Global Initiative to Combat Nuclear Terrorism. As noted above, the December 2007 National Command Authority Ordinance also includes measures to prevent the spread of nuclear-related materials and expertise. **Pakistani officials participating in an April 2007 Partnership for Global Security workshop argued that Islamabad has improved the reliability of its nuclear personnel by, for example, making security clearance procedures more stringent.**

**Issues For Congress:** Members of Congress have also expressed concerns regarding the security of Pakistan's nuclear weapons and related material. Senator Richard Lugar has spoken out in favor of using the cooperative threat reduction tools in Pakistan to help with the security of nuclear, biological, and chemical materials and weapons in the country. Additionally, a number of pieces of legislation appear designed to influence Islamabad's policies regarding the Khan network. Section 2 of H.R. 1463, which was introduced March 12, 2009, and referred to the House Foreign Affairs Committee the same day, states that U.S. military assistance may be provided to Pakistan only if the President certifies that Islamabad is both making A.Q. Khan available to the United States for questioning and "providing adequate assurances to the United States Government that it will monitor Khan's movements and activities in such a manner as to prevent his participation in any efforts to disseminate nuclear technology or know-how." This section allows the President to waive restrictions on U.S. assistance imposed pursuant to the proposed legislation if the President "certifies to Congress that it is in the national interests of the United States to do so." H.R. 2481, the United States-Pakistan Security and Stability Act, which was introduced May 19, 2009, and referred the same day to the House Foreign Affairs Committee, the House Armed Services Committee, and the House Intelligence Committee, would require the President to "develop and transmit to the appropriate congressional committees a comprehensive interagency strategy and implementation plan for long-term security and stability in Pakistan." **The strategy is to include a "description of how United States assistance" authorized by the bill "will be used to achieve the objectives of United States policy toward Pakistan," one of which is "to empower and enable" Islamabad to "maintain robust command and control over its nuclear weapons technology."** The bill would authorize foreign assistance for Pakistan, including funds for improving the government's counter-insurgency capability. H.R. 1886, the Pakistan Enduring Assistance and Cooperation Enhancement Act of 2009, would authorize U.S. assistance to Pakistan for a variety of purposes. These include strengthening democratic institutions and law enforcement, as well as supporting economic development, education, human rights, and health care. The bill would also authorize additional U.S. security assistance for Islamabad. **However, Section 206 of the bill places conditions on some of this assistance; it states that no U.S. military assistance shall be provided to Pakistan if the President has not made a series of determinations, one of which is that the government "is continuing to cooperate with the United States in efforts to dismantle supplier networks relating to the acquisition of nuclear weapons related materials, including, as necessary, providing access to Pakistani nationals associated with such networks."** The section includes a national security waiver. The bill also requires a report to Congress that includes a "description of Pakistan's efforts to prevent proliferation of nuclear-related material and expertise" and an "assessment of whether assistance provided to Pakistan pursuant to this Act has directly or indirectly aided the expansion of Pakistan's nuclear weapons program." The committee report underlines continuing concerns about getting full information about the activities of the Khan network and development of Pakistan's own nuclear arsenal: **Pakistan's history of nuclear development and Dr. Abdul Qadeer Khan's establishment of a nuclear proliferation network remain a source for concern to many in the United States, particularly since the Committee understands that representatives of the United States have not interviewed certain individuals involved in the network.** The Committee believes the United States should continue to engage the Government of Pakistan on the network, and should, as necessary, obtain direct access to the individuals covered by this subsection, including Dr. Khan. **The Committee also maintains strong concerns regarding recent reports of Pakistan expansion of its nuclear arsenal. Given the expanding threat of Pakistan's domestic insurgency, the Government of Pakistan's further development of nuclear materials appears inconsistent with its immediate security threats and is unhelpful in the context of efforts to strengthen U.S.-Pakistani relations.** H.R. 1886 was introduced April 2, 2009, and referred the same day to both the House Foreign Affairs Committee and Rules Committee. The Foreign Affairs Committee reported the bill May 22, and the Rules Committee discharged it the same day. The bill was referred to the House Armed Services Committee May 22 and discharged June 2. On June 11, the House passed H.R. 1886, which was appended to H.R. 2410, the Foreign Relations Authorization Act, Fiscal Years 2010 and 2011. H.R. 2410 has been received by the Senate and referred to the Senate Foreign Relations Committee. **The Senate passed the Enhanced Partnership with Pakistan Act of 2009 (S. 962) unanimously on June 24, 2009. This bill would provide aid to Pakistan but does not include conditions regarding the nuclear nonproliferation or nuclear weapons activities.** The Senate report (S.Rept. 111-33) says that "Any use of funds contained in this legislation for the purpose of augmenting Pakistan's nuclear weapons program would be directly contrary to Congressional intent." S. 1707, the Enhanced Partnership with Pakistan Act of 2009 represents a compromise between H.R. 1886 and S. 962. It passed the Senate by unanimous consent on September 24, 2009. The House passed the bill on September 30. It became public law (P.L. 111-73, 123 Stat. 2060) on October 15, 2009. Section 203 (c) of S. 1707 requires that the President certifies that Pakistan is "continuing to cooperate with the United States in efforts to dismantle supplier networks relating to the acquisition of nuclear weapons-related materials, such as providing relevant information from or direct access to Pakistani nationals associated with such networks." It also requires a Semi-Annual Monitoring Report that would include a detailed description of Pakistan's nuclear nonproliferation efforts and an assessment of whether assistance has "directly or indirectly aided the expansion of Pakistan's nuclear weapons program, whether by the diversion of United States assistance or the reallocation of Pakistan's financial resources that would otherwise be spent for programs and activities unrelated to its nuclear weapons program." In response to concerns expressed in Pakistan over the intent of the bill, a "Joint Explanatory Statement" was submitted for the *Congressional Record* by Senate Foreign Relations Committee Chairman John Kerry and House Foreign Affairs Committee Chairman Howard Berman. **The Pakistan's Nuclear Weapons: Proliferation and Security Issues Congressional Research Service 20 statement emphasizes that "the legislation does not seek in any way to compromise Pakistan's sovereignty, impinge on Pakistan's national security interests, or micromanage any aspect of Pakistani military or civilian operations."** Regarding reporting requirements on nuclear nonproliferation cooperation, the statement says: **The many requirements of this report are intended as a way for Congress to assess how effectively U.S. funds are being spent, shortfalls in U.S. resources that hinder the use of such funds, and steps the Government of Pakistan has taken to advance our mutual interests in countering extremism and nuclear proliferation and strengthening democratic institutions.** There is no intent to, and nothing in this Act in any way suggests that there should be, any U.S. role in micromanaging internal Pakistani affairs, including the promotion of Pakistani military officers or the internal operations of the Pakistani military.

**Title/Headline:** *Taliban Claim Unverified Responsibility: Times Square Car Bomb, Prelude To Nuclear Attack?*

**Abstract:** Saturday evening a car was found by police to contain gunpowder, propane and a crude timer according to the NYPD. A mounted police officer now identified as Wade Rattagan, observed smoke coming from a sport utility vehicle with hazard lights flashing at 6:30 pm, in addition to a statement that an official made from Department of Homeland Security who wasn't authorized to release the information and spoke on condition of anonymity to reporters. **Police evacuated a number of residential and commercial buildings and cleared the streets of thousands people with militarized police deployed around the area with what is described as heavy automatic weapons according to bystanders.** One male tourist said it looked like something you would see in a hollywood movie. Federal agents responded with the NYPD and Paul Bresson, head of public affairs office at FBI headquarters in Washington said, "the matter is being taken seriously". Tourists reported hearing a small explosion hours after the car was first located. The area that was closed is home to several major Broadway shows, with seven theaters. The SUV itself is unidentified and the license plate was stolen from another vehicle. Police made contact with the person that had taken the original car with the plate to a junk yard. The Vehicle Identification Number (VIN) was removed and the fact that the hazard lights were left on raise questions about the premeditation of this event. **Earlier this week a story broke with U.S. Military sources leaking a document detailing an exercise simulating a military response to Tea Party activists and tax protestors at Fort Knox. The document demonstrated that detention centers would be readied for mass arrests as well as other Military LEO's being on standby.** The document though an exercise, simulated activists as an enemy as military would have access to ammunition draws for engagement. It is now public that the attempted bombing of a Detroit bound airliner in December 2009 had been orchestrated by rogue elements inside the U.S. Federal Government with ties to Israel, to further the expansion of domestic police state measures. **It is also notable that about a week ago a man was arrested for possessing sodium cyanide on the NY Subway raising questions regarding whether both events are linked and if there is federal involvement.** Military sources tell us there is little practical use for a terrorist to target civilians as it would only garner public support for the U.S. Government suggesting that this could likely be staged or the work of a disgruntled amateur. Claims that Pakistani Taliban admit responsibility for the New York attack in revenge for the two leaders al-Baghdadi and al-Mahajer and Muslim martyrs is unverified and purportedly said a statement on a website commonly used by Islamists as reported by Reuters Sunday. Conflicting reports indicate that Pakistani Taliban deny responsibility for the attack. **Fears that Pakistani Taliban may obtain nuclear weapons from Pakistan's Government have been expressed by the Obama Administration. It is highly likely that a nuclear or biological device will be detonated in a major U.S. city by 2013 according to a bipartisan panel on Tuesday, December 02, 2008. The report of the Commission on the Prevention of WMD Proliferation and Terrorism, led by former Sens. Bob Graham of Florida and Jim Talent of Missouri, acknowledged that terrorists still lack the needed scientific and technical ability to make weapons out of pathogens or nuclear bombs (Infowars, 2010).**

**Title/Headline:** *Crash Of Airbus 320 Outside Islamabad Now Believed Hijacked, Heading For Nuke Facility*

**Abstract:** Informed sources in the Government of Pakistan have told Veterans Today that they are developing "hard evidence" indicating the Air Blue Airbus 320 that crashed July 28th outside Islamabad was a terrorist hijacking tied to rogue American security forces operating inside that country. Sources indicate that the plane crash was an unsuccessful hijacking attempt intended to crash into the nuclear weapons facility at Kahuta, outside Islamabad. Such an attack may have been blamed on India and would likely have led to retaliation which could easily have escalated to a nuclear exchange between these two nations that have spent decades at each other's throats. **Suspicious were raised inside Pakistan's military and intelligence organizations when American military contractors employed by Blackwater/Xe showed up on the scene immediately after the crash, seizing the black box and "other materials."** There is no confirmation that parachutes or electronic equipment had been removed when Blackwater/Xe security relinquished control of the crash scene to Pakistani investigators. Royal Television in Islamabad, owned by the brother of the head of Pakistan's powerful JI (Jamate Islami), the Islamic political party, has reported that investigations are underway tying American based contractors to the planning of the attack. **Pakistan's ISRP (Inter-Services Public Relations) has failed to confirm this but private sources indicate that an active investigation of these allegations is, not only underway but has established ties between an American group and the hijackers.** Military and intelligence officials inside Pakistan, in concert with the American embassy, are withholding all official details of the investigation and are likely to continue doing so. **This same facility had been the subject of an armed penetration by American contractors, believed to be employed by the State Department, in 2009. Four Blackwater employees, armed and possessing explosives were arrested outside the Kahuta nuclear facility in 2009. The four, driving a Jeep 4x4 and possessing advanced surveillance and jamming equipment of Israeli manufacture, were intercepted 1.5 miles from the Kahuta nuclear facility.** The four spoke fluent Pushtu and were dressed in a manner as to resemble Taliban fighters. The order for their release, given by Minister of the Interior Rehman Malik, is an issue of considerable controversy between the civilian government in Pakistan and the powerful military. **The passenger jet with 152 on board slammed into a hillside in what was believed to be Pakistan's most serious air crash. At least 2 Americans were believed to be on board but, a month later, the US Embassy in Islamabad has left this unconfirmed. Reports received today, however, confirm that at least 5 Americans, military contractors said to be employed by Xe, may also have been on the craft but could not be identified as they had been traveling in local garb and had boarded with false identification. Xe**

is an American based military and intelligence contracting firm formerly known as Blackwater and has been the subject of considerable controversy for activities inside Pakistan. Sources indicate that the attackers stormed the cockpit in a hijacking attempt. The pilot is said to have jammed the flight controls, careening the Airbus 320 and all aboard into a hillside rather than allowing the plane to be used in a "9/11" type attack inside Pakistan or flown into Indian air space for a repeat of the 2008 Mumbai attack. Pakistan has, at times in error, referred to American contractors employed by the Departments of Defense, State or the Central Intelligence Agency as Blackwater. However, it is believed the majority of such employees are, in fact, members of that organization or is derivative, Xe. The same group, often criticized for irregularities in Iraq, has been contracted by the Central Intelligence Agency to operate Predator drones inside Pakistan, operations that have resulted in a significant number of civilian deaths and said by political leaders of several factions to do little but recruit terrorists (Duff, 2010).

**Date:** October 10, 2010

**Source:** Telegraph, Praveen Swami

**Title/Headline:** *Pakistan's Nuclear Arms Push Angers America*

**Abstract:** The Institute for Science and International Security, a Washington-based nuclear watchdog, has obtained satellite images showing that a row of cooling towers at Pakistan's secret Khushab-III reactor has been completed. This suggests the plant could begin operation within months, allowing Pakistan substantially to increase its stockpiles of weapons-grade plutonium. Last year, Barack Obama, US president, called for "a new treaty that verifiably ends the production of fissile materials". In response, the Conference on Disarmament, a 64-nation coalition that negotiated the 1992 Chemical Weapons convention and the 1996 Comprehensive Nuclear Test Ban Treaty, agreed to negotiate a Fissile Materials Cut-off Treaty, intended to cap production of weapons-grade enriched uranium and most forms of plutonium. **But Pakistan, which is deepening its nuclear ties to China, has blocked the Conference on Disarmament from starting discussions, saying a cut-off would hurt its national security interests.** Ashley Tellis, a scholar at the Carnegie Endowment for International Peace, said: "Pakistan thinks it's going to be forced to cap its fissile material stocks and wants to make sure it has as much as it can get before then." The country's position has frustrated many states. Rose Gottmeier, the US Assistant Secretary of State for Arms Control, recently warned that her country's "patience is running out". Khushab-III is the latest in a series of reactors built to feed Pakistan's nuclear weapons programme. Khushab-II, located next to its new sister plant, became operational in February. The plutonium produced at the complex allows for the construction of small but lethal weapons: a single kilogram can produce an explosion equal to 20,000 tons of conventional explosives. **Work at Khushab III has forged ahead even as Pakistan struggles to cope with floods that have inflicted damage estimated at £27 billion—and amid mounting concerns over the long-term security of the strife-devastated country's nuclear arsenal.** Pakistan argues that its nuclear weapons programme is necessary to counter the superior conventional forces of India, its historic adversary. In a recent report published by the prestigious Bulletin of Atomic Scientists, Hans Kristensen and Robert Norris estimated it had assembled 70-90 nuclear warheads to India's 60-80, and had produced enough fissile material to manufacture another 90 more. **The Obama administration is also disturbed by Chinese plans to build two new nuclear reactors in Pakistan, bypassing Nuclear Suppliers Group (NSG) rules that bar sales of nuclear equipment to states that have not signed the Nuclear Non-Proliferation Treaty (NPT).** India, which along with Israel and Pakistan has refused to sign the NPT, recently obtained a waiver from the NSG allowing sales under international safeguards. China, however, says it does not need NSG permission to sell reactors to Pakistan, arguing it had committed to the deal before it joined the NSG in 2004—a claim the United States disputes (Swami, 2010).

**Title/Headline:** *Nuclear Fuel Memos Expose Wary Dance With Pakistan*

**Abstract:** Less than a month after President Obama testily assured reporters in 2009 that Pakistan's nuclear materials "will remain out of militant hands," his ambassador here sent a secret message to Washington suggesting that she remained deeply worried. The ambassador's concern was a stockpile of highly enriched uranium, sitting for years near an aging research nuclear reactor in Pakistan. **There was enough to build several "dirty bombs" or, in skilled hands, possibly enough for an actual nuclear bomb. In the cable, dated May 27, 2009, the ambassador, Anne W. Patterson, reported that the Pakistani government was yet again dragging its feet on an agreement reached two years earlier to have the United States remove the material.** She wrote to senior American officials that the Pakistani government had concluded that "the 'sensational' international and local media coverage of Pakistan's nuclear weapons made it impossible to proceed at this time." A senior Pakistani official, she said, warned that if word leaked out that Americans were helping remove the fuel, the local press would certainly "portray it as the United States taking Pakistan's nuclear weapons."

**The Fuel Is Still There:** It may be the most unnerving evidence of the complex relationship — sometimes cooperative, often confrontational, always wary — between America and Pakistan nearly 10 years into the American-led war in Afghanistan. The cables, obtained by WikiLeaks and made available to a number of news organizations, make it clear that underneath public reassurances lie deep clashes over strategic goals on issues like **Pakistan's support for the Afghan Taliban and tolerance of Al Qaeda, and Washington's warmer relations with India, Pakistan's archenemy.** Written from the American Embassy in Islamabad, the cables reveal American maneuvering as diplomats try to support an unpopular elected government that is more sympathetic to American aims than is the real power in Pakistan, the army and intelligence agency so crucial to the fight against militants. **The cables show just how weak the civilian government is: President Asif Ali Zardari told Vice President Joseph R. Biden Jr. that he worried that the military might "take me out."** Frustration at American inability to persuade the Pakistani Army and intelligence agency to stop supporting the Afghan Taliban and other militants runs through the reports of meetings between American and Pakistani officials. **That frustration preoccupied the Bush administration and became an issue for the incoming Obama administration, the cables document, during a trip in January 2009 that Mr. Biden made to Pakistan 11 days before he was sworn in.** In a meeting with Gen. Ashfaq Parvez Kayani, the

army chief of staff, Mr. Biden asked several times whether Pakistan and the United States “had the same enemy as we move forward.” **“The United States needs to be able to make an objective assessment of Pakistan’s part of the bargain,” Mr. Biden said,** according to a Feb. 6, 2009, cable. General Kayani tried to reassure him, saying, “We are on the same page in Afghanistan, but there might be different tactics.” Mr. Biden replied that “results” would test that. The cables reveal at least one example of increased cooperation, previously undisclosed, under the Obama administration. **Last fall, the Pakistani Army secretly allowed 12 American Special Operations soldiers to deploy with Pakistani troops in the violent tribal areas near the Afghan border. The Americans were forbidden to conduct combat missions. Even though their numbers were small, their presence at army headquarters in Bajaur, South Waziristan and North Waziristan was a “sea change in thinking,”** the embassy reported. The embassy added its usual caution: The deployments must be kept secret or the “Pakistani military will likely stop making requests for such assistance.” Within the past year, however, Pakistan and the United States have gingerly started to publicly acknowledge the role of American field advisers. Lt. Col. Michael Shavers, an American military spokesman in Islamabad, said in a statement that “at the request of the Pakistanis,” small teams of Special Operations forces “move to various locations with their Pakistani military counterparts throughout Pakistan.” Moreover, last week in a report to Congress on operations in Afghanistan, **the Pentagon said that the Pakistani Army had also accepted American and coalition advisers in Quetta.** The cables do not deal with the sharp increase under Mr. Obama in drone attacks against Al Qaeda and the Taliban in the tribal areas with Pakistan’s tacit approval. That is because the cables are not classified at the highest levels.

**A Deep Skepticism: Over all, though, the cables portray deep skepticism that Pakistan will ever cooperate fully in fighting the full panoply of extremist groups.** This is partly because Pakistan sees some of the strongest militant groups as insurance for the inevitable day that the United States military withdraws from Afghanistan — and Pakistan wants to exert maximum influence inside Afghanistan and against Indian intervention. Indeed, the consul general in Peshawar wrote in 2008 that she believed that some members of the Haqqani network — one of the most lethal groups attacking American and Afghan soldiers — had left North Waziristan to escape drone strikes. Some family members, she wrote, relocated south of Peshawar; others lived in Rawalpindi, where senior Pakistani military officials also live. In one cable, Ms. Patterson, a veteran diplomat who left Islamabad in October after a three-year stint as ambassador, said more money and military assistance would not be persuasive. **“There is no chance that Pakistan will view enhanced assistance levels in any field as sufficient compensation for abandoning support for these groups,** which it sees as an important part of its national security apparatus against India.” In a rare tone of dissent with Washington, she said **Pakistan would only dig in deeper if America continued to improve ties with India, which she said “feeds Pakistani establishment paranoia and pushes them closer to both Afghan and Kashmir focused terrorist groups.”** The groups Ms. Patterson referred to were almost certainly the Haqqani network of the Afghan Taliban and Lashkar-e-Taiba, a group financed by Pakistan in the 1990s to fight India in Kashmir that is accused of the 2008 terrorist attacks in Mumbai, India. **The highly enriched uranium that Ms. Patterson wanted removed from the research reactor came from the United States in the mid-1960s.** In those days, under the Atoms for Peace program, little thought was given to proliferation, and Pakistan seemed too poor and backward to join the nuclear race. But by May 2009, all that had changed, and her terse cable to the State and Defense Departments, among others, touched every nerve in the fraught relationship: mutual mistrust, the safety of the world’s fastest-growing nuclear arsenal, broken promises and a pervasive fear that any talk about Pakistan’s vulnerability would end whatever cooperation existed. The reactor had been converted to use low-enriched uranium, well below bomb grade, in 1990, according to the International Atomic Energy Agency, or I.A.E.A. But the bomb-grade uranium had never been returned to the United States and remains in storage nearby. **Ms. Patterson’s cable noted that Pakistan had “agreed in principle to the fuel removal in 2007.” But time and again the Pakistanis balked, and she reported that an interagency group within the Pakistani government had decided to cancel a visit by American technical experts to get the fuel out of the country.** She concluded that “it is clear that the negative media attention has begun to hamper U.S. efforts to improve Pakistan’s nuclear security and nonproliferation practices.” Any progress, she suggested, would have to await a “more conducive” political climate. On Monday, Pakistan’s Foreign Affairs Ministry issued a statement confirming that “the US suggestion to have the fuel transferred was plainly refused by Pakistan.” **It said that the United States had provided the fuel but did not mention that, under the terms of such transfers, the United States retained the right to have the spent fuel returned.** The ambassador’s comments help explain why Mr. Obama and his aides have expressed confidence in Pakistan’s nuclear security when asked in public. But at the beginning of the administration’s review of its Afghanistan and Pakistan strategy, a highly classified intelligence report delivered to Mr. Obama said that while Pakistan’s weapons were well secured, there was deep, continuing concern about “insider access,” meaning elements in the military or intelligence services. **In fact, Ms. Patterson, in a Feb. 4, 2009, cable, wrote that “our major concern is not having an Islamic militant steal an entire weapon but rather the chance someone working in GOP [government of Pakistan] facilities could gradually smuggle enough material out to eventually make a weapon.”** Mr. Obama’s review concluded by determining that there were two “vital” American interests in the region. One was defeating Al Qaeda. The second, not previously reported, was making sure terrorists could never gain access to Pakistan’s nuclear program. That goal was classified, to keep from angering Islamabad. Asked about the status of the fuel at the research reactor, Damien LaVera, a spokesman for the National Nuclear Security Administration of the Energy Department, said, **“The United States supplied Pakistan with fuel for a research reactor decades ago for the purpose of producing medical isotopes and scientific research.”** Implicitly acknowledging that the material remains there, Mr. LaVera said **“the fuel is under I.A.E.A. safeguards and has not been part of Pakistan’s nuclear weapons program.”** One secret cable offers another glimpse into another element of the nuclear gamesmanship between the United States and its Pakistani allies: **Even while American officials were trying to persuade Pakistani officials to give up nuclear material, they were quietly seeking to block Pakistan from trying to buy material that would help it produce tritium, the crucial ingredient needed to increase the power of nuclear weapons.** After providing specific details of the proposed sale, a Dec. 12, 2008, secret cable to the American Embassy in Singapore, seeking help to stop a transaction that was about to take place, concluded, **“We would have great concern over Pakistan’s potential use of tritium to advance its nuclear weapons program.”**

**Reports Of Army Abuses:** The cables also reveal that the American Embassy had received credible reports of extrajudicial killings of prisoners by the Pakistani Army more than a year before the Obama administration publicly acknowledged the problem and before a video that is said to show such killings surfaced on the Internet. The killings are another source of tension, complicated by

American pressure on Pakistan to be more aggressive in confronting militants on its own soil. In a Sept. 10, 2009, cable labeled “secret/noforn,” meaning that it was too delicate to be shared with foreign governments, the embassy confronted allegations of human rights abuses in the Swat Valley and the tribal areas since the Pakistani Army had begun fighting the Taliban a few months earlier. While carefully worded, the cable left little doubt about what was going on. **It spoke of a “growing body of evidence” that gave credence to the allegations. “The crux of the problem appears to center on the treatment of terrorists detained in battlefield operations and have focused on the extrajudicial killing of some detainees,” the cable said.** “The detainees involved were in the custody of Frontier Corps or Pakistan army units.” The Frontier Corps is a paramilitary force partly financed by the United States to fight the insurgents. The Pakistani Army was holding as many as 5,000 “terrorist detainees,” the cable said, about twice as many as the army had acknowledged. Concerned that the United States should not offend the Pakistani Army, the cable stressed that any talk of the killings must be kept out of the press. **“Post advises that we avoid comment on these incidents to the extent possible and that efforts remain focused on dialogue and the assistance strategy,” the ambassador wrote. This September, however, the issue exploded into public view when a video emerged showing Pakistani soldiers executing six unarmed young men in civilian clothes.** In October, the Obama administration suspended financing to half a dozen Pakistani Army units believed to have killed civilians or unarmed prisoners. The cables verge on gossip, as diplomats strained to understand the personalities behind the fractious Pakistani government, and particularly two men: General Kayani and President Zardari. **Often, the United States finds that Mr. Zardari, the accidental leader after the assassination of his wife, Benazir Bhutto, is sympathetic to American goals — stiff sanctions on terrorist financing, the closing down of terrorist training camps — but lacks the power to fulfill his promises against resistance from the military and intelligence agencies.** Mr. Zardari’s chief antagonist, General Kayani, emerges as a stubborn guarantor of what he sees as Pakistan’s national interest, an army chief who meddles in civilian politics but stops short of overturning the elected order. Early in the Obama administration, General Kayani made clear a condition for improved relations. As the director general of the Directorate for Inter-Services Intelligence, or ISI, from 2004 to 2007, he did not want a “reckoning with the past,” said a cable in 2009 introducing him to the new administration. “Kayani will want to hear that the United States has turned the page on past ISI operations,” it said. General Kayani was probably referring to the peace accords with the Taliban from 2004 to 2007 that resulted in the strengthening of the militants. If the general seems confidently in charge, the cables portray Mr. Zardari as a man not fully aware of his weakness. At one point he said he would not object if Abdul Qadeer Khan, revered in Pakistan as the father of its nuclear weapons program, were interviewed by the International Atomic Energy Agency but tacitly acknowledged that he was powerless to make that happen. **Mr. Zardari, who spent 11 years in prison on ultimately unproved corruption charges, feared for his position and possibly — the wording is ambiguous — his life: the cables reveal that Vice President Biden told Prime Minister Gordon Brown of Britain in March 2009 that Mr. Zardari had told him that the “ISI director and Kayani will take me out.”** His suspicions were not groundless. In March 2009, a period of political turmoil, General Kayani told the ambassador that he “might, however reluctantly,” pressure Mr. Zardari to resign and, the cable added, presumably leave Pakistan. He mentioned the leader of a third political party, Asfandiyar Wali Khan, as a possible replacement. “Kayani made it clear regardless how much he disliked Zardari he distrusted Nawaz even more,” the ambassador wrote, a reference to Nawaz Sharif, a former prime minister. By 2010, after many sessions with Mr. Zardari, Ms. Patterson had revised the guarded optimism that characterized her early cables about Mr. Zardari. **“Pakistan’s civilian government remains weak, ineffectual and corrupt,” she wrote on Feb. 22, 2010, the eve of a visit by the F.B.I. director, Robert S. Mueller III. “Domestic politics is dominated by uncertainty about the fate of President Zardari.”** That assessment holds more than eight months later, even as Mr. Obama in October extended an invitation to Mr. Zardari to visit the White House next year, as the leader of a nation that holds a key to peace in Afghanistan but appears too divided and mistrustful to turn it for the Americans (Perlez, Sanger, & Schmitt, 2010).

**Source:** Telegraph

**Title/Headline:** *Pakistan Test Fires Nuclear-Capable Missile*

**Abstract:** Pakistani Prime Minister Yusuf Raza Gilani said the successful missile test proved that the country's defence capability is invincible and "should never be challenged". The Pakistan military released a statement which said that the Ghauri Hatf 5 missile has a range of 800 miles, and has the capability to carry nuclear and conventional warheads. Mr Gilani made it clear that nuclear deterrence would form the basis of Pakistan's security policy, assuring that the programme would be developed and its nuclear capabilities enhanced. He stated that Pakistan had no intention of using the missiles aggressively. **Pakistan and their neighbours, India, have routinely carried out missile tests since both displayed nuclear capabilities in 1998. The Prime Minister congratulated the engineers and scientists who built the bomb for making the nation "proud", stating that they had help ensure the future safety of Pakistan** (Telegraph, 2010).

**Conclusion:** Pakistan is clearly the Nuclear Terror Scapegoat, and will be definitely be retaliated against with nuclear weapons by the Obama administration if a nuke goes off in America. Millions of people will die in this scenario, and America will then be scapegoated as the aggressor who attacked with no sustentative evidence. In this scenario, Pakistan and the American people lose. The sole winners in this particular scenario are individuals laid out in Chapter 43: *The Unusual Suspects*.

## The Nuclear Bible: Pakistan & Terrorism

**Intro:** Pakistan, whether they know it or not, has been linked to almost every single major terror attack against the West over the last 20 years. The Pakistani Government, its ISI, Osama bin Laden, and alleged terrorists groups within Pakistan have plotted, financed, executed, numerous attacks. Unfortunately, given the trajectory of alleged terror attacks from Pakistan involving WMD's, a nuclear climax may be just around corner. A brief analysis of the following terror attacks show that Pakistan is set up to take the fall for a nuclear terrorist act, despite the fact that the majority of the terror attacks they are accused of were funded and directed by Western intelligence agencies such as Mossad, the CIA, the FBI, MI5, and MI6.

### Pakistan Is The # 1 Scapegoat For Nuclear Terror

**Title/Headline:** *Pakistan And State Terrorism*

**Abstract:** Many consider that Pakistan has been playing both sides in the US "War on Terror". Ahmed Rashid, a noted Pakistani journalist, has accused Pakistan's ISI of providing help to the Taliban. Author Ted Galen Carpenter echoed that statement, stating that **Pakistan "...assisted rebel forces in Kashmir even though those groups have committed terrorist acts against civilians"** Author Gordon Thomas stated that whilst aiding in the capture of al-Qaeda members, **Pakistan "still sponsored terrorist groups in the disputed state of Kashmir, funding, training and arming them in their war on attrition against India."** Journalist Stephen Schwartz notes that several militant and criminal groups are "backed by senior officers in the Pakistani army, the country's ISI intelligence establishment and other armed bodies of the state." According to one author, Daniel Byman, **"Pakistan is probably today's most active sponsor of terrorism."** The Inter-Services Intelligence has often been accused of playing a role in major terrorist attacks across the world including the September 11, 2001 attacks **in the United States**, terrorism in Kashmir, Mumbai Train Bombings, London Bombings, Indian Parliament Attack, Varnasi bombings, Hyderabad bombings **and** Mumbai terror attacks. The ISI is also accused of supporting Taliban forces and recruiting and training mujahideen to fight in Afghanistan and Kashmir. Based on communication intercepts US intelligence agencies concluded **Pakistan's ISI was behind the attack on the Indian embassy in Kabul on July 7, 2008, a charge that the governments of India and Afghanistan had laid previously.** Afghan President Hamid Karzai, who has constantly reiterated **allegations that militants operating training camps in Pakistan have used it as a launch platform to attack targets in Afghanistan, urged western military allies to target extremist hideouts in neighbouring Pakistan.** When the United States, during the Clinton administration, targeted al-Qaida camps in Afghanistan with cruise missiles, Slate reported that two officers of the ISI were killed.

Pakistan is accused of sheltering and training the Taliban in operations "which include soliciting funding for the Taliban, bankrolling Taliban operations, providing diplomatic support as the Taliban's virtual emissaries abroad, arranging training for Taliban fighters, recruiting skilled and unskilled manpower to serve in Taliban armies, planning and directing offensives, providing and facilitating shipments of ammunition and fuel, and on several occasions apparently directly providing combat support," as reported by Human Rights Watch (Wikipedia, 2010).

**Date:** December 11, 1994

**Title/Headline:** *Philippine Airlines Flight 434*

**Abstract:** On December 11, 1994, Philippine Airlines Flight 434 (PAL434, PR434) was the route designator of a flight from Ninoy Aquino International Airport, Metro Manila, Philippines, to New Tokyo International Airport (now Narita International Airport), Narita near Tokyo, Japan, with one stop at Mactan-Cebu International Airport, Cebu. The Boeing 747-283B was on the route from Cebu to Tokyo, when **a bomb, planted by Pakistani terrorist Ramzi Yousef, exploded, killing one passenger**. Luckily, the captain of the flight, an experienced veteran pilot, landed the aircraft, saving the plane and all the passengers and crew (Wikipedia, 2010).

**Date:** January 1995

**Source:** Wikipedia

**Title/Headline:** *Bojinka Plot*

**Abstract:** The Bojinka plot was a planned large-scale terrorist attack by Ramzi Yousef and Khalid Shaikh Mohammed to blow up twelve airliners and their approximately 4,000 passengers as they flew from Asia to the United States. The term can also refer to a combination of plots by Yousef and Mohammed to take place in January 1995, including a plot to assassinate Pope John Paul II and crash a plane into the CIA headquarters in Fairfax County, Virginia, as well as the airline bombing plot. Despite careful planning and the skill of Ramzi Yousef, the Bojinka plot was disrupted after a chemical fire drew Filipino police (PNP) attention on January 6 and January 7, 1995. One person was killed in the course of the plot — a passenger seated near a nitroglycerin bomb on Philippine Airlines Flight 434. Some lessons learned by the organisers of this plot were apparently used by the planners of the September 11 attacks. The money handed down to the plotters originated from Al-Qaeda, the international Islamic jihadi organization then based in Sudan. He left Manila for several days, but was met by Islamist emissaries upon his return to Metro Manila. **They asked him to attack United States President Bill Clinton, who was due to arrive in the Philippines on November 12, 1994 as part of a five-day tour of Asia. Yousef thought of several ways to kill the president, including placing nuclear bombs on Clinton's motorcade route, firing a Stinger missile at Air Force One or the presidential limousine, launching theater ballistic missiles at Manila and or killing him with phosgene, a chemical weapon, which all of the plots are unlikely to happen to say the least wishful thinking.** He abandoned the idea, as it would be too difficult to kill the President. However, he incorporated his plan to kill the Pope into the Bojinka plot. Yousef's project was discovered on four floppy disks and an off-white Toshiba laptop inside his apartment, two weeks before the plot would have been implemented. Several encrypted files on the hard drive contained flight schedules, calculations of detonation times, and other items. The first string of text in one of the files states, "All people who support the U.S. government are our targets in our future plans and that is because all those people are responsible for their government's actions and they support the U.S. foreign policy and are satisfied with it. We will hit all U.S. nuclear targets. If the U.S. government keeps supporting Israel, then we will continue to carry out operations inside and outside the United States to include..." and the text ends (Wikipedia, 2010).

U.S. Embassy in Tanzania

**Date:** August 7, 1998

**Source:** Wikipedia

**Title/Headline:** *1998 United States Embassy Bombings*

**Abstract:** The 1998 U.S. Embassy bombings occurred on August 7, 1998. Hundreds of people were killed in simultaneous truck bomb explosions at the United States embassies in the major East African cities of Dar es Salaam, Tanzania and Nairobi, Kenya. The attacks, linked to local members of the Egyptian Islamic Jihad brought Osama bin Laden and Ayman al-Zawahiri to the attention of the US public for the first time, and resulted in the U.S. Federal Bureau of Investigation placing bin Laden on its Ten Most Wanted list. According to Wikipedia, 8 of the 21 1998 Embassy Bombing suspects have intimate relations to Pakistan

- Osama Bin Laden: Allegedly hiding in Pakistan
- Ayman al Zawahiri: Thought to be in Pakistan
- Ahmed Mohammed Hamed Ali: In Pakistan prior to 1998 bombings
- Sheikh Ahmed Salim Swedan: Killed in Pakistan in 2009
- Muhsin Musa Matwalli Atwah, Killed in Pakistan in 2006

- Abdullah Ahmed Abdullah: Generally thought to be in Afghanistan or Pakistan
- Fahid Mohammed Ally Msalam: Killed in Pakistan in 2009
- Mustafa Mohamed Fadhil: Allegedly captured in Pakistan in 2004 (Wikipedia, 2010).

**Title/Headline:** *Text: Joint Chiefs Chairman On ABC's 'This Week'*

**Abstract:** Federal authorities have told ABC News they've now tracked more than **\$100,000 from banks in Pakistan to two banks in Florida to accounts held by suspected 9/11 hijack ringleader Mohamed Atta**. *Time* magazine is reporting that some of that money came in the days just before the attack and **can be traced directly to people connected to Osama bin Laden** (Washington Post, 2001).

**Date:** October 6, 2001

**Source:** CNN

**Title/Headline:** *Suspected Hijack Bankroller Freed By India In '99*

**Abstract:** A senior level U.S. government source told CNN in October 2001 that U.S. investigators believed Ahmed Omar Saeed Sheikh (Ahmed Umar Syed Sheikh), a long time [Pakistani] ISI asset, using the alias Mustafa Muhammad Ahmad, **sent more than \$100,000 from Pakistan to Mohammed Atta, the suspected hijack ringleader of the September 11, 2001 attacks** (CNN, 2001).

**Date:** December 22, 2001

**Source:** BBC

**Title/Headline:** *Richard Reid (Shoe Bomber)*

**Abstract:** Richard Colvin Reid (born August 12, 1973) commonly known as the shoe bomber, is a self-admitted member of al-Qaeda who pled guilty in 2002 in U.S. federal court to eight criminal counts of terrorism stemming from his attempt to destroy a commercial aircraft in-flight by detonating explosives hidden in his shoes. He is currently serving a life sentence without parole in a super maximum security prison in the United States. His crime led to the new requirement of American airline passengers having to remove their shoes for inspection before boarding a flight or entering an airline terminal. **He spent 1999 and 2000 in Pakistan and trained at a terrorist camp in Afghanistan, according to several informants. He may also have attended an anti-American religious training center in Lahore, Pakistan as a follower of Mubarak Ali Gilani. During this time he met Saajid Badat. After his return Reid set about obtaining duplicate passports from British government consulates abroad. Reid next resided at numerous places in Europe, communicating via an address in Peshawar, Pakistan, a city known for its Al Qaeda connections. In July 2001, Reid flew to Israel, passing through the El Al Airline's very tight security network, in what was possibly a test of his ability to pass through airport security screening anywhere.** He then moved to Amsterdam, living there from August 2001 through November 2001, working as a dishwasher. Reid and Badat returned to Pakistan in November 2001, and reportedly traveled overland to Afghanistan. They were given "shoe bombs", casual footwear adapted to be covertly smuggled onto aircraft before being used to destroy them. **Later forensic analysis of both bombs showed that they contained the same plastic explosive and that the respective lengths of detonator cord had come from the same batch: indeed, the cut mark on Badat's cord matches exactly that on Reid's. The pair returned separately to Great Britain in early December 2001.** Reid went to Belgium for 10 days before catching a train to Paris on December 16. On December 21, 2001, Reid attempted to board a flight from Paris, France to Miami, Florida, but his boarding was delayed because his disheveled physical appearance aroused the suspicions of the airline passenger screeners. Reid also did not answer all of their questions, and had not checked any luggage for the transatlantic flight. Additional screening by the French National Police resulted in Reid's being re-issued a ticket for a flight on the following day. **He returned to the Paris airport on December 22, 2001, and he boarded American Airlines Flight 63 from Paris to Miami, wearing his special shoes packed with plastic explosives in their hollowed-out bottoms** (BBC, 2001).

**Title/Headline:** *US Says 9/11 Financier Caught*

**Abstract:** On September 11<sup>th</sup>, 2001, the deadliest acts of terrorism on U.S. soil destroyed the World Trade Center, heavily damaged the

Pentagon and left thousands of Americans dead. A man captured with an alleged **Al Qaeda mastermind in Pakistan helped to fund the 9/11 hijackers**, US officials said. **A man captured with an alleged al-Qaeda mastermind in Pakistan helped to fund the 11 September hijackers**, US officials say. US media reports name the man as Mustafa Ahmed al-Hawsawi and say he could be another important catch. **Mr Hawsawi was arrested in the same pre-dawn raid by US and Pakistani forces which netted Khalid Sheikh Mohammed and Abdul Qadus. Sheikh Mohammed - said to be a senior al-Qaeda leader - has been flown out of Pakistan, probably to be interrogated at a US detention facility at Bagram air base in Afghanistan.** US President George W Bush broke a public silence on the Rawalpindi arrests on Tuesday, saying the action "struck a serious blow" against Osama Bin Laden's network. While Sheikh Mohammed and Mr Qadus were named soon after they were captured, the third man was not identified beyond the fact that he was of Middle Eastern origin. But US media have now quoted US intelligence officials as saying he is Mr Hawsawi. The Saudi-born Mr Hawsawi, 34, has been listed as a "supporting conspirator" for Zacarias Moussaoui, the alleged "20th hijacker" who was set to take part in the attacks on New York and Washington.

**In the charges against Mr Moussaoui, US officials allege that Mr Hawsawi:**

- Opened bank account for Fayez Ahmed, who was one of the hijackers who flew the second plane into the World Trade Center
- Deposited money for the hijackers' use
- Received refunds from hijackers including alleged ringleader Mohammad Atta in the days before the attacks
- Fled the United Arab Emirates for Pakistan on 11 September, 2001, the day of the attacks

**Officials hope that the capture of Mr Hawsawi and Sheikh Mohammed, accused of planning the 11 September attacks, will help them in their investigation as well as provide information on the whereabouts of Bin Laden and any sleeper cells in the US (BBC, 2003).**

U.S.S. Cole

Waleed bin Attash/Tawfiq Attash

**Date: April 30, 2003**

**Source: Fox News**

**Title/Headline: Pakistan Nabs USS Cole Suspects, Five Others**

**Abstract:** U.S. officials hailed as a "big catch" Wednesday the arrest of a man accused of masterminding the bombing of the USS Cole and playing a leading role in the Sept. 11 terror attacks. Pakistani authorities captured Waleed bin Attash, also known as Tawfiq Attash or just Khallad, who coordinated the activities of at least two of the hijackers who crashed into the Pentagon during the Sept. 11 attacks, U.S. counterterrorism officials said. He is also one of two figures described as plotting the bombing of the U.S. Navy destroyer on Oct. 12, 2000 in Yemen. Khallad was arrested along with five other Al Qaeda suspects Tuesday during raids in the southern Pakistani city of Karachi. Pakistani and U.S. officials announced his capture Wednesday. President Bush described Khallad as "one of the top Al Qaeda operatives" -- saying he ranked just below Khalid Shaikh Mohammed, the captured No. 3 figure in the terror network. Khallad is often described as one-legged but actually is missing his right foot. **"He's a killer,"** Bush said of Khallad. **"He is one less person that people who love freedom have to worry about. ... It was a major, significant find."** U.S. counterterrorism officials described Khallad as among the top 10 Al Qaeda figures who remained at-large. **"This is a big catch,"** said Brig. Javed Iqbal Cheema, the head of Pakistan's counterterrorism unit. **"I think he is very important."** American and Pakistani officials said Khallad, a Yemeni who also held Saudi citizenship, was active in plotting new terrorism. He will be interrogated by officials from both countries. **"With these arrests a major terrorist attack has been averted in Pakistan,"** said the country's interior minister, Saleh Faisal Hayyat. **In the Cole attack, two homicide bombers rammed an explosives-laden boat into the Cole in the Yemeni port of Aden, ripping a gaping hole in the ship's hull and killing 17 sailors.** The other alleged Cole mastermind, Al Qaeda's Persian Gulf operations chief Abd al-Rahim al-Nashiri, was captured in November in the United Arab Emirates. Two other alleged lower-ranking organizers of the attack recently escaped from a Yemeni prison. They were not believed to be among the six captured this week. **Khallad had also planned an attack on another Navy destroyer in Aden in early January 2000. That attack failed when the bomb boat sank under the weight of the explosives.** U.S. counterterrorism officials further described Khallad as the intermediary between alleged Sept. 11 mastermind Khalid Shaikh Mohammed and hijackers Khalid al-Mihdhar and Nawaf al-Hazmi. Mohammed was captured in Rawalpindi, Pakistan, in March. In January 2000, Khallad met with the two eventual Sept. 11 hijackers in Kuala Lumpur, Malaysia (Fox News, 2010).

**Title/Headline: The Long Arm Of The Law**

**Abstract:** Ramzi Yousef, mastermind of the 1993 bombing of the World Trade Center and other plots, was located and arrested in Islamabad, Pakistan. According to the FBI, Yousef, who was born in Kuwait of Pakistani decent, was immediately flown back to New York City, escorted by an FBI arrest team, and arraigned on charges relating to the World Trade Center bombing. Several months later,

**Yousef was charged in the "Manila Air" bombing case.** In January 1998, he was sentenced to serve 240 years, plus another life sentence, in an American jail for his crimes. Ultimately, **a sighting on a street in Pakistan** was linked to bits of evidence in dozens of other cities and countries. **Pakistani police identified and arrested Yousef, then arranged for FBI Agents to take custody and leave the country with the prisoner** (FBI, 2004).

**Title/Headline:** 3/11 Madrid Terror Attacks

**Abstract:** The Madrid train bombings consisted of a series of coordinated bombings against the Cercanías (commuter train) system of Madrid, Spain on the morning of 11 March 2004 (three days before Spain's general elections), killing 191 people and wounding 1,800. The official investigation by the Spanish Judiciary determined the attacks were directed by an al-Qaeda-inspired terrorist cell although no direct al-Qaeda participation has been established. Spanish miners who did not carry out the attacks but who sold the explosives to the terrorists were also arrested. **On Saturday, 13 March [2004], when three Moroccans and two Pakistani muslims were arrested for the attacks,** it was confirmed that the attacks came from an Islamic group. Only one of the five persons (the Moroccan Jamal Zougam) detained that day was finally prosecuted (Wikipedia, 2010).

**Title/Headline:** 7 July 2005 London Bombings

**Abstract:** The 7 July 2005 London bombings (often referred to as 7/7) were a series of coordinated suicide attacks upon London's public transport system during the morning rush hour. **On that morning, four al-Qaeda associated militants detonated four bombs, three on London Underground trains in quick succession, a fourth bomb exploding an hour later on a double-decker bus in Tavistock Square. Fifty-two people in addition to the four bombers were killed in the attacks and around 700 were injured.** The explosions were caused by homemade, organic peroxide-based devices packed into rucksacks. The bombers were motivated by the teachings of Osama bin Laden, opposition to British support of Saudi Arabia, and anger over Britain's involvement in the Iraq War. In October 2010, an independent Coroner's Inquest into the bombings began. The Right Honourable Lady Justice Hallett D.B.E. has been appointed to hear the Inquest which will report in 2011.

**Mohammad Sidique Khan:** Khan of Pakistani descent, detonated his bomb just after leaving Edgware Road and was heading for Paddington, at 8:50 a.m. He lived in Beeston, Leeds with his wife and young child, where he worked as a learning mentor at a Primary School. **His blast killed 7 people, including himself.**

**Shehzad Tanweer:** Tanweer of Pakistani descent, detonated his bomb travelling between Liverpool Street and Aldgate, at 8:50 a.m. He lived in Leeds with his mother and father working in a fish-and-chip shop. His blast killed 8 people, including himself.

**Germaine Lindsay:** Jamaican-born Lindsay, detonated his bomb travelling between King's Cross St. Pancras and Russell Square, at 8:50 a.m. He lived in Aylesbury, Buckinghamshire with his pregnant wife and young son. His blast killed 27 people, including himself.

**Hasib Hussain:** Hussain of Pakistani descent, detonated his bomb at Tavistock Square, at 9:47 a.m. He lived in Leeds with his brother and sister-in-law. His blast killed 14 people, including himself (Wikipedia, 2010).

**Title/Headline:** *Benazir Bhutto Said Osama Bin Laden Was Dead*

**Abstract:** President of Pakistan, Benazir Bhutto asserted to David Frost that Osama bin Laden had been murdered by Omar Sheikh, whom was once described as "no ordinary terrorist but a man who has connections that reach high into Pakistan's military and intelligence elite and into the innermost circles" (Prison Planet, 2007).

Only days after the bin Laden is dead comment, the assassination and murder of Bhutto rocked Pakistan. It is widely suspected that the CIA or Blackwater was responsible for the hit.

BROOKINGS

**Date:** May 2008

**Source:** Saban Center for Middle East Policy at the Brookings Institution, Daniel L. Byman

**Title/Headline:** *The Changing Nature Of State Sponsorship Of Terrorism*

**Abstract:** The U.S. approach toward state sponsorship of terrorism rests on a flawed understanding of the problem and an even more flawed policy response. The U.S. Department of State's current formal list of state sponsors includes Cuba, Iran, North Korea, Sudan, and Syria. But Cuba and North Korea have done almost nothing in this area in recent years, and Sudan has changed its ways enough that elsewhere the Bush administration credits Sudan as a "strong partner in the War on Terror." Of those on the list, only Syria and Iran remain problems, and in both cases their involvement in traditional international terrorism is down considerably from their peaks in the 1980s. What seems like a brilliant policy success, however, is really an artifact of bad list management, because much of the problem of state sponsorship today involves countries that are not on the list at all. Pakistan has long aided a range of terrorist groups fighting against India in Kashmir and is a major sponsor of Taliban forces fighting the U.S.-backed government in Afghanistan. Hugo Chavez's government in Venezuela is a major supporter of the FARC. And several other governments, such as those in Iraq, Yemen and the Palestinian territories, create problems by deliberately looking the other way when their citizens back terrorist groups. These new state sponsors are actually more dangerous to the United States and its interests than the remaining traditional state sponsors, because some of them are tied to Sunni jihadist groups such as al-Qa'ida—currently the greatest terrorist threat facing the United States. The nightmare of a terrorist group acquiring nuclear weapons is far more likely to involve Pakistan than it is Iran or North Korea. The new state sponsors can also be harder to deal with than the old ones, not least because they often have a more complicated relationship with terrorists. In many cases, the government in question does not actively train or arm the terrorist group, but rather lets it act with relative impunity—an approach that, in practice, allows the government to claim ignorance or incapacity. Thus it can be hard to distinguish between Yemen's willful inaction and cases like Jordan, where terrorist cells also operate but do so despite a fierce regime counterterrorism campaign. Many of the new sponsors are also U.S. allies. And some cooperate, albeit fitfully, with the U.S. war on terrorism even as they surreptitiously allow terrorists to operate from their soil. Because of this complexity, the answer to the problem does not lie only in updating the State Department's state sponsorship list to reflect current relationships—swapping out Cuba for Venezuela, say, or replacing North Korea with Pakistan. The very concept of a binary list, with countries either on it or off, is flawed and often does more harm to U.S. interests than good. Once a country is listed it is hard to remove even if it does not support terrorism (as Sudan has found out), and the list provides little incentive for partial or incomplete counterterrorism cooperation (which is all several countries are realistically likely to give). So what Washington should really do is adopt a new approach that recognizes the complex nature of state sponsorship today.

**The first step should be to forge an international consensus on a broad definition of what constitutes state sponsorship—a definition that encompasses not only errors of commission, such as arming and training groups, but also errors of omission, such as unwillingness to stop terrorist fundraising and recruitment.**

**Introduction:** State support remains one of the deadliest and most important aspects of terrorism. However, the identity and nature of state sponsors of terrorism has changed considerably in recent years. As a result, the United States must modify its efforts to fight this deadly scourge. **The U.S. Department of State identifies the following countries as state sponsors of terrorism:** Cuba, Iran, North Korea, Sudan, and Syria. Notably, Libya was removed from the state sponsors list after having been on the list since its inception. This list, however, misstates and understates the problem. **The most important omission is Pakistan, which has long supported a range of terrorist groups fighting against India in Kashmir and is a major sponsor of Taliban forces fighting the U.S.-backed government in Afghanistan.** Further complicating this picture are the issues of passive sponsors and quasi-independent parts of governments that may act without authorization from senior leaders. In Saudi Arabia, for example, parts of the clerical establishment raise money for anti-Shi'i and anti-U.S. Sunni radicals in Iraq even as the Saudi Arabian government fights against similar groups within the kingdom. In Iraq, areas of the country are a haven for terrorist groups due to a lack of government capacity, while in Iraqi Kurdistan, the Partiya Karkerên Kurdistan (Kurdistan Workers' Party), the terrorist group which fights Turkey, operates with at least the toleration, if not the approval, of the Kurdish authorities.<sup>4</sup> Yemen has cracked down on terrorists opposing its government there but is more tolerant when these groups operate abroad. Some observers contend that in some countries key state agencies often operate without the full approval of their governments. **Such passive and quasi-independent sponsors are arguably more dangerous to the United States than are traditional sponsors because some of them are tied to jihadist groups such as al-Qa'ida, which are currently the greatest terrorist threat to the United States.** In addition, the U.S. toolkit for such sponsors is less robust than it is for traditional sponsors like Iran and Syria. Coercing such rogue regimes is difficult, but analysts and policymakers have considered these issues for years, while the intellectual arsenal for confronting passive sponsors has not been well developed. **Given the direct al-Qa'ida danger, it is not surprising that the United States has embarked on a major campaign against state sponsored terrorism as part of the overall "global war on terrorism."**

**Pakistan:** Pakistan is perhaps the world's most active sponsor of terrorist groups—sponsorship that includes aiding groups that pose a direct threat to the United States. In its support, Pakistan spans the range of categories listed in the preceding section: actively backing some groups, maintaining contacts with others, turning a blind eye to yet more groups, and in some cases lacking the capacity to shut down radicalism it opposes. In addition, support for terrorism in Pakistan is a broadbased activity, involving an array of government and non-state actors. Islamabad has long worked with many different groups linked to jihadists in its fight to wrest Kashmir from India. In this fight, Pakistan worked with groups such as Lashkar-e Tayyaba (LeT), Jaish-e Muhammad and Harakat ul-Mujahedin to train jihadists to fight in Kashmir. Many of these groups were temporarily banned or forced to change their names in response to U.S. pressure after 9/11. Nonetheless, they or their successors remain active with Pakistani government support. Pakistan played an instrumental role in the creation and advancement of the Taliban in the 1990s, with the Pakistani Army and the ISI working closely with the Taliban at all levels. In addition, support for fighters in Afghanistan was one of the main reasons for the creation of LeT, and this was done with the assistance of Osama bin Laden himself. **In response to extremely heavy U.S. pressure, Pakistani President Pervez Musharaff supposedly cut ties to the Taliban after the 9/11 terrorist attacks. The Karzai government of Afghanistan claims that the Pakistani Army and ISI still back the Taliban: a charge that the Taliban and Pakistan deny. Yet this denial rings false.**

Several observations support the view that Pakistan is a major backer of the Taliban and other groups fighting the Karzai government:

- Before 9/11, Pakistan's ties to the Taliban were extensive and well-documented;
- The Taliban's leadership today is based in Pashtun areas of Pakistan. Similarly the forces of Hizb-e Islami led by Gulbuddin Hekmatyar, who in 2006 declared that he would fight under al-Qa'ida's banner, have a significant presence in several areas in Pakistan;
- NATO commanders report that Pakistan's efforts to police its border with Afghanistan are at best half-hearted;
- Pakistan's official bans on radical groups linked to the Taliban such as LeT were not followed up with serious enforcement. LeT, for example, still runs a massive charity, hundreds of schools, and has hundreds of offices in the country;
- Pakistani recruits are often found in the ranks of the Taliban and other groups; and
- Attacks are often planned from and organized in Pakistan.

**One hub for radical and terrorist activity is the Federally Administered Tribal Areas (FATA), which became a major haven for the Taliban after they fell from power in 2001. In addition to the Taliban, other militant groups like Hizb-e Islami and foreign jihadists with ties to al-Qa'ida operate out of FATA. Pakistan's support for groups like the Taliban is done in part by non-state actors affiliated with the government.** For example, the Jamiat Ulema-e-Islami of Fazlur Rehman (JUI-F), a political and religious group that calls for religious government and endorses many militant Islamist positions, has a locus of power in both Baluchistan and the Northwest Frontier Province using its official position to advance and openly back the Taliban. **JUI-F and the Taliban both share an ideology that draws upon the traditions of Deobandism. In addition to non-state actors like JUI-F, al-Qa'ida also has ties to other religious leaders, smuggling organizations, and individuals in the security services. The Pakistani government directly and indirectly supports these associations. It works with JUI-F against its secular Baluchi and Pashtun opponents (many of whom are tribal leaders or nationalist figures), and JUI-F's activities in support of the jihadist movement in general are both tolerated and at times exploited.** Allowing the JUI-F to do the "dirty work" of supporting the Taliban and other groups helps the government ensure strong relations with a key political ally and gives the government a degree of deniability. **One cost of this "outsourcing" of terrorism to nonstate actors is that these actors have their own agendas that differ considerably from those of the Pakistani government. Groups like the JUI-F, for example, also have extensive ties to an array of jihadists who in addition to fighting in Afghanistan and**

Kashmir, are also engaged in various struggles throughout the Muslim world. Individuals linked to the JUI-F provide training, networking, financing, and other services for various jihadists writ large, even though many of these jihadists also violently oppose the government of Pakistan. Indeed, Musharraf has suffered at least seven assassination attempts, several of which nearly succeeded. Moreover, many jihadist activities in Pakistan, particularly jihadist sectarian killings and attacks of army forces, go directly against the Musharraf government's strategic interest and domestic power base. **An even trickier question is the degree to which the ISI and parts of the military are backing the Taliban and various jihadist groups in defiance of their own government's wishes. The ISI is reported to channel resources to various Islamist groups, tip them off about government counterterrorism actions, and look the other way as they recruit and raise money. Indian officials also claim that the ISI has played a major role in attacks such as the July 2006 bombing in Mumbai.** Such support is particularly complex, as support for the Taliban and groups fighting in Kashmir appears to be official Pakistani policy, while support for the core group of jihadists around bin Laden that comprise the heart of al-Qa'ida does not. **Is the ISI acting on behalf of the Pakistani government or in defiance of it? Former U.S. Ambassador to Pakistan William Milam claims that the ISI is firmly under Musharraf's control. Other officials echo this point, noting that painting the ISI as a "rogue" agency helps the Musharraf government maintain Western goodwill even as it backs anti-Western causes.** In addition, Musharraf replaced several leaders of the ISI in the years after 9/11, putting loyalists into the most senior ranks. **The reality becomes murkier at lower levels, as some officials are undoubtedly sympathetic to the jihadists. A less immediate but potentially greater long-term concern, is the various schools, both religious and state in particular, that breed anti-U.S. extremism. Despite repeated Pakistani promises to control madrassahs and turn them away from jihadist groups, their number has grown since 9/11, and many schools have not registered with the government.** Some of the schools openly encourage recruits to join jihadist organizations, but the greater problem is that they breed sectarianism. **Many have curricula that harshly criticize Shi'i, Sufi, and other, more moderate Sunni (including non-violent salafi) interpretations of Islam. In addition to teaching their students messages of hate, they also have newspapers, websites, and other forms of dissemination that seek to indoctrinate a broader audience. Unfortunately, the vast majority of U.S. attention has focused on religious schools, while much of the public education system is free to preach hostility to the United States.** Indeed, one recent study finds that only one percent of fulltime student enrollments are in religious schools. **The motivations for Pakistan's support are mixed; strategic ambition, domestic politics, and incapacity all play a role. Traditionally Pakistan backed groups in Afghanistan for strategic reasons (many of them rather far-fetched). These range from concern about Afghan irredentism to a desire for strategic depth in the event of a conventional military conflict against India.** For many years, support for terrorist and insurgent movements proved effective in stoking militancy in Kashmir, preventing the region from being incorporated into India and tying down large numbers of Indian forces. Today in Afghanistan, backing the Taliban also gives Islamabad tremendous leverage over a neighbor whose politics are often tied to that of Pakistan. **A further motivation for Musharraf and successor governments is political survival. The Musharraf administration, bereft of support from the traditional secular political parties, has reached out to Islamist parties. These parties back terrorists and other radical forces in Kashmir and the Taliban in Afghanistan. The Taliban and many jihadist-oriented parties are supported by significant large segments of the Pakistani population, as are many groups fighting in Kashmir. Moreover, anything that smacks of cooperation with Washington is unpopular.** Thus even the ascendant secular parties will be hesitant to engage in a crackdown. Incapacity is also a genuine concern. FATA, for example, has always had loose administration. In FATA, militants have killed hundreds of military and security service personnel as well as civilian government officials. **Militants have also inflicted heavy losses on the army in other parts of Pakistan. As a result, parts of the army suffer poor morale, and discipline is breaking down. The Pakistani government's outsourcing of support for terrorism has over time enabled various domestic Islamist groups to become stronger politically.** For example, the Musharraf's government's support for a major JUI-F role in the Baluchistan government has enabled JUI-F to channel provincial government resources to radical madrassahs that the group runs. Increasingly, JUI-F is a major player in Baluchistan with the result being that the Pakistani central government treats it more as partner than proxy. **On a societal level, Pakistan's support for various radical groups has increased the "Talibanization" of Pakistan. The dozens of small foreign jihadist groups, as well as the large cadre of Taliban, have cross-fertilized with various Islamist groups in Pakistan producing a dangerous mix of organization, political ambition, and violence. Militants in Pakistan openly raise money and issue propaganda in support of jihadist causes.** In parts of FATA and North and South Waziristan, Taliban-style social policies such as banning music and closing barbershops are common. Sectarianism in Pakistan has also grown, with Sunni militants targeting an array of Shi'i elites as well as Sunnis who do not fully embrace their cause. U.S. pressure in the immediate aftermath of 9/11 led the Pakistani government to focus on uprooting al-Qa'ida-linked individuals, but little cooperation occurred on the Taliban. **At times the Musharraf government will arrest Taliban members, but only under great pressure and only lower-level members. In recent years, arrests of senior al-Qa'ida figures have dried up even as most observers believe the organization has reconstituted its core in parts of Pakistan.**

**Conclusion:** As the above review suggests, a large and growing problem for the United States is passive sponsorship of terrorism. **Only recently have U.S. officials begun to focus on this problem. The lack of attention is far more profound overseas.** Even in many Western countries, efforts focus almost entirely on issues of overt support, even though passive sponsorship can often be far more important to a group's success. **This is particularly so for the jihadist movement, which today does not enjoy any direct overt sponsorship but relies heavily on toleration or even complicity from several governments.** Preventive action is vital. Setting standards early can stop groups from getting a foothold into different societies, reducing their influence and making governments both more capable—and more willing—to halt their activities. **Effective policy can limit the scope and frequency of state sponsorship—but it will not stop the problem completely. States have many reasons to back terrorists, and the United States can affect their calculations, but some will disregard U.S. pressure while others will develop even more devious ways of avoiding it (Byman, 2008).**

**Date:** November 13, 2008

**Source:** The Atlantic Council, James Joyner

**Title/Headline:** *Every Major Terrorist Threat Has Ties To Pakistan*

**Abstract:** CIA Director Michael Hayden told the Atlantic Council this afternoon that al Qaeda's safe haven in Pakistan's ungoverned tribal areas have provided a "sanctuary" that has "allowed it to recover some capacity lost when expelled from Afghanistan" nearly seven years ago. It has developed a "close, co-dependent relationship with Pashtun extremist and separatist groups" through very careful exploitation of cultural norms, respect for tribal leaders and, increasingly, intermarriage. "Let me be very clear," Hayden said, "Today, virtually every major terrorist threat that my agency is aware of has threads back to the tribal areas." He stressed, however, that this is a complex situation. While the problem looks easy from thousands of miles away, it's extremely difficult up close because of the tribal issues. Hayden believes the Pakistani government has been extraordinarily helpful in responding to this challenge. Their plan, which they started to implement in 2006, to slowly expand their reach over the FATA would have been wise and far-reaching were it not for the extreme urgency of the threat. Further, we've killed and captured more top al Qaeda operatives with the support of the Pakistani security forces than anywhere else in the world. What remains unclear, however, is what the end game is. Al Qaeda was chased out of Yemen in the 1990s only to reconstitute in Afghanistan. It was run out of Afghanistan in 2001, only to disperse, setting up a rump headquarters in Pakistan and declare Iraq the "central front" of its effort. Hayden today declared that al Qaeda in Iraq was "on the verge of strategic defeat" but that we're now facing the inevitable "bleed out problem," with its forces deploying elsewhere. Where, then, does it stop? Or is this simply a case, to use an analogy that Hayden employed in a different part of his talk, a case of "perpetual penalty kicks?" Hayden closed his appearance by noting, quite simply, that the intelligence business is very hard. Questions to which the answers are known with a high degree of confidence don't even get to his level. Instead, he has to deal with things "somewhere between a mystery and an enigma." Graded on a curve, the intelligence community is doing quite well. Unfortunately, graded on an absolute scale, it "always fails." Perhaps the answer to the question comes from another observation that Hayden made later in his remarks. After outlining progress that has been made against al Qaeda and its allies on various regional fronts, including Iraq, Saudi Arabia, Indonesia, and the Philippines, he observed that the key battle was on the "ideological front," which he termed "the deep fight." He believes that the last year has provided "clear and mounting evidence" that we're winning here because "authentic voices" -- respected Muslim leaders -- are speaking out against the "un-Islamic" barbarity of al Qaeda. The upshot of this is that it "can only subsist beyond the reach of civilization and the rule of law." Presumably, then, we will win this battle by gradually eliminating such places. Needless to say, we have a long way to go (Joyner, 2008).

The  
New York  
Times

**Date:** November 26, 2008

**Source:** The New York Times

**Title/Headline:** *2008 Mumbai Attacks*

**Abstract:** The 2008 Mumbai attacks (often referred to as November 26th or 26/11) were more than 10 coordinated shooting and bombing attacks across Mumbai, India's largest city, by Islamic terrorists from Pakistan. The attacks, which drew widespread global condemnation, began on 26 November 2008 and lasted until 29 November, killing at least 175 people and wounding at least 308. Eight of the attacks occurred in South Mumbai: at Chhatrapati Shivaji Terminus, the Oberoi Trident, the Taj Mahal Palace & Tower, Leopold Cafe, Cama Hospital (a women and children's hospital), Nariman House, the Metro Cinema, and a lane behind the Times of India building and St. Xavier's College. There was also an explosion at Mazagaon, in Mumbai's port area, and in a taxi at Vile Parle. By the early morning of 28 November, all sites except for the Taj hotel had been secured by Mumbai Police and security forces. An action by India's National Security Guards (NSG) on 29 November (the action is officially named Operation Black Tornado) resulted in the death of the last remaining attackers at the Taj hotel, ending all fighting in the attacks. Ajmal Kasab, the only attacker who was captured alive, disclosed that the attackers were members of Lashkar-e-Taiba, the Pakistan-based militant organisation, considered a terrorist organisation by India, Pakistan, the United States, the United Kingdom, and the United Nations, among others. The Indian government said that the attackers came from Pakistan, and their controllers were in Pakistan. On 7 January 2009, after more than a month of denying the nationality of the attackers, Pakistan's Information Minister Sherry Rehman officially accepted Ajmal Kasab's nationality as Pakistani. On 12 February 2009, Pakistan's Interior Minister Rehman Malik, in a televised news briefing, confirmed that parts of the attack had been planned in Pakistan and said that six people, including the alleged mastermind, were being held in connection with the attacks. A trial court on 6 May 2010 sentenced Ajmal Kasab to death on five counts (Wikipedia, 2010).

**Source:** Thaindian News

**Title/Headline:** *Next Terrorist Attack Against US Will Originate From Pakistan*

**Abstract:** A top U.S. Congressional panel described Pakistan as "the intersection of nuclear weapons and terrorism," the next terror attack on America is likely to originate in its ally's tribal areas. While observing that Pakistan is a U.S. ally, the commission on weapon of mass destruction (WMD) and terrorism said "the next terrorist attack against the United States is likely to originate from within the Federally Administered Tribal Areas" in Pakistan. The U.S. says the tribal areas in northwest Pakistan, where the government exerts little control, are a haven for militants from both Pakistan and neighboring Afghanistan. It warned that there is a threat

of nuclear terrorism, both because more countries are developing nuclear weapons and because some existing nuclear powers are expanding their arsenals. **“Terrorist organizations are intent on acquiring nuclear weapons,” said the report. It cited testimony before the commission from former Senator Sam Nunn, who said that the “risk of a nuclear weapon being used today is growing, not receding.”** The commission was created in line with a recommendation from the 9/11 Commission on the September 11th, 2001, terrorist attacks on the US. But terrorists are likely to use a weapon of mass destruction somewhere in the world in the next five years, former Senator Bob Graham, chairman of the commission stated to CNN (Thaindian, 2008).

**Title/Headline:** *Alex Jones Interviews Lt. Gen. Hamid Gul [Excerpt]*

**Abstract:**

**Alex Jones:** Well, ladies & gentlemen, out of the gates, we have **Gen. Hamid Gul, and of course he was the head of Pakistani intelligence ISI back in the 1980’s, he went on CNN on Sunday night on one of their international programs and talked about the fact that he believed 9/11 was an inside job, and that the Mumbai attacks, formerly Bombay, were also an inside job. As you know, we have detailed that that was a False Flag attack, carried out by western intelligence,** clearly, in India, as a pretext to start World War III between the two nations. There were also calls, the Pakistani government said were officially made, confirmed with the phone records, from the Indian Foreign Ministry, saying “we are going to attack you”, attempting to trick the Pakistanis into launching some type of attack, and that almost happened. So, for the next thirty minutes I’m very honored to be joined by Gen. Hamid Gul, and General, joining us from Pakistan, thank you so much for coming on with us today.

**Hamid Gul:** Well, at the moment, we have to look at this human — great human tragedy that took place in Bombay. I sympathize with India; they’ve been rocked very badly. And their response was a bit nervous. **They want to go to war with Pakistan if Pakistan does not behave or does not hand over whoever they want from us.** They have given a list of people. But I think that there has been a long record of the Indians accusing Pakistan whenever something like this happens, and in the past they have turned out to be every time wrong. Of course Pakistan is willing to cooperate. And I think that is a very good position that President Zardari has taken, that **“you provide the evidence and we will try them out; we will arrest them we will put them to trial, and you can come and watch, see, and let the international cameras come and see. And there shall be a transparent, open trial, and if that does not satisfy you, then what else will?”** So, this is the situation where we stand today: there is an ominous tack from India, and America seems to be partly patting them on the back, and asking Pakistan to do whatever India is demanding. Now this is an unfair position, because India is not like America. **America demanded from Pakistan back in — after 9/11 to cooperate and hand over anybody that Pakistan could lay their hands on. Seven hundred or so people were caught in Pakistan, they were sent to Guantanamo Bay, to Baghrum and to Kandahar jail.** And nothing came out — Khalid Sheikh Mohammad was the only one who was tried in that case: all others have been let off. **So, to get innocent people like that, just because you accuse them, and you don’t even provide the evidence, you pick them up and shove them in jails, this is not on [misses ]. I think that this belittles the values that particularly democracies uphold, and they talk so much about.** And so I think that my son-in-law putted it good enough, and today Pakistan backed down on some of the defunct organizations — in fact these were banned in the year 2002, immediately after 9/11, but there could be some maverick elements among them who would still — I won’t rule out, could carry out uh-hh *[bumper music begins in background]*— in — uh, on their own *or* in conjunction with some other forces [“partic”??] that kind of atrocities. But we have to wait and see, how it goes.

**Alex Jones:** Reading from Wikipedia, **“General Hamid Gul, served as director general of Pakistan’s Inter Service Intelligence, ISI, during ‘87-‘89, mainly in the time when Benazir Bhutto was Prime Minister of Pakistan. He was instrumental in the anti-Soviet support of the mujahideen in the Afghan War, ‘79 to ‘89, a pivotal time during the Cold War, and the estab — “** and it goes on. And we have him on line with us. We of course yesterday played the CNN, uh, TV interview that he did. This is *live*, and is not edited. Going back to him in Pakistan we’ve tried three different lines, this is the best one we have, we apologize our audio is not very loud to him, not very audible, and his back to us is very, very broken up. But we nevertheless have him joining us, we’re very thankful. **Uh, sir, continuing, on the CNN program, at least what they edited you to say, you talked about 9/11, the evidence being that nine eleven was an inside job, and the attacks in Bombay, now Mumbai, of a few weeks ago, that the evidence was, it was an inside job. Can you go over the evidence that you believe that these were False Flag events, sir, and why these False Flag events are being staged.**

**Hamid Gul:** Are you talking about 9/11?

**Alex Jones:** Yes, sir.

**Hamid Gul:** Well, I have my own reasons, you know, Rod Nordland was the CNN reporter here, I think he was based in Islamabad at that time, and he came to me immediately after 9/11, and his version that, uh, that I put out, it was given to the *Newsweek*, and unfortunately it was blocked, but it appeared on the internet, on the website of the *Newsweek*. And you can see it, I think it is dated 16<sup>th</sup> or 17<sup>th</sup> of September, 2001. *[Note: the article is Prejudice In Pakistan: Why Is Islamabad Reluctant To Pressure Neighboring Afghanistan Into Turning Over Osama Bin Laden?, by Rod Nordland, dated 9/14/2001].*

And in that I had said the same thing, and I still maintain that that’s my position. I have [“seven”??] reasons for it:

- A. **That 9/11 took place on the American soil, not a single person has been caught *inside* America, even though for doing such a job I think a huge amount of logistic support is required in the area where such operation is carried out.**
- B. Secondly, the air traffic control, when they saw the four aircraft were changing direction — going from east coast to west coast where they were headed, they started traveling in different directions. And it is quite amazing that for a very long period of time the air traffic control did not report this, nor did the US Air Force act in time. If., one were to calculate from the first flight, when it took off from Logan, till the first aircraft, and the solitary aircraft that took off was an F16 that took off from Langley, which is CIA headquarters, instead of one of the operational bases. So many of them are available in that area. **And then a single aircraft never takes off, because we have been told that whenever the aircraft scramble they scramble in twos. And the time that it took was *enormous*. It took a hundred and twelve [112] minutes!** A hundred twelve minutes is a very long time in which to react. Was the US Air Force sleeping? And if it was sleeping, which heads will roll?
- C. Second [NB: *his third point*] it was a huge intelligence failure, and no heads have been rolled, nobody has been taken to task, not a single person has resigned for this.
- D. Thirdly, the air traffic control should have been rehashed, they should have been turned inside out, but nothing of the sort happened.
- E. And finally, how come this is a coincidence that all transponders did not work, and it is not possible — and the direction is changed and it is not noticed?
- F. **Secondly, the US Air Force has the ability, because in the past whenever a plane has been hijacked, the record is that within seven minutes the US aircraft has been on the wing of the hijacked aircraft. In this case it — uh, it did not happen.** The US alert system is so high, and it is so sophisticated, that if a missile were to take off from Moscow, and were to head toward New York, it takes about eighty minutes. And the US Air Force, and the missile systems, is supposed to intercept it within nine minutes — that means only Atlantic: around the Pacific it must stop that missile from coming in. The system is in place, but it didn't work, and nobody tried to question this.
- G. **Lastly, no inquiry has so far been held formally into the incident, and the whole world has been turned upside down, so many people have been killed, the American economy is going into a meltdown, and everything is gone wrong with the world, and yet no formal inquiry has been ordered by the US government.** So I really don't know. There are so many questions which hang in the balance.
- H. And then to top it all, they say that [Obama Hamodu??(Hani Hanjour)] took the training by light aircraft in the army for six months, he could have maneuvered a jumbo 745 — uh, 757 from a height where it was traveling — that height was 9,000, and it came within seconds to a height of 1000, and then went straight into its target. Now this is not possible for a person who has been trained on a light aircraft to be able to do this.

Alex Jones: Yes, sir.

Hamid Gul: And there is no mention of the second aircraft, and so there are a number of things which remain unanswered.

Alex Jones: Yes, sir.

Hamid Gul: Whenever the journalists come, and visit me here, and I ask them these questions, that “why haven't you taken the answers about this?”, and they say that “Patriotic Act comes in the way”, and we are not supposed to ask that question”.

Alex Jones: General — we are talking to General Hamid Gul, the former head of Pakistani ISI, during the key period of fighting the Russians, he was also, before he was the head of ISI, one of the chiefs according to our media, running operations against the Russians. And of course working with the United States closely, as well as the Saudi Arabians, and the British. Y'know, if that's incorrect, correct me. Uh, General Gul, what are the motives? **We have the PNAC, with Dick Cheney saying we need a Pearl Harbor event, we have 44,000 US troops massing in Tajikistan and Uzbekistan in the days before 9/11, we have Bush on September 10, *Newsweek* reported ordering the launch of attacks the next week, we have, of course, the buildings being blown up with explosives, and all of the witnesses to that, now the government admits that Building 7 did fall in freefall, was not hit by a plane** — specifically, sir, *motives*. Why would the Military Industrial Complex controlling the United States, why would they stage a 9/11 attack?

Hamid Gul: **They had to keep the Chinese off from getting into the Middle East, they had to lay their hands on the energy tap of the world, which presently lies in the Middle East, but in future it will be in Central Asia, and so Afghanistan is the gateway to Central Asia, and finally to suppress *any* resistance, particularly which could threaten the state of Israel. Now that is where they, instead of pursuing the American objectives, they started pursuing the Israeli objectives, and that is where they went wrong.** You have to pick out a single aim, that is the first principle of war, and I don't know why the generals and the politicians of America, they could be so naïve and so ignorant, that they started mixing aims, and they went into this war, without a buildup, without particular preparation, and without the American support behind them. Because if they had gone to war, and asked for the support of

the American people, they would never given them their support. So they had to create a pretext, and this was the pretext that they created.

**Alex Jones:** Well, General —

**Hamid Gul:** And for that it will have to disengage externally.

**Alex Jones:** General — as you know, in the last three months, before Obama was even elected, he said Pakistan and Afghanistan would be his main focus. **The strikes inside Pakistan — it's clear that his change means what Zbigniew Brzezinski wants, *shifting* — uh, what the RAND Corporation has said they want, shifting the war out of the Middle East into Central Asia. So I believe the change is gonna be these provocations. Look at the NeoCons, with Israeli and NATO-backed forces launching the sneak attack on the Russian held South Ossetia on 8/8/8. So it appears they are trying to launch a major — uh, larger than a theater war, as the RAND Corporation said a month ago, they want a major new war.**

**Hamid Gul:** Yes, indeed you're right, because this is an old theory, [weet ul josaperry??] theory, first put out by MacKinder and then by Mahan, who was an admiral in the US Navy, that this is the rimland, you've got to first control the rimland in Asia before you can strike in the heartland of Asia. So this heartland/rimland thing, I think it tricked into the story —

**Alex Jones:** So that's why they need proxies like India to destabilize the region for the encirclement of Russia, and of course China, blocking those pipelines. Now, sir, in the time we've got left, you worked with the United States and Saudi Arabia, with Israel, or at least Pakistan did, fighting the Russian invasion. Uh, of course, if these reports are incorrect, correct me, but you were one of the main commanders helping the mujahideen. You were the head of Pakistani intelligence right at the time you had the victory against the Russians. **It is reported here that al-Qaeda was founded by the new Secretary of Defense Gates and Zbigniew Brzezinski, uh, or, or that they were the Wahabist fighting corps, and that they are now being used to try to bring down the Pakistani government and to try to stage attacks inside India. So can you speak with your particular expertise to that, and then, also the fact that they are now trying to list *you* as a terrorist, and then thirdly, did you ever meet Osama bin Laden? Is Osama bin Laden dead many years ago of kidney failure, as Benazir Bhutto said?**

**Hamid Gul:** Well, uh, I was actually in charge of operations against the Soviet occupation of Afghanistan, and the Americans were providing the logistic support, and the Saudis were sharing one half of the budget for this war. And it was a cheap war because in all — there was uh ten years that we were fighting the Russians, we spent not more than five billion dollars out of the American exchequers. So it was a very cheap war for the Americans to have defeated the Russians and rid the whole of the West of this Red Menace that they used to call. **So, at that time, Osama bin Laden and his, uh colleagues, they were admired and romanticised by the CIA operators. I had never met him then. I had nothing to do with him, because I was only busy training the Afghans. We had to win a war, we had a task on our hands, it was a very big task, and we were so occupied with the training only the Afghans. No other nation was trained by the ISI. I can vouch on that. Not a single person, not even a Pakistani was trained by them. Osama bin Laden was — you know, I — had never met him, but to the — these people used to come and talk glowingly about him. I met Osama bin Laden after my retirement from the army, in 1993 December in Khartoum, and then again in year, uh, 1994 November when I was went — I was there invited by a Hassan bin-Turabi to an international conference, and during that conference, Osama invited us to a banquet.** And it was all in an open place, and, uh, where there were many other people present. I, uh, he struck me as a pretty normal human being, not the bloodthirsty animal that he is being presented by the CIA now. At that time no conversation between him and me took place. I don't know whether he's living or dead. But so far Ayman — Ayman al-Zawahiri has been given — eh, representing him in various interviews of Osama that have been put out. So one doesn't really know. But the last interview, which was a voice interview, in that the CIA and the other US intelligence agencies authenticated that it was Osama's voice. So one doesn't really know whether he is living or dead.

**Alex Jones:** Well, sir —

**Hamid Gul:** **But even if he is not living, he is a symbol. Al-Qaeda is a franchise. Whoever created that, and for whatever reason they created, I think it wasn't there until 1996 when he was lodged in Khartoum. Later on he was —**

**Alex Jones:** General —

**Hamid Gul:** — invited by [later Afghan President] Burhanuddin Rabbani, who is now part of the Northern Alliance in Kabul, and he came over and he set up his headquarters in a place called Tora Bora near Jalalabad. But, uhhh, that's where one started hearing of al-Qaeda and the activities

**Alex Jones:** Yes.

**Hamid Gul:** Of Osama bin-Laden.

**Alex Jones:** General, I need to — in the time left here because we've only got a few minutes left with you here — uh, maybe five minutes and then we're going to break and I don't want to keep you any longer — we can perhaps have you back in the future. **Specifically, though, we know his CIA control name was Tim Osman, we know he was the bagman for a lot of the Saudi money and the Israeli money going in, I know that was compartmentalized and separate from Pakistani intelligence, from what I've read**

from different perspectives and US intelligence. So — so I believe you. My whole point here is — is that al-Qaeda — al-CIAda didn't carry out the attacks of 9/11 as you yourself have said. His first interview said that he didn't do it. Then they produced these computer-morphed videos and fake audios that have been checked. And the Intel Center, headed up by Rumsfeld's former lieutenant, the private group was caught putting the same video layer in with the original video. So it's been proven that they're creating these fake videos.

**Hamid Gul:** There is no doubt about it, that this video which was put out in November by George Bush and — and said this was Osama bin-Laden and was high cheekboned like the mongoloid features, he wasn't as tall as Osama bin-Laden was. And one could clearly make out that this was doctored, and had been created on purpose to justify the attack on Afghanistan. I think there are many things which are going wrong are being done on the behest of the government by the CIA which are not correct. The CIA used to be good when they were working with us. But I don't know what happened thereafter. I think it was overarching ambition.

**Alex Jones: General:** as you know, in the time we have left, they have over four hundred nukes, they have total dominance, no one could attack them with nukes, they have the anti-missile defense systems. I believe it's a red herring that they want to start World War III, uh, for their "safety". It's World War III that will *destroy* Israel.

**Hamid Gul:** Yes, indeed, and I think this 2006 September experience, I think, if it is any indicator for them, when they —

**Alex Jones:** Hezbollah —

**Hamid Gul:** — went into southern Lebanon and they got such a buffeting at the hands of — of Hezbollah, I think they'll not do something like that, because it would mean annihilation of Israel. And in any case Palestinian question is a very thorny question, and I do not know why the US administration is not addressing it differently —

**Alex Jones:** All right General, we're almost out of time, two final questions, and I'm gonna let you go, and you can — any websites, any books, any materials you'd like to point people at to see your side of the story, we'd love to see it. Two questions, let me give 'em both to you and then answer them, please: #1 — **why are they trying to, now, list you as a terrorist, (A), when they admittedly worked with you (B) why do they always betray people like Saddam who they worked with and set up. So (A) why are they trying to set you up, and (B) do you see the West staging more terror?**

**Hamid Gul:** Yes, of — I think they are simply afraid of me because I worked with them, I understand them, I can measure them up and I talk loudly about it, I mak — mince no words, I pil — pull no punches, and they are afraid that I preempt whatever scheming they do. And I am — loud-voiced, there is no doubt about it. **And I speak the truth, they are trying to frame me, there is no truth in it. If they had anything about me when I applied for a renewal of my VISA to America why did they not give it to me? Because if they have something, they are looking around for terrorists, while this terrorist wants to come over and visit America, nab me, interrogate me, take me to bar, take me to court, do whatever you like.** It only shows that they have a *mala fide*. As far as Saddam is concerned, it is a habit, it is a very bad habit. They cultivate friends who become, like Pervez Musharraf, dictators, and then they make use of them, and then they turn upon them and then infect [?] the nation because of their policies. And, what was the last part of your question?

**Alex Jones:** Ge — hold on, General — uh, General, hold on one moment because we've only got a few minutes left. John, skip this network break. For stations: I'm skipping, 'cause I'm gonna let him go in three minutes. I don't want to hold him any longer, but I'm skipping this break, because this is too newsworthy. Yes sir, I'd like you to answer that question, uh, about what do you think, knowing them, working with the globalists, the New World Order, in the past, when it was still America, before we were totally dominated, what do you think their next moves are probably — uh, most probable, (A). And then, finally, the attacks against the government in Pakistan, uh, using Muslim fronts. Does that appear to be the West trying to destabilize your government? They keep trying to kill the government, they killed Bhutto, they keep bombing government buildings, they keep bombing hotels, it appears the West is using false mujahideen to try to overthrow Pakistan.

**Hamid Gul:** No, Benazir was not killed by any of the terrorists. She was removed by the Americans, because she had violated her agreement, because they wanted to keep Pervez Musharraf there, and he slapped another [mustel??] on Pakistan. So she had become rebellious, and such a person, who is a popular leader of a third world country, the head of the largest political party, a woman whom they could not attack as fundamentalist because she was so westernized, therefore it was very important for them to remove her, because they have a mischievous plan which they want to put through. So, they have installed instead Mr. Zardari, whom they can blackmail very easily, but they have allowed him to keep the powers of a dictator. **And in fact he's the one who's calling all the shots in Pakistan, so as Pakistan is already completely destabilized politically. Our po — um, uh be — judicial institution simply does not exist, because the judicial crisis recently dethroned Chief Justice of Pakistan —**

**Alex Jones:** Yes — *who is staging the terror attacks*, because they're clearly aimed at the government, or is that the government staging them as a pretext to crack down —

**Hamid Gul:** No, no, no — this is because it — [Lombostit??] was attacked, and I think that George Bush addressed his nation on radio immediately after that, said "this was part of our plan in War Against Terrorism", because Pakistan army and Inter Services Intelligence were not *fully* cooperating, and because they did not consider it was their war, therefore they created this

**situation, where the terrorists out of sheer revenge — this is called Pakhtunwali.** This is a tradition which has nothing to do with Islam. It is the Afghans holding to this tradition long before they became Muslim, and they are still carrying it on. When you take action against an Afghan, kill his daughter or his wife or his sister, he will take revenge no doubt what happens. He does not behave like a Muslim, or any other entity. So this was a thing which was created. **And of course Pakistan is now in a very difficult position. We only have a military which can control the institutions. And we have an ISI, but the Americans are almost every day attacking the ISI and attacking the military, saying this is not under the control of the political parties.**

Alex Jones: Sir —

Hamid Gul: Political powers.

Alex Jones: Sir — General —

Hamid Gul: But what is political power, when Parliament is *sinecure*? It does not work, it has no authority at all.

Alex Jones: General, going back to 9/11, Pakistani papers, BBC reported, New York Times reported, \$100,000 was reportedly wired by Gen. Mahmood Ahmed, the head of Pakistani intelligence to the lead hijacker, who we know was a US government decoy, trained at US bases, that's *Newsweek*, *AP*, *Reuters*. General Mahmood Ahmed, do you believe he was really controlled by the CIA, did he wire \$100,000 to Mohammed Atta?

Hamid Gul: Not at all. Mahmood is a friend of mine. I met him very recently in Lahore, and he categorically denies this. I think this is all disinformation, which has been adopted as a very sophisticated intelligence art.

Alex Jones: So, just to be clear, we're gonna let you go, we're very thankful and respectful of your time, uh, you believe that the bombings and shootings and terror attacks that we've seen in the last few months in Pakistan are because the Predator drones and helicopters are killing weddings — you always notice it's a wedding — that's meant to stir up the people there, because it kills whole families, it's a huge insult, and then of course they blow up NATO cars, of course they then attack the government. Is that what you're saying?

Hamid Gul: It is retaliatory, and they will retaliate. I can tell you that Afghanistan nation is a fact that over 5,000 years, nobody has won against them, and I think that Americans cannot win, unless American intention is to stir up a Third World War at this point I think there's no point in staying in Afghanistan. You should negotiate with the opposition. This is a national resistance now. It is no longer Taleban. Specific, it is the Afghan nation. I approve of their position. They are resisting ferociously.

Alex Jones: General, how long can the Mayor of Kabul stay in power, and isn't this really just about the West controlling the opium?

Hamid Gul: Well, he's the puppet of Kabul, and he will not stay very long. I can assure you that, eh, he's already started showing signs of nervousness. He wants to reach out to the Taleban, but Taleban won't — eh, even throw a crumb at him. I can assure you the Taleban, or, any other resistance fighters, they will have nothing to do with —

Alex Jones: Well, Reuters is reporting, as you know, every major city is now encircled, and only a few cities are controlled by the US force.

Hamid Gul: I — I have no idea, but I think the Right is started coming out, like Robert Kagan's article in the Washington Post on December 2<sup>nd</sup>, it, eh, echoes what is the *[CFR]* World At Risk Report. Uh, it is similar. They are focusing on Pakistan, because Pakistan's nuclear capability is undigestible by State of Israel, and by India, therefore there is —

Alex Jones: All right —

Hamid Gul: every possibility that Pakistan becomes a target.

Alex Jones: In closing — in closing, and this is it, and we appreciate all your time — this hour's over, two minutes, sir, I know you can't predict the future, but do you see them staging a nuke attack? Do you see them staging more terror attacks? Do you see India sneak attacking? Uh, do you see a more radical government coming in after the staged events? What do you see happening, bad case scenario?

Hamid Gul: No, Indians are not so stupid. I think they are seeing thru the game, and these far Leftist parties, that is the Left Front, they are called, the Communist party of India, are very strong. India is slowly turning t'the world of its own problems. The Shine India, Shining India, Feel-good India, this is all make believe. I can tell you that this is a propaganda hype. I can tell you that India is in a miserable state. Their economy is dwindling. And four hundred millions are living on less than one dollar a day. And this is beginning to have an effect because last year alone 108,000 farmers in India committed suicide. And

**this will not go on. Out of 608 districts in India, 231 are already in turmoil, and mostly under the control of Maoists and the Bhakti-lite.**

**Alex Jones:** So they are collapsing?

**Hamid Gul:** Yes. So India itself has lots of problems of their own (Prison Planet, 2008).

**Title/Headline:** *Efforts On To Cut-Off ISI- Terror Group Link By US: Boucher*

**Abstract:** The Inter Services Intelligence (ISI) of Pakistan has links with the terrorist outfits based in the country, and the US is making an allout effort to ensure that these links are cut-off completely, US Assistant Secretary of State for South and Central Asia Richard Boucher has said. Severing the link of the Inter Services Intelligence (ISI) from Pakistan-based terrorist groups is a work in progress and the United States will make sure that it is done effectively, **The Daily Times quoted Boucher, as saying. Boucher said that it is evident that the terror groups involved in the 26/11 Mumbai attack were operating from the Pakistani soil, and his country wanted to eliminate this menace** (Thaindian News, 2009).

**Title/Headline:** *Gunmen Shoot Sri Lanka Cricketers*

**Abstract:** Gunmen have attacked a bus carrying the Sri Lankan cricket team on its way to play in the Pakistani city of Lahore. At least six policemen escorting the team bus were killed, along with a driver, and seven cricketers and an assistant coach were injured. Pakistani officials said about 12 gunmen were involved and grenades and rocket launchers have been recovered. Officials said the incident bore similarities to deadly attacks in Mumbai in India. **The Mumbai attacks were blamed on Pakistan-based Islamic militants.** Pakistani cricket was already suffering from serious security concerns. The Pakistani politician Imran Khan, a former captain of the country's cricket team, said the Sri Lankan visitors had been given inadequate protection. **"This was one of the worst security failures in Pakistan,"** he said. "The Pakistan government guaranteed the Sri Lankan cricket team that they would provide them security." **None of the attackers was killed or apprehended at the scene.** Grenades and rocket launchers were found there, police said, and a manhunt is under way. But a Pakistani minister, Sardar Nabil Ahmed Gabol, reportedly told privately owned Geo TV **that evidence suggested the attackers came across the border from India.** He said the assault came in reaction to the Mumbai attacks, and was a **"declaration of open war on Pakistan by India"** (BBC, 2009).

**Title/Headline:** *Pakistan Facing 'Mortal Threat'*

**Abstract:** Mr Miliband told the BBC that politicians must unite to face a "very grave situation" that was worsening. He was speaking as Pakistan continued to probe this week's attack on the Sri Lankan cricket team in Lahore. Pakistani police have released sketches of four of some 14 gunmen suspected of involvement in the ambush that left six policemen and a driver dead. Mr Miliband told BBC Radio's Today programme that **Pakistan's internal instability was "a grave situation and... it has got worse".** He pointed to the fallout between President Asif Ali Zardari and former PM Nawaz Sharif, who was last week banned from elected office by the Supreme Court. Mr Miliband urged politicians to unite, saying: **"I think that the degree of political disunity that exists at the moment is only contributing to the problem."** He added that country's economic decline in the global credit crunch was also a major factor. Mr Miliband said it was not known who carried out the Lahore attack but he said that **the Lashkar-e-Taiba militant group had "deep roots in the Punjab".** He urged the central and local governments to take action against groups he described as **"front organisations" for Lashkar-e-Taiba.** Police in Pakistan are still working on an interim report into the Lahore attack. Police chief of Punjab province, Khaled Farooq, told AFP news agency "a little more time is required to complete the investigation" but that it would be finished in the next 24 hours. Provincial governor **Salman Taseer said on Thursday that "we have identified the people who did the operation".** There has been much speculation in the media since, with some reports pointing the finger at Lashkar-e-Taiba and others at al-Qaeda and the Taliban. **Dozens of people have been held for questioning.** A spokesman for Lashkar-e-Taiba, Abdullah Ghaznavi, told AFP the reports of his group's involvement were **"false, incorrect and baseless".** Pakistan's interior ministry chief Rehman Malik increased speculation by saying he could **"not rule out [the involvement of a] foreign hand in the incident".** The head of Interpol, Ronald Noble, has arrived in Islamabad but his talks with Mr Malik were scheduled to be about November's Mumbai attacks. Indian Foreign Minister Pranab Mukherjee on Friday said the Lahore attack showed **"the [Pakistan] government's lack of will or capability in tackling this menace".** **The Pakistani government has come under fire for the security it provided for the Sri Lankan team. Umpires travelling in a bus behind the cricketers have said they were left unguarded. English match referee Chris Broad said they were "sitting ducks".** Two in the bus were Australian and Prime Minister Kevin Rudd said on Friday: "I am sufficiently concerned about what has been said by the Australians that we need an explanation, and we intend to get one." Pakistan's cricket circles have reacted angrily to the security complaints. Pakistan Cricket Board chairman Ijaz Butt accused Mr Broad of "fabrication". On Friday, former cricket star Javed Miandad said the International Cricket Council should ban Mr Broad for life. The Commissioner of Lahore, Khusró Pervéz, has also defended the police response to the attack. But he did admit that there were **"certain security lapses which are very vivid and very clear".** **"The gunmen were meant to be combated by backup police support, which didn't arrive,"** he said, **"and the vehicles used for escorting the Sri Lankan convoy were not adequate."** The attacks are expected to have massive ramifications for the cricket world, with the ICC

considering whether Pakistan can co-host World Cup matches in 2011 (BBC, 2009).

**Title/Headline:** *4 Arrested in New York Terror Plot*

**Abstract:** Federal and New York City authorities arrested four men on charges of plotting to bomb two synagogues in the Riverdale section of the Bronx and to use antiaircraft missiles to shoot down planes at a military base in Newburgh, N.Y., 60 miles north of New York City. The charges, which include conspiracy to use weapons of mass destruction in the United States and conspiracy to acquire and use antiaircraft missiles, represent some of the most significant allegations of domestic terrorism in some time. **The four defendants — whom federal authorities identified as James Cromitie, David Williams, Onta Williams and Laguerre Payen, all of Newburgh, in Orange County — are to appear in Federal District Court in White Plains, in Westchester County, on Thursday morning.** Three of the suspects are American citizens, and one suspect is of Haitian descent, according to the office of Gov. David A. Paterson. Mr. Cromitie, who is described as the lead defendant, is said to have told an F.B.I. informer that he had ties with Jaish-e-Muhammad, a jihadist group based in Pakistan. **None of the defendants actually obtained weapons of mass destruction, according to the authorities. The men were, however, given an antiaircraft missile system that was incapable of being fired, as well as homemade bombs containing inert plastic explosives, as part of the undercover investigation, the authorities said (Chan, 2009).**

**Title/Headline:** *Pakistan: Terrorist Attack Kills Six Soldiers In Rawalpindi*

**Abstract:** Six soldiers died when gunmen wearing army uniforms attacked Pakistan's army headquarters on Saturday, as tensions rose ahead of an expected army offensive against a Taliban stronghold. Four of the attackers were confirmed killed but two more who were holed up inside the heavily fortified complex were still fighting seven hours later, as helicopters with snipers on board prowled the skies of Rawalpindi hunting for attackers who may have escaped. **The daring assault, a few miles from the capital, was the third significant terrorist attack in Pakistan this a week. It seemed intended to show that the Taliban can still strike at the very heart of Pakistan's security apparatus despite recent military operations against their forces and the killing of Taliban leader Baitullah Mehsud in a drone attack in August.** The attackers may have been trying to kill army chief General Ashfaq Parvez Kayani, who was inside the complex on Saturday, although it was not clear whether he was there during the attack. Military statements said he attended meetings there and at the president's office in nearby Islamabad during the day. **The attack began shortly before noon when the gunmen, dressed in camouflage military uniforms and wielding assault rifles and grenades, drove in a white van up to the army compound and tried to force their way inside, army spokesman Major General Athar Abbas said. The assailants shot at the guards at one checkpoint, killing some of them, and then jumped out of the van and ran toward a second checkpoint, he said. Abbas said the guards were probably confused by the attackers' uniforms.** The heavily armed attackers then took up positions throughout the area, hurling grenades and firing sporadically at security forces. **After a 45-minute gunfight, four of the attackers were killed, said Maj Gen Abbas. But more than an hour later, gunshots again rang out from the compound.** Mr Abbas confirmed that two more gunmen had eluded security forces and slipped into the headquarters compound in Rawalpindi. The city is filled with security checkpoints and police roadblocks. On Saturday evening, Abbas said the two men remained holed up in a room and were surrounded. **"We are trying to finish it at earliest, clear the area of terrorists and restore complete control," he told Dunya TV.** Abbas said six troops were killed and five wounded, one critically. Those killed including a brigadier and a lieutenant colonel, according to a military official, who spoke on condition of anonymity because he was not authorized to speak to the media. Pakistani media said the Taliban claimed responsibility for the attack, and Rehman Malik, the interior minister, said the ongoing assaults strengthened the government's resolve to launch the offensive. "We have been left no other option except to go ahead to face them," he told Dawn television (Telegraph, 2009).

**Title/Headline:** *Five American Muslims Arrested In Pakistan On Suspicion Of 'Jihad'*

**Abstract:** Five American Muslims were arrested in Pakistan on suspicion of ‘Jihad.’ The United States was confronting the renewed specter of violent Islamic extremism among its own citizens last night after the arrest of **five young American Muslims in Pakistan on**

suspicion of trying to join militant groups in its lawless tribal areas. "We watched them for one and a half days and then arrested them," Usman Anwar, the chief of police in Sargodha, told reporters. "We seized laptops and other things from their possession. Later we came to know that they have come here with the intention of jihad." A senior security official told *The Times* that interrogation of the suspects and **information on their computers showed that they had contacts with local Al Qaeda operatives.** He said they had met representatives of Jamat-ud-Dawa, a banned militant group, and of JeM, **which has links to Al Qaeda and is blamed for the murder in 2002 of Daniel Pearl,** a *Wall Street Journal* reporter. "They were asking to be recruited, trained and sent on jihad," he said. The case is the latest in a series this year that has raised fears that American Muslim citizens and residents are being radicalized and recruited by militant groups on US soil and could be used to strike targets there. **"Home-based terrorism is here," declared Janet Napolitano, the US Secretary of Homeland Security.** The five men's arrest coincided with the first appearance in a Chicago court of David Headley, **an American citizen of Pakistani origin accused of plotting terrorist attacks in Denmark and India.** It came just a month after Nidal Hasan, a major in the US Army of Palestinian origin with links to an extremist Muslim cleric, shot dead 13 comrades at Fort Hood military base in Texas. **In 2009, US authorities charged a group of men with helping to recruit at least 20 young American Somalis to go back to Somalia to fight with the al-Shabaab militant group.** That followed the arrest in September of Najibullah Zazi, an Afghan citizen with US residency, on suspicion of plotting to **attack the New York subway and receiving training from Al Qaeda in Pakistan** (Page & Hussain, 2009).

**Title/Headline:** *Video Links Pakistan Taliban To Deadly CIA Bombing*

**Abstract:** A Jordanian suicide bomber killed seven CIA employees in the worst attack in U.S. intelligence agency's history. In a video released a few days later, the **suspect sits cross-legged on the floor next to the new chief of the Pakistani Taliban,** confirming the group was behind the brazen attack in eastern Afghanistan. The suicide attack inside the CIA base — which the bomber said was meant to **avenge the death of the former Pakistani Taliban leader in a CIA missile strike** — could prompt the U.S. to further pressure the government of Pakistan to crack down on militants who operate on both sides of the Afghan-Pakistani border. U.S. missile strikes against targets on the Pakistan side already are on the rise. Seven CIA employees and a Jordanian intelligence officer were killed Dec. 30 when the suicide bomber detonated his cache of explosives at Camp Chapman, a tightly secured CIA base in Khost province, a dangerous region southeast of the Afghan capital Kabul. **The CIA had cultivated the bomber** — a Jordanian doctor identified as Humam Khalil Abu-Mulal al-Balawi — in hopes of obtaining information about Al Qaeda's second in command, Ayman al-Zawahri. Al-Balawi turned out to be a double-agent — perhaps even a triple-agent. In the 1 1/2 minute video, the bomber said **he attacked the CIA to avenge the death of Baitullah Mehsud, the longtime leader of the Pakistani Taliban** who was killed in August. "This jihadi attack will be the first revenge operation against the Americans and their drone teams outside the Pakistan border," the bomber said on the video. Al-Balawi — wearing an Afghan hat and camouflaged jacket — said the Pakistani Taliban, now under the leadership of its new chief Hakimullah Mehsud, would fight till victory. "We will never forget the blood of our emir Baitullah Mehsud," said al-Balawi. **"We will always demand revenge for him inside America and outside."** A senior militant with the Pakistani Taliban told AP the suicide bomber received training from Qari Hussain, a leading commander of the Pakistani Taliban believed to have run suicide bombing camps. The militant, who spoke on condition of anonymity because of security reasons, said **Al Qaeda and the Haqqani network, a highly independent Afghan Taliban faction, also were involved.** Hussain's Lashkar-e-Janghvi group, a violent anti-Shiite Muslim organization, is believed to provide a reservoir of suicide bombers and has **been linked to some of the more spectacular bombings in Pakistan and the death of former Pakistani Prime Minister Benazir Bhutto.** Arsala Rahmani — a former minister in the Taliban government that was toppled in the U.S.-led invasion of Afghanistan following the September 11<sup>th</sup> terrorist attacks — said the Pakistani and Afghan Taliban and Al Qaeda often work in unison against Western forces. **"Most of the time, the Afghan Taliban, Pakistani Taliban and Al Qaeda ... they are fighting together,"** said Rahmani. The release of the al-Balawi footage gives the U.S. proof that Pakistani elements are involved in attacks on its security apparatus in Afghanistan, observers said (Reichmann, 2010).

**Title/Headline:** *Pakistan Officials: U.S. Kills Militant on FBI Most-Wanted List*

**Abstract:** U.S. missile strike in Pakistan killed one of the FBI's most-wanted terrorists, a man suspected in a deadly 1986 plane hijacking with a \$5 million bounty on his head. The intelligence officials said a January 9<sup>th</sup> missile strike in **the Pakistan's North Waziristan tribal region killed Jamal Saeed Abdul Rahim.** The FBI's Web site lists him as a Palestinian with possible Lebanese citizenship. **The Pakistani officials called him an Al Qaeda member, but the FBI site says he was a member of the Abu Nidal Palestinian terrorist group and is wanted for his alleged role in the Sept. 5, 1986, hijacking of Pan American World Airways Flight 73** during a stop in the southern Pakistani city of Karachi. According to the FBI, the hijackers **demand that 1,500 prisoners in Cyprus and Israel be released and that they be flown out of Pakistan.** At one point, the hijackers shot and threw hand grenades at passengers and crew in one part of the plane. Some 20 people, including two Americans, died during the hijacking. **Rahim had been tried and convicted**

by Pakistan, but he and three suspected accomplices were apparently released in January 2008. Pakistani government officials criticize the missile strikes and say the United States is violating their country's sovereignty, but there is little doubt Islamabad agrees to at least some of the attacks and provides targeting information for them (Fox News, 2010).

**Title/Headline:** *India Faces Threat Of Another 26/11, Likely To Act Militarily: US Think Tank*

**Abstract:** The threat of another Mumbai-type attack is undeniable; numerous Pakistan-based groups remain motivated and able to strike Indian targets," said Daniel Markey of the prestigious Council on Foreign Relations (CFR) in his latest paper 'Terrorism and Indo-Pakistani Escalation.' Many of these Pakistan-based terror groups have incentives to act as spoilers, whether to disrupt efforts to improve Indo-Pak ties or to distract Islamabad from counter-terror crackdown at home, said Markey, a known South Asia expert. "Thus the immediate risk of terrorism may actually increase if New Delhi and Islamabad make progress on resolving their differences or if Pakistan-based terrorists are effectively backed into a corner," he said in his 11-page contingency planning memorandum of the CFR. While traditionally Pakistan-based Lashkar-e-Taiba and Jaish-e-Mohammed are the two terror groups that have proven themselves the most capable and motivated to carry out attacks in India, this time Al Qaeda could don the mantle, he said. "Al Qaeda has historically focused its efforts outside India, but if the group's leadership feels threatened in the Pakistan/Afghanistan border areas, it might direct and assist regional proxies to attack India as a way to ignite a distracting Indo-Pakistani confrontation." He said the more clearly a terrorist attack can be identified as having originated in Pakistan, the more likely India is to retaliate militarily. Should multiple attacks occur in quick succession, the cumulative effect would further diminish India's inclination for restraint, he said. Markey said the more egregious the terrorist attack and the more India's leadership is convinced that members of the Pakistani state sponsored it, the more it will be treated as an act of war. "Under these conditions, New Delhi would consider a wider range of options, including, for instance, a large ground-force mobilization of the sort India conducted in 2001-2002 in the wake of the terrorist attack on the Indian parliament or a naval blockade." "Unless the initial terrorist attack is nuclear -- which is implausible for now because Pakistani terrorists do not appear to have access to nuclear materials or the capacity to utilize them -- India would refrain from using its nuclear weapons in retaliation," Markey said (The Times of India, 2010).

**Title/Headline:** *Gates In Pakistan To Discuss New Strikes On Taliban*

**Abstract:** Gates said yesterday in New Delhi that Islamists working under "the umbrella of al-Qaeda" want to destabilize the entire South Asian region by provoking a conflict between India and Pakistan. That law requires a cutoff of aid if Pakistan fails to provide civilian control of its military, cooperate with the U.S. on counter-terrorism, protect its nuclear arsenal and enforce international nuclear non-proliferation rules. Those conditions triggered accusations from opposition politicians and Pakistan's military of interference in the country's internal affairs. Such conditions on U.S. aid evoke bitter memories in Pakistan of the 1990s, when the so-called Pressler amendment forced a halt to most U.S. aid because of evidence that Pakistan was developing nuclear weapons. The cutoff in U.S. military aid hampered American efforts to influence Pakistan's powerful armed forces, and led many Pakistani leaders to call the U.S. an unreliable ally. Al-Qaeda leaders are believed to have holed up in ungoverned tribal areas along the Pakistan-Afghanistan border since the U.S. toppled the group's Taliban protectors in the wake of the Sept. 11 attacks. Obama last year ordered 30,000 more U.S. troops to Afghanistan to battle the Taliban insurgency. The U.S. is trying to balance its rapidly expanding ties with India, the world's largest democracy and the fastest-growing economy after China, even as the Obama administration strengthens links with Pakistan (Geinger, 2010).

**Title/Headline:** *Pakistani Army: No New Offensive For 6-12 Months*

**Abstract:** The Pakistani army said Thursday during a visit by U.S. Defense Secretary Robert Gates that it can't launch any new offensives against militants for six months to a year to give it time to stabilize existing gains. The announcement likely comes as a disappointment to the U.S., which has pushed Pakistan to expand its military operations to target militants staging cross-border attacks against coalition troops in Afghanistan. Washington believes such action is critical to success in Afghanistan as it prepares to send an additional 30,000 troops to the country this year. But the comments by army spokesman Gen. Athar Abbas clearly indicate Pakistan will not be pressured in the near-term to expand its fight beyond militants waging war against the Pakistani state. Whether it can be convinced in the long-term is still an open question. "We are not talking years," Abbas told reporters traveling with Gates. "Six months to a year" would be needed before Pakistan could stabilize existing gains and expand any operations, he said. The Pakistani army launched a major ground offensive against the Pakistani Taliban's main stronghold near the Afghan border in mid-October, triggering a wave of retaliatory violence across the country that has killed more than 600 people. Gates said Thursday that he wouldn't directly press Pakistan to expand its military campaign but would instead ask his hosts what their plans are. He also said his talks with Pakistan's military and civilian leaders were intended to explain the U.S. war strategy in Afghanistan. The defense secretary told reporters traveling with him to Islamabad from India that he would reassure Pakistan that the United States is "in this for the long haul." But President Barack Obama's comments in December that the U.S. would begin to withdraw its forces from Afghanistan in mid-2011 have raised questions among many Pakistani officials about Washington's commitment. Analysts say such concerns only reinforce the Pakistani government's reluctance to target the Afghan Taliban as requested by the U.S. Pakistan has deep historical ties with the group, and many analysts believe some officials within the government and the military see the militants as an important proxy once coalition troops leave Afghanistan. Gates cautioned Pakistan against trying to distinguish between the different militant groups in an

essay published Thursday in The News, an English-language Pakistani newspaper. **"It is important to remember that the Pakistani Taliban operates in collusion with both the Taliban in Afghanistan and Al Qaeda, so it is impossible to separate these groups,"** Gates wrote. **"Only by pressuring all of these groups on both sides of the border will Afghanistan and Pakistan be able to rid themselves of this scourge for good -- to destroy those who promote the use of terror here and abroad,"** Gates said. One of the goals of his trip, he said, is "a broader strategic dialogue -- on the link between Afghanistan's stability and Pakistan's; stability in the broader region; the threat of extremism in Asia; efforts to reduce illicit drugs and their damaging global impact; and the importance of maritime security and cooperation." **Gates' first meeting Thursday is with Defense Minister Ahmed Mukhtar. He also has separate meetings scheduled with Prime Minister Yousaf Reza Gilani and President Asif Ali Zardari** (Fox News, 2010).

**Title/Headline:** *Pakistani Army Says No New Offensive for 6-12 Months*

**Abstract:** U.S. Defense Secretary Robert Gates said Friday he was deeply impressed with Pakistan's military offensive against militants within its borders and said he will leave it to that country's leadership to decide whether or when to expand the fight. **"The Pakistani leadership will make its own decisions" about when or whether they are going to do something. "That's just fine with me,"** Gates said during an interview with Pakistani and U.S. journalists near the close of his two-day visit to the Pakistani capital. Gates said he likens the U.S. and Pakistani discussions about the fight against militants on Pakistan's western border to an automobile. **He said Pakistan was driving "and that's the way it should be."** Asked whether the U.S. was winning in the long battle against al-Qaida terrorism, Gates said the United States has made progress but hasn't won yet. **He said al-Qaida and what he calls a syndicate of affiliated groups are less capable of large-scale, coordinated attacks than they once were and in many cases their leadership has been killed or captured.** That said, he called extremism a cancer that has metastasized from al-Qaida's home base along the Pakistan-Afghan border. **The U.S. has been pressing Pakistan to take more aggressive action against militants, but Pakistan's army said Thursday it cannot expand its current offensive for at least six months.** Remarks from the Army's chief spokesman during Gates' visit did not rule out the offensive the United States would like to see against militants who target U.S. forces in Afghanistan from hideouts in Pakistan. The Obama administration has taken a softer tone with Pakistan in recent months, praising the country's unprecedented assault on militants inside its borders and dropping public appeals for Pakistan to focus on the militants along its western border. **"We are not talking years," Maj. Gen. Athar Abbas told reporters traveling with Gates. "Six months to a year" would be needed before Pakistan could consolidate the gains it has made against militants in other parts of the country and then consider going further,** he said. "By a lot of hard work we brought public support on board," for campaigns last year in the Swat Valley and South Waziristan, he said. U.S. officials appeared to accept Pakistan's rationale that it has limited military resources and cannot risk getting ahead of the public's acceptance for a campaign that involves killing fellow Muslims. **"We have to do this in a way that is comfortable for them, and at a pace that they can accommodate and is tolerable for them,"** Gates said ahead of meetings with Pakistani civilian and military leaders. A Filipino militant wanted by the United States is believed to have been killed in an American drone strike close to the Afghan border earlier this month, Pakistani intelligence officials said Thursday. If confirmed, the death of Abdul Basit Usman would represent another success for the U.S. covert missile program on targets in Pakistan. **There have been an unprecedented number of attacks this month following a deadly Dec. 30 militant attack on a CIA base in Afghanistan. U.S. officials do not often talk about the missile strikes or their targets, but they have in the past confirmed the deaths of several mid- and high-level al-Qaida and Taliban fighters.** Most of the missiles are fired from unmanned drone aircraft launched from Afghanistan. Gates was asked about the drone program during an interview with local Express TV. **"I'm not going to discuss operations but I will say this: These unmanned aerial vehicles have been extremely useful to us, both in Iraq and in Afghanistan,"** he said. Gates said he is expanding the program by buying more of the aircraft. **He also said the United States was considering ways to share intelligence with the Pakistani military, including possibly giving it U.S.-made drones for intelligence and reconnaissance purposes. U.S. officials said Gates was referring to a proposed deal for 12 unarmed Shadow aircraft.** The officials spoke on condition of anonymity to discuss sensitive military cooperation. In meetings Thursday with Pakistani President Asif Ali Zardari, the country's army chief and others, Gates called the antiterror operations a success so far, "and he acknowledged to all of them that we realize that has come with a great deal of sacrifice for the military," Pentagon press secretary Geoff Morrell said following the sessions. **"We are not trying to prescribe a timeline by which they must do things," Morrell said. The Pakistani army launched a major ground offensive against the Pakistani Taliban's main stronghold near the Afghan border in mid-October, triggering a wave of retaliatory violence across the country that has killed more than 600 people.** Washington believes Pakistani pressure on militants staging cross-border attacks against coalition troops in Afghanistan is critical to success in Afghanistan as it sends an additional 30,000 troops to the country this year (Gearan, 2010).

**Title/Headline:** *India Issues Terrorism Alert Over Hijack Plot*

**Abstract:** Airline passengers across India went through extra security screenings Friday and sky marshals were placed on flights as the government put its airports on high alert amid reports that al-Qaida-linked militants planned to hijack a plane. A hijacking, especially one launched by Pakistan-based militants, would send tensions soaring between the two nuclear-armed rivals and be a huge distraction for U.S. efforts to crush the Taliban and al-Qaida along the Afghanistan-Pakistan border. On a visit to India this week, U.S. Defense Secretary Robert Gates warned that a syndicate of terror groups was hoping to foment a new war between India and Pakistan. **India has largely been free of terror attacks since 10 heavily armed militants affiliated with a Pakistan-based militant group rampaged through the commercial capital Mumbai for three days in November 2008, killing 166 people.** India issued a terror alert at all its airports Thursday after the government received warnings about a possible attack, aviation spokeswoman Moushumi Chakravarty said. **A report in The Indian Express newspaper, which Chakravarty confirmed, said intelligence officials had uncovered a plot by**

**militants linked to al-Qaida and the Pakistan-based Lashkar-e-Taiba group to hijack an Air India or Indian Airlines flight destined for an unspecified South Asian country.** U.K. Bansal, a top home ministry official, said security was tightened at all airports and passengers were being subjected to more intense security screenings. **Sky marshals were also being deployed on some flights and the government was asking neighboring countries to step up security on India-bound flights as well, the home ministry said in a statement. The alert was expected to continue over the weekend.** Indian media said the hijack threat was uncovered during the interrogation of Amjad Khwaja, a militant leader belonging to Harkat-ul-Jihad-al-Islami, an extremist group involved in numerous terrorist attacks in India. Khwaja was arrested in the southern Indian city of Chennai last week and was being questioned by Indian police (Nessaman, 2010).

**Source:** Fox News

**Title/Headline:** *Bin Laden Claims Responsibility For Christmas Day Bomb Attempt*

**Abstract:** Usama bin Laden claimed responsibility for the failed attempt to bomb a Detroit-bound airliner on Christmas day, releasing a new audio message Sunday threatening more attacks on the United States. A senior U.S. intelligence official in Washington called the latest message "curious," commenting that the tape is uncharacteristically brief and shows efforts by bin Laden to attach himself to Palestine's cause. **The official also said there is no evidence that bin Laden had any involvement on the Christmas Day attack — or even knew about it beforehand — but that perhaps the leader hopes to attach himself with a "successful" operation by Al Qaeda. The message suggests the Al Qaeda leader wants to appear in direct command of the terrorist group's many affiliates around the world at a time when some analysts have suggested he is mostly a figurehead.** In the minute-long recording carried by Al-Jazeera Arabic news channel, bin Laden addressed President Obama saying the Christmas attack was meant to send a message similar to that of the Sept. 11 attacks. "The message delivered to you through the plane of the heroic warrior Umar Farouk Abdulmutallab was a confirmation of the previous messages sent by the heroes of the Sept. 11," he said. **"America will never dream of security unless we will have it in reality in Palestine," he added. "God willing, our raids on you will continue as long as your support for the Israelis continues."** White House Press Secretary Robert Gibbs said the tape has yet to be authenticated, but wouldn't offer an opinion on whether bin Laden had any role in the Christmas Day bombing. **"I think everybody in this world understands that this is somebody that has to pop up in our lives over an audio tape because he's nothing but a cowardly, murderous thug and a terrorist that will someday, hopefully soon, be brought to justice,"** Gibbs told "Fox News Sunday." On Christmas Day, Nigerian Abdulmutallab attempted to blow up his Northwest Airlines flight as it approached Detroit Metro Airport. But the explosive powder he was hiding in his underwear failed to detonate. **He told federal agents shortly afterward that he had been trained and given the explosives by Al Qaeda in the Arabian Peninsula, an Al Qaeda affiliate in Yemen. The U.S. intelligence official said the Yemen-based group is linked with the central Al Qaeda group that bin Laden heads and recent intelligence indicates there are ongoing contacts between Al Qaeda in Yemen and Pakistan.** He spoke on condition of anonymity because of the sensitive nature of the information. Bin Laden's message, coming long after AQAP gave its own claim of responsibility, appears to be an effort on his part to stay relevant, said Rohan Gunaratna, author of "Inside Al Qaeda: Global Network of Terror." **"The training and the definition of the attack was by the local leaders of Al Qaeda in the Arabian Peninsula, so in many ways you can say bin Laden is exploiting for his benefit this particular attack,"** he said. "Bin Laden still wants to claim leadership for the global jihad movement." Of all the various offshoots and branches of Al Qaeda around the world, Gunaratna said the group in Yemen is one of the closest to bin Laden since it is made up of bodyguards and associates of the organization's top ideologues. Yemen is bin Laden's ancestral homeland. **"Today the operational relationship has somewhat suffered, but the ideological relationship is very strong and that is why bin Laden claimed this attack,"** Gunaratna said. Two of the group's top members were former detainees released in November 2007 from the U.S. military prison Guantanamo Bay. Since the Christmas Day attempt, the Yemeni government, at the U.S.'s urging has stepped up its attacks on the group's hideouts in the rugged country's remote hinterland. **Analysts have long debated how much control bin Laden, who is believed to be somewhere in Afghanistan-Pakistan border region, really has over the various organizations using his group's name.** The Yemen-based group, however, has closer ties than most to bin Laden and his key lieutenants, many having once been their bodyguards. There was no way to confirm the voice on the audio message was actually that of bin Laden, but it resembled previous recordings attributed to him. In the past year, bin Laden's messages have concentrated heavily on the situation of the Palestinians in attempt to rally support from Muslims around the world. Some analysts say bin Laden is focusing on the close U.S.-Israeli relationship because he is worried about Obama's popularity across the Middle East with his promises to withdraw from Iraq and because his father was a Muslim from the African nation of Kenya.

The plight of the Palestinians, especially in the blockaded Gaza Strip where 1,400 were killed in an Israeli offensive a year ago, angers many in the Arab world. "The Palestinian conflict was never part of the Al Qaeda original mandate, but Usama is clearly exploiting it," Gunaratna said. Israeli Foreign Ministry spokesman Andy David dismissed the latest Al Qaeda message and its attempt to link Israel with attacks on the U.S. "This is nothing new. He has said this before," he said. **"Terrorists always look for absurd excuses for their despicable deeds."** The last public message from bin Laden appears to have been on Sept. 26, when he demanded that European countries pull their troops out of Afghanistan. The order came in an audiotape that also warned of "retaliation" against nations that are allied with the United States in fighting the war (Fox News, 2010).

**Source:** The Sunday Times, Rhys Blakely

**Title/Headline:** *Terror Group Lashkar-e-Taiba 'Planning Paraglider Attacks' In India*

**Abstract:** Indian intelligence officials suspect that the terrorist group behind the 2008 Mumbai attacks is planning another audacious strike on the country — this time from the air, using suicide bombers flying paragliders. U. K. Bansal, an Indian Home Ministry official, told reporters that the Pakistan-based Lashkar-e-Taiba faction was thought to have acquired a number of the gliding parachutes. "We have intelligence reports that LeT has purchased 50 paragliding kits from Europe with an intention to launch attacks on India," he said. No other details were given, but security levels have been hiked across the country ahead of tomorrow's Republic Day celebrations, one of India's biggest holidays. If accurate, the intelligence would mark a radical new tactic. Experts said the potential threat posed by jihadist paragliders would have to be considered seriously as LeT — which murdered 166 people in Mumbai in a sophisticated commando-style raid — has already proven itself highly innovative. **"The Mumbai attack [where ten LeT gunmen sailed to Mumbai from Karachi, murdering the crew of a fishing boat en route], was the group's first act of sea-borne terrorism,"** said B. Raman, a former counter-terrorism chief in the Indian foreign intelligence service, the Research and Analysis Wing. "It would be natural for them to plan another spectacular attack from the air. The warning has to be taken seriously." **Paragliders usually do not have an engine but can — in skilled hands and in the right conditions — cover large distances. The world record for flying a paraglider is more than 460km (285 miles). However, they usually need to be launched from a high point, or towed by a boat or car, which could limit their effectiveness.** The latest alert came after the US Defence Secretary Robert Gates warned last Wednesday that a syndicate of terrorist groups could trigger a war between Pakistan and India through a "provocative act". Relations between India and Pakistan, nuclear armed neighbours which have gone to war three times, deteriorated sharply in the wake of the Mumbai attacks. LeT has been active since the early 1990s and is said to have been created with the help of Pakistan's powerful spy agency, the Directorate of Inter-Service Intelligence. It was founded to try and free Kashmir from Indian control, and came to specialise in the type of suicidal raid that shocked the world over a 60-hour period when Mumbai was attacked in November 2008. **The organisation was banned in Pakistan in 2002. Indian officials also warned last week that a terrorist group — possibly LeT or al-Qaida — was poised to hijack an Indian passenger plane.** On Friday, an Indian Home Ministry official confirmed that security had been tightened at all airports. Officials said that sky marshals would be deployed on flights around the region. Indian officials have feared the possibility of an air attack for some time. **Eight days after the Mumbai attacks, the Defence Ministry ordered the nation's armed forces to be on guard against "terror strikes from the air". At that time, the India Bureau for Civil Aviation is thought to have been given warning of plans to capture one or more planes at Delhi, Mumbai, Bangalore or Chennai airports, the country's main transport hubs.** Officials said that credible intelligence indicated a plan to attack a major population centre using an airliner in an assault that would resemble those made on New York in 2001. **There were also fears that one of India's nuclear facilities could be targeted. The last time an Indian passenger plane was targeted was Christmas Eve 1999, when an Indian Airlines flight was hijacked by Pakistani nationals as it flew from Kathmandu to Delhi. That plane landed in Afghanistan, where the hostages were released in exchange for three Islamist extremists** (Blakely, 2010).

**Title/Headline:** *Pakistani Scientist Convicted Of Trying To Kill Americans*

**Abstract:** A U.S.-trained Pakistani scientist was convicted of charges **that she tried to kill Americans while detained in Afghanistan in 2008**, shouting with a raised arm as jurors left the courtroom: "This is a verdict coming from Israel, not America." A jury deliberated three days in federal court in Manhattan before finding Aafia Siddiqui guilty in the third week of her attempted murder trial, which she often interrupted with rambling courtroom outbursts. **Siddiqui, 37, was convicted of two counts of attempted murder**, though the crime was not found by the jury to be premeditated. She was also convicted of armed assault, using and carrying a firearm, and assault of U.S. officers and employees. Before her arrest, **U.S. authorities had called Siddiqui an Al Qaeda sympathizer.** She was never charged with terrorism, but prosecutors called her **a grave threat who was carrying bomb-making instructions and a list of New York City landmarks including the Statue of Liberty** when she was captured. The defendant — a spindly neuroscience specialist who trained at the Massachusetts Institute of Technology and Brandeis University — "is no shrinking violet," Assistant U.S. Attorney Christopher La Vigne said in closing arguments. **"She does what she wants when she wants it,"** he said. "These charges are no joke. People almost died." Testifying in her own defense, **Siddiqui claimed she had been tortured and held in a "secret prison" before her detention.** Charges that she attacked U.S. personnel who wanted to interrogate her were "crazy," she said. "It's just ridiculous" (Fox News, 2010).

**Title/Headline:** *U.S. Believes Pakistani Taliban Leader Is Dead*

**Abstract:** The Pakistani Taliban leader **Hakimullah Mehsud was allegedly killed in a U.S. airstrike.** Neither Pakistan nor the U.S. has

officially confirmed the death of Mehsud, who commands an Al Qaeda-allied movement that is blamed for scores of suicide bombings and is suspected in a deadly attack on a CIA base in Afghanistan late last year. The statement came after days of posturing by **Pakistani Taliban officials, who first said they would prove their leader was alive and well**, then reversed course and said they saw no need to prove it. The attack by a U.S. drone came after Mehsud appeared in a video alongside the Jordanian suicide bomber who Baitullah Mehsud's death gave leadership of the Pakistani Taliban to his deputy, Hakimullah Mehsud, a 28-year-old with a reputation as a particularly ruthless militant. He has taken responsibility for a wave of brazen **strikes inside Pakistan, including the bombing of the Pearl Continental hotel in the northwestern city of Peshawar last June and the attack on the Sri Lankan cricket team in Lahore earlier that year** (Fox News, 2010).

**Title/Headline:** *Geography Professor Claims To Have Found Osama Bin Laden*

**Abstract:** A Californian geography professor has used techniques for hunting endangered species to pinpoint three houses in Pakistan where Osama bin Laden could be hiding. Using patterns of how animal species spread, the world's most wanted terrorist can be tracked down to a town in the tribal region of North West Pakistan it is claimed. By factoring in his need for security, electricity, high ceilings to accommodate his 6ft 4in frame and spare rooms for his bodyguards, the search can be further narrowed to three walled compounds. According to a team led by Thomas Gillespie, at the University of California in Los Angeles, bin Laden's location is "one of the most important political questions of our time" (Farmer, 2010).

**Title/Headline:** *Key Taliban Political Mastermind Arrested In Pakistan*

**Abstract:** Pakistan security forces arrested a suspected Taliban mastermind on Thursday, Fox News has learned. Mohtasim Agha Jan is thought to be a chief Taliban political strategist in Karachi. "He is a close aide of spiritual leader Mullah Omar and ranked number seven on the post 9/11 watch list," a U.S. intelligence official told Fox News. His arrest may be due in part to the CIA's interrogation of suspected terrorist Abdul Ghani Baradar, who was arrested in early February. After the arrest of Ghani Baradar, Mohtasim Agha Jan's name surfaced in discussions about who might replace the Afghan Taliban's No. 2. He is a former Taliban finance minister who is reported to have family links to Taliban leader Mullah Omar. As a government official, he had the power to control the flow of money and appoint deputy ministers. He was born in the late 1960s in Kandahar city. **The arrests have been hailed by U.S. officials and many analysts as a major blow to the Taliban in Afghanistan, though they caution that the group has rebounded from the death or detention of previous leaders.** Opinion is divided on whether the crackdown signals that the country's powerful intelligence forces are adopting a harder line against the militants. **The United States has long demanded Pakistan take action against the group, which critics say have long enjoyed relative sanctuary in Pakistan. Some experts say the arrests may be aimed at removing moderates within the Taliban who were considering taking part in possible reconciliation talks with the Afghan government.** Earlier, Interior Minister Rehman Malik said he had no information on the arrest of Mohtasim. Afghan Taliban spokesman Qari Yousef Ahmadi denied he had been arrested. There had been speculation that Mohtasim was in the running to replace Baradar, who was reportedly arrested in a joint raid with American intelligence officials. Born in the late 60s, Mohtasim was considered close to Taliban leader Mullah Omar. He was not known to be among the most hardline group within the Taliban. Earlier Thursday, dozens of militants attacked a security checkpoint in the northwest close to the Afghan border, sparking a gunbattle that left 30 insurgents and one soldier dead, officials said. The battle occurred overnight in the Chamarkand area of the Mohmand tribal region, said government and military officials, speaking on condition of anonymity because they were not authorized to talk to the media. **Chamarkand borders the Bajur tribal region, where the army said Tuesday it had finally defeated Taliban and Al Qaeda militants after more than a year and a half of fighting. Washington has praised Pakistan for its recent military operations but wants the government to do even more to target militants using its territory to stage cross-border attacks against U.S. and NATO troops in Afghanistan** (Fox News, 2010).

**Title/Headline:** *American Al Qaeda Terrorist Adam Gadahn Arrested, Pakistan Claims*

**Abstract:** Pakistani officials claimed Sunday they nabbed Adam Gadahn, the treasonous Californian Al Qaeda leader who has long been on Washington's most wanted list. But high-level U.S. officials said they could not verify the report - and there were growing indications it could be a mixup. President Obama did not mention what would be a welcome blow against terrorist mastermind Osama Bin Laden when he made a statement to reporters about the Iraqi election yesterday. He ignored a shouted question about Gadahn. "We are checking with Pakistani authorities to confirm one way or the other," said FBI spokesman William Carter. A Pakistani official told Agence France-Presse that "we thought it could have been a big catch, but it appeared it's not Gadahn." The confusing swirl of reports began in Karachi, where The Associated Press and several news outlets quoted Pakistani officials announcing the arrest of Bin Laden's American mouthpiece. **An English-language paper ran a photo of a man said to be Gadahn being taken away with a bag on his head. Later reports suggested the arrested man might not be Gadahn but a Taliban commander with a similar name. Gadahn,**

**31, is the first American to be charged with treason since World War II.** If convicted, he would face the death penalty. Stories about Gadahn's arrest came just hours after he appeared in a new Internet video urging American Muslims to go on shooting sprees like Maj. Nidal Malik Hasan's at Fort Hood, Tex., last year. Gadahn's arrest would be the latest in a series of successes in the new partnership between **Pakistan's once-balky intelligence services and the CIA. Known in Al Qaeda videos as "Azzam the American" or Azzam al-Amereeki, Gadahn was born in Oregon to a Jewish family.** His hippie father converted to Christianity before his son was born, changing the family name from Pearlman to Gadahn, after an Old Testament warrior. Adam Gadahn was home-schooled in Southern California on a goat farm without running water. **Once an avid fan of Death Metal music, he converted to Islam at 17 and moved to Pakistan in 1998 at 20.** Intelligence officials say he joined up with Al Qaeda after 9/11 and attended terrorist training camps in Afghanistan. By 2004, he was a senior Al Qaeda operative and became Bin Laden's top propagandist, appearing in numerous Internet videos calling for the destruction of America. In a 2008 video he tore up his U.S. passport on camera and urged Americans to launch domestic terrorist attacks. He is believed to report directly to Bin Laden's right-hand man, Ayman al-Zawahiri. Gadahn was branded a traitor in 2006 by a federal grand jury in Santa Ana, Calif. He would be tried in a federal court, like California native John Walker Lindh and ex-Chicago gang member Jose Padilla (Kennedy, 2010).

**Title/Headline:** *Pakistan Arrests American Al Qaeda Member; Identity Not Confirmed*

**Abstract:** A Taliban leader who goes by the name Abu Yahya, just like American-turned-al Qaeda spokesman Adam Gadahn, was picked up in Karachi in recent days, but that person is not Gadahn, a senior Pakistani government official told ABC News. Reports of the capture of an American-born al-Qaeda member by Pakistani authorities gave rise to speculation over whether it was Gadahn, the 31-year-old California-born Muslim convert who has been wanted since 2004. **The official told ABC News the leader who was arrested was possibly Abu Yahya Mujahdeen al-Adam, said to be another American member of al Qaeda, but the Pakistanis have yet to make that identification positive, the official said.** Dawn, an English-language newspaper, reports that Abu Yahya Mujahdeen al-Adam is an Egyptian-born U.S. citizen from Pennsylvania who helps command foreign militants fighting in Afghanistan and coordinates activities from Dubai. The newspaper reports he is a close aide of Osama bin Laden and one of the "main financiers" of al Qaeda, and that he was arrested with the help of U.S. intelligence, and has been transported to Islamabad for interrogation. **Pakistani intelligence officials told ABC News that Karachi, the sprawling port city far from the Afghan border where Yahya was picked up, is where many other recent arrests have been made. In the last six weeks, at least a half dozen senior Taliban commanders have been arrested, including the Afghan Taliban's military commander, two Afghan Taliban shadow governors and the son-in-law of Taliban chief Mullah Omar.** The word of an arrest of an American in Pakistan came just hours after the release of the latest video of Gadahn, in which he praised Nidal Hasan, the U.S. Army major accused in the Fort Hood massacre last November. "The Mujahid brother Nidal Hasan is a pioneer, a trailblazer and a role-model who has opened a door, lit a path and shown the way forward for every Muslim who finds himself among the unbelievers," Gadahn said in the video. **Gadahn grew up in southern California and converted to Islam. Officials say radical elements at an Orange County mosque convinced Gadahn to move to Pakistan.** He has been there since 1998, attending al Qaeda training camp and becoming a leading voice for al Qaeda -- praising the attacks of Sept. 11, 2001, and today urging Muslims to launch more attacks against the United States. **You shouldn't make the mistake of thinking that military bases are the only high-value targets in America and the West. On the contrary, there are countless other strategic places, institutions and installations which, by striking, the Muslim can do major damage to the crusader West,"** Gadahn said in the video. Gadahn was charged with treason in 2006. He could face the death penalty if captured (Raddatz & Schiffrin, 2010).

**Title/Headline:** *Pakistani Men Discussing Girls Were Planning Terror Attack*

**Abstract:** Two Pakistani men apparently discussing girls online were really planning a massive Al Qaeda terror attack on Britain, a senior British intelligence officer has testified in court. The officer gave his testimony to the Special Immigration Appeals Commission as part of a deportation hearing following the arrest of five Pakistani men in anti-terror raids in Manchester and Liverpool in April last year. Three of the men have been deported to Pakistan and are appealing to be allowed to return to Britain. The two others are fighting their deportation order - apparently backed by Pakistani government ministers. The officer, identified only as ZR, told the court Tuesday the five men planned to stage an attack between April 15 and 20 last year - just days after their arrest - in a plot that would inflict "mass casualties". He told the hearing that the alleged plot ringleader **Abid Naseer exchanged coded emails with an Al Qaeda operative called Sohaib, using girls' names in order to conceal their identities.** "On the face of it the emails are designed to look, without knowledge of the surrounding context, they're designed to look like correspondence between two people about girls," he said, according to the Daily Mail. "I don't assess this to be two young men simply talking about girls. **I think it's two people discussing attack planning on behalf of Al Qaeda,**" he added. Police say Naseer and Ahmed Faraz Khan were part of a major plot and constitute a risk to security, but that it did not have enough evidence to charge them with criminal offences. Naseer's lawyer Jeol Bannathan told ZR: "You know, don't you, that in Pakistan in public, senior figures in the Pakistani government have been saying 'these boys are innocent, they should be allowed to carry on with their studies'." ZR replied: "The claims that these individuals are not involved in terrorism are wrong." The British intelligence officer compared the alleged plot to the July 7, 2005 attacks in London and a trans-Atlantic airline bomb plot of 2006, but refused to reveal details of the similarities in open court. "The overarching similar fashion was that they were all planning a terrorist attack in the UK under the direction of Al Qaeda and these were aiming for mass casualties." He added: "I'm comfortable that there are similarities between those plots and I'm comfortable to talk about that in closed session." **M15, the British spy agency, claims that Naseer and Sohaib used names of girlfriends to refer to different explosive materials needed for homemade bombs. They also mentioned a wedding, which was in fact the alleged attack, the security service says (Thaindian News, 2010).**

**Title/Headline:** *Details Emerge In Al Qaeda Plot On NYC Subway System*

**Abstract:** A fourth suspect in the alleged plot to blow up New York City subways has reportedly revealed shocking details about the plan involving Najibullah Zazi, MyFoxNY.com reported. **The Queens native and two high school friends were planning to detonate explosives attached to their bodies at Grand Central and Times Square stations during rush hour**, according to the Associated Press. The AP reports that the fourth suspect was arrested in Pakistan and is likely to be extradited to Brooklyn. The group had supposedly picked September 14, 15 or 16 as the attack date. In February, Zazi pleaded guilty in U.S. federal court to a plot to blow up New York's subway system last year and to links with al Qaeda. **Zazi pleaded guilty to three charges: conspiracy to use weapons of mass destruction, conspiracy to commit murder in a foreign country, and providing material support to the al Qaeda extremist network.** He told the federal court in Brooklyn that he had planned to blow up New York targets including the underground train system and that he wanted to "conduct mortal operations in the subway line." **Zazi, 24, said he was ready to "sacrifice myself" in order "to draw the attention to what the United States is doing in Afghanistan."** He faces maximum sentences of life in prison for the first two charges and 15 years for the third. However, his plea appears to be part of a bargain in which he could receive a more lenient sentence in return for cooperating with investigators. Zazi was arrested September 20 in Denver, where he worked as an airport shuttle bus driver. **Prosecutors say he carried bomb-making instructions in a laptop and had been shopping for large quantities of chemicals found in beauty products that could have been the ingredients for explosives. They also say he received explosives training in Peshawar, Pakistan, a hotbed of al Qaeda activity. According to prosecutors, Zazi went to New York to prepare the alleged bombing campaign, using weapons of "mass destruction," but left after receiving a tip-off that he was being watched by federal agents (Fox News, 2010).**

**Headline/Title:** *Government Says Al Qaeda Ordered N.Y. Plot*

**Abstract:** The failed plot to bomb three New York City subway lines during the morning rush last September was hatched in 2008 by two senior Qaeda leaders in the tribal areas of Pakistan, where they met personally with three would-be suicide attackers from Queens to urge them to carry out a strike, federal authorities said Friday. **Last October, in the weeks after one of the three men, Najibullah Zazi, was arrested, the attorney general, Eric H. Holder Jr., said that the plot represented one of the most serious threats to the United States since 9/11.** A federal prosecutor, speaking in United States District Court in Brooklyn on Friday, disclosed what he said was the role of the **two senior Qaeda leaders for the first time and identified them as Saleh al-Somali, the group's head of external operations, and Rashid Rauf, a key operative. Both were reported killed by drone attacks in Pakistan.** The prosecutor, Jeffrey H. Knox, the assistant United States attorney overseeing the case against the three men from Queens, made the disclosure during a court proceeding in which one of the two other men, Zarein Ahmedzay, 25, an Afghan immigrant, pleaded guilty to the bomb plot and other crimes. Mr. Zazi, who moved to Denver from Queens early last year and worked as an airport shuttle bus driver, had pleaded guilty to the same crimes. During his guilty plea, Mr. Ahmedzay, a short, bearded man, quoted from the Koran before describing his role in the bomb plot. Then, appearing at ease, he suggested that a Zionist conspiracy represents a greater threat to the United States than Al Qaeda. **"And I believe that the real enemies of this country are the ones destroying this country from within," he said. "And I believe these are the special group, the Zionist Jews, I believe, who want a permanent shadow government within the government of the United States of America."** The judge interrupted him. The three men traveled to Pakistan in August 2008 and had planned to cross the border into Afghanistan to join the Taliban and kill American soldiers in order to overthrow what he called the "corrupt and imposter Karzai government" and "establish the perfect justice of Allah," Mr. Ahmedzay said during his guilty plea. **They eventually met a Qaeda figure in Peshawar, then traveled to Waziristan for training. There, they met with Mr. Rauf and Mr. al-Somali, although they did not learn their true identities,** the Justice Department said. A news release issued in Washington by the Justice Department about the guilty plea did not say why the disclosure about the Qaeda leaders was made on Friday. Spokesmen for the agency and for the office of the Brooklyn United States attorney, Benton J. Campbell, which is prosecuting the case, declined to comment. Mr. Ahmedzay told the judge that the meeting with the Qaeda leaders occurred shortly after he and his two friends from Queens arrived at the group's compound. **"We told these two individuals that we wanted to wage jihad in Afghanistan, but they said that we would be more useful to them and to the jihad if we returned to New York and conducted operations there,"** he said, adding in response to a question from the judge that the three young men understood the Qaeda leaders to be referring to suicide bombings. Mr. Ahmedzay said he and his friends told the men that they needed time to decide. **"We discussed the matter amongst ourselves and we agreed to go forward with the plan," he said. "I personally believed that conducting an operation in the United States would be the best way to end the wars."** He said the leaders wanted his input because of his familiarity with New York City. **"They said the most important thing was to hit well-known structures and to maximize the number of casualties," he said. But he said that he himself had selected the subways as their target, rather than a large structure like a building, because of the amount of explosives that Mr. Zazi, who was the only one of the three to undergo explosives training in Waziristan, believed he could make.** All three men, he said, agreed to the plan. Mr. Ahmedzay said that at one point later he had doubts about going forward with the bombing, but resolved to carry it out. **The three men were charged with conspiring to use weapons of mass destruction, and to commit murder in a foreign country, and giving support to Al Qaeda. Mr. Zazi has been cooperating with prosecutors.** Mr. Ahmedzay's lawyer, Michael Marinaccio, would not discuss whether his client was cooperating with the authorities. The plea by Mr. Ahmedzay leaves Adis Medunjanin, 25, as the only remaining defendant in the case facing trial (Rashbaum & Zraick, 2010).

**Title/Headline:** *New York Subway Bombing Plot Was Hatched In Pakistan*

**Abstract:** The failed plot to bomb three New York City subways in September 2009 was hatched by two senior Al-Qaeda leaders in the tribal areas of Pakistan, prosecutors said as another accused pleaded guilty. New details about the aborted terror mission of three would-be suicide attackers as Zarein Ahmedzay, a Queens taxi driver, admitted his role in the plot during a hearing in federal court in Brooklyn on Friday. Ahmedzay joins Najibullah Zazi of Denver, who earlier pleaded guilty to participating in the alleged subway plot. The action leaves a single defendant, Adis Medunjanin, to stand trial on a five-count indictment. **All three face up to life in prison. According to federal prosecutors, the three men travelled to Pakistan in August 2008 and met with two leaders, Saleh Al-Somali, head of international operations for Al Qaeda, and Rashid Rauf, described as a key Al-Qaeda operative. The three Americans told the Al-Qaeda officials they wanted to fight in Afghanistan, but the leaders suggested they would be more useful to Al-Qaeda if they returned to New York to carry out suicide attacks,** prosecutors said. According to US officials, the men agreed to carry out the attacks. They said the Al-Qaeda leaders encouraged the men to strike well-known structures in New York City and to maximise the number of casualties. During the proceeding, Ahmedzay, a short, bearded man wearing a blue prison smock with a long-sleeved white T-shirt beneath it and blue prison pants, quoted from the Koran before describing his role in the bomb plot, the *New York Times* reported. **Then, appearing at ease, he began an angry rant, suggesting that a Zionist conspiracy represents a greater threat to the United States than Al-Qaeda does. The judge eventually interrupted him.** Moments before, Ahmedzay tried to say what had motivated him and his co-defendants, but US Magistrate Judge Steven M Gold cut him off, saying, "It doesn't matter." **"The facts disclosed today add chilling details to what we know was a deadly plot hatched by Al-Qaeda leaders overseas to kill scores of Americans in the New York City subway system,"** said Attorney General Eric Holder in a statement in Washington. **"Ahmedzay's plea makes clear that he betrayed his adopted country and its people by providing support to Al-Qaeda and planning to bring deadly violence to New York,"** said FBI Director Robert Mueller (Hindustan Times, 2010).

**Date:** April 25, 2010

**Source:** Telegraph, Duncan Gardham

**Title/Headline:** *British Al-Qaeda Commander Planned July 7-Style Attack On New York Subway*

**Abstract:** Rashid Rauf, who also planned the transatlantic airlines plot, allegedly told three Americans to attack targets in the United States. His role in the plot emerged as a man pleaded guilty to the plot which was cracked by the FBI last September after a tip off from British intelligence. **It would have been the biggest attack on US soil since September 11, according to the US Attorney General, Eric Holder. Rauf's role in the New York plot emerged as Zarein Ahmedzay, a 25-year-old former New York taxi driver, pleaded guilty to charges including conspiracy to use weapons of mass destruction.** It is claimed they had bought the ingredients to make similar explosives as those used in the July 7 2005 bombings which killed 52 people on three tube trains and a bus in London. In court Ahmedzay said he travelled to Pakistan with two other former school friends from Queen's, New York, Najibullah Zazi and Adis Medunjanin in the summer of 2008. **At the camp in the lawless region of North Waziristan, Ahmedzay said the three men offered to join the Taliban and fight US forces in Afghanistan, but were told they would be "more useful if we returned to New York City... to conduct operations."** Asked by the judge what kind of operations, he said: "Suicide-bombing operations." The al-Qaeda commanders were identified as Rauf and a man called Saleh al-Somali by the Assistant US Attorney, Jeffrey Knox, as well as an unidentified third man. Rauf, who is originally from Birmingham, fled Britain after the murder of his uncle in 2002 and has been connected to almost every significant terrorist plot in Britain since, including July 7, the failed attacks of July 21 and the plot to blow up airliners over the Atlantic. **He was also behind an alleged plan to attack shopping centres in Manchester last Easter. Intelligence agencies believe he died in an attack by a Predator unmanned drone in November 2008.** Zazi, an Afghan-born airport shuttlebus driver from Colorado, admitted earlier this year that he tested bomb-making materials at an apartment in a Denver suburb before travelling by car to New York to attack the subway system. Medunjanin, who is of Bosnian origin, plans to plead not guilty and a fourth man is in custody in Pakistan (Gardham, 2010).

**Title/Headline:** *U.S. Begins Inquiry On Spy Network In Pakistan*

**Abstract:** Defense Secretary Robert M. Gates has opened an inquiry into whether a top Defense Department official violated Pentagon rules by setting up a network of private contractors to gather intelligence in Pakistan and Afghanistan. A Pentagon spokesman said Tuesday that Mr. Gates was also demanding greater oversight over the millions of dollars the Defense Department spent annually to carry out "information operations," to ensure that such missions did not "stray off course" into secret intelligence collection. **At the center of the Pentagon inquiry is Michael D. Furlong, a civilian official working for the Air Force who last year used a web of private contractors to clandestinely gather intelligence in Pakistan and Afghanistan.** According to current and former government officials, some of that information was turned over to Special Operations troops to help fight militants. Some American officials think that Mr. Furlong may have financed the secret network by improperly diverting money from an overt program to gather information about the tribal structures and political dynamics in Afghanistan. **The Pentagon's inspector general is already conducting a criminal investigation into the matter. One focus of that investigation is whether Mr. Furlong engaged in contract fraud by channeling contracts to International Media Ventures, a media technology firm that American officials say Mr. Furlong used in the intelligence-gathering effort. But even if no laws were broken, officials said, the inquiry announced on Tuesday will more clearly define the Pentagon's boundaries in intelligence operations, and determine whether Mr. Furlong's outsourcing of intelligence collection violated Pentagon rules.** The inquiry will be led by Mr. Gates's senior aide in charge of intelligence oversight. Geoff Morrell,

the Pentagon press secretary, said that a Pentagon team set up to do a quick study of Defense Department information operations — the area of warfare where information is used to achieve military ends — had found that the programs were well managed and had unearthed no evidence of operations similar to the one set up by Mr. Furlong. "There do not seem to be any other alleged rogue information operations under way," he said (Mazzetti, 2010).

**Title/Headline:** *Pakistan Taliban Chief Hakimullah Mehsud Is Alive, Says Spy Agency*

**Abstract:** The Taliban leader in Pakistan, Hakimullah Mehsud, survived an American drone strike in January and is alive and well, a senior official with Pakistan's Inter Services Intelligence agency told the Guardian today. Mehsud was reported to have died in a CIA drone strike in South Waziristan in January but, although Pakistan's interior minister claimed he had been killed, the death was never confirmed by either US or Pakistani intelligence. Today the senior intelligence official said he had seen video footage of the missile attack on Mehsud but other intelligence had since confirmed the insurgent leader survived. He declined to elaborate further. **"He is alive," said the official, who spoke on condition of anonymity. "He had some wounds but he is basically OK." "Mehsud's apparent survival will be a blow to the CIA, which intensified efforts to kill the flamboyant young Taliban leader early this year after he appeared in a video alongside an al-Qaida operative who killed seven American spies at a base in southern Afghanistan in late December.** The failed attack on Mehsud came at the start of an unprecedented onslaught by CIA-controlled unmanned aircraft in the tribal belt. The CIA has carried out 38 attacks so far this year, the official said, compared with 49 in the whole of 2009. **"The US government is under pressure because it is unable to achieve much in Afghanistan. This is one way of hitting their al-Qaida enemies, as they define them,"** the official said. Drone strikes are deeply unpopular in Pakistan because of civilian casualties. **The New America Foundation recently reported that between January 2009 and March 2010 the drones killed 690 alleged insurgents and 181 innocent villagers.** CIA figures put the civilian tally for the same period at 20. The Pakistani official estimated the civilian toll was "between the two figures" but insisted that targeting had improved. **"For the Americans, this is an effective way of doing things from a distance with little collateral damage. I give full credit to the CIA for this."** The Washington Post reported this week that the CIA has started using more compact drones and smaller missiles in an effort to reduce civilian casualties. The intelligence official denied reports that the Taliban deputy leader, Mullah Abdul Ghani Baradar, had been captured in Karachi last January "by accident". US intelligence pinpointed Baradar in a housing estate in a well-to-do part of Karachi, he said, but the raid to capture him was entirely Pakistani. "There was no American around," he said. Baradar was being jointly interrogated by CIA and ISI agents and had yielded useful information, he said. For example, he claimed to have last met the Taliban leader in Afghanistan, Mullah Muhammad Omar, two years ago. He also rejected claims that Pakistan had captured Baradar to scupper nascent Afghan peace talks, saying that Baradar had disdained President Hamid Karzai as "not even a real Pashtun". In March, Kai Eide, the UN's former special representative to Afghanistan said he believed Pakistan wanted to prevent talks between the UN, the Afghan government and the Taliban, to retain control of the process. **The senior official said the ISI would be "very, very willing" to play a role in negotiations with the Taliban, but only if called upon by both the Afghan and US governments.** For now, he said, Pakistan's spies are "sitting on the sidelines, watching". "There are a number of different efforts and nobody knows what anyone else is doing. It's a very fragmented effort." He added that "if it's meant to confuse the Taliban, it's working". One stumbling block, he said, was the clashing policies of Britain and the US. "The British are more amenable to negotiations and talking," he said. **"The Americans are attempting to create conditions where the Taliban will be forced to come to the table. In my opinion they will never achieve that."** A western diplomat in Islamabad said British officials were more inclined to talks than their US counterparts, but said policy had not been fixed in either country because "otherwise things would be happening". The ISI official denied his agency retains close ties with Jalaluddin Haqqani, an al-Qaida-linked warlord whom America blames for recent mayhem in Afghanistan, including a suicide attack on the Indian embassy. He admitted the agency had once been close to Haqqani but insisted that recent US allegations came from people who "lived in the past". He regretted that Pakistan had broken its links with the warlord because "otherwise, resolution of the problems in Afghanistan today would be so much easier for all of us". **The ISI was heavily criticised in a recent United Nations report into the death of Benazir Bhutto in December 2007. The official described the report as a "sub-standard work with a clear agenda". He said: "In the report, statements are made and inferences drawn on condition of anonymity and hearsay. Who in God's name does that?"** Hakimullah Mehsud's apparent survival represents a second miraculous escape in the career of a youthful, ruthless militant leader. The Pakistani government previously reported that the flamboyant tribesman, thought to be about 30 years old, was killed during a leadership struggle last August. Despite his remarkable good fortune, however, Hakimullah's days as a Taliban leader may be numbered. **According to a senior ISI official, his Tehrik-i-Taliban Pakistan organisation has been weakened by a sweeping army assault on its South Waziristan stronghold. Mehsud's leadership has been challenged by other figures, too, including his rival Wali-ur-Rehman. "He may not be in the leadership position," the intelligence official said. "His rise was accidental. He was mister nobody, people found it difficult to accept him."** Mehsud rose to militant fame on the back of his ambition and showy cruelty. He sprang to prominence in 2007 with the humiliating kidnapping of over 200 Pakistani soldiers in South Waziristan. A year later, he led dozens of ambushes on Nato supply convoys as they passed through the Khyber Pass; in one instance he invited reporters to film him at the wheel of a looted American Humvee. Hakimullah became Taliban leader in August after a CIA drone killed the Tehrik-i-Taliban founder, Baitullah Mehsud. He also became known for cruelty. In Orakzai tribal agency, which was under his sway, Taliban fighters preyed on minority Sikhs and carried out bloody sectarian attacks on Shias. Whatever Mehsud's fate, the Taliban remain a potent force. **Yesterday, a suicide bomber rammed his car into a checkpoint on the outskirts of Peshawar, killing five policemen. In North Waziristan, a clash at a checkpoint left four militants dead and injured one soldier** (Walsh, 2010).

**Title/Headline:** *Pakistani Taliban Claim Credit For Failed NYC Times Square Car Bombing*

**Abstract:** A top Pakistani Taliban commander took credit for yesterday's failed car bomb attack in New York City. Qari Hussain Mehsud, the top bomb maker for the Movement of the Taliban in Pakistan, said he takes "fully responsibility for the recent attack in the USA." Qari Hussain made the claim on an audiotape accompanied by images that was released on a YouTube website that calls itself the Tehreek-e-Taliban Pakistan News Channel. **The tape has yet to be verified, but US intelligence officials contacted by *The Long War Journal* believe it is legitimate. The Tehreek-e-Taliban Pakistan News Channel on YouTube was created on April 30.** Officials believe it was created to announce the Times Square attack, and Qari Hussain's statement was pre-recorded. All indications are the tape is legitimate. **YouTube has pulled the video and shut down the Tehreek-e-Taliban Pakistan News Channel since this article was published.** "This attack is a revenge for the great & valuable martyred leaders of mujahideen," Qari Hussain said. He listed Baitullah Mehsud, the former leader of the Pakistani Taliban who was killed in a Predator strike in August 2009, and Abu Omar al Baghdadi, the former leader of al Qaeda Islamic State of Iraq who was killed by Iraqi forces in mid-April. **And although he was not mentioned, an image of Abu Ayyub al Masri, the leader of al Qaeda in Iraq, was also displayed in the images accompanying the audiotape.** Qari Hussain also said the failed attack was "revenge for the Global American interference & terrorism in Muslim countries, especially in Pakistan for Lal Masjid operation," a reference to the July 2008 Pakistani military assault on Islamists holed up in the Red Mosque in Islamabad, as well as Predator strikes in Pakistan's tribal areas and the arrest and detention of Pakistani scientist Aifa Siddique. Qari Hussain warned NATO that it must denounce the US and apologize for "the massacres in Iraq, Yemen, Afghanistan, and Pakistani tribal areas otherwise be prepared for the worst destruction and devastation in their regions." **At the opening of the tape, the failed car bomb was described as a "jaw-breaking blow to Satan USA," however Mayor Michael Bloomberg described the device, which failed to detonate, as "amateurish."** The car bomb was discovered Saturday evening after a street vendor spotted smoke coming from a Nissan Pathfinder SUV and alerted police. The bomb squad was dispatched to the scene and discovered a crude bomb made of "three canisters of propane like those used for barbecue grills, two five-gallon cans of gasoline, consumer-grade fireworks ... and two clocks with batteries," *The New York Times* reported. **Police currently do not have a suspect. The license plate is not registered to the Nissan, and the vehicle identification number has been removed. Police are also looking at video from surrounding stores to see if they can determine anything about the identity of the bomber (Roggio, 2010).**

**Title/Headline:** *American Who Recently Visited Pakistan Eyed In Times Square Bomb Plot*

**Abstract:** Federal authorities have identified a person of interest in Saturday night's Times Square bomb attempt -- a naturalized American citizen who was in Pakistan for several months and returned to the United States recently, investigative sources told Fox News. The latest developments seem to support investigators' suspicions that there was a foreign connection behind the failed car bomb attempt in New York City, senior Obama administration officials told Fox News, shedding light on the growing body of evidence. **Sources say that evidence includes international phone calls made by the person of interest, who has not been identified publicly. The Associated Press identified the person as a man of Pakistani descent, citing unnamed law enforcement sources (Fox News, 2010)**

**Title/Headline:** *Times Square Car Bomb Suspect Faces Terrorism Charges After Admitting To Plot*

**Abstract:** Pakistani-born U.S. citizen Faisal Shahzad has admitted trying to set off a car bomb in busy Times Square and will face terrorism and mass destruction charges, Attorney General Eric Holder said Tuesday. Holder said in a press conference that Shahzad has been charged with an act of terrorism and attempted use of a weapon of mass destruction in the May 1 bomb plot. **Holder said Shahzad, who has provided "valuable information" to investigators, attempted to carry out a "lethal terrorist attack" aimed at "murdering Americans in one of the busiest places in our country."** Deputy FBI director John Pistole said Shahzad was placed on the No Fly list just hours before he was arrested Monday -- a key step in preventing him from fleeing the country on a flight to Dubai, he said. Homeland Security Secretary Janet Napolitano said Customs and Border Protection officials at the airport ordered that the flight be stopped before takeoff. Napolitano said they were able to arrest Shahzad on the plane and turned him over to the FBI -- though she declined to say how he was able to board the flight if he was on the No Fly list. Authorities tracked down Shahzad using the vehicle identification number on the Nissan Pathfinder that failed to detonate. **They linked that number to a recent sale in Connecticut, Holder said. Holder said he could not confirm reports that between four and eight people have been taken into custody for questioning in Pakistan in connection with the bombing attempt.** CBS News reported earlier Monday that Pakistani authorities apprehended suspects connected to the terrorist plot during raids Monday night and Tuesday morning in different locations. Some of them may be related to Shahzad, according to the network. **Pakistani intelligence officials also told Fox News on Tuesday that a man was arrested in Karachi for his connection to the bomb plot.** The reported capture comes after Shahzad was arrested as he came minutes away from fleeing the U.S. when his Dubai-bound flight was returned to its gate at New York's Kennedy Airport and U.S. officials escorted him from the plane, along with two other men. Federal investigators at Shahzad's home have removed a fireworks box among other evidence at the property in Bridgeport, Conn. **The box**

is labeled "Silver Salutes." The fireworks are similar to the M88s authorities say were found among containers of gasoline and other materials left in an SUV meant to explode in Times Square. Shahzad is scheduled to appear in court Tuesday to face charges that he tried to set off a massive fireball and kill Americans after parking his car on a street lined with restaurants and Broadway theaters, federal authorities said. The U.S. attorney's office in Manhattan was handling the case against Shahzad, 30, but has not yet made the charges against him public. FBI agents searched the home at a known address for Shahzad in Bridgeport, Conn., early Tuesday, said agent Kimberly Mertz, who wouldn't answer questions about the search. Authorities removed filled plastic bags from the house overnight in a mixed-race, working-class neighborhood of multi-family homes in Connecticut's largest city. **A bomb squad came and went without entering as local police and FBI agents gathered in the cordoned-off street.** In all, three passengers were removed from Emirates Airline Flight EK202 late Monday night as Shahzad was taken into custody by FBI agents and New York Police Department detectives. **But Shahzad told investigators he acted alone and denied any ties to radical groups in his native Pakistan, a U.S. law enforcement official familiar with the investigation told Reuters.** Though Holder said Tuesday that Shahzad was identified by customs agents and taken into custody before boarding his flight, a representative for Emirates Airlines confirmed to Fox News that Flight 202 "was called back by the local authorities prior to departure," and that the three passengers who were removed had already boarded the plane. **"Full security procedures were activated including the deplaning of all passengers and a thorough screening of the aircraft, passengers, and baggage," the airline representative told Fox News. "Emirates is cooperating with the local authorities."** The plane was delayed about seven hours and took off for Dubai at approximately 6:30 a.m. ET. **Shahzad is a naturalized U.S. citizen and had recently returned from a five-month trip to Pakistan,** where he had a wife, according to law enforcement officials who spoke to The Associated Press on condition of anonymity because of the sensitivity of the investigation into the failed car bombing. Law enforcement officials say Shahzad became a U.S. citizen in April 2009 and passed all the criminal and national security background checks required for citizenship. The officials familiar with the inquiry say investigators plan to go through his citizenship application line by line to see if he lied about anything. He became a citizen in Hartford, Conn. Shahzad was being held in New York overnight and couldn't be contacted. A phone number at a listed address for Shahzad in Shelton, Conn., wasn't in service. **Law enforcement officials say Shahzad bought the SUV, a 1993 Nissan Pathfinder, from a Connecticut man about three weeks ago and paid cash.** The officials spoke to the AP on condition of anonymity because of the sensitive nature of the case. The vehicle identification number had been removed from the Pathfinder's dashboard, but it was stamped on the engine, and investigators used it to find the owner of record, who told them he had sold the vehicle to a stranger. As the SUV buyer came into focus, investigators backed off other leads, although Holder said U.S. authorities "will not rest until we have brought everyone responsible to justice," suggesting additional suspects are being sought. **The SUV was parked on Saturday night on a busy midtown Manhattan street near a theater showing "The Lion King." The explosive device inside it had cheap-looking alarm clocks connected to a 16-ounce can filled with fireworks, which were apparently intended to detonate gas cans and set propane tanks afire in a chain reaction "to cause mayhem, to create casualties,"** police Commissioner Raymond Kelly said. A metal rifle cabinet placed in the SUV's cargo area was packed with fertilizer, but NYPD bomb experts believe it was not a type volatile enough to explode like the ammonium nitrate grade fertilizer used in previous terrorist bombings. **Police said the SUV bomb could have produced "a significant fireball" and sprayed shrapnel with enough force to kill pedestrians and knock out windows. A vendor alerted a police officer to the parked SUV, which was smoking. Times Square, clogged with tourists on a warm evening, was shut down for 10 hours. A bomb squad dismantled the explosive device, and no one was hurt.** But Holder said Americans should remain vigilant. "It's clear," he said, "that the intent behind this terrorist act was to kill Americans." In Pakistan, Interior Minister Rehman Malik said authorities had not been formally asked for help in the probe. **"When the request comes, we will cooperate with the U.S. government," he told the AP. The Pakistani Taliban appeared to claim responsibility in videos that surfaced after the weekend scare, monitoring groups said, but police had no evidence to support the claims. More than a dozen people with American citizenship or residency, like Shahzad, have been accused in the past two years of supporting or carrying out terrorism attempts on U.S. soil, cases that illustrate the threat of violent extremism from within the U.S. Among them are Army Maj. Nidal Hasan, a U.S.-born Army psychiatrist of Palestinian descent, charged with fatally shooting 13 people last year at Fort Hood, Texas; Najibullah Zazi, a Denver-area airport shuttle driver who pleaded guilty in February in a plot to bomb New York subways; and a Pennsylvania woman who authorities say became radicalized online as "Jihad Jane" and plotted to kill a Swedish artist whose work offended Muslims (Fox News, 2010).**

**Title/Headline:** *Link Emerges Between Times Square Bomb Attempt And Pakistani Militant Group*

**Abstract:** Link emerges between Times Square bomb attempt and Pakistani militant group A member of the Al Qaeda-allied Pakistani militant group Jaish-e-Muhammad is being held by authorities in Pakistan. That man spent time with Faisal Shahzad, the person charged in the failed bomb plot, although sources say that does not mean Jaish-e-Muhammad engineered the plot. **One of the men arrested in Pakistan this week in connection with the failed attempt to bomb Times Square is a member of Jaish-e-Muhammad, an Al Qaeda-allied Pakistani militant group,** intelligence sources in the city of Karachi said Wednesday. The revelation marks the first indication that a specific Pakistani militant group has been associated with the case of Faisal Shahzad, the 30-year-old Pakistani American charged in the failed bomb plot. But it does not necessarily mean that the organization engineered the plot or directed the suspect. The intelligence sources requested anonymity because they were not authorized to speak to the media on the case. **The man arrested Tuesday in Karachi, Sheik Mohammed Rehan, allegedly drove with Shahzad from Karachi to Peshawar on July 7, 2009, in a pickup truck, authorities said. They returned to Karachi July 22. It is not known why they went to Peshawar and whether they met with anyone there. Peshawar is a large, mostly Pashtun city perched on the edge of Pakistan's tribal areas, where Al Qaeda, the Pakistani Taliban and other militant groups maintain strongholds.** It is also where Shahzad's father and other relatives live. Jaish-e-Muhammad emerged in the mid-1990s as a militant organization primarily focused on overthrowing Indian forces in the Indian-administered portion of Kashmir. Most of the violent attacks linked to the group have occurred in Kashmir, the disputed region claimed by India and Pakistan. Over the years, though, the group has expanded its reach and has trained thousands of young men to fight U.S. and NATO forces battling the Taliban in Afghanistan. It was also linked to the 2002 kidnapping and murder of Wall Street Journal correspondent Daniel Pearl in

Karachi. Based principally in Punjab province, the heartland of Pakistan, the group has been designated as a terrorist organization by the U.S. government and was banned by Pakistan in 2002. **But experts believe Jaish-e-Muhammad still benefits from links with Pakistan's powerful government intelligence community. Some experts believe Pakistan's Inter-Services Intelligence agency facilitated the group's formation. Authorities said they have not linked Jaish-e-Muhammad or any other militant group to two other men arrested Tuesday in Karachi in connection with the case.** Pakistani officials have not explained why those men — Tauseef Ahmed, a cousin of Shahzad's, and Ahmed's father-in-law — were detained. Pakistani authorities are continuing to investigate any potential link Shahzad might have with the Pakistani Taliban, the militant group based in the tribal areas that has beset the country with waves of suicide bombings and other terrorist attacks over the last two years (Rodriguez, 2010).

**Title/Headline:** *Beyond Times Square: The Threat From Pakistan*

**Abstract:** Not long ago, a bomb attack on New York City's Times Square would have had intelligence officials and terrorism experts checking off the usual suspects among the sources of terrorist plots against the U.S. — Afghanistan, Saudi Arabia, Iraq. **But these days, says a top counterterrorism official, "when I hear of a terrorist plot, I can count back from 10, and before I get to zero, someone will bring up the P word." That's P for Pakistan. Over the past couple of years, more plots against U.S. targets have emanated from or had a strong connection to Pakistan than any other country.** Says the counterterrorism official, who was briefed on the hunt for the Times Square bomber but is not authorized to speak with the media: "It was totally predictable that the smoking Pathfinder would lead to someone with Pakistan in his past." **Nor would it come as a surprise if it were revealed that Faisal Shahzad, who has claimed to investigators that he was working alone, was in fact linked to an ever lengthening list of extremist groups operating in Pakistan's northern wilds.** These groups, whose attacks had long been confined to the Indian subcontinent, are now emerging as a deadly threat to the U.S. and its allies. **As the core of al-Qaeda, led by Osama bin Laden, wilts under the constant pounding from the CIA's Predator drone campaign, Pakistani groups are mounting operations deep into the West. Such groups as Tehrik-e-Taliban Pakistan (TTP) and Lashkar-e-Taiba (LeT) have not yet notched major successes against U.S. targets to match Hizballah's bombings in 1980s Lebanon or al-Qaeda's destruction of two U.S. embassies in Africa in 1998.** But they have lately mounted operations of great audacity and sophistication. LeT has been operating in Europe for at least a decade, initially raising funds from the large Pakistani diaspora in countries like Britain and France and later recruiting volunteers for the jihad against Western forces. **At least one of the plotters of the 2005 London subway bombings was an LeT trainee, and British investigators believe the group has been connected to other plots in the U.K. The TTP, which claimed credit for Shahzad's failed bombing, was behind the suicide bombing that killed seven CIA agents in Afghanistan late last year.** And in 2008, in the most spectacular attack by a Pakistani-based group on Western targets, LeT bombed and shot up a railway station, a hospital, two five-star hotels and a Jewish center in Mumbai, killing more than 160 people, including six Americans. Afterward, Indian authorities scanning a computer belonging to one of the Mumbai plotters found a list of 320 targets worldwide; only 20 were Indian. Now, security officials fear, **Pakistani jihadis are spreading their operations across the Atlantic, recruiting U.S. citizens to their cause just as Britons were recruited a decade ago. If that assessment proves accurate, the Times Square bomb plot could be the first of more to come.**

**An Evolving Threat:** What are the wellsprings of Pakistani radicalism? In the 1980s, many fervently Islamic groups were set up in Pakistan to fight the Soviet occupation of Afghanistan. After the Soviet withdrawal in 1989, however, these groups and their spin-offs did not lay down their arms but instead turned their attention to Pakistan's old enemy, India. Encouraged by Pakistani civilian, military and intelligence authorities, LeT, Jaish-e-Mohammed and others refashioned themselves as freedom fighters in the cause of Kashmir, the Himalayan territory claimed by both India and Pakistan. **Pakistani officials regarded the jihadis as a proxy in their conflict with India, and Islamabad provided groups like LeT with land, funding and even military training, though it was understood that they could not attack targets in Pakistan or get involved in any operations against the U.S., Pakistan's ally.** Though there was some low-key cooperation between the Pakistani groups and al-Qaeda, it didn't merit much attention from Washington. After the attacks of Sept. 11, 2001, however, the Bush Administration began to look more closely into bin Laden's alliances. Washington pressured the Pakistani government of General Pervez Musharraf to crack down on LeT, Jaish and others, which by then were on the State Department's list of proscribed terrorist organizations. **But the government in Islamabad allowed the groups to continue operations — in December 2001, LeT attacked the Indian Parliament in an audacious move that nearly brought the two countries to war — with only cosmetic changes to their names.** LeT, for instance, merged with its charitable foundation, the Jamaat-ud-Dawah. Gradually, the Pakistani groups began to broaden their targets beyond the Indian enemy. LeT propaganda, for instance, began to focus on links, real and imagined, between India, Israel and the U.S. By the mid-2000s, the group's leader, a former Islamic-studies professor named Hafiz Muhammed Saeed, began to call for a jihad against the West using language similar to those of the fatwas issued by bin Laden and other al-Qaeda leaders. **LeT fighters began to venture out of their comfort zone, joining the fighting in Iraq. At the same time, a new group of radicals, the TTP, had begun to emerge along Pakistan's border with Afghanistan.** While LeT, Jaish and other older groups were dominated by Pakistan's majority Punjabi ethnic group, the TTP was overwhelmingly Pashtun, the dominant ethnic group in Afghanistan. And the TTP never had any qualms about challenging the Pakistani state as well as NATO troops in Afghanistan. **In 2007 its leader, Baitullah Mehsud, ordered the assassination of Benazir Bhutto and attacks on military targets; he also unleashed a wave of suicide bombings in Pakistani cities. While Pakistani authorities have continued to take a somewhat tolerant view of the Punjabi groups, their attitude toward the TTP is another matter. The army began to crack down on the group in 2008, and in the summer of 2009, a CIA drone took out Baitullah Mehsud. His successor, Hakimullah Mehsud, was thought to have been killed in another drone strike in January, but he re-emerged last week to claim responsibility for the Times Square attack.**

**Militants In Our Midst:** How plausible is that? U.S. officials were initially dismissive of the TTP's claims but began to reconsider once it emerged that Shahzad had been trained in bombmaking at a camp in Waziristan, which is Mehsud's stronghold. **There is no doubt that the TTP and other Pakistani groups are now recruiting among Americans.** Last October, the **FBI arrested a Pakistani American, David Coleman Headley, and a Pakistani Canadian associate, for plotting to attack the Copenhagen offices of a Danish newspaper that had published cartoons of the Prophet Muhammad.** More shockingly, the FBI said that Headley had been involved in the Mumbai attacks too (he had scouted out the hotels and the Jewish center for LeT) and was planning to bomb the U.S., British and Indian embassies in Dhaka, Bangladesh, before local authorities discovered the plot. **In March, Headley pleaded guilty to all charges; he is now waiting to be sentenced. The Headley revelations alarmed the Obama Administration's security team.** In January, Daniel Benjamin, the State Department's top counterterrorism official, said in a speech to the Cato Institute in Washington that "very few things worry me as much as the strength and ambition of LeT." **The next month, Director of National Intelligence Dennis Blair told the Senate Select Committee on Intelligence that LeT was "becoming more of a direct threat ... placing Western targets in Europe in its sights."** The TTP is certainly doing so. **In 2008, it plotted to bomb the public-transport network in Barcelona, though the operation was busted before it got much beyond the planning phase.** If Shahzad was indeed acting on Mehsud's instructions, then the TTP has come closer to successfully executing a large-scale operation on American soil than any group has since Sept. 11, 2001.

**Exporting Jihad:** It's fair to say that many analysts remain skeptical of the ability of a group like the TTP to operate outside Pakistan and Afghanistan. Mehsud lacks the kinds of networks cultivated by the Punjabi groups among Pakistanis living in the West. The TTP's fighters also tend to be poor, unsophisticated peasants from the mountains, ill equipped for foreign assignments. Besides, Mehsud and his fighters now find themselves under attack from the air (the CIA drones) as well as on the ground (the Pakistani military) and may not have the freedom to think big. **They're much more likely to seek U.S. targets close at hand: in April, the TTP attacked the U.S. consulate in the Pakistani city of Peshawar. But the TTP is working on ways to export terrorism. The group's training camps in Waziristan are a magnet for Western jihadis, including U.S. citizens. Once trained, some return home and become executors of the TTP's global ambitions.** It's likely that the camps attended by both Najibullah Zazi, who confessed to planning attacks on the New York subway system last year, and Shahzad, the alleged Times Square bomber, were run by the TTP. Others will no doubt follow in their footsteps. Ashley Tellis, a South Asia expert at the Carnegie Endowment for International Peace, says there's no reason to doubt Mehsud's determination to mount attacks in the U.S. "His group has taken very big hits from the drone campaign," he says. **"He's looking for payback. We have to watch the TTP very carefully."** LeT has the same intent but much greater capabilities. It has larger international networks and access to more sophisticated urban and educated recruits — people like Headley, who can move freely in American society. Its foreign operations tend to be better planned, often in collaboration with other groups, like al-Qaeda and Jaish. Perhaps LeT's greatest strength is the patronage it continues to receive from the Pakistani military and intelligence services. And it enjoys genuine popularity in large parts of the country, where it offers social services that the government cannot provide. **After the devastating 2005 earthquake in Pakistani-controlled Kashmir, LeT volunteers were often the first to arrive on the scene and provide valuable assistance. Like Hizballah in Lebanon, LeT and other Punjabi jihadist groups wield a combination of military and political power that makes them practically untouchable. How can the Pakistani groups be combatted? Bruce Riedel, a counterterrorism expert at the Brookings Institution in Washington, says the Administration's best bet is to launch a "global takedown" of Pakistani jihadi cells outside Pakistan, especially in Britain, the U.S. and the Middle East. "These external bases are the most threatening to us, much more than their operations in Pakistan," he says. As British authorities — who have had more experience with this challenge than those in the U.S. — know very well, such a takedown involves long, hard work by a host of law-enforcement agencies. And while the good guys are increasing their capabilities and understanding of the threats facing them, so are the bad guys. The Times Square bomb plot didn't go as planned. But as Riedel says, "We can't rely on them to be bad bombmakers forever"** (Ghosh, 2010).

**Title/Headline:** *Pakistan Taliban Source: Times Square Bombing Attempt Was 'Revenge Against America'*

**Abstract:** A top Afghan Taliban planner and organizer tells NEWSWEEK he wasn't surprised by the attempted car bombing in Times Square. **"We were expecting this,"** says the source, who operates on both sides of the porous Afghanistan-Pakistan border. He says the Pakistani Taliban—formally known as the Tehrik-e-Taliban—was hellbent on revenge after the Predator drone attack that killed its leader, Baitullah Mehsud, last August and the more recent strikes that nearly killed Baitullah's successor, Hakimullah Mehsud, this January. **"They were desperately looking for revenge against America inside America,"** says the source, who declined to be identified by name for security reasons. Hakimullah went deep underground immediately after the Hellfire missile attack in January, disappearing so completely that even his fellow militants thought he was dead. According to the senior Afghan source, he vanished not only for his own safety but also because he wanted to come back with a bang: **"Hakimullah wanted to announce his return with a successful bombing in America."** And sure enough, the same weekend Faisal Shahzad parked his potentially lethal SUV on Times Square, Hakimullah suddenly reappeared in an Internet video, announcing he was **"alive and healthy."** Shortly afterward a second video surfaced showing a still picture of Hakimullah standing next to a map of the U.S. marked with red symbols denoting explosions, over an audio track saying: **"Good news will be heard within some days or weeks ... The time is very near when our fedayeen [fighters] will attack the American states in the major cities."** The day after the attack, a scratchy Internet audio recording was issued in the name of Hakimullah's deputy, suicide- and car-bombing expert Qari Hussain, taking "full responsibility for the recent attack in the U.S.A." **A Pakistani Taliban spokesman quickly disowned the recording. Whether or not the recording was genuine, U.S. officials say suspicion is building that Shahzad had ties to Tehrik-e-Taliban—a connection that's also denied by the same spokesman.** The Afghan source says he's not sure. **"We have been hearing that the Tehrik-e-Taliban were expecting two or three attacks in America soon,"** the Afghan Taliban source says. "Shahzad may have been one of them." He says he has heard that one or two of the bombers have already recorded farewell "martyrdom videos" at Hakimullah's side. Nevertheless, the source admits he hadn't heard Shahzad's name mentioned in conversations

about the bombers. Nor does he believe Shahzad could have spent much time in the Pakistani Taliban's stronghold. "He couldn't have had full-scale training in one of their camps, because his bomb was so ineffective," he says. "He must have just passed through quickly." The Afghan says he worries about U.S. retaliation for the Times Square attack. **"The Afghan Taliban and many tribal elders thought they shouldn't claim responsibility, because it will only bring more American attacks on our areas," he says. "But Hakimullah doesn't care. He just wants to strike out"** (Yousafzai & Moreau, 2010).

**Title/Headline:** *Shahzad Had Contact With Awlaki, Taliban Chief, And Mumbai Massacre Mastermind*

**Abstract:** Accused Times Square Bomber Faisal Shahzad linked up with the Pakistani Taliban through the internet, ABC News has been told by law enforcement and intelligence sources close to the investigation. Once the Taliban identified him as more valuable in the U.S. than in Pakistan, they trained him to return to execute his bomb attack. But according to these sources, **Shahzad also had a web of jihadist contacts that included big names tied to terror attacks in the U.S. and abroad, including the figure who has emerged as a central figure in many recent domestic terror attempts - radical American-born Muslim cleric Anwar Awlaki. Besides Awlaki, sources say Shahzad was also linked to a key figure in the Pakistani Taliban, its Emir Beitullah Mehsud, who was killed in a drone missile strike in 2009.** The Mehsuds had been family friends of Shahzad, who is the son of a former high-ranking Pakistani military officer. Sources told ABC News that Shahzad was childhood friends with one of the alleged masterminds of the Mumbai massacre of 2008, in which more than 170 people died. Shahzad is also said to be linked to a man named Muhammed Rehan, whom Pakistani authorities reportedly have in custody. Sources said Rehan helped Shahzad travel to Peshawar and then to Waziristan and made introductions to the Taliban. **According to a person briefed on the FBI interrogation, Shahzad has told federal agents that he was angry at the CIA missile strikes carried out in Pakistan and suffered a personal crisis in his life. He has reportedly said he carried out the attempted bombing because he was under duress and that he feared for his family's safety if he didn't fulfill the mission. Shahzad has admitted to receiving bomb-making training and to loading a car with explosives and driving it into Times Square,** say U.S. authorities, and is providing valuable information that is helping officials round up possible accomplices. Seven men have been arrested in Pakistan in connection with the failed car bombing, including two in Karachi and five in Punjab Province. Shahzad's father-in-law has also been detained, and Shahzad's father, wife and children may be in protective custody. Shahzad, whose father was a high-ranking officer in the Pakistani Air Force, moved to the United States in 1998 (Esposito, Vlasto, & Cuomo, 2010).

**Title/Headline:** *Pakistani Taliban Are Said To Expand Alliances*

**Abstract:** The Pakistani Taliban, which American investigators suspect were behind the attempt to bomb Times Square, have in recent years combined forces with Al-Qaida and other groups, threatening to extend their reach and ambitions, Western diplomats, intelligence officials and experts say. Since the group's formation in 2007, the main mission of the Pakistani Taliban has been to maintain their hold on territory in Pakistan's tribal areas to train fighters for jihad against American and NATO forces in Afghanistan and, increasingly, to strike at the Pakistani state as the military pushes into these havens. Pakistan's military offensives and intensifying American drone strikes have degraded their capabilities. But the Pakistani Taliban have sustained themselves through alliances with any number of other militant groups, splinter cells, foot soldiers and guns-for-hire in the areas under their control. Those groups have "morphed," a Western diplomat said in a recent interview. **Their common agenda, training and resource sharing have made it increasingly difficult to distinguish one from another. The alliances have also added to their skills and tactics and list of shared targets. "They trade bomb makers and people around,"** a senior United States intelligence official said Thursday in an interview. **"It's becoming this witches' brew."** The senior intelligence official said that in recent years the overall ability and lethality of these groups had dropped, but that the threat to individual countries like the United States had increased somewhat because the groups cooperated against a range of targets. **Not least among the groups is Al-Qaida, which is exerting growing influence over the others. The Pakistani Taliban increasingly serve as its fig leaf, some experts said. "The Taliban is the local partner of Al-Qaida in Pakistan,"** said Amir Rana, the director of the Pakistan Institute for Peace Studies, who has tracked militant networks for years. **"It has no capacity for an international agenda on its own"** (Gall & Tavernise, 2010).

**Date:** May 7, 2010

**Title/Headline:** *Pressure On Pakistan Amid Fresh Terror Links*

**Abstract:** Alleged links between the Times Square plot and extremist networks are adding to perceptions of Pakistan as a global exporter of terror and increasing pressure on its military to crack down on extremists along the Afghan border. While Saturday's failed car bombing in New York could complicate improving ties between the United States and Pakistan, Washington's need for Islamabad's help in ending the war in Afghanistan is likely to limit any long-term fallout. Pakistan has promised to cooperate with the investigation and has detained at least four people with alleged connections to the sole suspect so far — Faisal Shahzad, a 30-year-old Pakistani-American who has reportedly told U.S. investigators he had visited Waziristan, a largely militant-controlled region close to Afghanistan. American officials have been quoted as saying they believe the Pakistani Taliban, which is based in Waziristan and has hitherto attacked Pakistani targets — not the U.S. homeland — had a role in the plot, either in funding or motivating and training. Successive failed plots in Europe and the United States since the 9/11 attacks have been traced back to the border region, many involving first- or second-generation Pakistani or other Muslim immigrants to the West. Shahzad evidently visited Pakistan

and had family and friends here, but many questions remain about the extent of his militant links in the country and whether they — rather than his experiences in America — were the major factor in his transformation from suburban respectability to alleged terrorist.

**Under Pressure:** Many experts doubt a significant role for the Pakistani Taliban, noting the amateurish nature of the bomb as well as the group's past practice of claiming responsibility for attacks in the United States it had nothing to do with. Still, the reported connections are already proving uncomfortable for Pakistan's military, which has been resisting calls to move forcefully into all parts of Waziristan because it does not want to antagonize powerful militant groups there that have so far attacked only targets in Afghanistan, not Pakistani cities. This week, the Pakistani army said it did not believe the Pakistani Taliban played a role and that it was too early to say whether Shahzad had visited Waziristan. Prior to the botched attack, **Obama administration officials had been praising Pakistani army efforts in the northwest, which have included a comprehensive operation in South Waziristan.** They had expressed sympathy with the army's stated reasons against moving into the north this year, namely a lack of troops and the need to consolidate gains elsewhere. That may be more difficult to keep up if it turns out the plot was hatched and masterminded from within the region. "This guy failed, but how many more are tied to Pakistan?" said Kamran Bokhari, an analyst with STRATFOR, a private security think tank in Austin, Texas. **"It puts pressure on Pakistan at a time when they thought things with the Americans were going well."**

**Border Movement:** Also likely to come under fresh scrutiny is Pakistan's reluctance to fully crack down on militant groups based outside of the northwest. Those detained over the Times Square incident are allegedly activists of Jaish-e-Mohammad, a group that was created by the Pakistan security agencies to battle Indian-rule in the Kashmir region. It and related organizations continue to operate fairly openly. Still, the U.S. has been careful not to antagonize Pakistan as it assigns blame for the Times Square plot. **The U.S. recognizes that Pakistan will likely have a major role in negotiating with elements of the Taliban to end the war in Afghanistan and ensuring stability — and a pro-American government — there when the United States finally withdraws.** Shaun Gregory, an expert on Pakistani security at the University of Bradford in Britain, said he believed this was now the main issue for the Obama administration and it had accepted it was unlikely to see major movement against Afghan Taliban factions sheltering on the Pakistan side of the border. **"Because of the bigger geostrategic concerns, this kind of thing (the Times Square attempted bombing) is just noise, it is marginal,"** he said. **"The key pressure is here to get the American troops out of Afghanistan. The hawks (in Washington) will bang drums, but I can't see that translating into a big offensive in Pakistan"** (MSNBC, 2010).

**Title/Headline:** *Secretary Of State Clinton's Global Mission*

**Abstract:** Scott Pelley spoke with Secretary Clinton at the State Department **"With the bomb in Times Square, I wonder what your message is to the Pakistani government?"** Pelley asked. "It's very clear. This is a threat that we share, we have a common enemy. There is no time to waste in going after that common enemy as hard and fast as we can and we cannot tolerate having people encouraged, directed, trained and sent from Pakistan to attack us," she replied. **"I'm not saying that they're at the highest levels but I believe that somewhere in this government are people who know where Osama bin Laden and al Qaeda is, where Mullah Omar and the leadership of the Afghan Taliban is and we expect more cooperation to help us bring to justice, capture or kill, those who attacked us on 9/11,"** Clinton said. "But we're not getting that cooperation," Pelley remarked. "Well, we are," Clinton replied. "The question is why is this administration not pressuring Pakistan to give up Osama bin Laden [or] his deputy Ayman al Zawahiri..." Pelley asked. "I have to stand up for the efforts the Pakistani government is taking. They have done a very significant move toward going after the terrorists within their own country," Clinton replied. "Even in light of the Times Square bomber, you are comfortable with the cooperation you are getting from the Pakistani government?" Pelley asked. "Well, now, I didn't say that. I've said we've gotten more cooperation and it's been a real sea change in the commitment we've seen from the Pakistani government. We want more; we expect more. **We've made it very clear that if, heaven forbid, that an attack like this, if we can trace back to Pakistan, were to have been successful, there would be very severe consequences,**" Clinton said. Asked what she meant exactly, Clinton said, "I think I'll let that speak for itself." "Developments to come," Pelley remarked. "Right," she replied. **"Nobody wants to see something tragic happen again. But we know that every single day the bad guys are out there and they want to come after us,"** Clinton said. **"This is becoming a trend. People used to ask why they hadn't attacked us in the United States since 9/11. The answer is now, 'They are.' And they're doing it every couple of months. And I wonder if there's anything about U.S. foreign policy that needs to change in your estimation to put more pressure on these terrorist groups where they live, like in Pakistan?"** Pelley asked. "Well, we are doing that. And we're increasing it. **We're expecting more from it. This is a global threat. We have probably the best police work in the world. But we are also the biggest target. And therefore, we just have to be better than everybody else,**" she replied (CBS News, 2010).

**Title/Headline:** *White House Says Pakistan Taliban Behind NY Bomb*

**Abstract:** Saying they obtained new evidence, senior White House officials said Sunday that the Pakistani Taliban were behind the failed Times Square bombing. The attempt marks the first time the group has been able to launch an attack on U.S. soil. And while U.S. officials have downplayed the threat — citing the bomb's lack of sophistication — the incident in Times Square and Christmas Day airline bomber indicate growing strength by overseas terrorist groups linked to al-Qaida even as the CIA says their operations are seriously degraded. **The finding also raises new questions about the U.S. relationship with Pakistan, which is widely known to have al-Qaida and other terrorist groups operating within its borders. Concerning the Pakistani Taliban, Attorney General Eric Holder said: "We know that they helped facilitate it; we know that they helped direct it. And I suspect that we are going to come up with evidence which shows that they helped to finance it. They were intimately involved in this plot."** John Brennan, the president's homeland security and

counterterrorism adviser, made similar remarks, linking the bomber to the Tehrik-e-Taliban Pakistan, or TTP. Neither official said what the new evidence was. **Faisal Shahzad, a U.S. citizen of Pakistani descent, is believed to have spent five months in Pakistan before returning to the United States in February and preparing his attack. Shahzad has told investigators that he trained in the lawless tribal areas of Waziristan, where both al-Qaida and the Pakistani Taliban operate.** He was arrested aboard an Emirates Airlines jet in New York just minutes before it was scheduled to take off for Dubai. After the attack, U.S. officials said they were exploring potential links to terrorist groups overseas but said it was likely that Shahzad was acting alone and that it was an isolated incident. Last week, Homeland Security Secretary Janet Napolitano, told NBC News that "at this point I have no information that it's anything other than a one-off." **Gen. David Petraeus told The Associated Press that Shahzad apparently operated as a "lone wolf."** Brennan on Sunday rejected suggestions that the attempted bombing shows that terrorist groups overseas were gaining strength. **"They now are relegated to trying to do these unsophisticated attacks, showing that they have inept capabilities in training," he said. The link between an attack on U.S. soil and terrorist groups operating inside Pakistan opens up a new chapter in relations between the two countries** (Flaherty, 2010).

**Date:** May 12, 2010

**Source:** New York Times, Nicholas D. Kristof

**Title/Headline:** *Pakistan And Times Sq.*

**Abstract:** "People with links to Pakistan have been behind a hugely disproportionate share of international terror incidents over the last two decades: the 1993 and 2001 World Trade Center attacks; Richard Reid's failed shoe bombing in 2001; the so-called Bojinka plot in 1995 to blow up 12 planes simultaneously; the 2005 London train and bus bombings; the 2001 attacks on the Indian Parliament; and attacks on two luxury hotels and a Jewish center in Mumbai in 2008. So it came as little surprise that the suspect in the attempted car bombing in Times Square, Faisal Shahzad, is a Pakistani-American. Why does an ostensible "ally" seem to constitute more of a threat than, say, Iran? Or Lebanon or Syria or Iraq? Or Egypt, birthplace of the Muslim Brotherhood brand of militant Islam? Or the West Bank and Gaza, where resentment of America's Middle East policies is centered?" (Kristof, 2010).

**Title/Headline:** *Is The "Times Square Terrorist" More Field-Based Warfare?*

**Abstract:** In March 2001, Indonesian Intelligence Chief Arie Kumaat asked American James M. ("Mel") Rockefeller to assess the Taliban's destruction of the two ancient Buddhas of Bamyan carved into a sandstone cliff in central Afghanistan 140 miles northwest of Kabul. Familiar with psychological operations (psy-ops) that involve lengthy pre-staging, Kumaat inquired of Rockefeller in Jakarta why that incident occurred at that time and place. Kumaat also noted the curious timing of two other operations: (a) **A Defense minister in India had recently been caught in a bribery scandal involving an Israeli company, and (b) that same Israeli firm attempted to bribe the Malaysian Defense Minister. Six months prior to 911, the motivation for the Bamyan incident was difficult to discern. In hindsight, we now know that high profile event branded the Taliban globally as Evil Doers. What about the bribes? The amounts involved were too small, Rockefeller suggested, to constitute real bribes. Rather, both were attempts to change key personnel though it was not yet clear to what end.** Since 911, the reason for the timing of those Israeli operations comes more clearly into focus. In national security parlance, the dynamiting of the Buddhas "prepared the mind" of a global public for whom the Taliban remained an obscurity until their extremism was branded by that well timed event. The bribes will be addressed in a subsequent analysis. Suffice it to say that both involved the pre-staging of "out-of-theater" operations.

**By Way of Deception:** For those skilled at Information Age warfare, the relevant battlefield is the public's shared field of consciousness. In that intangible realm, the power of association is routinely deployed to create lasting impressions as a means of mental manipulation. In preparing that 'field' for an emerging narrative, mainstream media depicted the incident at Bamyan as a "cultural Holocaust." Akin to the casting of a movie, by September 11, 2001, the intolerant Taliban had already been cast as a credible enemy of liberal democracies. **When the reaction to 911 triggered a global search for a plausible Evil Doer, the narrative quickly became a morality play with the U.S. pitted against extremists who hate our values. As a nation, we segued seamlessly from a global Cold War—against those who hate our values to a Global War on Terrorism—against those who hate our values.** The violence inflicted on the peaceful Buddhas of Bamyan also brought Taliban leader Mullah Mohammed Omar onto the battlefield of consciousness—where he remains. In the unfolding of this storyline, Omar became the oft-featured Epitome of Evil, akin to a Muslim Darth Vader from Star Wars films. Or Saddam Hussein in the lead-up to war in Iraq.

**Best Story Wins:** This brief overview of "field-based warfare" brings us to the latest incident in New York again featuring in a starring role Mullah Omar as leader of the "Pakistan Taliban." But first a brief review of three recent events. Keep in mind that when waging game theory warfare, it is not the incident but *the reaction* that advances the narrative. The cascade of reactions to an incident is what gains traction for a storyline when manipulating minds in that "field." See: **The first incident was the December 2007 murder of former Pakistan Prime Minister Benazir Bhutto. Mark Siegel, her Ashkenazim biographer and lobbyist, assured U.S. Secretary of State Condi Rice that the return to Pakistan of the corrupt but widely popular Bhutto was "the only possible way that we could guarantee stability and keep the presidency of Musharraf intact."** Pakistan President Pervez Musharraf had announced that an end to Israel's occupation of Palestine was critical to end the conflicts in Iraq and neighboring Afghanistan. That comment made him a target of those for whom that occupation has long served a strategic purpose. Bhutto's death was blamed on the Pakistan Taliban. **The reaction resulted in the replacement of Musharraf with Asif Ali Zardari, Bhutto's notoriously corrupt husband.** By our alliance with Zardari, the U.S. could be cast as extending its corrupting influence in the region. In August 2008, Ashkenazi General David Kezerashvili

returned to Georgia from Tel Aviv to lead an assault on separatists in South Ossetia with the support of Israeli arms and training. That out-of-theater crisis ignited Cold War tensions between the U.S. and Russia, key members of the Quartet (along with the EU and the UN) pledged to resolve the Israel-Palestine conflict. Russia was then negotiating an energy agreement with Iran. The incident in Georgia was the second of three prepare-the-mind events. Third was “India’s 911” in November 2008 when extremists recruited from the tribal regions of western Pakistan killed 173 and wounded more than 300 in Mumbai, India’s financial center. The attack included a hostel run by Chabad Lubavitch, an ultra-orthodox Jewish sect from New York. In response, Israeli Foreign Minister Tzipi Livni announced: **“Our world is under attack.”** Livni then argued: **“Israel, India and the rest of the free world are positioned in the forefront of the battle against terrorists and extremism.”** By its exclusion, Pakistan was indicted. By standing “shoulder to shoulder” with India (the signature phrase of former Prime Minister Ariel Sharon), Tel Aviv associated India with Israel’s victim status. The response to that attack drew Pakistani troops to its eastern border with India. That reaction left its Western tribal regions less well guarded and thereby plausibly more susceptible to extremist infiltrators from Afghanistan joining the Pakistan Taliban. By May 2009, Israel had delivered to India its first of three Phalcon Airborne Warning & Control Systems (AWACS). That arms sale shifted the balance of conventional air power in the region. That military alliance also confirmed what Israeli Prime Minister Benjamin Netanyahu announced: “Our ties with India don’t have any limitation....”

**Whose Pakistan Taliban?**: Now let’s turn to the latest incident—also attributed to the Pakistan Taliban. Keep in mind that when waging war on the battlefield of the public’s shared mind space, the power of association is routinely deployed as a form of weaponry. **The “Times Square terrorist” incident occurred at 6:30 pm on May 1<sup>st</sup>. That same day, reports emerged from London that more than 3,000 European Jews, including prominent intellectuals, had signed a petition speaking out against Israeli settlement policies and warning that systematic support for the Israeli government is dangerous. That statement garnered high praise from those aware of how peace in the Middle East has long been kept beyond reach by Israeli agent provocateurs.** Serial provocations around the settlements issue have long been a reliable catalyst for well-timed outrage that, in turn, is cited to again defer resolution of a six-decade conflict. Bernard-Henri Levy, a high-profile French writer, led that European effort. That development appeared quite positive when first announced. Then Levy began to appear as a commentator on television following the “Times Square Terrorism” as that incident was portrayed on the cover of *Newsweek*, a *Washington Post* magazine. Rather than promote the petition and the urgent need to solve the settlements issue, instead Levy offered his appraisal of the Times Square incident. **He described in depth how he studied what went on “inside the mind” of a Muslim Evil Doer who in 2002 slit the throat and then beheaded an American-Jewish reporter for *The Wall Street Journal*.** The Levy analysis injected into the “field” the most visually provocative image of the War on Terrorism featuring the epitome of both violence and extremist intolerance. Levy’s well-timed on-camera recitation refreshed in the public mindset the disturbing imagery of a Muslim Evil Doer who brutally murdered and dismembered a young professional with a pregnant wife. Levy’s described for the television viewer the mental state of the psychopathic Muslim profiled in his book *Who Killed Danny Pearl?* Where did this evil doing occur? In Pakistan.

**Is U.S. Foreign Policy Shaped From The Shadows?**: As Levy’s account was injected into the field at the same time as the Time Square Bomber, the U.N. Security Council then had under review a 15-year old proposal for a treaty that would create a Middle East free of nuclear weapons. The timing of these developments could be coincidental. Yet consider another possibility. Assume your numbers are few but your ambitions vast. **The confirmed facts point to the manipulation of U.S. foreign policy from the shadows with phony intelligence that induced the U.S. to invade Iraq in pursuit of a Muslim Evil Doer that had nothing to do with that incident. Is it possible that this latest incident had a strategic purpose that is not yet clear to the public? If, as the facts suggest, advisers to President Barack Obama are advancing a pro-Israeli agenda, could the timing of this incident be a means to exert influence from outside the White House? Could that be because their influence inside the White House has become apparent?** The facts suggest that Obama, as U.S. commander-in-chief, is feeling pressure from the military to change our policy on Israel. Did the timing of these “out of theatre” events help finesse that issue by refreshing a storyline that calls for the U.S. to lead a Global War on Terrorism? **Was this latest incident timed to provide a rationale with which our policy-makers can preempt Pentagon concerns about the effect of U.S.-Israeli policy on our troops in the field? How long ago would pro-Israeli White House insiders have known about the pending U.N. Security Council consideration of a treaty that could force Israel to forfeit its nuclear weapons? When was the Times Square Terrorist recruited by the “Pakistan Taliban”? Is this how a war-making narrative is sustained, using well-timed crises staged in a nonlinear fashion such that their common origin is diffused in the “field”? Could that explain the well-timed murder of Benazir Bhutto by the “Pakistan Taliban”? Could that explain the well-timed destabilizing impact on Pakistan of the recent “911” attack on Mumbai using operatives recruited and trained in Pakistan? Was this too the “Pakistan Taliban”? In a televised May 10<sup>th</sup> interview, General Stanley McChrystal explained that winning the current war in the Middle East requires a “change in perception.” Is that the purpose of these well-timed crises? Are they meant to refresh our fear of the “Pakistan Taliban”? The displacement of facts with false beliefs induced us to invade Iraq consistent with a narrative that was revitalized by this latest well-timed “incident.” **Is the American public again being manipulated by those skilled at managing perceptions? Is this incident a high profile example of field-based warfare being waged on America? Are we in the midst of another psy-ops? Is that possible? Could there be a sufficient critical mass of like-minded operatives in positions of influence capable of inducing enough minds to freely embrace another war that is not in our interest? Is it possible in the Information Age that psy-ops could operate on such a scale? Is there sufficient collateral support in key decision-making quarters to again deceive an entire nation in plain sight yet, to date, with legal impunity? Pakistan has long been an ally of the U.S. So was Iraq. Likewise Iran was an ally in recent history. Where are we to find this purported “Axis of Evil”? Does its source reside in nation-states? Or does this evil reside in the mental state of those skilled at manipulating the minds of others to wage war on false pretenses?****

**The People In Between:** In an October 2007 speech, Defense Secretary Robert Gates identified “the people in between” as the most problematic combatant when waging “unconventional warfare.” The facts suggest that such warfare is only “unconventional” for those targeted. For the aggressor, this form of warfare is standard operating procedure. Those waging war from the shadows imbed their operatives in that realm “in between” a targeted populace and the facts they require for a system of governance reliant on informed consent.

By displacing facts with false beliefs, mental manipulation can proceed in plain sight. **Between a deceived American public and the facts they required to assess whether to wage war in Iraq were legions of pro-Israeli operatives. Many of those operatives are imbedded in media, a key in-between domain essential for success in field-based warfare. Thus, for example, the critical agenda-advancing role played by CNN's Wolf Blitzer. He even branded his broadcasting set "The Situation Room" to lend White House-associative credibility on a network branded as "the most trusted name in news."** Likewise *New York Times* "reporter" Judith Miller who featured on its front page the false intelligence provided by Ahmed Chalabi, head of the credible-sounding "Iraqi National Congress." This Iraqi expatriate and London-based Iraqi liar served as a reliable and pliable Israeli asset developed over two decades by pro-Israeli operatives, including Richard Perle who in 2001 became chairman of the U.S. Defense Policy Advisory Board. **This form of Information Age treason could only succeed if hidden in plain sight. Today's fast-paced velocity of information ensures that media impressions now shape political agendas. Thus the importance of "the people in between" in manipulating U.S. foreign policy.**

**Out-of-Theater Repositioning: Pro-Israelis in the Obama administration could no longer directly shape Middle East policy after General David Petraeus, head of Central Command, complained to the Joint Chiefs about the adverse impact of the U.S.-Israeli relationship on U.S. interests in the region. Could that explain the utility of an "out of theater" incident to refresh the narrative?** That may explain the timing of an incident in a high-profile venue (Times Square) featuring a power-of-association component (New York) that could plausibly be attributed to Pakistan as a source of violent Islamic extremists. The control wielded in Washington by the Israel lobby remains little known to mainstream Americans. As our representatives in what was meant to be a representative system of governance, the U.S. Congress now epitomizes "the people in between." The accountability of Congress to the broader population—or even to our troops in the field—is now out of the question. **Meanwhile those who deceived the U.S. to war in Iraq are working to induce us to war in Iran—or Pakistan. If the consensus storyline cannot be sustained, the consequences are clear. If the War on Terrorism loses credibility, the resulting stability will provide Americans with the breathing space required to identify the real enemy. And to begin rooting out a deeply entrenched treason.**

**This Can Only End Badly:** Meanwhile business-as-usual continues in plain sight. The day after Israel was admitted to the Paris-based Organization for Economic Cooperation and Development (OECD), Prime Minister Benjamin Netanyahu charged that Iran is provoking Israel to wage war with Syria. When President Shimon Peres denied this week that Israel would go to war with Syria, he meant that Syria is the likely rationale for the next crisis. **When on May 11<sup>th</sup> he declared in Moscow that nuclear terror is the world's greatest threat, rest assured that game theory war planners in Tel Aviv have in place a plausible plan for blaming such an incident on Iran-backed Hezbollah.** The same day that "proximity talks" began, the Palestinians confirmed that Israel had another settlement underway in East Jerusalem. **The next day, the Israeli minister for public safety announced that Israel will demolish Arab homes in East Jerusalem. On May 12<sup>th</sup> ("Jerusalem Day"), the U.S.-based Conference of Presidents (of Major American Jewish Organizations) took a full-page ad in *The New York Times* to proclaim "Jerusalem in the Heart of the Jewish People."** Meanwhile, Netanyahu announced from Israel, "We will never divide Jerusalem." When this Likud Party leader calls for peace while insisting on conditions that make peace impossible, rest assured that more provocations are planned. The latest storyline in search of traction: Syrian-provided poison-gas missiles pose a threat to Israel from Lebanon-based, Iran-backed Hezbollah. As the war on terrorism is rebranded, it is not yet clear how the Pakistan Taliban will be worked into the narrative. **All we know for certain is that Muslims will remain the Evil Doers in this storyline. And that Israelis will once again be cast as hapless victims. Anticipating a tactical need to collapse another government, Israeli politicians are in discussions about an alliance between the Kadima Party and the Labor Party.** When the latest Likud coalition falters, the resulting political instability will inject into the field the requisite "entropy" for Israel to continue on its current path without a government with whom other nations can negotiate. What is the endgame for those once again defrauding the nation that befriended this enclave six decades ago and has since defended their interests without question? What happens when Americans understand the depth and duration of this duplicity? **And when the U.S. military confirms the common source of this ongoing treason? What happens when a long-deceived global public grasps what this entangled alliance has cost them in blood and treasure over the past 62 years? What Next for The People in Between?** The most recent Sunday edition of *The New York Times* is filled not with hopes of a nuclear-free Middle East but with fears of the future horrors inflicted on Americans by Muslim Evil Doers. **That storyline is reinforced on television by a reminder of the horrors inflicted on Danny Pearl. Meanwhile it's made to appear that pro-Israeli moderates are busily working to restrain extremists in the Likud Party. That too is part of the storyline. The Big Question is this: is anyone still buying it? Meanwhile the Big Sell continues.**

**The Sunday *New York Times* featured page after page marketing fear and insecurity:**

- The front page featured a large photo of U.S.-born Islamic cleric Anwar al-Awaki who advised a series of alleged Evil Doers whose photos were also prominently displayed:
- Nidal Malik Hasan, the Fort Hood shooter.
- Umar Farouk Abdulmutallab, the Christmas Day Bomber.
- Faisal Shahzad, the Times Square Bomber

The featured article consumed two full inside pages. There was no news coverage—none—of the pending U.N. proposal to free the Middle East of nuclear weapons. **The front page of the commentary section in the national paper of record included two major articles. The first article warned that this enemy "may mutate and even grow."** The second analysis explored "when to suspend fear." The book review section featured "Trials of the Diaspora: A History of Anti-Semitism in England," and "Heidegger—The Introduction of Nazism into Philosophy." **The only mention of the pending U.N. proposal for ridding the Middle East of nuclear weapons appeared in the lead editorial titled "Fixing the Treaty." The editors' assessment of Israel giving up its nuclear weapons: "That is not going to happen any time soon."** To successfully wage war in the shared field of consciousness, an enemy must hide in plain sight. Otherwise,

those deceived cannot be induced to believe. There lies the fast-emerging peril for those complicit in this ongoing treason. As the common source of this duplicity becomes transparent, its operatives are becoming apparent (Gates, 2010).

**Source:** The Washington Examiner, Associated Press, Eva Vergara, Federico Quilodran

**Title/Headline:** *Chile Cops Raid House Of Embassy Detainee's Friend*

**Abstract:** Police found traces of an explosives material on clothes seized at the home of a Pakistani who was detained after the same substance was detected on documents and a cell phone he carried on a visit this week to the U.S. Embassy, Chile's state television said Thursday night. National prosecutor Sabas Chahuan said that "I think there is a crime" and that after the investigation into Mohammed Saifur Rehman Khan is complete authorities "will have concrete results." Khan, 28, is being held for a week under Chile's anti-terrorism laws while being investigated for alleged explosives violations. **He was summoned to the U.S. Embassy on Monday because his U.S. visa had been revoked, and he was arrested after security equipment detected traces of explosives on his phone and papers.** Khan's public defender, Francisco Geisse, said evidence thus far "doesn't show the existence of a crime." State TV said on the evening news that crime lab personnel had identified the material as Tetryl, a compound used to increase the explosive power of TNT. Police in white suits also took away Khan's computer earlier this week. The television report said investigators were looking for five more people known to Khan for questioning. Police spent hours on Thursday searching the apartment of an Egyptian man who was friendly with Khan. **Officers dressed head-to-toe in white anti-contamination suits carried out a computer, compact discs, an agenda and a cell phone, police said. The Egyptian man who reportedly befriended Khan at a Santiago mosque was not seen by reporters, and police released no information about him.** Colleagues and acquaintances have described Khan as calm and gentlemanly and say he doesn't fit the popular image of a terrorist. **At Santiago's EuroHotel, where Khan earned about \$115 a month in a work-study position, workers were puzzled by the turn of events, which came just over a week after the failed car-bomb attempt in New York's Times Square that has been blamed on a Pakistani man.** "He was a complete gentleman, very proper, like the gentlemen of old," said Alex Garcia, head of the hotel's reception and reservations. "Someone who is a hotelier recognizes when another person knows the profession, and Khan knew it. He had a vocation for service and was very attentive," said Garcia, adding that Khan seemed "tranquil, very correct and educated, speaking about five languages." Khan came to Chile in January to study Spanish and the hotel industry after staying with his brother, a doctoral student at Michigan State University, for a month last year, according to the Pakistani Embassy. **"We have many questions and few answers," said Pakistani Ambassador Burhanul Islam, who promised legal and consular support to Khan. In Santiago, Garcia worked with Khan daily for almost a month and was also his Spanish instructor. Khan said he was born in Pakistan on Aug. 21, 1982, and told of being the son of a retired doctor and from a middle-class family, Garcia said. "I think his father ... must have sent him money,"** Garcia said. Mohammed Rumie, secretary-general of Chile's Islamic community and spokesman for the As-Salam mosque, told The Associated Press that Khan "came every Friday to the mosque, like all Muslims." "He didn't appear a conflictive or problematic person — quite the opposite, he was very silent, very calm," Rumie said. Asked about reports that Khan belonged to Islam's Salafi movement, Rumie said he did not know where the reports had come from and that his As-Salam mosque doesn't adhere to such movements. The Salafi movement preaches an ultraconservative Islam similar to Saudi Arabia's Wahhabi strain, strictly segregating the sexes and interpreting religious texts literally. **Salafis tend to be nonpolitical, but a minority jihadist stream embraces al-Qaida's call for holy war against the West.** The U.S. ambassador to Chile, Paul Simon, said there was no indication that the embassy was the target of an attack. Khan was detained nine days after Faisal Shahzad, a Pakistan-born U.S. citizen, allegedly tried to set off a bomb-laden SUV in Times Square after receiving training from the Taliban in Pakistan. But by then, the U.S. had already decided to revoke Khan's visa, State Department spokesman Mark Toner said. **"This issue predates the Times Square incident and we are not aware of a connection between the two," he said. State Department spokesman P.J. Crowley said the U.S. government will cooperate fully with the Chilean investigation of Khan. "There were solid grounds for apprehending him and he will be charged under Chilean laws," Crowley said. The Pakistani Embassy said Khan had been called to the U.S. Embassy "to have an interview regarding his documents, in particular his passport and his academic certifications."** Khan "denied the accusations that he possessed explosive materials and the charges of links to terrorist organizations," the statement said. "The Embassy has not received any details regarding (criminal) charges or any solid evidence that establishes that Saifur Rehman (Khan) has any link with a terrorist organization or that he has the intention of committing a terrorist act at the U.S. Embassy in Santiago," the statement added. **"He would have to be a very bad terrorist to enter the embassy with traces of explosive material, knowing that the embassy is a dangerous place where he would face serious accusations if he were caught,"** Islam said. Khan briefly spoke to reporters through the window of a police vehicle before he was taken to the high-security prison where he is being held under Chile's anti-terrorism law. **"No, I am not a terrorist. I do not have nothing to do with bombs. I am a working man," he said in strongly accented English** (Vergara, & Quilodran, 2010).

**Title/Headline:** *3 In Custody May Have Supported Bomb Suspect*

**Abstract:** Three Pakistani men taken into custody during a series of raids across the Northeast as part of the investigation into the failed Times Square car bombing may have provided money to the man who has admitted carrying out the unsuccessful attack, Attorney General Eric H. Holder Jr. said Thursday. At one of the homes searched on Long Island, Mohammad Iqbal, a limousine driver in New York City, said seven or eight F.B.I. agents arrived at his two-story red brick home in Shirley at 6 a.m. and stayed until 11:30 a.m. **They questioned him about whether he had any knowledge of the Times Square plot. They also asked about an old friend of his: Mohammad Younus, the target of the search in Centereach. Mr. Younus had lived with him for "a couple of months" during a fight with his wife four years ago, Mr. Iqbal said. They had become friends when they worked together at a 7-Eleven. He did not think Mr. Younus was involved with the plot and said he was still confused as to why the agents had come to his house. "I answered all their questions," he said, adding that the agents were polite and respectful and did not take anything with them from his home. The searches**

in New Jersey were focused on the same man, whose home and business, a printing press sales company, were both searched, according to one person briefed on the matter. The house that was searched in Watertown is across the street from the local middle school and next door to a housing development for the elderly on a tree-lined street of mostly two-family homes. Neighbors said about 15 to 20 F.B.I. agents with guns drawn approached the house between 6:15 and 6:30 a.m. Sirens blared, helicopters circled overhead and agents yelled, "F.B.I.! Don't move!" and "F.B.I.! Put your hands up!" **"When I looked out the window, they all had their guns pointed at the house," said Barbara Lacerra, who lives across the street. Later, agents wearing raid jackets from Immigration and Customs Enforcement could be seen leading a handcuffed man to an unmarked car. "They had him in handcuffs and shackles," Mrs. Lacerra said. "He was very calm and had his head down."** She said she also saw agents take computers out of the house. Another neighbor, who would not give his name, said two men "with connections to Pakistan" had lived in the top floor of the house for a few months. The neighbor said he had seen law enforcement officials conducting surveillance at the house for about a week. The men who live there are auto mechanics, the neighbor said, and often tinkered with a Honda in a driveway behind the house. The neighbor said one of the men works at a Mobil station in Brookline — one of the locations of the searches (Rashbaum & Shane, 2010).

**Title/Headline:** *Prosecution Rests In Trial Of 5 Americans Charged With Planning Terror Attacks in Pakistan*

**Abstract:** The prosecution concluded its case Saturday against five Americans on trial in a Pakistani court facing life sentences after being charged with planning terrorist attacks in the South Asian country. The men — all Muslims in their late teens or early 20s from the Washington suburb of Alexandria, Virginia — have pleaded not guilty to five charges. The accused were given a last chance to respond to the prosecution before the defense presents its side on June 9, prosecutor Nadeem Akram said. In a written statement, the men said the charges against them were trumped up and police planted discriminating evidence. **"We just wanted to go to Afghanistan to help our Muslim brother on humanitarian grounds," they said. The prosecution presented 19 witnesses and evidence including e-mail contacts allegedly with the Pakistani Taliban, and receipts of money they allegedly donated to banned militant groups in Pakistan,** Akram said. There was a "strong case" for conviction in the trial being heard by one judge, he said. The case is among several of foreigners allegedly signing up to join insurgents. U.S. and Pakistan are continuing to investigate the Pakistani-American suspect in the botched Times Square bombing on May 1. Family members have said Faisal Shahzad never exhibited signs of extremism, raising questions as to why men who spent much of their lives in the West would seemingly be drawn to militant Islam. **The five men were arrested in Pakistan in December after being reported missing by their families. One had left behind a farewell video showing scenes of war and casualties and saying Muslims must be defended. Pakistani police have publicly made several accusations against the young men, claiming the suspects contacted Pakistani-based jihadi groups. They accused the five of using the social networking site Facebook and video-sharing site YouTube while they were in the U.S. to try to connect with extremist groups in Pakistan. Their lawyer has said they were heading to Afghanistan and had no plans to stage attacks inside Pakistan.** The trial is taking place inside a high-security prison in the eastern city of Sargodha and media have not been allowed to cover the proceedings. **The men have been identified as Ramy Zamzam of Egyptian descent, Waqar Khan and Umar Farooq of Pakistani descent, and Aman Hassan Yemer and Ahmed Minni of Ethiopian descent (Fox News, 2010).**

**Title/Headline:** *Next Big Terrorist Attack On US Will Be Postmarked 'Pakistan': CIA Analyst*

**Abstract:** A former CIA analyst, who helped President Barack Obama formulate his Pakistan-Afghanistan policy, sees **"a very serious possibility that the next mass casualty terrorist attack on the United States will be postmarked Pakistan."** **"What we're seeing going on in Pakistan now is a very dangerous phenomenon," says Bruce Riedel, Senior Fellow, Brookings Institution, in an interview with the Council on Foreign Relations, a Washington think tank. "The ideology of al Qaida, the ideology of global Islamic jihad that all jihadists should focus on the United States as the ultimate enemy, is gaining ground with groups beyond al Qaida,"** said Riedel, who chaired a special interagency committee last year to develop Obama's Af-Pak policy. Obama and previous Bush administrations have been pressuring Pakistan for years to shut down completely the jihadist Frankenstein that was created over three decades in Pakistan, Riedel said. But **"no Pakistani government has yet been willing to take on the entire network of terrorist groups."** US Secretary of State Hillary Clinton has also raised questions about some in the Pakistani government still retaining links to al Qaida, the Afghan Taliban, the Pakistani Taliban, Lashkar-e-Taiba and a host of other groups. **"We saw this in 2008 in Mumbai, when Lashkar-e-Taiba attacked Mumbai and attacked American and Israeli targets," Riedel said noting "Those are the targets of al Qaida and the global Islamic jihad."** **"We've now seen the Pakistani Taliban try to launch an attack on the United States of America for the first time,"** he said referring to the arrest of Pakistani-American Faisal Shahzad in connection to the failed car bombing in New York's Times Square. **"This spreading of the idea of global Islamic jihad is very dangerous and as it gets deeper and deeper into the extremist groups in Pakistan it means we can expect more attacks like the one we saw at Times Square, and we can expect them to become increasingly sophisticated and more capable,"** Riedel said. Clinton has warned of "severe consequences" for Pakistan in the event of a successful Pakistan-based terrorist attack in the United States. **But US options to act against Pakistan are "severely limited," Riedel said arguing**

the best option is "to get Pakistan to do more now" in its fight against extremism, he says, by providing more weapons and technological aid (The Times Of India, 2010).

**Title/Headline:** *Pakistani-Americans And Police Sharing, And Trying To Spread, Trust*

**Abstract:** Last month, a resident of Avon, Conn., received a threatening letter full of religious references. The police chief there, Mark Rinaldo, wondered whether the letter implied a broader threat from a Muslim militant. **He called Dr. Atique A. Mirza, a Pakistani-born Muslim cardiologist, who studied the letter for cultural, religious and political clues. They concluded that the threat probably involved a narrow dispute between neighbors. Now that a Pakistani-American man from Connecticut, Faisal Shahzad, stands accused of trying to detonate a car bomb in Times Square, setting off soul-searching and unease among the state's thousands of residents of Pakistani descent, Mr. Rinaldo and Dr. Mirza are holding up their relationship — built over three years of meetings and cooperation between Pakistani-Americans and law enforcement — as a model for communities across the state and the nation.** The comfort level is such, said Mr. Rinaldo, that Dr. Mirza "wouldn't be insulted and say, 'Why are you calling me,' " nor would the chief doubt Dr. Mirza's analysis. **"That's the trusting relationship we are looking for," said Dr. Mirza, who has formally assumed the role of Avon's police-community liaison for the Pakistani American Association of Connecticut (Paact), which has similar representatives in 13 towns and hopes to increase the number to 70.** Paact's work makes Mr. Shahzad's case all the more upsetting to Dr. M. Saud Anwar, a pulmonologist who founded the group. He has played a role in the investigation, acting as liaison between the authorities and a Pakistani friend of Mr. Shahzad's who feared talking to them. The friend provided e-mail messages that may shed light on Mr. Shahzad's views on violence. But Dr. Anwar wishes the attempt could have been stopped before it began, something he calls possible in future cases if cooperation between his community and the authorities increases by another "order of magnitude." **"This is not, God forbid, to spy on people, but just to live your life the way it is and if you notice something that concerns you, speak up," he said, speaking to about 100 Connecticut residents of Pakistani descent and representatives of the F.B.I., the State Police and a dozen police departments who gathered Saturday at the Ramada Inn in Stratford. "This is someone who lived among us and under the radar without anybody in the community knowing he was radicalized."** Paact moves beyond reminding law enforcement not to unfairly paint all Muslims as terrorists — though it still strongly takes that position. It also calls on Pakistani-Americans to acknowledge that people of Pakistani descent have been implicated in high-profile terrorist attacks, to probe the causes and in the process to remind the public that they want security as much as other Americans do. **Dr. Mirza's wife, Faryal, an endocrinologist, took a similar approach when her son was called "terrorist" in school several years ago. She began giving annual diversity classes, in which she offered Pakistani food and talked about her culture and religion. She also goes out of her way to let patients know she is Pakistani, so they associate the country with something other than terrorism. Although she could have argued that the burden of explaining culture should not fall on her, she said, "We have to be proactive."** Now Paact hopes to franchise its approach to other states. On June 19, the group is holding a national conference in Hartford on radicalization and prevention, featuring the Pakistani ambassador, representatives of the National Counterterrorism Center, theologians and others. Saturday's meeting focused on the narrower question of how it could have been that people did not seem to remember Mr. Shahzad from a mosque or a dinner party, let alone alert the authorities about him. Dr. Mirza said it pointed to a need to rethink the atomization of suburban culture: **"Know your neighbors; say hi; help them when they need you; be attentive."** Mr. Shahzad may have isolated himself from mosques and Pakistani organizations, but he must have had some connections; he was married to a Pakistani-American and lived in Bridgeport, where there is a relatively large Pakistani-American population, said Jaleel Rahman, a retired real estate agent. **"We have to be more vigilant," Mr. Rahman said. Zaheer Sharaf, Paact's president, said that many Pakistanis were afraid of the police, because they believe that police officers in their original country are corrupt.** Add to that the post-9/11 fear that reporting a suspicion about a Muslim might lead to an overreaction by the authorities, and it made for a wide gulf between Pakistani-Americans and the police forces that Mr. Rinaldo, the police chief of Avon, said he was unaware of until he began meeting with Dr. Mirza and others. His reaction: "Wait a minute. We're the good guys. We have to open up to this community." **This month, he said, he was upset to see negative reactions to Pakistani-Americans after Mr. Shahzad's arrest. "It seems to be one individual, yet a whole community is suffering for the crime," Mr. Rinaldo said. "It's not fair."** Mateen Haider, 56, an engineer from South Windsor, said that Pakistanis, like all immigrants, simply want to fit in, so they are loath to do anything that could draw attention, including call the police. **"That is no longer enough," he said, telling the meeting: "Today is a great day. We have spoken out. We are all united together as citizens, and we will fight this to the end"** (Barnard, 2010).

**Title/Headline:** *U.S. To Press Pakistan On Bomb Plot Inquiry*

**Abstract:** The White House is dispatching two senior national security aides to Pakistan this week to press the government there to intensify efforts to investigate the failed Times Square bomb plot and prevent others like it, administration officials said Monday. Gen. James L. Jones, the national security adviser, and Leon E. Panetta, the C.I.A. director, left Washington on Monday night, in the highest-level American visit to Pakistan, the authorities say, since Faisal Shahzad, a naturalized Pakistani immigrant, drove a crude car bomb into Times Square on May 1. A senior administration official said General Jones would not threaten the Pakistanis, but would convey the risks to the country's relationship with the United States if a deadly terrorist attack originated there. He plans to prod them to take tougher steps against the Taliban and other insurgent groups, the official said. The American officials and their Pakistani counterparts are expected to compare information collected by each side on the Times Square case, examine what vulnerabilities it reveals, and decide what additional military, law enforcement and intelligence-gathering actions need to be taken. **"In light of the failed Times Square terrorist attack and other terrorist attacks that trace to the border region, we believe that it is time to redouble our efforts with our allies in Pakistan to close this safe haven and create an environment where we and the Pakistani**

people can lead safe and productive lives,” Michael A. Hammer, a National Security Council spokesman, said by e-mail Monday night. While General Jones’s specific requests were not clear, the senior administration official said he might ask Pakistan’s military to push harder into North Waziristan, the main base for the Pakistani Taliban, Al Qaeda and other militant groups. **Mr. Shahzad, 30, has told investigators that he trained in North Waziristan, but Pakistan has said it is still preoccupied trying to hold South Waziristan and Swat. “There is creeping frustration,” said the administration official, speaking on the condition of anonymity because he was not authorized to speak publicly. “Some people are asking, ‘Why are they not going into North Waziristan?’”** Among the other possible American requests, this official said, were more intense surveillance of suspected terrorists and allowing more American military advisers to operate in Pakistan. The United States is also proposing to open a new consulate in Quetta, in southwestern Pakistan, where the C.I.A. would likely have a sizable presence. **“Panetta’s devoted a lot of time and energy to building strong relationships with the Pakistanis, and it’s paid off in terms of their cooperation,”** said another American official, who was not authorized to discuss the trip. The official said Pakistani investigators “have done some good work on the Shahzad case, too, and it’s important for them to have as fresh a picture as possible of how the United States views the threat from the tribal areas.” American intelligence officials have expressed growing concern about the increasingly intertwined network of Islamic extremist groups operating in and around Pakistan’s tribal areas. Soon after the failed attack, Pakistani authorities arrested Muhammad Rehan, who they said had spent time with Mr. Shahzad during a recent visit to the Pakistani city of Karachi. Mr. Rehan was arrested in Karachi at a mosque known for its links with the militant group Jaish-e-Muhammad. **“Shahzad was able to connect with people in Pakistan who traveled with him to North Waziristan and back,”** said another official who has been briefed on the inquiry. **“How he did that without the Pakistani intelligence service knowing about it is a worry.”** The official suggested this indicated that the Pakistani Taliban was working with other Islamic militant groups to facilitate their training, logistics and operations. **“These guys have been able to subcontract ways around detection,”** he said. The administration is treading carefully to avoid a repeat of the negative reaction in Pakistan to Secretary of State Hillary Rodham Clinton’s recent warning that there would be “very severe consequences” for Pakistan if there were a terrorist attack originating from there. **Instead, the administration sees the Times Square plot as a reason to push the Pakistanis to do several things it has long desired. “Sometimes things like this are an opportunity,”** the official said (Schmitt & Landler, 2010).

**Title/Headline:** *Time Square Bomb Suspect Had Multiple Targets, Source Say*

**Abstract:** Alleged Times Square bomber Faisal Shahzad had multiple targets in the New York area, and was planning to wreak havoc in four other locations if his first, botched attack had been successful, a source told MyFoxNY.com. Shahzad, who authorities say left a car bomb in Times Square on May 1, had also hatched plots against other high-profile targets in and around New York City: Rockefeller Center, Grand Central Terminal, the World Financial Center — just across from Ground Zero — and the Connecticut-based defense contractor Sikorsky. A source told MyFoxNY that Shahzad picked out the exact date and time to maximize the effect of the bomb by watching streaming videos online from Times Square. Shahzad determined that the landmark attraction is busiest on Saturday nights at 6:30 p.m., and planned an alternate date for Saturday, May 8. **Shahzad, 30, slowly bought the ingredients for his makeshift bomb over an extended period of time because his connections in a bomb-making training camp in Pakistan taught him to avoid raising suspicions, the source said. Shahzad purchased a green Nissan Pathfinder on Craigslist and packed the vehicle with fertilizer, gasoline, methane and fireworks, authorities say, though the homemade bomb failed to explode. Shahzad also bought a second vehicle through Craigslist — a black Isuzu rodeo — from a mechanic in Stratford, Conn., who was questioned and cleared by the FBI, and is not a suspect, the source told MyFoxNY. Sikorsky, the defense contractor allegedly targeted by Shahzad, is headquartered in Stratford and manufactures helicopters for the U.S. military. The company also has facilities in Shelton and Bridgeport — the same two cities where Shahzad has lived (Fox News, 2010).**

**Title/Headline:** *Two Pakistani Students Pose 'Serious Threat' But Can Stay In UK*

**Abstract:** Britain's counter-terrorism strategy was thrown into turmoil today when a judge ruled that two Pakistani students posed a serious threat to national security but could not be deported because of the risk they would be tortured or killed in their own country. **A special immigration court ruled that Abid Naseer was an al-Qaida operative who remained a serious threat, while his friend Ahmed Faraz Khan had been radicalised before coming to the UK and was willing to participate in terrorist activity.** Neither man was allowed to see the evidence upon which the court reached its decision, and nor was their solicitor. **After they had been publicly identified as terrorism suspects, the court also ruled that it was not possible for them to be deported to Pakistan, where terrorism suspects face torture or death.** Mr Justice Mitting, chair of the Special Immigration Appeals Commission (Siac), said that in Pakistan “there is a long and well-documented history of disappearances, illegal detention and of the torture and ill-treatment of those detained, usually to produce information, a confession or compliance”. Theresa May, the home secretary, expressed disappointment at the ruling. She said: **“We are now taking all possible measures to ensure they do not engage in terrorist activity.”** Home Office ministers and senior security officials considering the implications of the ruling for Britain's counter-terrorism legislation. Since in law the two men cannot be jailed without trial, it appears certain they will be subjected to control orders – measures the Liberal Democrats condemned before the election as a “Kafkaesque” violation of the right to a fair trial. Mitting's decision came after a police and MI5 operation marred by failings and mishaps that triggered the resignation of the country's most senior counter-terrorism detective and resulted in public criticism of Greater Manchester police by the government's anti-terrorism legislation watchdog. Human rights groups say the judge's comments about Pakistani human rights abuses will make uncomfortable reading for senior figures in the last government, which encouraged Islamabad to detain and interrogate British citizens, using questions drawn up by British intelligence officers and police – a practice lawyers condemned as complicity in torture. **“Siac gave a clear nod to the authorities that if the [Pakistani] Inter-Services Intelligence stops torturing suspects then it would be possible to deport people to Pakistan. International co-operation has to be based on shared values, not**

**just shared intelligence,"** said Shami Chakrabarti, the director of civil rights group Liberty. The ruling also raises questions about the use of secret evidence. The men's solicitor, Gareth Peirce, condemned the decision as "the worst of all possible worlds", as they had been branded terrorists on the basis of material they could not see or challenge. "It's no victory, even though the young men have won," Peirce said. "They have been stigmatised for life and put at risk or even further risk in their own country on the basis of the shocking phenomenon of secret evidence. It's no way to conduct justice. **If people have committed a crime, put them on trial."** **Naseer and Khan, both 23, were among 11 men, all but one Pakistani, arrested in April last year amid fears they were planning a bomb attack in Manchester. They came under suspicion because MI5 believed Naseer, a computing student at John Moores University in Liverpool, had links with al-Qaida, and that emails he sent, in which he mentioned a *nikkah*, or Muslim marriage contract, were a signal that an attack was imminent. "Hi Buddy," one email read. "My mates are well and yes my affair with Nadia is soon turning in to family life. I met with Nadia family [sic] and we both parties have agreed to conduct the Nikkah after 15th and before 20th of this month." The court accepted, from evidence heard in secret, that the recipient of the emails was an al-Qaida terrorist," "There is a longterm continuing threat [to Britain] and this is part of the narrative of that threat,"** a senior security source said. The arrests were brought forward after the assistant commissioner, Bob Quick, the head of Scotland Yard's counter-terrorism command, was photographed in Downing Street clutching clearly visible secret documents revealing details of the investigation.. After being seized at addresses in Manchester, Liverpool and Clitheroe in Lancashire, the men were held for two weeks then released without charge. **The 10 Pakistani nationals were immediately detained again on national security grounds. After several months in prison, all but Naseer and Khan left the UK voluntarily, still protesting their innocence, and complaining the arrests had ruined their reputations and damaged their education.** After an inquiry, Lord Carlile, the terrorism legislation watchdog, said that none of the arrests had been made "on a full evidential foundation", and that "the authorities had no specific information as to where the suspected terrorist event was to occur, nor any precise knowledge as to its nature". **Some of the group had been arrested simply because they were associates of others, he said. But police were "probably right" to mount a large-scale operation, with gunpoint arrests in public places. A third member of the group, Shoaib Khan, 31, who appealed against deportation after returning to Pakistan, won his case after the court said he was not a "knowing party" to Naseer's plans. Tariq ur Rehman, 39, and Abdul Wahab Khan, 27, lost appeals to return to the UK, with the court ruling they had been knowing participants. If the government were to resort to control orders to restrict the activities of the two men, it would represent a remarkable volte-face for the Liberal Democrat members of the coalition government: few other counter-terrorism measures have been so reviled by the party's leadership. Speaking in 2007, for example, Nick Clegg, now deputy prime minister, asked : "How can it be right to impose what amounts to home detention without giving suspects any evidence for such a measure?" Two years later Clegg was warning that they represented "a slippery slope" that threatened to lead to further erosions of personal freedom. Last January, Chris Huhne, right, then the party's home affairs spokesman, fumed: "It is an affront to British justice and the freedom people have fought and died for to place people under de facto house arrest without even telling them why." Two months later Huhne condemned the orders as Kafkaesque, a bad dream and a nightmare, that were "a violation of fundamental rights and an expensive failure to boot"** (Cobain & Norton-Taylor, 2010).

**Date:** May 18, 2010

**Source:** Telegraph, Duncan Gardham, Gordon Rayner

**Title/Headline:** *Arrest Of 'Easter Bombers' Led To International Al-Qaeda Network*

**Abstract:** Over the following weeks and months agents would gather evidence which left no doubt that Muslim fanatics were not only planning to blow up shopping centres in Manchester, but were also connected to a planned attack on New York's transport network which would have been the worst US atrocity since 9/11. Operation Pathway, as the investigation was codenamed, began in February last year, when MI5 began looking at a Muslim man in his forties living in the inner-city area of Cheetham Hill, Manchester. The man was working in a hair products company where he had access to bomb making materials, causing instant concern. His roommate, Abid Naseer, had arrived in Britain from Pakistan on a student visa two years earlier, exploiting a system he knew well from working at an office in Pakistan where he handed out advice for John Moores University in Liverpool. Once in Britain, Naseer, 24, and his co-conspirators dropped out of their courses and began work as a security guard, maintaining their student status by signing up for bogus courses at the Manchester College of Professional Studies. MI5 noted that Naseer and others spent a lot of time at the Cyber Net café in Cheetham Hill, and GCHQ began monitoring their emails. Analysts believed the emails were in code and that Naseer was telling an al-Qaeda contact in Pakistan about the availability of different bomb-making materials, substituting girls' names for chemicals. "I saw a slight glimpse of Huma day before yesterday," he wrote in one, "but she was very weak and difficult to convince...Nadia is more gorgeous than Huma at the moment and she is easy to befriend...Nadia is crystal clear girl and it won't take long to relate with her...What do u suggest my friend?" The contact in Pakistan replied offering "any kind of help" and adding: "pay my salam [greetings] to all students...take care," suggesting that Naseer was not working alone. In another, he wrote: "You know Gulnaz and Fozia. WOW man. I would love to get them in my friends list but you know I have been thinking about their abilities. "Gulnaz sounds ok but she is found [sic] of money and in order to approach her I must find work to save money." Naseer also referred to a car, saying "girls mostly like guys with car," leading to suspicions of a car bomb attack, while references to a wedding were thought to refer to the day of the planned bombings. He added: "I am trying to include as many as possible in ceremony when it take place." Then on April 3, Naseer wrote to his contact: "Hi Buddy...I met with Nadia family and we both parties have agreed to conduct the nikah [wedding] after 15th and before 20th of this month." Suddenly, it became clear that the men might be just days away from carrying out a terrorist "spectacular" over the Easter weekend. Assistant Commissioner Bob Quick of the Metropolitan Police and his MI5 counterparts decided the suspects had to be rounded up before it was too late, and they planned a series of simultaneous 2am raids in Manchester, Liverpool and Lancashire. But when Mr Quick went to Downing Street on April 8, the day before the planned raids, to brief Gordon Brown and the then Home Secretary Jacqui Smith, he committed the cardinal sin of walking in with the plans clearly visible to photographers, risking the entire operation. Hundreds of police officers across the north west had to be scrambled to round up the 12 men that afternoon, and all were held within the space of an hour. At Liverpool John Moores University, students used mobile phone cameras to film the dramatic arrest of one suspect by armed officers outside a library. Other raids were carried out in the Wavertree area of Liverpool; at the Cyber Net café in Cheetham Hill, Manchester; in Galsworthy Avenue, Manchester, where Naseer was

held, and on the M602 motorway between Manchester and Eccles, where one man was pulled out of a white van. More than 30 miles from Manchester, in the unlikely setting of a new Homebase store which was due to open for the first time the following day, more than 80 police officers swooped to arrest two men working as security guards. **A series of raids on addresses linked to the 12 men were also carried out, and although no explosives were found, and no charges could be brought, the security services were in no doubt that they had foiled a major attack on the UK.** As part of their raids, police recovered pictures taken of one man outside the Arndale shopping centre in central Manchester on different days, and including a number of different angles to show the street around the shops and the exits. **MI5 and its foreign intelligence counterpart MI6 then set about tracking down who Naseer had been in contact with in Pakistan.** After identifying the man they believed had been in email contact with Naseer, their inquiries led them to Najibullah Zazi, an Afghan-born suspect living in Aurora, Colorado, who was working as an airport shuttle driver and who had begun hoarding large quantities of hydrogen peroxide, a key ingredient for homemade bombs. US investigators concluded he had been planning an attack on New York on the 2009 anniversary of 9/11 and the US Attorney General Eric Holder said Zazi's plot was **"One of the most serious in the United States since September 11, 2001."** MI5 believes the al-Qaeda commander behind the plots in Britain and the US was Rashid Rauf, a terrorist from Birmingham who was also behind the plot to blow up airliners over the Atlantic in 2006. He had risen through the ranks of al-Qaeda through his involvement as a link-man in the July 7, July 21 and airlines plots. Increasingly starved of western recruits, Rauf came up with a plan in 2008 to use Pakistani and Afghan-born militants who were to be sent to the West posing as students, sources have told the Daily Telegraph. **Rauf is believed to have been planning a series of attacks on a shopping centre in Manchester, the New York metro and Long Island Railroad. The first element of the plan was uncovered when an American called Bryant Neal Vinas was detained in Peshawar in November 2008. Vinas, a Muslim convert of Latin American origin, had been in Pakistan since 2007 where he admitted receiving training from al-Qaeda, meeting Rashid Rauf and agreeing to become a suicide bomber as part of a plot to blow up a train on the Long Island Railroad. Around the same time, at the end of 2008, the Americans tracked down Rauf, killing him with a Predator missile fired from an unmanned drone. But it was only after the arrests of the 12 suspects in Manchester and Liverpool that the rest of Rauf's plan was finally revealed (Gardham & Raynew, 2010).**

**Title/Headline:** *CIA Chief Briefs Pakistan On Times Square Suspect*

**Abstract:** The CIA director briefed senior Pakistani officials Wednesday on the investigation into the failed Times Square car bombing and praised the country's cooperation, a statement from both sides said. A Pakistani-born American has been arrested on suspicion of masterminding the May 1 botched bombing and has allegedly told investigators he trained under the Pakistani Taliban in the largely militant-held region of Waziristan, close to the Afghan border. U.S. officials have praised a series of offensives against the Pakistani Taliban and allied groups in the border areas over the last two years. But the Times Square incident has added to pressure on the army to move into North Waziristan, a region it has previously largely left alone. **The visit by CIA Director Leon Panetta and U.S. national security adviser former Gen. James Jones was the first since the failed attack.** The two men met with President Asif Ali Zardari on Wednesday afternoon, said presidential spokesman Farhatullah Babar. They were also scheduled to meet with Pakistan's spy chief and other officials. **"Jones expressed appreciation for the excellent cooperation the United States is receiving from Pakistan," the statement said. "The talks covered measures that both countries are, and will be, taking to confront the common threat we face from extremists and prevent such potential attacks from occurring again."** Pakistani officials have said very little about the investigation. Anonymous officials say several people connected to the suspect, Faisal Shahzad, have been picked up, but they gave no information on what role — if any — they played in the attack. **The Pakistani Taliban, which have previously not conducted attacks on U.S. soil, have been the target of several Pakistani army offensives over the last two years and been battered by scores of American missile strikes. They are allied to al-Qaida and the Afghan Taliban just across the border.** As many as 60 militants and two soldiers were killed in fighting Wednesday in the Orakzai tribal region, said Samiullah Khan, an administrator in the office of the political agent in the region. He gave no more information and it was not possible to independently confirm the fighting. Orakzai has seen intense battles between the army and militants over the last month that have killed several hundred insurgents, officials say. **The region is off-limit to journalists. The army has not moved into the North Waziristan region in part because powerful insurgent commanders there have generally not attacked targets in Pakistan and the army is unwilling to antagonize them. In recent months, however, fleeing fighters and commanders from the Pakistani Taliban — which have launched scores of bloody suicide attacks around the country since 2007 — have moved there (Brummitt, 2010).**

**Title/Headline:** *Pakistani Major Among 2 New Arrests In Bombing*

**Abstract:** An army officer and a businessman have been detained as part of a widening inquiry into a circle of Pakistanis who had some knowledge of the activities of the man charged with trying to set off a crude car bomb in Times Square, according to a Western official and an American intelligence official. **The army officer was arrested in Rawalpindi, the garrison city that serves as the headquarters of the Pakistani Army, the American intelligence official said. He appeared to have been disaffected, and his involvement with Faisal Shahzad, the Pakistani-American charged with the failed bombing in New York, did not signal the involvement of the Pakistani Army in the attack,** the intelligence official said. The arrest of the officer, who holds the rank of major and whose name was not disclosed, and of Salman Ashraf Khan, 35, an executive of a catering company that organized functions for the American Embassy here, suggested the participation of a group of Pakistanis in helping Mr. Shahzad after he returned to Pakistan from the United States last year to plan the bombing, the officials said. Several other Pakistani men have been arrested in the Islamabad area in connection with the case, according to a Pakistani intelligence official who did not offer details about the men's backgrounds. A senior Pakistani official said Friday that Mr. Khan and the army major were among several Pakistanis being questioned in

connection with the Times Square case. Investigators were still sorting out exactly what role, if any, each individual played in helping Mr. Shahzad develop and plan the attack, the official said. The arrest of the army major, which was first reported by The Los Angeles Times, raised questions of whether the Pakistani Army harbored some officers and soldiers sympathetic to the cause of the Pakistani Taliban, the militant group that Mr. Shahzad has told American investigators trained him for his bombing attempt. Mr. Shahzad has said he traveled to North Waziristan, a major base for the Pakistani Taliban, to prepare for the attack. **The Pakistani Army has conducted a series of offensives against the Pakistani Taliban in the past year, and the arrest of an officer for working surreptitiously against that policy would be considered an embarrassment for the army, which is the country's most powerful institution.** The spokesman for the Pakistani Army denied earlier this week that an officer had been detained in the Times Square case. **He said that an officer had been arrested because he had declined to fight, for religious reasons. Pakistani officials have been reluctant to discuss the Times Square bombing case, and when they have done so they have played down any involvement of the Pakistani Taliban, choosing instead to depict Mr. Shahzad as a lone operator.** The nation's premier spy agency, Inter-Services Intelligence, is in charge of the investigation of the case, Pakistani officials have said. Like Mr. Shahzad, the catering executive, Mr. Khan, attended college in the United States. **He appears to have been part of a loose network of middle-class, educated Pakistani men here in Islamabad, the capital, who assisted Mr. Shahzad in planning the Times Square attack. The investigation and arrests in Islamabad appeared to concentrate on this informal network, which is suspected of having helped to recruit Pakistanis living abroad who wanted to return home to train for terrorist attacks,** a Western official said. They appeared to be motivated by a strong belief in jihadist causes and a hatred of the West, the official said. **The network appears to have included Mr. Khan and a close friend, Ahmed Raza Khan, who, like Mr. Khan, was arrested in Islamabad on May 10, Mr. Khan's father, Rana Ashraf Khan, said. Mr. Shahzad is the son of a retired senior Pakistani Air Force officer, and it appeared that the arrested army major was an acquaintance of Mr. Shahzad's father, according to a British terrorism expert, Sajjan Gohel, who is familiar with the investigation into the Times Square bombing.** The major may have helped Mr. Shahzad get in touch with the Pakistani Taliban and may have helped him travel to North Waziristan, Mr. Gohel said. Mr. Khan's arrest became public on Friday, after the **United States Embassy warned American residents in Pakistan to avoid using his company, Hanif Rajput Caterers, because "terrorist groups may have established links" to it.** The embassy sent an e-mail message with the warning and posted it on the embassy's Web site. Mr. Khan disappeared May 10, when he failed to arrive at the company headquarters after leaving his house in his car, his father, who is the company's chief executive, said in an interview in Islamabad. Mr. Khan graduated from the University of Houston in 2000, having majored in computer science, and then returned to Pakistan to work in the family's catering business, his father said. **Since graduating, he had not returned to the United States and he was married three years ago, his father said. Rana Ashraf Khan described his son as religious, but "definitely not an extremist."** Asked if his son had negative feelings toward the United States, he said: "To be honest, yes. But that is common." "I am shocked," he said of the accusation that his son was connected to the Times Square bombing, saying that his son had organized 900 catering events in the last six months, some for as many as 2,000 guests. The father said his son and his son's wife lived with him in the family home in Islamabad. Mr. Khan left the home for work at his usual time, about 11 a.m., on May 10, the father said. He never reached the office, according to the account. About noon, a man turned up outside the family's house in Mr. Khan's car, parked it and then left in a waiting taxi, the father said. **A dinner for 20 people, booked by a senior American diplomat for Saturday night, was suddenly canceled Friday by the United States Embassy, said Fahim Khan, the company's sales manager.** Until several years ago, when security at the embassy was tightened, the company catered the annual ball for the United States Marines, he said. The notice circulated by the United States Embassy came two days after the national security adviser, Gen. James L. Jones, and the head of the Central Intelligence Agency, Leon E. Panetta, arrived in Islamabad to share leads with the Pakistani government on the investigation into the Times Square case. The elder Mr. Khan, who founded the catering company, said that despite frequent requests, the Pakistani authorities had refused to disclose his son's whereabouts (Perlez, 2010).

**Title/Headline:** *Terror Plot Prompts U.S. To Weigh Military Option In Pakistan*

**Abstract:** In response to a report that the U.S. military is developing plans for a unilateral attack on the Pakistani Taliban in the event of a successful terrorist strike in the United States that can be traced to them, a U.S. official said it makes sense to thwart terrorists "in the most aggressive ways possible." "Jones [National Security Adviser Jim Jones] and Panetta [CIA Director Leon Panetta] seemed to make a strong impression on the Pakistanis, especially when it came to the TTP links to the Times Square plot," the unidentified official told Fox News. **"The Pakistanis understand that our enemy is their enemy, too." Planning for a retaliatory attack was spurred by ties between alleged Times Square bomber Faisal Shahzad and elements of the Pakistani Taliban,** The Washington Post said in an article posted on its website Friday night, quoting unidentified senior military officials. **The military would focus on air and missile strikes but also could use small teams of U.S. Special Operations troops currently along the border with Afghanistan,** the Post said. Airstrikes could damage the militants' ability to launch new attacks but also might damage U.S.-Pakistani relations. The CIA already conducts unmanned drone strikes in the country's tribal regions. **Officials told the Post that a U.S. military response would be considered only if a terrorist attacks persuaded President Barack Obama that the CIA campaign is ineffective.** A senior U.S. official told The Associated Press on Wednesday that Pakistan already has been told that it has only weeks to show real progress in a crackdown against the Taliban. **The U.S. has put Pakistan "on a clock" to launch a new intelligence and counterterrorist offensive against the group, which the White House alleges was behind the Times Square bombing attempt,** according to the official. U.S. officials also have said the U.S. reserves the right to strike in the tribal areas in pursuit of Osama bin Laden and other high-value targets. At the same, the **Obama administration is working to improve ties with Pakistani intelligence officials to head off attacks by militant groups,** the Post reported. Officials quoted by the Post and the AP requested anonymity because of the sensitivity surrounding U.S. military and intelligence activities in Pakistan (Fox News, 2010).

**Title/Headline:** *Minister: Pakistani Extremist Groups Join Taliban, Al-Qaeda*

**Abstract:** Pakistani Interior Minister Rehman Malik said Sunday that several banned extremist groups have now become part and parcel of Taliban and al-Qaeda to destabilize the country. Malik said that members of the outlawed extremist groups, Lashkar Jhangvi, Jaish Muhammad and Sipah-e-Sahaba, received training in northwest Pakistan's Waziristan tribal region and have now formally joined Taliban and al-Qaeda. "They had been in hiding in southern parts of Punjab and now have surfaced and expanded their terror network upto Balochistan province," the interior minister told reporters after visiting worship places of the minority sect Ahmadis, which were attacked by gunmen and suicide bombers on Friday. A spokesman of the Ahmadis, a sect which was declared non-Muslim in Pakistan in 1974, said that 93 of its members were killed and over 100 others injured in the attacks on two of their worship places in Lahore, the capital of Punjab province. **Punjabi Taliban had claimed responsibility for the massacre and a statement from the media center of the Pakistani Taliban, Tehrik-e-Taliban Pakistan (TTP), in email to media organizations on Saturday praised the Lahore attackers.** The interior minister said that 40 percent of the militants are from southern parts of Punjab who are involved in attacks on Shiite Muslims and minority Christians and Ahmadis. **Malik said he has called a high level meeting in Islamabad next week to chalk out strategy to eliminate the growing threat to minorities from the banned groups and Taliban,** adding that provincial police chiefs and home secretaries will attend the meeting. He said the government has also planned to introduce in the parliament a "Minority Protection Bill" to protect religious minorities in Pakistan. **The minister said the government has also decided to register around 20,000 religious seminaries with 17,000 registered so far** (Xinhau News, 2010).

**Title/Headline:** *Al Qaeda's No. 3 Believed Killed In Pakistan*

**Abstract:** Reporting from Washington — — Al Qaeda's third-ranking leader — a close associate and relative by marriage to Osama bin Laden — is believed to have been killed in a U.S. drone strike in Pakistan's tribal region, U.S. officials said. The death of Sheik Said Masri, an Egyptian who is believed to act as the terrorist network's operational leader, would be **the latest blow to Al Qaeda, which has suffered a steady degradation of its leadership and ability to mount attacks since the U.S. stepped up its campaign of missile strikes by unmanned aircraft in Pakistan's tribal region.** "We have strong reason to believe" that Masri is dead, a U.S. official said, speaking on condition of anonymity because he was discussing intelligence information. "He was key to Al Qaeda's command and control. His death would be a major blow." **Masri, also known as Mustafa Abu Yazid, was believed to play a role in most of Al Qaeda's operations, including its finances and its continuing attempts to mount attacks. He is also thought to have been the key conduit to Bin Laden and his No. 2, Ayman Zawahiri, both of whom are thought to play a minimal role in the network's day-to-day activities because of their need to remain in hiding.** "Masri was the group's chief operating officer, with a hand in everything from finances to operational planning," the U.S. official said. Like some other militant leaders, **Masri has been erroneously reported dead in the past. U.S. officials discussed Masri's apparent death Monday after a statement began appearing on extremist websites announcing that he had been killed in Pakistan.** It did not confirm how he was killed but said that his wife, three daughters and others were killed at the same time, according to the SITE Institute, a private group that monitors militant websites. The statement claimed that Masri had been training Al Qaeda operatives to carry out future attacks. **"What he left behind will, with permission from Allah, continue to be generous and copious and to produce heroes and raise generations. His death will only be a severe curse by his life upon the infidels. The response is near."** U.S. officials would not discuss the reports that Masri's family members had been killed in the drone strike. **He is thought to have married into Bin Laden's family in the years since the two arrived in Afghanistan** (Cloud, 2010).

**Title/Headline:** *'Pakistan Harboring Mullah Omar'*

**Abstract:** A former senior member of the militant group says Pakistani security forces are harboring the fugitive Taliban leader, Mullah Omar in Karachi. Mullah Abdul Salam Hanafi told an Afghan news website that Mullah Omar is now in the Pakistani city of Karachi. Hanafi was the governor of central Uruzgan Province under the Taliban regime. The developments come as the US and its allies intend to remove Mullah Omar from the black list in a bid to provide a suitable seedbed for holding contacts. Senior officials in the UK have spread the idea of making peace with the Taliban -- the militant group whose uprooting was ostensibly one of the main objectives of the 2001 US-led invasion. **Omar, the founder of the Taliban, was Afghanistan's de facto head of state from 1996 to 2001. He was unseated in the 2001 US-led invasion of Afghanistan. However, the US forces have not yet managed to apprehend Omar, or al-Qaeda leader Osama bin Laden after the elapse of nine years.** Hanafi also claimed that the foreign troops and Taliban are engaged in a complicated game in Afghanistan. He said British troops trained Taliban forces and paid each militant three-hundred dollars per month.

The former official said Taliban members supported by the UK live freely in Helmand province and have never been a target of attacks. **He says British forces told him that they plan to stay in Afghanistan for the next 40 years** (Press TV, 2010).

**Title/Headline:** *Report Says Pakistan Intelligence Agency Exerts Great Sway On Afghan Taliban*

**Abstract:** Pakistan's main intelligence agency continues to provide financing, training and sanctuary to Afghan Taliban insurgents and exerts a far greater influence on Taliban strategy than previously thought, according to a report prepared by the London School of Economics. Drawing on interviews with Afghan Taliban commanders and former Taliban ministers and officials, the report suggests that Pakistan's premier intelligence service, the **Inter-Services Intelligence agency, or ISI, supports the Taliban insurgency as a matter of official policy to contain the influence in Afghanistan of its rival India.** Both serving and retired officials from the Pakistani intelligence agency are carrying out that policy, the report says. Although many of the specifics of the report could not be independently verified, the bulk of its conclusions are very much in line with what Afghan officials, and some Western officials, have often alleged: that Pakistan has maintained its longstanding relationship with the Afghan Taliban to retain its influence in Afghanistan. **The Afghan intelligence chief, Amrullah Saleh, who resigned last week after an insurgent attack on a peace convention in the capital, Kabul, described Pakistan as his country's "enemy No. 1."** Officials in the Afghan government work closely with NATO and American security officials, and the groups share intelligence. **"This is not a big surprise. This is consistent with 15 years of history," said Bruce Riedel, a former C.I.A. analyst and now a senior fellow at the Brookings Institution. "Life has not changed. The Taliban and the ISI have a very intimate relationship."** Pakistan has had close relations with the Afghan Taliban since the group's formation in 1994, but Pakistani involvement with the insurgency against the international coalition in Afghanistan since 2001 has been both high-level and coercive, the author of the report, Matt Waldman, contends. **Mr. Waldman is a fellow at Harvard University who worked in Afghanistan previously for the humanitarian organization Oxfam. "Without a change in Pakistani behavior, it will be difficult if not impossible for international forces and the Afghan government to make progress against the insurgency,"** he wrote. An official from Inter-Services Intelligence, based in Islamabad, Pakistan, dismissed the report as "rubbish," and the report does not include any corroboration from Pakistani officials. **"It's not even worth commenting upon,"** the official said by telephone, speaking on condition of anonymity in keeping with the policy of his agency. **"It's speculative, and degrading."** He called the report's allegation that President Asif Ali Zardari met with imprisoned Taliban insurgents and pledged Pakistan's continued support **"completely outrageous."** That accusation was second-hand and several analysts said it was unlikely to be true. An American policymaker for the region said the inclusion of such a charge raised questions about the rest of the report. **"I am skeptical of this sort of sensational discovery that seems to do better than U.S. intelligence,"** said the official, who asked not to be named. The report quotes from interviews with nine insurgent field commanders, who say that ISI operatives sit in on meetings of the Taliban leadership council, often known as the Quetta shura, which consists of a dozen or so members and meets several times a year in and around the Pakistani southwestern town of Quetta. Afghan security officials and an adviser to the Afghan government working on persuading members of the Taliban to reconcile with the government have also said that ISI agents are known to sit in on the Quetta shura meetings as observers. **The ISI also exerts pressure on Taliban commanders, arresting those who step out of line, or threatening arrest if they do not follow established parameters of Taliban strategy, the report says.** That allegation matches statements by Afghan and NATO officials, who have been working in recent months on ways to persuade Taliban insurgents to reconcile with the Afghan government. **They have said that the threat of arrest or detention of family members by Pakistani intelligence is a major obstacle for insurgents considering defecting.** "You can believe all of that is happening," one NATO official said in an interview. The report says several Taliban commanders received training in large madrasa complexes in Pakistan from Pakistani military and ISI agents. **The ISI had a role in the genesis after 2001 of the insurgent group headed by Jalaluddin Haqqani and his sons that has mounted some of the most damaging attacks in Kabul, according to the report.** Among the Taliban commanders interviewed was one senior Haqqani commander of 1,000 fighters who also described the significant influence of the ISI over the group. **"Pakistan appears to be playing a double game of astonishing magnitude,"** Mr. Waldman concludes (Gall, 2010).

**Source:** BBC

**Title/Headline:** *Pakistani Agents 'Funding And Training Afghan Taliban'*

**Abstract:** Pakistani intelligence gives funding, training and sanctuary to the Afghan Taliban on a scale much larger than previously thought, a report says. Taliban field commanders interviewed for the report suggested that ISI intelligence agents even attend Taliban supreme council meetings. Support for the Afghan Taliban was "official ISI policy", the London School of Economics (LSE) authors suggest. Pakistan's military denied the claims. A spokesman said the allegations were "rubbish" and part of a malicious campaign against the country's military and security agencies. The LSE report comes at the end of one of the deadliest weeks for Nato troops in Afghanistan, with more than 30 soldiers killed. **Links between the Taliban and Pakistan's intelligence service have long been suspected, but the report's author - Harvard analyst Matt Waldman - says there is real evidence of extensive co-operation between the two.** "This goes far beyond just limited, or occasional support," he said. **"This is very significant levels of support being provided by the ISI. "We're also saying this is official policy of that agency, and we're saying that it is very extensive. It is both at an operational level, and at a strategic level, right at the senior leadership of the Taliban movement."** Mr Waldman spoke to nine Taliban field commanders in Afghanistan earlier this year. Some alleged that ISI agents had even attended meetings of the Taliban's top leadership council, the so-called Quetta shura. They claim that by backing the insurgents Pakistan's security service is trying to undermine Indian influence in Afghanistan. **"These accounts were corroborated by former Taliban ministers, a Western analyst and a senior UN official based in Kabul, who said the Taliban largely depend on funding from the ISI and groups in Gulf countries,"** the report said. With US troops due to begin leaving next year, Pakistan and other regional players are increasingly seeking ways to assert their influence in Afghanistan, analysts say.

Pakistan has long been accused of using the Taliban to further its foreign policy interests in the country. The ISI first became involved in funding and training militants in Afghanistan after the Soviet invasion in 1979. Since 2001, however, it has been a key US ally, receiving billions of dollars in aid in return for helping fight al-Qaeda "Pakistan appears to be playing a double-game of astonishing magnitude," the report says. But Islamabad says it is working with its international partners in hunting down the Taliban. And the Taliban's former ambassador to Pakistan, Abdul Salam Zaeef, says there is no proof of a link between the ISI and the Afghan Taliban. "I have no proof that Pakistan is supporting the Taliban," he told the BBC, "or that the ISI is providing money to them... or other support to provide weapons." Even so, Pakistan's role in Afghanistan is viewed as critical. Last week Afghan intelligence chief Amrullah Saleh resigned, saying he had become an obstacle to plans to talk to the Taliban. Mr Saleh told Reuters news agency a day after quitting that the ISI was "part of the landscape of destruction" in Afghanistan and accused **Pakistan of sheltering Taliban leaders in safe houses. Pakistan has always denied such claims and points to arrests and military offensives against the militants on its side of the border. Nevertheless, parts of the tribal north-west of Pakistan bordering Afghanistan remain strongholds for the militants.** The BBC's Quentin Sommerville in Kabul says there is a growing understanding that military action alone will not be enough to bring peace in Afghanistan. "Without a change in Pakistani behaviour it will be difficult if not impossible for international forces and the Afghan government to make progress against the insurgency," the report concludes.

**Title/Headline:** *U.S. Man Hunting Bin Laden Held In Pakistan*

**Abstract:** An American armed with a pistol and a 40-inch sword was detained in northern Pakistan and told investigators he was on a solo mission to kill Usama bin Laden, a police officer said Tuesday. The man was identified as 52-year-old Californian construction worker Gary Brooks Faulkner, said officer Mumtaz Ahmad Khan. He was picked up in a forest in the Chitral region late on Sunday, he said. "We initially laughed when he told us that he wanted to kill Usama bin Laden," said Khan. But he said when officers seized the pistol, the sword and night-vision equipment, "our suspicion grew." He was questioned Tuesday by intelligence officials in Peshawar, the main northwestern city. Faulkner told police he visited Pakistan seven times, and this was his third trip to Chitral. Police alleged the American intended to travel to the eastern Afghan region of Nuristan, just across the border from Chitral. **The area is among several rumored hiding places for the Al Qaeda leader, who has evaded a massive U.S. effort to capture him since 2001. Bin Laden is accused of being behind the Sept. 11 attacks on the United States, as well other terrorist acts.** Khan said Faulkner was also carrying a book containing Christian verses and teachings. When asked why he thought he had a chance of tracing bin Laden, Faulkner replied, "God is with me, and I am confident I will be successful in killing him," said Khan. Faulkner arrived in the Chitrali town of Bumburate on June 3 and stayed in a hotel there. He was assigned a police guard, as is quite common for foreigners visiting remote parts of Pakistan. When he checked out without informing police, officers began hunting for him, said Khan. **U.S. Embassy spokesman Richard Snelsire said the mission had received notification from Pakistani officials that an American citizen had been arrested. He said embassy officials were trying to meet the man and confirm his identity** (Fox News, 2010)

**Title/Headline:** *American Pleads Guilty To Times Square Terror Plot*

**Abstract:** A Pakistan-born U.S. citizen has pleaded guilty in federal court to a charge accusing him of plotting the failed Times Square car bombing. He told the judge he wanted to "plead guilty and 100 times more." He also warned that unless the U.S. leaves Muslim lands, "We will be attacking U.S." Entering pleas one-by-one, he began by pleading guilty to attempted use of weapons of mass destruction (Fox News, 2010).

**Date:** June 23, 2010

**Source:** Fox News, Associated Press

**Title/Headline:** *Bin Laden Hunter On Way Back To U.S.*

**Abstract:** An American on a solo mission to hunt down Osama bin Laden is headed back to the United States, ten days after authorities found him in the woods of northern Pakistan with a pistol, a sword and night-vision equipment. Gary Faulkner, who has been detained since June 13, left Pakistan early Wednesday and will arrive in Denver later in the day, his brother Scott Faulkner said. Scott Faulkner said he spoke to his brother briefly Tuesday, and he reported being treated well in Pakistan. By the excitement in his brother's voice, Scott Faulkner said he thinks his brother came close to finding bin Laden. The 50-year-old Gary Faulkner, of Greeley, told officials he was out to kill the al-Qaida leader. **Faulkner was then moved to Islamabad, and his brother told The Associated Press on Tuesday that he was being released by the Pakistani government without charges. "He said he couldn't wait to return to the good ol' U.S. of A," Scott Faulkner said. Gary Faulkner is an out-of-work construction worker who sold his tools to finance six trips on what relatives have called a Rambo-type mission to kill or capture bin Laden.** He grew his hair and beard long to fit in better. Scott Faulkner told reporters last week that his brother wasn't crazy, just determined to find the man America's military has failed to capture nearly a decade after the 9/11 attacks in the United States. "Is it out the norm? Yes it is. But is it crazy? No," Scott Faulkner said. **"If he wore a uniform**

**and called himself special ops, would he be crazy?"** Another relative told AP on Tuesday he wasn't sure when Faulkner would return to Denver but that it would be in coming days. **The relative said Faulkner, who has kidney problems and needs dialysis, has been treated well by Pakistani authorities and is in good spirits.** A senior State Department official, speaking on condition of anonymity due to privacy concerns, said the agency hasn't been told of Faulkner's release and that the family would have the best information, but that Faulkner's release was expected soon. **Faulkner, two department officials said, refused to sign a waiver allowing the government to discuss his case publicly.** Faulkner left Colorado in May 30. Scott Faulkner, a physician in the northeastern Colorado town of Fort Morgan, dropped his brother off at the airport and wasn't sure he'd see him again. But he and other relatives have insisted that Gary Faulkner left the U.S. unarmed, had a valid visa for Pakistan and was guilty of no crime while there. Indeed, relatives have said they hope the trip encourages more people to look for bin Laden. "Now there's going to be hopefully a renewed effort to get this guy -- he's still wanted, and he's still out there," Scott Faulkner said last week (Fox News, 2010).

**Title/Headline:** *Pakistan Sentences Five Americans In Terror Case*

**Abstract:** A Pakistani court sentenced five American Muslim men who had been arrested in Punjab Province to 10 years of labor in prison on Thursday for conspiring to carry out terrorist attacks. The case has amplified worries about the radicalization of Muslims in the United States. **The five men, all in their 20s and all from Virginia, are believed by Pakistani and American law enforcement officials to have traveled to Pakistan in December to join the fight against American forces in Afghanistan.** On Thursday, Judge Mian Anwar Nazir found them guilty and sentenced them to 10 years and fines of \$823 for conspiring against the state and 5 years for helping to finance a militant organization. The sentences will run concurrently. A lawyer for the men, Hassan Katchela, said that his clients were disappointed by the sentences and that he would appeal the case within a week. **"We are surprised," he told reporters in Sargodha. "We were not expecting this decision." It was an unusually speedy trial for Pakistan's weak criminal justice system, which is rarely able to keep militants in custody, much less prosecute them.** Most hard-core militants are handled by Pakistan's military and intelligence agency, though they are selective, steering clear of groups with links to the state. Those who are convicted are often freed long before their formal sentence ends. **It was not immediately clear why the men had not been deported to the United States, as Pakistani officials had initially indicated might happen.** The men refused to waive their privacy rights with the United States Embassy, a decision that meant that embassy officials were not allowed to speak on their behalf. The men sometimes passed notes to reporters on their way from jail to the courtroom and claimed that they had been tortured while in Pakistani custody, a charge denied by police officials. A spokesman for the United States Embassy in Islamabad, Richard Snelsire, said, **"We respect the decision of the Pakistani courts."** But **the families of the men said they would fight. "We are not going to lose heart,"** Khalid Farooq, the father of one of the men, Umer Farooq, said outside the court after the verdict. "Such a decision is strange in a Muslim country by a Muslim judge for innocent Muslims accused of baseless charges of terrorism." He added: **"I am a lawyer by profession and I can confidently say that there was nothing in this case. All documents of the government were fabricated and evidence is fake."** The men's story follows a recent pattern of attempts by American Muslims to join militant groups fighting the United States military in countries like Afghanistan. **Faisal Shahzad, a Pakistani who also held American citizenship, pleaded guilty on Monday to trying to set off a bomb in Times Square.** Experts say that the young Americans, often children of integrated Muslim immigrants, are not immune to the calls of jihad by militant organizations, which play on feelings of frustration and confusion about identity common in young, first- and second-generation men. Rana Bakhtiar, the deputy prosecutor general of Punjab, the province where the men were tried, said that prosecutors had sought the maximum penalty, 25 years in jail, and that they would appeal to a higher court to have the sentences increased. **The men — Ahmed Abdullah Minni, Aman Hassan Yemer, Waqar Khan, Mr. Farooq and Ramy Zamzam — are believed to have made contact with militant organizations in Pakistan over the Internet.** They say they traveled to Pakistan in December for the wedding of Mr. Farooq, who is of Pakistani origin, but Pakistani and American investigators contend that the men had come to meet militants. American law enforcement officials have said there is considerable evidence suggesting that the men had been radicalized and planned violence. **Most notably, Mr. Zamzam left behind a video that appeared to reflect his plans to join the jihad. During the trial, prosecutors presented printouts of e-mail messages the men had sent to Pakistan, as well as maps they had been carrying and cellphone records. The men first went to the city of Hyderabad, where they reportedly met men from Jaish-e-Muhammad, a militant group. Prosecutors allege that money changed hands there, which led to the charge of financing a terrorist organization.** The men also traveled to Lahore, where they met with representatives of Jamaat-ud-Dawa, the charity wing of the banned militant organization Lashkar-e-Taiba, which is believed to have carried out the 2008 attacks in Mumbai, India. Mr. Bakhtiar, the prosecutor, said Pakistan was committed to fighting militancy. "No terrorist can be given relief," he said (Gillani & Tavernise, 2010).

**Title/Headline:** *Al-Qaida Never Weaker, But Never More Of A Threat To U.S. Itself: Analysis*

**Abstract:** U.S. officials boast that al-Qaida has never been weaker, its upper ranks decimated because of the stepped-up drone attacks in Pakistan and special operations raids in Afghanistan. At the same time, they warn, in seeming contradiction: **An even greater number of well-trained terrorists are setting their sights on the United States.** Across the remote tribal lands between Afghanistan and Pakistan where terror groups hide, U.S. officials say they've seen a fusion of al-Qaida and others targeted by U.S. forces, including the Haqqani group and the Pakistani Taliban, who formerly focused only on their local areas. **Adm. Mike Mullen, chairman of the Joint Chiefs of Staff, said the groups have become a "synergy of terrorist groups" with "an expanding desire to kill Americans."** He was speaking last week at the Aspen Institute security forum in Colorado. At the same forum, National Counterterrorism Center Director Michael Leiter warned that the "troubling alignment" extends all the way to Yemen and Africa. The dispersed network is making terror plots harder to spot and prevent, he said. The officials are speaking publicly in an effort to convince the American public — and U.S. ally Pakistan — that the time to hit harder is now, while al-Qaida is weakened. Failure to do that means an even stronger enemy,

they argue. **A high-level U.S. counterterrorist delegation is headed to Pakistan this week to try to persuade Pakistan to keep the pressure on the militant groups that now operate almost as one with al-Qaida. The Pakistani government has denied news reports that it has reached out to its former ally, the Haqqani tribe, to secure its participation in talks with the Afghan government. U.S. officials want to make sure that remains the case. The other part of that administration message, that the campaign has diminished the al-Qaida leadership, is aimed at an American public increasingly weary of the 9-year-old war. In June, at least 60 U.S. troops were killed in Afghanistan, making it one of the deadliest months of the conflict. Polls now find a majority of Americans no longer think the Afghanistan war is worth fighting. Purely by the numbers, al-Qaida has been devastated by the past 18 months of drone attacks and raids, Leiter said. Although Osama bin Laden remains at large, half of al-Qaida's leadership has been killed in the past year, he said. The organization is down to only 50 to a 100 "card-carrying" members inside Afghanistan and roughly 300 operatives in Pakistan, he said. Al-Qaida agents in Pakistan are hemmed in, mainly north of Peshawar, as well as North Waziristan, where they have based themselves with the Haqqani network and the Pakistani Taliban, and a small number in the Quetta area, where the exiled Afghan Taliban mainly hold sway. These groups have cooperated for years, even pre-dating the Sept. 11, 2001, attacks, said New America Foundation's Peter Bergen, cautioning against describing that as a new development. The Haqqani group fought beside the Afghan Taliban to help return the Taliban, al-Qaida's former host, to control of Afghanistan. The Pakistani Taliban have sought to overthrow the central government in Islamabad. Lashkar-e-Taiba, another group that works with al-Qaida, has concentrated on attacking Indian targets, like the three-day assault on Mumbai in 2008 that killed 170 people. But the difference now, U.S. officials contend, is that the local groups are sharing manpower, weaponry and ideology with al-Qaida. The Pakistani Taliban have already made an attempt on the U.S., through Times Square bombing suspect Faisal Shahzad. That attempt followed the pattern of al-Qaida in the Arabian Peninsula, based in Yemen, which dispatched Nigerian suspect Umar Farouk Abdulmutallab to try to bring down a Detroit-bound airliner on Christmas Day. U.S. intelligence analysts, speaking on condition of anonymity because they were not authorized to speak publicly, say even though neither the Haqqani network nor Lashkar e-Taiba has been linked to plots aimed at the mainland U.S., the United States now must assume the groups aspire to strike there, or at the very least help prepare and fund such attacks. The Haqqanis, estimated by a senior defense official to be between 2,000 and 5,000 strong, have already supported attacks on U.S. targets within Afghanistan, including an al-Qaida and the Taliban suicide bombing that killed seven CIA operatives in Khost, in the suicide bombing last December. Don Rassler, of the Combating Terrorism Center at West Point, N.Y., says the group's leader, Sirajuddin Haqqani, has been careful not to publicly support direct attacks on the United States, despite repeated questioning in online militant jihadi forums. "He knows where the red lines are and he's careful not to cross them, so as not to become even more of a target than he already is," Rassler says. Counterterrorism chief Leiter said monitoring the spread-out terrorist threat is a growing undertaking. The counterterrorism center receives 8,000-10,000 pieces of counterterrorist information every day, he said. "Within those reports, there are roughly 10,000 names every day" and "40-plus specific threats and plots," Leiter said, including "bombs that are going to go off today or tomorrow." He likened it to trying to find "a needle in a pile of needles, covered by a haystack." - Identifying those needles has resulted in huge blows against al-Qaida, he said. Increasingly, though, the United States and Pakistan must explain its attacks, which the enemy uses in propaganda to drive Muslim world public opinion against the United States and the government in Pakistan. The press in Pakistan has claimed that thousands of innocents have been killed by U.S. drone strikes. U.S. officials say it's nowhere near that total, but they will not provide their own estimates. Leiter said he wouldn't argue "that some of our actions have not led to some people being radicalized." But he added, "It doesn't mean you don't do it. It means you craft a fuller strategy to explain why you're doing it." Pakistan's ambassador to the United States, Husain Haqqani, said that al-Qaida, too, has turned off wide swaths of Arab and Muslim public opinion by killing 10,000 soldiers, diplomats and mostly civilians in 2009 in Pakistan alone. U.S. officials believe that's partly because their stepped-up drone campaign has forced al-Qaida to work through proxies that don't always listen to the al-Qaida leadership when it comes to avoiding civilian casualties. The U.S. officials hold out the hope that the next year of the secret war could provide the critical moment that could lead to the decapitation of al-Qaida's leadership. But, they contend, if the pressure comes off, al-Qaida could transform itself into an even stronger, more resilient foe — a process they acknowledge has already begun (Dozier, 2010).**

**Title/Headline:** *Pakistani Terror Suspect Held In Britain On US Warrant*

**Abstract:** London, July 7 (DPA) British police Wednesday arrested a Pakistani national wanted for trial on terrorism charges in the US, Scotland Yard said. Abid Naseer, 24, was among 12 men arrested in connection with a suspected terrorist plot in northern England last year. But he recently won a court battle to stay in Britain, where a judge ruled that his safety could not be guaranteed if he was returned to Pakistan. Scotland Yard said Naseer had been arrested "pursuant to a provisional arrest warrant issued on July 7, 2010, at the request of the US government". "Naseer's extradition is sought by the United States government for the purposes of standing trial," a statement said. A spokesman said Naseer was accused by the US authorities of providing material for a foreign terrorist organisation, providing support for a terrorist conspiracy and of plotting to use a destructive device (Thaindian News, 2010).

**Title/Headline:** *India: Pakistan's ISI Had Direct Control Over Mumbai Attacks*

**Abstract:** India has accused Pakistan's intelligence service of "controlling and coordinating" the 2008 terrorist attacks on Mumbai from "beginning to the end". India's home secretary said new evidence from a suspected senior terrorist had revealed the Inter-Services Intelligence agency, one of Pakistan's most powerful state bodies, was behind the attack which left more than 166 people dead. GK Pillai directly accused Pakistan's ISI of collaborating with the Lashkar e Taiba (LeT) terrorist group to mount the attacks. "The ISI has had a much more significant role to play (in the Mumbai attacks). It was not just a peripheral role. They were literally controlling

and coordinating it (the attacks) from the beginning till the end," he said. His accusations are the strongest comments made by Indian officials since the attacks which brought the South Asian nuclear neighbours to the brink of war. India's prime minister Manmohan Singh said shortly after the attacks that they were of such military precision that they must have had the support of some Pakistani state agencies. **Ten terrorist commandos launched a series of machine gun raids on Mumbai's top hotels, main rail station and a Jewish charity while holding India's elite special forces at bay for three days. Mr Pilla did not offer any evidence however and his claims, which came on the eve of summit talks between the two countries' foreign ministers, were dismissed as rhetoric by diplomats in the region.** They said he had underestimated the capability of the which is believed to have carried out the massacre. Mr Pillai said new details of the ISI's links to LeT founder Hafiz Saeed, had emerged when India's National Investigation Agency interviewed David Headley, the suspected LeT terrorist arrested last year at Chicago's international airport. Headley is accused of carrying out reconnaissance missions for the Mumbai attacks. Headley had told Indian investigators that Hafiz Saeed, who is not among the LeT Mumbai suspects arrested in Pakistan, played a central role in pressing for the attacks to be executed according to a planned schedule. **"He was also not a peripheral player. He knew everything," he said. A retired Pakistan Army major was arrested by the FBI in December last year in connection with the Mumbai attacks. A colonel from its Signals Corps was also named in Indian court documents, but so far no serving Pakistani military personnel have been charged.** Vikram Sood, former director of India's Research and Analysis Wing intelligence agency, said the home secretary's claims voiced what most in the country's security circles already knew. **"You don't make these decisions, where the risk is so great the countries could end up fighting a war, at the level of major or colonel. [Pakistan's officials] keep saying they're helping but they're not. They're involved," he said. Western diplomats in the region are yet to be persuaded that Islamabad's military or its intelligence agencies played a direct role in the attacks.** They believe Mr Pillai's claims were made to keep Thursday's talks in Islamabad focused on stopping future terrorist attacks on India (Nelson, 2010).

**Title/Headline:** *Germany Jails Two For Al-Qaeda Links*

**Abstract:** A court in western Germany has sentenced two men to a total of eight and a half years in prison for their alleged ties to a senior al-Qaeda member. The two men, one with Turkish nationality and the other both Turkish and German, were jailed on Monday, AFP reported. The men, both 32, merely identified as Omer O and Sermet I, were sentenced to six and two and a half years in prison respectively by a court in the city of Koblenz. The men were found guilty of working for Aleem N, a German of Pakistani origin who was also jailed for eight years in July 2009 as an alleged top-player in the al-Qaeda network. According to AFP, they reportedly obtained money and equipment such as night-vision goggles for Aleem. The court ruled both men as supporters of the aims and methods of al-Qaeda. **An additional ruling accused Omer O. of attending a "terror" camp to undergo weapons training in the Afghan-Pakistan border region in early 2006.** The convictions brought to an end a 61-day trial which heard testimonies from 119 witnesses and nine experts (Press TV, 2010).

**Title/Headline:** *Hillary Clinton: 'It Would Be A Mistake' To Walk Away From Pakistan*

**Abstract:**

**Greta Van Susteren, Fox News Host:** Madam Secretary, nice to see you. And this is our second trip to Pakistan with you.

**Hilary Clinton, Secretary of State:** It is. Thank you for coming along.

**Greta Van Susteren:** All right, now, there's no secret we're having horrible economic problems at home. How do you convince the American people that spending money here in Pakistan is something we want to do?

**Hillary Clinton:** Well, I think there's three ways to make the case, Greta. **Number one, this is where the principal terrorist threat to the United States emanates from.** And we've seen some foiled attacks, thank goodness, in the last several months that have just demonstrated that. **And we have to have a much closer cooperative relationship with Pakistan.** We have to prevent Afghanistan from falling into a failed state that can then be a bigger danger to us. And that costs money. **Secondly, if you really think about how much money it costs us as a society after 9/11, it was an incredible economic hit. And so terrorism on top of an economic challenge would be devastating for us, and therefore, we have to stay on our toes and try to prevent that from happening.** And thirdly, I think that the long term benefit of having positive relationships in this part of the world is good for our economy as well. We have an export initiative that President Obama has announced. We want to double exports. We need to open up markets. How do you open markets? You raise standards of living. You eliminate insecurity so people can buy the things that the United States produces. So terrorism, economy, greater access to markets, all of that makes sense to me.

**Greta Van Susteren:** The security issue, it seems Americans really want security. We recently had the incident in Times Square which originated in this country. But are we getting ahead of the game? Is our money paying off in terms of getting security, because we've had this recent event, and we see violence all the time in this country?

**Hillary Clinton:** And the Pakistanis themselves are paying a big price because of it. They've had so many deaths due to bombings that these terrible terrorist networks impose upon the people of Pakistan. Their military has lost a lot of people in fighting. This is tough. I'm not going to sit and tell you that it is not. But boy, do I think it would be a mistake to walk away. We've done that. **We've walked away from Pakistan and Afghanistan in the past with all the consequences we are well aware of.**

**Greta Van Susteren:** So you think if we walked away from this and didn't give them the money today, it would be worse for us from a security standpoint?

**Hillary Clinton:** I do. We are building a relationship that did not exist. I said in our last trip that you were with me that we had a huge trust deficit, because the United States had to be fair, we had helped to create the problem we are now fighting.

**Greta Van Susteren:** How?

**Hillary Clinton:** Because when the Soviet Union invaded Afghanistan we had this brilliant idea we were going to come to Pakistan and create a force of mujahedeen and equip them with stinger missiles and everything else to go after the Soviets inside Afghanistan. And we were successful. The Soviets left Afghanistan, and then we said great, good-bye, leaving these trained people, who were fanatical, in Afghanistan and Pakistan, leaving them well-armed, creating a mess, frankly, that at the time we didn't really recognize, we were just so happy to see the Soviet Union fall and we thought fine we are OK now everything is going to be so much better. **Now you look back. The people we are fighting today, we were supporting in the fight the soviets.**

**Greta Van Susteren:** Is there some sense of a win for us in the sense that we see all these casualties, we see casualties going up in Afghanistan. **If we had Usama bin Laden, that would inspire the American people to feel much more committed to this project. Do you believe the Pakistan government knows where Usama bin Laden is?**

**Hillary Clinton:** I think elements in the government do. I've said that before. But I think it is also important for your viewers to know we have been getting with Pakistani cooperation a lot of the top leadership of Al Qaeda. We haven't gotten bin Laden or Zawahiri, but we've consistently been able to track and kill a lot of their principal leadership. So there is a story to be told here. It's not yet what I want it to be, because as having been a senator from New York on 9/11, I want those guys. I will not be satisfied until we get them. But we've made a lot of progress. And we've created a closer cooperative relationship between the United States and Pakistan, in going after what are now common enemies.

**Greta Van Susteren:** Now we have the situation in Uganda. **We have al- Shabaab, another terrorist group. It looks like terrorism is going global again in another area. Are we in any way going to get involved in that?**

**Hillary Clinton:** We have supported what is called the African Union Mission which uses Ugandan troops and troops from Burundi. In fact the recent why Al-Shabaab went after the people in Kampala is because Uganda has been going after them inside Somalia, and we have been fully supportive of that. **We are not in any way contemplating U.S. forces, but we want to support Africans fighting for Africa, and we will continue to support those who will take on Al-Shabaab, which is no longer a threat inside Somalia, but, as you point out, is spreading its tentacles beyond that.**

**Greta Van Susteren:** You said some elements of the Pakistani government know where Usama bin Laden is?

**Hillary Clinton:** I believe that.

**Greta Van Susteren:** Why do you believe that?

**Hillary Clinton:** I think that's because if I put myself into a position of leadership in our own government, and if there were a terrorist network operating somewhere, even in the most remote place in the United States, some sheriff, some local state policeman, somebody in our collective government would probably know that there was something suspicious going on. So that's why I assume somebody, somebody in this government, from top to bottom, does know where bin Laden is. And I'd like to know too.

**Greta Van Susteren:** Can't we leverage our money or anything to get that information? He's 6'5, not easy to hide.

**Hillary Clinton:** We are leveraging it.

**Greta Van Susteren:** Are we getting closer?

**Hillary Clinton:** I don't want to put a proximity or timeline on it. As I've said, we have gotten closer because we have been able to kill a number of their trainers, their operational people, their financiers. We've been able to do that, so in that sense we've gotten closer. But I won't be satisfied until we get it done.

**Greta Van Susteren:** Does the Pakistani government say to you, Secretary Clinton, we are going to get him for you?

**Hillary Clinton:** **Top levels of the government say they don't know, to be fair to them. It would similar, again, if somebody walked into my office and said do you know where bad guy in the Mexican cartel is on our side of the border? I would say I don't know, but I assume somebody knows.** So I think we've got to keep pressure on, which we are doing. But remember, we inherited a situation with such mistrust between the United States and Pakistan that it takes day-by-day confidence-building. And we've been doing that. I think we have a lot to show with the strategic dialogue I got started where we've had a lot of American government officials coming and meeting with their counterparts in Pakistan. It is not to get just a good relationship at the top. You have to go through the bureaucracy. **So to go back to my example about if I said who is it who knows where the Mexican cartel leader is? Somebody must know. It is somebody in the bowels of the bureaucracy. You have to set a new tone, you have to set a new sense of direction and authority. And I think that is happening.**

**Greta Van Susteren:** You mentioned Mexico. Last week we were with Secretary Napolitano down at the Texas-Mexico border. I've traveled with you to Mexico as well. Is there a war going on in Mexico?

**Hillary Clinton:** Well, there certainly is an armed struggle going on. So far the cartels have not been trying to overthrow the Mexican government, although they are trying to seize and hold territory for them to operate their drug activities.

**Greta Van Susteren:** You don't call it a war?

**Hillary Clinton:** I don't know. I don't want to get into semantics. This is an armed struggle, a conflict against really bad people. **These Mexican cartel leaders are the most ruthless people. You talk about what we're up against with terrorism in Pakistan, look at these people. They behead their victims, kidnap children, they indiscriminately kill groups of people. They are just as bad as any terrorist groups. They are in it for money instead of ideology, but what is the difference?** They are violent, vile violators of human rights and human life. So I don't want to call it a war, conflict, struggle, whatever, we have to help the Mexican government defeat these people and take back control of their country so they are not living in fear of what these cartels and their leaders will do.

**Greta Van Susteren:** Right on our border.

**Hillary Clinton:** Yes, right (Fox News, 2010).

**Title/Headline:** *Osama Bin Laden 'Hiding In Pakistan', Says Clinton*

**Abstract:** The American Secretary of State said she believed the fugitive head of the al Qaeda terrorist network was at large nearly nine years after United States forces helped topple his Taliban hosts in neighbouring Afghanistan. Speaking before heading to the Kabul International conference, she said: **"I believe (bin Laden) is here in Pakistan and it would be very helpful if we could take them (al-Qaeda leaders)."** Leon Panetta, head of the CIA, last month said bin Laden remained in "very deep hiding". The American spy service has maintained bin Laden is alive despite rumours of poor health and a lack of verified sightings or appearances in recent years. Several audio propaganda messages have been released purporting to be from him. Hamid Karzai, speaking at the conference, said he believed the Taliban leader and founder Mullah Mohammad Omar was also across the border. He said: **"We have known all along that some of the very, very senior leadership of the Taliban were in Pakistan, this is not news to us."** He told the conference the Taliban was "a vicious common enemy that violates every Islamic and international norm to break our unity of effort" (Farmer, 2010).

**Title/Headline:** *US Drone 'Kills Eight Germans' In Pakistan Amid Terror Plot Fears*

**Abstract:** American missiles fired from an unmanned drone killed eight militants of German nationality in northwest Pakistan, a region known to be a base for training terrorists, it was reported tonight. They were killed when two missiles from a suspected CIA pilotless aircraft hit a mosque in Mirali in North Waziristan, according to Pakistani intelligence officials. The strikes follow fresh warnings of terror attacks by the US and UK and reports that an Afghan-born German, Ahmad Sidiqi, said to be one of Germany's most dangerous "homegrown terrorists", supplied intelligence during interrogation by the US at Bagram jail outside Kabul. According to German media, Sidiqi, who attended the same mosque in Hamburg as some 9/11 attackers, told the Americans of plans to launch a series of spectacular attacks in Europe, with Britain and France named as possible targets. British counter-terrorism officials said there was "credible evidence" that al-Qaida sympathisers were plotting attacks in Europe, but they played down the significance of warnings issued by the UK and US over the weekend for travellers to France and Germany. Two separate but coinciding intelligence assessments of possible terror attacks triggered this weekend's travel alarms, senior European sources said today. The US told European capitals and EU headquarters in Brussels that al-Qaida was preparing co-ordinated strikes in various European countries. At the same time, French intelligence raised the alarm about attacks allegedly being planned in Europe by AQIM, or al-Qaida in the Islamic Maghreb, which is now believed in EU capitals to be a graver threat than Osama bin Laden. The US was said to have supplied the German authorities with "very precise information" on targets, which may explain why US TV networks in recent days have been naming targets in Berlin very specifically: the Adlon Hotel by the Brandenburg Gate, the gleaming central railway station opposite the German chancellery, and the soaring TV tower on Alexanderplatz in the very heart of the city. German officials remained relatively sanguine today about the nature of the threats and the quality of the intelligence. Thomas de Maiziere, the interior minister, said there was "a high abstract risk" of a terror attack in Germany. British government concerns were heightened recently as intelligence suggesting such attacks were being plotted was gathered from communications intercepts. GCHQ, the National Security Agency in the US and other electronic eavesdropping agencies are increasing their activities along the Afghan-Pakistan borders. They have intercepted a growing number of voices of European citizens or residents, counter-terrorism officials and independent analysts suggest. Reports of information from the intercepts, indicating attacks on European targets were being plotted, were leaked to the US media last week. Security assessments from Paris and Washington were received by European capitals a month ago, the sources said, raising questions as to why the US and British authorities went public with their travel warnings only this weekend. British officials said Sunday's warning from the state department was not based on any fresh intelligence but was the result of Washington's concern to get the US and Europeans to speak with one voice. Sweden increased its terror-threat warning on Friday, the day an audio message was placed on Islamic websites purporting to come from Bin Laden, expressing general concern about the floods in Pakistan. While European officials are taking the US and British alerts seriously, there is speculation among people familiar with the intelligence material about the reasons for the timing of the alarms. "The threat was real, obviously, and it's not over," said a European source. "But why it's been put on the market in this way is a different issue." Various reasons are being suggested: that at a time of austerity and budget cuts across the west, the terror alert could furnish strong arguments for shoring up intelligence and security funding; at a time when the EU and Washington are negotiating counter-terrorism measures, the anxiety over renewed terrorism will reinforce US demands for more intrusive information from the Europeans; and that at a time when European governments are keen to extract themselves from what they increasingly perceive as a lost military cause in Afghanistan, a terror panic could strengthen the case for staying (Norton-Taylor & Traynor, 2010).

**Title/Headline:** *Pay Attention To Pakistan*

**Abstract:** President Obama gets lots of brickbats for failing to keep campaign promises, but it's one he is keeping that now deserves fresh attention. He is aggressively making good on a 2008 pledge to follow terrorists from Afghanistan into Pakistan and "take them out." The dramatic increase in drone attacks and hot-pursuit incursions of CIA and special forces into Pakistan aims to eliminate sanctuaries in ungoverned areas. Battlefield reports indicate the operations are highly successful at killing their targets, with few civilian casualties. Just this week, as many as eight Germans of Pakistani descent were killed in the border area near Afghanistan. At least one was linked to the ongoing plot to attack European cities. Yet these operations are hardly cost-free. They are expanding the war zone into a third Muslim country, and anti-American protests and violence are rising rapidly in Pakistan. With 170 million people, a nuclear arsenal and a growing insurgency with links to the Afghan Taliban and al Qaeda, Pakistan comprises a highly combustible mix. The expansion could go wrong in a horrific way, so we must pay closer attention, lest we find America in a full-scale war there or help cause the collapse of its civilian government. The lack of public interest so far is odd, given how Iraq and Afghanistan dominated American politics for eight years. But whatever the reasons -- presidential silence, war fatigue, economic obsessions, etc. -- Obama's Pakistan strategy is AWOL in this year's campaign. Our enemies certainly are paying attention. Attacks on our military supply convoys in Pakistan are rising, with photos of exploding fuel tankers routine. The convoys are sitting ducks since Pakistan closed border crossings to protest our entering its territory without permission. Even more worrisome, some U.S. helicopters have been shot at by the Pakistan army. Voters can't say we weren't warned. Back in August 2007, Obama said, "Let me make this clear. There are terrorists holed up in those mountains, that murdered 3,000 Americans," and promised to act if Pakistan wouldn't. In his first debate with John McCain, Obama named Usama bin Laden as a potential target and added, "You have got to deal with Pakistan."

McCain called Obama "naive" and accused him of threatening to "bomb" Pakistan. In fact, starting in 2002, the Bush administration formed CIA paramilitary forces it called Counterterrorist Pursuit Teams. It used Afghan troops, some trained in the United States, and Obama has greatly expanded their jurisdiction, along with doubling drone attacks in Pakistan. **In his insider book, "Obama's Wars," author Bob Woodward says getting control of Pakistan is "a theme of the whole Obama presidency." He writes that Vice President Joe Biden warned Pakistan's leader about "playing one side against the other" by cracking down on some terror groups while supporting others.** And three weeks after the Times Square bombing attempt, CIA Director Leon Panetta and National Security Director Jim Jones went to Pakistan to demand a zero-tolerance for terrorists. **Panetta carried a chart showing how the Times Square bomber, Faisal Shahzad, who was sentenced to life in prison yesterday, got training in Pakistan from the same Islamist group that carried out the 2008 attack in Mumbai. At some point, any president might well have expanded the war as Obama has done.** Our generals believe success in Afghanistan is not possible if Pakistan is a sanctuary where the terrorists can plot and recruit. But the risk of increasing our footprint there is growing here at home. Shahzad, a Pakistani who said he "didn't mean it" when he swore the oath of US citizenship, defiantly told a Manhattan courtroom he would not be the last of his kind to attack America. **"Brace yourself because the war with the Muslims has only just begun," he said (Goodwin, 2010).**

**If a nuclear terror attack occurs, it will assuredly be blamed on Muslims. However, people probably won't believe that men in caves are capable of such nuclear technology, so a few smart Germans scientists will help this narrative out. This storyline was generated in Tom Clancy's 1991 Thriller, *The Sum Of All Fears*. 20 years later, the Globalists will attempt to link German Nazi's with Muslim Terrorists, two types of people everyone dislikes, in an attempt to further the Holocaust narrative and to demonize people of the Middle East in an unprecedented fashion. This act must be stopped.**

**Date:** October 7, 2010

**Source:** The Guardian, Ian Traynor

**Title/Headline:** *Hamburg Mosque Which Links 9/11 To The Badlands Of Pakistan*

**Abstract:** The most infamous mosque in Europe is a drab, nondescript place. Five minutes from Hamburg's main railway station, above a Vietnamese takeaway and the Olympic Fitness Club, the grimy quarters of the Taiba prayer hall and library occupy mythical status for the jihadists of Europe. **It was here at the mosque formerly called the al-Quds that Mohammed Atta and several of his accomplices prayed and plotted the global gamechanger that was 9/11. And it was here, until last year, that another group of 11 German Islamist militants congregated before taking circuitous routes to Pakistan's tribal belt for, it is assumed, terrorist training.** Over the past week Washington and London have been issuing scary warnings of Mumbai-style massacres in Europe about to be perpetrated by homegrown terrorists operating to a script written in the Hindu Kush. **The alarms have refocused attention on the mosque in the north German port because the intelligence source for the US warnings is one of the 11 acolytes who left Germany for the lawless Pakistani-Afghan border region of Waziristan last year. And on Monday, when an unmanned CIA Predator struck a farmstead in the same border area, the news was that eight German militants were killed, reinforcing the alleged link with the Hamburg Islamists.** A senior security service source in the city, though, is playing down the Hamburg connection: "We don't know if the Taiba people are connected with the [Predator] attack. The IDs of the dead are not known. We would know for sure if any of the victims were Hamburg people, but we have nothing yet." In Berlin, they are even more sceptical, voicing barely disguised contempt for what they view as American spin. "What really astonishes me," Thomas de Maizière, the German interior minister, told German radio on Wednesday, "is that this attack is supposed to have taken place with unmanned drones in an inaccessible region the day before yesterday and yet the identities are immediately found." **Whether the American attack foiled or was connected to German Islamists planning for a European bombing spree, it is clear that the Hamburg mosque has served as a recruiting ground for violent Islamism since September 2001.** A report by Hamburg's counter-intelligence service in May described the mosque as "the main focus of attraction for the jihadist scene as in previous years". Ralf Kunz, spokesman for the Hamburg security services, said: **"The Taiba mosque has been drawing people not only from all over Germany, but from all over Europe. It was a place of pilgrimage." The two-storey mosque building lies empty and abandoned. At 6am on a Monday two months ago – almost nine years after the Twin Towers attack – the police and special forces moved in, hauled away computers and documents, and closed the place down.** The authorities had repeatedly tried and failed, most recently last spring, to win court approval for the ban. It was the evidence about the 11 who left Hamburg for Pakistan last year, at least two of whom have joined the terrorists of the Islamic Movement of Uzbekistan, that persuaded the magistrates. US intelligence deriving from the same group was also the trigger for the recent US warnings and travel advisories. **Two of the 11 are now in custody. Rami Makanesi, a German national of Syrian origin, is being held by German special branch after being deported from Pakistan this summer. Ahmad Sidiqi, a German national of Afghan origin, is being held by the Americans at Bagram outside Kabul.** Both are believed to be talking to their interrogators, although a transatlantic credibility gap has opened up over the value of their testimony. Both men were regulars at the Hamburg mosque, with Makanesi the younger and more influential in militant circles, according to the Germans. Sidiqi left Hamburg with his Indonesian wife and younger brother in March last year, pitching up in Peshawar and then Mir Ali, the Taliban and al-Qaida stronghold in Waziristan near the site of the Predator attack. Both men were arrested within weeks of one another in June and July, Sidiqi by the Americans in Kabul, Makanesi by the Pakistanis while disguised in a full-body burqa, apparently trying to make his way from Waziristan to Islamabad. According to German accounts, both were fed up with the fight, wanted to return to Germany, and were trying to reach the German embassies in the Afghan and Pakistani capitals to renew their ID papers. The Berlin media reported yesterday that the Americans were about to move Sidiqi from Bagram to the US, viewing him as a source of high-grade intelligence. A German diplomat in Kabul was allowed to see Sidiqi for the first time last weekend, following weeks of pressure on the Americans. The Germans are also hoping to dispatch a team of spies and interrogators to question him. **The evidence supporting the US terrorism alerts is said to have been gleaned from Sidiqi, who has told the Americans that he met a man claiming to be al-Qaida's new number three, Sheikh Younis al-Mauretani, last spring and that they discussed a fresh wave of attacks in Britain and France, carried out by European passport-holders using sophisticated new encrypted software and laptops. The plot was said to have been blessed by Osama bin Laden.** The problem with all of this, the Germans complain, is that there is no real evidence; the American alerts are so vague as to be

meaningless and the detail being leaked in Washington to Rupert Murdoch's Fox News channel and other US networks is all old. **"There is no new security situation in Hamburg," said Kunz. De Maizi re was withering in Berlin on Wednesday. He described the risk as "hypothetical. There are no direct and specific plans for attacks ... We would rather work seriously instead of talking about it."** Following the US alerts, Britain has been talking up the risks in France, while Paris has been warning of the danger in the UK. Germany has been generally dismissive. If, as Washington contends, Europe is at immediate risk, only Sweden has officially raised the level of terrorism alert. The real German alarm was last year in the run-up to the general election, when al-Qaida issued bloodcurdling threats about what would happen if Berlin did not pull out of northern Afghanistan. One of the radicals in the video warnings was a German national from the Hamburg group of 11. The rest of the detail about attacks on Berlin landmarks and tourist attractions, broadcast this week by US networks, also stems from the same al-Qaida campaign last year. **Yet Germany, spared the kind of attacks suffered by London and Madrid since 9/11, is nonetheless very worried about the Hamburg group and other German nationals travelling in increasing numbers to Pakistan for training. The security service estimates the number of Muslims in Germany supporting "Islamist aims" at 36,270 last year, the highest figure since the 2001 attacks on America.** The assessments also reveal that Hamburg is seen as a magnet in Germany for Islamist "holy warriors". Of an estimated 200 hard-core "jihadists" in Germany, 45 are in the northern port, according to national counter-intelligence. "They advocate or support the worldwide armed struggle according to al-Qaida ideology in the form of propaganda, logistical, financial or other forms of help and see this as a legitimate means in the fight against 'unbelievers'," said the May counter-intelligence report. Until recently, Mohammed Atta's mosque continued to play a central role: "The [Hamburg] group was formed in the Taiba mosque ... **The unifying factor for the radicalisation of the members was certainly the common attendance of this mosque,**" said the report. Which raises the question of why the mosque was not closed down earlier or why it was closed down at all since, riddled with intelligence bugs, it was arguably the most closely watched building in Germany. **"Banning the mosque was not right,"** said Mustafa Yoldas, a Hamburg GP and head of the Schura, an umbrella organisation of more than 30 mosques in the city. **"Now these people are all over Hamburg in private flats and you need to watch 20 places instead of one."** Udo Steinbach, a national expert on Islam and former head of Hamburg's German Orient Institute, said the threat of Islamist violence in Hamburg was minimal because of the comprehensive surveillance of suspects. **"There was no need for this step. The mosque used to have clear links to Pakistan, but it was no longer a danger."** Kunz agreed that the August closure of the mosque was not a panacea, but it helped. **"These people have not disappeared from the face of the earth,"** he said. **"They've just gone elsewhere"** (Traynor, 2010).

**Title/Headline:** *Pentagon: Elements In Pakistani Intelligence Agency Support Terror*

**Abstract:** The Pentagon acknowledged Thursday that some parts of Pakistan's intelligence agency are cooperating with terrorist groups as a new report suggests Inter-Service Intelligence agents are working to undermine U.S. and NATO forces in Afghanistan. Spokesman Col. Dave Lapan said the Pakistan intelligence service as an organization does not support terrorism, but some elements within the ISI are providing assistance to terrorists. U.S. officials have raised concerns about whether some members of the ISI "might be interacting with terrorist organizations in ways that aren't consistent with what the government and military are doing," Lapan said. Lapan was responding after a report in The Wall Street Journal that suggested the ISI is pushing the Taliban to keep fighting in Afghanistan, undermining efforts by the Pentagon to end the war. **The Journal quotes an Afghan commander in Kunar province who said the ISI is still urging and paying Taliban to fight NATO soldiers. Pakistan's top military leadership is working to correct the problem,** Lapan said, but "like any large organization, change is difficult and comes slowly." **"The ISI has done a great deal in fighting terrorism. Some have said they probably have killed more terrorists than any other organization. But we also have some concerns with the strategic focus of the ISI,"** Lapan said. Lapan spoke as U.S.-Pakistani relations remain strained over the effort to end the Taliban's use of Pakistan as a safe haven to launch attacks into Afghanistan. White House Press Secretary Robert Gibbs said Thursday that President Obama has not spoken to Pakistani President Asif Ali Zardari but a Pakistani delegation is due in Washington later this month as part of a continuing strategic dialogue. Other strains have added to the burden on U.S.-Pakistani ties recently. On Wednesday, the U.S. apologized for a Sept. 30 attack that killed two Pakistani border guards. Expressing condolences, the U.S. said the helicopters mistook them for insurgents being pursued across the border from Afghanistan (Fox News, 2010).

**Title/Headline:** *Red Corner Notice Against Five Pakistanis For 26/11*

**Abstract:** Interpol, at India's behest, has issued Red Corner Notices (RCN) against five people, including a retired and two serving Pakistani army majors, for their direct role in the 26/11 Mumbai terror attacks. The RCNs have been issued against HuJI commander Ilyas Kashmiri, Lashkar-e-Taiba terrorist Sajid Majid, serving Pakistani army officers Major Iqbal and Major Sameer Ali and retired officer Major Abdur Rehman on the basis of non-bailable warrants secured against them by the National Investigating Agency (NIA) through a Delhi court. The global arrest notice against Kashmiri comes at a time when intelligence agencies have found inputs about his involvement in other plots against India as well. **The names of the five men were disclosed by American terrorist David Coleman Headley during his interrogation by NIA and the FBI. "Besides the Mumbai terror attack, they were involved in a series of attacks in India from time to time,"** the RCNs issued against them said. Though Pakistan has a history of ignoring the world police body's notices against terrorists, the move may put some pressure on it to deliver on its promises to the international community. The case of Lashkar founder and JuD chief Hafiz Saeed -- against whom India had secured an RCN in the wake of 26/11 -- is a blatant example of Pakistan's stand over Interpol and UN Security Council notices against terrorists linked to al-Qaida. Saeed, despite being put on the list of global terrorists, has not only been moving freely in Pakistan but has also been making provocative anti-India and anti-America speeches in various public gatherings. **Another Lashkar commander and one of the 26/11 masterminds, Zaki-ur-Rehman Lakhvi, is the other accused against whom Interpol had issued an RCN in the Mumbai attack case.**

All these terrorists along with others, including Zarah Shah, Abu al-Qama and Abu Kahafa, had closely worked with Headley in executing LeT's plot to attack Mumbai in November 2008 in which 160 people, including six US citizens, were killed. LeT's operational commander Sajid Majid alias Sajid Mir of Lahore had played a crucial role in planning and executing 26/11. He was also one of the handlers of Headley who was arrested by FBI at Chicago airport in October last year. **HuJI commander Ilyas Kashmiri is also a member of al-Qaida's deadly 313 Brigade, which is believed to be one of the outfits that trained the 10 Mumbai attackers, including the arrested Ajmal Kasab.** Headley's interrogation and subsequent investigation revealed that serving Pakistan army officers Major Sameer Ali and Major Iqbal, along with the retired Major Syed Abdur Rehman, had worked with Lashkar to carry out the 26/11 attack (The Times Of India, 2010).

**Title/Headline:** *Uganda World Cup Blasts: 36 Suspects, 7 Countries*

**Abstract:** Ugandan police investigators are right, the size of the conspiracy behind the twin bombings during July's World Cup finals could hardly have been bigger. **Ugandan police — with help from the FBI and Kenyan police — have arrested 36 people from seven countries in the wake of blasts that rocked Uganda's capital, killing 76 people. The suspects hail from at least three countries with known terror links: Somalia, Yemen and Pakistan.** At least one suspect said he was recruited and trained by al-Qaida. The Somali militant group that claimed responsibility for the blast, al-Shabab, has known links with the international terror group. Uganda's director of military intelligence, James Mugira, has said al-Qaida is at least partly responsible, although authorities believe the planning took place in Somalia. **A day after the blasts, al-Shabab, Somalia's most powerful militant group, said the bombings were retaliation for Ugandan troops' participation in the African Union peacekeeping mission in Mogadishu. The militant group promised more attacks, a threat Ugandan officials take seriously. "Uganda cannot say that what happened on July 11th, 2010 cannot happen again,"** said army spokesman Felix Kulayigye. "It has happened in countries with better technology and better-facilitated security organizations than ours. We can only minimize it but cannot stop it." The suspects in custody come from a wide background: businessmen, university students, and leaders of small mosques. Other suspects come from Kenya, Rwanda, Tanzania and Uganda. **"The conspiracy is really very big,"** said James Okello, a senior police investigator told The Associated Press. "It involves many people who also seem to be well-funded." Edward Ochom, the head of Uganda's criminal investigations department, said the arrests show Uganda can successfully hunt down terrorists on its soil. **"It was not by mistake that we arrested those people," Ochom said. "Police have sufficient evidence that all those charged in courts of law with terrorism were somehow involved in the planting of the bombs." Human rights officials, though, say some of the suspects have nothing to do with the bombings and were taken in because they are people of interest to the FBI and Kenyan authorities. Lawyer Ladislaus Rwakafuuzi represents eight Kenyans charged in the attacks. He said there is no evidence against most of his clients. Ugandan authorities "are only interested in interrogating the bombers," Rwakafuuzi said. "The rest are being interrogated by the FBI and Kenyans."** At least 10 human rights organizations in Kenya dispute the arrest of Al-Amin Kimathi, an activist with the Muslim Human Rights Forum in Nairobi. A U.S. Embassy spokesman in Kenya said previously that no representative of any U.S. agency was involved in any way in Kimathi's arrest, detention or questioning. Private investigator Luswata Ntusi said the only reason authorities have been able to locate so many suspects is because a fourth bomb at a third venue — a dance club — did not go off. **The other bombs went off at a restaurant and an outdoor sports facility where people had gathered to watch the game. One suspect, Haruna Luyima, was supposed to set off a bomb at the dance club but changed his mind at the last minute. Luyima told a news conference in August that he did so because he didn't want to kill innocent people. Police later found his discarded mobile phone, a huge lead that helped unravel the plot. "After failing to set off the bomb, Luyima went and told some close relatives that he had been recruited to plant the bomb by his elder brother Isa Luyima and that he had not blasted his,"** Ntusi said. "The relatives are likely to have reported to police and that led to the arrest of many people involved. He made the work of police easy." Another suspect in custody, Mohamood Mugisha, has said he was given \$4,000 by al-Shabab militants to help plan the attacks, including renting a house in Uganda. Mugisha says he drove the bombs in from Somalia, via Kenya, and he hinted that ethnically Somali police in Kenya were in on the plot and helped with border crossings. For now, police in Uganda have increased their force's counter-terrorism training. There are more plain-clothes police on the streets and at government facilities. New bomb-scanning machines have been set up at shopping malls, bars, hotels and banks. James Kasolo lost a cousin in the July attack. Like many Ugandans, he is worried about a second bombing, but he also worries that Ugandan authorities may now be moving too close to a security state. **"My daily fear is that they might hit again. I am worried," he said. "But again, these security men are everywhere, and unfortunately they scare me as well"** (Fox News, 2010).

**Title/Headline:** *Blunt US Warnings To Pakistan Prompted By Terrorism Fear: Officials Worry About Attack On US Soil By Pakistan Group*

**Abstract:** Washington's push on Pakistan to get tough on militants on its territory is prompted by worries about an attack on U.S. soil, a concern the United States will press in talks with Islamabad later this month. A U.S. official last week countered suggestions that the tougher approach is driven by the need to show progress ahead of the Oct. 22 talks by an Obama administration strategy review of the war in Afghanistan in December. The failed Times Square bombing in May and the recent terrorism alert for Europe fueled fears of an attack, prompting the stepped up drone attacks in Pakistan's rugged northwest and pointed U.S. comments pressing Islamabad's to pursue militants more aggressively. **"There is really mounting concern that we are extremely vulnerable to an attack from a group in Pakistan that could occur,"** the U.S. official said, speaking on condition of anonymity. Such an attack would trigger a critical change in ties with Islamabad, the official warned. **"(An attack) will change the nature of the relationship, not because necessarily it makes sense to, but because the congressional outcry and the public outcry will be such that you will have to dramatically do things quite differently,"** the official added. Blunt words in Washington about Pakistan's failure to aggressively go after insurgents coincided with a

cross-border incursion by U.S.-led NATO forces that killed two Pakistani frontier guards and wounded several others. The incident ignited public outrage and prompted officials to close a key border crossing to NATO supply convoys for days. While Pakistanis burned trucks carrying war goods, U.S. officials publicly apologized to Islamabad for the incursion on one hand while holding their ground on the need for the Pakistani military to deal aggressively with insurgent groups. **"We have a very difficult and complicated situation in Pakistan. We have worked hard on this relationship. We understand it's important to our security,"** White House spokesman Robert Gibbs said last week.

**Talks Coming Up:** The latest tensions come just ahead of the U.S.-Pakistani Strategic Dialogue later this month, and the Washington talks would go more smoothly if the strains of the last two weeks were patched up by then. **"I think it's going to be critical in the next few weeks as they prepare for the strategic dialogue between Pakistan and the U.S. ... that they don't have any of these flare-ups, neither do they have any lingering doubts about each others intentions,"** said Shuja Nawaz, director of the South Asia Center at the Atlantic Council, a Washington think tank. That will require a lot of "direct communication," he added, and not dealing with each other via the media. The administration official agreed that "ratcheting up pressure on Pakistan ... is not the way to get them to do things." **"With Pakistan, as with most countries, the more public and vocal you are, the harder things get,"** he said. **But the United States will continue to deliver the message that Pakistan needs to do more against insurgent groups, even at the strategic review. "It doesn't need to be confrontational,"** the official said. "We will continue with this message," he said. "We have constant communications with the Pakistanis. They know where we're at." U.S.-Pakistani relations are dogged by suspicion and mistrust. Although it has repeatedly engaged with Pakistan over the years, the United States has just as frequently cut off aid and disengaged, to punish Islamabad for actions like pursuit of nuclear weapons or through disinterest. [nN09172943] **"It's been like a roller coaster going back nearly 60 years,"** said Teresita Schaffer, head of the South Asia program at the Center for Strategic and International Studies.

**Afghanistan Time Tables:** Some analysts said the most recent flare-up appeared to be driven by the U.S. need to show some progress ahead of President Barack Obama's December strategy review for the Afghanistan war, which is expected to set the stage for the start of a U.S. transition out of the country in July 2011. **"What seems to be driving all this is the shortening U.S. timetable for beginning the transition out of Afghanistan and the need to create some military momentum and space,"** Nawaz said. Unless Gen. David Petraeus, the top NATO commander in Afghanistan, can show significant movement toward U.S. objectives by July 2011, he will have difficulty justifying maintaining 100,000 U.S. troops in the country, a congressional aide said on condition of anonymity. A congressionally mandated White House report sent to Capitol Hill this week assessing the war strategy said Pakistan had failed to move aggressively against al Qaeda and the Afghan Taliban last spring, in part for political reasons. **The Obama administration official denied any "Machiavellian plan"** to put pressure on Islamabad to move more aggressively ahead of the U.S.-Pakistan Strategic Dialogue or Obama's December strategy review. **"The report was due when it was due,"** the official said, **calling it a candid assessment to help Congress understand the challenges. The remarks highlighted in news accounts were more negative than the overall report, including classified sections that remain secret,** he said. **"We were trying to tell Congress that the situation in Pakistan is rather dire and that we're concerned,"** the official said. **"We're worried that the day after tomorrow, there could be an attack that originates from Pakistan, from one of these groups, and that things will change dramatically"** (Reuters, 2010).

**Title/Headline:** *New Qaeda Mag Features "Proud" U.S. Traitor*

**Abstract:** The group behind the failed Christmas Day bombing has released the second installment of its new English-language magazine, Inspire, featuring a North Carolina man who says he is "proud to be a traitor to America." **"I am a traitor to America because my religion requires me to be one,"** writes 24-year-old Samir Khan, a U.S. citizen now believed to be in Yemen. **"We pledge to wage jihad for the rest of our lives until either we implant Islam all over the world or meet our Lord as bearers of Islam."** Khan's piece strongly criticizes the United States for "kill[ing] millions of Muslims around the world" and "get[ting] away with it wearing a tuxedo." **It also describes how he become a devout Muslim and "could no longer reside in America as a compliant citizen."** After the first edition of Inspire was released in July, U.S. officials told Fox News that Khan was likely a key player behind the magazine, with his old website and blog's graphics bearing a strong resemblance to the graphics found in the magazine. **The latest edition of the magazine, 74 pages long, also features "exclusive" comments by radical cleric Anwar Awlaki on "The Mardin Declaration," a condemnation of terrorism issued in March by Muslim scholars meeting in the Turkish city of Mardin.** In his comments, the U.S.-born Awlaki, who is now hiding in Yemen and has been tied to the Fort Hood shootings and the failed Christmas Day plot, calls the declaration a "disgrace" and "not worth the ink and the paper it's written on." **The magazine's cover story, meanwhile, relates to operations taking place in Abyan, a region of Yemen where militants have carried out deadly attacks on Yemen's military forces. Yemen's government has been struggling to root out Al Qaeda in the Arabian Peninsula, or AQAP, the group that trained and equipped Nigerian Umar F. Abdulmutallab for his bombing attempt over Detroit in December.** The latest edition of the magazine was obtained by the Washington-based Middle East Media Research Institute, which provided a copy of it to Fox News. In July, after the first edition of Inspire magazine was released, the Department of Homeland Security's Office of Intelligence and Analysis issued a note to local law enforcement across the country warning them that the magazine "encourages Western readers to conduct attacks in the West and to join the 'jihad.'" The first edition included articles by Usama bin Laden and Awlaki. **What's more, in an article titled "Make a Bomb in the Kitchen of Your Mom," the magazine provided "step-by-step instructions for constructing a pipe bomb using readily accessible items,"** according to the note. **In the most recent edition, the magazine suggests Muslims use pickup trucks "as a mowing machine, not to mow grass but [to] mow down the enemies of Allah." "DHS and the FBI are concerned ... that the sophisticated, colloquial English-language magazine could appeal to certain Western individuals and inspire them to conduct attacks in the United States in the future,"** the DHS note in July said. **"As AQAP's first official publication geared towards English-speaking readers, Inspire reflects the group's interest in reaching a Western audience and is a significant addition to the group's media campaign"** (Levine, 2010).

**Title/Headline:** *Osama Is Not In Pakistan, Says Haqqani*

**Abstract:** Pakistan's Ambassador to the US Hussain Haqqani rejected a NATO official's claim on Monday that al Qaeda Chief Osama bin Laden is living comfortably in a house in the northwest of Pakistan, saying there was no basis to it. "This is speculation because if he knew it, it would be actionable intelligence and we would act on it," he said on CNN, citing NATO official, who was not named. "I mean, we can speculate on certain people in NATO and Afghanistan living it up, but that's just speculation. Why should we get into the speculation?" "The reason why this statement is not made officially and publicly by NATO is because they do not have any basis to make that statement," ambassador Haqqani added. When asked whether some elements in ISI were protecting the al Qaeda leader and his deputy Ayman al-Zawahiri, he said, "If anybody who thinks that Pakistan or any other state, for that matter, has any interest in protecting Bin Laden, who has brought nothing but mayhem to the world, is smoking something they shouldn't be smoking." When pressed that the statement on Osama Bin Laden was made by a NATO official, the Pakistan envoy said, "They would say that so that no one asks them questions about what their own performance is in Afghanistan. But that said, if this would have been a serious matter, they wouldn't be saying it off the record or on background. They would say it publicly," he added. "Publicly, the fact remains that all the success that the US has had in apprehending al Qaeda personnel in Pakistan had been with the help of Pakistan's intelligence services, the same ISI that everybody insists on demonising." Responding to another question, Haqqani said that NATO and US had shared no intelligence with Pakistan about Osama Bin Laden over the past few years (Daily Times, 2010).

**Title/Headline:** *Pakistan PM Sees No Chance Of Military Coup*

**Abstract:** Pakistan's prime minister on Tuesday rejected calls by opposition politicians for midterm elections and said there was no chance of the country's powerful army seizing power as it has often done in the past. The government of President Asif Ali Zardari is unpopular among many Pakistanis and is under pressure from the Supreme Court over corruption allegations. It has been dogged by speculation and rumors that it is on its way out almost from the day it took office. Zardari, the husband of slain former Prime Minister Benazir Bhutto, insists he will see out his five-year term until it ends in 2013. His supporters note that his party has a majority in parliament, meaning there is no constitutional way of ending it early. Prime Minister Yousaf Raza Gilani said in parliament on Tuesday that the army was "pro-democracy" and would not impose martial law. He said those calling for the dissolution of parliament and fresh elections were trying to break up the country. The army has seized power from civilian governments several times before in Pakistan's turbulent history, but many commentators say it does not currently have the appetite to stage a coup. However, it remains a powerful political force that would have to endorse any move to get rid of Zardari. Zardari is head of the ruling Pakistan Peoples Party, of which Gilani is also a member. Opposition spokesman Sadiqul Farooq said the government had failed to improve the economy, restore peace and provide even basic facilities to the people. "The government will not survive. You will see midterm elections soon," he predicted. Despite Farooq's remarks, opposition leader Nawaz Sharif has so far avoided directly calling for Zardari to step down or actively leading a campaign to destabilize the government. Many analysts say Sharif is well positioned to win the next elections but is no rush to take power, especially given the perilous state of the country. He may prefer to see the government limp along to 2013 and win those polls, untainted by charges of bringing down an elected government midterm (Fox News, 2010).

**Source:** Fox News, The Wall Street Journal

**Title/Headline:** *Al Qaeda in Pakistan Aids Yemen Terror Plots*

**Abstract:** Usama bin Laden and other Al Qaeda leaders are believed to be providing strategic and philosophical guidance from Pakistan to Yemen-based Al Qaeda in the Arabian Peninsula, or AQAP, the group Washington believes was behind last week's attempt to ship bombs in packages to the U.S. Increased communication and collaboration between Al Qaeda militants in Yemen and the group's central leadership have fueled alarm about terrorist plots which U.S. and European officials first detected months ago and which they believe remain active despite efforts to thwart them. Some officials said the release of a bin Laden audiotape last week might have been the signal for AQAP to set the package-bomb plot in motion, though others said it was too soon to tell whether there was a direct connection. Seen as Al Qaeda's most active and ambitious affiliate, AQAP has at times sought the blessing of Mr. bin Laden on leadership decisions. Direct command-and-control for terror operations is believed to rest chiefly with the local affiliate, officials said. Officials say their knowledge about suspected ongoing plots in Europe is limited. Security concerns have been heightened further by a spate of mail-bomb attempts this week that appeared to target European leaders and institutions, and the disclosure that Britain arrested a member of AQAP earlier this year for allegedly plotting a U.K. attack. U.S. officials have kept in place a broad travel alert issued on Oct. 3 advising Americans to show vigilance when traveling in Europe. One of the plots of concern, officials say, is a potential Al Qaeda attack in the U.K., Germany or France modeled after the siege on Mumbai in 2008 that killed over 160 people. "Nobody thinks last week was the whole enchilada," a senior counterterrorism official said of the cargo-bombing plot. "There are still things in play." Officials said counterterrorism operations in Pakistan don't appear to have disrupted the multiple plots, in part because sleeper cells may already be in place in European cities. European authorities have launched an expanded manhunt for individuals who may be involved (Wall Street Journal, 2010).

**Title/Headline:** *New York Victims Of Mumbai Terror Attack Sue Pakistan*

**Abstract:** Family members of two New Yorkers gunned down during the 2008 Mumbai, India, terror attacks are suing Pakistan's intelligence agency along with a militant organization they say are responsible for the deaths. Rabbi Gavriel Noach Holtzberg and his pregnant wife, Rivka, were among the more than 160 people killed during the attacks. During the incident, 10 men stormed buildings such as the luxury Taj Mahal Palace and Tower, the Oberoi-Trident hotels, a train station and a Jewish cultural center. The only surviving gunman, Mohammed Ajmal Kasab of Pakistan, was convicted of murder, conspiracy and waging war. The Pakistan-based militant group Lashkar-e-Tayyiba, which has been blamed for the November 2008 siege, is also named in the suit. Holtzberg's relatives allege that Pakistan's Inter-Services Intelligence agency aided the militant group in the attacks. The wrongful death lawsuit filed last week in federal court in New York says the intelligence agency "provided critical planning, material support, control and coordination for the attacks." Family members are seeking monetary damages but did not specify an amount. The families' lawyer, James Kreindler, was part of a successful lawsuit against Libya in connection with the 1988 explosion on Pan Am Flight 103 that killed 259 people over Lockerbie, Scotland, as well as 11 people on the ground (CNN, 2010).

**Title/Headline:** *ISI, LeT Sued In New York For 26/11*

**Abstract:** Pakistan's Inter-Services Intelligence (ISI) and terror group Lashkar-e-Taiba are being sued by the family of an American couple and their unborn child who were slain by militants during the Mumbai terror attacks of 2008. The lawsuit, filed in a federal court in Brooklyn, New York, on Friday afternoon last week, alleges wrongful death on behalf of Rabbi Gavriel Noah Holtzberg and his wife Rivka, who was pregnant at the time. Both were both gunned down at the Chabad Lubavitch in Mumbai. The Holtzbergs were killed even as their two-year-old son Moshe survived the attack, after being whisked off to safety by his nanny, Sandra Samuel. Reports said that the grandfather of Moshe, who now lives in Israel, was one of the plaintiffs. Media reports added that the plaintiffs, including the relatives of two other victims of the terror attack, alleged that the ISI had aided the 10 men carrying out the commando-style attacks that left more than 160 people dead. An extract from the lawsuit reportedly said that the ISI had "provided critical planning, material support, control and coordination for the attacks." Speaking to The Hindu, James Kreindler, lawyer representing the plaintiffs, said: "We have sued both the LeT, the leaders of LeT, the ISI and top ISI people, who have been identified as being involved in providing support to LeT." He clarified that the government of Pakistan had not been sued. Mr. Kreindler explained that under the United States' anti-terrorism law, the plaintiffs had the right to sue the defendants in the U.S. Noting that this lawsuit represented "nearly all of the U.S. victims," of the attack, Mr. Kreindler said that the civil suit sought compensatory and punitive damages of over \$75,000, the jurisdictional limit for filings in federal courts. Mr. Kreindler said: "Obviously, Pakistan is an ally of the U.S. in the war in Afghanistan and our efforts to fight Al-Qaeda... We know, however, that ISI has straddled some fences and while Pakistan is certainly cooperating with us, the ISI has used [LeT] for its own purposes." While the U.S. and Pakistan had a "complicated relationship," the case had been presented in a "responsible, non-inflammatory and low-key way," and it would also serve a public function in terms of the fight against terror, he said. Mr. Kreindler is renowned for his success in leading a civil suit against the government of Libya and its intelligence agencies following the 1988 Lockerbie bombing case, in which a bomb brought down Pan Am Flight 103 over Scotland, killing 270 people on board (Lakshman, 2010).

**Title/Headline:** *Spain Arrests 7 Suspected Extremists*

**Abstract:** Spanish authorities arrested seven alleged Islamist extremists Wednesday who dealt in providing stolen travel documents to terrorist groups, the national police said. Police say the seven are linked to al Qaeda. Six suspects were from Pakistan and one from Nigeria, police said. Investigators arrested three others in Thailand; they are accused of directing the operation in Spain. According to police, the cell was dedicated to stealing travel documents, mostly passports, and sending them to Thailand, where they would be falsified and turned over to groups with links to al Qaeda, such as Lashkar-e-Taiba, a militant group based in Pakistan. The documents also ended up in the hands of the Tamil Tigers, a rebel force in Sri Lanka, police said. Since the March 11, 2004 commuter train bombings in Madrid that killed 190 and wounded 1800, Spanish police, working with other international police forces, have kept a close eye on suspected Islamic radicals living in or transiting through the country. There have been numerous previous arrests for alleged support work, like these arrests, involving forged documents (CNN, 2010)

**Title/Headline:** *Pakistan Police Face Arrest Over Benazir Bhutto Murder*

**Abstract:** An anti-terrorism court in Pakistan has ordered the arrest of two senior police officers accused of negligence in the killing of former PM Benazir Bhutto. She died in a 2007 gun and suicide attack in the city of Rawalpindi. A special prosecutor says the officers - who include Rawalpindi's ex-police chief - had failed to make proper arrangements and then ordered the crime scene to be prematurely hosed down. A UN report released in April said the killing could have been prevented. The report - the result of a United Nations commission of inquiry - accused the Pakistani authorities of severely hampering the investigation and said no credible inquiry should rule out the possibility of involvement of members of the country's military and security establishment. The

UN report also criticised the Pakistani police's decision to hose down the crime scene, and said its failure to collect and preserve evidence "inflicted irreparable damage to the investigation". On Sunday an anti-terrorism court issued warrants for the arrest of two senior police officers, said special prosecutor Chaudhry Zulfikar Ali. **"The court has issued warrants and these are non-bailable. They can be arrested anytime,"** he told Reuters news agency. **"I argued that they were responsible for Bhutto's security and they failed to make foolproof security arrangements and they ordered the crime scene to be hosed down despite resistance from other officials."** He named the two as Saud Aziz, the former Rawalpindi police chief, and Khurram Shahzad, one of his deputies. They were not immediately available for comment. The court will resume proceedings next Saturday. Ms Bhutto was killed after an election rally, where she was campaigning ahead of parliamentary elections, just weeks after returning from exile. A government investigation blamed the then supreme commander of the Taliban in Pakistan, Baitullah Mehsud. **He denied being involved in the assassination and was killed in a suspected US missile attack in August 2009. Five militants are already facing trial for alleged involvement in Bhutto's murder** (BBC, 2010).

**Title/Headline:** *Son Of Notorious Insurgent Leader Is Arrested*

**Abstract:** A key member of an insurgent network in the Afghan-Pakistani region has been seized recent days, Pakistani military intelligence sources told CNN on Friday. He is Nasiruddin Haqqani, son of Afghan insurgent leader Jalaluddin Haqqani, whose notorious group, called the Haqqani Network, operates in Afghanistan and Pakistan and is closely tied to the Taliban. Nasiruddin Haqqani was detained in recent days while driving from Peshawar to the tribal region of North Waziristan, the sources said. **The United Nations says he is believed to be based out of Miram Shah in North Waziristan, where the network operates. The Pakistani military intelligence sources asked not to be named because they are not authorized to speak to the media.** This arrest comes amid concerns among U.S. officials that Pakistan has not been aggressively confronting militants operating in the tribal regions. **The Haqqani Network "has been at the forefront of insurgent activity in Afghanistan, responsible for many high-profile attacks,"** the United Nations says. Bill Roggio, managing editor of The Long War Journal, a website that tracks terror-related events and trends, calls the top leadership a "family business." The United Nations says it consists of Jalaluddin Haqqani's three oldest sons, one of whom is Nasiruddin, who operates as an emissary for the network and spends a lot of time fundraising, the United Nations says. He apparently speaks Arabic and is a close aide to his father, the United Nations says. His brother, Sirajuddin, is described by the U.S. Treasury Department as the overall leader of the network and the leader of the Miram Shah Regional Military Shura. **The United Nations says the Haqqani Network is believed to have three main sources of funds: Gulf region donations, drug trafficking, and al Qaeda payments. "In 2004, (Nasiruddin) Haqqani traveled to Saudi Arabia with a Taliban associate to raise funds for the Taliban. He also provided funds in 2004 to militants in Afghanistan for the purpose of disrupting the Afghan presidential election. "From at least 2005 to 2008, Nasiruddin Haqqani collected funds for the Haqqani Network through various fundraising trips, including during regular travel to the United Arab Emirates in 2007 and through a fundraising trip to another Gulf state in 2008,"** the United Nations said. And late last year, Nasiruddin Haqqani "received several hundred thousand dollars from al Qaeda-associated individuals in the Arabian Peninsula" for network activities. Earlier this year, the U.S. Department of the Treasury cited Nasiruddin Haqqani for supporting acts of terrorism. Sirajuddin Haqqani was designated a supporter of terrorism in 2008. Many observers say the North Waziristan-based group has backing in the Pakistani military. **"Elements within the Pakistani security establishment continue to view the Haqqani Network as a useful ally and proxy force to represent their interests in Afghanistan. To this end, Haqqani forces have repeatedly targeted Indian infrastructure and construction projects in Afghanistan,"** the Institute for the Study of War said in a report this year. **"The Pakistani Army has consistently refused to launch a military operation in North Waziristan despite the presence of al Qaeda senior leadership,"** it said. A report published earlier this year by the New America Foundation think tank calls the Pakistani agency of North Waziristan "the most important springboard for violence in Afghanistan today, much as it has been for decades." And it says the Haqqani Network is "the most important militant group" in North Waziristan's Miram Shah, where Jalaluddin Haqqani settled in the mid-1970s after leaving his native Khost province in Afghanistan. **"Jalaluddin quickly became the most important mujahedeen commander in eastern Afghanistan during the 1980s" when Afghan fighters took on the Soviet Union,** the report says. North Waziristan has been a "safe haven" for militants eluding U.S. and Pakistani military actions, it notes. **"Shortly after the fall of the Taliban regime in Afghanistan in late 2001, thousands of Taliban members associated with the regime flooded into North Waziristan,"** according to the report, titled "The Battle for Pakistan: North Waziristan." "Many took shelter in (North Waziristan's) treacherous and heavily forested Shawal Valley, which became a refuge for all sorts of foreign militants, including those from al Qaeda. Pakistani government forces subsequently targeted other Pakistani safe havens, including South Waziristan. In 2004, a wave of militants arrived in North Waziristan after being pushed out of South Waziristan's Shakai Valley. More recently, a variety of militants associated with the Mehsud tribe in South Waziristan is believed to have sought safe haven in North Waziristan." **Will the arrest make an impact in the war against the Taliban? Roggio doubts it. He says the Haqqanis are one of the Pakistani state's premier proxies and puts them on par with Lashkar-e-Tayyiba, the Pakistan-based group that was blamed for a violent siege on Mumbai in November 2008. He notes that there has been pressure to appease and deflect pressure from the United States and NATO. "When the heat gets turned up,"** he said, **Pakistan will make a gesture but "not a real sacrifice"** (Lawrence, 2010).

**Title/Headline:** *Pakistan's Release Of Militant Stirs Questions*

**Abstract:** He is a self-declared warrior against U.S. and NATO troops in Afghanistan. He allegedly ran terrorist training camps there when the Taliban was in power. He was suspected of involvement in the attempted assassination of two Pakistani leaders. And today, Qari Saifullah Akhtar is free. Punjab Law Minister Rana Sanaullah, the top judicial official in Akhtar's native Punjab

province, told The Associated Press he was released from four months of house arrest in early December because authorities finished questioning him in connection with the October 2007 attempted assassination of former Prime Minister Benazir Bhutto and found no grounds to charge him. Bhutto was killed in December the same year. However, one U.S. official said Akhtar has extensive ties to al-Qaida and other terrorist groups and is someone who should not be free to walk around the streets of Pakistan or any other country. The official spoke on condition of anonymity because he was not authorized to speak to the media. **Former U.S. intelligence officials and analysts said Akhtar's release is yet another sign of Pakistan's reluctance or inability to crack down on the most dangerous terrorist organizations.** The leader of Lashkar-e-Taiba, Hafiz Saeed, was freed from custody on more than one occasion and is currently free. Lashkar-e-Taiba, headquartered in Punjab, is believed to be the mastermind behind the November 2008 Mumbai attacks that killed 166 people. As part of Pakistan's battle with neighbor India, the military and intelligence helped train and arm militant groups who fought in the disputed Kashmir region. **Many of those groups cut their teeth on guerrilla warfare in the U.S.-backed 1980s insurgent war against Russian soldiers in Afghanistan. But military and intelligence officials have told The AP their relationship with such groups was severed after the Sept. 11, 2001 attacks, which marked a turning point that moved Pakistan into a closer alliance with the U.S.** However there are lingering concerns that some links with militants remain. Pakistani military officials say the military and intelligence services fighting insurgents in the northwestern tribal regions along the border with Afghanistan are stretched too thin to open another front against militants in the Punjab. The officials spoke on condition of anonymity because they are not allowed to talk to the media. **A number of militant groups active within Pakistan are headquartered in Punjab, where 60 percent of Pakistan's 170 million people live. Religious tensions have been running so high in the province that its governor, Salman Taseer, was assassinated by one of his own bodyguards last week for criticizing blasphemy laws that impose the death penalty for a variety of religious offenses, including insulting Islam.** The bodyguard has been celebrated as a hero by many in Pakistan. Military officials said that gathering actionable intelligence in the tribal regions, where some al-Qaida's leaders are believed to be hiding, has been deadly. **A senior intelligence official told the AP Pakistan has lost more than 50 spies killed by militants. "I think it is clear that Akhtar is going to go back to the front lines of the fight against the United States,** which complicates our mission in Afghanistan, and threatens the stability and security of the region in general," says Charles Bacon a U.S.-based intelligence analyst. **Pakistani and U.S. analysts say Akhtar's release reflects a growing lack of control by the country's security agencies over one-time prodigies who have broken away and turned their weapons on the state.** Mohammed Amir Rana, who runs the Pakistan Institute for Peace Studies, said freeing Akhtar was a desperate attempt by the security agencies to reunite militant groups whose members have splintered into smaller groups and in some cases, turned against Pakistan because of its support for the U.S.-led war in Afghanistan and its attacks on the Taliban at home. **Bhutto had named Akhtar as a person she feared might try to kill her. To protest his innocence, Akhtar's lawyer has filed suit against Bhutto's widower, President Asif Zardari, complaining that Bhutto had referred to his client as her would-be assassin,** said author and defense analyst Ayesha Siddiqi. Bhutto named him as the bombmaker in the October attack on her in her posthumously released book. **"But the real reason is simply that there are elements in the (intelligence) agencies who are sympathetic to these guys,"** said Siddiqi, referring to militants. No charges were ever brought against Akhtar over Bhutto or his suspected involvement in an earlier assassination attempt against former president Gen. Pervez Musharraf, according to Jane's Defense. Akhtar's operational chief Ilyas Kashmiri had connections with some of the Mumbai conspirators. **He was linked to David Coleman Headley, the Pakistani American in jail in the United States for his involvement in the Mumbai attack. Akhtar, who ran al-Qaida linked training camps in Afghanistan during the Taliban rule, has also been linked to five American would-be jihadis arrested in 2008 in Pakistan. Akhtar was also alleged to have masterminded a plot to overthrow her government in 1995, according to Bhutto, but escaped to the United Arab Emirates. During her tenure she had issued a warrant for his arrest. "It is law that a man being investigated and interrogated in sensitive and high-profile cases should be under house arrest and strict vigilance by the police,"** said the Punjab Law Minister Sanaullah. But once the investigation is done and no charges brought, the suspect must be released, he said. Sanaullah, who has given tacit support to banned religious groups, dismissed allegations that the Punjab government, which is run by the conservative Pakistan Muslim League (PML), was afraid to take on militant organizations headquartered in the province. During local elections last year Sanaullah campaigned with the banned Sunni extremist group, the Sipah-e-Sahabah, a forerunner to the al-Qaida affiliated Lashkar-e-Janghvi organization, believed to provide the majority of suicide bombers who have attacked Pakistani targets. **"The one thing I can offer is that Pakistan has had trouble holding the leadership of banned terrorist organizations and extremist groups accountable for anything, either because of perceived legal constraints or concerns about stirring an extremist hornet's nest,"** said Juan Carlos Zarate, a top counterterrorism official in the Bush administration (Fox News, 2011).

**Conclusion:** Pakistan has been accused of almost every single terror attack on the planet, and should a nuclear terror attack occur, they will be blamed for it as well.

## The Nuclear Bible: Pakistan & World War III

**Intro:** While the United States arms Pakistan to the teeth with weapons, planes, and funding, they appear to be simultaneously destabilizing the government and country with an onslaught of attacks consisting of false-flag terror attacks, suicide bombings, relentless drone attacks, hijackings, and the full power of the weather weapon HAARP. Readers unfamiliar with HAARP should research this mega weapon, whose cover is Global Warming/Climate Change. Should a nuclear terror attacks transpire, a raging Pakistan will be further scapegoated, charged, and retaliated against with nuclear weapons.

**Source:** Press TV

**Title/Headline:** *Biden: Pakistan Is My Greatest Concern*

**Abstract:** US Vice President Joe Biden has expressed serious concerns over the growing militancy in Pakistan and the fate of that country's nuclear weapons. Biden said in an interview with CNN that his greatest concern is not Iraq or the standoff over Iran's nuclear energy program. The Vice President said he is most concerned about Pakistan, because it is a country that possesses nuclear weapons and has a significant radical minority. **"I think it's a big country. It has nuclear weapons that are able to be deployed. It has a real significant minority of radicalized population."** Biden added that Pakistan is not a completely functional democracy. **"It is not a completely functional democracy in the sense we think about it, and so that's my greatest concern."** His remarks came as the US Director of National Intelligence Dennis Blair reassured that the Pakistani military is aware of the consequences of its nuclear arsenal falling into the wrong hands. Senior officials in Washington have long accused elements in the Pakistani Inter-Services Intelligence (ISI) of supporting extremists. **President Barack Obama's administration has accused Pakistan of not doing enough to stem the flow of arms and support to the Taliban and Al-Qaeda across its borders.** Analysts say the US invasion of Afghanistan in 2001 has prompted militants to cross the border into Pakistan, turning the restive tribal belt between the two countries into scenes of deadly violence. **Pakistan has also dismissed US concerns, saying its armed forces have full control over the country's nuclear installations** (Press TV, 2010).

**Title/Headline:** *Pakistan Attack Kills Aid Workers*

**Abstract:** Attackers armed with grenades bombed the offices of an international aid group in north-west Pakistan today, killing six people working for the organisation, police said. The attack targeted World Vision, a large Christian humanitarian group helping survivors of the 2005 Kashmir earthquake in Mansehra district. The dead were all Pakistanis and included two women, said a police official, Mohammad Sabir. "It was a brutal and senseless attack," said Dean Owen, World Vision spokesman in Seattle, Washington. **"It was completely unexpected, unannounced and unprovoked."** Islamists often target Christian groups, which they accuse of trying to convert Muslims. Another World Vision spokesman said the group, which was founded 60 years ago in the US and is one of the world's largest and most well-funded Christian aid organisations, had suspended operations across Pakistan as a result of the attack. Al-Qaida, the Taliban and allied groups are strong in north-western Pakistan, but Mansehra lies outside the tribal belt next to Afghanistan where the militants have their main bases. Extremists have killed other people working for foreign aid groups in Pakistan and issued statements saying such organisations are working against Islam. The attacks have greatly hampered efforts to raise living standards in the desperately poor region. Militants see the aid groups as a challenge to their authority. **The aid groups often employ women and support women's rights initiatives, angering the extremists. Many foreign aid groups set up offices in Mansehra after the 2005 earthquake, which killed about 80,000 people.** In 2008 militants in Mansehra killed four Pakistanis working for Plan International, a British-based charity that focuses on helping children (Guardian, 2010).

**Title/Headline:** *200,000 Civilians Flee Pakistan Military Offensive.*

**Abstract:** More than 200,000 people have fled Pakistan's latest offensive against Taliban militants in the northwest, the United Nations said Monday, as fresh clashes in the remote region killed 41 insurgents and six soldiers. Elsewhere in the northwest, a suspected U.S. missile killed five alleged militants in a house in North Waziristan, the latest in a series of strikes in the region, Pakistani officials said. North Waziristan is home to al-Qaida and Taliban commanders, many of whom play a role in the insurgency in neighboring Afghanistan. The military has pounded the Orakzai tribal region with airstrikes and artillery in an attempt to rout insurgents from the rugged, mountainous area near the Afghan border. Many Taliban fighters fled to Orakzai last year to escape a separate army offensive in their tribal stronghold of South Waziristan. **The exodus of civilians from Orakzai adds to the more than 1.3 million people driven from their homes by fighting in the northwest and unable to return.** The U.N. warned Monday it faces a severe shortfall in funding needed to aid those displaced, saying it has only received about \$106 million, or 20 percent, of the \$538

**million appeal it launched in February for the next six months.** Almost 210,000 people have fled Orakzai since the fighting first started at the end of last year, including nearly 50,000 people who left in the last month as the military has intensified its offensive in the area, said the U.N. **The latest violence in Orakzai occurred Monday when dozens of militants armed with rockets and automatic weapons attacked two security checkpoints in the villages of Shireen Dara and Sangrana, local administrator Saaid.** Security forces successfully repelled the attack, but six soldiers were killed and three others wounded, he said. **"More than 100 militants attacked the security checkpoint in Shireen Dara," Khan said. "They fought a gunbattle for two hours and fired several rockets." After the battles subsided, authorities found the bodies of 15 militants around the two checkpoints, said two intelligence officials. Insurgents removed the bodies of at least 26 others who were killed,** they said, speaking on condition of anonymity because they were not authorized to talk to the media. More than 300 suspected militants have been killed in Orakzai since mid-March, including 10 on Sunday when fighter jets destroyed three militant hide-outs in Sangram village, Khan said. **Government reports are almost impossible to independently verify because journalists are prohibited from traveling to the country's semiautonomous tribal areas** (Fox News, 2010).

**Source:** USA Today, Associated Press

**Title/Headline:** *Pakistan To Probe Bhutto Killing After U.N. Report*

**Abstract:** Pakistan said Friday police will launch a new probe into the assassination of Benazir Bhutto after a U.N. report blamed security forces for failing to protect her — accusations dismissed as a "pack of lies" by an aide to ex-President Pervez Musharraf. Bhutto, a former prime minister, was killed in a Dec. 27, 2007, gun and suicide-bomb attack as she was leaving a rally in Rawalpindi city, where she was campaigning to return her Pakistan People's Party to power in elections after returning from nearly nine years in self-imposed exile. **The slaying was the latest in a long line of high-profile political assassinations in Pakistan and convulsed the country, which was then ruled by unpopular military-backed ruler Musharraf and battered — as now — by al-Qaeda and Taliban violence. Supporters of Bhutto immediately hinted that Musharraf or his allies in the powerful and largely unaccountable security forces may have played a role.** The three-member U.N. panel, which was not tasked with unmasking the killers, said Bhutto's death could have been avoided if Musharraf's government and security agencies had taken adequate measures. **It also found that the probe into her death was deliberately hampered by intelligence agencies. The report, issued Thursday, was highly critical of a decision made within hours of the killing to hose down the crime scene and not to conduct an autopsy.** The report was hailed by the PPP, which now governs Pakistan and is led by President Asif Ali Zardari, Bhutto's widower. Zardari aide Farahnaz Ispahani said "the report will pave the way for a proper police investigation and possible penal proceedings." **Presidential spokesman Farhatullah Babar said the report backed up the PPP's belief that Musharraf or his allies were responsible for Bhutto's death.** But Musharraf aide Rashid Qureshi insisted the U.N. report was based on rumors and that Musharraf — currently living abroad — was not responsible. **"This chief U.N. investigator was not the relative of Sherlock Homes," Qureshi told The Associated Press. "It is a pack of lies." He added that Bhutto exposed herself to the risk even after the head of the country's most powerful spy agency, Inter-Services Intelligence, warned her not to attend the rally because of threats of an attack. Musharraf's government blamed Baitullah Mehsud, a Pakistani militant commander with links to al-Qaeda. Officials at the U.S. Central Intelligence Agency also reportedly said Mehsud, who was killed in a missile strike last August, was the chief suspect.** Bhutto was a secular politician with strong links to Western governments and a vocal critic of Islamist militants. The U.N. commission said Musharraf's government, though tracking threats against Bhutto, did little more than pass them on to her and provincial authorities and did not act to neutralize them or ensure "that the security provided was commensurate with the threats." Bhutto's party provided extra security, but the arrangements "lacked leadership and were inadequate and poorly executed," it said. **"Ms. Bhutto faced threats from a number of sources," the commission said. "These included al-Qaeda, the Taliban, local jihadi groups and potentially from elements in the Pakistani Establishment"** — the customary way people here refer to the country's powerful military and intelligence apparatus. The U.N. said the police probe lacked direction and commitment, and that it went after "lower level operatives," not higher-ups. The commission said Inter-Services Intelligence conducted parallel investigations, gathering evidence which was only selectively shared with the police. **"The commission believes that the failure of the police to investigate effectively Ms. Bhutto's assassination was deliberate," the report said. "These officials, in part fearing intelligence agencies' involvement, were unsure of how vigorously they ought to pursue actions, which they knew, as professionals, they should have taken."** Five people have been accused by authorities of involvement in the assassination — although they are not believed to be the masterminds. Officials have said a final charge-sheet against them would only be submitted in court after the U.N. report was examined. A hearing was scheduled for April 21 for the five, jail official Mohammed Zafar said. The commission urged Pakistani authorities to carry out a "serious, credible" criminal investigation that "determines who conceived, ordered and executed this heinous crime of historic proportions, and brings those responsible to justice." **The U.N. secretary-general agreed to appoint a commission to assist Pakistan by determining the facts and circumstances of Bhutto's death and it began work on July 1, 2009, conducting more than 250 interviews and reviewing hundreds of documents, videos, photographs and documentary material.** Under terms agreed to by the U.N. and the Pakistani government, Pakistani authorities would determine any criminal responsibility (USA Today, 2010).

**Title/Headline:** *"The [Pakistani] President's Absence Gives Fundamentalist Groups The Opportunity To Infiltrate The Region"*

**Abstract:** One of our Observers in Pakistan condemns Zardari's tour of France and Britain, asserting that the lack of civilian leadership in overseeing flood relief efforts is allowing militants to infiltrate the region and recruit new members. The flooding in the northern regions of Pakistan have killed around 15,000 people and left several thousand homeless. The people of northern Pakistan are awaiting much-needed aid whilst their president is on a diplomatic tour in Europe. **Meanwhile, charitable organisations affiliated with militant groups, notably Lashkar-e-Taiba and the Falah-i-Insaniat Foundation, are distributing aid.** Sana Saleem is a prominent blogger and social activist from Karachi. The President's absence is very symbolic - the people in the northern region feel abandoned. **The situation is exacerbated by the fact that the government's disaster management is abysmal and gives fundamentalist groups the opportunity to infiltrate the region.** NGOs are always the first to arrive because the government's civil response is so slow; this means that the conditions are ideal for the fundamentalist groups to recruit new people. **I don't blame the people - they are desperate. They were affected by the earthquake in 2005 (although aid and media attention was biased towards Kashmir), then by army clashes with the Taliban insurgents.** On each occasion the militants have infiltrated the civilian population. Already they feel neglected in that region as there is so little infrastructure - for many of the children, the only way to get an education is through the madrasas. **What choice do these people have if the government abandons them and doesn't do what it is supposed to? Zardari's actions are foolish and people here are angry. Although technically Pakistan is a democracy, the fact that the president is out of the country, the militants are dealing with the relief efforts, and the government response is not civilian but military speaks volumes about the state of our democracy. Who is running the country? Zardari should come back and his priority should be getting aid to the people who need it, because if the situation is not tackled soon then this could be a huge security problem in the future"** (Zardari, 2010).

**Title/Headline:** *Facebook Blocked In Pakistan Over Prophet Mohammed Cartoon Row*

**Abstract:** Plans for the "Everybody Draw Mohammed Day" contest drew an angry reaction, provoking street demonstrations in the Muslim majority country. On Wednesday, Lahore High Court responded to a petition by the Muslim Lawyers Movement, ordering Pakistan's internet regulator to block the entire site. Users lost access to Facebook about two hours later. Rai Bashir, a lawyer involved in the case, said the site was blasphemous. **"There are so many insults to the Prophet on the internet and that's why we felt we had to bring this case," he said. "All Muslims in Pakistan and the world will be supporting us." It is widely considered offensive to visually depict the Muslim prophet.** The Koran does not explicitly forbid images of Mohammed, but a number of hadith, or interpretations of the Islamic holy book, forbid figural representations. **The court in Lahore ordered Facebook to be blocked until May 31 -- after the date of the contest -- when a longer hearing is expected. The contest was based on an idea by Seattle-based artist Molly Norris, who posted a cartoon on her website of a chair, cotton reel, cherry and other items each claiming to be Mohammed. However, she said her idea was only ever a spoof. It was meant as a protest against censorship of the television show South Park, she said. The US cartoon recently featured the Muslim prophet dressed in a bear suit. She added that she was horrified that her satire had been turned into a Facebook competition. It is not the first time Pakistanis have reacted angrily to depictions of the Prophet Mohammed. Tens of thousands of protesters took to the streets in 2006 when cartoons, which had originally been published in a Danish newspaper, were reprinted around the world. Five people died when the demonstrations turned violent. Lawyers for the Pakistan Telecommunications Authority had argued that only the offending page be removed, but Justice Ijaz Ahmad Chaudhry ordered the whole social networking site to be barred on Wednesday** (Crilly, 2010).

**Title/Headline:** *Suspected Militants Kill 80 At Minority Sect's Mosques In Eastern Pakistan*

**Abstract:** Islamist gunmen and a suicide squad lobbed grenades, sprayed bullets from atop a minaret and took hostages Friday in attacks on two mosques packed with worshippers from a minority sect in Pakistan. At least 80 people were killed and dozens wounded. The strikes — the deadliest against the Ahmadi community — highlight the threat to minority religious groups by the same militants who have repeatedly attacked Pakistan's U.S.-allied government and threatened to destabilize the nuclear-armed nation. The tactics echoed those militants have used against government, foreign and security targets in Pakistan, but they had never before been directed against a religious minority. Two teams of heavily armed attackers — seven men in total — staged the raids minutes apart, seizing hostages and apparently planning to fight to the death. Three died when they detonated their suicide vests. Two were captured. "It was like a war going on around me. The cries I heard sent chills down my spine," said Luqman Ahmad, a survivor. Shiite Muslims have borne the brunt of individual suicide bombings and targeted killings for years in Sunni-majority Pakistan, though Christians and Ahmadis have also faced violence. The long-standing sectarian violence in the country has been exacerbated by the rise of the Sunni extremist Taliban and al-Qaida movements. The attacks Friday took place in the Model Town and Garhi Shahu neighborhoods of Lahore. The eastern city is Pakistan's second-largest. It is a key political, military, and cultural center and has been the scene of some of the most spectacular militant attacks in the country over the past year. The assault at Model Town lasted about an hour, and involved four attackers spraying worshippers with bullets before exploding hand grenades, said Sajjad Bhutta, Lahore's deputy commissioner. Two attackers were caught and one was treated for his wounds, Punjab province police chief Tariq Saleem Dogar said. The fate of the two other gunmen was unclear. One of the detained suspects was from southern Punjab, but had studied at a religious school in the port city of Karachi, a major militant crossroads, Punjab's Law Minister Rana Sanaullah Khan said (Fox News, 2010).

**Title/Headline:** *Militants Attack NATO Convoy In Pakistan; 7 Killed*

**Abstract:** Militants attacked dozens of trucks ferrying vehicles for Western troops in Afghanistan early Wednesday near the Pakistani capital, a bold assault that killed seven people and illustrated the vulnerability of a crucial U.S. supply line. Militants and ordinary criminals have often attacks. NATO and U.S. supply convoys over the past two years, but Wednesday's strike was the first so close to the well-protected capital, something likely to cause particular unease. Much of the fuel and supplies for Western troops in Afghanistan travels through Pakistan after arriving in the port city of Karachi. An Associated Press photographer saw around 60 containers damaged at a truck depot on the main road leading to the border with Afghanistan, about six miles (10 kilometers) from Islamabad. Many carried military vehicles such as Humvees. Charred shells of the trucks were jumbled together at the depot, and firefighters were dousing small blazes. The pungent smell of smoke gripped the air as officials surveyed the damage. The U.S. Embassy in Islamabad said about 30 trucks contracted to transport supplies for NATO were damaged in the attack in Tarnol and the matter was under investigation by Pakistani authorities. A group of around 15 suspected militants first opened fire with automatic weapons and grenades before torching the trucks, police officer Kalim Imam said. Police official Shah Nawaz said Wednesday afternoon that seven people died. The victims' identities were not known, but they were believed to be Pakistanis employed as drivers or assistants. Seven people were also wounded. The convoy attacks have added impetus to American efforts to open new supply lines into Afghanistan, but commanders say they have not affected operations there. Guns, bombs and ammunition are not believed to be transported in the trucks, thousands of which make the journey each week. The attack near Islamabad followed clashes between the Pakistani military and insurgents in the northwest tribal belt bordering Afghanistan that killed 54 people, including eight soldiers, officials said. One clash occurred in Orakzai tribal region when dozens of militants attacked a security convoy, sparking a battle that killed six soldiers and 40 militants, government administrator Samiullah Khan said. The army had declared Orakzai cleared of insurgents earlier this month. Also Wednesday, government official Maqsood Khan said militants attacked two security checkpoints in Mohmand, another part of the tribal belt that has endured army operations. The overnight attack sparked gunbattles that killed two soldiers and six insurgents and wounded several from both sides. Information from the tribal areas is nearly impossible to verify independently because they are remote and dangerous, and access is severely restricted (Khan, 2010).

**Title/Headline:** *US Delivers New F-16s To Pakistan*

**Abstract:** The US has delivered the first batch of eighteen F-16 Fighting Falcon jet fighters, branded new, to Pakistan as the two countries strengthen their military ties. According to the US Department of Defense, three F-16s were scheduled to arrive in Pakistan on Saturday. Fifteen more will be delivered later in 2010 and 2011. **"This is the most visible part of a strong and growing relationship between the two air forces that will benefit us both near-term and long-term,"** the department's website quoted as saying Air Force Maj. Todd Robbins, a senior official coordinating military ties between Washington and Islamabad. **Pakistan is paying \$1.4 billion for the new aircraft, in addition to \$1.3 billion in upgrades to its existing F-16 fleet.** Delivery of F-16 fighter jets to Pakistan was troubled in 1990 when the White House imposed sanctions on the country for its pursuit of nuclear arms. The sanctions failed to stop Islamabad. Washington was previously opposed to the deal, citing high tensions between nuclear-armed India and Pakistan in the volatile South Asian region. **The US says the aircraft will give the Pakistani Air Force an advantage against militancy. The new fighter is reportedly able to target precisely in all weather conditions, day and night. The developments come at a time when the Pakistani military says it has launched a series of operations against Pakistani militants.** Pakistan's lawless tribal belt on the Afghan border remains a safe haven for militants, who have fled the 2001 US-led invasion of Afghanistan. Pakistan has suffered a wave of violence since the former military ruler Pervez Musharraf joined the US-led war on terror following the 9/11 attacks (Press TV, 2010).

**Title/Headline:** *After Twin Suicide Bombs Kill 42 At A Sufi Shrine, Some Pakistanis Blame United States*

**Abstract:** Pakistanis lashed out Friday at the U.S., blaming its alliance with their government and its presence in Afghanistan for spurring two suicide bombers to kill 42 people at the country's most important Sufi shrine. The reactions showed the challenge facing Washington and the Pakistani government when it comes to rallying public support against the Islamist extremism that has scarred the South Asian nation, even after an audacious attack on the moderate, Sufi-influenced Islam most Pakistanis practice. Thousands of people had gathered late Thursday at the green-domed Data Darbar shrine in Lahore when bombs went off minutes apart. **The blasts ripped concrete from the walls and left the white marble floor awash with blood. There was no claim of responsibility, but Islamist extremists consider Sufism — a mystical strand of Islam — to be heretical.** But on Friday, few Pakistanis interviewed saw militants at the root of the problem. **"America is killing Muslims in Afghanistan and in our tribal areas (with missile strikes), and militants are attacking Pakistan to express anger against the government for supporting America,"** said Zahid Umar, 25, who frequently visits the shrine, where 180 people were also wounded. Pakistanis are suffering because of American policies and aggression in the region, said Mohammed Asif, 34, who runs an auto workshop in Lahore. He and others said the attacks would end if the U.S. would pull out of Afghanistan. Several other Pakistanis interviewed blamed the Ahmadi, a minority sect that has long faced discrimination in Pakistan. **On May 28 in Lahore, gunmen and a suicide squad targeted two Ahmadi mosques, massacring at least 93 people, and some Pakistanis claimed the sect must have been seeking revenge.** Others cast about for additional villains — though America's hand was seen there, too. **Washington "is encouraging Indians and Jews to carry out attacks" in Pakistan,** said Arifa Moen, 32, a teacher in the central city of Multan. Pakistani officials condemned the bombings, using language they have frequently used to try to convince the population that the fight against militancy is not one they can ignore. **"Those who still pretend that we are not a nation at war are complicit in these deaths,"** said Farahnaz Ispahani, a spokeswoman for Pakistani President Asif Ali Zardari. **The U.S. Embassy issued a statement Friday condemning the attack and saying it "demonstrates the terrorists' blatant disregard for the lives of the Pakistani people and the future of this country."** The targeted shrine is that of Data Ganj Bakhsh Hajveri, who lived hundreds of years ago and traveled throughout the region spreading a message of peace and love. Some recent attacks in Punjab have been blamed on the "Punjabi Taliban." **The group is a relatively new network of al-Qaida-linked militants who have split off from other local insurgent groups but also has ties to the Pakistani Taliban, which has its bases in the northwest tribal regions** (Fox News, 2010)

**Title/Headline:** *29 Pakistani Lawmakers Have Fake Degrees: Probe*

**Abstract:** At least 29 Pakistani lawmakers submitted fake degrees along with their nomination papers during the 2008 elections, a probe by country's main educational authority has established. The Supreme Court and parliament's standing committee on education directed the Higher Education Commission to verify the academic qualifications of members of provincial and national assemblies after over a dozen lawmakers were found in possession of fake degrees. **"We received 1,065 degrees of the lawmakers and verification of 511 degrees has been completed so far. Twenty-nine degrees were found to be fake,"** Mahmood Raza, Advisor to the Higher Education Commission, told a news conference. Raza refused to name the lawmakers who submitted fake certificates in order to qualify for the 2008 elections to the provincial and national assemblies. He said the commission will present its final report to the parliamentary panel and the Election Commission on July 16. The move to verify the degrees of lawmakers had sparked speculation about mid-term polls being held if action is taken against legislators and parliamentarians with fake degrees. **Former military ruler Pervez Musharraf had made it mandatory for persons contesting elections to hold a bachelor's degree. The condition was waived by President Asif Ali Zardari's**

government. Legal experts have said any lawmaker whose degree is found to be fake will be unseated and a bye-election held to replace him (The Times Of India, 2010).

**Title/Headline:** *11,000 NATO Containers Go Missing*

**Abstract:** Reports say more than **11,000** containers bound for the US-led forces in Afghanistan have mysteriously gone missing over the past two years in Pakistan. The containers filled with food and military equipment worth USD 220 billion have been illegally unloaded in Pakistan, sources said on Friday. However, Pakistani officials put the number of missing containers at only 40 and blame corrupt customs department officials for the scam. **Reports say several Pakistani officials have been arrested over the missing containers. Many fear the items have been handed over the militants.** Pakistan, a US ally in the so-called war on terror, remains the main transit route for the NATO forces stationed in neighboring Afghanistan. **Trucks carrying supplies for foreign forces in Afghanistan frequently come under attack in Pakistan.** The developments also come after months after the disclosure that thousands of US weapons went missing in Afghanistan. US military officials failed to keep proper records on about 87,000 rifles, pistols, mortars and other weapons sent to Afghanistan between December 2004 and June 2008. Analysts say the weapons may have fallen in the hands of militants linked to the Taliban or Al-Qaeda (Press TV, 2010).

**The missing NATO containers are sure to carry weapons and equipment that will be used in the nuclear terror attack against America.**

**Title/Headline:** *US Missiles Kill 16 Militants In NW Pakistan*

**Abstract:** U.S. missiles hit a suspected militant hide-out, killing 16 insurgents in a troubled Pakistani tribal region along the Afghan border before dawn Saturday, intelligence officials said. The strike came as the U.S. Joint Chiefs of Staff chairman, Adm. Mike Mullen, met with top military officials in Pakistan, a key U.S. ally in the battle against Islamist extremists. The six missiles struck a compound in the Nazai Narai area of South Waziristan. The hide-out was known to be frequented by foreign fighters who were among the dead, two intelligence officials said. **The officials, who spoke on condition of anonymity because they were not authorized to go on the record, said agents were trying to get more details about the identities and nationalities of the dead** (Ahmed, 2010).

**Title/Headline:** *Pakistan Aids Insurgency in Afghanistan, Reports Assert*

**Abstract:** The documents, made available by an organization called WikiLeaks, suggest that Pakistan, an ostensible ally of the United States, allows representatives of its spy service to meet directly with the Taliban in secret strategy sessions to organize networks of militant groups that fight against American soldiers in Afghanistan, and even hatch plots to assassinate Afghan leaders. Taken together, the reports indicate that American soldiers on the ground are inundated with accounts of a network of Pakistani assets and collaborators that runs from the Pakistani tribal belt along the Afghan border, through southern Afghanistan, and all the way to the capital, Kabul. Much of the information — raw intelligence and threat assessments gathered from the field in Afghanistan — cannot be verified and likely comes from sources aligned with **Afghan intelligence, which considers Pakistan an enemy, and paid informants.** **Some describe plots for attacks that do not appear to have taken place.** But many of the reports rely on sources that the military rated as reliable. While current and former American officials interviewed could not corroborate individual reports, they said that the portrait of the spy agency's collaboration with the Afghan insurgency was broadly consistent with other classified intelligence. **Some of the reports describe Pakistani intelligence working alongside Al Qaeda to plan attacks. Experts cautioned that although Pakistan's militant groups and Al Qaeda work together, directly linking the Pakistani spy agency, the Directorate for Inter-Services Intelligence, or ISI, with Al Qaeda is difficult.** The records also contain firsthand accounts of American anger at Pakistan's unwillingness to confront insurgents who launched attacks near Pakistani border posts, moved openly by the truckload across the frontier, and retreated to Pakistani territory for safety. **The behind-the-scenes frustrations of soldiers on the ground and glimpses of what appear to be Pakistani skullduggery contrast sharply with the frequently rosy public pronouncements of Pakistan as an ally by American officials, looking to sustain a drone campaign over parts of Pakistani territory to strike at Qaeda havens.** Administration officials also want to keep nuclear-armed Pakistan on their side to safeguard NATO supplies flowing on routes that cross Pakistan to Afghanistan. **This month, Secretary of State Hillary Rodham Clinton, in one of the frequent visits by American officials to Islamabad, announced \$500 million in assistance and called the United States and Pakistan "partners joined in common cause."** The reports suggest, however, that the Pakistani military has acted as both ally and enemy, as its spy agency runs what American officials have long suspected is a double game — appeasing certain American demands for cooperation while angling to exert influence in Afghanistan through many of the same insurgent networks that the Americans are fighting to eliminate. Behind the scenes, both Bush and Obama administration officials as well as top American commanders have confronted top Pakistani military officers

with accusations of ISI complicity in attacks in Afghanistan, and even presented top Pakistani officials with lists of ISI and military operatives believed to be working with militants. Benjamin Rhodes, deputy national security adviser for strategic communications, said that Pakistan had been an important ally in the battle against militant groups, and that Pakistani soldiers and intelligence officials had worked alongside the United States to capture or kill Qaeda and Taliban leaders. **Still, he said that the “status quo is not acceptable,” and that the havens for militants in Pakistan “pose an intolerable threat” that Pakistan must do more to address. “The Pakistani government — and Pakistan’s military and intelligence services — must continue their strategic shift against violent extremist groups within their borders,”** he said. American military support to Pakistan would continue, he said. Several Congressional officials said that despite repeated requests over the years for information about Pakistani support for militant groups, they usually receive vague and inconclusive briefings from the Pentagon and C.I.A. Nonetheless, senior lawmakers say they have no doubt that Pakistan is aiding insurgent groups. **“The burden of proof is on the government of Pakistan and the ISI to show they don’t have ongoing contacts,”** said Senator Jack Reed, a Rhode Island Democrat on the Armed Services Committee who visited Pakistan this month and said he and Senator Carl Levin of Michigan, the committee chairman, confronted Pakistan’s prime minister, Yousaf Raza Gilani, yet again over the allegations. **Such accusations are usually met with angry denials, particularly by the Pakistani military, which insists that the ISI severed its remaining ties to the groups years ago. An ISI spokesman in Islamabad said Sunday that the agency would have no comment until it saw the documents.** Pakistan’s ambassador to the United States, Husain Haqqani, said, “The documents circulated by WikiLeaks do not reflect the current on-ground realities.” **The man the United States has depended on for cooperation in fighting the militants and who holds most power in Pakistan, the head of the army, Gen. Parvez Ashfaq Kayani, ran the ISI from 2004 to 2007, a period from which many of the reports are drawn. American officials have frequently praised General Kayani for what they say are his efforts to purge the military of officers with ties to militants.** American officials have described Pakistan’s spy service as a rigidly hierarchical organization that has little tolerance for “rogue” activity. But Pakistani military officials give the spy service’s “S Wing” — which runs external operations against the Afghan government and India — broad autonomy, a buffer that allows top military officials deniability. **American officials have rarely uncovered definitive evidence of direct ISI involvement in a major attack. But in July 2008, the C.I.A.’s deputy director, Stephen R. Kappes, confronted Pakistani officials with evidence that the ISI helped plan the deadly suicide bombing of India’s Embassy in Kabul.** From the current trove, one report shows that Polish intelligence warned of a complex attack against the Indian Embassy a week before that bombing, though the attackers and their methods differed. The ISI was not named in the report warning of the attack. **Another, dated August 2008, identifies a colonel in the ISI plotting with a Taliban official to assassinate President Hamid Karzai. The report says there was no information about how or when this would be carried out. The account could not be verified.**

**General Linked To Militants:** Lt. Gen. Hamid Gul ran the ISI from 1987 to 1989, a time when Pakistani spies and the C.I.A. joined forces to run guns and money to Afghan militias who were battling Soviet troops in Afghanistan. After the fighting stopped, he maintained his contacts with the former mujahedeen, who would eventually transform themselves into the Taliban. And more than two decades later, it appears that General Gul is still at work. The documents indicate that he has worked tirelessly to reactivate his old networks, employing familiar allies like Jaluluddin Haqqani and Gulbuddin Hekmatyar, whose networks of thousands of fighters are responsible for waves of violence in Afghanistan. **General Gul is mentioned so many times in the reports, if they are to be believed, that it seems unlikely that Pakistan’s current military and intelligence officials could not know of at least some of his wide-ranging activities.** For example, one intelligence report describes him meeting with a group of militants in Wana, the capital of South Waziristan, in January 2009. **There, he met with three senior Afghan insurgent commanders and three “older” Arab men, presumably representatives of Al Qaeda, who the report suggests were important “because they had a large security contingent with them.”** The gathering was designed to hatch a plan to avenge the death of “Zamarai,” the nom de guerre of Osama al-Kini, who had been killed days earlier by a C.I.A. drone attack. **Mr. Kini had directed Qaeda operations in Pakistan and had spearheaded some of the group’s most devastating attacks.** The plot hatched in Wana that day, according to the report, involved driving a dark blue Mazda truck rigged with explosives from South Waziristan to Afghanistan’s Paktika Province, a route well known to be used by the insurgents to move weapons, suicide bombers and fighters from Pakistan. In a show of strength, the Taliban leaders approved a plan to send 50 Arab and 50 Waziri fighters to Ghazni Province in Afghanistan, the report said. **General Gul urged the Taliban commanders to focus their operations inside Afghanistan in exchange for Pakistan turning “a blind eye” to their presence in Pakistan’s tribal areas. It was unclear whether the attack was ever executed. The United States has pushed the United Nations to put General Gul on a list of international terrorists, and top American officials said they believed he was an important link between active-duty Pakistani officers and militant groups.** General Gul, who says he is retired and lives on his pension, dismissed the allegations as “absolute nonsense,” speaking by telephone from his home in Rawalpindi, where the Pakistani Army keeps its headquarters. **“I have had no hand in it.” He added, “American intelligence is pulling cotton wool over your eyes.”** Senior Pakistani officials consistently deny that General Gul still works at the ISI’s behest, though several years ago, after mounting American complaints, Pakistan’s president at the time, Pervez Musharraf, was forced publicly to acknowledge the possibility that former ISI officials were assisting the Afghan insurgency. Despite his denials, General Gul keeps close ties to his former employers. When a reporter visited General Gul this spring for an interview at his home, the former spy master canceled the appointment. According to his son, he had to attend meetings at army headquarters.

**Suicide Bomber Network:** The reports also chronicle efforts by ISI officers to run the networks of suicide bombers that emerged as a sudden, terrible force in Afghanistan in 2006. The detailed reports indicate that American officials had a relatively clear understanding of how the suicide networks presumably functioned, even if some of the threats did not materialize. It is impossible to know why the attacks never came off — either they were thwarted, the attackers shifted targets, or the reports were deliberately planted as Taliban disinformation. **One report, from Dec. 18, 2006, describes a cyclical process to develop the suicide bombers. First, the suicide attacker is recruited and trained in Pakistan. Then, reconnaissance and operational planning gets under way, including scouting to find a place for “hosting” the suicide bomber near the target before carrying out the attack.** The network, it says, receives help from the Afghan police and the Ministry of Interior. **In many cases, the reports are complete with names and ages of bombers, as well as**

license plate numbers, but the Americans gathering the intelligence struggle to accurately portray many other details, introducing sometimes comical renderings of places and Taliban commanders. In one case, a report rated by the American military as credible states that a gray Toyota Corolla had been loaded with explosives between the Afghan border and Landik Hotel, in Pakistan, apparently a mangled reference to Landi Kotal, in Pakistan's tribal areas. The target of the plot, however, is a real hotel in downtown Kabul, the Ariana. **"It is likely that ISI may be involved as supporter of this attack," reads a comment in the report. Several of the reports describe current and former ISI operatives, including General Gul, visiting madrasas near the city of Peshawar, a gateway to the tribal areas, to recruit new fodder for suicide bombings.** One report, labeled a "real threat warning" because of its detail and the reliability of its source, described how commanders of Mr. Hekmatyar's insurgent group, Hezb-i-Islami, ordered the delivery of a suicide bomber from the Hashimiye madrasa, run by Afghans. The boy was to be used in an attack on American or NATO vehicles in Kabul during the Muslim Festival of Sacrifices that opened Dec. 31, 2006. According to the report, the boy was taken to the Afghan city of Jalalabad to buy a car for the bombing, and was later brought to Kabul. It was unclear whether the attack took place. The documents indicate that these types of activities continued throughout last year. **From July to October 2009, nine threat reports detailed movements by suicide bombers from Pakistan into populated areas of Afghanistan, including Kandahar, Kunduz and Kabul. Some of the bombers were sent to disrupt Afghanistan's presidential elections, held last August.** In other instances, American intelligence learned that the Haqqani network sent bombers at the ISI's behest to strike Indian officials, development workers and engineers in Afghanistan. Other plots were aimed at the Afghan government. Sometimes the intelligence documents twin seemingly credible detail with plots that seem fantastical or utterly implausible assertions. **For instance, one report describes an ISI plan to use a remote-controlled bomb disguised as a golden Koran to assassinate Afghan government officials. Another report documents an alleged plot by the ISI and Taliban to ship poisoned alcoholic beverages to Afghanistan to kill American troops. But the reports also charge that the ISI directly helped organize Taliban offensives at key junctures of the war.** On June 19, 2006, ISI operatives allegedly met with the Taliban leaders in Quetta, the city in southern Pakistan where American and other Western officials have long believed top Taliban leaders have been given refuge by the Pakistani authorities. At the meeting, according to the report, they pressed the Taliban to mount attacks on Maruf, a district of Kandahar that lies along the Pakistani border. The planned offensive would be carried out primarily by Arabs and Pakistanis, the report said, and a Taliban commander, "Akhtar Mansoor," warned that the men should be prepared for heavy losses. "The foreigners agreed to this operation and have assembled 20 4x4 trucks to carry the fighters into areas in question," it said. While the specifics about the foreign fighters and the ISI are difficult to verify, the Taliban did indeed mount an offensive to seize control in Maruf in 2006. Afghan government officials and Taliban fighters have widely acknowledged that the offensive was led by the Taliban commander Mullah Akhtar Muhammad Mansour, who was then the Taliban shadow governor of Kandahar. Mullah Mansour tried to claw out a base for himself inside Afghanistan, but just as the report quotes him predicting, the Taliban suffered heavy losses and eventually pulled back. **Another report goes on to describe detailed plans for a large-scale assault, timed for September 2007, aimed at the American forward operating base in Managi, in Kunar Province. "It will be a five-pronged attack consisting of 83-millimeter artillery, rockets, foot soldiers, and multiple suicide bombers," it says. It is not clear that the attack ever came off, but its planning foreshadowed another, seminal attack that came months later, in July 2008. At that time, about 200 Taliban insurgents nearly overran an American base in Wanat, in Nuristan, killing nine American soldiers. For the Americans, it was one of the highest single-day tolls of the war.**

**Tensions With Pakistan:** The flood of reports of Pakistani complicity in the insurgency has at times led to barely disguised tensions between American and Pakistani officers on the ground. Meetings at border outposts set up to develop common strategies to seal the frontier and disrupt Taliban movements reveal deep distrust among the Americans of their Pakistani counterparts. On Feb. 7, 2007, American officers met with Pakistani troops on a dry riverbed to discuss the borderlands surrounding Afghanistan's Khost Province. According to notes from the meeting, the Pakistanis portrayed their soldiers as conducting around-the-clock patrols. Asked if he expected a violent spring, a man identified in the report as Lt. Col. Bilal, the Pakistani officer in charge, said no. His troops were in firm control. The Americans were incredulous. Their record noted that there had been a 300 percent increase in militant activity in Khost before the meeting. "This comment alone shows how disconnected this particular group of leadership is from what is going on in reality," the notes said. **The Pakistanis told the Americans to contact them if they spotted insurgent activity along the border. "I doubt this would do any good," the American author of the report wrote, "because PAKMIL/ISI is likely involved with the border crossings." "PAKMIL" refers to the Pakistani military. A year earlier, the Americans became so frustrated at the increase in roadside bombs in Afghanistan that they hand-delivered folders with names, locations, aerial photographs and map coordinates to help the Pakistani military hunt down the militants the Americans believed were responsible. Nothing happened, wrote Col. Barry Shapiro, an American military liaison officer with experience in both Afghanistan and Pakistan, after an Oct. 13, 2006, meeting. "Despite the number of reports and information detailing the concerns," Colonel Shapiro wrote, "we continue to see no change in the cross-border activity and continue to see little to no initiative along the PAK border" by Pakistan troops. The Pakistani Army "will only react when asked to do so by U.S. forces," he concluded (Mazzetti, Perlez, Schmitt, & Lehren, 2010).**

**Source:** The Guardian, Declan Walsh

**Title/Headline:** *Afghanistan War Logs: Clandestine Aid For Taliban Bears Pakistan's Fingerprints*

**Abstract:** A stream of US military intelligence reports accuse Pakistan's Inter-Services Intelligence (ISI) spy agency of arming, training and financing the Taliban insurgency since 2004, the war logs reveal, bringing fresh scrutiny on one of the war's most contentious issues. At least 180 files contain allegations of dirty tricks by the powerful agency with accounts of undercover agents training suicide bombers, bundles of money slipping across the border and covert support for a range of sensational plots including the assassination of President Hamid Karzai, attacks on Nato warplanes and even poisoning western troops' beer supply. They also link the ISI to some of the war's most notorious commanders. In April 2007 for instance, the ISI is alleged to have sent 1,000 motorbikes to the warlord Jalaluddin Haqqani for suicide attacks in Khost and Logar provinces. But for all their eye-popping details, the intelligence files, which are mostly collated by junior officers relying on informants and Afghan officials, fail to provide a convincing

smoking gun for ISI complicity. **Most of the reports are vague, filled with incongruent detail, or crudely fabricated. The same characters – famous Taliban commanders, well-known ISI officials – and scenarios repeatedly pop up.** And few of the events predicted in the reports subsequently occurred. A retired senior American officer said ground-level reports were considered to be a mixture of "rumours, bullshit and second-hand information" and were weeded out as they passed up the chain of command. **"As someone who had to sift through thousands of these reports, I can say that the chances of finding any real information are pretty slim,"** said the officer, who has years of experience in the region. If anything, the jumble of allegations highlights the perils of collecting accurate intelligence in a complex arena where all sides have an interest in distorting the truth. "The fog of war is particularly dense in Afghanistan," said Michael Semple, a former deputy head of the EU mission there. "A barrage of false information is being passed off as intelligence and anyone who wants to operate there needs to be able to sift through it. The opportunities to be misled are innumerable." **The shaky intelligence does not mean the US does not believe the ISI is supporting the Taliban. The spy agency nurtured the Taliban in the 1990s and, although it purported to sever its ties after 9/11, is believed to maintain the relationship. The British and US governments have repeatedly urged Pakistan to root out the Taliban from their sanctuary inside the border, with little effect.** In July 2008 the deputy head of the CIA, Stephen Kappes, flew to Islamabad to reportedly confront the ISI with evidence that the agency orchestrated a suicide attack on the Indian embassy in Kabul that month which killed 54 people including the Indian defence attache. **The CIA claimed to have intercepted phone conversations between ISI officers and the militants who carried out the attack.** Pakistani strategists see the Taliban as a useful proxy to marginalise the influence of arch-rival India. Indeed plots to attack Indian facilities in Afghanistan provide some of the most plausible allegations in the files. **One report from November 2007 said the ISI was plotting an attack on the Indian consulate in Jalalabad; another, titled "ISI order murder and kidnappings", has the agency offering between \$15,000 and \$30,000 for the assassination of Indian road workers. But many of the 180 reports appear to betray as much about the motivation of the sources than those of the alleged foreign puppet-masters.** Some US officers were aware of this. One report from 2006 notes that an informant "divulges information for monetary remuneration and likely fabricated or exaggerated the above report for just that reason". Some of the most striking claims come from the National Directorate of Security, Afghanistan's foremost spy agency and a bitter rival to the ISI. **In July and August 2008 the NDS passed information to the US that three Pakistan-trained militants plotting to kill Karzai had been groomed by a named ISI officer and had trained at the Zarb Momen camp outside Karachi. The attackers were Palestinian and Arab, the report said, and intended to strike during a visit by Karzai to a Kabul mosque or the luxury Serena hotel.** But the report's strong assertions fade under retrospective scrutiny. The predicted assault on Karzai never took place (the last reported attempt was in April 2008, four months earlier), and there is no known militant camp called Zarb Momen in Karachi, a city with hundreds of hardline madrasas. The al-Rashid Trust, a charity with militant links, publishes a magazine by the same name, said Amir Rana, an Islamabad-based militancy expert. The military's grading system offers one way of sifting the ISI file. Some 27 of the 180 reports are graded as C3 and above, meaning they come from a "fairly reliable source" and are "possibly true". But many such reports appear highly implausible. **In February 2007 the ISI and insurgents planned "to buy alcoholic drinks from markets in Miranshah [in Pakistan's tribal belt] and Peshawar [in order to] mix them with poison and use them for poisoning ANSF and ISAF troops" according to a C3 report.** The Karzai plot is assessed to be "probably true". Apparently more credible reports of ISI skulduggery are marked SEWOC, or Signals Intelligence Electronic Warfare Operations Centre, signifying they come from intercepted communications. **One SEWOC report, in December 2007, accused the ISI of deploying children as suicide bombers.** But the military source said that such intelligence was also prone to distortion, and that its value depended on whose conversation was being eavesdropped. **"If we ever found out anything that the ISI or Pakistani military were somehow complicit in the insurgency, it never came from these sources. Never," he said. One name that frequently surfaces is that of General Hamid Gul, director general of the ISI between 1987 and 1989, who is referenced in eight reports. One has him smuggling magnetic mines into Afghanistan to attack Nato troops; in another he is plotting to kidnap United Nations staff to bargain for imprisoned Pakistani militants. A report from January 2009 has Gul meeting Arab militants in Pakistan's tribal belt to send suicide vehicles into Afghanistan. "It was not known whether Hamid Gul was acting with the knowledge or consent of the ISI," the report states. But while Gul, 73, is a well-known fundamentalist ideologue in Pakistan, experts say he is unlikely to play a frontline role in the fighting. Afghan informers may have used his name – he is notorious in Afghanistan – to spice up their stories, said Semple. "There's a pattern of using a dramatis personae of famous ISI officers and Afghan commanders, and recurring reports of dramatic developments such as the delivery of surface-to-air missiles, to give these reports credibility," he said. "But most of them are simply fabricated."** Afghanistan has a long history of intelligence intrigues that stretches back to the early 19th century. Afghans have learned to use intelligence as a tool to influence the foreign powers occupying their land. In the past quarter century it has become a lucrative source of income in a country with few employment opportunities. Since 2001 intelligence has become a tool to influence US policymakers, who enjoy the greatest military clout in the region but are poorly informed about its intricacies. **The retired US officer said some NDS officials "wanted to create the impression that Pakistani complicity was a threat to the US".** And more broadly speaking, "there's an Afghan prejudice that wants to see an ISI agent under every rock". US generals are aware of the problem. **In January Major General Michael Flynn said foreign newspaper articles about Afghanistan were more useful than the information collected by his own soldiers in the field.** The huge intelligence apparatus in Afghanistan was "only marginally relevant" to Nato's overall war plan, he said. **"We're no more than fingernail-deep in our understanding of the environment"** (Walsh, 2010).

**Title/Headline:** Wikileaks Afghanistan: Former Pakistani General Blames US For War Leak

**Abstract:** Hamid Gul, a former Pakistan general accused of helping the Taliban, says United States orchestrated the mass leak of war files to scapegoat him for its imminent withdrawal from Afghanistan. The former chief of the ISI intelligence agency was accused in several of the leaked documents of regularly meeting al-Qaeda and Taliban commanders to order suicide attacks. **Gen Gul, 74, told the Financial Times that the US had a hidden role in the publication of thousands of classified reports through the WikiLeaks website. He told the newspaper: "I am a very favourite whipping boy of America. They can't imagine the Afghans can win wars on their own. "It would be an abiding shame that a 74-year-old general living a retired life manipulating the Mujahedeen in Afghanistan**

results in the defeat of America. "What are they going to do to the history books for their own posterity?" The files also link active and retired ISI officers to some of the conflict's most notorious leaders. According to the reports, in 2007, they sent also 1,000 motorbikes for use in suicide attacks. The Financial Times said Mr Gul's name appears in about 10 of roughly 180 classified US files that allege Pakistan's intelligence service supported Afghan militants fighting Nato forces. Mr Gul told the newspaper his main occupation in retirement was spending time with his grandchildren and pursuing his horticultural hobby of refining mango and peach species. **He said the US had lost the war in Afghanistan, and that the leak of the documents would help the Obama administration deflect blame by suggesting that Pakistan was responsible.** His comments are unlikely to be taken seriously in Washington, which has long suspected Gen Gul of being a dangerous influence in Pakistan politics, but there is concern in Islamabad that the early withdrawal of American and British troops starting next summer might destabilise the region's politics. **July has fuelled concerns in Pakistan that a rapid US withdrawal will sow further turmoil in its neighbour** (Telegraph, 2010).

**Title/Headline:** *No Survivors As Pakistan Plane Crash Kills 152*

**Abstract:** The plane, a domestic flight from Karachi operated by the private company Airblue, came down in hills just north of the city as it was about to land. There is no word on the cause of the crash. At the time the area was shrouded in fog. Pakistani TV showed images of smouldering wreckage on a foggy hillside, with helicopters overhead. The government has declared Thursday a day of national mourning for the victims. Imtiaz Elahi, chairman of the Capital Development Authority, which deals with emergencies, said the crash was "heartbreaking". "It is a great tragedy, and I confirm it with pain that there are no survivors," he told the Associated Press news agency.

**The plane, reported to be an Airbus A321 with 146 passengers and six crew on board, is thought to have left Karachi at 0750 (0350 GMT).** Two Americans were among the victims, a US embassy spokesman said, but gave no further details. Pakistan's interior ministry initially said at least five survivors had been taken to hospital, but local officials later said those reports were wrong. The flight data recorder has been found. Recovery operations are being hampered by bad weather and the crash site, on a steep hill, has no roads. The BBC's Lyse Doucet in Islamabad says helicopters found it hard to land in the midst of heavy fog, and smoke rising from the fire of the wreckage. Aamir Ali Ahmed, a senior city government official, told Reuters news agency: **"It's a very difficult operation because of the rain. Most of the bodies are charred."** Rescue worker Dawar Adnan told Associated Press from the crash site: "I'm seeing only body parts. This is a very horrible scene." Express 24/7 television journalist Sabur Ali Sayed said: **"The plane is totally destroyed, the pieces and parts scattered over a large distance." It is the deadliest air disaster in Pakistan's history.** Airblue spokesman Raheel Ahmed told reporters that the crash was "an extremely tragic incident", adding that an investigation had been launched. **The plane had no history of technical problems, he added. It was leased by Airblue in January 2006 and had accumulated about 34,000 flight hours.** The BBC's Haroon Rashid in Islamabad saw the plane flying low over the capital. "I was surprised to see the plane, because the area where I live is called a no-fly zone as it is close to some of Islamabad's most important official buildings, including President House and parliament," he said. **Other witnesses saw the plane flying towards the hills, and shortly after that heard a loud explosion and smoke billowing into the air.** Express 24/7 TV reporter Anjum Rahman said she saw the plane flying over the rooftops of houses where she lives. **"I wondered why the plane wasn't flying higher as it was flying towards the hill. Then within three or four minutes I heard a loud explosion,"** she told the channel. Initial reports said the flight had originated in Turkey. But officials later said it was a domestic flight (BBC, 2010).

**Title/Headline:** *UN Says Deadly Floods Affect 1 Million Pakistanis*

**Abstract:** Rescuers trying to reach thousands of Pakistani flood victims were hampered by deluged roads and damaged bridges Saturday, though there were signs that waters were receding in parts of the country. **Floods killed more than 430 people in one week, left some 400,000 people stranded in far-flung villages and severely damaged the nation's already-weak infrastructure.** The U.N. estimated Saturday that some 1 million people were affected, though it didn't specify exactly what that meant. In the northwest, the hardest-hit region, it was the worst flooding since 1929. People clung to fences and each other as water gushed over their heads, TV footage showed. Scores of men, women and children sat on roofs. **"There are very bad conditions," said Amjad Ali, a rescue worker in the Nowshera area. "They have no water, no food."** Rescuers were using army helicopters, heavy trucks and boats to try reaching flood-hit areas, the U.N. said. **It reported that thousands of homes and roads were destroyed, and at least 45 bridges across the northwest were damaged.** The destruction is slowing the rescue effort, said Luther Rehman, a government official in Khyber-Pakhtoonkhwa, the northwest province. Floodwaters were receding in some areas in the northwest, he said. "Our priority is to transport flood-affected people to safer places. **We are carrying out this rescue operation despite limited resources,**" he said, adding they needed more helicopters and boats (Khan, 2010).

**Title/Headline:** *Pakistan Security Officers Cancel UK Visit*

**Abstract:** Talks between ISI officials and UK security experts called off after David Cameron accused Pakistan of exporting terrorism. Pakistan's ISI intelligence agency has cancelled planned talks with British security experts in protest at **David Cameron's comments that elements within the country are responsible for exporting terrorism abroad,** it was reported last night. ISI officers were due in London for discussions on counter-terrorism co-operation with British security services. But the talks have been scrapped after the prime minister's remarks while on a visit to India on Wednesday, the Times reported. **"The visit has been cancelled in reaction to the comments made by the British prime minister against Pakistan,"** an ISI spokesman was quoted as saying. "Such irresponsible

statements could affect our co-operation with Britain." Cameron sparked outrage in Islamabad when he said: "We cannot tolerate in any sense the idea that this country is allowed to look both ways and is able, in any way, to promote the export of terror, whether to India, whether to Afghanistan, or to anywhere else in the world." The comments were made during a visit to Delhi. Neither Downing Street nor the Foreign Office would comment on the reported decision by the ISI, which also comes days before a UK visit by the Pakistani president Asif Ali Zardari. He is expected to stay with Cameron at his country retreat, Chequers. Last night, officials said that Zardari's visit was still expected to take place. "Our understanding is that the visit is on," a Foreign Office spokeswoman said. Following Cameron's remarks, Pakistani politicians pointed to the country's offensive against militants on the border with Afghanistan and the many victims of terrorist bombs in Pakistan. Cameron defended his comments a day later, saying: "I don't think the British taxpayer wants me to go around the world saying what people want to hear" (Fallon, 2010).

**Title/Headline:** *In Pakistan, Echoes of American Betrayal*

**Abstract:** Pakistan's premier intelligence agency, the Directorate for Inter-Services Intelligence, has been accused of many bad things in its own country. It has been held responsible for rigging elections, sponsoring violent sectarian groups and running torture chambers for political dissidents. More recently, it has been accused of abducting Pakistanis and handing them over to the United States for cash. But last week — after thousands of classified United States Army documents were released by WikiLeaks, and American and British officials and pundits accused the ISI of double-dealing in Afghanistan — the Pakistani news media were very vocal in their defense of their spies. On talk show after talk show, the ISI's accusers in the West were criticized for short-sightedness and shifting the blame to Pakistan for their doomed campaign in Afghanistan. Suddenly, the distinction between the state and the state within the state was blurred. It is *our* ISI that is being accused, we felt. How, we wondered, can the Americans have fallen for raw intelligence provided by paid informants and, in many cases, Afghan intelligence? And why shouldn't Pakistan, asked the pundits, keep its options open for a post-American Afghanistan? More generally, the WikiLeaks fallout brought back ugly memories, reminding Pakistanis what happens whenever we get involved with the Americans. In fact, one person at the center of the document dump is our primary object lesson for staying away from America's foreign adventures. **Hamid Gul, now a retired general, led the ISI during the end years of the Soviet occupation of Afghanistan and together with his C.I.A. friends unwittingly in the 1990s spurred the mujahedeen to turn Kabul — the city they had set out to liberate — into rubble.** According to the newly released documents, Mr. Gul met with Qaeda operatives in Pakistan in 2006 and told them to "make the snow warm in Kabul ... set Kabul aflame." This would seem highly sinister except that, today, Hamid Gul is nothing more than a glorified television evangelist and, as the columnist Nadir Hassan noted, "known only for being on half a dozen talk shows simultaneously." **He is also, for Pakistanis, a throwback to the lost years of our American-backed military dictatorships, a stark reminder of why we distrust the United States. The ISI and the C.I.A. have colluded twice in the destruction of Afghanistan.** Their complicity has brought war to Pakistan's cities. After every round of cloak-and-dagger games, they behave like a squabbling couple who keep getting back together and telling the world that they are doing it for the children's sake. **But whenever these two reunite, a lot of children's lives are wrecked. In the West, the ISI is often described as ideologically allied to the Taliban. But Pakistan's military-security establishment has only one ideology, and it's not Islamism. It's spelled I-N-D-I-A. It will do anybody's bidding if it's occasionally allowed to show India a bit of muscle.** Gen. Ashfaq Parvez Kayani, the Pakistani Army chief, has just been given an unexpected three-year extension in his office, due in large part, it is said, to American pressure on Islamabad. Yet General Kayani headed the ISI during the period that the WikiLeaks documents cover. **Since he became the head of the Pakistan Army — and a frequent host to Adm. Mike Mullen, the chairman of the Joint Chiefs of Staff — the number of drone attacks on Pakistani territory have increased substantially. It seems he has found a way to overcome his ISI past.** While he generally keeps a low profile, General Kayani in February gave an off-the-record presentation to Pakistani journalists. His point was clear: Pakistan's military remains India-centric. His explanation was simple: we go by the enemy's capacity, not its immediate intentions. This came in a year when Pakistan lost more civilians and soldiers than it has in any war with India. **Yet it has become very clear that an overwhelming majority of Pakistani people do not share the army's India obsession or its yearning for "strategic depth" — that is, a continuing deadly muddle — in Afghanistan.** They want a peaceful settlement with India over the disputed territory of Kashmir and a safer neighborhood. None of the leading parties in Parliament made a big deal about India, Afghanistan or jihad in their election campaigns. They were elected on promises of justice, transparency and reasonably priced electricity. Lately, Americans seem to have woken up to the fact that there is something called a Parliament and a civil society in Pakistan. But even so, it seems that Americans are courting the same ruling class — the military elite's civilian cousins — that has thrived on American aid and obviously wants an even closer relationship with Washington. A popular TV presenter who interviewed Secretary of State Hillary Clinton during her visit later jibed, "What kind of close relationship is this? I don't even get invited to Chelsea's wedding?" **Pakistan's military and civil elite should take a good look around before they pitch another marquee and invite their American friends over for tea and war talk. There are a lot of hungry people looking in, and the strung lights are sucking up electricity that could run a small factory, or illuminate a village. Besides, they're not likely to know what WikiLeaks is — they've been too busy cleaning up after their masters' guests (Hanif, 2010).**

**Source:** Telegraph, Dean Nelson, Javed Siddiq

**Title/Headline:** *Pakistan Army 'Encouraging Cameron Protests'*

**Abstract:** Allies of Pakistan's president have accused the Army of encouraging street protests, in which effigies of David Cameron were burned by Islamic militants, as part of a campaign to sabotage his planned visit to Britain this week. Friends of Asif Zardari said he has come under intense pressure from military chiefs to cancel his visit since British Prime Minister David Cameron accused Islamabad of promoting international terrorism during a trip to India last week. **Mr Cameron won many friends in India, when he said Pakistan could not be allowed to "look both ways" in the war on terrorism or promote the export of terror to other countries.** But his comments caused widespread anger in Pakistan where conservative Islamic political parties led public protests and the prime minister Yousuf Raza Gilani complained he had overlooked Pakistan's sacrifices in the fight against Taliban militants. **Sources close to Mr Zardari said Mr Cameron's comments had sparked a campaign by senior army figures who want him to cancel his visit to meet the Prime Minister at Chequers next week.** The head of the ISI intelligence agency Lt. Gen Ahmed Shuja Pasha, had earlier cancelled a delegation of senior officials to meet their security counterparts in London. **"The ISI cancellation is a signal of their displeasure and that they do not want him [Zardari] to go," said a friend of the president. "The army sends these signals and then the demonstrators are on the streets."** Mr Zardari has appeared increasingly isolated over his determination to press ahead with the visit amid calls from both opposition leaders and his own coalition allies to cancel. Shabbaz Sharif, chief minister of Punjab province and a leader of the main opposition Pakistan Muslim League-Nawaz was joined by Altaf Hussein, the leader of the coalition's MQM party in urging the president to abandon the visit. Mr Cameron's comments, and the fact that they were made during his visit to regional enemy India had weakened President Zardari's position and strengthened the hand of Islamic militants, said the source. **"It gave a boost to the Taliban and all these militant organisations. They say it shows that these countries, Britain and America, are not our friends, that they are harming rather than helping. Having suffered so much in the war against terrorism, civilian and military casualties, and on top of that we get this kick up the backside from Cameron,"** he added. Despite intense pressure from his army chiefs, opponents and coalition partners, President Zardari is going ahead with the planned visit, which aides said he will now use to explain Pakistan's position and seek an expression of appreciation for the country's sacrifices. Retired Lt Col Talat Masood said the army's dignity had been offended by Mr Cameron's comments, but that while it feels obliged to cancel the visit of its ISI leaders to register its anger, long-term co-operation in the fight against terrorism will continue. He said: **"The interests of both countries are so intertwined that this can't continue for more than a short period, things will normalise after they apply some balm"** (Nelson & Siddiq, 2010).

**Title/Headline:** *Six Christians Burned Alive In Pakistan Riots*

**Abstract:** Six Christians were burned alive in Pakistan yesterday when hundreds of Muslims attacked and looted their homes, sparked by rumours that pages from the Qur'an had been desecrated. The dead, including four women and a child, were killed when Christian homes were torched by hundreds of supporters of a banned Muslim organisation in the Punjabi village of Gojra, in eastern Pakistan. Tensions have been running high between the two communities over allegations that Christians had defiled pages from the Muslim holy book, despite authorities insisting that the rumours were unfounded. **Television footage from the area showed houses burning and streets strewn with debris and blackened furniture as mobs ran at each other. There were reports in the local media of exchanges of gunfire between Christian and Muslim communities and that rioters had blocked a railway line.** Pakistani authorities named the Muslim group involved in the violence as Sipah-e-Sahaba, which has been accused of launching attacks against security forces and carrying out bomb attacks in public places in recent years. **Rana Sanaullah, Punjab's law minister, said that an investigation had been carried out into allegations made during the week that a copy of the Qur'an had been defaced but that no such incident was found to have taken place.** Although the situation had calmed down by Friday, he said yesterday that "some miscreants and extremists entered the city [on Saturday] and pushed people toward armed clashes". **Pakistan's federal minister for minorities, Shahbaz Bhatti, said he had visited Gojra on Friday and asked police to provide protection for Christians who were facing threats, but accused them of ignoring his efforts.** Pakistan is a predominantly Muslim nation although religious minorities, including Christians, account for about 4% of its population of 170 million. **The communities generally live peacefully alongside one another, but Muslim militants have periodically targeted Christians and churches in recent years** (Quinn, 2009).

**Title/Headline:** *Officials: 37 Gunned Down In Pakistan's Karachi*

**Abstract:** Gunmen killed at least 37 people in Pakistan's largest city after the assassination of a lawmaker, officials said Tuesday. Dozens of vehicles and shops were set on fire as security forces struggled to gain control of Karachi. The southern city of more than 16 million has a history of political, ethnic and religious violence, and has long been a hide-out for al-Qaida and Taliban militants.

Its stability is important for Pakistan because it is the country's main commercial hub. The latest unrest came after Raza Haider, a provincial lawmaker, was shot dead along with his bodyguard in a mosque in Nazimabad area while preparing to offer prayers Monday. **Haider was a member of the Muttahida Qaumi Movement, the political party that runs the city and represents mainly descendants of migrants from India who settled in Pakistan when it was created in 1947.** The MQM's main nemesis is the Awami National Party, a secular nationalist party whose main power center is Pakistan's northwest and whose base is the ethnic Pashtun community. **Independent analysts say followers of all political parties in Karachi are heavily involved in criminal activities such as protection rackets and illegal land dealings. In certain neighborhoods, armed men linked to political parties stand guard at checkpoints.** Officials from different hospitals put the total death toll by Tuesday morning at 37. Some 80 additional people had suffered gunshot wounds, they said. **A furniture market was among the places set ablaze. Sindh province spokesman Jamil Soomro said at least 10 people were arrested, and police and Army Rangers were dispatched throughout the city to impose order. But gunfire could still be heard Tuesday morning, and fires were still being set in some areas.** Schools and colleges in Karachi and other urban centers in the province were ordered to stay closed by the government Tuesday. **Some officials blamed unspecified "invisible hands" for the violence. "It is very sad, and we believe that it is the work of those forces who want to destabilize the elected government," Soomro said (Khan, 2010).**

**Title/Headline:** *Karachi Streets Grow Calmer After 63 Gunned Down Over Two Nights Of Riots*

**Abstract:** Karachi shops and businesses began reopening as calm returned to the streets of Pakistan's commercial capital after two nights of killings triggered by the shooting of a Muslim Shiite politician. **The death toll climbed to 63 overnight as protesters burned cars and shops and gunned people down as police and paramilitary troops sought to restore order, hospital officials said. The violence comes on top of floods across much of Pakistan that left more than 1,500 dead and millions stranded. Karachi, a city of 18 million people, is home to the nation's stock exchange and contributes more than 70 percent of Pakistan's tax revenue, according to the local government.** The shootings broke out after Raza Haider, a lawmaker with the city's main party, the Muttahida Qaumi Movement, was assassinated at a mosque on Aug. 2. About a quarter of the city's factories and markets opened today and some public transport services were restored, Abdul Majeed, president of the Karachi Chamber of Commerce & Industry, said by telephone. **Losses to the local economy today may amount to 7 billion rupees (\$82 million) down from 10 billion rupees yesterday, he said. Several gas stations, schools and colleges have reopened. Trading at the Karachi Stock Exchange will close at the normal time of 3:30 p.m. after ending an hour early yesterday,** Haroon Askari, manager of operations, said by telephone. The benchmark Karachi stock exchange 100 index rose 0.9 percent to 10,478.17 at 11:14 a.m. local time after turnover was less than half this year's average yesterday. Seventeen more bodies were brought to three major hospitals overnight. **"Judging by the bullet wounds we're seeing, these are trained shooters," said Aftab Ahmed Channar, an official at the Civil Hospital in Karachi, who is a retired army captain. "They are using very few bullets and their aim is deadly."** Interior Minister Rehman Malik accused a banned militant group, Sipah-e-Sahaba, of killing Haider as part of its campaign of violence against members of the minority Shiite sect, the state-run Associated Press of Pakistan reported yesterday. **Haider's killing was the latest in a series of attacks in Karachi this year against Shiites, who comprise as much as 15 percent of Pakistan's population. Political and communal killings have escalated this year in Karachi, which is used as a hiding place by militants fleeing army attacks on the Taliban in the country's northwest.** Members of the ruling Pakistan Peoples Party, the MQM and the Awami National Party have died in multiple gun battles in the city since the start of the year (Sharif & Anis, 2010).

**Title/Headline:** *Pakistan Flood: HAARP Used In Pakistan? – Urgent*

**Abstract:** All started suddenly and thousands died, millions displaced, hundreds of villages vanished in the matter of just 4 days! Strangely there were no weather warnings, no alarms. None of the global met offices was able to predict torrential downpours that precipitated the worst floods in Pakistan's history. Was HAARP involved? We have investigated this matter and concluded that HAARP is being used in Pakistan and of course how can we ignore India's Baglihar & Kabul's Sarobi Dams contribution in this perfect plan! **This Flood Disaster is More Manmade than Natural. The choice of starting point was perfect.. all the flood is going in downstream i.e. Khyber (Hills) to Karachi (Sea)... it is designed to submerge entire Pakistan and bring up the worst crises and chaos ever happened.. they know they cant win a war with Nuclear armed Pakistan – it would be a mutual destruction, so they have other ways to do it!** Andrei Areshev a renowned Russian Scholar and the deputy head of the Strategic Culture Foundation warns that the current devastating fires raging throughout Russia could have been triggered by American weather weapons what is now becoming the infamous HAARP Technology.

**"It isn't just conspiracy theorists who are concerned about HAARP. The European Union called the project a global concern and passed a resolution calling for more information on its health and environmental risks. Despite those concerns, officials at HAARP insist the project is nothing more sinister than a radio science research facility."** ~Quote from a TV-documentary on HAARP by the Canadian Broadcasting Corporation (CBC).

**HAARP (High Frequency Active Auroral Research Program)** is a little-known, yet critically important U.S. military defense program which has generated quite a bit of controversy over the years in certain circles. Though denied by HAARP officials, some respected researchers allege that secret electromagnetic warfare capabilities of **HAARP are designed to forward the US military's stated goal of achieving full-spectrum dominance by the year 2020.** Others go so far as to claim that HAARP can and has been used for weather modification, to cause earthquakes and tsunamis, to disrupt global communications systems, and more. I have noticed a trend. Now, many skeptics will come in here and make gratuitous claims that what we are experiencing weather wise is simply mother nature, and others will claim that global warming is taking its affect. I am under a different impression. **For instance, has anyone noticed that almost every other year there is a new weather crisis that stays focused merely on that particular phenomenon?** For instance, in 2005, the only thing that was occurring was Hurricanes. You didn't hear about tornadoes, mudslides, tsunamis or volcanoes...it was simply Hurricanes. Let's take a look at some of this stuff...shall we? 2005: **We had Hurricane Katrina, Dennis, Emily, Rita and Wilma. Hurricane Katrina was especially strange since it was the only Hurricane on record EVER to sit for 2 days inland without any movement.** This is an anomaly since it takes movement in order to keep the storm active. Not only was this the most active season in recorded history, but, it also had two of the strongest measured Hurricanes in recorded history. **2004 marked the year of the Tsunami. Remember the non-stop media coverage?** It was as if nothing else existed, and the only real weather was tsunami weather. **2007 brought one of the worst flood seasons in the history of mankind.** No one was discussing Hurricanes, tornadoes, or earthquakes...this year was all about floods. **2008 brought the most and deadliest tornadoes in the past decade. There were no floods that year.** There weren't any Hurricanes happening, and if there were, no one cared because Tornadoes were the main topic of interest. In almost every place in the Midwest, there were tornadoes popping up in every back alley crevice you could find. The media was all over it, and these storms were steadily increasing in power. **Now let's look at the end of 2009 into 2010. EARTH QUAKES.** This seems to be a fad like no other. Not only are they increasing in power, but, they are also increasing in frequency. Chicago as well as Indiana, Chile (twice), Haiti, Turkey, Afghanistan, China, Okinawa, etc., etc. Now, skeptics will tell you..."No big deal. Earthquakes happen all the time."...and, for all intents and purposes, they're right. But, there aren't too many average people out there who haven't noticed that there seems to be a weird trend with all of these earthquakes that just keep popping up. **So...here's my point. We've been through all this before in many threads discussing the possibilities of whether there are governments who have the capabilities of weather control.** After looking at these trends that continue to occur, it seems that every year, or every other year, a new phenomenon of weather jumps out, and consistently pounds the earth until another one takes its place. **You could look at this as something that is merely seasonal and that, indeed, there are natural weather changes that are taking place on the planet that are increasingly getting worse (some love this idea and grip to it as if it were the only possibility), or, you could look at it as someone playing with a toy that they are trying to perfect. And each year they pick a new disaster to play with until they've honed it into a finely tuned instrument.** Now, if you haven't noticed these trends, or put them together in this sort of order and fashion, you might want to entertain the possibility that there are things being manipulated right in front of your very eyes. **Folks...there was purple snow in Russia. PURPLE. We recently had a never before seen sky spiral in Norway on the day Obama accepted the peace prize, and I don't care how you try to rationalize it, that was pretty screwed up.** There was a tetrahedron floating above the Kremlin on the same day, although the favorite thing to say is...HOAX!!! **People in Chile saw the sky changing colors in the middle of the night as the earthquake destroyed their city...it was 3am out there, so in the blackness of night, they were watching the sky change colors where there is an absence of color (Black).** The same thing was viewed about 20-30 minutes before the earthquake in China. In Antarctica right now, there is some sort of microbe that is giving the landscape the appearance as if it were bleeding. (And the rivers shall turn red with blood) But, I'm sure someone is going to try to tell me that its perfectly normal. **A bunch of birds, 100 exactly, recently were flying in a flock together and somehow, they died in the same place in the sky, and then fell in the same yard, within the same space, curled up and with blood leaking from their beaks and nasal passages.** There is something going on folks.

**Here's a brief list: HAARP PATENTS (Assigned to APTI, Inc.):**

**U.S. Patent 4686605:**

Method And Apparatus For Altering A Region In The Earth's Atmosphere, Ionosphere, And/Or Magnetosphere  
Inventors: Eastlund; Bernard J., Spring, TX  
Assignees: APTI, Inc., Los Angeles, CA  
Issued: Aug. 11, 1987  
Filed: Jan. 10, 1985

**U.S. Patent 5038664:**

Method For Producing A Shell Of Relativistic Particles At An Altitude Above The Earth's Surface  
Inventors: Eastlund; Bernard J., Spring, TX  
Assignees: APTI, Inc., Washington, DC  
Issued: Aug. 13, 1991  
Filed: Jan. 10, 1985

**U.S. Patent 4712155:**

Method And Apparatus For Creating An Artificial Electron Cyclotron Heating Region Of Plasma  
Inventors: Eastlund; Bernard J., Spring, TX  
Ramo; Simon, Beverly Hills, CA  
Assignees: APTI, Inc., Los Angeles, CA  
Issued: Dec. 8, 1987  
Filed: Jan. 28, 1985

**U.S. Patent 5068669:**

Power Beaming System  
Inventors: Koert; Peter, Washington, DC  
Cha; James T., Fairfax, VA  
Assignees: APTI, Inc., Washington, DC  
Issued: Nov. 26, 1991  
Filed: Sep. 1, 1988

**U.S. Patent 5218374:**

Power Beaming System With Printer Circuit Radiating Elements Having Resonating Cavities  
Inventors: Koert; Peter, Washington, DC  
Cha; James T., Fairfax, VA  
Assignees: APTI, Inc., Washington, DC  
Issued: June 8, 1993  
Filed: Oct. 10, 1989

**U.S. Patent 5293176:**

Folded Cross Grid Dipole Antenna Element  
Inventors: Elliot; Paul G., Vienna, VA  
Assignees: APTI, Inc., Washington, DC  
Issued: Mar. 8, 1994  
Filed: Nov. 18, 1991

**U.S. Patent 5202689:**

Lightweight Focusing Reflector For Space  
Inventors: Bussard; Robert W., Manassas, VA  
Wallace; Thomas H., Gainesville, FL  
Assignees: APTI, Inc., Washington, DC  
Issued: Apr. 13, 1993  
Filed: Aug. 23, 1991

**U.S. Patent 5041834:**

Artificial Ionospheric Mirror Composed Of A Plasma Layer Which Can Be Tilted  
Inventors: Koert; Peter, Washington, DC  
Assignees: APTI, Inc., Washington, DC  
Issued: Aug. 20, 1991  
Filed: May. 17, 1990

**U.S. Patent 4999637:**

Creation Of Artificial Ionization Clouds Above The Earth  
Inventors: Bass; Ronald M., Houston, TX  
Assignees: APTI, Inc., Washington, DC  
Issued: Mar. 12, 1991  
Filed: May. 14, 1987

**U.S. Patent 4954709:**

High Resolution Directional Gamma Ray Detector  
Inventors: Zigler; Arie, Rishon Le Zion, Israel  
Eisen; Yosset, Rishon Le Zion, Israel  
Assignees: APTI, Inc., Washington, DC  
Issued: Sep. 4, 1990  
Filed: Aug. 16, 1989

**U.S. Patent 4873928:**

Nuclear-Sized Explosions Without Radiation

Inventors: Lowther; Frank E., Plano, TX

**And, William Cohen, ex-secretary of the DOD**, made a specific statement about electromagnetic weapons that could be used for weather terrorism. In April 1997, the then U.S. Secretary of Defense William Cohen publicly discussed the dangers of HAARP-like technology, saying **“others are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves... So there are plenty of ingenious minds out there that are at work finding ways in which they can wreak terror upon other nations... It’s real, and that’s the reason why we have to intensify our efforts”** (Pakalert Press, 2010).

**Title/Headline:** *Former Pakistani Intel Chief Fears World War Three Is Imminent*

**Abstract:** Former Pakistani General and intelligence chief Hamid Gul appeared on the Alex Jones Show yesterday for a full hour in what turned out to be a fascinating extended interview, addressing the major geopolitical issues that are shaping modern history. **Gul, who served as the director general of Pakistan’s Inter Services Intelligence during 1987-89 and worked with the CIA in the covert war against the Soviets in Afghanistan, is a wealth of knowledge on the so called ‘war on terror’.** Gul spoke on a host of issues, beginning with his version of events surrounding the recent Wikileaks expose of US and Afghan military intelligence. **“My version (of events) is not going out to America, I’ve been denied the visa to travel to America. These people will not let me into America because they are afraid that I will speak the truth. People will listen to the truth...”** Gul stated in response to the claims that he is personally **“quarter backing” attacks on US forces in Afghanistan and Pakistan.** “Fareed Zakaria (of CNN), he recorded me for twenty minutes and he put out only six minutes of my version.” Gul continued. “That is not fair, because I was informed, and especially the things I said which were stark realities, and he wanted obviously to keep the American people in dark about these things.” Gul asserted that Afghan intelligence is “still infested by the old Communist die hards”, who have an axe to grind against him, owing to his role in ousting the Soviet Union from the region. Gul added that it is a ridiculous notion to believe that he, at 74 years of age and retired, has any role in the military failures of the US in Afghanistan and Pakistan. **“Speak the truth, you have failed because your own policy makers have not come up with the recipe that was required. Your own Generals were not up to the tasks which were given to them, so why don’t you accept the failure rather than rub the blame on someone else?”** he said. **“This is diabolical nonsense, and if this is the kind of intelligence that America is basing its policies on in this region, then God help America.** This is false, it is totally fabricated and I’ll tell you who are the elements involved in it.” Gul said. The retired General blamed the fact that the military is heavily dependent on private contractors, even for intelligence gathering – contractors who only have an incentive to expand the wars and further profit from them. **“How can they be so foolish, the CIA, the FBI, and to top it all there is this Task Force 373, which has been indulging in massive civilian casualties. They have been killing people left right and centre.** Every time they are given the information, they have bombed wedding parties, they have bombed funeral processions, they have bombed innocents, and they have even bombed the hospitals.” **“So you can imagine that the intelligence based on the information provided by security contractors has resulted in this massive violation of human rights, it has been anti-human, it has destroyed everything that the American people and the American Constitution ever stood for.”** Gul urged. “They think that anyone criticizing their policy is the enemy. This is totally wrong, this is a misconception. We work together with the CIA, we work together with the Americans, I have a lot of friends there, I respect them and my advice could also be useful.” Gul said. The former ISI chief, who trained with British intelligence officers, spoke of an “ultra-Imperial club” of British, Israeli and Indian intelligence that is “leading American policy making by the nose” and “does not want America to flourish inside their hearts”. **“The American people are exploited for this dark agenda. It is only a handful of people, they a clique only by my assessment, who are indulging in this exercise.”** Gul added. Gul also noted that the real agenda in the middle east is multifaceted. Gul says the global clique’s ‘war on terror’ on one hand allows for the corporate empire that now controls America to establish itself in the centre of the region to tap the Caspian oil basin. Secondly, Gul believes it is an operation to prevent China from moving into the region. Thirdly, it functions to prevent any new power from emerging in the region based on the Islamic principles of egalitarianism, equality and freedom. **“If these principles are adopted then Imperial powers will really have no place to hide.”** Gul stated. And finally, it seeks to provide a security shield to the State of Israel by promoting destabilization inside neighbouring countries. **“This is going to hurt them more than it is going to hurt us.”** Gul said, speaking of how the actions of the global cabal are running against the grain of ancient codes of honour for the people of the region. “This evokes even stronger sentiments than the religion,” Gul stated. “Therefore these people are not going to forgive all this, and I’m afraid that we will have lost this region forever to America, to the West... and this struggle is going to end with a very big disaster for American reputation, for their honour, for their self respect, and we don’t want to have this done, I can assure you I am genuinely telling you this.” Gul added. **“If they get embroiled in Pakistan they will keep on staying here for a long time. If they expand this war, a fight is going to be put up against America, whether in Afghanistan, Pakistan or Iran. The larger the area of conflict and the longer the period of conflict, the established power, the one that is equipped with more firepower, cannot win – this is a lesson from history – it is immutable.”** “My fear is that if Pakistan is put to the corner and pushed against the wall – Pakistan being an Islamic state – could also declare international jihad.” Gul noted with great trepidation. “Now if that Islamic state declares international jihad, it becomes binding on the muslims of the rest of the world to come out in support of jihad. It will change modern history altogether if that call is given.” “They would have us believe that Iran is our enemy. Iran is not our enemy. There has been no hostility between Iran and Pakistan... This is an utter lie, it is only to malign Iran. But I tell you Israel is hell bent to draw America into a wider war attacking Iran. If they go in unilaterally to attack some targets, even drop a few bombs here and there, I think it will flare up a conflict that it will not be able to control.” Gul stated, following up with a harrowing prediction of what will follow. “America is

likely to get sucked into this war, and this may turn out to be the third world war. It would be a disaster of the first order, it must be avoided at all costs.” “I don’t know if Russia or China could be held back. This could be an inferno that would consume so many things, and corporate America would be the biggest sufferer – where are they going to sell their gold and how are they going to pick up the oil?” Gul stated. The General urged that if the world is to avoid such devastating conflict, people everywhere must not accept the propaganda being thrown at them by the elite clique attempting to shape global affairs. **“There is no clash of civilizations, this is a mindset that has been created unfortunately. ...As far as Islam is concerned, why is it being looked upon as an enemy, as an adversary? Islam encompasses Christianity and Judaism, it is not an entity in itself, but actually it encompasses all the three religions of the book, so there has to be amicable peace among us.”** **“There is no need for the dark impulse in the American system. I won’t say the American people, because they are so good, it is in the American system that the dark impulse has to be removed – and it can only be removed by the American people.”** Gul previously appeared on the Alex Jones show to share his contention that the 9/11 attack was an inside job, laying out details that were censored during a CNN interview on the same week. Gul reiterated his stance on the 9/11 attacks, that it was a black operation to be used as a pretext for entering Afghanistan and using it as a launch pad to enter Pakistan and dominate the region. Gul also spoke about the evidence that the 2008 Mumbai terror attacks were a Western controlled intelligence operation that was to be blamed on Pakistan, a claim he made shortly after the attacks which has since been vindicated by mainstream reports that US and Indian undercover agents were involved in the attacks. The General also spoke on the death of former Pakistan leader Benazir Bhutto, reasserting his previous analysis that Bhutto was eliminated by a neocon controlled assassination squad after she “became rebellious” toward globalist interests (Watson, 2010).

**Title/Headline:** *Pakistan President, Kerry Warn Militants Could Exploit Flooding Chaos*

**Abstract:** Islamist terrorists may exploit the chaos and misery caused by the floods in Pakistan to gain new recruits, the country's president warned Thursday — remarks echoed by a leading U.S. senator who said America would stand by its vital wartime ally during the crisis. The floods have affected 20 million people and about one-fifth of Pakistan's territory, straining its civilian government as it also struggles against al-Qaida and Taliban violence. Aid groups and the United Nations have complained that foreign donors have not been quick or generous enough given the scale of the disaster. **"All these catastrophes give strength to forces who do not want a state structure,"** President Asif Ali Zardari said during a press conference with John Kerry, chairman of the Senate Foreign Relations Committee, after the two visited some of the country's hardest-hit areas and a relief camp. **"There is a possibility that the negative forces would exploit the situation," Zardari said. "Like they would take the babies who have been made orphans and take them to their camps and train them as the terrorists of tomorrow."** Zardari's government has been criticized for failing to respond quickly enough, and Islamist charities — at least one of which has alleged links to terrorism — have been active in the flood-hit areas. **Islamist terrorists may exploit the chaos and misery caused by the floods in Pakistan to gain new recruits, the country's president warned Thursday — remarks echoed by a leading U.S. senator who said America would stand by its vital wartime ally during the crisis. **Title/Headline:** *Pakistan Cricket Hit By Betting Scandal*

**Abstract:** The Pakistani cricket team and the sport's governing authorities were on Sunday struggling to deal with new corruption allegations that have echoes of the worst match-fixing scandals of the previous decade. British police were questioning a man suspected of conspiring to defraud bookmakers through a scheme involving Pakistani players deliberately bowling no-balls – illegal deliveries – during a Test match against England in London that ended on Sunday. **The allegations will add to concerns that corruption remains a serious problem at a time when cricket is becoming more lucrative as tournaments such as the Indian Premier League tap into the large fanbase in south Asia.** Police made the detention after a “sting” operation in which reporters from the News of the World newspaper allegedly paid a middle-man £150,000 (\$231,000, €187,500) in return for details of three occasions when Pakistani players would deliberately bowl no-balls by overstepping a white line on the pitch. Detectives interviewed four Pakistani players – Salman Butt, the captain, Mohammed Amir and Mohammed Asif, both bowlers, and Kamran Akmal, the wicketkeeper – according to Yawar Saeed, Pakistan team manager. He told Sky television that police had taken mobile phones belonging to the captain and the two bowlers. Asked about his alleged role in the affair, Mr Butt told a press conference: **“These are just allegations and anybody can stand out and say anything about you. It doesn’t make them true.”** The International Cricket Council, the England and Wales Cricket Board and the Pakistan Cricket Board said no players or team officials had been arrested. Scotland Yard, which the News of the World and the ICC said had arrested the middle man, could not be reached by phone. The ICC declined to make further comment. **The alleged scam would have hit bookmakers in south Asia, where so-called spot-betting is common and wagers can be placed on all aspects of the game, including timings and frequencies of no-balls.** Andrew Strauss, England's cricket captain, said the allegations had “taken the gloss off” the comprehensive win his side achieved on Sunday against Pakistan in the Test match at Lord's. He told the BBC: **“We have seen things that put cricket on the front pages for the wrong reasons before and nobody likes it.”** The match's closing ceremony after

Pakistan's heaviest defeat in Test history took place behind closed doors, emphasising both the gravity of the allegations and their potential impact on the game (Peel, Fenton, & Malik, 2010).

**Title/Headline:** *Pakistan Army Cancels US Trip Amid Search Dispute*

**Abstract:** Pakistan's military canceled a trip by officers to an annual meeting at U.S. Central Command after they were taken off a plane and subjected to "unwarranted security checks" at Dulles International Airport in Washington, a spokesman said Wednesday. The row appeared to be a sign of the mistrust between the U.S. and Pakistani militaries, which are nominally allies in the fight against Taliban and al-Qaida but have long had an uneasy relationship. The nine-member delegation was headed by a two-star Navy rear admiral. Its members were awaiting take off on a United Airlines flight to Tampa, Fla. - where Central Command is based - when the incident took place Monday, said army spokesman Maj. Gen. Athar Abbas. **The delegation was taken off the plane and subjected to "unwarranted security checks" that resulted in them missing their flight. They called military authorities in Pakistan who instructed them to return home,** Abbas said. United Airlines officials were not immediately available for comment. Dawn newspaper reported that the delegation was taken off the plane after a passenger voiced concerns they may have posed a security threat. Increased airport checks at U.S. airports in response to the threat from Islamist militants after the Sept. 11 attacks are a sensitive issue for many Pakistanis, who frequently complain they are being unfairly singled out. **A group of Pakistani lawmakers on a State Department sponsored visit to the United States in March returned home early after complaining of excessive security checks and were hailed as heroes by sections of the media on their return** (Seattle Times, 2010).

**Title/Headline:** *Pakistan Bombing Death Toll Hits 65*

**Abstract:** The death toll from a bombing at a Shia Muslim rally in southwestern Pakistan has reached 65, after several seriously injured individuals passed away overnight at hospitals. Earlier reports had put the death toll at 53 with nearly 200 injured. The Friday attack came as thousands of people were attending a rally in Quetta in support of the Palestinian cause, marking the international Quds day. **According to the medics, over a dozen people succumbed to their injuries overnight at hospitals across the city on Saturday. The death toll is expected to rise further as some of the injured are reported in critical condition. The attack was the second assault against Pakistani Shia Muslims in three days. Three bombs went off in quick succession during a crowded mourning procession in the eastern city of Lahore on Wednesday. Nearly 40 people were killed and 300 more were injured in the carnage.** The attacks came as Shia Muslims were marking the martyrdom of the first Shia Imam, Ali Ibn-Abi Taleb (PBUH). Pro-Taliban militants have claimed responsibility for both of these attacks which have also killed several children. Since the 1980s, thousands of people have been killed in the sectarian-related incidents in Pakistan (Press TV, 2010).

**Title/Headline:** *Girl Schools Blown Up In NW Pakistan*

**Abstract:** Unknown assailants have blown up two girls' school on the outskirts of the northwestern Pakistani city of Peshawar. Suspected Taliban-linked militants destroyed two government-run girls' primary and high schools late on Wednesday by detonating explosives in the Budhbir area of Shooru Kheel village, *The Nation* daily newspaper reported. The explosion ripped through the schools, leveling both buildings. There were no reported casualties since the schools were empty at the time, local officials said. **Taliban-linked militants have opposed female education in the northwest Pakistan valley of Swat, depriving more than 40,000 girls of schooling. In the past several years, the Taliban have destroyed many schools, especially in the areas of Swat Valley and the North-West Frontier Province as part of their radical campaign that most Muslims have censured as anti-Islamic terrorism** (Press TV, 2010).

**Title/Headline:** *Massive Anti-US Rallies Held In Pakistan*

**Abstract:** Thousands of people have held anti-US demonstrations across Pakistan to protest an American court's verdict against a female Pakistani scientist. The protests on Friday come after a New York court sentenced 38-year-old Aafia Siddiqui to 86 years in prison. Hundreds of police officers were deployed across the capital Islamabad to stop angry protesters from marching into the US Embassy. In Siddiqui's hometown of Karachi, police fired tear gas to prevent protesters from moving towards the US consulate. In Multan, scores of activists including lawyers blocked traffic. Siddiqui has been found guilty of allegedly trying to kill FBI agents and US military service members in Afghanistan. **Human rights groups argue that she was kidnapped and held in secret US prisons abroad. Political activists and Siddiqui's relatives have strongly criticized the US justice system for its handling of the case.** The Islamabad government says it will petition Washington to secure the repatriation of the mother of three on humanitarian grounds (Press TV, 2010).

**Title/Headline:** *Pakistan United In Outrage At Sentencing Of Neuroscientist For Attacking US Agents*

**Abstract:** The country's leaders were quick to show their outrage at the sentence handed down to a Pakistani woman convicted of attacking U.S. agents, as were opposition politicians. By the time weekly prayers rolled round, protesters were battling police and the Pakistani Taliban had offered its support. The sentencing of Aafia Siddique to 86 years in an American jail left enemies and political opponents reading from the same script Friday, riding a wave of anger on behalf of a woman widely believed to be an innocent victim of a vengeful, post 9/11 American justice system. **The reaction was a reminder of the deep mistrust many Pakistanis have of the United States nine years after the two countries formed an uncomfortable alliance in the wake of the Sept. 11 attacks. While Washington tries to impress on the country it is a long-term partner, many Pakistanis persist on seeing it as a threat.** Siddique, a 38-year-old American-educated neuroscientist, was detained in Afghanistan in 2008 by Afghan authorities. She was convicted of seizing an M4 rifle weapon from one of her U.S. interrogators there and attempting to kill them. **She was severely wounded in the incidents. Siddique and her defense lawyers deny she ever fired a weapon. Her family and supporters say she disappeared along with her three children five years before she turned up in Afghanistan and allege she was either held in a secret jail by American authorities or Pakistan's spy agency.** U.S. and Pakistani officials have denied that, and there has been little evidence to support their claims. But they have been repeated so often they are taken as the standard version by many of her supporters and much of the media, which has largely rallied in her defense. **The claims of secret detention have resonance because Pakistani security forces have rounded up many terror suspects and handed them over to the United States in the aftermath of Sept. 11. Under a military ruler at the time, its government has never admitted how many people it arrested at the behest of Washington.** Such is the perceived force of public opinion, Prime Minister Yousuf Raza Gilani and other leading officials have had to stress their efforts over the last three years to try and get her back to Pakistan. The government spent hundreds of thousands of dollars to give her quality legal representation in New York. Gilani said he had lobbied U.S. officials for Siddique's release to "improve the U.S. image in Pakistan." "We all are united, and we want the daughter of the nation to come back to Pakistan," he told parliament, which unanimously adopted a resolution demanding Siddique's repatriation after her sentencing Thursday. **"I fought for her, my lawyer fought for her and now I will take up this matter on a political level."** Despite his remarks, there is little the government can do to get bring Siddique home. Islamabad has no agreement with the United States that allows Pakistanis convicted of crimes there to serve part of their sentences at home. A presidential pardon for Siddique looks very unlikely. Much of the criticism over the last 24 hours has been directed at the government, which is already unpopular in many circles because of its failure to improve the economy, its alliance with the United States and faltering efforts to respond to this summer's floods. **"Due to the shameless rulers of Pakistan, the United States got the courage to take Aafia to the United States and punish there,"** said Munawar Hassan, the chief of Jamat-i-Islami, the country's largest Islamist party, in a rally attended by around 8,000 people in the northwestern city of Peshawar. Fauzia Siddique, Aafia's sister, has led a tireless and vocal campaign for her release since 2008 and looked after two of her children. **"This verdict is a test for the Muslim global community and the Pakistanis,"** Fauzia told a gathering of Jamat-i-Islami female activists in Karachi. **"It is mandatory on all Muslims to get the daughter of the Muslims free from the prison of the infidels."** Before her arrest in Afghanistan, Siddique had been accused by the U.S. of links to al-Qaida. **Prosecutors said they found her carrying notes referencing a "mass casualty attack" on New York City landmarks and a stash of sodium cyanide. But she was only ever tried in relation to the attack on her captors in Afghanistan.** Her loudest supporters have been Pakistan's Islamist political parties and groups, which have embraced the opportunity to be seen defending a Pakistan Muslim woman as well as accusing the government of collaborating in her arrest and trial. **In Karachi, police fired tear gas to disburse rock-throwing protesters trying to march to the U.S. Consulate. At least five people were arrested. In Islamabad, 100 people attempting to reach the U.S. Embassy scuffled with police near a five-star hotel, witnesses said. "Down with America! Jihad, Jihad!" the protesters shouted.** The Pakistani Taliban, which is waging war against the Pakistani government and has killed scores of innocent men, women and children in bombings over the last three years, also spoke out in support of Aafia. **"We will not appeal or beg to America for the release of Aafia Siddique,"** said Taliban spokesman Azam Tariq by phone from an undisclosed location. **"We will bring her back by using the power of the gun"** (Fox News, 2010).

**Title/Headline:** *Bomb Scare Interrupts Flight Carrying 273 People, But May Have Been A Hoax*

**Abstract:** Canadian police are investigating whether a phoned-in hoax caused a Pakistani jet to be diverted to Stockholm for several hours Saturday for fear that one of its passengers was carrying explosives. Police evacuated 273 people from the jet, and briefly detained a Canadian man, after an anonymous caller in Canada tipped-off authorities that the suspect was carrying explosives. **However, no explosives were found on the man, who was released after questioning by police, or on the Boeing 777 from Pakistan**

**International Airlines, which had been bound from Toronto to Karachi, Pakistan.** The Royal Canadian Mounted Police said it was investigating whether the incident was a "terrorism hoax." **"If the information is deemed to be a hoax, the person who passed along that information can be charged for public mischief,"** said spokeswoman Sgt. Julie Gagnon in Ottawa. All passengers — except the suspect — were allowed back on the plane at Stockholm's Arlanda airport nine hours later. It took off for Manchester, England, from where the passengers would continue their journey to Karachi, said Jan Lindqvist, a spokesman for airport operator Swedavia. **Swedish police described the suspect as a Canadian citizen born in 1982. Initially they said he was of Pakistani background but later said they were not sure.** A spokesman for the state-owned Pakistan International Airlines said the suspect was a 25-year-old Canadian national. A prosecutor decided to release the man after questioning, and police were trying to help him continue his journey to Karachi either late Saturday or Sunday, police spokesman Erik Widstrand said, adding the man had cooperated with investigators. "He was calm but irritated," Widstrand said. The pilot asked to land the plane in Stockholm after Canadian authorities said they received a tip-off by phone the man was carrying explosives. **Passengers were told there was a technical problem with the aircraft and didn't find out the real reason until they were on the ground, Widstrand said. A SWAT team detained the suspect as he was evacuated from the aircraft along with the other passengers.** An Associated Press reporter at the airport saw the passengers boarding yellow airport buses parked near the aircraft. **The tip was "called in by a woman in Canada," police operation leader Stefan Radman said, adding that Swedish police took the threat seriously. Royal Canadian Mounted Police spokesman Sgt. Marc LaPorte said an anonymous caller called twice Friday saying a man on the flight had explosives. "The first call provided vague information. It did lay out that there was an individual on that specific flight in possession of explosives and then the second call provided more details with regards to the identity of the person,"** LaPorte said. He declined to elaborate on the caller, saying there was potentially a criminal offense involved. "On its face" it appears someone had an ax to grind against the man, LaPorte said, but couldn't elaborate on the motive. **"If the Swedish authorities are saying that they released him and there is no investigation on their end, we will obviously pursue this as a hoax,"** LaPorte said, adding there could be a terrorism hoax charge as well as a public mischief charge. In Washington, the FBI was assisting Swedish and Canadian authorities in their investigation, FBI spokesman Paul Bresson said Saturday. Swedish police said the man was not on any international no-fly lists and had cleared a security check in Canada. **He didn't resist when the SWAT team took him into custody. In Pakistan, a spokesman for state-run PIA confirmed the incident involved Flight PK782 to Karachi.** The passengers waited at the "international holding area" at the airport as they and their luggage were scanned and searched, airline spokesman Sultan Hasan said. Pakistani diplomats were at the airport to coordinate with the security officials. **PIA said there were 255 passengers and 18 crew members on the plane. Of the passengers, 102 were Canadian nationals, 139 Pakistanis, eight U.S. citizens, three Indians and one each from Japan, Malaysia and Bangladesh.** The Canadian Embassy in Stockholm was in contact with local authorities to gather additional information, Foreign Affairs spokesman Alain Caccione said (Fox News, 2010).

**Title/Headline:** *Pervez Musharraf To Return From Exile In Britain As 'Saviour' Of Pakistan*

**Abstract: Pakistan's former military leader, Pervez Musharraf, tells Colin Freeman why his country needs him again - and why British troops must stay the course in Afghanistan. For the last two years he has earned a lucrative living on the global lecture circuit, enlightening select audiences on what it was like to have a ringside seat in the war on terror.** As the military ruler of Pakistan in the turbulent period after 9/11, former president Pervez Musharraf has no shortage of ideas on how to fight extremists and pacify both his homeland and neighbouring Afghanistan. **Now the former general is about put his theories to the test - quitting his comfortable retirement pad in London, where he has lived since stepping down in 2008, and returning to Pakistan to launch his own political party.** The All Pakistan Muslim League will have its opening manifesto launch in London on Friday, aiming for nothing less than to "change the political culture" of his home nation, where last month's devastating floods have added to already crippling problems with terrorism and weak government. **Indeed, given the scale of the challenges he now plans to grapple with, it is perhaps no surprise to learn that the public speaking firm to which Mr Musharraf is signed with, the elite Harry Walker agency, also has anti-poverty campaigner Bono, climate change guru Al Gore and several other stars of the "how-to-save-the-world" school of motivational speaking on its books. "I am very comfortable travelling around the world on lectures, but I am going into politics for the greater cause of Pakistan," Mr Musharraf told *The Sunday Telegraph* in an interview last week. "The people have reached the end of their hopes, and I want to try to rekindle their faith in both themselves and Pakistan itself. It would be better to try and fail rather than not to try at all."** The former special forces soldier was also vocal on the military challenges in neighbouring Afghanistan, saying that the escalating bodycount of British, US and other Nato soldiers should be no excuse for an early pull-out. US-led plans to start drawing down troops by the middle of next year would, he warned, lead to the region becoming a "nexus for terrorists" all over the Muslim world. **"I am not trying to portray a doomsday scenario unnecessarily, but the implications would be very serious for Afghanistan, Pakistan and the rest of world," he said. "It would encourage and strengthen the Taliban and al-Qaeda, giving them a country to fall back on. Quitting cannot be time related, it has to be effect related."** In a blunt comment on what he called "bring the boys home" sentiment in Britain, he added that soldiers should not sign up for military service if they did not expect to face combat. "I don't understand why there is this issue when an army suffers casualties. Of course you try to keep them to a minimum, and I offer my deep condolences to the family of any soldier is killed, but I would also ask their parents: 'Why was it that they joined the army?' All voluntary armies face occasions where they have to maybe fight for their country and sacrifice their lives." **Mr Musharraf, 67, was speaking at his flat off London's Edgware Road, where he lives in a smart three-bedroom apartment in London's Arab district.** Handy for the smart restaurants of nearby Mayfair, where he and his wife are regular faces, it is also close to reminders of the turbulence in his homeland. Nearby Edgware Road tube station was among those hit by the July 7 bombers, carried by British-born Pakistani radicals, while last week, a few miles away in Edgware itself, Imran Farooq, the exiled leader of Pakistan's MQM party, was murdered in what may have been a turf war linked to events in Karachi. **Mr Musharraf, who receives occasional Scotland Yard protection himself, declined to speculate on the motive for the killing, but said: "It is terrible that such an assassination could happen in a place like London."** His self-rebranding as his homeland's civilian saviour is in marked contrast to how his political career began in 1999, when he became the latest in a long line of Pakistani military leaders to seize power from a civilian government seen as incompetent and corrupt. **As the title of his recent biography *In the***

*Line of Fire* suggests, he then came under huge US pressure to clamp down on the Taliban and al-Qaeda in the wake of 9-11, much to the fury of religious hardliners in his own country. His star faded further as he clung to power for a further seven years, culminating in calls from political rivals for him to face criminal charges when he finally stepped down. Since then, though, his reputation has recovered somewhat, not least because the civilian administration of President Ali Asif Zardari, who was elected in late 2008, is seen to have done little better. Widespread public anger at his government's lacklustre response to the floods, which have left 12 million in need of emergency food aid, could well prove a filip to Mr Musharraf's new party. While he declined to comment on Mr Zardari's performance, Mr Musharraf said: "There is a hell of a lot of disappointment among the people over the way the flood relief was tackled." He added: "What is required is unity of thought and action between three elements; the political forces, the army and the bureaucracy. They need an individual who can get them to think and act alike." Whether Mr Musharraf will find politics as easy in civilian clothes remains to be seen though. His fledgling party may struggle against the more established political groupings like Mr Zardari's Pakistan Peoples Party, which has enjoyed a mass following for several decades. He is, however, looking forward to one advantage that he lacked during his previous stints in power - legitimacy. "Personally I never saw myself as a dictator, even though people called me that, but now when I come back I will be a politician on normal terms. I am also a born optimist, which helps. We have everything going in Pakistan - the failure is only of leadership, not the people" (Telegraph, 2010).

**Title/Headline:** *NATO Forces Kill More Than 50 Insurgents In 2 Airstrikes In Pakistan*

**Abstract:** NATO helicopters based in Afghanistan carried out at least two airstrikes in Pakistan that killed more than 50 militants after the insurgents attacked a small Afghan security outpost near the border, spokesmen said Monday. NATO justified the strikes based on "the right of self-defense." Pakistan is sensitive about attacks on its territory, but U.S. officials have said they have an agreement that allows aircraft to cross a few miles into Pakistani airspace if they are in hot pursuit of a target. **The first strike took place Saturday after insurgents based in Pakistan attacked an Afghan outpost in Khost province, which is located right across the border from Pakistan's North Waziristan tribal area,** said U.S. Capt. Ryan Donald, a spokesman for the NATO-led International Security Assistance Force in Afghanistan. "The ISAF helicopters did cross into Pakistan territory to engage the insurgents," said Donald. "ISAF maintains the right to self-defense, and that's why they crossed the Pakistan border." The strike killed 49 militants, said U.S. Maj. Michael Johnson, another ISAF spokesman. The second attack occurred when helicopters returned to the border area and were attacked by insurgents based in Pakistan, said Donald. "The helicopters returned to the scene and they received direct small arms fire and, once again operating in self-defense, they engaged the insurgents," said Donald. The strike killed at least four militants, said Johnson. The tribal area where the strikes took place is largely controlled by militants who regularly carry out attacks against NATO troops in Afghanistan. **The U.S. rarely uses manned aircraft to carry out strikes in North Waziristan and instead relies on drone attacks that American officials refuse to acknowledge publicly. Pakistani intelligence officials said two NATO helicopters carried out a third strike inside Pakistani territory on Monday morning, killing five militants and wounding nine others.** The strike occurred in the village of Mata Sanger in the Kurram tribal area, which is directly across the border from the Afghan provinces of Paktia and Nangarhar, said the officials, speaking on condition of anonymity because they were not authorized to talk to the media (Fox News, 2010).

**Title/Headline:** *Gen Musharraf Warns Of Pakistan Coup After Crisis Meeting In London*

**Abstract:** Gen Musharraf warns of Pakistan coup after crisis meeting in London. Pakistan's former military dictator has warned of a new army-led coup against the government as he prepared to launch a new political party in London on Friday. Gen Pervez Musharraf said the army should be given a constitutional role in the government of the Muslim state. **Pakistan's former military dictator has warned of a new army-led coup against the government as he prepared to launch a new political party in London on Friday. Gen Musharraf warns of Pakistan coup after crisis meeting in London.** "The situation in Pakistan can only be solved when the military has some role," he said. "If you want stability, checks and balances in the democratic structure of Pakistan, the military ought to have some sort of role." Rumours of an imminent coup have swept through Pakistan since an angry confrontation between the unpopular president and the army chief earlier this week. Gen Ashfaq Kayani, the hand-picked successor of Gen Musharraf, criticised President Asif Ali Zardari and Yusuf Gilani, the prime minister, for the government's response to the floods that devastated the country in July, leaving at least 2,000 dead and millions displaced. Gen Musharraf said the circumstances that forced him to launch a coup against the civilian government in 1999 had re-emerged. **"In that one year, Pakistan was going down and a number of people, including politicians, women, men came to me, telling me 'Why are you not acting? Are you going to act for Pakistan's good?'" "You see the photographs of the meeting with the president and the prime minister and I can assure you they were not discussing the weather,"** he said. "There was a serious discussion of some kind or other and certainly at this moment all kinds of pressures must be on this army chief." The 67-year-old former president, who was forced out of office in 2008, will launch the All Pakistan Muslim League, in Whitehall on Friday as he looks to contest the next elections in 2013 as a civilian. **Mr Gilani said Gen Musharraf would face trial in front of Pakistan's supreme court on corruption charges if he returned to Pakistan from his London exile** (McElroy, 2010).

**Title/Headline:** *U.S. Slams Pakistani Effort Against Militants*

**Abstract:** A new White House assessment steps up criticism of Pakistan's campaign against militants, stating bluntly that its government and military have been unwilling to take action against Al Qaeda and like-minded terrorists. The aggressive language of the report—which also criticizes the leadership of President Asif Ali Zardari—could further strain difficult relations with a key ally and undercut support in Congress for providing billions of dollars in aid to Islamabad. **The report, viewed by The Wall Street Journal, also raises questions about the U.S.-led coalition's progress battling the Taliban and improving governance in Afghanistan two months before the White House will review its war strategy.** The administration and Pentagon have until now tried to keep their harshest criticisms of Pakistan private to avoid a public rift, but the report shows growing U.S. frustration, officials said. **"The report reflects that there are real challenges we have with Pakistan," said an Obama administration official. Officials at all levels are in talks with Pakistan to address these issues, the official added.** President Barack Obama, in a letter to Congress accompanying the report, said he doesn't see the need for any adjustments in Afghanistan-Pakistan strategy "at this time." While administration officials have publicly played down the need for adjustments in strategy, they have made some changes, including a recently stepped-up campaign of strikes in Pakistan by Central Intelligence Agency drones against militants whom the U.S. sees Islamabad as unable or unwilling to attack. Pakistani officials have said they don't lack the will and that they have generally stepped up their efforts in response to U.S. requests, getting too little credit for it. But they say their army is already stretched thin—a problem exacerbated when soldiers were diverted to respond this summer to the worst flooding in the country's history. **"The Pakistan military continued to avoid military engagements that would put it in direct conflict with Afghan Taliban or Al Qaeda forces in North Waziristan," the White House concludes, referring to the Pakistani tribal region that U.S. officials say is being used as a staging ground for attacks on troops in Afghanistan, as well as to plot attacks on targets in Europe** (Fox News, 2010).

**Title/Headline:** *Report: Pakistan Spy Agency Urging Taliban To Fight U.S.*

**Abstract:** Members of Pakistan's spy agency are pressing Taliban field commanders to fight the U.S. and its allies in Afghanistan, U.S. officials and Afghan militants have told The Wall Street Journal, a development that undercuts a key element of the Pentagon's strategy for ending the war. The explosive accusation is the strongest yet in a series of U.S. criticisms of Pakistan, and shows a deteriorating relationship with an essential ally in the Afghan campaign. **The U.S. has provided billions of dollars in military and development aid to Pakistan for its support. The U.S. and Afghanistan have sought to persuade midlevel Taliban commanders to lay down their weapons in exchange for jobs or cash.** The most recent Afghan effort at starting a peace process took place this week in Kabul. But few Taliban have given up the fight, officials say. Some Taliban commanders and U.S. officials say militant leaders are being pressured by officers from Pakistan's Inter-Services Intelligence agency not to surrender. **"The ISI wants to arrest commanders who are not obeying [ISI] orders," said a Taliban commander in Kunar province.** U.S. officials say they have heard similar reports from captured militants and those negotiating to lay down their arms. A senior Pakistani official dismissed the allegation, insisting Islamabad is fighting militants, not aiding them. **"Whenever anything goes wrong in Afghanistan, ISI is to be blamed," said the senior Pakistani official. "Honestly, they see ISI agents behind every bush in Afghanistan."** The Taliban commander in Kunar, like others interviewed in recent days, said he remained opposed to the presence of foreign troops in Afghanistan and had no plans to stop fighting them. **But "the ISI wants us to kill everyone—policemen, soldiers, engineers, teachers, civilians—just to intimidate people," the commander said** (Fox News, 2010).

**Title/Headline:** *U.S. Apologizes For Attack On Pakistani Soldiers*

**Abstract:** **The U.S. apologized Wednesday for a recent helicopter attack that killed two Pakistani soldiers at an outpost near the Afghan border, saying American pilots mistook the soldiers for insurgents they were pursuing.** The apology, which came after a joint investigation, could pave the way for Pakistan to reopen a key border crossing that NATO uses to ship goods into landlocked Afghanistan. Pakistan closed the crossing to NATO supply convoys in apparent reaction to the Sept. 30 incident. **Suspected militants have taken advantage of the impasse to launch attacks against stranded or rerouted trucks, including two Wednesday where gunmen torched at least 55 fuel tankers and killed a driver. "We extend our deepest apology to Pakistan and the families of the Frontier Scouts who were killed and injured,"** said the U.S. ambassador to Pakistan, Anne Patterson. Pakistan initially reported that three soldiers were killed and three wounded in the attack, but one of the soldiers who was critically injured and initially reported dead ended up surviving, said Maj. Fazlur Rehman, the spokesman for the Frontier Corps. Pakistani soldiers fired at the two U.S. helicopters prior to the attack, a move the investigation team said was likely meant to notify the aircraft of their presence after they passed into Pakistani airspace several times. **"We believe the Pakistani border guard was simply firing warning shots after hearing the nearby engagement and hearing the helicopters flying nearby,"** said U.S. Air Force Brig. Gen. Tim Zadalis, NATO's director for air plans in Afghanistan who led the investigation. **"This tragic event could have been avoided with better coalition force coordination with the Pakistan military."** The head of U.S. and NATO forces in Afghanistan, Gen. David Petraeus, also expressed his condolences, saying in a statement that "we deeply regret this tragic loss of life and will continue to work with the Pakistan military and government to ensure this doesn't happen again." Pakistan moved swiftly after the attack to close the Torkham border crossing that connects northwestern Pakistan with Afghanistan through the famed Khyber Pass. **The closure has left hundreds of trucks stranded alongside the country's highways and bottlenecked traffic heading to the one route into Afghanistan from the south that has remained open. There have been seven attacks on NATO supply convoys since Pakistan closed Torkham, including those Wednesday.** NATO officials have insisted that neither the attacks nor the border closure have caused supply problems for NATO troops since hundreds of trucks still cross into Afghanistan each day through the Chaman crossing in southwestern Pakistan and via Central Asian states. **But reopening Torkham is definitely a priority for NATO because it is the main crossing in Pakistan, the country through which NATO ships the majority of its supplies into Afghanistan. Other routes are more expensive and logistically difficult. Both U.S. and Pakistani officials have predicted Torkham would reopen soon, and the apologies issued Wednesday could provide Pakistan with a face-saving way to back down.** Reopening the border could reduce the frequency with which militants have attacked NATO supply convoys in recent days, although such attacks occurred regularly even before Torkham was closed. **The first attack Wednesday came early in the morning when an unidentified number of gunmen in two vehicles attacked trucks as they sat in the parking lot of a roadside hotel on the outskirts of Quetta, the capital of Baluchistan province. They were making their way to the Chaman crossing. One driver was killed in the attack and at least 25 trucks were destroyed by fire that spread quickly from vehicle to vehicle, senior police official Hamid Shakil said.** On Wednesday night, suspected militants armed with assault rifles opened fire on oil tankers parked along the road in Khyber Pakhtunkhwa province as they were making their way to Torkham. **At least 30 tankers were engulfed in flames, said local police officer Nisar Khan. It was unclear if there were any casualties.** Of the seven attacks on convoys bringing supplies in from the port city of Karachi since the Torkham closure, five were on trucks heading to that crossing and two were on their way to Chaman. The convoys bring fuel, military vehicles, spare parts, clothing and other non-lethal supplies for foreign troops in Afghanistan. It was unclear who was behind the latest attacks, but the Pakistani Taliban have claimed responsibility for similar assaults on NATO supplies. **The helicopter attack and the border closure have exposed the frequent strains in the alliance between Pakistan and the United States. But Pentagon spokesman Geoff Morrell downplayed**

the possibility of any lasting effects. "There are incidents which create misunderstandings, there are setbacks, but that does not mean the relationship — this crucial relationship to us — is in any way derailed," Morrell said Tuesday. Even if the border is reopened, underlying tensions will remain in the U.S.-Pakistan relationship, especially over Pakistan's unwillingness to go after Afghan Taliban militants on its territory with whom it has strong historical ties and who generally focus their attacks on Western troops, not Pakistani targets. (USA Today, 2010).

**Title/Headline:** *Nato Contractors 'Attacking Own Vehicles' In Pakistan*

**Abstract:** Nato supply convoys travelling through Pakistan to Afghanistan have regularly come under attack in the past, but following Pakistan's decision to block their route through the Khyber Pass, they now face an even bigger security threat. Hundreds of tankers and trucks have been left stranded on highways and depots across Pakistan, with little or no security. Taliban militants have regularly been targeting the convoys, even when they are heavily protected. But many believe it is not just the militants who pose a security threat to the convoys. **The owners of oil tankers being used to supply fuel to Nato in Afghanistan say some of the attacks on their convoys are suspicious. They say there is evidence to suggest that bombs have been planted in many of vehicles by the "Nato contractors" - individuals or companies who have been contracted by Nato to supply fuel and goods to forces in Afghanistan.** The contractors subsequently hire the transporters who then carry the goods. Dost Mohammad, an oil tanker owner from Nowshera district, said a Nato contractor had recently been caught trying to plant a bomb in an oil tanker. **Contractors say there is little of no security for the supply convoys. "This happened in the area of Paiyee, when he was putting the bomb under the vehicle." "At that time, a few men also opened fire on the tankers. The deputy later told the police that he had been told to plant the bomb by the contractor."** Dost Mohammad said the contractor had apparently sold off the fuel first. **"Only 2,000 litres from the original 50,000 litres had been left in the tanker to cover up the crime," he said. Dost Mohammad said it is a win-win situation for the contractors. "If an old vehicle is burnt, Nato gives them money for a new vehicle. In addition, they receive compensation for all the fuel lost as well."** "We are very scared at the moment - we are an open target for the militants" said Israrullah Shinwari of the All Pakistan Oil Tankers Association. But the Deputy Minister for Interior, Tasneem Ahmed, dismissed the transporters' claims. "We have no such information that the Nato contractors are themselves setting the tankers on fire," he told the BBC. "No such complaints have been lodged, to my knowledge." **The BBC also spoke to a Nato contractor, who was similarly dismissive of the allegations. Speaking on condition of anonymity, he said Nato insured all the goods being transported and the vehicles carrying them. "Nato pays the premium and bears the relevant charges with the local companies who provide the schemes. The transporters are then reimbursed on the basis of their actual losses," he said. But he said the policies were only valid within Pakistan. But Nowshera's police chief, Nisar Tanoli, had a different account of events.**

### **Khyber Pass:**

- 1) Up to 80% of Nato supplies for Afghanistan pass through Pakistan
- 2) Majority are driven 1,200 miles (1,931km) from port of Karachi to Kabul via Khyber Pass
- 3) 1,000 container lorries and tankers travel daily through the pass to Kabul
- 4) Khyber Pass is 53km long (33 miles) and up to a height of 1,070m (3,444ft)
- 5) About 150 lorries go via the southern supply route through Chaman to Kandahar

Talking to the BBC, he confirmed that at least two attempts to blow up oil tankers had taken place in the district. "One took place in Paiyee, and the other in the area of Watak near Akora Khattak," he said. **"In both incidents the tankers were parked in the area for a couple of days. During this time, bombs were made in nearby houses and then used on the tankers." He said the contractors were "in a hurry" to get a copy of the initial police reports into the incident and were "not interest in prolonging the investigations".** "The insurance agents also showed up a few days later," he said. Mr Tanoli says the police carried on their investigations and the facts eventually came to light. **"We have now arrested some drivers and their helpers," he said. "The people behind them are not residents in the district, but we have issued warrants for their arrest." He added that there have been incidents in which fuel for aircraft has been sold off. "The contractors later said it had leaked, or the tanker caught fire."** All, then, is not as straight forward as it seems, as far as the threat to the Nato supply route is concerned. "Pakistan's intelligence and security apparatus may be encouraging the attacks by looking the other way" said a Security analyst. But despite these additional concerns, the main danger continues to come from the Taliban. **"We are very scared at the moment - we are an open target for the militants," said Israrullah Shinwari, a spokesman for the All Pakistan Oil Tankers Association. "Since the blockade was enforced, we have 3,000 tankers stranded across Pakistan." "The blockade itself has cost us tens of millions of rupees in losses. This does not include the damages suffered in the attacks. "The Taliban have openly declared they will target the tankers, but we have been provided with no security."** Since 2007, the militants have destroyed or captured dozens of Nato transport vehicles, especially in the Khyber tribal region. But a security analyst said the latest move was "tantamount to encouraging the militants to have a real go at the convoys". **"The fact that government ministers are calling the attack an expression of public anger shows that some may just be payback," he said. "Pakistan's intelligence and security apparatus may be encouraging the attacks by looking the other way. In fact, there are suggestions that agencies may themselves be behind some themselves" (Sohail, 2010).**

**Title/Headline:** *Alleged Suicide Bombs Kill 8 At Pakistan Sufi Site*

**Abstract:** Two suspected suicide bombers have attacked the most beloved Sufi shrine in Pakistan's largest city, killing at least eight people, wounding 65 others, and sending a stark reminder of the threat posed by Islamist militants to this U.S.-allied nation. Angry mobs burned tires and torched buses in the aftermath of the bombings in Karachi late Thursday. The attack came amid tensions between Washington and Islamabad over NATO helicopter incursions that have led Pakistan to close a key border crossing used to ferry supplies to Western troops in Afghanistan. Despite U.S. apologies over the incursions, one of which left two Pakistani soldiers dead, Islamabad said Thursday it had yet to decide when to reopen the crossing. **The explosions at the Abdullah Shah Ghazi shrine in southern port city of Karachi happened at the busiest time of the week when thousands typically visit to pray, distribute food to the poor and toss rose petals on the grave of the saint. The dead included two children.** Ghazi was an 8th century saint credited with bringing Islam to the region along the coast. Local legend has it that his shrine protects Karachi from cyclones and other sea-related disasters. **Pakistani Sufi sites have frequently been the target of Islamist militant groups, whose hardline interpretations of the religion leave no room for the more mystical Sufi practices that are common in this Sunni Muslim-majority nation of 175 million.** The first explosion took place as the suspected bomber was going through the metal detector before a long staircase leading to the main shrine area, said Babar Khattak, the top police official in Sindh province. **The second blast took place about 10 seconds later, farther ahead of the metal detector, he said. In the aftermath, an Associated Press reporter saw blood, flesh and shoes splattered at the shrine compound.** Mohibullah Khan, a 38-year-old manual laborer, was about to visit the shrine after evening prayers at a nearby mosque when the explosions occurred. **"I heard a huge bang and smoke billowed from there," Khan said. "I ran back toward the mosque and seconds after heard another big explosion. Then I moved to help the wounded and put six or seven of the crying ones in ambulances and police vehicles. "Gunshots could be heard throughout the chaotic city of 16 million-plus after the attack, while angry mobs torched at least two buses in the downtown area and burned tires on some roads.** Sindh province Home Minister Zulfiqar Mirza said all city shrines were being sealed off. Condemnations poured in from Pakistani leaders, including President Asif Ali Zardari, who was staying elsewhere in the city at the time. **"We remain committed to fighting these murderers and expelling them from our land," Zardari aide Farahnaz Isphani said in an e-mail. In July, twin suicide bombers in the eastern city of Lahore attacked Data Darbar, Pakistan's most revered Sufi shrine, killing 47 people and wounding 180** (Fox News, 2010).

**Title/Headline:** *Pakistan To Investigate Execution Video*

**Abstract:** Pakistan's army chief orders inquiry into mobile phone footage that purports to show soldiers shooting dead blindfolded men. Pakistan's army chief, General Ashfaq Kayani, has ordered an inquiry into a video that purports to show a group of soldiers gunning down six blindfolded men in the country's troubled north-west. **The video, which has been circulating on the internet for weeks has renewed long-standing concerns about military human rights violations during operations against the Taliban.** If authenticated it could jeopardise \$2bn (£1.2bn) in US military subsidies to Pakistan, under a law that prohibits funding of foreign armies with a record of gross human rights abuses. **Announcing the board of inquiry this morning, Kayani said it would determine the veracity of the video, including the identity of the executioners wearing Pakistani army soldiers' uniforms. Appearing to take a tough stance, he said: "It is not expected of a professional army to engage in excesses against the people whom it is trying to guard against the scourge of terrorism," he said. But he added that in the past Pakistani militants have posed as soldiers.** In the graphic five-and-a-half minute video, a group of soldiers wearing flak jackets line up six blindfolded men wearing salwar kameez, some apparently teenagers, before a wall in a wooded area. A bearded helmet-less soldier, his hands in his pockets, strolls up to the men and addresses them individually. **Moments later a shooting squad of at least six soldiers, standing in a rough line, unleashes a volley of automatic gunfire. The detainees fall to the ground, some moaning in pain. Two soldiers approach and open fire at close range, apparently finishing them off.** A state department spokesman last week described the images as "horrifying". One Pakistani website claimed the video, which appears to have been shot on a mobile phone, had been recorded in the Swat valley, where Pakistan conducted a sweeping military operation in 2009. **However, the video contains no proof of this, and others have suggested it was recorded in the Orakzai Agency tribal area.** There is also no information about when the video was recorded, or the identity of those killed. **The film quality is grainy but some soldiers' faces are identifiable. They appear to be carrying G3 rifles, the standard issue Pakistani military weapon. The video first surfaced on jihadist websites, where they were being touted as a militant recruiting tool, and was later picked up by the US-based Search for international terrorist entities (Site) Intelligence Group that monitors extremist websites. News of the inquiry received a cautious welcome from human rights activists who have long accused the army of illegal detention, torture and execution during operations in the Swat valley and the tribal belt.** "While we welcome the announcement from Gen Kayani it remains to be seen whether this inquiry will be meaningful or is just a sop to the international community," said Ali Dayan Hasan of Human Rights Watch. Hasan said he could not confirm the Swat video but that in general terms "credible grounds exist for the Leahy amendment to be invoked", referring to the 1997 US law that prohibiting funding of armed forces with a record of human rights abuse. **"The fact is that HRW and others have documented scores of executions, collective punishment and other abuses by the Pakistani military in Swat. To date nobody in the Pakistani military has been held accountable."** The US has previously used the Leahy amendment to sanction Colombia and Indonesia.

But the Bush administration refused to apply its provisions to Iraqi military units implicated in human rights abuses after 2003. Pakistan's army, a difficult but essential partner in the fight against Islamist extremism, may also find a way of avoiding sanctions. **A senior Pakistani official said that if the tape is verified the inquiry will probably shift blame on to the individual unit involved, shirking any institutional responsibility** (Walsh, 2010).

**Title/Headline:** *Is Pakistan Falling Apart*

**Abstract:** **Is Pakistan disintegrating? Are the state and society coming apart under the impact of successive political and natural disasters? The country swirls with rumours about the fall of the civilian government or even a military coup. The great Indus flood has disappeared from the headlines at home and abroad, though millions of farmers are squatting in the ruins of their villages. The US is launching its heaviest-ever drone attacks on targets in the west of the country, and Pakistan closed the main US and Nato supply route through the Khyber Pass after US helicopters crossed the border and killed Pakistani soldiers. Pakistan is undoubtedly in a bad way, but it is also a country with more than 170 million people, a population greater than Russia's, and is capable of absorbing a lot of punishment. It is a place of lop-sided development. It possesses nuclear weapons but children were suffering from malnutrition even before the floods. Electricity supply is intermittent so industrialists owning textile mills in Punjab complain that they have to use their own generators to stay in business. Highways linking cities are impressive, but the driver who turns off the road may soon find himself bumping along a farmer's track. The 617,000-strong army is one of the strongest in the world, but the government has failed to eliminate polio or malaria. Everybody agrees that higher education must be improved if Pakistan is to compete in the modern world, but the universities have been on strike because their budgets had been cut and they could not pay their staff. The problem for Pakistan is not that the country is going to implode or sink into anarchy, but that successive crises do not produce revolutionary or radical change. A dysfunctional and corrupt state, part-controlled by the army, staggers on and continues to misgovern the country. The merry-go-round of open or veiled military rule alternates with feeble civilian governments. But power stays in the hands of an English-speaking elite that inherited from the British rulers of the Raj a sense of superiority over the rest of the population. The present government might just squeak through the post-flood crisis because of its weakness rather than its strength. The military has no reason to replace it formally since the generals already control security policy at home and abroad, as well as foreign policy and anything else they deem important to their interests. The ambition of the Prime Minister, Yousuf Raza Gilani, in the next few weeks is to try to fight off the demand by the Chief Justice, Iftikhar Muhammad Chaudhry, that the legal immunity of President Asif Ali Zardari should be lifted. Mr Zardari, who owes his position to having been the husband of Benazir Bhutto, assassinated in 2007, has a well-established (though unproven) reputation for corruption during his pre-presidential days. Whatever the outcome of the struggle with the Supreme Court, Mr Zardari is scarcely in a position to stand up to the military leaders who may find it convenient to have such a discredited civilian leader nominally in power. The military have ruled Pakistan for more than half the time since independence in 1947, but their control has never been quite absolute. The soldiers have never managed to put the politicians and the political parties permanently out of business, so the balance between military and non-military still counts. But there is no doubt about which way the struggle is going. A decisive moment came on 24 July this year when General Ashfaq Parvez Kayani, the army chief of staff, was reappointed for another three-year term. The US embassy in Islamabad is said by foreign diplomats and Pakistani officials to have protested vigorously but unavailingly to Washington. It said that keeping General Kayani in place would inflict a fatal wound on democracy and demonstrate that the civilian government could not get rid of its own army commander. In the event, Washington, always a crucial influence in Islamabad, decided that it would prefer to deal with a single powerful figure able to deliver in negotiations over Afghanistan. This was in keeping with US policy towards Pakistan since the 1950s. "We were put under intense pressure to keep Kayani," said an aide of President Zardari's. "We were left with no choice." In one sense, the army never really left power after the fall of General Pervez Musharraf in 2008. It has continued to allocate to itself an extraordinarily high proportion of Pakistan's limited resources. Military bases all over the country look spruce and well cared-for, while just outside their razor-wire defences are broken roads and slum housing. At the entrance of a base just west of Islamabad last week was an elderly but effective-looking tank as a monument, the ground around it parade-ground clean. A few hundred yards away, a yellow bulldozer was driving through thick mud to make a flood-damaged road passable two months after the deluge, while a side street nearby was closed by a pool of stagnant grey-coloured water. At the other end of the country in northern Sindh, a local leader, who like many critics of the Pakistani military did not want his name published, pointed to a wide canal. He said: "This canal is not meant to be taking water from the Indus, but it is allowed to operate because it irrigates land owned by army officers." The army projects a messianic image of itself in which it selflessly takes power to save the nation. It likes to contrast its soldierly virtues of incorruptibility and efficiency with the crookedness and ineptitude of civilians. "The army is very good at claiming to be the solution to problems which it has itself created," • complained a local politician in Punjab. "It is also good at ascribing all failures to civilian governments, which cannot act because the army monopolises resources." He added caustically that in his area, the floods had arrived on 6 August and the first army assistance on 26 August. Politicians and journalists criticising the army often employ code words where more is implied than stated. But last month, a government minister made a pungent attack on the army that astonished listening journalists. The minister for defence production, Abdul Qayyum Jatoi, directly accused the army of being behind the killing of the opposition leader, Benazir Bhutto, in 2007, and the revered Baluchi leader Nawab Bugti, a year earlier. "We did not provide the army with uniforms and boots to kill their own countrymen," • Mr Jatoi said bluntly, suggesting that the army leaders do their duty by going to defend Pakistan's frontiers and end rumours of a coup. He added: "Not only politicians should be blamed for corruption, rather [army] generals and judges should be held responsible." Mr Jatoi's words reflect what Pakistanis say about the army in private, but seldom dare do so in public. He paid a price for his forthrightness, since Mr Gilani promptly sacked him and he is being accused of high treason in a petition before the courts. He says he does not miss his job very much because all the important decisions in his ministry were in any case taken by the military. Pakistanis are unhappy because every week seems to bring another piece of bad news. The country is highly politicised with millions of people observing with acute interest the struggles for power at the central and local level. Taxi drivers discuss the make-up of the Supreme Court and its future composition. When it comes to open and lively political disputes, Pakistan is more like Lebanon, with its tradition of weak government but free expression of opinion, than Russia or**

Egypt with their supine and intimidated populations. Political parties in Pakistan are powerful and, given an ineffectual and corrupt administrative apparatus, everybody believes he or she needs somebody of influence to protect their interests. **The army likes to denigrate civilian politicians as "feudalists", but in practice, big landowners have limited political power. Politicians gain influence through helping "clients" who need their support and that of their parties. "All politics here is really about jobs,"** says National Assembly member Mir Dost Muhammad Mazari. Pakistan may not be falling apart, but the floods and the economic crisis – the government is bankrupt and inflation is at 18-20 per cent – means that every Pakistani I meet, be they small farmers, generals, industrialists or tribal leaders, is gloomy about the future. **Each negative incident is interpreted as a sign of Pakistan's decline and a menacing omen of worse to come. Two recent scandals, both filmed as they happened and shown on as many as 26 cable television news channels, appear to confirm that the country is saturated with corruption and violence. This explosion of news channels has happened only in the past few years and makes it far more difficult to censor information.** One scandal was the notorious allegation of match-fixing in return for bribes made against Pakistani cricketers touring England. Commentators noted acidly that it was typical of the political system that the highly unpopular head of the Pakistan Cricket Board, Ijaz Butt, could not be dismissed by the defence minister, Ahmad Mukhtar, because he is the latter's brother-in-law. **The scandal was peculiarly damaging because it broke in August just as the government was trying to persuade the world to give it large sums of money for flood relief. A second scandal, which may have horrified Pakistanis even more than the bribery case in England, took place a few days earlier. News out of Pakistan at the time was all about the devastating floods and it received little international attention, but the gory events were again played endlessly on television.** They took place on 15 August in the city of Sialkot, north of Lahore, where two wholly innocent teenagers called Hafiz Sajjad, 18, and Mohammed Muneeb Sajjad, 15, were misidentified as robbers and lynched by a crowd in the middle of a city street. **Uniformed police stood nonchalantly by as men with iron rods and sticks took turns over a period of hours to beat the boys to death. Their mangled bodies were finally hung upside down in the market and the case only became known because a courageous television reporter had accidentally witnessed and secretly filmed what happened. The Sialkot lynching shows Pakistani society at its worst.** It also illustrates what happens when there is a breakdown in the administration of justice. In this case, the local police are reported to have routinely killed alleged criminals or handed them over to lynch mobs. This breakdown in the administration of justice is general. **I asked Pashtun tribal elders in a town near Lakki Marwat in Khyber Pakhtunkhwa province what they most needed. They all said governance: some form of effective local government administration.** In south Punjab I went to a tribal court where 100 tough-looking Baluchi tribesmen had submitted a land dispute to a respected leader of their tribe. It was a complicated case involving a grandfather's will written in 1985 that left 12 acres of land unequally to the sons of his two marriages. The will was not very precise but nobody cared at first because the land was in the desert. But then one member of the family started to irrigate it and made it productive, leading to a rancorous dispute about ownership. The claimants to the land had chosen binding arbitration by a respected local leader, because a decision would be swift and free. They said that if they went through the state courts, the case could take years and the judges and police could be bribed. But incidents such as the Sialkot lynching do not mean that the country is slipping into primal anarchy like Somalia. **The Western world looks at Pakistan primarily in relation to Afghanistan, the Taliban, extreme jihadi Islam and the "war on terror". In a country of 170 million people there are always episodes that can be used as evidence to illustrate any trend, such as the belief that Pakistan is filled with bloodthirsty Islamic militants bent on holy war.** Earlier this year, Foreign Policy magazine in Washington, which compiles an annual list of failed states, placed Pakistan 10th on the list, claiming that it showed more signs of state failure than Haiti and Yemen, and is only slightly more stable than Somalia and Yemen. The country's high ranking in the survey tells one more about the paranoid state of mind of Washington post-9/11 than what is actually happening. **There is no incentive to play down the "Islamic threat to Pakistan" on the part of any journalist who wants his or her story to be published, think-tankers who need a grant, or diplomats who seek promotion. The influence and prospects for growth of small jihadi organisations are systematically exaggerated.** Over-attentive reading of the Koran is seen as the first step on the road to Islamic terrorism. Overstated claims about their activities by fundamentalist Islamic groups are happily lapped up and repeated. Stories acquire a life of their own, regardless of their factual basis. **During the recent floods, the foreign media reported on how militant Islamic groups were prominent and energetic in distributing aid to victims, the suggestion being that they will use their enhanced status to recruit more young men for holy war. This is supposedly what they did during the Kashmir earthquake of 2005, which killed 75,000 people whom it was difficult to reach because they lived high in the mountains.** Christine Fair, an expert on Pakistan at Georgetown University in Washington, eloquently demolishes this and other spurious stories about the growth of militant Islam in Pakistan. She cites a survey of 28,000 households in 126 villages in Kashmir in which one-quarter of the inhabitants said they had received aid from international agencies, 7 per cent from non-militant Islamic charities, and just 1 per cent from the Islamic militant groups. Of course, the militantly religious of all kinds are likely to be to the front in helping survivors of any disaster, because most faiths adjure their adherents to help others in a crisis. The only person I met during a visit to flooded areas who could in any way be described as a religious militant engaged in relief work was an amiable German Pentecostalist waiting for a flight in Lahore airport. **Another hardy-perennial story about Pakistan claims that because of the undoubted inadequacy of the Pakistani public education system, madrasahs, or religious schools, provide free education to the needy. Once enrolled, the children are supposedly brainwashed to turn them into the future foot soldiers of jihadi Islam. In reality, Pakistani educational specialists say that just 1.3 per cent of children in school go the madrasahs, 65 per cent to public schools, and 34 per cent to non-religious private schools.** In recent years, it is the small and affordable private schools that have expanded fastest, mainly because jobs in them are open to educated women prepared to accept low pay. Most jihadis turn out to have been educated at public schools. Extreme Islamists have seldom done well in elections in Pakistan. Widespread popular support for the Afghan Taliban stems primarily from the conviction that they are essentially a Pashtun national liberation movement fighting a foreign occupation. **The Pakistani Taliban was once said to be "60 miles from Islamabad", but such scaremongering ignored the fact that there were three mountain ranges and one of the world's most powerful armies in between the Taliban's rag-tag fighters and the capital. The Pakistani state may not function very well but it is not failing, and – a pity – current crises may not even change it very much (Cockburn 2010).**

**Title/Headline:** *Gunmen Torch 29 More NATO Oil Tankers In Pakistan*

**Abstract:** Gunmen armed with a rocket torched 29 NATO oil tankers in southwestern Pakistan before dawn Saturday, the latest attack on the supply line for international troops in Afghanistan since Pakistani authorities closed a key border crossing amid a dispute with the United States. Two responding police officers were wounded. Local government official Abdul Mateen said Saturday's attack occurred in the area of Mithri, about 120 miles east of Quetta, the capital of Baluchistan province. **He said the attackers used guns and fired a rocket to destroy the tankers. "We are facing problems in extinguishing the fire,"** he said. At least 10 gunmen were involved in the attack, police official Jamil Khan said. The oil tankers were parked near a roadside restaurant. When local police responded, the gunmen fired on them before fleeing. **One officer was wounded by a bullet, while another suffered slight burns as he tried to stop the blaze,** Mateen said. Pakistan shuttered the border in Torkham on Sept. 30, following a NATO helicopter strike that killed two Pakistani border guards. Since then, there have been several attacks on supply convoys, including two in which militants torched 70 fuel tankers and killed a driver. **The Pakistani Taliban have claimed responsibility for such previous attacks and have demanded that the government permanently bar NATO and the U.S. from using its soil to transport supplies to Afghanistan.** The U.S. has apologized for the cross-border helicopter strike, but Islamabad has yet to open the border crossing at Torkham. Still, officials believe it could be reopened next week. A smaller crossing in the southwest has stayed open (Fox News, 2010).

**Title/Headline:** *Pakistan Arrests 7 Militants, Foil Plot To Kill PM*

**Abstract:** Pakistani police said Thursday they have foiled a plot to kill the country's prime minister, foreign minister and other senior police, army and government officials by arresting a group of seven militants in central Pakistan. Senior police official Abid Qadri said authorities learned about the plot during an initial interrogation of militants, who were arrested late Wednesday after a shootout near a village in central Pakistan. **The militants opened fire when police tried to pull the suspects' car over for a routine check, Qadri said. Nobody was wounded or killed in the shooting, but two men managed to escape,** he said. "We have averted several high-profile attacks by arresting these terrorists," he told The Associated Press. **The men are all part of Lashkar-e-Jhangvi, which is a banned Sunni Muslim militant group linked to both the Taliban and al-Qaida,** Qadri said. The group has been blamed for attacking minority Shiite worship places and killing Shiites across Pakistan. Some of the suspects arrested Wednesday are believed to have taken part in last year's attack on the main Pakistani spy agency in the central city of Multan that killed 12 people, Qadri said. **He did not say how far along the men were in their alleged plot to kill Prime Minister Yousaf Raza Gilani, Foreign Minister Shah Mahmood Qureshi and the others.** Qadri said the suspects also had plans to attack a key dam, a bridge and military installations (Fox News, 2010).

**Title/Headline:** *Pictured: The Gaping Hole Left By Suicide Bombs At Pakistan University That Killed Eight*

**Abstract:** Two suicide bombers targeted the Islamic International University today at 3 15 pm killing 6 and injuring 15 according to initial reports. Both the bombers detonated explosive simultaneously. One bomber exploded himself at the University Women Cafeteria while the other attacked the Faculty of Shariat Building. 2 women are among the dead. The Interior Minister visited hospitals to inquire about those injured in the blast but had to cut short his visit to the university because of the presence of protesting students who pelted his motorcade with stones. **It merits a mention here that almost all of the educational Institutions were already closed due to security threats but some Universities including Islamic University didn't close down their campuses** (Telegraph, 2009).

**Title/Headline:** *U.S. Cuts Funding for Pakistan Military Units: About 6 Army Units Linked to Alleged Extrajudicial Killings, Torture Will Lose American Cash-Flow*

**Abstract:** The Obama administration is withholding assistance to some Pakistani military units over concerns they may have been involved in human rights abuses, including extrajudicial killings and torture, a senior U.S. official said Thursday. The official said aid to a handful of Pakistani units believed to have committed, encouraged or tolerated abuses had been suspended under 1997 legislation championed by Democratic Sen. Patrick Leahy. The so-called Leahy Amendment bars U.S. military assistance from going to foreign armed forces suspected of committing atrocities. **"In accordance with the Leahy Amendment, we have withheld assistance from a small number of units linked to gross human rights violations,"** the official said. "At the same time, we have encouraged Pakistan to improve its human rights training, and it is taking steps in that direction." The official spoke on condition of anonymity because he was not authorized to speak publicly on the matter. It was not immediately clear when the decision to withhold the assistance was first taken or exactly how many Pakistani military units were affected. The New York Times first reported the withholding of aid late Thursday. **The news comes just several days after India claimed Pakistan's intelligence agency was deeply involved in planning the 2008 terror attack on Mumbai, and even funded reconnaissance missions to the Indian city. Grainy video showing alleged atrocities by Pakistani soldiers was first posted about three weeks ago on a jihadist web forum.** CBS News' Khaled Wassef, who found the videos, says the story likely started gaining traction in Pakistan after al Qaeda's media operation, **as-Sahab, included clips apparently showing Pakistani troops shooting to death at least six men in civilian clothes in a video production highlighting alleged atrocities committed by Pakistani forces.** As-Sahab disseminated the material to Pakistani media outlets, raising the profile of the alleged killings and likely

helping to prompt the official Pakistani military investigation into the videos, says Wassef. The person who posted the clips in question claimed the footage was from Pakistan's Swat Valley, the scene of a major army offensive against Taliban militants in 2009. **The Pakistani army has been accused of carrying out extrajudicial killings in Swat ever since launching the offensive in May 2009 - allegations it denies. Halting assistance to certain units will not affect broader U.S. support for Pakistan's military, which is considered key to counterterrorism efforts in the region.** On Friday, the U.S. announced a new military aid package for Pakistan worth about \$2 billion over the next five years as it presses the country to do more to fight extremists there and in neighboring Afghanistan. That announcement is planned at the end of three days of high-level strategic talks in Washington between top U.S. and Pakistani officials, including Pakistani army chief Gen. Ashfaq Parvez Kayani. Kayani has pledged to improve the Pakistani military's human rights record in numerous discussions with U.S. officials. "As General Kayani has said repeatedly in public and in private, professional standards and enforcement of those standards are the hallmark of a modern and successful military," White House spokesman Tommy Vietor said in a statement. **"These issues are part of our conversations with all militaries around the world with whom we work"** (CBS News, 2010).

**Title/Headline:** *US Offers Pakistan 2 Billion-Dollar Military Package*

**Abstract:** The United States on Friday pledged two billion dollars in military aid to Pakistan and hailed its efforts to battle extremists, seeking to bolster an uneasy alliance with the frontline nation. The five-year assistance plan, which replaces an earlier package that expired, meets a key request of Pakistan's leaders but comes amid signals the United States will deny aid to units accused of human rights violations. **Secretary of State Hillary Clinton said the US administration would ask Congress to approve two billion dollars in military aid from 2012 to 2016 as part of the United States' "enduring commitment to help Pakistan plan for its defense needs."** "The United States has no stronger partner when it comes to counter-terrorism efforts against the extremists who threaten us both than Pakistan," Clinton said at high-level, three-day talks between the two nations. **The military package would be in addition to 7.5 billion dollars which Congress last year committed over five years in civilian aid, including building schools and roads, in a bid to dent the allure of extremists. Pakistan, which had been the main backer of Afghanistan's Taliban regime, dumped its support overnight after the September 11, 2001 attacks and became the pivotal US partner offering access into its northwestern neighbor.** US officials have long questioned whether Pakistan has fully cut off ties to Afghanistan's Taliban or acted against extremists at home. But Pakistan last year launched a major offensive on homegrown Taliban, who moved perilously close to the nuclear power's capital Islamabad. Pakistani Foreign Minister Shah Mehmood Qureshi, who is accompanied by the army chief to the strategic dialogue in Washington, denounced criticism of his country's efforts against extremism. **"There are still tongue-in-cheek comments, even in this capital, about Pakistan's heart not really being in this fight. I do not know what greater evidence to offer than the blood of our people,"** Qureshi said, sitting next to Clinton. **"Prophets of doom are back in business painting doomsday scenarios about our alliance. They are dead wrong,"** he said. But a White House report to Congress this month faulted Pakistan for not working against Afghanistan's Taliban, in what experts say is an attempt by Islamabad to preserve influence in its neighbor if and when US troops leave. **The United States has also been alarmed by reports of summary executions by Pakistani troops and, in accordance with US law, is said to be looking at barring training for some units involved in abuses. The United States and India have also said that Pakistan should do more to rein in fervently anti-Indian groups such as Lashkar-e-Taiba, which is blamed for orchestrating the bloody 2008 siege of Mumbai** (France 24, 2010).

**Title/Headline:** *43 Taliban Suspects Arrested In SW Pakistan*

**Abstract:** Pakistani police arrested at least 43 suspects on charges of keeping connection with Taliban militants in the southwest Balochistan province, police sources told Xinhua. The arrest had been made by security forces on Thursday evening during a raid in Kuchlak, an outskirt of provincial capital Quetta, in an attempt to ensure security in the province plagued by insurgency and terrorism. **The suspects were allegedly involved in extortion, land mafia and other petty crimes, and they are being questioned,** an official said. A senior police officer confirmed that majority of the detained are Afghan refugees. Balochistan shares a long border with Afghanistan and Iran. Similar search operations are also underway in different parts of northwest tribal areas and Khyber Pakhtunkhwa province which is the frontline in the war against terror (Global Times, 2010).

**Title/Headline:** *Pakistan PM Sees No Chance Of Military Coup*

**Abstract:** Pakistan's prime minister on Tuesday rejected calls by opposition politicians for midterm elections and said there was no chance of the country's powerful army seizing power as it has often done in the past. The government of President Asif Ali Zardari is unpopular among many Pakistanis and is under pressure from the Supreme Court over corruption allegations. **It has been dogged by speculation and rumors that it is on its way out almost from the day it took office. Zardari, the husband of slain former Prime Minister Benazir Bhutto, insists he will see out his five-year term until it ends in 2013.** His supporters note that his party has a majority in parliament, meaning there is no constitutional way of ending it early. Prime Minister Yousaf Raza Gilani said in parliament on Tuesday that the army was "pro-democracy" and would not impose martial law. **He said those calling for the dissolution of parliament and fresh elections were trying to break up the country. The army has seized power from civilian governments several times before in Pakistan's turbulent history, but many commentators say it does not currently have the appetite to stage a coup.** However, it remains a powerful political force that would have to endorse any move to get rid of Zardari. Zardari is head of the ruling Pakistan People's Party, of which Gilani is also a member. Opposition spokesman Sadiqul Farooq said the government had failed to improve the economy,

restore peace and provide even basic facilities to the people. **"The government will not survive. You will see midterm elections soon," he predicted.** Despite Farooq's remarks, opposition leader Nawaz Sharif has so far avoided directly calling for Zardari to step down or actively leading a campaign to destabilize the government. Many analysts say Sharif is well positioned to win the next elections but is no rush to take power, especially given the perilous state of the country. He may prefer to see the government limp along to 2013 and win those polls, untainted by charges of bringing down an elected government midterm (Fox News, 2010).

**Title/Headline:** *Pakistan Rejects U.S. Drone Expansion*

**Abstract:** Pakistan has rejected a request from the United States to expand its drone missile campaign against Al Qaeda and Taliban militants, a decision that limits Washington's use of one of its most effective tools against insurgents hiding out in the country's northwest. Pakistani Foreign Ministry spokesman Abdul Basit said the government would not allow the U.S. to carry out drone strikes outside the tribal belt along the Afghan border and repeated Islamabad's request that Washington abandon its use of drones in Pakistan on the grounds that the program violates the nation's sovereignty. Basit did not say which additional areas the U.S. wanted to target. However, the Washington Post reported Saturday that the request focused on areas outside the southern city of Quetta, in Baluchistan province, where Afghan Taliban leaders have hideouts. **"We are allies of the United States in the war against terror," Basit said. "However, Pakistan will not compromise on sovereignty."** Islamabad's refusal comes as little surprise, given the animosity among Pakistanis that the drone campaign has stirred for years, but even as the government publicly condemns the drone program, it tacitly allows the missile strikes to take place. Pakistan even provides intelligence to facilitate the targeting of the strikes. **The drone missions are deeply unpopular in Pakistan, where they are viewed as an illustration of President Asif Ali Zardari's willingness to acquiesce to most of Washington's demands. Allowing an expansion of the drone program could further aggravate the vulnerability of Zardari's government, already weakened by its mishandling of this summer's catastrophic floods and the country's economic troubles.** Any expansion of the drone campaign into Baluchistan would also be a dramatic departure in policy for Islamabad because it is not part of the semiautonomous tribal region where the strikes are permitted. In addition, the Quetta region is heavily populated; the city has a population of 900,000. The core leadership of the Afghan Taliban insurgency, known as the Quetta Shura and is headed by Mullah Muhammad Omar, has used Quetta and its outlying regions as a sanctuary for years. **The U.S. has dramatically stepped up its use of drone strikes in the tribal areas. So far this year, it has carried out 101 drone missile strikes in northwest Pakistan, compared with 53 in 2009.** The attacks have focused largely on North Waziristan, a primary stronghold of militants and commanders with the Haqqani network, an Afghan Taliban wing regarded by the U.S. as one of the biggest threats facing coalition forces in Afghanistan. **According to the Long War Journal website, which keeps track of drone missile strike statistics, 92 of the attacks this year occurred in North Waziristan** (Rodriguez, 2010).

**Title/Headline:** *Don't Mess With Pakistan*

**Abstract:** The world is watching Pakistan and rightfully so. It's a happening place. Pakistan is at the center of geostrategic revolution and realignments. The economic, social, and political aspirations of China, Afghanistan, Iran, and India turn on securing peace, prosperity, and stability in Pakistan. Our country can be an agent of positive change, one that creates unique economic interdependencies between central, west and south Asian countries and the Middle East through trade and energy partnerships. Or there's the other option: the borderless militancy Pakistan is battling could take down the whole region. **Recently, terrorists on both sides of the Pakistan-Afghanistan border have plotted, unsuccessfully, to unleash terror as far away as Copenhagen and New York City.** Pakistan's role for a safe, secure world cannot be overemphasized. To appreciate the complex history of Pakistan's internal and external challenges is to understand how the 21st century could well play out for the world. **Our country was born of violence, in August 1947. Just months after the partition of the subcontinent and the creation of the Dominion of Pakistan, we were at war with India over Kashmir.** Pakistan and India's mutual animosity and history of confrontation remain powerful forces in South Asia to this day. Because of its sense of having been wronged by India—and feeling that it faced an existential threat from that country—Pakistan cast its lot with the West. **We became a strategic partner of the U.S. during the Cold War, signing on to the Southeast Asia Treaty Organization (SEATO) and Central Treaty Organization (CENTO) in the 1950s, while India tilted toward the Soviet Union. As part of our inalienable right to self-preservation, we formulated a "minimum defensive deterrence" strategy to maintain Army, Navy and Air Force numbers at levels proportional to India's.** In 1965 we again went to war over Kashmir, and in 1971 over East Pakistan (I fought in both). Our suspicions about India were proved right when it became clear that the creation of Bangladesh was only made possible through Indian military and intelligence support. Among Pakistanis in general, and the Army in particular, attitudes against India hardened. **The adversarial relationship between our Inter Services Intelligence and their Research and Analysis Wing worsened, both exploiting any opportunity to inflict harm on the other.** India's "Smiling Buddha" nuclear tests in 1974 changed everything. Pakistan was forced to resort to unconventional means to compensate for the new imbalance of power. **Prime minister Zulfikar Ali Bhutto initiated Pakistan's atomic program, and thus began the nuclearization of the subcontinent.** India's pursuit of nuclear weapons was an effort to project power beyond its borders; Pakistan's was an existential and defensive imperative. **The Soviet invasion of Afghanistan in 1979 presented Pakistan with a security threat from two directions: Soviets to the west, who wanted access to the Indian Ocean through Pakistan, and Indians to the east. Once again Pakistan joined hands with the United States to fight Moscow. We called it jihad by design, this effort to attract mujahideen from all over the Muslim world. And from Morocco to Indonesia, some 25,000 of them came. We trained and armed Taliban from the madrassahs of the then North West Frontier Province, and pushed them into Afghanistan. By this time, the liberal and intellectual Afghan elite had left for the safer climes of Europe and the U.S., leaving behind a largely poor, religious-minded population to fight the 10-year jihad. We—Pakistan, the U.S., the West, and Saudi Arabia—are equally responsible for nourishing the militancy that defeated the Soviet Union in 1989, and which seeks now to defeat us all. The Soviets**

quit Kabul, and the Americans abandoned Islamabad. Washington rewarded its once indispensable ally by invoking the Pressler Amendment and imposing military sanctions, and by choosing to foster a strategic relationship with India. Pakistan was left alone to deal with the nearly 4 million Afghans who had streamed into our country and became the world's largest refugee population. The people of Pakistan felt betrayed and used. **For Pakistan, the decade of disaster had begun.** No efforts were made to deprogram, rehabilitate, and resettle the mujahideen or redevelop and build back war-ravaged Afghanistan. This shortsightedness led to ethnic fighting, warlordism, and Afghanistan's dive into darkness. The mujahideen coagulated into Al Qaeda. The Taliban, who would emerge as a force in 1996, eventually would occupy 90 percent of the country, ramming through their obscurantist medievalism. It was also in 1989 that the freedom struggle reignited in India-administered Kashmir. This started out as a purely indigenous and peaceful uprising against Indian state repression. The people who led this first intifada were radicalized by the Indian Army's fierce and indiscriminate crackdowns on locals. **The Kashmir cause is a rallying cry for Muslims around the world. It is more so for Pakistanis. The plight of Kashmiri Muslims inspired the creation of new mujahideen groups within Pakistan who then sent thousands of volunteer fighters to the troubled territory.** In terms of identity politics, the boundaries were clearer: the mujahideen set their sights on India; Al Qaeda and the Taliban were focused largely on Afghanistan. With the Taliban to our west and the mujahideen in the north, this arc of anger rent our social fabric. **Pakistan found itself awash in guns and drugs. Nine years later, there was bad news from Pokhran. In May 1998, India again tested its bomb.** Almost two weeks later, Pakistan responded by "turning the mountain white" at Chaghai. For Pakistanis, our own tests became a symbol of our power in the world, a testament to our resolve and innovation in the face of adversity, and a source of unmitigated pride in our streets. **We became a nuclear power and an international pariah at the same time, but furthering and harnessing our nuclear potential remains and must remain our singular national interest.** Of course, the U.S. views India's nuclear program differently from Pakistan's. **Even our pursuit of nuclear power for civilian purposes, for electricity generation, is viewed negatively. India's pursuit is assisted by the U.S. In Pakistan, people see this as yet another instance of American partiality, even hostility. Many even believe that the U.S. wants to denuclearize Pakistan—by force if necessary—because it fears the weapons could come into the hands of the Taliban, Al Qaeda, or any of the myriad militant organizations who have loosed mayhem in Pakistan. Our nuclear weapons are secure.** Pakistan was one of only three countries to recognize the Taliban government of Afghanistan. We did this because of our ethnic, historical, and geographical affinity with Afghan Pashtuns who comprised the Taliban. In 2000, when I led Pakistan, I had suggested to the U.S. and other countries that they, too, should recognize the Taliban government and collectively engage Kabul in order to achieve moderation there through exposure and exchange. This was shot down. **Continued diplomatic isolation of the Taliban regime pushed it into the embrace of the Arab-peopled Al Qaeda. Had the Taliban government been recognized, the world could have saved the Bamiyan Buddhas, and unknotted the Osama bin Laden problem thereby preventing the spate of Al Qaeda-orchestrated attacks around the world including on September 11, 2001, in the U.S. When America decided to retaliate, we joined the international coalition against Kabul by choice so we could safeguard and promote our own national interests.** Nobody in Islamabad was in favor of the religious and governmental philosophy of the Taliban. By joining the coalition, we also prevented India from gaining an upper hand in Afghanistan from where it could then machinate against Pakistan. **The Taliban and Al Qaeda were defeated in 2001 with the help of the Northern Alliance, which was composed of Uzbeks, Hazarans, and Tajiks—all ethnic minorities. The Pashtuns and Arabs of Afghanistan fled to the mountains and fanned out across Pakistan.** This was the serious downside of joining the global coalition: the mujahideen who were fighting for Kashmir formed an unholy nexus with the Afghan and Pakistani Taliban—and turned their guns on us. While I was president, they made at least four attempts on my life. In 2002, the allies installed a largely Pashtun-free government in Afghanistan that lacked legitimacy because it did not represent 50 percent of the Afghan population, Pashtuns. This should not have happened. **All Taliban are Pashtun, but not all Pashtuns are Taliban. Pashtuns were thus isolated, blocked from the mainstream, and pushed toward the Taliban, who made a resurgence in 2004. Today, the Taliban rule the roost in Afghanistan. Al Qaeda and the Taliban are ensconced in our tribal agencies, plotting and launching attacks against us and others.** The twin scourge of radicalism and militarism has infected settled districts of Khyber-Pakhtunkhwa and beyond. Mujahideen groups are operating in India-administered Kashmir and seem to have public support in Pakistan. **After nine long years, and a longer war for the U.S. than Vietnam, the world wants to negotiate with "moderate" elements in the Taliban—and from a position of apparent weakness.** Before the coalition abandons Afghanistan again, it must at least ensure the election of a legitimate Pashtun-led government. **Pakistan, which has lost at least 30,000 of its citizens in the war on terror, should be forgiven for wondering whether it was all worth it. Pakistanis should not be left to feel that it was not** (Musharraf, 2010).

**Title/Headline:** *12 Dead After Cargo Plane Crashes In Pakistan*

**Abstract:** The death toll from a plane crash Sunday in Karachi, Pakistan, rose to 12 after an official confirmed the deaths of four people who were on the ground. The four laborers were sleeping in an under-construction building that the plane crashed into, said Pervez George, a spokesman for Pakistan's Civil Aviation Authority. **Additionally, a man on a motorcycle was critically injured when the plane crashed, George said. The plane crashed early Sunday in the southern port city, killing eight Russian nationals on board and sending flames shooting through the sky, a Pakistani official said.** The cargo plane took off at 1:45 a.m. (3:45 p.m. Saturday ET) from the Jinnah Karachi International Airport for Khartoum, Sudan, and went down a few minutes later in the Gulistan-e Johar section of Karachi, an area where many Pakistani naval officers live. **The plane appeared to hit several buildings that were under construction. The pilot appeared to deliberately bring the plane down in a less densely populated residential area in order to save lives, Masood Raza, a Karachi district government official, told CNN affiliate GEO News in Pakistan. "If the plane would have crashed in a (more crowded) residential area, it would have been a very big disaster for the city of Karachi," Raza said.** The Russian-made cargo plane was carrying relief supplies, including tents, to Africa before it went down. The plane arrived in Karachi on Saturday from Fujairah, United Arab Emirates, George said. **A witness told CNN that he saw fire on one of the plane's wings before it crashed. Firefighters, rescue personnel and area residents rushed to the scene, with jet fuel fanning the large flames and huge plumes of smoke. The blaze was put out by 4 a.m., according to George, but rescue personnel continued to comb through the rubble looking for other people possibly killed or hurt.** Bystander Mohammed Raees told GEO News that he was injured after flaming parts of a building hit him and the

motorcycle he was preparing to ride. Hospital sources told the CNN affiliate that Raees had burns over 60 percent of his body (CNN, 2010).

**Title/Headline:** *Pakistani To Sue CIA Over Drone Attacks*

**Abstract:** A Pakistani tribesman says he will sue President Barack Obama's administration and CIA officials for killing his son and brother in a non-UN-sanctioned strike. Karim Khan's relatives were slain in an unsanctioned US drone attack in North Waziristan tribal district, back in 2009. Now, he says he will file a lawsuit and ask for compensation. **"That drone attack killed my son, my brother and a local man. We are not terrorists, we are common citizens,"** Khan told a news conference in Islamabad. **"According to Islamic law the punishment for blood is blood. If I have the means, I will take revenge for this attack,"** AFP quoted Khan as saying. "We need justice. We are innocent people." His lawyer Mirza Shehzad Akbar says he will file a lawsuit in Pakistan and, if necessary, one with the International Court of Justice based at The Hague. **According to Associated Press, the lawyer is expected to sue CIA director Leon Panetta, US Defense Secretary Robert Gates and CIA station chief in Islamabad for "wrongful death."** Pakistan's northwestern tribal belt is often targeted by unauthorized US drone attacks. Over 250 people have been killed in such attacks since September. Washington claims its air raids target militants, who cross the border into Afghanistan, but civilians are the main victims of such attacks. Islamabad has repeatedly condemned the strikes as violations of its sovereignty. The issue of civilian casualties has strained relations between Islamabad and Washington with the Pakistani government repeatedly voicing its objection to the attacks. **"We have repeatedly said the drone attacks are counter productive,"** Prime Minister Yousuf Raza Gilani says. **The United Nations says the US-operated drone strikes in Pakistan pose a growing challenge to the international rule of law.** Philip Alston, UN special envoy on extrajudicial killings, said in a report in late October that the attacks were undermining the rules designed to protect the right of life. **Alston also said he feared that the drone killings by the US Central Intelligence Agency could develop a "playstation" mentality** (Press TV, 2010).

**Title/Headline:** *Pakistan Still In Dire Need Of Aid: UN*

**Abstract:** The United Nations says more than one million displaced people are still in need of emergency aid in the flood-stricken regions of Pakistan. The UN chief of humanitarian affairs, Valerie Amos, made the remarks on Friday during a visit to displaced families living in camps in Sehwan, 230 kilometers (144 miles) northeast of Karachi. She reiterated warnings that the crisis could drag on well into 2011. "It could take about six to seven months until the water recedes and homeless people go to their native areas to rebuild their homes and plant their crops," AFP quoted Amos as saying. Amos noted that the UN was making efforts to avert any future health crisis among the homeless people in the worst stricken areas. **The world body says millions of people have been left without food, water, shelter and other basic necessities in Pakistan as the result of the July-August flooding.** A Press TV correspondent reported that thousands of flood victims are leading miserable lives in several districts of southern Sindh Province. The United Nations has launched several appeals for funding the aid initiative to help the victims of the worst natural disaster in the history of Pakistan. **Some 2,000 people have lost their lives and 21 million others were displaced due to the weeks-long floods that engulfed an area the size of England.** Winter, cold and hunger are also threats looming over millions of people still without basic necessities (Press TV, 2010).

**Title/Headline:** *Pakistanis Hold Massive Anti-US Rally*

**Abstract:** Thousands of angry Pakistani demonstrators have taken to the streets of Islamabad to protests their government's alliance with the United States. Protesters gathered near the parliament house amid heavy police presence on Sunday. They demanded Islamabad cut all ties with Washington. **The Pakistani Jamaat-e-Islami activists shouted anti-US slogans during a rally in the capital city.** They also demanded the release of Pakistani scientist Aafia Siddiqui. A US federal court has sentenced Siddiqui to 86 years in prison for allegedly shooting at her American interrogators in Afghanistan. Siddiqui vanished in Karachi, Pakistan with her three children on March 30, 2003. The following day, local newspapers reported that she had been taken into US custody on terrorism charges. Human rights groups say that Siddiqui had secretly been transferred to the US base in Bagram, north of Kabul, and tortured for five years prior to the alleged 2008 incident. Siddiqui's relatives and political activists have strongly criticized the US justice system for its handling of the case. Meanwhile, some protesters were there to warn the government against a military operation in the North Waziristan tribal region. They said such a move would trigger a new wave of unrest. **The US has been asking Pakistan to launch a major ground offensive into the northern tribal region to crush militancy.** The Pakistani army has launched several operations in the restive northwest in order to flush the militants out of tribal areas. Hundreds of Pakistanis have lost their lives since the former military ruler Pervez Musharraf joined the US-led so-called war on terror following the 9/11 attacks. Militant attacks, unsanctioned drone strikes and political unrest have claimed the lives of over 4,000 people throughout Pakistan since 2007 (Press TV, 2010).

**Title/Headline:** *Homicide Bombers Kill 50 People In Pakistan*

**Abstract:** Two homicide attackers wearing police uniforms and jackets packed with explosives and bullets blew themselves up at a gathering of tribesmen to discuss the formation of an anti-Taliban militia in northwest Pakistan Monday, killing 50 people, officials said. The meeting was being held at the main government compound in Mohmand, part of Pakistan's militant-infested tribal region. It was

the latest strike against local tribesmen who have been encouraged by the government to take up arms against the Taliban. More than 100 people were wounded, many of them critically, said Mian Iftikhar Hussain, information minister of neighboring Khyber Pakhtunkhwa province. **Also Monday, Pakistani intelligence officials said missiles fired from a U.S. drone killed seven people in Khushali village in North Waziristan**, near the border with Afghanistan. The officials spoke on condition of anonymity because they were not allowed to speak to the media. **Both of the bombers were disguised in tribal police uniforms, said Khan.** One of them was caught at the gate of the compound, but he was able to detonate his explosives, he said. The dead and wounded included tribal elders, police, political officials and other civilians. **Two of the dead were local TV journalists who were at the compound reporting, said Shakirullah Jan, president of the Mohmand press club. The Pakistani army has carried out operations in Mohmand to battle Taliban and al-Qaida fighters in the area, but it has been unable to defeat the militants.** The military has encouraged local tribesmen to form militias to oppose the militants. These groups have had varying degrees of success and have often been targeted in deadly attacks. **A homicide bomber attacked a mosque in northwestern Pakistan in early November that was frequented by elders opposed to the Pakistani Taliban, killing 67 people.** The attack occurred in the town of Darra Adam Khel, a militant stronghold on the edge of the tribal region. **"We are not scared of such attacks and will keep on taking these enemies of humanity to task until they disappear from society,"** said Hussain, the information minister (Fox News, 2010).

**Title/Headline:** *Top U.S. Spy Pulled From Pakistan After Terror Threats*

**Abstract:** The CIA has recalled its top spy in Pakistan out of concern for his safety after terrorist threats against him, a U.S. intelligence official said. The station chief, the highest-ranking U.S. intelligence officer in Pakistan, operates covertly and his identity is considered classified. He had recently been named in a lawsuit filed by a Pakistani man seeking \$500 million for the death of his son and brother, who the man alleges were killed in a U.S. drone strike. The spy's name then appeared in Pakistani media stories about the lawsuit. The threats "were of such a serious nature that it would be imprudent not to act," the intelligence official said, describing the decision to pull him from the country. A spokesman for the CIA declined to speak about any details of the situation in Pakistan but said in general that protecting CIA personnel is a top priority. **"Our station chiefs routinely encounter major risk as they work to keep America safe, and they've been targeted by terrorists in the past,"** CIA spokesman George Little said. **"Their security is obviously a top priority for the CIA, especially when there's an imminent threat."** The station chief oversees all intelligence operations in Pakistan including managing the drone program, which the U.S. government does not publicly acknowledge, and coordinates with the country's intelligence office (Benson, 2010).

**Title/Headline:** *US Military Pushes Obama To Allow More Pakistan Raids*

**Abstract:** In a move that would stir intense Pakistani anger, US military chiefs in Afghanistan are pushing the Obama administration to expand cross-border commando raids against Taliban and al-Qa'ida militants hiding in Pakistan's remote tribal areas. The plan, if implemented, would be a significant escalation in the nine-year war, and a bold gamble to create conditions that would allow US combat forces to leave Afghanistan by the target date of 2014, with an initial draw-down starting next summer. But it also would place a heavy new strain on Washington's delicate and sometimes fraught relations with Pakistan. Officially, Islamabad is the vital ally of the US if the conflict is to be brought to a successful end – but it also has longstanding unofficial ties with the Taliban, and is deeply resentful of anything that suggests it is not master of its territory. Word of the proposals, first reported in The New York Times yesterday, comes less than a week after the White House released its latest policy review for Afghanistan. **The report declared that Pakistan was "central" to US success in Afghanistan but noted that ties between Washington and Islamabad remained "uneven".** Unpublished US intelligence reports are said to strike a still gloomier note. **They warned that the war could not be won unless Pakistan stopped the insurgents from launching attacks against allied and Afghan government forces from their sanctuaries in the tribal areas.** The plan to step up special operations raids by US and Afghan units into these areas – above all North Waziristan, base of the al-Qa'ida affiliated Haqqani network – would signify the US had concluded that Pakistan was either unable or unwilling to do it and was taking matters into its own hands. But, experts here say, that could be a very high risk strategy – especially if it is publicly acknowledged. **The Pakistan government is weak at the best of times, not least because of its public alignment with the US, highly unpopular among the ordinary population. It would be weakened further if the US were seen to be treating supposedly sovereign Pakistan territory as its own.** In a sign of the issue's sensitivity, Islamabad recently shut a key border crossing into Afghanistan for 10 days, in retaliation against a Nato helicopter foray in which two Pakistani soldiers were killed. The closure stranded Nato supply convoys and almost 150 trucks were destroyed in raids by militants. **In fact the Obama administration has sharply increased the number of unmanned cross-border drone attacks against suspected Taliban targets in the tribal areas. But it refuses to give any**

details for fear of offending the Pakistan government whose support it so badly needs. Yesterday, perhaps for the same reason, officials in both Washington and Kabul flatly denied the plan outlined in The New York Times. There was "absolutely no truth" to reports that US forces are planning to conduct ground operations into Pakistan, said Rear Admiral Gregory Smith, a top Nato spokesman. A Pentagon official also said the alleged proposals were not true. At the same time Husain Haqqani, Pakistan's ambassador in Washington, said his country's security forces were perfectly capable of handling the militant threat inside its borders. The "material support" of allies, especially the US, was appreciated, he said, but "we will not accept foreign troops on our soil – a position that is well known." Ostensibly, that remains the view of the US as well. Last week, Admiral Mike Mullen, chairman of the joint chiefs of staff, said the Pakistani military could close down the Taliban sanctuaries, and that he was "encouraged" by actions it had already taken against the militants. **Unofficially though, the approaching deadlines appear to be hardening US determination to extract itself from an unpopular war that is costing an annual \$113bn (£73bn) that the country can ill afford. "Come hell or highwater, American troops will be out of Afghanistan by 2014,"** Vice President Joe Biden said at the weekend. Washington still seeks an accommodation with at least moderate elements of the Taliban. On cable TV, **Zbigniew Brzezinski, National Security Advisor to President Carter, said some such deal was essential if the US was to disengage as it hoped. "We have to face the fact that Pakistan has a vital interest in a pro-Pakistan Afghanistan." Unless Washington accepted that reality, a solution would be impossible,** he said (Cornwell, 2010).

**Title/Headline:** *US Drones Killed 2,043 People, Mostly Civilians, In Pak During Last Five Years*

**Abstract:** As many as 2,043 people, mostly civilians, were killed in US drone attacks in northwestern parts of Pakistan during the last five years, a research has revealed. The yearly report of Conflict Monitoring Centre (CMC) has termed the CIA drone strikes as an 'assassination campaign turning out to be revenge campaign', and showed that 2010 was the deadliest year ever of casualties resulted in drone-hits in Pakistan. According to the report, 134 drone attacks were reported in Pakistan's FATA region in 2010 alone, inflicting 929 casualties. December 17 was the deadliest day of 2010 when three drone attacks killed 54 people in Khyber Agency. Regarding civilian casualties and attacks on women and children, the report said: "People in the tribal belt usually carry guns and ammunition as a tradition. US drone will identify anyone carrying a gun as a militant and subsequently he will be killed." "Many times, people involved in rescue activities also come under attack. The assumption that these people are supporters of militants is quite wrong," The Nation quoted the CMC report, as stating. The document cited the Brookings Institute's research, which suggested that with every militant killed, nearly ten civilians also died. It also mentioned a related research report of Campaign for Innocent Victims in Conflict (CIVIC), which underlined that at least 2,100 civilians were killed and various others injured during 2009, in the ongoing war on terror and drone attacks. "It is unclear whether CIA counter-checks human intelligence with other available sources or not. Because in Afghanistan and Pakistani tribal belt people use to settle their personal enmity by accusing their opponent as militant and passing wrong information to US forces," it stated. The CMC report also revealed that Pakistan and US were deliberately concealing civilian deaths, and that they lacked any proper mechanism to ascertain civilian deaths, and it also accused the FATA Secretariat for overlooking civilian casualties. "Civilian casualties were deliberately overlooked to avert the public reaction," the report said (Uruknet.Info, 2010).

**Title/Headline:** *Pakistan Faces Ruling Coalition Collapse*

**Abstract:** The collapse of Pakistan's ruling coalition after a key party's defection complicates efforts to tackle problems facing this nuclear-armed nation already grappling with widespread poverty and insurgent attacks. The renewed political turmoil bodes ill for military action against Muslim extremists that the U.S. believes is key to success in neighboring Afghanistan, analysts said. Pakistan's powerful army could use the lack of political consensus to avoid operations that clash with its perceived strategic interests. The crisis also all but guarantees that lawmakers will not make progress anytime soon on fixing Pakistan's deep-seated problems in areas like education, health care and infrastructure that have contributed to economic decline and rising militancy. "There is no electricity, no gas, no jobs and they are fighting one another," said Arif Fasiullah, 35, of the central city of Multan. "They do not pass any legislation. They just do dirty politics." Pakistan, with a population of more than 180 million, faces chronic power outages that can last up to 16 hours per day in some areas during the scorching summer, and up to a third of its people lack access to clean drinking water. Average income per capita is less than \$3,000, and the average adult has fewer than five years of schooling. The International Monetary Fund, which has provided Pakistan with billions of dollars in loans to keep its economy afloat, has demanded the country implement significant reforms, including deep cuts to its deficit. The assistance took on added importance after last year's massive floods that affected some 20 million people. But the economic reforms, notably a revised general sales tax, are unpopular and have given the opposition and other parties a focus for their complaints. The second-largest partner in Pakistan's governing coalition, the Muttahida Qaumi Movement, said Sunday it was joining the opposition because of fuel price hikes and the generally poor performance of the ruling Pakistan People's Party. The government announced rises in gas and heating oil prices on New Year's Eve that the MQM called a "petrol bomb" dropped on the Pakistani people. The shift in the political landscape, which ended the coalition's majority in parliament, was not expected to lead to the fragile government's imminent collapse. But analysts warned that Pakistan's army may use the crisis as yet another reason to delay launching an operation against militants in the country's North Waziristan tribal area who regularly attack foreign troops in Afghanistan. The U.S. believes cutting the militants off from North Waziristan and other sanctuaries inside Pakistan is critical for any sustainable victory in Afghanistan. "It will give the army chief the excuse to say that he does not have the political consensus needed to go into North Waziristan," said Mosharraf Zaidi, an independent political analyst and columnist in Islamabad. The army, considered the most powerful institution in Pakistan, has deflected demands for a North Waziristan operation in the

past, saying its troops are stretched too thin in other areas along the Afghan border. **But many analysts believe the army is reluctant to target militant groups with which it has historical ties and could be useful proxies in Afghanistan after foreign forces withdraw. That outlook is unlikely to change regardless of which party is running the government, said Zaidi. "There is nothing that can happen to change Pakistan's calculus,"** he said. The army could not be reached for comment. In Washington, State Department spokesman P.J. Crowley said the Obama administration is following developments but considers the situation to be a matter for the Pakistan government to work out. **"This is about internal politics within Pakistan," Crowley said, adding that Washington will continue to work with Islamabad in pursuit of common interests.** He said he would not conclude that the loss of MQM in the coalition is necessarily a distraction from the struggle against extremism. "We're focused on our long-term partnership with Pakistan," Crowley said. **The Pakistan People's Party took power in February 2008 in elections that brought Pakistan out of nearly a decade of military rule. It rode to power on a wave of sympathy after its leader, Benazir Bhutto, was assassinated. But its popularity has slipped as Pakistan has grappled with severe economic problems and frequent militant attacks. The inflation rate in Pakistan is above 15 percent, according to government statistics, and the poorest are feeling the pain most (CBS News, 2011).**

**Title/Headline:** *Pakistani Men See White Girls As 'Easy Meat', Claims Jack Straw*

**Abstract:** Former Home Secretary Jack Straw has accused some Pakistani men in Britain of seeing young white women as "easy meat" for sexual abuse. The Blackburn MP has called on the Pakistani community to be "more open" about the issue after describing about a "specific problem" involving young Pakistani men's attitudes towards white girls. **He was speaking after two Asian men were jailed after subjecting a series of vulnerable girls to rapes and sexual assaults. Abid Mohammed Saddique, 27, was jailed for a minimum of 11 years at Nottingham Crown Court and Mohammed Romaan Liaquat, 28, was told he must serve at least eight years before being considered for release.** The men were the ring leaders of a gang that befriended girls aged from 12 to 18 in the Derby area and groomed them for sex. **Thirteen men were charged in relation to Operation Retriever, which Derbyshire Police set up, and 11 stood trial charged with offences relating to 26 alleged victims.** Out of the original 13, a total of nine were convicted of sexual offences. Speaking to the BBC's Newsnight programme, Mr Straw said: **"Pakistanis, let's be clear, are not the only people who commit sexual offences, and overwhelmingly the sex offenders' wings of prisons are full of white sex offenders. "But there is a specific problem which involves Pakistani heritage men ... who target vulnerable young white girls. "We need to get the Pakistani community to think much more clearly about why this is going on and to be more open about the problems that are leading to a number of Pakistani heritage men thinking it is OK to target white girls in this way."** The judge said he did not believe the crimes were "racially aggravated", but Mr Straw said he thought vulnerable white girls were at risk of being targeted by some Asian men. **"These young men are in a western society, in any event, they act like any other young men, they're fizzing and popping with testosterone, they want some outlet for that, but Pakistani heritage girls are off-limits and they are expected to marry a Pakistani girl from Pakistan, typically,"** he said. **"So they then seek other avenues and they see these young women, white girls who are vulnerable, some of them in care ... who they think are easy meat. "And because they're vulnerable they ply them with gifts, they give them drugs, and then of course they're trapped."** Police in Derbyshire have insisted that the sexual abuse case should not be treated as a racial issue. The sentencing of Saddique and Romaan came a day after Prime Minister David Cameron said "cultural sensitivities" should not hinder police action in such cases. Speaking on Friday to The Times during a visit to Oldham, Mr Cameron said: **"We should not be put off by cultural sensitivities or anything like that. Pursue the evidence, pursue criminality wherever it leads"** (The Telegraph, 2011).

**Source:** The Guardian, Amy Fallon

**Title/Headline:** *Pakistan Shootings And Tanker Attacks Fuel Crisis Fears*

**Abstract:** Violence blamed on political rivalry and Taliban as at least 17 shot dead in Karachi and 14 fuel tankers for Nato torched. A television journalist was among the dead after the attack in the country's commercial hub. "At least 17 people have died in the past three days by firing by unknown gunmen in several parts of Karachi," the city police chief, Fayyaz Leghari, said. After hundreds of killings last year, there are concerns that violence in Pakistan could escalate and create a new crisis for the US-backed government. Analysts and security officials blame much of the trouble on the rivalry between the two main parties, the Muttahida Qaumi Movement, and the Awami National party, both part of the ruling coalition. The MQM represents the interests of majority Urdu-speaking mohajirs, while the ANP is linked to the growing Pashtun minority. Conflict between party members is partly fuelled by ethnic tension. The Pakistani government also faces a Taliban insurgency. Eight gunmen in the south-west of the country have torched 14 tankers carrying fuel for US and Nato troops in Afghanistan. A driver was wounded during the latest attack, which occurred in the Dera Murad Jamali area of Balochistan province, government official Fattah Mohammed said. The tankers were parked at a roadside restaurant when the attack occurred. Such attacks by Islamic militants and criminals on supplies, which usually arrive in the port city of Karachi and travel overland to Afghanistan through two main border crossings, have become common. As a result, the US has been relying on other supply routes through countries north of Afghanistan (Fallon, 2011).

**Title/Headline:** *Explosion On Bus In NW Pakistan Kills 18*

**Abstract:** An explosion ripped through a minibus traveling in a militant-infested area of northwestern Pakistan on Monday, killing 18 people, police said. There were conflicting reports of whether the blast was caused by a bomb or by the gas cylinder used to power the vehicle. The bus was traveling between the cities of Hangu and Kohat, which are located close to Pakistan's lawless tribal region. The explosion tore apart the vehicle, killing all 17 people on board, and tipped over a second bus nearby, said Hangu police chief Abdur Rasheed. One person on the bus that tipped over was killed and 11 others were wounded, he said. Rasheed said the blast occurred when the gas cylinder on board malfunctioned. But the top police official in the region said explosives were used to trigger the explosion. Islamist militants frequently carry out attacks in the area against both civilians and security forces. Local television footage showed the twisted carcass of the first bus laying beside the road with little left except its wheels and undercarriage. The second bus was on its side with its windows blown out and blood splattered across the outside (Fox News, 2011).

**Title/Headline:** *Richard Holbrooke's Lonely Mission*

**Abstract:** The late diplomat never lost his passion for peacemaking, but it turned out that some of his toughest adversaries were on his own side. The memorial service at Washington's Kennedy Center last week had the trappings of a state funeral. President Barack Obama was there, former president Bill Clinton, and Secretary of State Hillary Clinton. President Asif Ali Zardari of Pakistan flew in for the occasion, as did scores of other dignitaries. The man they came to honor, Richard Holbrooke, had been a diplomat on and off for more than 40 years when he died last month at the age of 69. He might have been secretary of state, but never was, and may well have deserved a Nobel Prize for bringing the Bosnian war to an end in 1995, but never got it. Never mind. As Obama said in his tribute, "By the time I came to know Richard, his place in history was assured." Holbrooke would have gotten a chuckle out of it all, especially listening to the president paying such homage. He could have used some more of that support when he was still on the job. Richard Holbrooke's last official title was "special representative for Afghanistan and Pakistan," or SRAP in D.C. speak, and even his eulogizers last week acknowledged it was the toughest assignment of his life. Holbrooke was the diplomatic point man supposed to be sorting out the most complicated, most costly, and most dangerous of the wars that the United States is fighting. It involves so much more than Taliban bombs by the side of the road, or boots on the ground, or poppies raised for opium in Afghan valleys. At bottom, it's about nuclear-armed Pakistan, which is sometimes an ally, sometimes an enemy, of the American effort in Afghanistan. If there are limits to murderous fanaticism, Pakistan is still trying to find them. In recent weeks, it has started to look like a society sliding toward madness. A treacherous young bodyguard guns down the distinguished governor of Punjab for objecting to the death sentence on a Christian woman accused of blasphemy. Mobs—and even a group of young lawyers—hail the killer as a hero. This was the kind of crisis where Holbrooke's insights and his capacity for action could be hugely helpful, and in which he's sorely missed. "I loved the guy because he could do—and doing in diplomacy saves lives," said Bill Clinton. What Holbrooke did, however, he did not always do gently, or subtly, or deferentially. He was famously arrogant and abrasive. When Adm. Michael Mullen, chairman of the Joint Chiefs of Staff and a very close friend of Holbrooke's, spoke, he called him "the quintessential Washington know-it-all." Bill Clinton said he was "a hurricane of eloquence and energy and force," but he'd "scream and claw and scratch and make you feel like you had a double-digit IQ if you didn't agree with him." On another occasion, a colleague observed: "His friends were amused by his antics. But if you weren't a friend, you found it hard to take." Holbrooke's critics suggest (off the record, because they don't want to sound churlish now that he's gone) that he was his own worst enemy. But that's misleading. Interviews with those who knew Holbrooke in Kabul, Islamabad,

New York, Brussels, and Washington make clear he had a great many adversaries. Afghanistan's President Hamid Karzai treated him with paranoid fury. **Pakistan's leaders sometimes lied to him, and about him.** The Taliban tried to take him out with sniper fire and suicide bombers. And among those who worked to undermine the man, even to the detriment of his vital mission, were at least a few people in the White House who understood neither the man nor, indeed, his mission. **"Dick Holbrooke would have been Obama's best ally," lamented Council on Foreign Relations president emeritus Leslie Gelb, one of his contemporaries and closest friends. "Obama had just the right hammer he needed in Dick for dealing with Afghanistan and Pakistan, and Obama's failure to see that—and his staff's failure to see that—really cost him and our country.** What in God's name would make you not make full use of Dick Holbrooke?" **What's striking is how little substantive difference there was between what Holbrooke was trying to do in Afghanistan and Pakistan and what Obama wanted done.** Both believed in the primacy of politics and diplomacy over military solutions. Both wanted to find exits without scrambling for them. "I tell you something," says Gelb, **"Dick was very supportive of Obama despite all the rejection."** Instead, the timing worked in Holbrooke's favor: ironically, the very **"No-Drama Obama"** style that he chafed against saved his job. The administration's deliberations stretched on messily. Gen. Stanley McChrystal, the new commander on the ground, pushed for more troops. Eikenberry (a retired general and former U.S. commander in Afghanistan) argued that a surge would only make things worse. Details of the debate were front-page news. **The last thing Obama wanted at that moment was the dramatic disruption that would be caused by firing the special representative for Afghanistan and Pakistan. But his rivals, thinking Holbrooke's days were numbered, piled on the pressure.** Stories multiplied about Holbrooke's supposedly cringeworthy behavior. Some were exaggerated or even invented. At a breakfast with Pakistani politicians in January 2010, for instance, local papers claimed Holbrooke "flew into a rage" about criticism of the United States, which was about to triple nonmilitary aid to Pakistan. But two of the Pakistani politicians who were at that breakfast in Islamabad's opulent Serena Hotel have told NEWSWEEK that there was no rage, no shouting, nothing of the kind. By this time Karzai was cleverly making a show of warming up toward Al Qaeda, which sent the Americans jostling to curry favor with him again. This didn't play to Holbrooke's strengths. **In February 2010, in what was supposed to be a personal note, Jones reportedly told Ambassador Eikenberry in Kabul not to worry too much about Holbrooke because he wasn't going to be around much longer.** The contents of the note wound up circulating all over Foggy Bottom. "Even though Dick knew how Jones felt, that note, and its being distributed all over the department, was just devastating," remembers one of Holbrooke's close friends. **The following month, Holbrooke was left out of Obama's entourage on the president's quick visit to Kabul. "Some of this is just sheer personality," says an official who was on the trip. "Who do you want as your traveling companion? It's a small group. You're starting to run out of seats at the table. Then the music stops."** But few reporters failed to note the slight. **Then, in April, the Jones letter leaked to the press—and the effect wasn't what might have been expected. As Holbrooke kept working, organizing, traveling, and building vital bridges in Pakistan, it was Jones who looked disruptive. In November, a frustrated Obama decided to change his national-security adviser.** In early December, on a visit to the White House, Holbrooke couldn't resist telling one of the president's aides, "You'll notice that I am still here and Jones isn't." **Richard Holbrooke, always famous for persistence, had learned the lessons of patience.** If his relations with Karzai remained cool, he still met with him formally and frequently. In Pakistan, when enormous floods devastated the country last summer, Holbrooke "was like a force of nature battling the water," as his friend Galbraith puts it. The United States took the lead in delivering relief and, for a change, got some credit from the Pakistani public. Last fall, Islamabad and Kabul signed an unprecedented transit and trade agreement, which was one of Holbrooke's key goals. **"We are quite sad on his sudden death," says Haji Adeel, a prominent Pashtun member of Pakistan's Parliament. "He didn't complete his mission."** Perhaps not. **But when the music stopped, Richard Holbrooke was still at the table** (Alter & Dickey, 2011).

**Conclusion:** Pakistan has been under attack since 9/11 and it will likely climax with a nuclear attack by the Obama administration. The key diplomat to Pakistan, Richard Holbrooke, appears to have been murdered and his funeral a potential staging conference for the upcoming war between the U.S. and Pakistan. While these assumptions are pure speculation, Holbrooke appears to have been the only rational mind in a rogue Obama White House, hell bent on a Pakistani nuclear holocaust.

## The Nuclear Bible: Pakistan, ISI, CIA & Blackwater/Xe Connections

**Intro:** The following compilation of articles shows a clear and concise connection between acts of terror and the government of the United States of America and Israel. **Title/Headline:** *Who Is Osama Bin Laden?*

**Abstract:** Osama Bin Laden is both one of the CIA's most wanted men and a hero to many young people in the Arab world. He and his associates were already being sought by the US on charges of international terrorism, including in connection with the 1998 bombing of American embassies in Africa and last year's attack on the USS Cole in Yemen. In May this year a US jury convicted four men believed to be linked with Bin Laden of plotting the embassy bombings in Kenya and Tanzania. **Bin Laden, an immensely wealthy and private man, has been granted a safe haven by Afghanistan's ruling Taleban movement.** During his time in hiding, he has called for a holy war against the US, and for the killing of Americans and Jews. He is reported to be able to rally around him up to 3,000 fighters. He is also suspected of helping to set up Islamic training centres to prepare soldiers to fight in Chechnya and other parts of the former Soviet Union. His power is founded on a personal fortune earned by his family's construction business in Saudi Arabia. Born in Saudi Arabia to a Yemeni family, Bin Laden left Saudi Arabia in 1979 to fight against the Soviet invasion of Afghanistan. **The Afghan jihad was backed with American dollars and had the blessing of the governments of Saudi Arabia and Pakistan. He received security training from the CIA itself, according to Middle Eastern analyst Hazhir Teimourian.** While in Afghanistan, he founded the Maktab al-Khidimat (MAK), which recruited fighters from around the world and imported equipment to aid the Afghan resistance against the Soviet army. Egyptians, Lebanese, Turks and others - numbering thousands in Bin Laden's estimate - joined their Afghan Muslim brothers in the struggle against an ideology that spurned religion. After the Soviet withdrawal, the "Arab Afghans", as **Bin Laden's faction came to be called, turned their fire against the US and its allies in the Middle East.** Bin Laden returned to Saudi Arabia to work in the family construction business, but was expelled in 1991 because of his anti-government activities there. He spent the next five years in Sudan until US pressure prompted the Sudanese Government to expel him, whereupon Bin Laden returned to Afghanistan. Terrorism experts say Bin Laden has been using his millions to fund attacks against the US. **The US State Department calls him "one of the most significant sponsors of Islamic extremist activities in the world today".** According to the US, Bin Laden was involved in at least three major attacks - the 1993 World Trade Center bombing, the 1996 killing of 19 US soldiers in Saudi Arabia, and the 1998 bombings in Kenya and Tanzania. BBC correspondent James Robbins says Bin Laden had "all but admitted involvement" in the Saudi Arabia killings. Some experts say he is part of an international Islamic front, bringing together Saudi, Egyptian and other groups. Their rallying cry is the liberation of Islam's three holiest places - Mecca, Medina and Jerusalem. Analysts say **Bin Laden's organisation is very different from the groups that carried out bombings and hijackings in the past in that it is not a tightly knit group with a clear command structure but a loose coalition of groups operating across continents.** American officials believe Bin Laden's associates may operate in over forty countries - in Europe and North America, as well as in the Middle East and Asia. The few outsiders who have met Bin Laden describe him as modest, almost shy. He rarely gives interviews. He is believed to be in his 40s, and to have at least three wives.

**Title/Headline:** *Have U.S. Efforts In Afghanistan Been Successful If Bin Laden Is Alive?*

**Abstract:** Congressman Jim McDermott told CNN in 2002 that the U.S. created the Taliban and placed the group of fanatics in Afghanistan. From a CNN transcript:

**McDermott:** "It certainly is an improvement for the women of Afghanistan. But you've got to remember that of American policy, we put the Taliban there. **We gave the money to the...**

**Carlson:** I beg your pardon?

**McDermott:** ... Pakistanis.

**Carlson:** You're breaking news here, Congressman. I don't think this has ever been reported before in the United States.

**McDermott:** Oh, yes, it has been. **We funded the Taliban through the Pakistanis, and all that money — we could have cut off that money and stopped what was going on. We knew what was going on there"** (CNN, 2002).

**Title/Headline:** *U.S. Support For Anti-Soviet And Anti-Russian Guerrilla Movements And The Undermining Of Democracy*

**Abstract:** The U.S. government has demanded that nations and international bodies join forces to combat terrorism. Yet the United States has played an important role in fostering the very terrorism it now denounces. While terrorist groups are portrayed as an "evil enemies" by the United States, many terrorist organizations initially received considerable support from the U.S. government, either openly or clandestinely. From the Mujihadeen in Afghanistan to the Kosovo Liberation Army in the former Yugoslavia, the U.S. government has provided training and support to "terrorist" organizations. **One of the best ways to combat terrorism in the world today is to pressure the United States and other governments to stop lending support to such organizations.** This is of particular importance for Russia, since terrorists originally armed and trained by the United States battled Soviet forces for over a decade in Afghanistan, and these Mujihadeen fighters can now be found in the Russian region of Chechnya. **Not only has the U.S. support for the Mujihadeen resulted in considerable bloodshed in Chechnya, but the Soviet Union's war in Afghanistan and the Russian Federation's war in Chechnya served to undermine efforts at democratization.** My principal thesis in this article is that democracy cannot be instituted during war or under wartime conditions. In the United States own history, the periods when democracy was most threatened occurred during wartime. **During the American Civil War, for example, many civil liberties were suspended. During World War I this was also the case, and right after the war the first "Red Scare" was instituted. World War II also saw strict limits on democratic rights, limitations that were repeated during the Viet Nam war.** Of course in the history of Russia it has been during wartime that rights were most vigorously curtailed. During World War I no opposition voices were allowed, and with the outbreak of the Civil War in 1918 both the Reds and the Whites instituted a reign of terror that was justified by the reality of war. **It was the threat of war that gave Stalin the excuse he needed to purge the Soviet Union of all of his opponents in the 1930s, and it was the cold war that gave Soviet leaders the justification for preventing democracy from breaking out.** Thus, democracy cannot coexist alongside war, and from 1979 to the present, the Soviet Union and the Russian Federation have been bogged down in conflicts in Afghanistan and Chechnya-conflicts in which the United States has played a considerable role. In the 1980s, the Soviet war in Afghanistan served to counteract the push toward democratization, since this war was used as an excuse for state control of speech and press freedoms. Currently, the presence of "terrorists" in Chechnya is undermining Russia's efforts to institute democratic reforms in the country, while at the same time the Chechen conflict has tended to empower antidemocratic forces. **Under the umbrella of fighting terrorism, the Russian government justifies the violation of basic civil rights of Russian citizens, whether Chechens or one of the many other nationalities within the Russian Federation. In this article I will explore the ways that the United States has contributed to the spread of terrorism as it concerns the former Soviet Union and the Russian Federation.** The U.S. role has been twofold; first, in its material support of terrorist groups, and second, by the example set in using extreme violence to achieve ends. From there I will explore the ways in which these U.S.-trained terrorists have played a significant role in Russia's conflict with Chechnya. **The model for state-sponsored terrorism is the U.S. role in arming, training, and supporting the Mujihadeen "freedom fighters" of Afghanistan in the 1980s. From this guerrilla movement, initially intended to oust the Soviet Union from Afghanistan, arose terrorist groups in nations such as Indonesia, the Philippines, Egypt, Saudi Arabia, Algeria, Chechnya, and the former Yugoslavia.** Later, some of the Afghan-trained "freedom fighters" were involved in terrorist acts against the United States, the very government that had given them support in the early days of their organization. **The initial bombing of the World Trade Center in 1992, the attacks on the U.S. embassies in Kenya and Tanzania, the attack on the USS Cole, and the attacks of 11 September all have been linked to individuals and groups that at one time were armed and trained by the United States and/or its allies. And while the United States has given strong logistical support to terrorist movements, it also provided terrorists with the moral justification for their acts.** For example, neither Iraq nor Libya ever attacked the United States, yet the U.S. government believes it was justified in attacking those two countries. So too with the missile attacks on Sudan and Afghanistan in 1998. While neither Afghanistan nor Sudan attacked the United States, President Clinton argued that the United States had the right to launch missile attacks against them. **As former Pakistani interior minister Naseer Ullah Babar described the missile attacks, "[t]his is American gangsterism."** U.S. support of the Mujihadeen actually began even prior to the Soviet invasion of Afghanistan. While it is widely believed, and officially reported, that U.S. support for the Mujihadeen was a response to the Soviet invasion in 1979, former Secretary of State Zbigniew Brzezinski admitted otherwise in an interview with the French newspaper Le Nouvel Observateur in 1998. In the interview he declared that: **"According to the official version of history, CIA aid to the Mujahideen began during 1980, that is to say, after the Soviet army invaded Afghanistan, 24 Dec 1979. But the reality, secretly guarded until now, is completely otherwise: Indeed, it was July 3, 1979 that President Carter signed the first directive for secret aid to the opponents of the pro-Soviet regime in Kabul. And that very day, I wrote a note to the president in which I explained to him that in my opinion this aid was going to induce a Soviet military intervention Brzezinski defended his actions to the reporter, and declared at one point that the "secret operation was an excellent idea. It had the effect of drawing the Russians into the Afghan trap, and you want me to**

**regret it?"** The actions of the Carter administration and Secretary Brzezinski can only be seen as an act of ruthless cynicism, because the Carter administration gave support to a violent movement led by Moslem fundamentalists, a group that has little in common with the ideals of the U.S. government and its people. By contrast, the Soviets gave support to the Afghan communist and noncommunist Left, that is, groups that shared the Soviet perspective on domestic and international issues. **But the alliance of the Mujahideen and the United States was not rooted in any common values or perspectives, only the overriding desire to destroy the Soviet Union.** Certainly Moslem fundamentalists could see the cracks in this unnatural alliance. As Sheikh Omar Abdul-Rahman, the Egyptian cleric who was convicted in the conspiracy to bomb the World Trade Center in 1993, put it in an interview in 1997, **Do you think we were naive enough to believe that the United States government was helping the Afghans because it believed in their cause-to raise the flag of jihad for Islam? That they were helping a people, a country, to free themselves? Absolutely not. The Americans were there to punish the Soviet Union.** In his article on U.S. support of the Mujahideen, Phil Gaspar writes: Between 1982 and 1992, some 35,000 Muslim radicals from 43 Islamic countries in the Middle East, North and East Africa, Central Asia and the Far East would pass their baptism under fire with the Afghan mujahideen. **Tens of thousands more foreign Muslim radicals came to study in the hundreds of new madrassas [religious schools] that Zia's military government began to fund in Pakistan and along the Afghan border. Eventually more than 100,000 Muslim radicals were to have direct contact with Pakistan and Afghanistan and be influenced by the jihad [against the USSR].** In the 1980s the Reagan administration believed that supporting Moslem fundamentalists was the best way to fight communism and socialism in predominately Moslem countries. It was reasoned that while secular movements of national liberation, such as the Palestinian Liberation Organization, embraced socialism, Moslem fundamentalists were vehemently anticommunist and antisocialist. **In addition, support for Moslem fundamentalist groups was looked upon with favor by Saudi Arabia, the key U.S. ally in the Gulf region. And the Saudi regime, like the United States, disliked the strong socialist content of most modern Arab movements.** What better way to undermine both the Soviet Union and Arab and Moslem socialism than to give support to Moslem religious fanatics? Such was the cynical reasoning of the U.S. government in the 1980s. To that end the United States encouraged Moslem fundamentalists from around the world to join the Mujahideen in their fight against the Soviets in Afghanistan. **The very reason that Sheikh Omar Abdul-Rahman was allowed into the United States, despite his known ties to Moslem extremist groups in Egypt and Afghanistan, was to help recruit American Moslems to fight the jihad in Afghanistan. Later convicted for his role in the first World Trade Center bombing in 1993, Rahman was permitted to live in the United States to recruit soldiers to fight the jihad.** Rahman did his job, but when the Soviets withdrew from Afghanistan, he set his sights on other targets. Now in the United States, a veteran of the jihad in Afghanistan, Rahman and his followers focused their efforts on the other "Great Satan," the United States. **And even after the ouster of the Soviet Union from Afghanistan, the United States continued to play a role in fostering Moslem fundamentalism. Although the United States has been attacked for abandoning Afghanistan after the departure of the Soviet Union, the United States and its Pakistani and Saudi allies continued to exert influence in the region. Indeed, initial support for the Taliban was from the Pakistani government, which in turn was given approval from the United States.** It was only when the Taliban had taken control of Kabul and when Osama bin Laden had taken refuge in Afghanistan that the United States began to withdraw its support for this fundamentalist regime. With the withdrawal of the Soviets from Afghanistan, many jihad soldiers returned to their home countries to pick up the fight they left in Afghanistan. **In Algeria, for instance, the Islamic Salvation Front has engaged in a bloody civil war with the government, and many of its key members are veterans of the Afghan war. This is also the case in the former Yugoslavia and in Chechnya, where key fighters gained their training and experience during the U.S.-backed jihad in Afghanistan. Of course the best known byproduct of the Afghan jihad is Osama bin Laden. Although the U.S. government claims that there is no direct link between bin Laden and the United States, there is no doubt that the United States provided a favorable environment for bin Laden to build his reputation and following. It is difficult to believe that the United States played no role in the operations of the son of one of the wealthiest men in Saudi Arabia. Indeed, it is much more likely that the United States knew full-well of bin Laden's operation and gave it all the support they could.** It was well-known in the Moslem and Arab world that the United States preferred the type of work that bin Laden engaged in; rather than getting money directly from the United States or some other government, bin Laden had enough cash to run his own operation. This fit well with the U.S. government's own belief that wealthy individuals, not the state, should step forward and, in an act of charity and volunteerism, provide the necessary funds and support for a worthy cause. **Bin Laden's actions in Afghanistan fit well within the U.S. government's concept of a "worthy cause," and so he was allowed to work to train and to recruit his following.** Once the Mujahideen's war with the Soviet Union was through, its members turned their attention to other enemies. **This was especially true in Chechnya, where former Mujahideen fighters joined forces with Chechen rebels battling the Russian army for control of the region. Beginning in 1993, former Mujahideen fighters were known to be operating in Chechnya, while the Pakistani secret police, the ISI, was training fighters in camps in Pakistan and Afghanistan to fight in the Caucasus region.** In June 1995, the Chechen leader Shamil Basayev led a raid on the Russian town of Budennovsk, and his force included fighters from Jordan, Saudi Arabia, and Syria, all of whom had fought in Afghanistan against the Soviets. **And from the civil war in Afghanistan came one of the most feared and ruthless of the Chechen fighters, the "Arab" Kattab. Born in the border region between Saudi Arabia and Jordan, Kattab fought with the Mujahideen in Afghanistan as an Afghan Arab, and he later went to Chechnya to continue his religious war against the Russians.** As recently as January 2002, Kattab was identified in a videotape with Osama bin Laden, thereby underscoring the link between bin Laden and the Chechen fighters. Although of Arab origin, Kattab spoke fluent Russian on the videotape, underscoring his long contact with Russian speaking Chechens. Although Kattab has since been proclaimed dead by Russian authorities, he is only one example of dozens, perhaps hundreds, of non-Chechens fighting in Chechnya with the skills they acquired from the United States or U.S.-backed groups in their fight against the Soviet Union in the 1980s. **Since the CIA conducted its operations in Afghanistan through the Pakistani government and secret police, it is difficult to document who received training and support directly from the United States, and who was trained by U.S.-backed interests but presumably without the direct knowledge of the United States. The U.S. government has denied any contact or support for Osama bin Laden, for example, and since no direct evidence has surfaced linking bin Laden directly with the CIA, the U.S. government has maintained this (highly unlikely) position.** But what cannot be refuted is the use of U.S.-produced Stinger missiles in Chechnya, missiles from the conflict in Afghanistan. Not only were Stingers from the Afghan war used in Chechnya, but the United States has unwisely given Stinger missiles to nations such as Saudi Arabia and Kuwait, two nations where there is strong support for the Chechen fighters. **Thus, in both training and the supply of arms, the United States and its backers have played a strong role in the conflicts in both Afghanistan and Chechnya and thus in undermining the democratic process in Russia.** In the

1980s, while then-Soviet premier Gorbachev was attempting to reform Soviet politics and society, a futile conflict in Afghanistan made his efforts all the more difficult. And while Russia since the collapse of the Soviet Union has made cautious steps toward greater freedom and democracy, this too has been undermined by the ongoing war in Chechnya. **Although there is no hard evidence that the United States is directly supporting Chechen "terrorists," there is no doubt that the United States and/or its allies did train fighters who are now in Chechnya fighting the Russian army. And there is considerable evidence that nations such as Pakistan and Saudi Arabia, two close U.S. allies, have given aid and support to Chechen fighters.**

**Conclusion:** In sum, U.S. policies since 1979 have served to strengthen the very "terrorism" it claims to oppose. In supporting the Mujihadeen in Afghanistan, the United States helped push the Soviet Union into the "Afghan trap," as Zbigniew Brzezinski put it, and therefore helped to undermine the possibility of a democratic opening in the Soviet Union. With the collapse of the Soviet Union, those same terrorists have relocated to Chechnya, where the war continues to weaken the hoped-for democracy in the newly formed Russian Federation. **It is only by halting support for these terrorists groups that the United States can help create an environment in Russia that would encourage rather than discourage the growth of democracy.** While the United States might technically claim it is not responsible for supporting and training terrorists in Chechnya, it certainly helped to contribute to the current conflict by its role in the Afghan war of 1979-92. **Additionally, the United States continues to support Pakistan and Saudi Arabia, two nations that have been known to give aid and support to Chechen rebels.** As long as this conflict continues, there will be no hope for greater democracy in Russia (Powelson,, 2003).

**Date:** January 19, 2006

**Source:** CBC News (Canadian Broadcasting Corporation)

**Title/Headline:** *Who Is Osama Bin Laden?*

**Abstract:** On March 7, 2004, as the snows melted in the mountains of Afghanistan and U.S. President George W. Bush eyed a November election, the **United States launched Operation Mountain Storm in the rugged border between Afghanistan and Pakistan to find the elusive Osama bin Laden.** The United States said the operation, based at their headquarters in Kandahar, would unfold in secret across eastern and southern Afghanistan. Spokesperson Lt.-Col. Bryan Hiferty gave few details when he confirmed on March 13 that Operation Mountain Storm was underway, but he did tell the Associated Press, **"The leaders of al-Qaeda and the leader of the Taliban need to be brought to justice – and they will be."** The U.S. also sent the elite special forces outfit, Task Force 121, a joint unit of commandos and CIA officers, to the border region to find bin Laden and the leader of the Taliban, Mullah Muhammed Omar. Intelligence sources have told several U.S. media organizations that Task Force 121 was key in tracking down the former president of Iraq, Saddam Hussein, and after that success, the task force was sent to Afghanistan. **There is one big difference between Saddam, and bin Laden and many of his al-Qaeda and Taliban followers. While Saddam spent most of his time in luxury, choosing which palace to sleep in each night, bin Laden and his men have years of experience dodging a previous enemy, the Soviet Union, which occupied Afghanistan until it was driven out in the 1980s.** Bin Laden was still at large in January 2006. Many experts believe that bin Laden remains in hiding somewhere in the mountains near Khowst, an area that European intelligence sources have told the media is still controlled by the Taliban. It is an area of old tribal loyalties, where local leaders have always been fiercely independent from any ruler of Afghanistan or Pakistan. Pakistani security forces have also stepped up operations in the border area. **Reports say that President Perez Musharraf was reluctant to stir up the hornets' nest of tribes and Islamic fundamentalists in the region, until a couple of failed attempts to assassinate him.** There have been accusations both in the American media and from Europe that while the United States painted bin Laden as public enemy number 1, the Americans "neglected" Afghanistan when its focus turned to Iraq in March 2003, a charge top U.S. officials vehemently deny. There are also persistent reports that the U.S. invasion of Iraq changed al-Qaeda's focus, with bin Laden and his senior advisors moving resources from Afghanistan to Iraq because it was a good place to fight "the American crusaders," according to a Taliban source quoted by Newsweek magazine. A new generation: **The Washington Post has reported that there is a new generation of al-Qaeda, led by Osama's eldest son, Saad bin Laden, 24, who is said to be in Iran along with Saif el-Adel, al-Qaeda's chief of military operations, and Abdullah Ahmed Abdullah, al-Qaeda's chief financial officer.** The three and their followers are, according to the Post, surrounded by an elite Iranian security force, loyal to hard-line Iranian Islamists, who act both as guards and jailers, both preventing attack or arrest and restricting their movements. **However, communication between father and son is apparently still possible, using written messages carried by courier and sometimes even satellite phones, which according to some sources, are hard for U.S. signals intelligence to pinpoint in the rugged mountains.** According to the Washington Post, intelligence sources believe that the orders and organization for two suicide bombings, in Saudi Arabia and Morocco in May 2003, came through Saad bin Laden, rather than directly from his father. Despite American efforts, or perhaps because of them, **Osama bin Laden is a hero to many people in the Middle East and South Asia. Bazaars and marketplaces are full with bin Laden merchandise including posters, video and audio tapes, and T-shirts.** Osama bin Laden has been called America's most wanted terrorist suspect at least since the bombing in 1998 of the U.S. embassies in Kenya and Tanzania. **The U.S. State Department said bin Laden is "one of the most significant financial sponsors of Islamic extremist activities in the world."** His code name, "The Contractor," is maybe the best indicator of bin Laden's link to terrorism. Officials in many countries including the United States say that bin Laden's money has paid for attacks in Europe, Africa and the Middle East. His personal wealth is estimated at \$250 million US. **Osama bin Laden is believed to be the youngest of 24 brothers in a family that came from Yemen and built up one of the largest construction companies in the Arab world, Bin Laden Group, an empire based in the Saudi city of Jidda that made its fortune in building projects for the Saudi royal family.** As a teenager and a young man, Osama bin Laden was reported to be a typical Saudi of his generation, a bit of a playboy who used his family fortune to have fun outside of Saudi Arabia in Europe and the Gulf states. The invasion of Afghanistan by the Soviet Union in 1979 changed bin Laden's life. Like many young Islamists, he went to Afghanistan to help fight the invaders, to take part in the jihad against the infidel Soviets. **Bin Laden apparently received training from the CIA, which was backing the Afghan holy warriors – the mujahedeen – who were tying down Soviet forces in Afghanistan.** He gave the family money and his own expertise gleaned from the family business to MAK, Maktab al-Khidimat, which recruited young Muslim men from around the world. He also used his fortune to help buy equipment for the Afghan resistance. **In 1984, he helped Abdullah Azzam, founder of the Pakistani "Office of Services," establish training camps across the border in Afghanistan.**

The Office of Services' goal was to recruit and train Muslim volunteers. Bin Laden provided financial support and handling of military affairs. Two years later, in 1986, Bin Laden established his own training camp for Persian Gulf Arabs called al Masadah, or the Lion's Den. In 1988, as the Soviet occupation faltered in Afghanistan, bin Laden turned to a global crusade. **He founded the group called al-Qaeda, Arabic for The Base. According to one report from the CIA in 2001, al-Qaeda had at least 5,000 trained militants, who created cells in 50 countries.** The purpose of these camps was to take militants from around the world and shape them into an international network that would bring all Muslims under a militant version of Islamic law. In 1989, the collapsing Soviet Union withdrew from Afghanistan and bin Laden returned to Saudi Arabia to join his family's construction company. He kept up his contacts with al-Qaeda. In 1991, bin Laden moved the headquarters of al-Qaeda to Sudan, where a militant Islamic government had come to power. **In 1993, a bomb exploded in an underground parking garage at the World Trade Center in New York, killing six people and injuring another 1,000. The attack was linked to al-Qaeda.** In 1994, Saudi Arabia stripped bin Laden of citizenship for alleged terrorist links and his family disavowed him, at least publicly. In 1996, bin Laden was forced to leave Sudan for Afghanistan following intense pressure from the U.S. on the government. While in Sudan, bin Laden met a man who was probably a key ally, Imad Mugnyah, a Lebanese said to be a leader of Hezbollah, wanted by the United States for kidnappings and killings during the civil war in Lebanon in the 1980s. By September of that year, the militant Taliban, capitalizing on the divisions in Afghanistan, which was torn by civil war between the mujahedeen factions, took over the country and imposed strict Islamic rule. Bin Laden's son Saad was with Osama when he returned to Afghanistan. By 1998, bin Laden had teamed up with an Egyptian militant, Ayman Zawahiri, to form "The International Islamic Front for Jihad Against Jews and Crusaders," which acted as an umbrella group for international militant groups. **It issued a religious order saying it was a religious duty of Muslims to kill Americans anywhere possible. The group in effect declared war against the West, but the declaration was ignored by most of the media and discounted by many in the intelligence community.** In October 1998, the U.S. Justice Dept. indicted bin Laden for his alleged role in ordering the bombing of the U.S. embassies in Kenya and Tanzania. In 1999, bin Laden moved to the village of Farmifadda, Afghanistan, and later settled in a compound near Jalalabad. **In October 2000, suicide bombers attacked the U.S.S. Cole in Aden harbour in Yemen. Bin Laden was suspected of ordering the attack. On September 11, 2001, members of al-Qaeda hijacked American passenger planes and attacked New York and Washington. Soon after the attack, bin Laden and his associates fled Jalalabad for the mountains.** On Oct. 7, the United States and its allies began the attack on Afghanistan and the Taliban regime quickly collapsed. In December 2001, U.S. intelligence pinpointed bin Laden in a cave complex at Tora Bora. U.S. special and regular forces and Afghan allies attacked the caves, but bin Laden successfully slipped through their fingers and disappeared into the mountains. In an interview with ABC correspondent John Miller on May 28, Bin Laden made the following comment on the fatwa issued calling Muslims to kill Americans regardless of whether they are civilians or military: **"Allah ordered us in this religion to purify Muslim land of all non-believers. After World War II, the Americans became more aggressive and oppressive, especially in the Muslim world. American history does not distinguish between civilians and military, and not even women and children. They are the ones who used the bombs against Nagasaki. Can these bombs distinguish between infants and military? America does not have a religion that will prevent it from destroying all people"** (CBC News, 2006).

**Title/Headline:** *The Checkered History of American Weapons Deals*

**Abstract:** The United States has upset its European allies with plans for a massive arms deal with several governments in the Middle East. Washington has been down this road before. Karsten Voigt, the German government's Coordinator for German-American Cooperation, was completely gobsmacked last week. **How Washington could encourage democratic change in the Middle East by selling Saudi Arabia billions of dollars in weapons, he said, was "a huge question mark."** The Islamic kingdom might be a US ally in name, but it wasn't "particularly democratic," said Voigt, and its oppressive family regime continued to be a fertile breeding ground for Islamic terrorists. **At a summit meeting at the end of July, top US officials announced a deal to send major new weapons systems to Saudi Arabia, Egypt, Israel and other governments in the Middle East to counterbalance Iran's growing influence there.** Voigt wondered whether it was a wise move. "The region is not suffering from a lack of arms, but from a lack of stability," he said. "I have strong doubts whether stability could be achieved with these weapons." But such arms deals have a long tradition in Washington. **"The enemy of my enemy is my friend" was a maxim of several US governments during the Cold War.** Washington's foreign policy often sanctioned selling weapons to questionable regimes promising to help contain the communist threat regardless of the potential consequences. The deals frequently ended as debacles: US soldiers have all too often stared down the barrels of guns their own government sold to the armies of countries that used to be their supposed allies. The convoluted US-Iranian relationship is a textbook example of such policies. **After the Shah of Iran consolidated his power with CIA help in 1953 in what is known as Operation Ajax, the country became America's most important ally in the Middle East after Israel. In return for access to Iran's bountiful oil fields, Washington sold the Shah an arsenal of modern weapons. With state-of-the-art fighter jets, new rockets and powerful tanks, Iran became a leading military power in the Persian Gulf. Some 40,000 US military advisors taught Iranians how to use the weapons. After the Islamic fundamentalist regime led by Ayatollah Khomeini toppled the Shah in 1979 and sparked a crisis by taking 52 Americans hostage, it became painfully clear to Washington that its weapons were now in the wrong hands. And so the US government quickly turned to the biggest enemy of the religious fundamentalists -- Iraqi dictator Saddam Hussein. For eight years -- until 1988 -- Hussein waged a brutal war with his eastern neighbors, supported with weapons and know-how from American sources. Even Donald Rumsfeld, who would go on to plan the current war in Iraq as defense secretary under US President George W. Bush, visited Hussein in 1983. As a sweetener, the Americans offered Baghdad classified aerial photographs that allowed Hussein's generals to inflict great damage on Iranian forces -- sometimes using chemical weapons. Only a few years later, of course, US soldiers would wage a war with the very Iraqi military that Washington had so meticulously helped build. The United States also supplied Afghan freedom fighters in the 1980s with money and arms for their struggle against occupying Soviet troops. One of the best customers for the CIA back then was Saudi millionaire Osama Bin Laden. Two decades later, US commandos are hunting for the world's most notorious terrorist and his Taliban helpers. Military and civilian aircraft flying over Afghanistan are still forced to make evasive maneuvers to avoid Stinger missiles fired at them which were originally supplied by the United States to fight the Communists. Washington protected and supported**

**Panamanian dictator Gen. Manuel Noriega for years. Despite all the cash and weapons from America, he also was deeply involved in the drug trade. That led the father of the current US president, George Bush senior, to depose the strongman by sending troops to the Central American country in Operation Just Cause. Noriega was sent to jail in Miami. The Americans also had little luck with their strategy in the Philippines. As Ferdinand Marcos came to power in Manila in 1965, it appeared as if both sides would benefit. The new president sent Filipino troops to bolster Washington's flagging war effort in Vietnam. In return, the United States supported the regime in Manila both politically and militarily -- even though it was clear that Marcos' henchmen were using US weaponry to oppress the country's opposition.** The instability that continues to plague the Philippines today is part of that legacy. US Secretary of State Condoleezza Rice defended the latest string of weapons deals during her recent diplomatic tour of the Middle East. **"We are determined to maintain the balances -- the military and strategic balances -- within the region," she said. But American weapons have a way of outlasting the shifting goals of American foreign policy** (Von Ilseman, 2007).

**Title/Headline:** *Mumbai Suspect Is US Double Agent, India Claims*

**Abstract:** David Headley, a Pakistan-born American national arrested in Chicago in October, is alleged to have carried out reconnaissance missions in the run-up to the Mumbai attacks, in which 166 people were killed. He is also believed to have been present in the terrorists' "control room" in Pakistan where their handlers directed the killing spree over an open telephone line. According to Indian officials, Headley travelled to India again in March this year, with the knowledge of American agencies who did not inform their Indian counterparts. During the trip, **Headley is alleged to have collected intelligence for future terrorist attacks on civilian and military targets, including India's National Defence College. Indian officials are desperate to question Headley but have been frustrated by American refusals to grant them access.** A team of Indian investigators travelled to Washington shortly after Headley was arrested in October but soon returned after their American counterparts told them they would not be able to meet him. **They want to question him about the Mumbai attacks involved Pakistan's ISI intelligence agency in any way and the role of Indian extremists in providing logistical support. American officials say that under US law they cannot force any person in their custody to give evidence to foreign agencies.** But Indian intelligence officers have questioned why Washington is not doing more to help their own inquiry and suggested Headley's connections with American intelligence agencies is behind the reluctance. Headley, who was born Daood Syed Gilani and schooled in Pakistan before moving to Philadelphia with his American mother in 1977, was convicted of smuggling heroin into the United States in 1998. He served only 15 months in jail after agreeing to become an informant for the Drugs Enforcement Administration (DEA). He changed his name to David Headley in 2006. According to Indian officials he continued to serve as a DEA informant until shortly before his arrest in October. **Indian intelligence sources believe Headley may have been recruited to work for the CIA which, along with the FBI, shared intelligence with the DEA and other government agencies after the creation of the National Counter-Terrorism Centre in 2004.** B. Raman, a former senior official in India's intelligence agency, said: "He was working for Lashkar e Taiba, taking photographs and video recordings of the [Mumbai] hotels and harbour. And he was an agent for the DEA on drugs, so in that sense he was a double agent. **"Indian officials are very keen to question him about his network, but we can't because we might find out about any connections with the CIA or ISI.** They don't want that to happen. The Americans say 'you ask us what you want us to find out and we'll share the information'," he added (Nelson, 2009).

THE SUNDAY TIMES

**Title/Headline:** *Mumbai Terror Suspect David Headley Was 'Rogue US Secret Agent'*

**Abstract:** A key terror suspect who allegedly helped to plan last year's attacks in Mumbai and plotted to strike Europe was an American secret agent who went rogue, Indian officials believe. David Headley, 49, who was born in Washington to a Pakistan diplomat father and an American mother, was arrested in Chicago in October. **He is accused of reconnoitring targets in India and Europe for Lashkar-e-Taiba (LeT), the Pakistan-based terror group behind the Mumbai attacks and of having links to al-Qaeda.** He has denied the charges. He came to the attention of the US security services in 1997 when he was arrested in New York for heroin smuggling. He earned a reduced sentence by working for the US Drug Enforcement Agency (DEA) infiltrating Pakistan-linked narcotics gangs. **Indian investigators, who have been denied access to Mr Headley, suspect that he remained on the payroll of the US security services — possibly working for the Central Intelligence Agency (CIA) — but switched his allegiance to LeT.** "India is looking into whether Headley worked as a double agent," an Indian Home Ministry official said yesterday. Mr Headley, who changed his name from Daood Gilani, was in Mumbai until two weeks before the attacks on the city, which claimed 166 lives last November. **It is alleged that he spent months checking targets in India's commercial capital, using his Western looks and anglicised name to move in elite social circles,**

**hobnob with Bollywood actors and even to pass himself off as Jewish.** Despite being firmly on the radar of the US intelligence agencies, he was allowed to return to India as recently as March. **Indian officials are furious that their American counterparts did not share details of that visit at the time. The Indian media has raised the possibility that Mr Headley was being protected by his American handlers — a theory that experts say is credible.** “The feeling in India is that the US has not been transparent,” said B. Raman, a former counter-terrorism chief in the Indian foreign intelligence service, the Research and Analysis Wing. **“That Headley was an agent for the DEA is known. Whether he was being used by the CIA as well is a matter of speculation, but it is almost certain that the CIA was aware of him and his movements across the subcontinent.”** According to Mr Raman, it is probable that Mr Headley, who was arrested when the US authorities learned that he was about to fly to Pakistan, was listed on the main database of the US National Counterterrorism Centre, a facility used by the CIA and several other American agencies to track terror suspects. Indian officials suspect that US agencies declined to share intelligence to avoid compromising other secret operations and to be able to deny any link with Mr Headley. Analysts believe that the US may also have been anxious to avoid sharing information that could further raise tensions between India and Pakistan, nuclear-armed neighbours who have fought three wars. **According to documents put before a court in Chicago, Mr Headley had links with the Pakistan Army and, through it, with al-Qaeda. As well as helping to co-ordinate the Mumbai atrocity, Mr Headley is accused of planning attacks on Mumbai’s Bollywood film industry, the Shiv Sena, a Hindu extremist group also based in Mumbai, a major Hindu temple, and a Danish newspaper that had published cartoons depicting the Prophet Muhammad.** The US authorities allege that he was close to Tahawwur Hussain Rana, a former Pakistani schoolmate and businessman who is also being charged with planning to attack the Danish newspaper, *Jyllands-Posten*. Mr Rana is accused of having known about the attack on Mumbai in advance. The CIA denied that Headley had worked for the organisation. **“Any suggestion that Headley was working for the CIA is complete and utter nonsense. It’s flat-out false,”** Paul Gimigliano, from the CIA’s Office of Public Affairs, said. The Indian Home Secretary, Gopal Krishna Pillai, has said that his Government would seek the extradition of Mr Headley — a request that has so far been stonewalled by US officials (Blakely, 2009).

**Title/Headline:** *US Refuses To Share Info On Mumbai Suspect*

**Abstract:** Despite the horrific attacks, the US has refused to share details about the past records of a key terror suspect of the 2008 Mumbai attack, Indian intelligence sources say. The Indian team tasked with probing the Mumbai bombing is desperately looking for information regarding the role David Headley played in the deadly attack, but Washington has denied them access to the details. Indian intelligence sources claim that the US Central Intelligence Agency (CIA) **has continued to withhold information on the suspect. Despite the fact that the CIA and Pakistan’s Inter-Service Intelligence have denied any links with Headley,** the report said, he was hired by the US Drug Enforcement Agency (DEA). Headley came to the attention of the US security services in 1997 when he was arrested in New York for heroin smuggling. He earned a reduced sentence of 15 months in jail in exchange for working as an agent for the DEA. Headley reportedly worked for the DEA since then until **an American court convicted him in December 2009 of having played a role in the Mumbai attack.** The report said that the **CIA was in possession of Headley’s records** as he was earlier sent by the DEA to Pakistan on a secret mission. Indian officials suspect that the **US agencies declined to share intelligence in order to be able to deny any link with Headley** (Press TV, 2010).

**Title/Headline:** *C.I.A. And Pakistan Work Together, Warily*

**Abstract:** Inside a secret detention center in an industrial pocket of the Pakistani capital called I/9, teams of Pakistani and American spies have kept a watchful eye on a senior Taliban leader captured last month. **With the other eye, they watch each other. The C.I.A. and its Pakistani counterpart, the Directorate of Inter-Services Intelligence, have a long and often tormented relationship.** And even now, they are moving warily toward conflicting goals, with each maneuvering to protect its influence after the shooting stops in Afghanistan. Yet interviews in recent days show how they are working together on tactical operations, and how far the C.I.A. has extended its extraordinary secret war beyond the mountainous tribal belt and deep into Pakistan’s sprawling cities. **Beyond the capture of Mullah Abdul Ghani Baradar, C.I.A. operatives working with the ISI have carried out dozens of raids throughout Pakistan over the past year, working from bases in the cities of Quetta, Peshawar and elsewhere,** according to Pakistani security officials. The raids often come after electronic intercepts by American spy satellites, or tips from Pakistani informants — and the spies from the two countries then sometimes drive in the same car to pick up their quarry. Sometimes the teams go on lengthy reconnaissance missions, with the ISI operatives packing sunscreen and neon glow sticks that allow them to identify their positions at night. **Successful missions sometimes end with American**

and Pakistani spies toasting one another with Johnnie Walker Blue Label whisky, a gift from the C.I.A. The C.I.A.'s drone campaign in Pakistan is well known, which is striking given that this is a covert war. **But these on-the-ground activities have been shrouded in secrecy because the Pakistani government has feared the public backlash against the close relationship with the Americans.** In strengthening ties to the ISI, the C.I.A. is aligning itself with a shadowy institution that meddles in domestic politics and has a history of ties to violent militant groups in the region. **A C.I.A. spokesman declined to comment for this article. Officials in Washington and Islamabad agree that the relationship between the two spy services has steadily improved since the low point of the summer of 2008, when the C.I.A.'s deputy director traveled to Pakistan to confront ISI officials with communications intercepts indicating that the ISI was complicit in the bombing of the Indian Embassy in Kabul, Afghanistan.** The spy agencies have built trust in part through age-old tactics of espionage: killing or capturing each other's enemies. A turning point came last August, when a C.I.A. missile killed the militant leader Baitullah Mehsud as he lay on the roof of his compound in South Waziristan, his wife beside him massaging his back. **Mr. Mehsud for more than a year had been responsible for a wave of terror attacks in Pakistani cities, and many inside the ISI were puzzled as to why the United States had not sought to kill him.** Some even suspected he was an American, or Indian, agent. The drone attack on Mr. Mehsud is part of a joint war against militants in Pakistan's tribal areas, where C.I.A. drones pound militants from the air as Pakistani troops fight them on the ground. **And yet for two spy agencies with a long history of mistrust, the accommodation extends only so far.** For instance, when it comes to the endgame in Afghanistan, where Pakistan hopes to play a significant role as a power broker, interviews with Pakistani and American intelligence officials in Islamabad and Washington reveal that the interests of the two sides remain far apart. **Even as the ISI breaks up a number of Taliban cells, officials in Islamabad, Washington and Kabul hint that the ISI's goal seems to be to weaken the Taliban just enough to bring them to the negotiating table, but leaving them strong enough to represent Pakistani interests in a future Afghan government.** This contrasts sharply with the American goal of battering the Taliban and strengthening Kabul's central government and security forces, even if American officials also recognize that political reconciliation with elements of the Taliban is likely to be part of any ultimate settlement. Tensions in the relationship surfaced in the days immediately after Mullah Baradar's arrest, when the ISI refused to allow C.I.A. officers to interrogate the Taliban leader. Americans have since been given access to the detention center. On Wednesday, Pakistani and Afghan officials meeting in Islamabad said that a deal was being worked out to transfer Mullah Baradar to Afghan custody, which could allow the Americans unrestrained access to him. Besides Mullah Baradar, several Taliban shadow governors and other senior leaders have been arrested inside Pakistan in recent weeks. A top American military officer in Afghanistan on Wednesday suggested that with the arrests, the ISI could be trying to accelerate the timetable for a negotiated settlement between the Taliban and the Afghan government. "I don't know if they're pushing anyone to the table, but they are certainly preparing the meal," the officer said. **In the three decades since the C.I.A. and the ISI teamed up to funnel weapons to Afghan militias fighting the Soviets, the two spy services have soldiered through a co-dependent, yet suspicious relationship.** C.I.A. officers in Islamabad rely on the Pakistani spy service for its network of informants. But they are wary of the ISI's longstanding ties to militants like the Taliban, which Pakistani spies have seen as a necessary ally to blunt archrival India's influence in Afghanistan. **The ISI gets millions of dollars in United States aid from its American counterpart (which allowed the Pakistan spy service to develop a counterterrorism division), yet is suspicious that the Americans and the Indians might be playing their own "double game" against Pakistan.** In Islamabad, officials are nervous about the intensification of the C.I.A.'s drone campaign in North Waziristan against the network run by Sirajuddin Haqqani, whom the ISI for years has used as a force to carry out missions in Afghanistan that serve Pakistani interests. C.I.A. officials believe that Mr. Haqqani's group played a role in the killing of seven Americans in Khost, Afghanistan, in late December, and since then have carried out more than a dozen drone strikes in the Haqqani network's enclave in North Waziristan. **The ISI, an institution feared by most Pakistanis, is used to getting its way. It meddles in domestic politics and in recent months has been suspected by Western embassies in Islamabad of planting anti-American stories in Pakistani newspapers.** It has also been criticized in reports by international human rights organizations of using brutal interrogation tactics against its prisoners, though the same could certainly be said of the C.I.A. in the period of 2002 to 2004. The annual human rights report of the State Department in 2007 said "there were persistent reports that security forces, including intelligence services, tortured and abused persons." The head of the Pakistani military, Gen. Ashfaq Parvez Kayani, said in a recent briefing that it was doubtful that a centralized government would work in post-conflict Afghanistan, making it more important for Pakistan to continue to influence the Taliban in the years to come. **As a result there remains a belief among American intelligence officials that Pakistan will never completely abandon the Taliban,** and officials both in Washington and Kabul admit that they are almost completely in the dark about Pakistan's long-term strategy regarding the Taliban. **"We have a better level of cooperation," said one top American official who met recently in Islamabad with General Kayani. "How far that goes, I can't tell yet. We'll know soon whether this is cooperation, or a stonewall and kind of rope a dope"** (Mazzetti & Perlez, 2010).

**Source:** Webster Griffin Tarpley

**Title/Headline:** *The Battle For Baluchistan: Iran Nabs Top NATO Terrorist With Help From Pakistan*

**Abstract:** Iran announced the capture of Abdulmalek Rigi, the boss of the terror organization Jundullah, which works for NATO. The capture of Rigi represents a serious setback for the US-UK strategy of using false flag state-sponsored terrorism against Iran and Pakistan, and ultimately to sabotage China's geopolitics of oil. The Iranians claim to have captured Rigi all by themselves, but the Pakistani ambassador to Teheran is quoted in *The Dawn* as claiming an important role for Pakistan. The Iranians say that Rigi was attempting to fly from Dubai to Kyrgyzstan, and that his plane was forced to land in Iran by Iranian interceptors. This exploit recalls Oliver North's 1985 intercept of the accused Achille Lauro perpetrators, including Abu Abbas, forcing their Egyptian plane to land at Sigonella, Sicily. **But other and perhaps more realistic versions suggest that Iran was tipped off by the Pakistanis, or even that Rigi was captured by Pakistan and delivered to the Iranians.** Jundullah, otherwise known as the Rigi organization, is a clan-based Mafia organization that has long infested the Iran-Pakistan border. The Rigis are traditionally smugglers and drug pushers of royalist persuasion, and now they have branched out into terrorism. Jundullah is mounting a Sunni rebellion against the Shiite Iranian regime in Iranian Baluchistan. They have blown up a Shiite mosque, killing 25, and managed to kill 50 in a bombing in Pishin last October, where their victims included some top commanders of Iran's Revolutionary Guard, against which Mrs. Clinton has now declared war. **There is no**

doubt that Jundullah is on the US payroll. This fact has been confirmed by Brian Ross of ABC News, the London Daily Telegraph, and by Seymour Hersh in the New Yorker. Hersh noted that Jundullah has received some of the \$400 million appropriated by the US Congress in the most recent Bush-era regime change legislation targeting Iran. Jundullah is a key part of the US-UK strategy of fomenting ethnic and religious civil war in both Iran and Pakistan. **Jundullah is a twofer in this context, since it can help destabilize both sides of the Iran-Pakistan border.** Baluchistan has special importance because any oil pipeline linking Iran with China must go straight across Baluchistan. **Jundullah's false flag jihad is a means to make sure that strategic pipeline, which would help solve China's energy problem, is never built.** There is also no doubt that Jundullah functions as an arm of NATO, a kind of irregular warfare asset similar in some ways to the KLA of Kosovo. Rigi is reported by the Iranians to have met with Jop de Hoop Scheffer when he was NATO Secretary General. Rigi has also met with various NATO generals operating in Afghanistan. Who knows — he may have met with McChrystal himself, a covert ops veteran from Iraq. This capture comes at a moment when Baluchistan is the object of intense US-UK exertions. The current US-NATO offensive in southern Afghanistan targets Marjah and the rest of Helmand province, which directly faces Baluchistan. Many observers were puzzled when the US and NATO publicized the Marjah offensive in advance. Militarist talking heads like General Barry McCaffrey responded that the main goal of the Marjah offensive was not to destroy the Taliban, but to drive them out of the province. It was thus clear from the beginning that the real goal was to drive the Helmand Taliban fighters into Pakistani Baluchistan. Why? **A statement from the Afghan Taliban covered on the RIA Novosti web site suggests that the real goal of the US-NATO offensive in Marjah-Helmand is to attack Chinese economic interests in Pakistani Baluchistan, and especially the port of Gwadar, one of China's largest overseas projects. If the US can push the Taliban into Pakistani Baluchistan and into the area around Gwadar, they will have a pretext for militarization – perhaps through Blackwater mercenaries, who are already operating massively in Pakistan, or perhaps through direct US military involvement in the zone. US jackboots on the ground in Baluchistan would interfere mightily with Chinese economic development plans.** They would also allow the US to commandeer Gwadar as the home port of a new NATO supply line into southern Afghanistan, allowing the avoidance of the Khyber Pass bottleneck. **The US could also use Baluchistan as a springboard for bigger and better terror ops into Iran, electronic surveillance of Iranian activities, and so forth. The US and NATO had evidently planned a double envelopment of Baluchistan, with Taliban fighters from Helmand arriving from the north, while the Jundullah escalated their own activity on the ground.** Now that Rigi has joined his brother in Iranian jails, Jundullah has been decapitated, and the NATO strategy has consequently been undermined. Iran has bagged a dangerous terrorist foe. Another winner is Pakistan, where *The Dawn* celebrated the capture of Rigi as “a godsend” and “a lucky break” for Pakistan. By helping Rigi to fall into Iranian hands, **Pakistan may have finally found an effective way to counter the US-UK strategy, which notoriously aims at the breakup and partition of Pakistan. The coming Iranian trial of Rigi may go far towards exposing the real mechanism of terrorism in today's world, with the CIA sitting in the dock next to Rigi (Tarpley, 2010).**

**Title/Headline:** *U.S. Blamed For Pakistan Violence*

**Abstract:** An Islamist politician whose party lost several members in a suicide attack has blamed Pakistan's alliance with the US for the violence and urged Islamabad to break ranks in the war on terror. The comments showed the depth of anti-Americanism in Pakistan, whose support Washington considers key to stabilising neighbouring Afghanistan. In the past three days, attacks in Pakistan have killed some 74 people in a new wave of violence. A remote controlled bomb on Tuesday hit an army convoy as it travelled in the Hangu district close to the Afghan border, killing three soldiers and a civilian, said police official Farid Khan. The Jamaat-e-Islami party was hit on Monday when a suicide bomber apparently targeted police watching over a rally of the pro-Taliban group. Many of the 24 dead and 45 wounded were party loyalists, while two were officers, police official Khan Abbas said. **Although authorities blamed the Taliban in the immediate aftermath of the attack in Peshawar, the Islamist party's leaders have declined to do so, instead alleging the CIA or Indian intelligence were behind it. "It is because we have brought America's war to our own country,"** Sirajul Haq, a provincial party leader, said in Peshawar after attending funerals for some of the victims. **"Still, there is time to end this alliance with America" to avoid more bloodshed. No group has claimed responsibility for the attack, but that is not unusual in cases where many ordinary Pakistanis die.** Earlier on Monday, a bomb exploded outside a school run by a police welfare foundation, killing a young boy and wounding 10 people. And over the weekend, multiple bombs in the Kohat region elsewhere in the north-west killed nearly 50 people. **Taliban and al-Qaida militants based in the Afghan border region - who are fighting Pakistani police and the army - have carried out hundreds of attacks over the last three years. They have frequently targeted security forces, government officials and their supporters or family members in mosques, schools and markets, showing no concern for civilian casualties.** Peshawar, the capital of the north-west region, has been one of the hardest-hit cities because it lies close to the border area (Daily Express, 2010).

**Title/Headline:** *Al-Qaeda Terror Tape Proven Fraudulent Once Again*

**Abstract:** Investigators say no evidence of foreign involvement in Times Square car bombing, contradicting alleged Taliban tape released by dubious Pentagon front group. Everything about SITE indicates that it is nothing more than a dummy organization being used by the military-industrial complex to release staged Al-Qaeda videotapes as part of the ongoing propaganda offensive to justify the brutal, pointless and manufactured war on terror. **SITE miraculously were able to obtain the highly suspicious September 2007 Bin Laden video tape before it was released by the so-called Al-Qaeda group who had made it. A month before the release of this tape, SITE's sister organization IntelCenter was caught adding its logo to a tape at the same time as Al-Qaeda's so-called media arm As-Sahab added its logo, proving the two organizations were one and the same.** SITE has been positively endorsed by Blackwater USA, the infamous military contractor co-founded by former Navy Seal Erik Prince that was found to have been involved in several massacres of innocent Iraqi civilians. **SITE's continued existence relies on fleecing the American taxpayer by way of contracts with the U.S. government and constantly invoking and hyping the hugely exaggerated threat of alleged Al-Qaeda groups in the Middle East.**

**Having been caught once again releasing a suspicious video in which Middle Eastern terrorists claim responsibility for something that investigators say they had no involvement in**, Americans really need to start asking hard questions about why their tax dollars are being thrown at such a dubious outfit, not to mention how investigations into acts of terror are being confused and hampered by frivolous claims of responsibility that turn out to be baseless. The fact that the corporate media still treats such videotapes with presumed authenticity, despite the fact that they have been proven fraudulent on almost every occasion, tells you everything you need to know about the role of the establishment press in propping up the mirage of the war on terror. **Of course, now that foreign involvement has been dismissed, it's almost guaranteed that the amateurish botched bombing attempt in Times Square will now be blamed on "homegrown extremists" and used to increase the purge of any and all dissent against big government**, bolstering efforts to censor and silence passionate but peaceful criticism on talk radio and the Internet, a move being heartily cheered by liberals who cried foul when they were called traitors for criticizing the invasion of Iraq under Bush (Watson, 2010).

**Date:** May 6, 2010

**Title/Headline:** *Times Square Bomber Linked With CIA-Controlled Terror Group*

**Abstract:** A man arrested in Pakistan in connection with the Times Square car bombing attempt who had traveled with accused bomber Faisal Shahzad is a member of a terrorist organization that is controlled by British MI6 and the CIA. Sheik Mohammed Rehan, who was arrested on Tuesday in Karachi, "Allegedly drove with Shahzad from Karachi to Peshawar on July 7, 2009, in a pickup truck, authorities said. They returned to Karachi July 22. It is not known why they went to Peshawar and whether they met with anyone there," reports the L.A. Times. **Rehan is a member of the militant group Jaish-e-Muhammad, a terrorist organization that came to prominence in the mid-1990's and has been involved in attacks in the disputed Kashmir border region between India and Pakistan. The group also helped carry out the December 2001 attack on the Indian Parliament which brought India and Pakistan to the brink of nuclear war**, tensions that proved very lucrative for British and American arms manufacturers who sold weapons to both sides. "The December 2001 terrorist attacks on the Indian parliament — which contributed to pushing India and Pakistan to the brink of war — were conducted by two Pakistan-based rebel groups, Lashkar-e-Taiba and Jaish-e-Muhammad, both of which are covertly supported by Pakistan's ISI," writes Michel Chossudovsky. "Needless to say, these ISI-supported terrorist attacks serve the geopolitical interests of the US. They not only contribute to weakening and fracturing the Indian Union, they also create conditions which favor the outbreak of a regional war between Pakistan and India." Jaish-e-Muhammad, the group now emerging in connection with the Times Square incident, was founded by Ahmed Omar Saeed Sheikh, the 9/11 bagman who delivered \$100,000 from the United Arab Emirates to Mohammed Atta at the behest of General Mahmud Ahmed, then head of the ISI. **Mahmud Ahmed, the man who ordered Ahmed Omar Saeed Sheikh to bankroll the attacks on the Pentagon and the World Trade Center, was meeting with Republican Congressman Porter Goss and Democratic Senator Bob Graham in Washington DC on the morning of 9/11. In the days before and after the attack, Ahmed also met with CIA Head George Tenet as well as current Vice-President Joe Biden, then Chairman of the Senate Foreign Relations Committee.** In a report on Jaish-e-Muhammad's involvement in the murder of Daniel Pearl, who was investigating the ISI, the Pittsburgh Tribune-Review reported that the Pakistani government, "Believe that Saeed Sheikh's power comes not from the ISI, but from his connections with our own CIA." Former Pakistan President Pervez Musharraf also alleged that Sheikh was recruited by MI6 while studying in London for the effort to destabilize Bosnia. During the 1992-1995 Bosnia conflict, the CIA helped Osama Bin Laden and Al-Qaeda to train and arm Bosnian Muslims. **In 2002, the London Times reported that Sheikh "is no ordinary terrorist but a man who has connections that reach high into Pakistan's military and intelligence elite and into the innermost circles of Osama Bin Laden and the al-Qaeda organization."** Despite Sheikh's intimate involvement in numerous acts of terror as well as political kidnappings, including the 2008 Mumbai massacre, he was protected by both the CIA and British intelligence at every turn. To recap, this is the man who founded the group now emerging in connection with the botched Times Square bombing — a CIA and MI6 asset. "Experts believe Jaish-e-Muhammad still benefits from links with Pakistan's powerful government intelligence community. Some experts believe Pakistan's Inter-Services Intelligence agency facilitated the group's formation," states yesterday's L.A. Times article. As the vast majority of geopolitical analysts concur, the Pakistani ISI is virtually nothing more than a CIA outpost. **The ISI does nothing without the Agency giving its approval. The CIA has paid millions of dollars to the ISI since 9/11, accounting for no less than a third of the ISI's entire budget, despite the foreign spy agency's notorious history of funding and arming terrorist groups like Jaish-e-Muhammad and despite the fact that it bankrolled the 9/11 hijackers. Since the CIA has its fingerprints all over almost every Middle Eastern terror group, it's unsurprising that an Agency connection to the Times Square bomber has come to light. We've never come across a terrorist who wasn't trained, equipped, radicalized, entrapped, or provocateured by a western intelligence agency or a terror group controlled by a western intelligence agency** (Watson, 2010).

**Title/Headline:** *Taliban Blow Up 'U.S. Spies' In Pakistan*

**Abstract:** Taliban militants strapped explosives to two men accused of being U.S. spies and blew them up at a public execution in northwest Pakistan, intelligence officials and residents said on Friday. The killings took place on Thursday evening in North Waziristan, a lawless al-Qaida and Taliban sanctuary on the Afghan border where the United States has stepped up attacks with missile-firing drone aircraft, fuelling militants' fears of spies. **Five masked militants paraded the handcuffed men before dozens of people in the Datta Kheil area and accused them of passing information to the United States on targets for its CIA-operated pilotless drone aircraft.** "They strapped explosives around their bodies and then blew them up," a Pakistani intelligence official in the region told Reuters by telephone. **Militants have killed hundreds of people they suspect are spies for the United States or the Pakistani government over the past few years.**

They usually decapitate or shoot the suspects. Residents said this was the first time the militants had blown up suspected spies (Mujtaba, 2010).

**Title/Headline:** *Taliban Claim No ISI Relationship*

**Abstract:** The Taliban in Afghanistan reject a London-based report which depicts the relationship between them and Pakistan's intelligence agency as being "strong." The London School of Economics (LSE) claimed the relationship between the Afghan Taliban and Pakistan's Inter-Services Intelligence (ISI) is greater than previously estimated and that the intelligence agency "orchestrates, sustains and strongly influences the movement." On the same issue, the *Los Angeles Times* reported that "Pakistan's powerful intelligence agency not only funds and trains Taliban insurgents fighting the US-led troops in Afghanistan, but also maintains its own representation on the insurgency's leadership council." The LSE said that its report was based on interviews it had had with nine Taliban field commanders in Afghanistan between February and May of this year. The Taliban also alleged the report was concocted to "protect" American and British interests (Press TV, 2010).

**Title/Headline:** *Jundallah Leader Rigi Executed In Iran*

**Abstract:** Iran says it has executed ringleader of the Pakistan-based Jundallah terrorist group. Abdolmalek Rigi arrested while preparing to launch a new round of attacks on the country. Rigi was hanged on Sunday morning in Tehran's Evin prison upon a ruling issued by the country's Islamic Revolution Court, Fars news agency reported. The Jundallah ringleader was charged with 79 counts of various crimes including armed robbery, bombing operations in public places, armed attacks on the army, police personnel, and ordinary civilians, assassination attempts, disrupting regional stability, kidnapping and murder. Rigi's execution comes as Iranian security forces arrested him on February 23 in eastern Iran while he was on a flight from Dubai to Kyrgyzstan. Following his arrest, Iranian Intelligence Minister Heidar Moslehi said that Rigi was at an American base 24 hours before his capture, and that the United States had forged an Afghan passport for him. Rigi, accompanied by his lawyer, appeared in court for the first time on May 27 in the presence of the families of the victims killed by his terrorist group. In the court session, Iranian prosecutors demanded the death penalty for him. Following the demand, Rigi claimed responsibility for the crimes committed by his terrorist group, acknowledging that his acts were in violation of the Islamic and human regulations. After pleading guilty to all charges against him, the Jundallah ringleader went on to ask for forgiveness and made an appeal against the decision for his execution. Iran's Judiciary Chief Ayatollah Sadeq Amoli Larijani, however, rejected the appeal and ordered his execution. The terrorist leader had earlier confessed to having links with NATO officials in Afghanistan and foreign spy agencies like the CIA and Mossad. Jundallah, which is based in Pakistan, has carried out numerous bombings, assassination attempts, and terrorist attacks in Iran. One of the cited attacks left 40 people dead, including several senior commanders of the Islamic Revolution Guard Corps, in Iran's southeastern city of Pishin (Press TV, 2010).

**Title/Headline:** *CIA, Pakistan Locked In Aggressive Spy Battles*

**Abstract:** A Pakistani man approached CIA officers in Islamabad last year, offering to give up secrets of his country's closely guarded nuclear program. To prove he was a trustworthy source, he claimed he had spent nuclear fuel rods. But the CIA had its doubts. Before long, the suspicious officers had concluded that Pakistan's spy agency, the Inter-Services Intelligence, was trying to run a double agent against them. CIA officers alerted their Pakistani counterparts. Pakistan promised to look into the matter and, with neither side acknowledging the man was a double agent, the affair came to a polite, quiet end. The incident, recounted by former U.S. officials, underscores the schizophrenic relationship with one of America's most crucial counterterrorism allies. Publicly, officials credit Pakistani collaboration with helping kill and capture numerous Al Qaeda and Taliban leaders. Privately, that relationship is often marked by mistrust as the two countries wage an aggressive spy battle against each other. The CIA has repeatedly tried to penetrate the ISI and learn more about Pakistan's nuclear program; and the ISI has mounted its own operations to gather intelligence on the CIA's counterterrorism activities in the tribal lands and figure out what the CIA knows about the nuclear program. Bumping up against the ISI is a way of life for the CIA in Pakistan, the agency's command center for recruiting spies in the country's lawless tribal regions. Officers there also coordinate Predator drone airstrikes, the CIA's most successful and lethal counterterrorism program. The armed, unmanned planes take off from a base inside Pakistani Baluchistan known as "Rhine." "Pakistan would be exceptionally uncomfortable and even hostile to American efforts to muck about in their home turf," said Graham Fuller, an expert on Islamic fundamentalism who spent 25 years with the CIA, including a stint as Kabul station chief. That means incidents such as the one involving nuclear fuel rods must be resolved delicately and privately. "It's a crucial relationship," CIA spokesman George Little said. "We work closely with our Pakistani partners in fighting the common threat of terrorism. They've been vital to the victories achieved against Al Qaeda and its violent allies. And they've lost many people in the battle against extremism. No one should forget that." Details about the CIA's relationship with Pakistan were recounted by nearly a dozen former and current U.S. and Pakistani intelligence officials, all of whom spoke on condition of anonymity because they were not authorized to discuss the matter. An ISI official denied that the agency runs double agents to collect information about the CIA's activities. He said the two agencies have a good working relationship and such allegations were meant to create friction between them. But the CIA became so concerned by a rash of cases involving suspected double agents in 2009, it re-examined the spies it had on the payroll in the Afghanistan-Pakistan region. The internal investigation revealed about a dozen double agents, stretching back several years. Most of them were being run by Pakistan. Other cases were deemed suspicious. The CIA determined the efforts were part of an official offensive counterintelligence program being run by Gen. Ahmed Shuja Pasha, the

ISI's spy chief. Pakistan's willingness to run double agents against the U.S. is particularly troubling to some in the CIA because of the country's ties to longtime **Osama bin Laden ally Gulbuddin Hekmatyar and to the Haqqani network, a Pakistan-based Taliban faction also linked to Al Qaeda.** In addition to its concerns about Pakistan's nuclear program, the CIA continues to press the **Pakistanis to step up their military efforts in North Waziristan, the tribal region where Hekmatyar and Haqqani are based.** CIA Director Leon Panetta talked with Pasha about ISI's relationship with militants last year, reiterating the same talking points his predecessor, Gen. Michael Hayden, had delivered before him. Panetta told Pasha he had needed to take on militant groups, including those such as Hekmatyar and Haqqani, a former U.S. intelligence official said. But the U.S. can only demand so much from an intelligence service it can't live without. Recruiting agents to track down and kill terrorists and militants is a top priority for the CIA, and one of the clandestine service's greatest challenges. The drones can't hit their targets without help finding them. Such efforts would be impossible without Pakistan's blessing, and the U.S. pays about \$3 billion a year in military and economic aid to keep the country stable and cooperative. **"We need the ISI and they definitely know it,"** said C. Christine Fair, an assistant professor at Georgetown University's Center for Peace and Security Studies. **"They are really helping us in several critical areas and directly undermining us in others."** Pakistan has its own worries about the Americans. **During the first term of the Bush administration, Pakistan became enraged after it shared intelligence with the U.S., only to learn the CIA station chief passed that information to the British.** The incident caused a serious row, one that threatened the CIA's relationship with the ISI and deepened the levels of distrust between the two sides. **Pakistan almost threw the CIA station chief out of the country.** A British security official said the incident was "a matter between Pakistan and America." **The spate of Pakistani double agents has raised alarm bells in some corners of the agency, while others merely say it's the cost of doing business in Pakistan.** They say double agents are as old as humanity and point to the old spy adage: **"There are friendly nations but no friendly intelligence services."** "The use of double agents is something skilled intelligence services and the better terrorists groups like Al Qaeda, Hezbollah, provisional Irish Republican Army and the Tamil Tigers have regularly done. It's not something that should be a surprise," said Daniel Byman, a foreign policy expert at the Saban Center at Brookings Institution. **Nowhere is the tension greater than in the tribal areas, the lawless regions that have become the front line in what Panetta described on Sunday as "the most aggressive operations in the history of the CIA."** The area has become what's known in spy parlance as a wilderness of mirrors, where nothing is what it appears. **The CIA recruits people to spy on Al Qaeda and militant groups. So does the ISI. Often, they recruit the same people. That means the CIA must constantly consider where a spy's allegiance lies: With the U.S.? With Pakistan? With the enemy?** Pakistan rarely -- if at all -- has used its double agents to feed the CIA bad information, the former U.S. officials said. Rather, the agents were just gathering intelligence on American operations, seeing how the CIA responded and how information flowed. Former CIA officials say youth and inexperience among a new generation of American officers may have contributed to the difficulties of operating in the tribal regions, where the U.S. is spending a massive amount of money to cultivate sources. **After the 2001 terrorist attacks, the CIA dispatched many young officers to Pakistan and Afghanistan to recruit Al Qaeda spies. Young officers sometimes unwittingly recruited people who had been on Pakistan's payroll for years, all but inviting Pakistan to use their longtime spies as double agents, former CIA officials said.** The Pakistanis "are steeped in that area," Fuller said "They would be tripping over a lot of the same people." Many former CIA officials believe a lack of experience among agency officers led to the bombing in Khost, Afghanistan, last year that killed seven CIA employees. The CIA thought it had a source who could provide information about Al Qaeda's No.2, Ayman al-Zawahiri, who was believed to be hiding in the tribal lands. But the person turned out to be a double agent wired with explosives. Ironically, the CIA steered the source to Khost because officers were concerned ISI would spot him if they brought him to Islamabad for questioning or possibly even arrest him because he was an undocumented Arab. But experience isn't always the problem. **One example of how the suspicious relationship constrains operations was the CIA's base in the remote town of Miram Shah in North Waziristan. U.S. military and CIA officers worked with the ISI together there, under the protection of the Pakistani army, which kept the base locked down. The two intelligence agencies sometimes conducted joint operations against Al Qaeda but rarely shared information, a former CIA officer said.** Haqqani spies were well aware the CIA was working there, and the base frequently took mortar and rocket fire. Two former CIA officers familiar with the base said the Americans there mainly exercised and "twiddled their thumbs." Just getting out of the base was so difficult, U.S. personnel gave it the nickname "Shawshank" after the prison in the movie "The Shawshank Redemption." **The CIA closed the base last year for safety reasons. None of that tension ever spilled into the public eye. It's the nature of intelligence-gathering** (Fox News, 2010).

**Source:** Prison Planet, Paul Joseph Watson

**Title/Headline:** *CNN Host Calls Deadly Terror Bombings "Helpful" To NWO Agenda*

**Abstract:** CNN host Rick Sanchez let slip a telling admission in response to the deadly bombings in Uganda during his show yesterday, the fact that such attacks are **"helpful" for the military-industrial complex agenda to take over and occupy third world countries under AFRICOM, the United States African Command.** Speaking with a former CIA agent, Sanchez stated, **"You know what's interesting about this, in a strange way the event is helpful to the cause of those of us who know how sadistic these fundamental radical Islamic terrorists are and if it helps get the message out there that these are not the good guys then so be it"** Sanchez is brazenly admitting that deadly terror attacks like the bombings in Uganda only aid the military-industrial complex agenda to take over and occupy third world countries. **Given the fact that such attacks help the geopolitical agenda of the powers that control the United States, who has the strongest motivation to carry out the attacks?** We heard similar rhetoric back in 2008 when shocking excerpts of confidential recordings released under the Freedom of Information Act featured former **Defense Secretary Donald Rumsfeld talking with top military analysts about how a flagging Neo-Con political agenda could be successfully restored with the aid of another terrorist attack on America.** The tapes were released as part of the investigation into the Pentagon's "message force multipliers" program in which top military analysts were hired to propagandize for the Iraq war in the corporate media. In the audio recording, Lt. Gen. Michael DeLong bemoans shrinking political support for Neo-Con war plans on Capitol Hill and suggests that sympathy for the military-industrial complex agenda will only be achieved after a new terror attack. **Rumsfeld agrees that the psychological impact of 9/11 is wearing off and the "behavior pattern" of citizens in both the U.S. and Europe suggests that they are unconcerned about the threat of terror:**

**DeLong:** "Politically, what are the challenges because you're not going to have a lot of sympathetic ears up there until it [a terror attack] happens."

**Rumsfeld:** "That's what I was just going to say. This President's pretty much a victim of success. We haven't had an attack in five years. The perception of the threat is so low in this society that it's not surprising that the behavior pattern reflects a low threat assessment. The same thing's in Europe, there's a low threat perception. *The correction for that, I suppose, is an attack.* And when that happens, then everyone gets energized for another [inaudible] and it's a shame we don't have the maturity to recognize the seriousness of the threats...the lethality, the carnage, that can be imposed on our society is so real and so present and so serious that you'd think we'd be able to understand it, but as a society, the longer you get away from 9/11, the less...the less..."

In a similar vein to CNN's Sanchez, Neo-Con writer Stu Bykofsky expressed his yearning for "another 9/11" in order to "help America" restore its sense of "outrage and national resolve" in an August 2007 column for the Philadelphia Daily News. Lt.-Col. Doug Delaney, chair of the war studies program at the Royal Military College in Kingston, Ontario, told the Toronto Star in July 2007 that "The key to bolstering Western resolve is another terrorist attack like 9/11 or the London transit bombings of two years ago." The same sentiment was also explicitly expressed in a 2005 GOP memo, which yearned for new attacks that would "validate" the President's war on terror and "restore his image as a leader of the American people." In June 2007, the chairman of the Arkansas Republican Party Dennis Milligan said that there needed to be more attacks on American soil for President Bush to regain popular approval. These statements take on an even greater significance when we consider the fact that the U.S. military-industrial complex and the government has openly planned and even admitted to carrying out terrorist attacks as part of its geopolitical strategy. **Operation Northwoods, a plan signed by the Joint Chiefs of Staff at the Pentagon to to "kill innocent people and commit acts of terrorism in U.S. cities to create public support for a war" made headlines in May 2001 when it was revealed by investigative journalist James Bamford in his book Body of Secrets.** Operation Ajax, a CIA program of false flag terror to crush Iran's first democratic government in the 1950's, was responsible for the deaths of around 300 people. The CIA admits to the program on their own website. **Then there's Operation Gladio, a "decades-long covert campaign of terrorism and deceit directed by the intelligence services of the West — against their own populations" run by NATO in collusion with the CIA,** a campaign which included the 1980 bombing of the Bologna train station which killed 85 people. Given this dark history, it's no surprise to learn that terror attacks in the modern age are still being directed by the same forces. That's not to say that there aren't Islamic fundamentalists who are perfectly willing to commit violence, but every major terror attack we have investigated leads back to the same players. **The most recent example of this was the November 2008 Mumbai massacre, an attack overseen by David Headley, a Pakistan-born American national and a CIA agent who has been protected from questioning by American authorities since the attack. The consequences of the attacks in Uganda which killed 74 people will doubtless be used to further the integration of Africom, the African arm of the move towards global government under the United States African Command, and the events will also be exploited to pave the way for further U.S. military incursions and occupations of the continent in pursuit of controlling Africa's rich and untapped natural resources.** As CNN's Rick Sanchez rightly points out, this week's tragic terror attacks in Uganda will serve to be immeasurably "helpful" in the pursuit of both of these agendas (Watson, 2010).

**Source:** The Guardian, Munir Ahmed

**Title/Headline:** *Pakistani Spy Agency Denounces US Intel Docs*

**Abstract:** Pakistan's most powerful spy agency on Monday lashed out against a trove of leaked U.S. intelligence reports that alleged close connections between it and Taliban militants fighting NATO troops in Afghanistan, calling the accusations malicious and unsubstantiated. The reports, which were released by the online whistle-blower Wikileaks, raised new questions about whether the U.S. can succeed in convincing Pakistan to sever its historical links to the Taliban and deny them sanctuary along the Afghan border — actions that many analysts believe are critical for success in Afghanistan. **The U.S. has given Pakistan billions in military aid since 2001 to enlist its cooperation. But the leaked reports, which cover a period from January 2004 to December 2009, suggest Pakistan allows representatives of its Inter-Services Intelligence agency to meet directly with the Taliban to organize militant networks that fight U.S. troops in Afghanistan, and even hatch plots to assassinate Afghan leaders,** according to The New York Times. A senior ISI official denied the allegations, saying they were from raw intelligence reports that had not been verified and were meant to impugn the reputation of the spy agency. He spoke on condition of anonymity in line with the agency's policy. Maj. Gen. Athar Abbas, spokesman for

Pakistan's army, was not reachable for comment Monday on the intelligence reports. **The ISI is under the command of the army. Hamid Gul, a former head of the spy agency who is mentioned many times throughout the more than 91,000 intelligence reports released, also denied allegations that he was working with the Taliban.** "These leaked documents against me are fiction and nothing else," said Gul. Wikileaks released the documents, which include classified cables and assessments between military officers and diplomats, on its website Sunday. The New York Times, London's Guardian newspaper and the German weekly Der Spiegel were given early access to the documents. The Guardian also expressed skepticism about the allegations in the documents, saying "they fail to provide a convincing smoking gun" for complicity between the ISI and the Taliban. **But the U.S. has had little success convincing Pakistan to target Afghan Taliban militants holed up in the country, especially members of the Haqqani network, an al-Qaida-linked group that the U.S. military considers the most dangerous in Afghanistan. Pakistan helped the Taliban seize power in Afghanistan in the 1990s.** Although the government renounced the group in 2001 under U.S. pressure, many analysts believe Pakistan refuses to sever links with the Taliban because it believes it could be a useful ally in Afghanistan after foreign forces withdraw. White House national security adviser Gen. Jim Jones defended the partnership between the U.S. and Pakistan in a statement Sunday, saying "counterterrorism cooperation has led to significant blows against al-Qaida's leadership." Still, he called on Pakistan to continue its "strategic shift against insurgent groups." Husain Haqqani, Pakistan's ambassador to the U.S., said the documents "do not reflect the current on-ground realities." **The United States, Afghanistan and Pakistan are "jointly endeavoring to defeat al-Qaida and its Taliban allies militarily and politically,"** he said (Ahmed, 2010).

**Source:** Fox News, The Wall Street Journal

**Title/Headline:** *Report: U.S. Military Stops Lobbying Pakistan To Help Root Out Militant Group*

**Abstract:** The U.S. military has stopped lobbying Pakistan to help root out one of the biggest militant threats to coalition forces in Afghanistan, U.S. officials say, acknowledging that the failure to win better help from Islamabad threatens to damage a linchpin of their Afghan strategy. Until recently, the U.S. had been pressing Islamabad to launch major operations against the Haqqani network, a militant group connected to Al Qaeda that controls a key border region where U.S. defense and intelligence officials believe Usama bin Laden has hidden. The group has been implicated in the Dec. 30 bombing of a CIA base in Khost, a January assault on Afghan government ministries and a luxury hotel in Kabul, and in the killing of five United Nations staffers in last year's raid on a U.N. guesthouse. **But military officials have decided that pressing Pakistan for help against the group—as much as it is needed—is counterproductive. U.S. officials believe elements of Pakistan's intelligence agency, Inter-Services Intelligence, are continuing to protect the Haqqani network to help it retain influence in Afghanistan once the U.S. military eventually leaves the country.** U.S. officials say the support includes housing, intelligence and even strategic planning. During a trip to Pakistan last month, **Adm. Michael Mullen, chairman of the Joint Chiefs of Staff, chose not to raise the issue of an offensive against the Haqqani network—a departure from the message U.S. defense officials delivered earlier this year.** The U.S. also had intensified the pressure for Pakistani operations in North Waziristan in May after the attempted bombing of New York's Times Square was linked to militants in Pakistan. **Pakistan officials reject the U.S. conclusions about their efforts.** They say they are taking significant action against militants in North Waziristan. They say their intelligence service has severed all ties with the Haqqani network (Fox News, 2010).

**Source:** Veterans Today, Gordon Duff

**Title/Headline:** *Crash Of Airbus 320 Outside Islamabad Now Believed Hijacked , Heading For Nuke Facility*

**Abstract:** Informed sources in the Government of Pakistan have told Veterans Today that they are developing "hard evidence" indicating the Air Blue Airbus 320 that crashed July 28th outside Islamabad was a terrorist hijacking tied to rogue American security forces operating inside that country. Sources indicate that the plane crash was an unsuccessful hijacking attempt intended to crash into the nuclear weapons facility at Kahuta, outside Islamabad. Such an attack may have been blamed on India and would likely have led to retaliation which could easily have escalated to a nuclear exchange between these two nations that have spent decades at each other's throats. Suspensions were raised inside Pakistan's military and intelligence organizations when American military contractors employed by Blackwater/Xe showed up on the scene immediately after the crash, seizing the black box and "other materials." There is no confirmation that parachutes or electronic equipment had been removed when Blackwater/Xe security relinquished control of the crash scene to Pakistani investigators. Royal Television in Islamabad, owned by the brother of the head of Pakistan's powerful JI (Jamate Islami), the Islamic political party, has reported that investigations are underway tying American based contractors to the planning of the attack. **Pakistan's ISRP (Inter-Services Public Relations) has failed to confirm this but private sources indicate that an active investigation of these allegations is, not only underway but has established ties between an American**

group and the hijackers. Military and intelligence officials inside Pakistan, in concert with the American embassy, are withholding all official details of the investigation and are likely to continue doing so. **This same facility had been the subject of an armed penetration by American contractors, believed to be employed by the State Department, in 2009. Four Blackwater employees, armed and possessing explosives were arrested outside the Kahuta nuclear facility in 2009. The four, driving a Jeep 4x4 and possessing advanced surveillance and jamming equipment of Israeli manufacture, were intercepted 1.5 miles from the Kahuta nuclear facility.** The four spoke fluent Pushtu and were dressed in a manner as to resemble Taliban fighters. The order for their release, given by Minister of the Interior Rehman Malik, is an issue of considerable controversy between the civilian government in Pakistan and the powerful military. **The passenger jet with 152 on board slammed into a hillside in what was believed to be Pakistan's most serious air crash. At least 2 Americans were believed to be on board but, a month later, the US Embassy in Islamabad has left this unconfirmed. Reports received today, however, confirm that at least 5 Americans, military contractors said to be employed by Xe, may also have been on the craft but could not be identified as they had been traveling in local garb and had boarded with false identification. Xe is an American based military and intelligence contracting firm formerly known as Blackwater and has been the subject of considerable controversy for activities inside Pakistan.** Sources indicate that the attackers stormed the cockpit in a hijacking attempt. **The pilot is said to have jammed the flight controls, careening the Airbus 320 and all aboard into a hillside rather than allowing the plane to be used in a "9/11" type attack inside Pakistan or flown into Indian air space for a repeat of the 2008 Mumbai attack.** Pakistan has, at times in error, referred to American contractors employed by the Departments of Defense, State or the Central Intelligence Agency as Blackwater. However, it is believed the majority of such employees are, in fact, members of that organization or is derivative, Xe. **The same group, often criticized for irregularities in Iraq, has been contracted by the Central Intelligence Agency to operate Predator drones inside Pakistan, operations that have resulted in a significant number of civilian deaths and said by political leaders of several factions to do little but recruit terrorists (Duff, 2010).**

**Source:** Online Journal, Wayne Madsen

**Title/Headline:** *Blackwater/Xe Cells Conducting False Flag Terrorist Attacks In Pakistan*

**Abstract:** WMR (Wayne Madsen Report) has learned from a deep background source that Xe Services, the company formerly known as Blackwater, has been conducting false flag terrorist attacks in Pakistan that are later blamed on the entity called "Pakistani Taliban." Only recently did the US State Department designate the Tehrik-i-Taliban Pakistan (TTP), also known as the Pakistani Taliban, a terrorist group. **The group is said by the State Department to be an off-shoot of the Afghan Taliban, which had links to "Al Qaeda" before the 9/11 attacks on the United States.** TTP's leader is Hakimullah Mehsud, said to be 30-years old and operating from Pakistan's remote tribal region with an accomplice named Wali Ur Rehman. **In essence, this new team of Mehsud and Rehman appears to be the designated replacement for Osama Bin Laden and Ayman Zawahiri as the new leaders of the so-called "Global Jihad" against the West. However, it is Xe cells operating in Karachi, Peshawar, Islamabad and other cities and towns that have, according to our source who witnessed the U.S.-led false flag terrorist operations in Pakistan. Bombings of civilians is the favored false flag event for the Xe team and are being carried out under the orders of the CIA. However, the source is now under threat from the FBI and CIA for revealing the nature of the false flag operations in Pakistan. If the source does not agree to cooperate with the CIA and FBI, with an offer of a salary, the threat of false criminal charges being brought for aiding and abetting terrorism looms over the source.** **The Blackwater/Xe involvement in terrorist attacks in Pakistan have been confirmed by the former head of the Inter Services Intelligence (ISI), General Hamid Gul, according to another source familiar with the current Xe covert operations. In addition, Pakistani ex-Army Chief of Staff, General Mirza Aslam Beg, reportedly claimed that while serving as president, General Pervez Musharraf approved Blackwater carrying out terrorist operations in Pakistan. Blackwater has been accused of smuggling weapons and munitions into Pakistan. Earlier this year WMR reported that "intelligence sources in Asia and Europe are reporting that the CIA contractor firm XE Services, formerly Blackwater, has been carrying out 'false flag' terrorist attacks in Afghanistan, Somalia, the Sinkiang region of China, Pakistan, Iran, and Iraq, in some cases with the assistance of Israeli Mossad and Indian Research and Analysis Wing (RAW) personnel. A number of terrorist bombings in Pakistan have been blamed by Pakistani Islamic leaders on Blackwater, Mossad, and RAW. Blackwater has been accused of hiring young Pakistanis in Peshawar to carry out false flag bombings that are later blamed on the Pakistani Taliban, also known as Tehreek-i-Taliban Pakistan. One such bombing took place during the Ashura procession in Karachi last month. The terrorist attacks allegedly are carried out by a secret Blackwater-XE/CIA/Joint Special Operations Command forward operating base in Karachi. The XE Services component was formerly known as Blackwater Select, yet another subsidiary in a byzantine network of shell and linked companies run by Blackwater/Xe on behalf of the CIA and the Pentagon. On December 3, 2009, the Pakistani newspaper *Nawa-i-Waqt* reported: 'Vast land near the Tarbela dam has also been given to the Americans where they have established bases for their army and air forces. There, the Indian RAW [Research and Analysis Wing] and Israeli Mossad are working in collaboration with the CIA to carry out extremist activities in Pakistan.'** **The bombing of a CIA base in Khost, Afghanistan last December was blamed on the TTP but may have actually involved the covert Xe/CIA program to stage false flag attacks and something went drastically wrong with the operation that resulted in the deaths of seven CIA personnel, including the Khost station chief. The TTP was also linked to the failed Times Square "bombing" last May. Responsibility for the recent bomb attack of a pro-Palestine Shi'a rally in Quetta that killed 54 people was claimed by the Pakistan Taliban, but it was actually carried out by one of the Xe covert cells in the country, acting in concert with the CIA, Israeli Mossad, and Indian Research and Analysis Wing (RAW). The ultimate goal is to destabilize Pakistan to the point where it has no choice but to allow the Western powers to secure its nuclear weapons and remove them from the country in a manner similar to the procurement by the West of South Africa's nuclear weapons prior to the stepping down of the white minority government in the early 1990s. WMR has**

been informed that any American, whether or not he or she holds a security clearance, is subject to U.S. national security prohibitions from discussing the U.S.- sponsored terrorist attacks in Pakistan. In one case, a threat was made against an individual who personally witnessed the Xe/CIA terrorist operations but is now threatened, along with family members (Madsen, 2010).

**Title/Headline:** *CIA Runs 3,000-Strong Covert Army To Hunt Down Al-Qaida In Pakistan*

**Abstract:** America's CIA is running a 3,000-strong covert army to hunt down key leaders of Taliban and al-Qaida in not only Afghanistan but across the border in Pakistan. This heavily-armed irregular force manned entirely by Afghan personnel operates in small units called Counter- terrorism Pursuit Teams, the New York Times reported today quoting extracts from a new book 'Obama's wars' by journalist Bob Woodward. The stunning disclosures in the book which is making waves for laying bare the policy divisions and the personality clashes among the Obama advisors on the Afghan policy may complicate relations between Washington and Islamabad, the paper said. **"Firing missiles from unmanned drones patrolling over Pakistan's turbulent northwest tribal region at a rate that has outstripped the Bush administration's record is bad enough and now to have brigade size paramilitary units operating inside Pakistan marks a significant expansion of the covert war that the Obama administration has waged there,"** the book claims. These forces, the paper said, conducted clandestine raids into Pakistan as part of stepped-up campaign against al-Qaida and Afghan Taliban havens there. The CIA directs and funds the force, which is being billed as the best Afghan fighting force which has made major contributions to stability and security, the book claims. **"The covert army captures and kills Taliban fighters and seeks support in Tribal areas,"** the NYT reported and quoted Pentagon officials as saying that these Afghan units were closely working with American Green Berets to go after Taliban fighters. **According to the Woodward's book, by the end of 2009 strategy review, the President had concluded that the task in Afghanistan could not succeed without wiping out al-Qaida and Afghan Taliban havens operating with impunity in the border tribal areas of Pakistan.** The book says that Obama has remarked, **"We need to make clear to the people that the cancer is in Pakistan"**, so the CIA had turned into its classic old strategy of setting up of a lethal proxy unit. **The book says that such "kill teams" were also operating within Afghanistan to target groups like Haqqani network, closely linked to Taliban and al-Qaida.** The members of these hot pursuit units have been probably recruited from the private militias of warlords (The Times Of India, 2010).

**Title/Headline:** *C.I.A. Steps Up Drone Attacks On Taliban In Pakistan*

**Abstract:** The C.I.A. has drastically increased its bombing campaign in the mountains of Pakistan in recent weeks, American officials said. The strikes are part of an effort by military and intelligence operatives to try to cripple the Taliban in a stronghold being used to plan attacks against American troops in Afghanistan. **As part of its covert war in the region, the C.I.A. has launched 20 attacks with armed drone aircraft thus far in September, the most ever during a single month, and more than twice the number in a typical month.** This expanded air campaign comes as top officials are racing to stem the rise of American casualties before the Obama administration's comprehensive review of its Afghanistan strategy set for December. American and European officials are also evaluating reports of possible terrorist plots in the West from militants based in Pakistan. **The strikes also reflect mounting frustration both in Afghanistan and the United States that Pakistan's government has not been aggressive enough in dislodging militants from their bases in the country's western mountains.** In particular, the officials said, the Americans believe the Pakistanis are unlikely to launch military operations inside North Waziristan, a haven for Taliban and Qaeda operatives that has long been used as a base for attacks against troops in Afghanistan. Some Pakistani troops have also been diverted from counterinsurgency missions to help provide relief to victims of the country's massive flooding. **Beyond the C.I.A. drone strikes, the war in the region is escalating in other ways. In recent days, American military helicopters have launched three airstrikes into Pakistan that military officials estimate killed more than 50 people suspected of being members of the militant group known as the Haqqani network, which is responsible for a spate of deadly attacks against American troops.** Such air raids by the military remain rare, and officials in Kabul said Monday that the helicopters entered Pakistani airspace on only one of the three raids, and acted in self-defense after militants fired rockets at an allied base just across the border in Afghanistan. At the same time, the strikes point to a new willingness by military officials to expand the boundaries of the campaign against the Taliban and Haqqani network — and to an acute concern in military and intelligence circles about the limited time to attack Taliban strongholds while American "surge" forces are in Afghanistan. Pakistani officials have angrily criticized the helicopter attacks, saying that NATO's mandate in Afghanistan does not extend across the border in Pakistan. As evidence of the growing frustration of American officials, Gen. David H. Petraeus, the top American commander in Afghanistan, has recently issued veiled warnings to top Pakistani commanders that the United States could launch unilateral ground operations in the tribal areas should Pakistan refuse to dismantle the militant networks in North Waziristan, according to American officials. **"Petraeus wants to turn up the heat on the safe havens," said one senior administration official, explaining the sharp increase in drone strikes. "He has pointed out to the Pakistanis that they could do more."** Special Operations commanders have also been updating plans for cross-border raids, which would require approval from President Obama. **For now, officials said, it remains unlikely that the United States would make good on such threats to send American troops over the border, given the potential blowback inside Pakistan, an ally. But that could change, they said, if Pakistan-based militants were successful in carrying out a terrorist attack on American soil.** American and European intelligence officials in recent days have spoken publicly about growing evidence that militants may be planning a large-scale attack in Europe, and have bolstered security at a number of European airports and railway stations. **"We are all seeing increased activity by a more diverse set of groups and a more diverse set of threats," said Homeland Security Secretary Janet Napolitano before a Senate panel last week.** The senior administration official said the strikes were intended not only to attack Taliban and Haqqani fighters, but also to disrupt any plots directed from or supported by extremists in Pakistan's tribal areas that were aimed at targets in Europe. **"The goal is to suppress or disrupt that activity," the official said. The 20 C.I.A. drone attacks in September represent the most intense**

bombardment by the spy agency since January, when the C.I.A. carried out 11 strikes after a suicide bomber killed seven agency operatives at a remote base in eastern Afghanistan. According to one Pakistani intelligence official, the recent drone attacks have not killed any senior Taliban or Qaeda leaders. Many senior operatives have already fled North Waziristan, he said, to escape the C.I.A. drone campaign. **Over all the spy agency has carried out 74 drone attacks this year, according to the Web site The Long War Journal, which tracks the strikes. A vast majority of the attacks — which usually involve several drones firing multiple missiles or bombs — have taken place in North Waziristan.** The Obama administration has enthusiastically embraced the C.I.A.'s drone program, an ambitious and historically unusual war campaign by American spies. **According to The Long War Journal, the spy agency in 2009 and 2010 has launched nearly four times as many attacks as it did during the final year of the Bush administration. One American official said that the recent strikes had been aimed at several groups, including the Haqqani network, Al Qaeda and the Pakistani Taliban.** The United States, he said, hopes to "keep the pressure on as long as we can." But the C.I.A.'s campaign has also raised concerns that the drone strikes are fueling anger in the Muslim world. **The man who attempted to detonate a truck filled with explosives in Times Square told a judge that the C.I.A. drone campaign was one of the factors that led him to attack the United States.** In a meeting with reporters on Monday, General Petraeus indicated that it was new intelligence gathering technology that helped NATO forces locate the militants killed by the helicopter raids against militants in Pakistan. In particular, he said, the military has expanded its fleet of reconnaissance blimps that can hover over hide-outs thought to belong to the Taliban in eastern and southern Afghanistan. The intelligence technology, General Petraeus said, has also enabled the expanded campaign of raids by Special Operations commandos against Taliban operatives in those areas (Mazzetti & Schmitt, 2010).

**Title/Headline:** *Pak-Based British Militant May Have Worked For UK Police: Report*

**Abstract:** A Pakistan-based British Al-Qaida militant, who was part of a group plotting Mumbai-type attacks in Europe before his possible killing in a drone attack, may have worked as a police community support officer in the UK, raising fears that Osama bin Laden's group may be trying to infiltrate the security system here. Abdul Jabbar, said to be from the Manchester area, was part of a group of between 10 and 20 Islamist extremists linked to recent intelligence warnings about Mumbai-style attacks in Britain, France and Germany, 'The Sunday Times' reported. The group is based at militant camps in the tribal areas of North Waziristan in Pakistan. **Community support officers - so-called 'plastic policemen' - have fewer powers than ordinary officers, but they have access to police databases that could be invaluable to extremists planning an attack. Security officials said Jabbar was "a rising star" of Al-Qaida. But they have played down suggestions that any formal British branch of Al-Qaida had been set up or that Jabbar was directly linked to any plan to attack European public places. Three years ago it emerged that up to eight police officers and civilians were on a secret list of alleged radicals said to be working in the Metropolitan police and other forces. Some were thought to have attended training camps in Afghanistan and Pakistan.** According to the report, the list was drawn up amid fears that individuals linked to Islamic extremism were taking advantage of police attempts to increase staff from ethnic minorities. A spokesman for Greater Manchester police declined to comment on suggestions that a terror suspect had previously worked there as a community support officer. **"Everything is being handled by the security service," he said. A counter-terrorism official said it was a policy of Mi5 - Britain's internal intelligence service - never to confirm or deny such claims.** The Manchester link has emerged as part of an Mi5 investigation into a web of terrorists planning attacks in Europe. **The network is believed to be led by Al-Qaida commander called Ilyas Kashmiri, a one-eyed Pakistani who has reportedly boasted that he had sent cells to attack Britain and Germany. Intelligence officials disclosed ten days ago that they had received "credible but non-specific" information that simultaneous commando attacks were planned in European cities.** Extremists were thought to be organising an assault similar to the Mumbai attack in 2008 when 10 Pakistani terrorists armed with machine guns and grenades killed over 160 people. In response, the CIA had stepped up its drone attacks on suspected militants in remote camps in Waziristan. Attention has focussed on Jabbar, the British militant who is said to have been killed in a drone attack last month. He is thought to have been an associate of Kashmiri. **According to the report, electronic eavesdroppers had heard Jabbar, his brother and a group of eight German suspects discuss plans to obtain guns and explosives in phone calls to Britain and Germany.** Their "campfire chatter" was apparently intercepted by GCHQ, the Government listening centre in Cheltenham. Counter-terrorism officials said Jabbar, who is married and in his late 30s, attended a meeting of militants in May at which he spoke about setting up an "Islamic Army of Great Britain". **Other sources claimed that Jabbar, who had been living with his wife in Pakistan for at least a year, may have previously attended a mosque in the Manchester area. There is no indication whether he was the militant who had worked there as a community support officer (NDTV News, 2010).**

**Source:** Fox News, Catherine Herridge

**Title/Headline:** *EXCLUSIVE: Al Qaeda Leader Dined At The Pentagon Just Months After 9/11*

**Abstract:** Anwar Al-Awlaki may be the first American on the CIA's kill or capture list, but he was also a lunch guest of military brass at the Pentagon within months of the Sept. 11, 2001, terror attacks, Fox News has learned. Documents exclusively obtained by Fox News, including an FBI interview conducted after the Fort Hood shooting in November 2009, state that **Awlaki was taken to the Pentagon as part of the military's outreach to the Muslim community in the immediate aftermath of the attacks.** The incident was

flagged by a current Defense Department employee who came forward and told investigators she helped arrange the meeting after she saw Awlaki speak in Alexandria, Va. The employee "attended this talk and while she arrived late she recalls being impressed by this imam. **He condemned Al Qaeda and the terrorist attacks. During his talk he was 'harassed' by members of the audience and suffered it well,**" reads one document. According to the documents, obtained as part of an ongoing investigation by the specials unit "Fox News Reporting," there was a push within the Defense Department to reach out to the Muslim community. "At that period in time, the secretary of the Army (redacted) was eager to have a presentation from a moderate Muslim." **In addition, Awlaki "was considered to be an 'up and coming' member of the Islamic community. After her vetting, Aulaqi (Awlaki) was invited to and attended a luncheon at the Pentagon in the secretary of the Army's Office of Government Counsel."** Awlaki, a Yemeni-American who was born in Las Cruces, N.M., was interviewed at least four times by the FBI in the first week after the attacks because of his ties to the three hijackers Nawaf al-Hazmi, Khalid al-Mihdhar and Hani Hanjour. The three hijackers were all onboard Flight 77 that slammed into the Pentagon. Awlaki is now believed to be hiding in Yemen after he was linked to the alleged Ft. Hood shooter Major Nidal Malik Hasan, who e-mailed Awlaki prior to the attack. **Sources told Fox News that Awlaki, who is a former Muslim chaplain at George Washington University, met with the Christmas Day bomber Umar Farouk Abdulmutallab in Yemen and was the middle-man between the young Nigerian and the bombmaker. Awlaki was also said to inspire would-be Times Square bomber Faisal Shahzad. Apparently, none of the FBI's information about Awlaki was shared with the Pentagon.** Former Army Secretary Tommy White, who led the Army in 2001, said he doesn't have any recollection of the luncheon or any contact with Awlaki. **"If this was a luncheon at the Office of Government Counsel, I would not necessarily be there,"** he said. The Pentagon has offered no explanation of how a man, now on the CIA kills or capture list, ended up at a special lunch for Muslim outreach. After repeated requests for comment on the vetting process beginning on October 13th, an Army spokesman insisted Wednesday that the lunch was not an Army event. **"The Army has found no evidence that the Army either sponsored or participated in the event described in this report,"** spokesman Thomas Collins said. Collins also noted that the FBI document referred to the "Office of Government Counsel" but should read "Office of General Counsel." Collins said he believed the event was sponsored by the office of the Secretary of Defense. A spokeswoman there said she would look into it and get back to Fox News. **A former high-ranking FBI agent told Fox News that at the time Awlaki went to lunch at the Pentagon, there was tremendous "arrogance" about the vetting process at the Pentagon. "They vetted people politically and showed indifference toward security and intelligence advice of others,"** the former agent said (Herridge, 2010).

**Title/Headline:** *US Supports MKO Terrorists: Iran Cmdr.*

**Abstract:** A top commander of Iran's Islamic Revolution Guards Corps says the European Union is only providing an excuse for the US to remove the "Rajavi Cult" from its terror list. Brigadier General Yadollah Javani made the remarks on Saturday after the European Parliament issued a declaration on Thursday urging the removal of the Mujahedeen Khalq Organization (MKO) from Washington's list of Foreign Terrorist Organizations. **The European Union removed the MKO from its similar list of terrorist organizations in 2009.** Brigadier General Javani said that despite placing the MKO on its list of terrorist organizations Washington has not refrained from providing all out-support for the group over the past 30 years. **"The group has conducted a terror campaign from the safe haven provided by the West, the US and the Zionists,"** he was quoted by Mehr News Agency as saying. "In order to escape from the glaring inconsistency between the words and actions of the US, Washington needs an excuse and justification such as the request made by the European Union," he added. **The "Rajavi cult", as the MKO came to be known, was founded in Iran in the 1960s, but its top leadership and members fled the country some twenty years later, after carrying out numerous acts of terror inside the country. In the 1970s the group targeted American citizens in Iran, killing William C. Cottrell, Colonel Lewis L. Hawkins, Donald G. Smith, and Colonel Jack Turner in the country. They also masterminded the 1981 bombing of the offices of the Islamic Republic Party, in which more than 72 senior Iranian officials were killed, including the then Judiciary chief Ayatollah Mohammad Beheshti. After fleeing to neighboring Iraq, the terror cell provided security services to Saddam Hussein, fighting on his behalf during the eight-year Iraqi-imposed war on Iran. In 1991, Maryam Rajavi as then leader of the group's military forces directly ordered the massacre of Kurdish Iraqis in the north and the Shia population in the south (Press TV, 2010).**

**Source:** The Independent

**Title/Headline:** *Yossi Melman: Mossad, MI6, The CIA And The Case Of The Assassinated Scientist*

**Abstract:** Three events – not seemingly related – took place yesterday. The leaking of State Department documents, many of which deal with the world's concerns about Iran's nuclear programme; the mysterious assassination in Tehran of a top Iranian nuclear scientist and the wounding of another, and the appointment of Tamir Pardo as the new head of Mossad, Israel's foreign espionage agency. The attack on the two scientists, one of them mentioned as a top nuclear scientist working with Iran's Ministry of Defence, was part of these efforts. No organisation claimed responsibility but it is obvious, not just because of accusations by Iranian officials and Iran's media, that Israel was behind it. Most experts who follow Middle East politics and Mossad history would agree. **It is at least the fourth attempt to assassinate Iranian scientists linked with the country's nuclear programme in four years.** There were probably other attempts which did not hit the headlines. The attribution to Mossad is not because of the use of motorcycles, though in the past Mossad has been involved in similar operations. The best known one was in 1995 in Valletta, Malta, when a Mossad hit-team liquidated Dr Fathi Shkaki, the leader of the Islamic Jihad. **It has more to do with the policy of Mossad to deal a blow to Iran's nuclear programme. On top of assassinating nuclear scientists to terrorise others and force some to quit, it is believed that Mossad was also behind penetrating Iranian purchasing networks and selling them flawed equipment of its nuclear enrichment centrifuges and most recently by planting a virus which has damaged the nuclear computers at Natanz.** Yet despite these daring ploys, it is obvious to Israeli decision-makers as well as to western leaders that if a country is determined enough to develop nuclear weapons nothing would stop

it. But there's a link between them. **They are part of the endless efforts by the Israeli intelligence community, together with its Western counterparts including Britain's MI6 and America's CIA, to sabotage, delay and if possible, to stop Iran from reaching its goal of having its first nuclear bomb** (The Independent, 2010).

**Date:** November 29, 2010

**Source:** Press TV

**Title/Headline:** *'West Resorts To Terrorism Against Iran'*

**Abstract:** Following the terrorist attack on two Iranian lecturers, a Tehran university professor says the West is resorting to state terrorism to stop Iran's nuclear program. Unknown terrorists detonated bombs in the vehicles of Dr. Majid Shahriari and Professor Fereydoun Abbasi in separate locations on Monday morning between 7-8 a.m. local time. Shahriari was martyred immediately, but professor Abbasi and his wife sustained injuries and were transferred to hospital. Both men were professors at Shahid Beheshti University in Tehran. **"Those atomic physics professors were very active in Iran's peaceful nuclear energy [program]... during the past 7-8 year... the United States and the Zionist regime [of Israel] have been trying different methods to stop Iran's peaceful nuclear program,"** Dr. Foad Izadi said in an interview with Press TV on Monday. "Sanctions, threats of military attacks and different types of pressures have been exerted." **Izadi pointed to the murder of an Iranian physics professor a few months ago and said now the US and Israel are resorting to one of the tactics that both are familiar with -- state terrorism.** On July 12, Iranian nuclear physics scientist Dr. Massoud Ali-Mohammadi was killed in a remote-controlled bomb attack in the Iranian capital of Tehran. **Iranian security officials believe that the equipment and bomb system used in the attack were related to a number of foreign intelligence agencies, particularly the Israeli Mossad. Izadi called the UN resolution 1747 in which Abbasi's name was cited as a "nuclear scientist" a "hit list" and said the people on the list were being assassinated. "These assassinations will not have any effect, except that they will encourage the people in Iran to continue this path and make sure they can stand up to these aggressive governments,"** Izadi concluded (Press TV, 2010).

**Conclusion:** It is now clear that the War of Terror is a complete FRAUD. Anyone still believing that some Arab guys in caves brought down the Twin Towers or detonated the nuke at the Super Bowl is either in denial, borderline retarded, or under such mind-control and brainwashing that they are unable to distinguish between fact and fiction.

## The Nuclear Bible: Real “Truther” Solutions

**Intro:** It is long been said that the answer to every question is staring back at us in the mirror. While we cannot change the World overnight, the following “Truther Solutions” are essential in freeing your body, mind, and soul from control and manipulation by The Powers That Be.

**Pray:** Whether it's to God or Allah, there is only One Creator and you should give praise and thanks for this wonderful life. Pray for wisdom, guidance, and protection as we venture through this extremely evil period in history

**Drink Good Water:** Our bodies are comprised of over 90% water, and thus it is imperative that you locate a good water source which is free of fluoride and other toxins. Once your body is able to detox, you will have more energy and you will be able to think more clearly.

**Eat Real & Organic Food:** Aside from water, food is the most important change you can make in you and your family's life. As Hippocrates once said, “Let food be thy medicine, thy medicine shall be thy food.” With all the additives, preservative, genetic modification, and outright poison in today's food supply, there is no better time to eat organic and healthy.

**Shop Local:** Now that you are eating organic, you will need to shop for food at your local Farmers Market. By shopping local farms, stores, restaurants and retailers, you are investing money into your local economy while in fact boycotting the corporate power structure.

**Boycott Corporations:** The time to boycott corporations that hurt America's Main Street like Wal-Mart, McDonalds, and Coke is long overdue. When you buy from a corporation, you are in essence enabling that corporation to live while effectively killing your own local economy and future. There is a great chance that the same product is available locally and your dollars don't support corporation and their overseas sweatshops and child labor.

**Vote With Your Money:** Every time you buy something, you are essentially voting with your money. Money is power, and you alone have the power to spend your money on food, clothing, entertainment, and investments that do not support the Globalist agenda. Lastly, when you do vote for real on November 2, do not vote unless your car is full. Pick up your family, your friends and your relatives, and educate them on the way to the polls about the Left-Right paradigm and which politicians and ballot propositions are Constitutionally friendly.

**Turn Off The TV:** Television is probably the single greatest tool that the Globalists have. By boycotting their television programs, their ratings along with their advertising budgets will wither and fail. There are also a number of diseases and negative health affects attributed to the watching of television. Turn off the fear and propaganda, and enjoy the beautiful nature outside that our Creator has made for us.

**Don't Take Medication:** The medical establishment has long since sold out to Big-Pharma, and the subsequent poisoning (soft-kill) of the American People is under way. Humanity is in a perpetual haze of drugged by a cocktail of various poisons that are labeled as medications. The fact is that any non-natural medication will, in time, cause at least one side-effect, thus rendering the original medication effectively useless. There is a natural remedy to ALL diseases, given the right combination of good nutrient intake versus harmful toxin intake. Your Creator made you complete, now give your body the correct nutrition to defend itself.

**Never Vaccinate For Any Reason:** Until there is clear accountability from Big-Pharma regarding the ingredients of today's vaccine, there is too great a risk to vaccinate anybody for anything. In theory, vaccines could help humanity cope with disease, but the WHO (World Health Organization) and other Government organizations have allowed Big Pharma to spike the vaccines with thimerosal (mercury), squalene, and a host of other mutant ingredients. Please log onto [www.NVIC.org](http://www.NVIC.org) for more information.

**Boycott The U.S. Military:** The American military has been hijacked by the Globalists who are sending our good men and woman into the meat grinders of Iraq and Afghanistan, all based on the lie that is 9/11. The "Coalition of the Willing" are reaping hundreds of billions in illegal opium trade while sending millions of people to prison for smoking cannabis. If possible, help those you know in the Military get out and make sure that nobody you know ever joins any branch of service. Aside from the dangers of war, the vaccines currently being given to the troops a potential health hazard as well. Please Google the documentary entitled *Beyond Treason* for a look at the dark side of the U.S. Military.

**Research Hemp:** Little known to most people, the Hemp plant has been an economic staple of America since its inception and was used in first U.S. flag, U.S. Constitution, U.S. Bill of rights, and was even used for Colonial money. Hemp has over 50,000 uses ranging from food, medicine, supplements, clothing, energy, housing, plastics, explosives, and essential oils. This plant grows on roughly 90% of the Earth's surface and is the only real "green" option, being 100% recyclable, 100% renewable, and 100% environmentally friendly.

**Support & Use Public Transportation:** The biggest tool for control that the Globalists have, aside from the television, over the American people is their beloved automobiles. While cars serve their purpose, so does reliable public transportation such as high speed rail (Maglev), trains, trams, and electric busses. The bottom line cost to Americans: 1) Billions of U.S. dollars exported via gasoline sales to shadowy countries in the Middle East, 2) Hundreds of millions given to Globalist insurance companies for bloated policies, 3) Cars that lose value quickly and cost a lot of money to maintain, 4) Ticket/Citation fees and licenses are eliminated, as well as the need to carry identification 5) Millions of Americans have died in auto accidents with millions more suffering from debilitating injuries. End the madness.

**Never Self-Censor:** Above all, you must not censor yourself or anybody else at any time or at any place. As Martin Luther King Jr. once said, "Silence is Betrayal." The Globalists are counting on you NOT to talk about the Truth to others. Once people have their suspicions confirmed publicly, they are more likely to vocalize their feelings to others, and thus the dominoes begin to fall. Lastly, if people are not open to the truth, move on and begin to surround yourself with likeminded people that care about Truth, Love, and Humanity.

**Protest 24/7:** Whether it's on the street or on Facebook, make your voice heard. Chances are millions, if not hundreds of millions, of people on the planet feel the same way you do. Vocalize your anger frustration every chance you get. If you don't use your 1<sup>st</sup> Amendment right to Free Speech, you just might lose it. One look at the current legislation being proposed in Congress and you'll realize that the time to speak up is now! Check Meetup.com for local protests and groups to join, and remember that protesting is one of the most invigoration and uplifting things you can do in your lifetime.

**Save The Internet:** By all means possible, the Internet, as it currently exists, must be saved and maintained. If We The People are going to bring about positive change we must work together to maintain the Internet status quo. Humanity must rise to the occasion and keep the Internet free and clear of ANY government or corporate hands that want to meddle or stop Humanity's Awakening.

All works of love,  
are works of peace.

**Love One Another:** The greatest thing you can do for yourself and for Humanity is to show love and compassion to your friends, family and loved ones, but most importantly to strangers who happen to be a different color, religion, or creed. Love is impossible to defend, disarm, or defeat. Each one of us has endless love, and the sooner we start using it the better.

**Conclusion:** We are ALL One. Any person, religion, or government that tells you different is working for the Dark Side. The only way that The Powers that Be can stay in power is by humanity fighting with each other instead of coming together for the common good.

## The Nuclear Bible: Sports Hero Barry Soetoro

**Intro:** In order to effectively respond to a nuclear terror attack on the Super Bowl, U.S. President Barack Obama aka Barry Soetoro (given name) must act the part of a diehard sports fan. To Obama's credit, he has been very busy in this regard. With unprecedented visits to the White House, and countless TV appearances on sports related programs, Obama is the greatest sports fan to ever grace the Oval Office.

**Title/Headline:** *NFL To Revamp Shield With Redesigned Logo*

**Abstract:** The National Football League is launching a makeover of its red, white and blue "NFL Shield" logo that adorns everything from player jerseys to fan T-shirts and hats. The league is creating a leaner, meaner version of the iconic logo that will debut at the NFL draft in April, 2008. The revamped shield will be slightly taller and thinner, with a new football, fewer stars and darker colors, says Lisa Baird, the NFL's senior vice president of marketing. **The redesign marks the first changes to the shield since 1980. At the NFL's annual meeting this spring, commissioner Roger Goodell talked about the NFL Shield as the "envy of the sports world."** The league has been careful to make an "evolutionary, not a radical change," says Baird. **The new shield features eight stars (representing the eight AFC and NFC divisions) vs. 25 on the current logo. Why 25? It's a mystery.** After researching the shield's origins, the designers could find no reason for 25 stars, says Jaime Weston, director of brand and creative operations. The shield logo was first used around 1940, two decades after the NFL's founding in 1920. The football at the center has been redesigned to resemble the ball atop the Vince Lombardi championship trophy, says Baird. It replaces the old-fashioned pigskin nicknamed the "Hamburger" inside league offices. NFL vendors will probably thank the league for switching to fewer stars. Some vendors, without permission, have used fewer stars rather than shoe-horning 25 tiny stars into smaller shields on hats and T-shirts. **Tinkering with one of the country's most powerful and ubiquitous sports brands will be a risky and expensive business.** NFL sponsors such as Reebok, Riddell, Wilson and EA Sports will have to switch shields on everything from uniforms (players wear three logos at the neck and waistlines and on the helmet) and licensed merchandise to the official "Duke" game ball and *Madden* video game. Even groundskeepers will have to adopt the new shield at NFL stadiums. But Baird believes the cleaner, more modern symbol will "pop" better during TV telecasts. The less-busy logo will also show up better on "third screens" increasingly used by sports fans: cellphones, laptops, iPods and PDAs. During testing with focus groups, consumers liked the switch to eight stars for eight divisions, she says. **"People felt that made more sense than tying in to 32 teams,"** says Baird (McCarthy, 2007).

**Although the NFL says that the 4 and 4 star logo is representative of the four divisions within the NFC and AFC Conferences, the NFL is seriously looking into franchises in Europe, so that particular concept will only be valid for a couple of years. More than likely, the 4 and 4 is representative of the 44<sup>th</sup> President of the United States: Barack Hussein Obama.**

**Title/Headline:** *Obama Hooks 'Em In Visit With Longhorns*

**Abstract:** So, Obama, can the Longhorns win another national championship? **"Yes, they can."** Hours before he returns to the UT campus for tonight's debate with Sen. Hillary Clinton, Sen. Barack Obama paid a courtesy call to Mack Brown and his Longhorns. It might seem like an odd pairing, given Brown's repeated claims to be agnostic when it comes to politics. Brown has said that he doesn't even vote (in anything other than the coaches poll), lest he be seen as straying too close to the political fire. **Then again, his wife has donated to Obama's campaign, giving \$500 last March long before Obama's bandwagon had filled with supporters. Perhaps Mack was lobbying Obama about that border fence idea we mentioned in today's paper — a border fence to keep the Oklahoma recruiters out.** Here are the photos from Obama's visit to the land of the burnt orange and the home of the brave. Given the senator's eagerness to flash the hook 'em sign, his campaign just might find itself doing a little damage control among the Aggie vote. **Oh, who are we kidding. The Aggies are all Republicans, aren't they governor?** (The Statesman, 2008).

**Title/Headline:** *Obama Hoops It Up With North Carolina Players*

**Abstract:** For all his basketball skills, Barack Obama was out of his league. The Democratic presidential candidate played hoops with the University of North Carolina team on Tuesday, a Final Four squad that cut the 46-year-old some slack. **"These guys move very fast,"** puffed Obama, as he raced up and down the court with the much younger and much bigger college players, many of whom dwarfed the 6-foot-2 Obama. The Illinois senator is a workout enthusiast, and basketball is his chosen game. He decided to open his day with the Tar Heels, including star Tyler Hansbrough, a 6-foot-9 All-American who spent part of his morning guarding Obama. At one point, Obama slipped past Hansbrough for a layup, which rimmed out. Ever the realist, Obama recognized what had happened. **"Hansbrough went easy on me,"** Obama said. **"I thought I had it."** Obama often plays pickup basketball games with local backers. He toured the Tar Heel sports complex with Coach Roy Williams, and conceded he had moved up a notch. **"Let me tell you, these guys are big and fast,"** said Obama, catching his breath on the sidelines. In his March NCAA tournament picks, Obama selected North Carolina, but the Tar Heels lost to eventual champion Kansas in the semifinals. Though the players, who were relishing banging on each other, gave Obama his shots, he was unable to score. At one point he dished off a nifty, behind the back pass that nearly set up an assist. Neither side kept score (MSNBC, 2008).

**Title/Headline:** *Obama Speaks To 8,000 At University Of Oregon*

**Abstract:** After introductions by Oregon men's basketball coach Ernie Kent -- along with U.S. Reps. Wu and DeFazio -- Barack Obama entered to thunderous applause from a crowd estimated by fire officials at about 8,000. Bruce Springsteen's "The Rising" boomed over a sound system. Obama walked out of the The Jordan Schnitzer Museum of Art and onto the Memorial Quadrangle at dusk, around 8:10 p.m. It was a dramatic scene, Obama against a backdrop of the museum's ornate brick exterior and a riser full of supporters, facing a riser of television cameras and a long, grassy mall of standing supporters. As Obama began, he noted that he had been introduced by the men's basketball coaches at Oregon and Oregon State at different speaking engagements. **"That's a sign of being able to bring anybody together in this country."** Obama went on to speak of the failed policies of President George Bush and the war in Iraq. When Obama noted the high price of gas, he said, **"You're riding your bike, aren't you?"** -- to a big cheer, of course (Bachman, 2008).

**Title/Headline:** *Top Obama Aide Goes From Duke Basketball Court To DC*

**Abstract:** On the campaign trail, there are hundreds of young staffers who have been working their entire lives to get a job in the White House. **And then there's Reggie Love. At 26, Love, a former Duke University basketball and football star isn't exactly sure how he ended up as one of Barack Obama's most indispensable aides on the trail this year. As Obama's "body man,"** he has spent almost every hour of every day with the presumptive Democratic nominee for the last 15 months. **He makes sure Obama gets up on time in the morning, gets in the shower and has breakfast.** He makes sure he has his daily briefing books and list of fundraisers or super delegates to call that day. **He makes sure he gets to bed at night. In between, he does a thousand other tasks that busy presidential candidates like Obama cannot do for themselves.** Love isn't quite sure how he ended up here. That's remarkable in an arena populated by young, careerist politicians, the former class president-types who have been angling for positions like his since high school. **Love, a Charlotte native, majored in political science at Duke University. But until he fell backwards into a job in Obama's senate office in Washington in early 2006, he didn't expect to actually work in politics. "Before I started working for Barack, I was very cynical**

about politics," he said in an interview earlier this month. He hoped to become a professional athlete. And while many people harbor such dreams unrealistically, Love almost made it - and still might, at least overseas. **He was never the best player on Duke's basketball team during his run from 2000 to 2005. Playing forward and center, though, he was a key role player during a stretch where Duke won a national championship and several Atlantic Coast Conference championships. On Duke's sub-par football team, Love stood out. As a 6-foot four-inch, 225 pound wide receiver, he was good enough to try out for two NFL squads, the Dallas Cowboys and the Green Bay Packers, though he missed the cut for both.** In 2006, he was considering entering a training program for a Wall Street investment bank, when a friend alerted him to an opening in Obama's senate office in Washington. **He got the job, and when Obama decided to run for president, Love moved on with him.** Mentally, he says, the last 15 months on the campaign trail have been like playing four straight seasons of college sports. Physically, he's feeling better than he did during the bruising NFL training camps. In an interview with the Chicago Tribune, Obama pointed out that one of the body man's most important roles is making sure the candidate isn't overwhelmed by demands to call fundraisers, or meet local supporters or read a draft of a speech. Love's temperament is suited for the job, he said. **"People ...want me here or want me there, or are making requests, or are wanting some phone call out of me. Having somebody who is a good people person is really important,"** he said of Love. At a campaign rally in Charlotte, Love's hometown, the weekend before the North Carolina primary, **Obama coaxed a reluctant Love onto the stage, calling him "one of the staffers I love the most." "He is there, day in, day out, never complains, has always got a cheerful attitude," Obama told the crowd. "He is ...going places."** Basketball rivalries within North Carolina are fierce, and hatred of Duke is intense in many pockets. Love said he didn't meet a single person who said they would not vote for Obama because of his decision to bring a Blue Devil on staff. "Even though the Duke-Carolina rivalry is fierce, there's some civility to it. Much more so than with the (University of) Maryland fans," he said. The body man position has been around for years, but only gained notoriety with the television show "The West Wing" that made a lead character of the president's body man, Charlie Young. The job is both exhausting and frequently repetitive, and includes lots of menial jobs. At a soul food restaurant in Greensboro on the eve of the North Carolina primary, **Love held Obama's box of hot wings while the candidate worked the crowd. The pressure is intense. He and other staffers are surrounded by hundreds of members of the media, so the potential of accidentally saying something to damage the campaign is real.** Even seemingly trivial things get reported. For example, earlier this month, Obama, Love and other staffers went to the back of the campaign plane to challenge members of the press to a game of Taboo, a word association game. Players offer clues to teammates to get them to guess words. **One of the clues Love came up with, "where gay people buy clothes" was reported by dozens of news outlets.** Obama guessed Abercrombie & Fitch. The answer was the Gap. Despite the drawbacks, the benefits of the job are many. The body man, in both the White House and on the campaign trail, gets to see history being made up close. **And there are fun parts. Love, Obama and other staffers play basketball on the road when time allows. And it opens doors. Blake Gottesman, President George W. Bush's body man for most of his tenure, left the White House in 2006 and was granted admission to Harvard's graduate business school despite his never having received an undergraduate degree.** It helped Doug Band, who did the job for President Clinton, run in circles that led to his dating supermodel Naomi Campbell, according to the Washington Post. Before the campaign started, Love had considered moving overseas to join a professional basketball league after it ended. Now, he's worried that he might be too old. **He acknowledges that if Obama wins, working in the White House would be a nice perk. Even if he never expected to end up there** (Mussenden, 2008).

**Date:** October 3, 2008

**Source:** Word Press, Kamryn Love

**Title/Headline:** *Obama Receives Michigan State University Honorary Jersey*

**Abstract:** "Standing before an estimated 20,000-person crowd that would have overfilled Breslin Center by 3,720 people, Democratic presidential candidate Barack Obama received a Spartans basketball jersey with his name and the number "08" on the back Thursday afternoon. He modeled it for the audience that blanketed Adams Field off West Circle Drive to a thunderous applause, just before he delved into issues such as the economy, energy and education. "Everybody has to vote. You have no excuses," Obama told the crowd, including some members who had arrived as early as 9 a.m. for the 2:30 p.m. speech. "But you have to go get cousin Pookie, you know, Ray-Ray, who's sitting on the couch loafing around. You have to get them registered and get them out to vote as well." Obama might as well have been in Breslin Center, as he led a raucous **"Go Green, Go White" chant and paid homage to Earvin "Magic" Johnson, who led MSU to the national basketball championship during Obama's senior year of high school in 1979**" (Love, 2008).

**Date:** November 5, 2008

**Source:** ESPN, Lester Munson

**Title/Headline:** *Change Is Coming To Sports, Too, Under Obama*

**Abstract:** It will take some time, maybe 1,000 days, to measure the full impact that President-elect Barack Obama will have on the world of sports, but we can already circle a couple of upcoming dates and make some educated guesses about his role in the games we play and watch. **On the afternoon of the 76th day of his presidency (Monday, April 6), Obama will be back on Chicago's South Side to join fellow White Sox fans at U.S. Cellular Field for Opening Day against the Kansas City Royals. And on the 255th day of his presidency (Friday, Oct. 2), he will be in Copenhagen, Denmark, telling the members of the International Olympic Committee why the 2016 Summer Olympics must be in Chicago.** Obama's allegiance to the Sox (he does not hesitate to express his scorn for fans of the Chicago Cubs) and his support for an Olympics in Chicago are absolute. In an interview with ESPN's Stuart Scott that aired on "SportsCenter" in August, Obama was asked who he would root for in a Cubs-White Sox World Series. This was his answer: **"Oh, that's easy. White Sox. I'm not one of these fair-weather fans. You go to Wrigley Field, you have a beer; beautiful people up there. People aren't watching the game. It's not serious. White Sox, that's baseball. South Side."** On other issues facing the sports industry, Obama views are a bit less certain.

However, a review of his campaign statements and position papers as well as ESPN.com interviews with his friends and former colleagues at the University of Chicago indicate that an Obama administration is likely to:

- Produce major tax increases for team owners and players;
- Slow sales of professional teams;
- Increase the powers of player unions;
- More vigorously enforce the requirements of Title IX;
- And begin to resolve the serious clashes between sports cable networks such as the NFL Network and the Big Ten Network and cable providers such as Comcast.

**Obama's views on other critical sports issues, including performance-enhancing drugs and stricter controls on the powers and the finances of the NCAA, are unknown. Experts agree that Obama's support for Chicago's 2016 Olympics bid will be critical and that his presence in Copenhagen could easily win the Olympics for Chicago.** Former British prime minister Tony Blair's charismatic presentations were said to have led the IOC to pass over Paris, which seemed to have the leading bid after New York City's attempt to get the Games collapsed, and give the 2012 Olympics to London. Chicago's competition for the 2016 Games includes Madrid, Spain; Rio de Janeiro, Brazil; and Tokyo. Obama, who appeared at a downtown Chicago rally in support of the bid in June shortly after he won the Democratic nomination, could have an even greater impact on the IOC than Blair did, according to Olympics experts. **"He will be the rock star of the Copenhagen meeting,"** observes Allen Sanderson, a professor of sports economics at the University of Chicago. **"We saw the crowd he drew in Berlin, and he will remain in the glow of an historic election triumph when he asks for IOC votes."** In late July, some 200,000 people attended an Obama speech in front of Berlin's Victory Column, designed in part to demonstrate his desire to improve America's image in Europe and the rest of the world. Japanese Olympic officials already have expressed their concern that Obama could turn the tide in favor of Chicago when the IOC votes in October. **"Mr. Obama is popular and good at speeches, so things could get tough for Japan,"** said Tomiaki Fukuda, a senior Japanese Olympic Committee board member. If Sen. John McCain had won the election, the U.S. bid to play host to the 2016 Olympics might have been negatively affected. Many IOC members remember McCain's scathing investigation of the bribery scandal involving IOC members who helped award the 2002 Winter Olympics to Salt Lake City. Two members of the Salt Lake City bid committee were indicted, and McCain's investigation led to major changes in the IOC and the U.S. Olympic Committee. Many IOC members remain bitter over McCain's aggressive efforts for reform. **An Olympics in his home city of Chicago in the late summer of 2016 would be a grand finale for an Obama presidency that would be about to wind down if he were re-elected to a second term.** Of more importance than the 2016 Olympics, of course, is the state of the economy, and Obama's attempts to restore it to health could have far-reaching effects on sports. **"The sports industry needs and wants the economy back,"** says Marc Ganis, a consultant in sports finance who has worked for numerous professional teams and leagues and most recently quarterbacked the deal that produced the new Yankee Stadium. **"Fans must be able to buy tickets and cable television packages. Businesses must be able to buy sponsorships and skyboxes. The industry may be recession-resistant, but it is not recession-proof. We need a return to health."** Part of the Obama prescription for the economy could hurt both owners and players. Throughout his campaign, **Obama promised that he would increase taxes on individuals who earn more than \$250,000 per year. That would take money out of the pockets of wealthy team owners and well-paid players. The Major League Baseball minimum salary, for example, will be \$400,000 next year. "It will be an increase that they will notice,"** Sanderson observes. Already, a number of baseball agents are saying they might attempt to have their free agents signed, sealed and delivered to new teams by Jan. 1. Among Obama's economic proposals is an increase of the top federal income tax rate from 35 percent to 39.6 percent, but signing bonuses paid before the start of the new year likely wouldn't be subject to the new rate. Too, Obama's campaign promises about capital gains and inheritance taxes, if and when implemented, will complicate the sale and transfer of team ownerships. **Wayne Huizenga, the owner of the Miami Dolphins, told the South Florida Sun-Sentinel recently that he will attempt to complete the sale of his team to Steve Ross, a New York real estate mogul, before the end of 2008 to avoid Obama's promised increase in the capital gains tax.** Obama's economic plan calls for an increase in that tax from 15 percent of the investment gain to 20 percent, a hike of one-third. An Obama-promised increase in estate taxes could also provide problems for team owners. If the tax is increased, the death of a principal owner could lead to serious problems for a family trying to keep control of the team. **The NFL's St. Louis Rams, according to some reports, are for sale as the result of the impact of inheritance taxes at current rates.** In addition to his changes in the tax structure, Obama may seek changes in the laws that govern unions. After enjoying strong support from organized labor during his campaign, Obama can be expected to increase the leverage of player unions through appointments to the National Labor Relations Board, the forum that regulates collective bargaining between players and owners. **He may also introduce legislation that would ban replacement workers, a reform that has long been a goal of the labor movement. Under Presidents Bill Clinton and George W. Bush, the NLRB was slow to consider and even slower to decide cases that involved allegations of unfair bargaining practices on the part of team owners.** Union representatives, who requested anonymity because of the sensitive nature of the issues, told ESPN.com that they look forward to a more aggressive NLRB that will be quick to decide player complaints against team owners. **As early as last summer, the late Gene Upshaw, the leader of the NFL Players Association who died in August, said he was looking forward to a President Obama introducing legislation that would ban replacement workers. Known to labor activists as "scabs," replacement workers are hired to replace striking workers, a device that destroyed an Upshaw-led strike in 1989.** Upshaw was anticipating a radically different situation when the NFL's current collective bargaining agreement expires in 2011. In addition to the changes he will enact on the professional level, Obama's approach to governing can be expected to have some indirect impacts in college sports. **Coaches, athletes and administrators in a number of so-called minor sports, such as wrestling, have long been wary that their sports will be eliminated to meet the equality of gender requirements of Title IX, and they cannot be happy about Obama's election.** With President Bush in the White House and Dennis Hastert, a former wrestling coach, serving as Speaker of the U.S. House of Representatives, participants in those sports had some hope that Title IX requirements might be diluted. Bush and his staff looked hard at Title IX and the possibility of enacting changes in the regulations of the U.S. Department of Health and Human Services that govern Title IX, but they backed away as opposition to any changes grew. **Obama, the father of two daughters, might not be sympathetic to those hoping to lessen the impact of Title IX. In an issue that affects both**

college and professional sports, both sides of an acrimonious dispute between sports cable networks and cable providers will be watching closely as Obama appoints a new chair of the Federal Communications Commission. Professor James Speta, a telecommunications expert at the Northwestern University Law School, explains that Obama has already committed himself to the idea of "network neutrality" for Internet providers, an idea that guarantees consumers can decide what Internet sites they want and prevents providers from blocking consumers from certain sites. **"If you take his position on the Internet one step further, you can see that Obama will support the idea that a cable TV customer should be able to choose any network he wishes to watch," Speta says. If Speta's assertion proves to be correct, it will be good news for the NFL Network, the Big 10 Network and other content providers who want cable companies to offer their networks to customers.** On other issues, even after a campaign that went on for 22 months, little is known of Obama's positions. Although both the Bush administration and Sen. McCain were aggressive in their approaches to the elimination of performance-enhancing drugs, Obama has not spoken on the issue. **Will he agree with Bush and McCain, that steroids and other drugs must be eliminated? Or will he be sympathetic to the position of Donald Fehr and the Major League Players Association, that regulation and testing should be a private matter between players and owners?** If federal authorities do not conclude their perjury investigation of Roger Clemens before Bush leaves office, Obama and his attorney general will face a decision on Clemens that will be a signal of their approach on these drugs. Obama's position on the NCAA and its tax exemptions also is unknown. **With the NCAA earning billions from football and basketball while competing with the NFL and the NBA for entertainment dollars, many in Congress want an investigation of its tax-exempt status. Obama has not spoken on the issue. In 76 days, Obama will take the oath of office as the 44th president of the United States. In the 1,000 days that follow, he will help support the White Sox, and he will help his city try to win an Olympics bid and perhaps stage the Games.** Decision by decision, day by day, his impact on the world of sports will emerge. His promises of hope and change may lead to solutions to problems that have vexed commissioners, owners, coaches and athletes for years. It will be an interesting ride (Munson, 2008).

**Title/Headline:** *Obama Makes A Pitch For Chicago's Olympic Bid*

**Abstract:** President-elect Barack Obama donned his salesman's hat on Friday and made his first formal pitch to promote Chicago's bid for the 2016 summer Olympics. **"In the coming years, my administration will bring a fresh perspective on America's role and responsibilities around the world," Mr. Obama said. "But if we are to truly meet our shared challenges, we must all work together. By uniting the world in a peaceful celebration of human achievement, the Olympic Games reminds us that this is possible."** Mr. Obama delivered his remarks through a 90-second videotaped address that was played to the general assembly of the European Olympic Committee during a meeting in Istanbul. Chicago is engaged in a four-city competition for the games, with Rio de Janeiro, Tokyo and Madrid also vying to be selected. **The long-distance appearance by Mr. Obama – his first foray into Olympic politics – underscored the degree to which he is willing to go to get involved on Chicago's behalf in its quest to win the games. For the United States, he said, the Olympics would be a moment "to reach out, welcome the world to our shores and strengthen our friendships across the globe."** **"I deeply believe in the Olympic movement and have long supported hosting the Olympic and Paralympic Games in my home city of Chicago," Mr. Obama said. "Over the past two years, I have spoken often about my belief that while we may come from different places and backgrounds, there are certain shared values that unite us, values at the heart of the Olympic movement: friendship, excellence and mutual respect."** Mayor Richard M. Daley Jr. of Chicago, who was attending the meeting in Istanbul, introduced the video of Mr. Obama. **The image showed the president-elect in a formal backdrop, sitting at a table with an American flag at his side. Chicago will make its final presentation to the International Olympic Committee on Oct. 2, 2009, a trip that Mr. Obama is expected to make during his first year in the White House. But should Chicago win the Olympics, that doesn't necessarily guarantee that President Obama will be around to welcome the games to Chicago.** He, of course, has to win re-election in four years. But if he does, the 2016 games would come in the final summer of his second term in office, a fitting bookend to the worldwide attention his candidacy has drawn to Chicago (Zeleny, 2008).

**Title/Headline:** *Obama Backs College Football Playoffs*

**Abstract:** **He doesn't have a vote in the process, but President-elect Barack Obama says college football needs a playoff system.** Florida defeated Oklahoma 24-14 on Thursday night to win the national college football championship. The Gators' victory has not stopped the annual debate — mostly among sports writers and other fans of the game — over whether the top four or eight teams should play each other to determine a national winner. **Obama, in a light moment at the end of a news conference, congratulated Florida for its victory but said other top teams such as Utah, the University of Southern California or Texas might have a case to make for being No. 1. "If I'm Utah, if I'm USC, or if I'm Texas, I may still have some quibbles. And you've heard my pitch. That's why we need a playoff," he said.** College presidents have argued against a playoff system by saying it would take the student-athletes away from their studies for an extended period (Reuters, 2009).

**Title/Headline:** *Obama's Big Endorsement: Steelers Over Cardinals In Super Bowl*

**Abstract:** **Presidents are usually careful not to take sides in big sporting events, like Sunday's Super Bowl.** They don't want to alienate the fans of either team, so they generally praise both sides and leave it at that. Not Barack Obama. **He threw caution and even-handedness out the window yesterday and endorsed the Pittsburgh Steelers in their Super Bowl matchup against the Arizona**

**Cardinals. "Other than the [Chicago] Bears, the Steelers are probably the team that's closest to my heart,"** Obama told reporters in the Oval Office. The president is a longtime resident of Chicago and former senator from Illinois. Obama waded deeper into dangerous waters when he pointed out that Steelers president Art Rooney II and coach Mike Tomlin had both supported him in the presidential campaign. Obama did have some praise for the underdog Cardinals, however. "[Quarterback] Kurt Warner is a great story and he's closer to my age than anybody else on the field, but I am a long-time Steelers fan. You know, I wish the best to the Cardinals. They've been long-suffering. It's a great Cinderella story, but..." **Obama plans to watch the Super Bowl on Sunday with a group of invited friends, members of Congress from both parties, and other guests at the White House. During the pregame show, he has scheduled a live interview with NBC's Matt Lauer.** Vice President Joe Biden, who was born in Scranton, Pa., also backs the Steelers. He told CNBC, "I know you're supposed to be one of these guys that says I'm not sure. But I want to make clear, I'm rooting for the Steelers. Go, Mr. Rooney!" (Walsh, 2009).

**Title/Headline:** *Obama To Host Democrats, Republicans At White House Super Bowl Party*

**Abstract:** It's an invitation few would turn down: Watching the Super Bowl at the White House with President Barack Obama playing host. Obama is inviting a group of lawmakers to join him for tomorrow's NFL championship game between the Pittsburgh Steelers and the Arizona Cardinals. With no Chicago team for Obama to cheer, the president says he's rooting for Pittsburgh, but that he also wishes Arizona the best. Five of the 15 lawmakers invited to join Obama are from Pennsylvania, and two are from Arizona. There are four senators and 11 representatives. The group includes 11 Democrats and four Republicans. **The White House says the gathering is another step in the president's continuing effort to get to know lawmakers better in hopes of reducing the partisan rancor as they work together on the people's business.** (The invited lawmakers are: Sens. Bob Casey, D-Pa.; Dick Durbin, D-Ill.; Amy Klobuchar, D-Minn.; and Arlen Specter, R-Pa.; and Reps. Elijah Cummings, D-Md.; Artur Davis, D-Ala.; Rosa DeLauro, D-Conn.; Charlie Dent, R-Pa.; Mike Doyle, D-Pa.; Trent Franks, R-Ariz.; Raul Grijalva, D-Ariz.; Paul Hodes, D-N.H.; Patrick Murphy, D-Pa.; Fred Upton, R-Mich.; and Del. Eleanor Holmes Norton, D-D.C.) (Fox News, 2009).

**Title/Headline:** *Bulls Visit President Obama At White House*

**Abstract:** President Barack Obama's day began with a discussion on the fiscal year budget of 2010. And no, his remarks did not touch on the impending free agency of LeBron James or Dwyane Wade. His daily briefing with senior advisors in the Oval Office followed, as did a meeting with the Congressional Black Caucus in the State Dining Room, and eventually, a get together with Vice President Biden and Secretary of State Clinton. Before the afternoon ended, though, President Obama found time to say hello to some special guests from his hometown, as the Chicago Bulls team visited with him in the Blue Room of the White House on Thursday afternoon. **"It was crazy just being here," Bulls guard Derrick Rose said just before leaving the grounds. "I've never had the chance to be at the White House, but the President gave us the opportunity to come so that's what we did. I was nervous just to stand next to him, but then for someone like him to even know my name was just amazing."** Rose said that the visit, which included a tour of the White House, was one he'll always remember. Along with his teammates, he was able to personally meet President Obama, have a brief discussion with him, and pose for photos. **"He knew just about everyone on our team and you could tell he's a real Bulls fan," Rose said. The 20-year old rookie said he's taken on a new interest in politics since Obama's historic campaign and election. "I'm definitely reading the papers and online more often, and my Mom calls me a lot to talk about politics," Rose explained. "She's trying to make me more aware and involved, knowing that it will be good for me to really know what's going on in the world."** Already a role model himself, Rose said that the example President Obama—a fellow Chicagoan—sets is one that he constantly tries to follow. **"He gives you hope," Rose said. "Just like no one thought he would become President, no one thought that I could grow up and become the first pick in the draft. I think it gives people everywhere a little extra hope."** **"The opportunity to visit President Obama at the White House is a great honor for the Chicago Bulls organization,"** stated Steve Schanwald, Executive Vice President of Business Operations for the team, prior to the meeting. "The President has been a fan of the Bulls for many years and we are very

appreciative of this opportunity to say hello to him and pay our respects" (Fluck, 2009).

And when President Barack Obama finally arrived Friday night, delaying the tipoff by a few minutes, Butler and the rest of the Washington Wizards set out to send a message to the First Fan by beating his Chicago Bulls. **"He truly is a die-hard Bulls fan," Butler said. "Hopefully we can convert him a little bit."** With the Hoopster-in-Chief at courtside — the first president in nearly a decade to make the mile-or-so jaunt over from the White House to attend an NBA game — and buoyed by a louder-than-usual crowd in a fuller-than-usual arena, Butler and his last-place Wizards embarrassed Obama's team with a 113-90 victory over the Bulls (NBC Sports, 2009).

**Title/Headline:** *Presidential Pick 'Em At The White House*

**Abstract:** President Barack Obama has studied Lincoln and FDR to help guide him through the early stages of his presidency. But he is very much a modern man, never too far from keeping up with the latest college basketball injury updates, the depth issues of Oklahoma, the strong finish by Florida State and the late entry into the NCAA tournament by Arizona. So on a Tuesday afternoon in the White House Map Room, we wait for the president to fill out his official bracket. **The oversized whiteboard, with a presidential seal, sits on an easel a few feet below a framed, formerly top-secret situation map from April 3, 1945. It details the strength of certain German divisions and includes projections for the German army for May 1, 1945.** President Franklin D. Roosevelt died nine days after this map was made. Germany surrendered in Europe a month later on May 7. History creaks around every corner of this place, from the framed paintings of former presidents and first ladies to the chandeliers hanging above the state dining room to a coffee pot used by President John Adams more than 200 years ago. **But the juxtaposition of a president well-versed in the history of the men who have held the office before him and the brand-new playground that was built for first daughters Sasha and Malia about 50 feet outside the Oval Office makes doing a tourney bracket in the nation's most treasured house seem less surreal.** For many of us in our 40s, the NCAA tournament became a major sporting event beginning with the 1979 championship game featuring Michigan State's Magic Johnson and Indiana State's Larry Bird (Magic and the Spartans prevailed). It was no different for Obama, who was a senior in high school at the time. **"The memory of Magic, and Bird, and [Greg] Kelser, all those guys ... it was an unbelievable game, and invigorated not only college basketball but ultimately pro basketball as well," Obama said. "So for any kind of basketball fan, Indiana State-Michigan State, that still is one of the greatest games of all time."** The first round of this year's tournament begins Thursday, and plenty of White House workers, as well as countless office personnel around the country, might slip away for a few minutes to watch some of the games. Will Obama? "I think the chances are high," he said. The president doesn't want to touch the field of 65, so you won't find him pushing for expansion. He relishes this format and doesn't want any sort of change, unlike his publicized stance on the need for a college football playoff system. **"This is it," Obama said pointing to the bracket. "This is it. You know, you don't want to start ... letting it be like the NBA. People who are sub-.500 get into the playoffs. There's something wrong with that."** So with Secretary of State Hillary Clinton and Defense Secretary Robert Gates holding meetings nearby, and a state dinner with Irish Prime Minister Brian Cowen to come -- it was St. Patrick's Day, after all, and the president had on a green tie as the fountains showered green-dyed water -- Obama slipped down to the Map Room to break down the bracket. **He proved to be as educated and knowledgeable as those who make this a trade. The president had worked on his bracket earlier in the morning, going over it with press secretary Robert Gibbs, an Auburn, Ala., native who was still disappointed his Tigers didn't advance far enough in the SEC tournament to land a bid.** Obama, though, didn't seem to need much advice when it came time to pick. He dove right into the first round, with only a few upsets here and there, notably No. 11 VCU over No. 6 UCLA in the East Regional in Philadelphia. **"VCU, I think, has been playing strong, and I hate to say this, because my brother-in-law is in the Pac-10 right now, but the Pac-10 has been looking pretty weak this year," Obama said. "I like that as an upset."** He picked No. 11 Temple over No. 6 Arizona State in the South, too. Craig Robinson, Obama's brother-in-law, is the coach at Oregon State and led the Beavers to seven Pac-10 wins in his first season, after OSU went winless in the league a year ago. Obama picked against five of the six Pac-10 schools in the first round, selecting 4-seed Washington (over 13-seed Mississippi State) as the one league team to advance. **"I want him to have an incentive, knowing that I think the rest of the Pac-10 can be taken next year," Obama said of Robinson's team, which earned a berth in the College Basketball Invitational with a 13-17 record. "I think the Beavers are on their way."** Contrary to many brackets around the country, Obama went against a trendy 12-5 upset pick, selecting Utah over Arizona. Did it have anything to do with Sen. John McCain (R-Ariz.), whom he defeated in last year's presidential election? **"It has nothing to do with McCain," Obama said. "I think Arizona is a great state. I love playing golf there. But they just squeaked in."** Washington was pegged as a second-round loser to Purdue, a team Obama was high on because of its finish. The president went with Villanova over VCU in the second round but picked Duke over Nova in the Sweet 16. Obama's personal aide, former Duke basketball and football player Reggie Love, was standing a few feet from the easel. Obama and Love are regular hoops players, and the latter watched his alma mater against Maryland last month at the Comcast Center. **"Because of Reggie Love, I've got to pick Duke," Obama said. The whole way? "No, no, not the whole way. Come on," Obama said. How much influence does Love have? "He doesn't have that much influence," Obama**

said. He chided his aide by saying a year ago Love picked the Blue Devils to go all the way, and then added, "I think it sort of stopped here," pointing to the second round of the bracket. Florida State lost in the ACC tournament title game to Duke. Obama clearly knew the Seminoles have been on a roll of late, led by ACC Player of the Year runner-up Toney Douglas. But he picked Pitt to beat the Seminoles and advance to the Elite Eight against Duke. **"Pitt is looking strong," he said. "I think [DeJuan] Blair is a man."** In the 2008 election, Obama won Pittsburgh, a key city in the swing state of Pennsylvania. **"I've had good luck with Pittsburgh," Obama said. "It turned Pennsylvania. They came through in the Super Bowl. So I figure let's keep riding them a little bit longer."** My bracket has Pitt over Duke, too. Did he get my picks in advance? **"I didn't look at your picks," Obama said with a laugh. "I promise you, to win, Andy, I'm not looking at your picks."** Picking Pitt over Duke was his toughest selection. He looked over at Love and said that despite the "skilled perimeter players, they just don't have the muscle inside. I think Blair is going to eat them up." Love smiled, but his loyalty at this point in his life has to be to Obama, not Mike Krzyzewski. Reggie says [Kyle] Singler is going to be able to guard Blair," Obama said. **"I don't think so."** So Pitt advanced out of the East to Obama's Final Four. North Carolina is his pick in the South. A year ago, when he was still Senator Obama from Illinois, he played a pickup game with the Tar Heels after the Final Four during a campaign stop in Chapel Hill before the North Carolina Democratic primary. **"Here's what I like about Carolina: experience and balance," Obama said.** When asked about the issue of point guard Ty Lawson's toe, Obama responded, "I'm a little concerned about that. But I've got to assume that he's coming to play." Further down in the bracket, Obama said he hated to do it to his home state of Illinois, but he went with Gonzaga over the Illini. He knew coach Bruce Weber's team missed the NCAAAs last year, but "they're making progress," Obama said. Syracuse got the nod to play Oklahoma in the Sweet 16 at the bottom half of the South bracket. **"The problem with Oklahoma, they have the player of the year [Blake Griffin], but they play, like, seven guys," Obama said. "I think you start getting worn down."** Obama said he watched the ESPN highlights of Syracuse's six-overtime win against Connecticut in the Big East tournament quarterfinals. Why he didn't last into the night? **"I can't be staying up until 2 in the morning,"** he said. "I've got work to do." He picked North Carolina over Syracuse in the South Regional final, setting up a Pitt-UNC national semifinal. Louisville coach Rick Pitino was an assistant at Hawaii when Obama was living in Honolulu. Obama, who was known as "Barry O'Bomber" when he played for Punahou High, said he used to go to the old Neal Blaisdell Arena on the University of Hawaii campus. **"I saw him at Blaisdell and always thought he was a great coach," Obama said. "So I think he's going to do a good job here."** Louisville sailed through to Obama's Sweet 16. Obama liked West Virginia, but couldn't go against Kansas for a number of reasons. His late mother, Ann Dunham, was from Kansas. He also just named Kansas Gov. Kathleen Sebelius the new secretary of the Department of Health and Human Services. Oh, and there's one other reason: **"Kansas is a young team, maturing -- Bill Self has done an outstanding job there."** But he still went with Michigan State over the Jayhawks in the Sweet 16. "[MSU coach Tom] Izzo always has great teams," he said. Obama had Louisville over Michigan State to reach Detroit. In the West, Obama advanced Connecticut and Purdue to the Sweet 16, with the Huskies winning. He struggled with Marquette and Missouri in the bottom part of the bracket. He knew Dominic James was out for the Golden Eagles and, after hedging, went with Mizzou to advance to the Sweet 16. Obama went local with Maryland over Cal, but had Memphis beating Maryland and Missouri. **"I think Memphis has got a very athletic team," Obama said. "I think they've got a good shot."** Obama said UConn is a "fine institution" but picked Memphis in the West Regional final, "so that's my Final Four right there." During at least the start of Final Four weekend, the president will be with first lady Michelle Obama and his key staff members at the NATO summit in France during a March 31-April 5 trip to England, France, Germany and the Czech Republic. "We're going to be watching it, but it will probably be 2 in the morning where we are," Obama said. **"I'm not going to be able to watch any game the whole way through, but we're going to be checking the scores."** What if he's on Air Force One during the games? "Air Force One does have DirecTV," Obama answered. With his final selections, the president had Louisville beating old rival Memphis in one semifinal and North Carolina outlasting Pitt in the other. The overall winner? The most powerful person in the world is like many of you: He predicts the Tar Heels will be cutting down the nets in Detroit. **"I'm going with experience, and I think that Lawson is going to be healthy. I think having an experienced point guard who can control the game and make free throws at the end, that's going to be the difference,"** Obama said. The commander in chief then turned to an ESPN camera, offering this pep talk for coach Roy Williams' crew: **"Now, for the Tar Heels who are watching, I picked you all last year -- you let me down. This year, don't embarrass me in front of the nation, all right? I'm counting on you. I still got those sneakers you guys gave me."** Regardless of the pep talk to UNC, I didn't budge, sticking with my original pick of Pittsburgh to win it all. "If Pitt wins, you'll get some commemorative White House M&M's," Obama said. "What do I get?" Maybe some ESPN swag, Mr. President? "An ESPN T-shirt?" Obama laughed. "A water bottle?" And then he was off, with his bracket in hand, folded and ready to reference on Thursday as the first-round results come trickling in. As we exited, one senior staffer said this might have been the one "fun thing" the president did all day. The serious work -- and there's plenty of it -- was taken care of before and after our brief meeting. But during those 20 minutes in the Map Room, one thing became readily apparent: As will be the case in so many houses throughout this vast nation, the upcoming NCAA tournament -- this communal event we call March Madness -- will certainly have its place in the nation's First Home of Hoops. And if you don't believe me, let's have someone from the Secret Service check the trash bin next to the president's desk in the Oval Office. Chances are there will be a torn and crumpled-up bracket in there by this time next week. And hey, who can't relate to that? (Katz, 2009).

**Title/Headline:** *Obama Likens His Bowling Game To Special Olympics*

**Abstract:** President Obama seemed relaxed and in good cheer tonight during his appearance on "The Tonight Show with Jay Leno." But

there was one misstep that surely made his advisers wince. **Leno asked the president whether the White House bowling alley had been "burned and closed down" in light of Obama's gutter ball embarrassment on the campaign trail last year.** Obama replied, "No, no. **I have been practicing . . . I bowled a 129."** The audience roared with laughter, and the late-night talk show host assured Obama "that's very good, Mr. President." To which Obama interjected, "It's like -- it was like Special Olympics, or something." The audience laughed. But the White House didn't let the comment linger without clarification. **"The president made an offhand remark making fun of his own bowling that was in no way intended to disparage the Special Olympics,"** White House spokesman Bill Burton told reporters flying aboard Air Force One after the taping of the show, according to a transcript released by the White House. "He thinks that the Special Olympics are a wonderful program that gives an opportunity to shine to people with disabilities from around the world." Also on the "Tonight Show," Leno asked the president when he would finally be making good on his famous campaign promise to reward his daughters with a puppy, which so far hasn't surfaced. **"Listen, this is Washington. That was a campaign promise," the president deadpanned to much laughter. The president said he was "teasing," and explained that as soon as he returns from the NATO summit in France in Germany early next month, the "dog will be in place."** Leno asked if the dog would be a "Portuguese Water Head," referencing first lady Michelle Obama's recent suggestion that the first family was leaning toward a Portuguese Water Dog. The president laughed and said, **"It's not a 'water head.' That sounds like a scary dog. Sort of dripping around the house."** But the first dad gave absolutely no hints about what kind of dog - or puppy - it will be. **"We're going to get a dog that is -- that I think the girls will have a great time -- I think I'm going to have a lot of fun with it. You know, they say if you want a friend in Washington, get a dog."** And according to the schedule the president described, his girls will have their new furry friend by Easter (Akers, 2009).

**Title/Headline:** *Duke Coach To Obama: Worry About The Economy, Not NCAA Picks*

**Abstract:** Barack Obama picked North Carolina to defeat Louisville for the NCAA championship, a relatively safe selection for a trailblazing president. Obama spent part of Tuesday making his tournament picks for ESPN, which posted his completed bracket online Wednesday and showed the First Fan filling it out with Andy Katz on the noon edition of "Sportscenter." **Of course, the president's choice drew a reaction from the Tar Heels' most intense rival. "Somebody said that we're not in President Obama's Final Four, and as much as I respect what he's doing, really, the economy is something that he should focus on, probably more than the brackets,"** Duke coach Mike Krzyzewski said from the Blue Devils' first-round site in Greensboro, N.C. The president had top-seeded Pittsburgh join the No. 1-seeded Tar Heels and Cardinals in the Final Four, but chose second-seeded Memphis to beat Connecticut in the West Regional. "I think Memphis has got a very athletic team," Obama told Katz, an ESPN college basketball analyst. "I think they've got a good shot." Perhaps showing some indecision, Obama initially had the Panthers playing Louisville for the national title in the file posted online. Pitt was scratched out of the title game in favor of North Carolina, which in turn replaced Louisville in the "champion" box. **"Here's what I like about Carolina: experience and balance," Obama said. Familiarity, too. Obama played a pickup game with Tyler Hansbrough and the Tar Heels while campaigning in North Carolina last April. "Now, for all the Tar Heels who are watching, I picked you last year -- you let me down," Obama said. "This year, don't embarrass me in front of the nation, all right? I'm counting on you. I still got those sneakers you guys gave me."** Katz interviewed Obama last October for a story about the president's brother-in-law, Oregon State basketball coach Craig Robinson. After the interview, Obama invited Katz to play in a pickup basketball game on Election Day in Chicago, and he did. Katz extracted a promise from Obama that if elected, the new president would reveal his NCAA picks to ESPN when the pairings were announced in March. **"They stayed true to their word and didn't hesitate to get it done,"** Katz said. (Fox News, 2009).

**Source:** The New York Times

**Title/Headline:** *Obama's N.B.A. Picks*

**Abstract:** President Barack Obama's NCAA basketball picks have been well-documented, thanks to ESPN, which scored an interview with him two weeks ago in which he meticulously went through his selections with the sports network's college hoops guru, Andy Katz. But the First Fan -- who picked North Carolina to win the tournament -- has been publicly silent on his picks for the upcoming National Basketball playoffs. Until now. At the end of an interview Friday with the New York Times (ostensibly about Vice President Joseph R. Biden), Mr. Obama was asked which teams he anticipated would meet in the NBA finals. **His prediction: Cleveland would play the Los Angeles Lakers. No Celtics-Lakers rematch, in other words. The president did not predict a winner, but was effusive about the LeBron James-led Cavaliers. "I'm telling you, those Cavs," Mr. Obama marveled. "They've only lost one game all year at home. Thirty-five and one."** (Actually 33 and 1, as of Friday.) "And they have home court advantage. That's pretty impressive" (The New York Times, 2009).

**Source:** NAVY, Donna Miles

**Title/Headline:** *Obama Honors Navy Football Team For Commitment To Team, Country*

**Abstract:** President Barack Obama presented the U.S. Naval Academy football team the Commander-in-Chief's Trophy April 21 during a White House Rose Garden ceremony. Obama extended congratulations to the midshipmen from Annapolis, Md., who bested both the U.S. Military Academy "Black Knights" 34-0 and the U.S. Air Force Academy "Falcons" 33-27 during the 2008 season. The wins earned Navy the coveted Commander-in-Chief's Trophy -- and a trip to the White House to receive it -- for the sixth consecutive year. **"By now, you guys know your way around here better than I do," Obama said at the ceremony.** Obama offered high praise to Navy for its "fearsome offense" as well as the nation's most-improved defense. But amid the levity of the event, he identified attributes that make Navy's players unique, including the top graduation rate in the NCAA for four consecutive years and a demanding

schedule of coursework and military training. Obama noted that all 32 seniors on the Navy team are "preparing to trade one proud uniform for another – and that's the United States of America's uniform." And although the Navy team has won a record 13 consecutive service academy games dating back to the 2002 Army-Navy game, the president told them, **"You're all joining the same team now."** **"Football, it's said, makes boys into men,"** he said. **"But the academy makes men and women into leaders. And the bonds that you've built and the lessons that you've learned on that field and in your 'four years by the Bay' have prepared you to join and lead the finest fighting force in the history of the world."** Obama, who is scheduled to deliver the keynote address at this year's Naval Academy graduation, told the team he has no greater honor or responsibility than serving as their commander in chief. **"I'm proud of you,"** he said. **"And I promise you this,"** he continued. **"From the minute you put on that uniform to the minute you take it off, and for all the days of your life, this country will stand behind you and will be here for you, because we know that you will be there for us."** During today's ceremony, Obama recognized Lt. Cmdr. Wesley Brown, who in 1949 became the U.S. Naval Academy's first black graduate, and for whom the academy's new field house is named. **The president also recalled his Hawaiian roots, recognizing two fellow Hawaiians: team coach Ken Niumatalolo and Midshipman Kaipo-Noa Kaheaku-Enhada, the starting quarterback. Rendering a "shaka" or Hawaiian "hang loose" sign in during the ceremony, Obama noted Niumatalolo's calmness under pressure. "That's the Hawaiian spirit," Obama said. "That's how we roll" (Miles, 2009).**

**Title/Headline:** *Lawmakers Greet Champion Gators Before White House Reception With President Obama*

**Abstract:** The Capitol Hill crowd isn't known for its boisterous parties, but lawmakers and staffers today mobbed a reception hall at the Library of Congress to cheer the Florida Gators hours before the defending national football champions were to visit the White House. Congressional aides arrived with helmets, footballs and programs to sign and U.S. Rep. Adam Putnam, R-Bartow, even did the gator chomp as soon as he arrived. **"It's huge man. But it's getting kind of old. Another year, another championship,"** said Putnam, who graduated from the University of Florida with a degree in economics. **"It's great that, for a few hours, that the nation's capitol is the capitol of Gators nation."** Another lawmaker, U.S. Rep. Cliff Stearns, R-Ocala, presented the team with a flag that he flew over the capitol on Jan. 8 – the day that the Gators beat the Oklahoma Sooners 24-14. **"That shows how much confidence I had that the Gators would win,"** he said. **As for the players, they said the experience wasn't too much different than meeting other fans, except for the Washington crowd wore more ties. "It's the same, but different attire. But they're still Gator nation,"** said running back Jeff Demps. But he compared the upcoming experience of meeting President Obama to the nerves before a game. **"When you're suiting up to play, you're fired up [and] I'm fired up to see President Obama. It's kind of like the same feeling,"** said the rising sophomore who attended South Lake High School. Meanwhile, offensive lineman Corey Hobbs, said the Washington trip was piquing his interest in politics and that he was hoping to get involved in student government this summer. **"I'd like to have a say in the future,"** said Hobbs, of Oviedo, who also hopes to go to law school (Matthews, 2009).

**Title/Headline:** *Obama Plays Basketball With UConn Women's Team*

**Abstract:** Championship ceremony is a White House standard for sports teams. Shooting hoops with the president, now that's something to remember. Moments after Monday's event in front of the South Portico, President Barack Obama hustled the University of Connecticut's women's basketball team over to the outdoor half-court, away from reporters and cameras. The president, a former high school player and avid fan who still plays pickup games, prevailed in a brief, impromptu game of P-I-G with a few of the players. **"He was pretty good from 17 feet,"** said coach Geno Auriemma. **"His shot's a little unorthodox, but it goes in ... He's got a little bit of that swagger."** Renee Montgomery, a senior guard, said Obama only missed one shot and that he sank a final fade-away shot from off the court. **"He was all over the perimeter,"** said junior center Tina Charles. After about 10 minutes, Obama walked back to the White House with his sleeves rolled up and his suit jacket slung over his shoulder. Connecticut dominated women's college basketball this season, going 39-0 and beating opponents by an average of better than 30 points. They capped the season earlier this month in St. Louis with a 76-54 victory over Louisville. It was Connecticut's sixth national college championship and third perfect season. **"Under coach Auriemma's leadership, this Huskies program has redefined excellence again and again,"** Obama said. **The president also praised the academic achievements of the players. The team gave Obama a basketball signed by the players and a Connecticut jersey emblazoned with "1" and his name on the back. "Number One \_ that's what I'm talking about,"** Obama joked. **"I will wear it when I'm playing."** Obama said that as the father of two young daughters, he especially appreciates the success of female athletes like the Connecticut team. **"My girls look at the TV when I'm watching 'SportsCenter' and they see women staring back,"** Obama said of the ESPN program, a personal favorite. **"That shows them that they can be champions, too" (Miga, 2009).**

**Title/Headline:** *Is Obama The 'Sports' President?*

**Abstract:** One hundred days into President Obama's administration, there is little mystery about where the president's

extracurricular interests lie. After his inauguration, the president hosted a Super Bowl party, correctly picked North Carolina to win the NCAA men's basketball tournament and sat courtside for a Bulls-Wizards NBA game. He works out nearly every day, sports a Chicago White Sox cap and plays pick-up basketball with his buddies. This week he played P-I-G against the champion University of Connecticut women's hoops team. The president is also jumping into the fray on a host of controversial sports issues. A Democrat who believes in the power of government to force change, Mr. Obama is using his bully pulpit in a manner that could ultimately give him the most expansive sports résumé for any president since Theodore Roosevelt. Before taking office, he pushed for a college football playoff to declare a national champion instead of the patchwork system of bowl games. **In his first three-plus months in office, he has spoken out on behalf of Chicago's bid for the 2016 Olympics, lobbied for the U.S. to host soccer's World Cup in 2018 or 2022, and even delivered a national tongue-lashing to Alex Rodriguez after the Yankees slugger acknowledged using a performance-enhancing drug during parts of three seasons.** "It's so much a part of what he does, it's almost as if this is becoming a post-sports presidency," said John Sayle Watterson, author of "The Games Presidents Play: Sports and the Presidency." Some say it's also good politics. "Intellectually he's so lofty that I think he feels it's necessary to bring himself down a bit," said Ross Baker, a political scientist at Rutgers University. **"There is nothing better to temper that loftiness than sports."** While Teddy Roosevelt is largely seen as the modern standard-bearer for sportsmen presidents, sports have played a significant role in lives and work of numerous commanders in chief since 1900, considered the beginning of the modern era for organized sports in the U.S. **Teddy Roosevelt clearly set the bar high, and Mr. Obama is trying to reach it.** Earlier this month, the International Olympic Committee's site evaluation group began its visit to Chicago watching a four-minute video Mr. Obama taped pleading his hometown's case. **Mr. Obama also intends to be in Copenhagen in October when the IOC is scheduled to decide the Chicago's Olympic fate. Also this month, he wrote to Joseph S. Blatter, president of soccer's governing body, FIFA, stating the case for a U.S. World Cup by citing his own experiences with the game as a child in Jakarta and as a soccer-dad in Chicago.** During the winter, Mr. Obama took time in his first prime time news conference to show his personal disdain for Mr. Rodriguez's steroid use, saying the revelation "tarnishes an entire era." As for creating of a college football playoff, Mr. Obama can wield little in the way of formal influence over the debate. However, NCAA officials have been put on notice that any plan they come up is going to have one very powerful critic weighing in (Futerman & Chozick, 2009).

**Title/Headline:** *Obama Congratulates The Tar Heels*

**Abstract:** When the president's number one assistant is a Duke man and a former basketball champion, you might think the Tar Heels wouldn't be welcome. But when the president famously picks the North Carolina team to win the NCAA tournament, and they succeed, the invitations get put in the mail. **And so today, President Obama hosted the 2009 NCAA champion team from the University of North Carolina on the South Lawn of the White House, offering his congratulations but choosing not to shoot a few hoops on the presidential court.** "Welcome to the White House and congratulations," Obama said after emerging from the White House at 2:11 p.m. It took only two minutes to get to his real message: "More importantly," he said, "thanks for salvaging my bracket and vindicating me in the eyes of everyone." **Obama's personal assistant, Reggie Love, is a former Duke player whose membership on the 2001 team makes him a former champion. Obama noted the rivalry, saying that everyone on his staff was excited about the team's arrival -- except maybe Love. "He wants to scrimmage with you guys," Obama said. "We'll arrange that."** Obama offered serious praise for the team's academic achievement, noting that they had the highest number of graduates of any of the final four teams. He had specific kudos for Coach Roy Williams, who he said was committed to the development of his players as men as well as athletes. But it was clear that Obama -- who fancies himself a pretty good basketball player -- was loving this particular perk of being president. He joked with Tar Heels guard Jack Wooten, reminding him of the scrimmage Obama had with the team as a candidate last year. He noted that both he and the team had good luck after that -- **"They're now national champions and I'm now president."** -- but recalled that Wooten roughed him up. **"He stole the ball from me, blocked my shot," Obama said, adding that there were "no hard feelings."** Williams presented Obama with a white-and-powder-blue Tar Heels jersey -- **"OBAMA 1"** -- and several senior members of the team gave the president a large, framed picture of the scrimmage from last year (Shear, 2009).

**Title/Headline:** *Obama Greet Champion Steelers At White House*

**Abstract:** President Barack Obama welcomed the Super Bowl champion Pittsburgh Steelers to the White House on Thursday, celebrating the National Football League squad's record sixth championship. Obama said before February's NFL title game that he was cheering for the Steelers, whose 1970s stars made a lasting impression upon him, but that his first loyalties will always remain with his hometown Chicago Bears. "I already told these guys no matter how big they are, I am a Bears fan, but it is no secret that I was pulling for the Steelers during the Super Bowl last year," Obama said. "This isn't me trying to have it both ways. Growing up in Hawaii when I was a kid we didn't have a local football team. "When I started playing and started paying attention to football, it was guys like Terry Bradshaw, Franco Harris and the Steel Curtain... Those were the guys that were playing and so I became a Steelers fan." Two months ago, Obama named Dan Rooney, the Steelers' chairman, as ambassador to Ireland. "I don't know of anybody who is more of a gentlemen who is more loyal or who is more committed to excellence than Mr. Rooney," Obama said. "And he is humble. This kind of attention embarrasses him but he has no choice." Obama also praised Steelers coach Mike Tomlin, who joined his successful campaign to win the key swing state of Pennsylvania in last November's general election. "This is a new team for a new era and that embodied by coach Tomlin," Obama said. "He didn't just win the Super Bowl. He also happened to be NFL Coach of the Year, the youngest coach ever to win a Super Bowl." The Steelers and US soldiers worked to assemble care packages for US troops during the appearance (AFP, 2009).

Said the smiling president: "Lakers in six, I think."** In sports terms, that means the Lakers will win the best-of-seven series in six games. The series begins Thursday. So far so good this year for Obama. A huge basketball fan, he correctly predicted that the University of North Carolina men's basketball team would win the NCAA championship. Obama was leaving Tuesday for an overnight trip to the Middle East (NBA, 2009).

**Title/Headline:** *Brazilian President Gifts Obama Signed Soccer Jersey*

**Abstract:** President Barack Obama seemed pleased with the gift he received Thursday from Brazil's President Luiz Inacio Lula da Silva, but it was bittersweet nonetheless. Silva gave Obama, a big sports fan, an autographed yellow Brazilian soccer jersey at the start of their morning meeting at the G-8 summit in Italy. During their banter, which reporters partly heard through a translator, Silva spoke animatedly of the June 28 soccer match between the U.S. and Brazilian national teams in the Confederations Cup series. The game was a crushing loss for the underdog Americans, who led at the midway point, 2-0, only to lose 3-2. Silva repeatedly said, "Yes we can," which was Obama's campaign catchphrase and apparently what the Brazilian president had in mind while his team trailed. Obama smiled gamely; if he felt Silva was rubbing it in a bit, he didn't let on. "Hey, look at this," Obama said of the jersey, signed by the Brazilian team's players. "Beautiful. All right, wonderful. I like that." White House spokesman Robert Gibbs later said Obama ended his 30-minute session with Silva by patting the Brazilian's back and vowing, "we will not lose a two-point lead again." Michelle Obama shook her head as she took in the extent of the damage, gazing upon centuries-old churches and other treasures rubbed by an earthquake that claimed more than 300 lives. Obama and other first spouses on Thursday toured the ghostlike historic center of L'Aquila, the Italian city devastated by the April tremor and hosting world leaders this week for the G-8 summit (Babington, 2009).

**Title/Headline:** *Why Did LeBron Visit The White House When He Didn't Win The NBA Championship?*

**Abstract:** The Cleveland papers report that NBA star LeBron James and a few of his homies visited Barack Obama in the White House on Monday. This is odd since traditionally the NBA champs visit the president, not the sore losers. But I guess tradition and protocol go out the window when your home boy is president. I wonder how Kobe Bean and the Lakers feel about LeBron visiting before they even get in the door? This brings up an interesting fact about Obama refusing to ante up the names of visitors to the White House since he became president. You may recall that Obama campaigned against such secrecy when Bush was still in the White House. Obama didn't see any reason why the White House visitors list should be kept a secret. But now that he is president, of course he changes his tune. Well, there's a federal lawsuit winding its way through the courts — and a federal judge has twice ordered that the Secret Service produce the list of names. But ole Obama is stubbornly blocking the release of those names until the case reaches the

Supreme court I guess. This means that information which should be made public is being withheld by Obama, who promised transparency in his administration. Lol. This also means that Obama can sneak a chick or two into the White House and we, or for that matter, Michelle Obama, would never know it (Rose, 2009).

**Title/Headline:** *Obama Visits FOX Booth, Keeps It Light*

**Abstract:** President Barack Obama is used to doing interviews on national TV, but the topics usually range from the economic crisis to the war in Iraq. On Tuesday night, he got a brief respite from the normal line of questioning when he joined Joe Buck and Tim McCarver in the FOX broadcast booth during the bottom of the second inning of the All-Star Game. Obama's time in the booth was filled with light banter about his ceremonial first pitch, his choice of wardrobe and his thoughts on the state of the game. The president was relieved he got the chance to warm up for this first pitch, something that wasn't the case when he was a senator and had the same honor during the 2005 American League Championship Series. **"When you're a senator, they show you no respect, so they just hand you the ball,"** Obama told Buck and McCarver. **"You don't get a chance to warm up. Now here, I was with Albert Pujols in the batting cage practicing before. To go down there, to meet Stan Musial, Bob Gibson and those guys, it's such a reminder of what's great about this country. You can't beat it and it's a real treat."** The president had made no qualms about where his loyalties on the field are and Buck gave him credit for not "playing it down the middle" by wearing non-team-specific garb. **"Everyone knows I'm a White Sox fan and my wife thinks I look cute in this jacket,"** Obama quipped. **"Between those two things, why not?"** In fact, the president wanted to take some credit for his favorite team's good fortunes back in that 2005 season. After his first pitch, he pointed out, Chicago could do no wrong en route to winning the World Series. **"It was just wonderful,"** Obama said. **"I was just talking to Jerry Reinsdorf, the White Sox owner, about this. After I threw out my pitch, they won eight straight after losing the first game. Any of these teams need a lefty?"** The president showed a pretty good grasp of the game beyond the South Side of Chicago, discussing how the overall season was shaping up with the FOX broadcasting duo. "I tell you what, though, what's been interesting about baseball this year, other than the Dodgers, who have been playing great baseball," Obama said. **"There's a lot of parity, which I think is terrific, because it means everybody around the country has a little bit of hope for the team."** Obama has developed a bit of a reputation for his prowess as a sports prognosticator. Buck pointed out that he's 2-for-2, referring to Obama correctly picking the Steelers to win the Super Bowl in February and the University of North Carolina to win the NCAA men's basketball title in April. He couldn't entice the president, however, to make a call on the 2009 Major League Baseball season. **"It's a little early for that,"** Obama said. **"You know, I tend to try to get a little more information"** (Mayo, 2009).

**Title/Headline:** *President Obama Throws First Pitch At 2009 All-Star Game In St. Louis*

**Abstract:** Barack Obama may not have fired a perfect strike with his ceremonial first pitch, but the President did more than enough to draw rave reviews from the All-Stars Tuesday night. **Obama visited the AL and NL clubhouses before last night's Midsummer Classic, showing off his knowledge of the game while having some fun with many of the best players in the majors.** "It was wonderful to meet him," Mariano Rivera said. "He said, 'Keep throwing that cutter.' It was outstanding. I know he's the President of the United States, but he was a regular man." **Obama is the seventh President to appear at an MLB All-Star Game, but only the fourth to throw out the ceremonial first pitch, joining John F. Kennedy, Richard Nixon and Gerald Ford, who did it twice.** "Without question, that's the thing I'll take from this All-Star Game," Derek Jeter said. "He said he was a fan, which is kind of hard to believe when you think that he's the President." **Obama signed baseballs for several players in both leagues, including the Mets' Francisco Rodriguez and Johan Santana. "He seemed like a really humble person," Rodriguez said.** "He was walking around and shaking hands with all of the guys. When you think about the President, you think he's a guy really restricted. He was the opposite. I really enjoyed that experience." The President toed the rubber to throw the ceremonial first pitch to Cardinals fan favorite Albert Pujols, who spared Obama - sporting a White Sox jacket to represent his favorite team - the embarrassment of bouncing the pitch in front of home plate. "It was good," Rivera said of Obama's toss. "Nobody can hit that pitch." **Following the lead of his predecessor, George W. Bush, who warmed up in the indoor batting cage at Yankee Stadium before throwing the first pitch before Game 3 of the 2001 World Series, Obama planned to throw a few pitches before taking the field for his big moment.** "Well, I think it's fair to say that I want to loosen up my arm a little bit," Obama said earlier in the day. The President - then a U.S. Senator - last threw out a first pitch at a White Sox playoff game in 2005. "When you're a senator, they show you no respect, so they just hand you the ball," Obama said. "You don't get a chance to warm up. Now here, I was with Albert Pujols in the batting cage practicing before." Pujols was thrilled to be chosen as Obama's catcher. "Obviously it's an honor to catch the first pitch from the President, as our leader," he said. "Tomorrow I think it's going to get to me." Obama's All-Star appearance capped a day in which he welcomed Wimbledon champion Serena Williams to the White House and picked up Hall of Famer Willie Mays in Michigan for the flight to St. Louis. Mays' advice for Obama? "Follow through," Mays told reporters aboard Air Force One. "He'll be fine. I guarantee it (Feinsand, 2009).

**Title/Headline:** *Obama - A Sports Fan In Chief*

**Abstract:** From making March Madness bracket picks in the White House Map Room to thanking Russians for Washington Capitals hockey star Alex Ovechkin, President Obama is embracing his role as America's No. 1 sports fan. **He plays basketball and golfs most weekends, and he's hosted nine sports teams from the Pittsburgh Steelers to the Columbus Crew soccer champions at the White House since taking office in January - a record-setting pace.** "The passion that Obama has is on the extreme side and shared by only a small handful of presidents," said Marc Ganis, a sports analyst and president of Chicago-based SportsCorp Ltd. Mr. Obama's enthusiasm goes beyond the usual photo-op. He knows his facts and he loves his Chicago teams - pro basketball's Bulls, pro football's Bears and big league baseball's White Sox. **On Tuesday night, Mr. Obama was in the sports spotlight again, throwing the ceremonial first pitch at the Major League Baseball All-Star Game in St. Louis and trading quips with Fox Sports play-by-play announcer Joe Buck - including an insult to the Washington Nationals' lousy season.** The southpaw president had practiced his delivery in the White House Rose Garden and in Busch Stadium for a warm-up session with St. Louis Cardinals slugger Albert Pujols. Mr. Obama was hoping for a better pitch than his 2005 attempt at the Angels-White Sox game, but his pitch was short of the plate. Still, the president did a fist pump after the throw and later told Mr. Buck that baseball is "such a reminder about what's great about this country. You can't beat it" "This is as much fun as I've had in quite some time," he added. **His color commentary included "Uh-oh" on a tough play, and "How 'bout that?" during a good moment. He also joked baseball couldn't have a federal bailout because "We're out of money."** In the locker room before the game, Mr. Obama hugged players and signed autographs. Mr. Obama, who took to the mound in a White Sox jacket, was introduced to TV viewers as "A Sox fan through and through." "I like the fact that he's active in sports," a Washington ESPN Zone bartender said as Mr. Obama was on the jumbo television screen. Former President George W. Bush, a former part-owner of the Texas Rangers franchise, threw out several first pitches and also was known to love sports. His first year in office, Mr. Bush hosted six teams and some Hall of Fame inductees at the White House, according to a tally kept by Mark Knoller of CBS News, the unofficial presidential historian for the press corps. The Obama White House is similarly sports-obsessed, and Mr. Obama has Mr. Bush beat - the current president has hosted nine teams in less than six months. **"Bush in total hosted 40 sports teams [over eight years]. Obama is on his way to besting that record,"** said John Sayle Watterson, author of "The Games Presidents Play: Sports and the Presidency." Mr. Obama also works sports references into just about everything - noting his Supreme Court nominee Sonia Sotomayor is a "lifelong" New York Yankees fan and lauding the Russian-born Mr. Ovechkin, hockey's reigning most valuable player, during a speech in Moscow last week. Major League Baseball Commissioner Bud Selig told reporters in St. Louis that the White House accepted his invitation for Mr. Obama to throw the opening pitch within 24 hours, noting that made him happy because Mr. Obama has had such a busy schedule this month **"No matter what one thinks politically, right or left or whatever, this is a big thing. The players will**

enjoy it. The fans will enjoy it," Mr. Selig said. Mr. Ganis and Mr. Watterson said Mr. Obama is unusual among politicians because he is such an overt fan of his preferred teams - though he did waffle on his World Series choice when teams from the swing states of Florida (the Tampa Bay Rays) and Pennsylvania (the Phillies) were competing in October. **The White House Flickr.com feed has posted photos of the president with a golf club or basketball, as well as 14 photos of Mr. Obama with a football. The administration also posted video of Mr. Obama shooting hoops with the University of Connecticut champion women's basketball team. Some are frustrated that the new president has not shown the local D.C. teams much love. The only Washington game he attended was when the Washington Wizards played the Bulls on Feb. 27 - one night after he treated the Chicago team to a White House tour.** He sat courtside at the Verizon Center during the game. This White House frequently issues e-mails offering "readouts" of Mr. Obama's meetings and phone calls with foreign leaders. **This summer, it also put out details of Mr. Obama's calls to Stanley Cup-winning Pittsburgh Penguins coach Dan Bylsma and Los Angeles Lakers coach Phil Jackson. The president congratulated each coach on their championship seasons and invited them to the White House. Mr. Obama went further with Jackson, expressing "interest in the Lakers' innovative triangle offense," according to the official White House "readout" of the call.** At 86 words, the Jackson readout was shorter than the 123-word readout of Mr. Obama's calls to the Japanese prime minister on North Korea's nuclear test, but was 20 words longer than the official report on Mr. Obama's June call to British Prime Minister Gordon Brown (The Washington Times, 2009).

**Title/Headline:** *Obama Honors Stanley Cup Champion Pittsburgh Penguins*

**Abstract:** President Barack Obama welcomed the 2009 Stanley Cup champion Pittsburgh Penguins to the White House on Thursday and celebrated the hockey team for its performance on and off the ice. The Penguins won the best-of-seven series in June, defeating the defending champion Detroit Red Wings. They then took the cup on a road trip to thank their fans, an act that earned the players the thanks of a grateful president. **"They took it on fishing trips and stopped by neighborhood barbecues. They visited elementary schools and brightened the days of children recovering in the hospital," Obama said during a ceremony that was moved indoors to the East Room because of threatening skies. "I think this Cup has even held a baby or two. So this is a team that understands that being a champion doesn't end when you step off the ice,"** Obama added. His administration is making an effort to encourage volunteerism and public service nationwide. Before arriving at the White House, the team held a hockey clinic for local children that was part of the administration's United We Serve summer of service. Some of those kids were in the audience to see Obama hoist the large trophy, accept a team jersey and pose for pictures. **"That's what the Stanley Cup is all about. Not just having your names engraved alongside the best players in history, but also giving back to others along the way,"** the president said. **"And this spirit of service helps to strengthen our communities, it strengthens our country, and I know the team gets a lot in return for it as well"** (Superville, 2009).

**Title/Headline:** *Obamas Fail In Personal Pitch To Bring 2016 Olympics To Chicago*

**Abstract:** President Obama's failure to grab gold in his personal quest to send the 2016 Olympics to Chicago was a stunning setback for a president who has enjoyed a pop star reception abroad. But Obama's stumble may cost him more than the \$1.2 million of taxpayer money to make the overnight dash from Washington to Copenhagen. Obama and first lady Michelle Obama risked their political capital and the prestige of the presidency on an enormous Olympic campaign that resulted in an early exit for Chicago and the top prize going to Rio de Janeiro. After returning to Washington, Obama said he wished he had come back with better news on the Olympics but congratulated Brazil and thanked everyone who worked on Chicago's bid. **"I'm proud I was able to come in and help make the case in person,"** he said from the White House. **"I believe it's always a worthwhile endeavor to promote and boost the United States of America and invite the world to see what we're all about."** But critics immediately decried Obama's visit to Copenhagen, the first time a U.S. president made such an in-person appeal. **"It demeans the office,"** said GOP consultant Brad Blakeman, a former Bush administration official. **"For the president to be reduced to the effect of the Billy Mays pitchman for the United States to get the Olympics for his home city of Chicago is just not something that presidents do."** Blakeman said Obama spent more time wooing International Olympic Committee officials than he did in his meeting with Gen. Stanley McChrystal, the top commander in Afghanistan, before returning to Washington. **"His priorities are screwed up and the American people are seeing that this president just doesn't get the effects and importance of governing,"** Blakeman told FOX News. Instead of making a personal

appearance, Blakeman said Obama should have sent a delegation led by the first lady and the mayor of Chicago. **"But it does not warrant the participation of the president of the United States, especially when we didn't get the games," he said. "It puts his prestige on the line and we're rebuffed by a bunch...of thugs steeped in fraud and abuse and the president lowered his high office by doing this."** The White House expressed no regret about Obama's effort. **"There was never any guarantee. All the bids were strong; we knew that,"** senior White House adviser David Axelrod told FOX News minutes after Chicago was eliminated (Fox News, 2009).

**Title/Headline:** *Obama Welcomes Lakers To White House*

**Abstract:** President Barack Obama welcomed the NBA champion Los Angeles Lakers to the White House Monday, praising the team for their accomplishments on the basketball court and their service in the community. An avid basketball fan himself, Obama said he gets enormous pleasure from watching excellence on the court — and nobody exemplified excellence more than the Lakers last year, as they won their 15th league title, defeating the Orlando Magic. **Obama said he was especially excited to meet Lakers' coach Phil Jackson, who has won 10 championships, though he didn't hesitate to point out that six of those victories were with Obama's hometown Chicago Bulls "You remember that," Obama joked with former Lakers all-star Magic Johnson, who was on the losing end of the Bulls 1991 victory.** Obama commended the Lakers players not only for their athletic achievements, but also their work off the court. The players held a fitness clinic for Washington-area school children Monday, and several players are donating money to relief efforts in Haiti. The Lakers added to Obama's collection of sports jerseys, presenting him with a bright yellow jersey with the president's name stitched on the back (NBC Sports, 2010).

**Title/Headline:** *Obama On Hand For Duke-Georgetown*

**Abstract:** There was a familiar voice behind the microphone during the Duke-Georgetown basketball game -- that of Barack Obama. The president, attending as a fan, provided about seven minutes of nationally televised hoops commentary in the second half of Saturday's matchup of two top 10 teams at the Verizon Center near the White House. **The president shook hands with several fans as he entered the arena, and enjoyed the game from a front-row seat, not the luxury suites that top government officials sometimes prefer.** Those with him included Vice President Joe Biden, White House senior adviser David Axelrod and White House spokesman Robert Gibbs. Shortly after the second half began, the president was seated between CBS announcers Verne Lundquist and Clark Kellogg. Obama, an avid fan of the sport who often plays pickup basketball games, seemed to impress the pair. After Obama described a spin move and basket by one player, Kellogg told him he could handle the job of announcing. **"After retirement, I'm coming after your job, Clark," Obama replied. "I'm just letting you know. So you either have three more years or seven more years," he said, referring to the possibility that he might be re-elected to a second term.** At another point, CBS aired tape of a pickup game Obama played during the 2008 presidential campaign, including a missed left-handed layup. That prompted Lundquist to ask Obama if he has problems dribbling to his right. **"I went to the Republican House caucus just yesterday to prove that I could go to my right once in a while,"** Obama joked, referring to a televised session Friday when the president attended a House GOP retreat in Baltimore. **The president munched on popcorn and occasionally used his Blackberry.** A Columbia University graduate, he revealed no preference for either team, despite sitting among a throng of wildly cheering Georgetown fans, including some who were shirtless, smeared in blue and gray body paint and wearing wigs. After a referee made a call that went against Georgetown, an obscene chant was cut short after one student admonished another, **"Dude, the president of the United States is right there** (ESPN, 2010).

**Title/Headline:** *Obama's First Pitch Of Baseball Season*

**Abstract:** Barack Obama threw the ceremonial first pitch of the baseball season last night, a century after President William Taft started the American tradition. Every president since 1910 has thrown out a baseball on the opening day of the season – with varying degrees of success – and reaction to the current incumbent's latest effort was mixed. On Twitter critiques of Obama's pitch ranged from "pretty sad" and "appalling" to the rather more generous "good job" and "he should stick to basketball". The current US president was applauded as he took to the field at the start of the Washington Nationals' match wearing the home team's jacket, but the plaudits turned to boos as Obama produced and donned a Chicago White Sox cap. Wearing khaki trousers and brown leather brogues, the president grimaced as he lofted his toss some way wide of Nationals' baseman Ryan Zimmerman, requiring him to jump up to take the catch. Speaking afterwards, Obama said he felt there was room for improvement. "**I was a little disappointed with the pitch. It was high and outside,**" he said. "**Fortunately, Zimmerman has a tall reach.**" "**If I had a whole inning, I'm telling you, I would have cleaned up,**" the president added, somewhat optimistically. Obama's wayward technique may have rubbed off on the home side, who were soundly beaten by Philadelphia Phillies 11-1 after having taken a 1-0 lead (Gabbatt, 2010).

**Title/Headline:** *Barack Obama Plays Golf Eight More Times Than George W Bush*

**Abstract:** President Barack Obama has played golf 32 times since he took office, eight more than his predecessor George W. Bush - who was mocked by the Left for his fondness for the game - did in his entire presidency. Mr Obama's latest outing on the links came on Sunday, when an opportunity opened up on his schedule after flying bans over most of northern and central Europe forced him to cancel his trip to Krakow to attend the funeral of Lech Kaczynski, the Polish president. Mr Bush was shown in the Michael Moore film Fahrenheit 9/11 condemning "terrorist killers" in the Middle East when asked a question on the golf course in 2002. Barely pausing for breath, he added: "Thank you. Now watch this drive." Mr Bush later gave up golf, saying in a 2008 interview: "**I don't want to some mom whose**

son may have recently died to see the commander-in-chief playing golf... And I think playing golf during a war just sends the wrong signal." The golfing figures were compiled by Mark Knoller of CBS Radio, the unofficial White House statistician. Mr Obama's Sunday golf game prompted anger in Poland, where the Warsaw Business Post carried a headline reading: "Obama goes golfing instead of attending Kaczynskis' funeral" (Harnden, 2010).

**Title/Headline:** *President Barack Obama Welcomes World Series Champion New York Yankees To White House*

**Abstract:** When President Obama picked up the World Series trophy for a photo opportunity near the end of Monday's ceremony at the White House, Yankees assistant general manager Jean Afterman threw a little Bronx attitude at the longtime White Sox fan. "Let him hold it," Afterman said. "He may not get a chance again." As the crowd in the East Room laughed at the crack, the President answered quickly with a one-liner of his own. "And you wonder why the other teams don't root for you," Obama said with a smile. It was a festive atmosphere as the Yankees were honored for their 2009 title, presenting Obama with a signed No. 27 pinstriped jersey to commemorate the visit. "It's been nine years since your last title - which must have felt like an eternity for Yankees fans," Obama said toward the beginning of his eight-minute address. "I think other teams would be just fine with a spell like that - the Cubs, for example." Obama praised the Yankees for their work on and off the field, citing the charitable efforts of Mark Teixeira and Jorge Posada, the work ethic of Derek Jeter and the HOPE Week initiative the organization began last summer (Feinsand, 2010).

**Title/Headline:** *Marv Albert's Obama Interview To Lead Lakers-Suns Game 4*

**Abstract:** TNT play-by-play announcer Marv Albert conducted a White House interview with President Obama that will premiere Tuesday (May 25) during the network's pre-show for Game 4 of the Western Conference Finals. Taped Saturday (May 22) on the White House basketball court, the president discussed his passion for hoops, the Phoenix Suns stand against Arizona's new immigration law and the future of Cleveland Cavaliers star **LeBron James**, who Obama would love to see in the uniform of his hometown Chicago Bulls. "I don't want to meddle," Obama told Albert. "I will say this: (Derrick) Rose, Joakim Noah it's a pretty good core. You know, you could see LeBron fitting in pretty well there." James's decision whether to leave the Cavaliers once he becomes a free agent this summer is a hot topic in sports media – particularly since his team was knocked out of the playoffs in the second round by the Boston Celtics. "I think that the most important thing for LeBron right now is actually to find a structure where he's got a coach that he respects and is working hard with teammates who care about him and if that's in Cleveland, then he should stay in Cleveland," Obama said. "If he doesn't feel like he can get it there, then someplace else." Obama cited the Bulls' situation in the 90s as an example, stating the team didn't start winning until Jordan had confidence in coach Phil Jackson, Scottie Pippen and the rest of his teammates. Once that happened, Chicago went on to score six NBA championships. "It wasn't until you got that framework around you that you could be a champion," Obama said, according to the AP. "Same thing happened with Kobe (Bryant). You know, I think that, first with Shaq (O'Neal) then later with (Pau) Gasol, you know, he's gotten that sense of a team around him and I think LeBron hasn't quite been able to get that yet. That's what he needs to find." Albert -- a 40-year veteran of sports broadcasting, including 11 with TNT -- said of his time with Obama, "It is clearly one of the highlights of my broadcasting career, and a great honor and privilege for me personally, to interview the President of the United States at the White House and talk NBA basketball with him." Albert is calling TNT's exclusive coverage of the Western Conference Finals alongside analyst **Doug Collins**. **Title/Headline:** *Obama: Lakers 'Looking Pretty Good'*

**Abstract:** President Barack Obama is projecting a Los Angeles Lakers win in the NBA Finals. Obama told TNT in an interview that he's been surprised by Boston, but believes Kobe Bryant, Pau Gasol and coach Phil Jackson would be too much for the Celtics. "I've got to go with the Lakers again," Obama said. "I think Gasol may be the best big man in the league right now. He's different from Dwight Howard, but he's [got] unbelievable footwork, speed, savvy, he's playing magnificently. "Kobe is the fiercest competitor in the league and they've got what I continue to believe is the best coach in the NBA right now in Phil Jackson, so they're going to be formidable and I think it'll be a tough series. Boston's a veteran club, but the Lakers are looking pretty good." In the interview that aired Tuesday before Game 4 of the Western Conference finals, Obama also praised the Suns for taking a stand against Arizona's immigration law, said it'd be great if Washington got John Wall with the No. 1 pick, and that ticket prices would be his biggest concern if he was NBA commissioner for a day. "I mean, I think that ticket prices have gotten so high, and I understand that salaries are high, ticket prices are going to be high, but you know, you hate to think that the only person that can go to a game is somebody who's got a corporate account," Obama said. "And that's something that I'd love all professional sports, that's not just NBA, but all professional sports to be thinking about that a little more." The interview was conducted by broadcaster Marv Albert on the White House basketball court. It is available on www.NBA.com and is also being shown on NBA TV (ESPN, 2010).

**Title/Headline:** *'Duke Day' At The White House, Obama Jokes 'You're Going To Try To Bust My Bracket Once Again'*

**Abstract:** Payback is sweet, isn't it, coach?" President Obama quipped to Coach K of the Duke Blue Devils, as he honored the team for their NCAA championship win in the Rose Garden today. "I know that all of you remember last year, when I filled out my bracket I picked North Carolina to win it all. It wasn't anything personal. Just trying to win some money. I was right. Coach K wasn't too happy. He basically told me to stick it. Or stick to my day job, is what he said. "The president joked that Coach K led his team to victory this year just so he could come to the White House to "crow" about it. The president called Duke's season and NCAA tournament "incredible" from the start to finish. "The championship game against Butler --- the most-watched championship game in more than 10 years --- was everything fans hoped it would be. It came down to the final possession. And these guys hung in there and won it all." The president's personal assistant and former Duke basketball player Reggie Love -- who almost got as much applause as the president when he walked in the Rose Garden to arrange his boss' papers on the podium -- got a fair portion of the president's speech today. "Reggie was so excited to see his old coach today that I had to make him come out and run some sprint drills -- just to calm him down," Obama laughed, "I play with Reggie now, and when Reggie was playing, Coach said, 'don't shoot.' And when he's on my team, I say to Reggie, 'don't shoot.' So things haven't changed that much. Go down in the post, rebound." The president wished the team good luck next season. "I suspect that you're going to try to bust my bracket once again. But I may not make the same mistake twice" (Miller, 2010).

**Title/Headline:** *Obama Congratulates Lakers*

**Abstract:** The Associated Press is reporting that Phil Jackson was congratulated on his 11th championship by a very satisfied NBA fan yesterday -- President Barack Obama. Obama, a longtime basketball fan, called Jackson from The White House on Friday, congratulating Jackson on the win and telling him that the series was worthy of the rivalry between the Lakers and the Celtics. Obama also told Jackson that he looked forward to congratulating the players in person at the White House. To provide some perspective on just how long Jackson has been on top of the coaching heap, Obama was graduating from law school around the time Jackson won his first championship with Obama's hometown Chicago Bulls (Kroluk, 2010).

**Title/Headline:** *President Obama Takes Fitness, Sports And Nutrition To The Next Level*

**Abstract:** Taking a bold step forward for public health and well-being, today President Obama announced his "Council on Fitness, Sports & Nutrition." Now if that doesn't strike you as bold or important, allow us to take you down memory lane for a moment. Remember the old patch you'd get in physical education class back in the day for doing a certain number of push-ups, sit-ups and running a mile in a certain time? Sometimes it felt like you just got it for showing up because the tests seemed so generic and there were one or two kids who couldn't quite finish it but the coach might give them a patch anyways so they didn't feel left out. Well that is what the Council is, as they call it in the sports world and White House circles, and it has just gotten a huge makeover. This makeover represents what change looks like and is reflective of the 21st century. This is a really BIG deal for a number of reasons. For starters, we know the power of role models on our young people in today's world, we know the great reverence given to sports heroes. **So for the President to put together a rock star collective of contemporary sports heroes and industry leaders in areas of healthy living, cooking, coaching and nutrition from a diversity of backgrounds, each with an incredible personal story, is tremendously powerful. Co-chairing the Council will be Drew Brees, who is nearly as well known for his endless charity and humanitarian work in post-Katrina New Orleans communities as he is for winning this past season's Super Bowl, and three-time Olympian Dominique Dawes, whose 10-year career on the U.S. national gymnastics team inspired millions of youngsters to go for the gold.** With role models like this at the helm, expect big results. And that's where President Obama has taken it to another level: by urging our youth and all Americans to realize that fitness and healthy living requires a holistic approach. We'll need more than one form of intervention to successfully combat the issues of childhood obesity, diabetes and other health problems. This challenge requires a multi-faceted response. We need to not only focus on obesity, but also more broadly on general fitness and nutrition (Ross & Washington, 2010).

**Title/Headline:** *Obama Hails U.S. Team On World Cup Win*

**Abstract:** President Barack Obama called the U.S. World Cup soccer team Thursday to congratulate it on an "extraordinary victory" this week and to wish the team luck in the next round of the tournament. The U.S. team scored in injury time at the end of the second half Wednesday to beat Algeria 1-0 to advance out of group play. **The game was poorly timed for the president, coming as he accepted the resignation of Gen. Stanley McChrystal, who had served as his top commander in Afghanistan. Obama was meeting with McChrystal's replacement, Gen. David Petraeus, in the Oval Office when he heard staffers in the West Wing erupt in cheers when U.S. midfielder Landon Donovan scored the winning goal.** During his call with the team, Obama congratulated Donovan on the goal. He also asked goalkeeper Tim Howard how his ribs were feeling after the injury he suffered in the team's first game, and checked on midfielder Clint Dempsey, who got a split lip in Wednesday's game. Obama told the team the entire country would be cheering when the Americans face Ghana on Saturday (Tribune News, 2010).

**Title/Headline:** *Obama Pays Off World Cup Bet With Goose Island 312 Beer From Chicago*

**Abstract:** President Obama paid off a World Cup bet with British Prime Minister Cameron on Saturday with Goose Island 312 beer from Chicago. Though the U.S.-England game ended up in a tie, both leaders paid off their respective bets. Obama and Cameron mentioned the beers after a joint meeting in Toronto, where they are attending the G-8 and G-20 economic summits. **"We are exchanging -- and paying off our debts at the same time -- this is Goose Island 312 beer from my hometown of Chicago,"** said Obama. Cameron showed off his local brew. "This is Hobgoblin from the Wychwood brew in Witney, in my constituency," he said. Obama said **"so I advised him that in America we drink our beer cold. So he has to put this in the refrigerator before he drinks it, but I think he will find it outstanding. And I'm happy to give that a shot, although I will not drink it warm"** (Sweet, 2010).

**Title/Headline:** *Sky Blue FC Honored As WPS Champs By President Obama*

**Abstract:** President Obama met and honored Sky Blue FC, 2009 champions of Women's Professional Soccer, in a ceremony Thursday in the East Room of the White House. Sky Blue FC earned the league's inaugural title, and Thursday the team enjoyed a distinction typically reserved for champions of the NFL and NBA — an audience with the president. **"This is a pretty exciting time for soccer in America,"** Obama said. "This team came together when it counted. No matter what obstacles they faced. No matter what disappointment and distractions they had to deal with, they had each other's backs and they stayed focused on the ultimate goal. And that's what teams do." Sky Blue captain and 2010 WPS All-Star Christie Rampone, who took over the team's coaching duties during its championship run, presented Obama with a Sky Blue jersey with the number "09" and "Obama" across the back. **"It's great to know that he cares about women's sports,"** Rampone said. "This recognition is huge for us on the female side. It's the next step for

us. The buzz around the country is there's a lot of people supporting and watching the World Cup. Hopefully that can transfer to the women's side" (Klemko, 2010).

**Title/Headline:** *Obama Honors WNBA Champion Phoenix Mercury*

**Abstract:** Since taking office, President Obama has held 21 events to honor championship teams in amateur and professional sports. Today in the State Dining Room, he offered congratulations to the 2009 WNBA Champion Phoenix Mercury. "I know how much hard work goes into a championship season," said the President in praise of the team. Such presidential events are meant to be light-hearted in words and spirit. At today's reception for the Mercury, some of whose members stood taller in their heels than is Mr. Obama, he thanked them for "setting a wonderful example." "Because I live with 3 tall, good-looking women who are quite competitive and push me around under the boards all the time," said the president of his wife and daughters. The tributes to sports teams are a long-stranding presidential tradition. They are political events designed to endear the politician in the Oval Office to the fans of the teams he honors. The current White House prefers it not be seen that way. "It's an opportunity for the President to celebrate excellence and achievement in our country," said Deputy Press Secretary Bill Burton when asked to explain why championship sports teams receive a presidential tribute (Knoller, 2010).

**Title/Headline:** *Madden 11 Features Appearance By Obama*

**Abstract:** News that President Obama will make a cameo in the latest installment of the popular Madden football games has been feverishly circling through the blogosphere. According to gaming website IGN, players who manage to lead their team to a Super Bowl victory in Madden NFL '11 will be treated to a special video featuring the full fanfare associated with winning the coveted title, including a meeting with the president of the United States. You can see a picture from the video at left featuring last year's champions, the New Orleans Saints, with a virtual Mr. Obama greeting the team on the White House's South Lawn where he poses for pictures along with a custom "Obama" jersey -- much like he has done in real life. The videos and accompanying commentary after the win are tailored to each specific team. This is not the first time Mr. Obama has made an appearance in a video game. During the 2008 presidential campaign, the Obama camp placed an advertisement in the racing game Burnout Paradise reminding players that "Early Voting Has Begun" (Choe, 2010).

**Title/Headline:** *Obama Attends Mystics Game*

**Abstract:** President Barack Obama checked out the WNBA's Washington Mystics on Sunday after spending the morning shooting some hoops himself. Obama, his daughter Sasha and a friend of Sasha's had courtside seats for a women's basketball game between the Mystics and the Tulsa Shock at the Verizon Center in downtown Washington. Sasha and her friend, whom the White House declined to identify, both wore Mystics jerseys. The crowd at the arena roared when the scoreboard showed the president's arrival. Obama chatted during the game with Mystics owner Ted Leonsis and team president Sheila Johnson. Obama and his party left the arena a few minutes before the end of the game, which the Mystics won, 87-62. Earlier Sunday, Obama played basketball against an Army team at Fort McNair in the District of Columbia. Obama has attended basketball games at the Verizon Center before. In January he had front-row seats for a Duke-Georgetown game, and even sat in with CBS' announcers for about seven minutes. Last year, he saw his hometown Chicago Bulls lose a game to the Washington Wizards at the arena (The Washington Times, 2010).

**Title/Headline:** *It's Hoops For The Troops: Basketball Stars, Obama Play For Wounded Vets*

**Abstract:** President Barack Obama pulled together an informal dream team of current and former basketball superstars Sunday. But only a few people got to see it. LeBron James, Dwyane Wade, Carmelo Anthony and other NBA all-stars joined Obama in Washington to entertain wounded troops. The present-day stars were joined by some retired legends, including Bill Russell and Magic Johnson. College player Maya Moore of the Connecticut Huskies women's team also played. The game was played for a group of "wounded warriors" -- troops injured in action -- and participants in the White House's mentoring program. It took place at a gym inside Washington's Fort McNair, a short drive from the White House. The president was inside the gym for about two hours. The reporters assigned to keep tabs on the president were shut out of the gym, forced to wait in vans outside. Asked why media coverage was blocked, White House Press Secretary Robert Gibbs said Obama "just wanted to play." After the game some of the players joined Obama and a group of his friends for a barbecue at the White House, capping the president's 49th birthday week (Fox News, 2010).

**Title/Headline:** *President Obama To Honor NCAA Champion Student Athletes At The White House*

**Abstract:** Next month, President Obama will continue a tradition started by President George W. Bush by honoring championship teams and student athletes from across the NCAA with a reception at the White House. The President will welcome student athletes from dozens of schools and various sports to congratulate them on their accomplishments in the classroom as well as on and off the playing field. In association with this event, various championship teams and players will be recognized for their efforts to give back to their communities, continuing an effort begun by President Obama of sports champions being commended for service as part of a White House visit. More details, including press access information, will be released in the coming weeks. Some of the schools and teams invited to attend the September 13 event include:

1. Augusta State University Men's Golf
2. Boston College Men's Ice Hockey
3. Duke University Men's Lacrosse
4. Fairleigh Dickinson University Women's Bowling
5. Oklahoma State University Men's Cross Country
6. Pennsylvania State University Women's Volleyball
7. Pennsylvania State University Men's & Women's Fencing
8. Purdue University Women's Golf
9. Stanford University Men's Volleyball
10. Stanford University Women's Tennis
11. Texas A&M University, College Station Men's and Women's Outdoor Track and Field
12. Texas Christian University Men's & Women's Rifle
13. University of California, Los Angeles Softball
14. University of California Los Angeles Women's Gymnastics
15. University of Denver Men's & Women's Skiing
16. University of Florida Men's Indoor Track and Field
17. University of Florida Women's Swimming and Diving
18. University of Iowa Wrestling
19. University of Maryland, College Park Women's Lacrosse
20. University of Michigan Men's Gymnastics
21. University of Minnesota Duluth Women's Ice Hockey
22. University of North Carolina, Chapel Hill Field Hockey
23. University of North Carolina, Chapel Hill Women's Soccer
24. University of Oregon Women's Indoor Track and Field
25. University of South Carolina Baseball
26. University of Southern California Men's Tennis
27. University of Southern California Men's Water Polo
28. University of Southern California Women's Water Polo
29. University of Texas at Austin Men's Swimming and Diving
30. University of Virginia Men's Soccer
31. University of Virginia Women's Rowing
32. Villanova University Women's Cross Country
33. Villanova University Football (White House, 2010).

**Title/Headline:** *President Obama Welcomes Super Bowl Champs To White House*

**Abstract:** The New Orleans Saints marched in to the White House on Monday and received a salute from President Barack Obama for lifting up "the hopes and the dreams of a shattered city" with their Super Bowl victory. Obama welcomed the Saints in an East Room ceremony where he congratulated the players, owner and coaches several months after they beat the Indianapolis Colts, 31-17, for their first-ever football championship. Obama said it was an unbelievable season for the team after decades of frustration. "I'm a Bears fan, I'm not going to lie, but this was a big win for the country -- not just New Orleans," the president said. He noted that after Hurricane Katrina the Saints had to play an entire season on the road because their home stadium, the Superdome, was ruined in the storm. "Back then, people didn't even know if the team was coming back. People didn't even know if the city was coming back," Obama said. "Now, New Orleans and the New Orleans Saints are here to stay." Obama noted that he has to make tough decisions as president. "But I never decided on an onside kick in the second half of the Super Bowl," the president joked, referencing the bold play that helped the Saints clinch their victory. Team members presented Obama with a Saints jersey with the number of his presidency -- 44 -- on the back (NFL, 2010).

**Title/Headline:** *Obama Gets 12 Stitches After Errant Elbow To Mouth*

**Abstract:** President Barack Obama needed 12 stitches in his upper lip after taking an errant elbow during a pickup basketball game Friday morning with family and friends visiting for the Thanksgiving holiday, the White House said. First word of the injury came in a statement from press secretary Robert Gibbs nearly three hours after the incident. The White House did not initially name the person who caused the injury, but identified him later Friday as Rey Decerega, director of programs for the Congressional Hispanic Caucus Institute. **Obama received the stitches under local anesthesia in the doctor's office on the ground floor of the White House after returning home. Doctors used a smaller filament than typically used, which increases the number of stitches but makes a tighter stitch and leaves a smaller scar.** The president had gone to nearby Fort McNair to indulge in a game of basketball, one of his favorite athletic pursuits. It was a five-on-five contest involving family and friends. **Among the players were Obama's nephew, Avery Robinson, Education Secretary Arne Duncan and Reggie Love, Obama's personal assistant, who played at Duke University.** The White House said the injury happened during their fifth and final game when Decerega turned to take a shot and hit Obama, who was playing defense, in the mouth with his elbow. **Obama emerged from the building after about 90 minutes of play, wearing a short-sleeve T-shirt and gym pants, and was seen dabbing at his mouth with what appeared to be a wad of gauze.** A few hours later, reporters who had gathered on the White House driveway for the arrival of the Christmas tree saw the president in an upstairs window, pressing an ice pack against his mouth before he stood and walked away. "After being inadvertently hit with an opposing player's elbow in the lip while playing basketball with friends and family, the president received 12 stitches today administered by the White House Medical Unit," Gibbs said. Decerega

issued a statement through the White House late Friday. He did not immediately respond to an e-mail request from The Associated Press for independent comment. **"I learned today the president is both a tough competitor and a good sport," the statement said. "I enjoyed playing basketball with him this morning. I'm sure he'll be back out on the court again soon"** (CBS Sports, 2010).

**Source:** CBS News, Kevin Hechtkopf

**Title/Headline:** *Obama Lauds Michael Vick's Second Chance*

**Abstract:** President Obama has voiced his approval of the second chance Philadelphia Eagles quarterback Michael Vick is getting this season, just a year removed from serving 18 months in federal prison on charges related to a dog fighting ring. Peter King of Sports Illustrated and NBC Sports reported Monday that Mr. Obama recently called Eagles owner Jeffrey Lurie to praise the team for giving Vick a chance. Lurie said Mr. Obama told him that **"So many people who serve time never get a fair second chance," King reported on SI.com. Lurie said Mr. Obama was "passionate about it," adding that the president said "it's never a level playing field for prisoners when they get out of jail. And he was happy that we did something on such a national stage that showed our faith in giving someone a second chance after such a major downfall"** (Hechtkopf, 2010).

**Date:** December 28, 2010

**Source:** Fox News, Eve Zibel

**Title/Headline:** *President Obama Talks Vick But Still Loves His Bears*

**Abstract:** President Obama may love his Chicago Bears, but that love didn't stop him from calling Jeffrey Lurie, the owner of the surging Philadelphia Eagles and talking about quarterback Michael Vick. The call, placed by the president to Lurie and reported in Sports Illustrated, was to discuss the use of alternative energy at Lincoln Financial Field, the home of the Eagles, and the host of Tuesday night's football game between the Eagles and the Minnesota Vikings. **In the course of the conversation, the president brought up Vick and discussed the second chance quarterback received when the Eagles picked him up after time spent in prison for dog fighting.** White House Spokesman Bill Burton told Fox News' Mike Emanuel about the conversation, "He [Obama] of course condemns the crimes that Michael Vick was convicted of but, as he's said previously, he does think that individuals who have paid for their crimes should have an opportunity to contribute to society again." **Lurie told Sports Illustrated's Peter King about the conversation saying, "He said, 'So many people who serve time never get a fair second chance. He was ... passionate about it. He said it's never a level playing field for prisoners when they get out of jail. And he was happy that we did something on such a national stage that showed our faith in giving someone a second chance after such a major downfall.' And Lurie made sure to point out that even if President Obama is known for his basketball skills, he has equal respect for gridiron greats. 'He's a real football fan,' Lurie told King. 'He loves his Bears. He really follows it. He knew how Michael was doing. It was really interesting to hear.'**" The ASPCA has also sent out a statement regarding Vick. Since Vick's release from prison, he has worked with the Humane Society and traveled around the United States speaking to children about dog fighting and what he says were mistakes he made. The organization says it wants to remind people Vick was convicted for dog fighting and he also participated in the killing of dogs who did not perform well, but the group also agrees with the president when talking about second chances - although with limits(Zibel, 2010).

**Conclusion:** Barry Soetoro aka Barack Obama has met with almost every major sports star and celebrity in America, and when a nuke goes off he will demand their full support. From secret meetings at the White House with LeBron James to LIVE TV appearances and courtside seats, Obama's handlers have made sure that every American knows how much Obama loves sports. This is most likely a political ploy aimed at gaining the sports community's support when the Super Bowl is nuked. The Powers that Be are betting that the professional athletes will support Obama in a nuclear crisis and are hoping the American people will also fall in line. Don't bet on it.

## The Nuclear Bible: Terrorism & America

**Intro:** The link between Muslim/Arab extremists and “white” American citizens has been successfully drawn with the fabrication and propagation of mass arrests of alleged “terrorists” of both American, Spanish, African, and Middle Eastern descent. The most disturbing of all of these accounts is the implications drawn from Americans arrested for allegedly seeking nuclear secrets and access. Tying the American people with alleged terrorists from the Middle East is key in painting the Americans as sympathizers should a nuclear attack transpire. In the war on terror, making all races of people suspects in eliminating people’s God given rights.

**Title/Headline:** *U.S. Citizen Arrested In 'Dirty Bomb' Plot*

**Abstract:** With the arrest of a former Chicago street gang member in a suspected al-Qaeda plot to explode a radioactive "dirty bomb" in the United States, authorities are seeking others who might have been involved, U.S. law enforcement officials said Monday. Abdullah Al Muhajir, 31, who officials say changed his name from Jose Padilla after adopting a radical brand of Islam while jailed in Florida, was believed to have been on a scouting mission for possible targets when he was arrested last month in Chicago, where he grew up. Al Muhajir was stopped as he tried to re-enter the USA at O'Hare International Airport after flying there from Zurich. He had been in Pakistan, where authorities working the case have arrested two unidentified Pakistanis. **Authorities said that for much of the past month Al Muhajir, like several other detainees in terrorism probes, had been held in the New York area while officials investigated them.** Sunday, he was moved to the U.S. Navy jail in Charleston, S.C., authorities said. U.S. officials provided few details on Al Muhajir's alleged path from Chicago's gang culture to al-Qaeda, but their sketchy portrayal of him reflects the increasing threat they say is posed by the terror network's efforts to recruit Westerners. **Officials said that after Al Muhajir's release in 1992 from a jail in Broward County, Fla., where he served 10 months for aggravated assault and weapons violations, he continued to live in South Florida, where his mother had moved from Chicago. A U.S. law enforcement official said Al Muhajir went to the Middle East in 1998, then lived in Egypt but traveled frequently to Pakistan and Afghanistan.** Before his arrest, the official said, Al Muhajir had returned to the USA once or twice. A Defense Department official said Abu Zubaydah, a top al-Qaeda official in U.S. custody, led U.S. authorities to Al Muhajir — possibly to try to sow fear in the USA by showing that al-Qaeda had recruited an American. Al Muhajir met Zubaydah in Afghanistan last year and then traveled to Pakistan, where he studied how to assemble a radioactive bomb at an al-Qaeda safe house in Lahore, a senior U.S. law enforcement official said. Weeks later, Al Muhajir met with senior al-Qaeda leaders in Karachi. **The dirty bomb plot was in its initial stages and did not have a target, although Al Muhajir has "indicated some knowledge of the Washington, D.C., area," Deputy Defense Secretary Paul Wolfowitz said Monday. Intelligence sources said Chicago also might have been a potential target.** A senior U.S. law enforcement official said part of the plot involved attacking hotels and gas stations with conventional explosives. U.S. officials wouldn't comment on any alleged co-conspirators. **A senior Pakistani intelligence official said security agents there detained Al Muhajir and two Pakistanis for a few days in April for passport irregularities. Pakistani authorities told FBI agents, who asked them to re-arrest the three. The Pakistanis were arrested quickly; the FBI and CIA tracked Al Muhajir to Switzerland, where agents believe he picked up money for his trip to Chicago.** When he was arrested, he had more than \$10,000, authorities said. "We have disrupted an unfolding terrorist plot," Attorney General John Ashcroft said in Moscow, where he met with Russian officials. **"Al-Qaeda officials knew that as a citizen of the United States ... Al Muhajir would be able to travel freely in the U.S."** A dirty bomb uses a conventional explosive such as dynamite to spread radioactive material. Al-Qaeda has been trying to acquire such material, and in 2000 authorities learned that the network wanted to detonate a dirty bomb in the U.S. Capitol. Officials said Al Muhajir had not obtained any radioactive material. **No charges have been filed. Al Muhajir's transfer to Defense Department custody as an "enemy combatant" does not necessarily mean that officials plan to reverse plans not to try U.S. citizens in military tribunals, officials said. Authorities suggested the transfer was aimed at giving them a way to hold Al Muhajir indefinitely while they try to unravel the plot (Leinwand & Kelley, 2002).**

**Title/Headline:** *Fox Hypes Terror Of 'White Al Qaeda Army'*

**Abstract:** The hosts of Fox & Friends are all worked up over a claim in the British press that al Qaeda may be recruiting Caucasian members to infiltrate Western societies. **"Have you heard about this new thing going on in Great Britain," asked host Gretchen Carlson, "[where] Al Qaeda [is] rooting up all these Britons, essentially, 1400 strong, apparently, in a new, what's being called a new 'White al Qaeda Army.'"** Tougher to detect, potentially ... "Yeah, because they're not Muslims," co-host Steve Doocy commented. **"They look just like regular British people."** **"This is what we've always talked about,"** Carlson went on, "That if you have people in one country transplanting to another religion and they maybe aren't exactly what you *think* they are, that can be more difficult to fight. **"Yeah. They're converting them in prison, to, uh..." "To kill us!" "Yeah, great,"** said co-hosts Brian Kilmeade and Steve Doocy in turn. Brian Kilmeade then brought on Mike Baker, a former CIA agent and professional counter-terrorism expert. **"Mike Baker's here -- this word that al Qaeda's building up a white terror army of up to 1500 operatives in the UK:"** said Kilmeade. "How soon could they strike us here, and would they be trying to do something similar using convicted criminals?" Baker told Kilmeade that al Qaeda looks for

operatives who can fit in, just as the CIA does, saying, **"If they can recruit a Scandinavian, that's the holy grail for them."** He added, **"They need people who can move around freely and do their bidding,"** apparently implying that **blue-eyed blondes are the people who blend most seamlessly into Western society.** However, Baker dismissed Kilmeade's suggestion that al Qaeda would be particularly interested in recruiting in US prisons. "To go into a prison and try to recruit individuals -- that person's already tainted. What they really need, they need people who haven't run afoul of law enforcement in the past. ... Their problems are extreme in trying to recruit someone who can go out there and carry out their business" (Edwards & Kane, 2008).

**Title/Headline:** *Commander Warns Of Homeland Terror Threat*

**Abstract:** **Al Qaeda terrorists may be plotting more urgently to attack the United States to maintain their credibility and ability to recruit followers,** the U.S. military commander in charge of domestic defense said. Air Force Gen. Gene Renuart, chief of the U.S. Northern Command, also told reporters that he has not seen any direct threats tied to the U.S. presidential elections. But he said it would be rash to think that such threats are not there. "We need only to look at Spain and see that they're certainly willing to try to do something that is significant that could affect an election process," Renuart said. **"I think it would be imprudent of us to let down our guard believing that if there's no credible threat that you know of today, there won't be something tomorrow."** While he said that U.S. authorities have thwarted attacks on a number of occasions, he said terrorist cells may be working harder than ever to plot high-impact events. He did not point to any specific intelligence that authorities have received but said the "chatter" they are hearing "gives me no reason to believe they're going to slow down" in their efforts to target the U.S. "If an organization like that is to maintain credibility and continue to grow more of its extremists, it has to show tangible results," Renuart said. "So I think there may be a certain sense of urgency among that organization to have an effect. So it would tell me that they're trying harder." Asked about the terror threat, Homeland Security spokesman Russ Knocke said, **"There continues to be no credible information telling us about an imminent threat to homeland at this time."** In July, U.S. intelligence analysts, in a threat assessment, concluded that al Qaeda had rebuilt its operating capability to a level not seen since just before the Sept. 11, 2001, terrorist attacks. The report said the terror network had regrouped along the Afghan-Pakistan border, but it also noted that officials knew of no specific credible threat of an attack on U.S. soil. About the same time, Homeland Security Secretary Michael Chertoff raised eyebrows when he said he had a "gut feeling" that the United States faced a heightened risk of attack. **"There continues to be no credible information telling us about an imminent threat to homeland at this time."** Russ Knocke, Homeland Security spokesman stated. On Thursday, however, Chertoff said the U.S. has successfully lowered the risk of a large-scale domestic terrorist attack for the near future. **"We have significantly reduced the risk of a major attack in the short term,"** Chertoff told a group of editors at The Washington Post in a report posted online Thursday. Chertoff said the U.S. effort was one of the reasons there has been an increase in attacks by Islamic extremists in Europe. Improvements in U.S. traveler screening and border security have shifted the focus of al Qaeda operatives and sympathizers to Europe, he said. Renuart said that of the more than **a dozen daily events that Northern Command responds to - ranging from natural disasters to threats - two or three may have the potential to be terrorist incidents.** The chatter, which included public audio and video tapes released on the Internet by al Qaeda leaders, suggests that they are looking for a way to have a big impact again, he said. Pressed for details, he said the chatter was more common but "whether that's louder or more ominous, I'm not sure I'm ready to draw that conclusion." **He did, however, repeat his assertion - which he first made in July - that he believes there are al Qaeda cells or sympathizers within the United States.** President Bush, in a speech Thursday, also said the United States remained under threat from terrorists. Marking the fifth anniversary of the creation of the Homeland Security Department, Bush said that in the aftermath of the Sept. 11 attacks **"it was hard to imagine that we would reach this milestone without another attack on our homeland."** Yet he said, **"On this anniversary, we must also remember that the danger to our country has not passed. Since the attacks of 9/11, the terrorists have tried to strike our homeland again and again. We've disrupted numerous planned attacks - including a plot to fly an airplane into the tallest building on the West Coast and another to blow up passenger jets headed for America across the Atlantic Ocean."** Mr. Bush said the lesson is clear: **"The enemy remains active, deadly in its intent - and in the face of this danger, the United States must never let down its guard"** (CBS News, 2008).

**Title/Headline:** *Guard Killed During Shooting At Holocaust Museum*

**Abstract:** **A rifle-wielding white supremacist entered Washington's Holocaust museum on Wednesday afternoon, fatally shooting a security guard before being wounded himself by return fire from other guards,** authorities said. Stephen Tyrone Johns, a six-year veteran of the museum's security staff, later "died heroically in the line of duty," said Sara Bloomfield, museum director. **Law enforcement sources identified the suspect as James W. von Brunn, an 88-year-old white supremacist from Maryland. He is a known Holocaust denier** who created an anti-Semitic Web site called "The Holy Western Empire." He has repeatedly claimed "The Diary of Anne Frank," a widely read book about a teenage girl's experiences under Nazi rule, was a hoax. The museum shooting occurred on a day the museum was to stage a play based on Anne Frank and two days before what would have been her 80th birthday. Investigators found a notebook in the suspect's car listing other locations in Washington, a federal official told CNN. It was unclear what purpose the list served. **Von Brunn allegedly entered the U.S. Holocaust Memorial Museum at 12:50 p.m. Wednesday and immediately shot Johns with a rifle, said**

**Chief Cathy Lanier of the District of Columbia's Metropolitan Police Department. Two other security guards returned fire, according to Lanier and the museum statement.** Both Johns and Von Brunn were taken to George Washington University Hospital, said D.C. Mayor Adrian Fenty. Johns died at the hospital. Von Brunn was in critical condition, Fenty said. Johns, 40, was a resident of Temple Hills, Maryland, according to a statement issued by Wackenhut Services Inc., which has provided security services at the museum since 2002. "Obviously there are no words to express our grief and shock over the horrific event that took place at this museum today," Bloomfield, the museum director, said. She said the museum was closed for the remainder of the day and would remain closed Thursday in honor of Johns. **Brunn served six years in prison for trying in 1981 to kidnap Federal Reserve board members because of high interest rates.** He blamed his prison term on a "Negro jury, Jew/Negro attorneys" and "a Jew judge," he said on his Web site, "Holy Western Empire." The Southern Poverty Law Center, which focuses on human rights, said Brunn has "an extremely long history with neo-Nazis and white supremacists." A place that stimulates visitors to confront hatred and promotes peace and human dignity, the Holocaust museum on Wednesday became the scene of everything that was opposite. Witnesses described blood on the floor and chaos within the museum's halls. Visitor Maria Hernandez told CNN she heard five shots and saw the wounded security guard. "It was definitely a security guard; he was down bleeding on the floor," said Hernandez, 19. "He was face down. His back ... blood was coming out." Sirens blared as emergency vehicles converged on the area, which is near the Washington Monument and other popular tourist attractions. The museum was full at the time, with a "couple of thousand" people inside, said William Parsons, chief of staff at the museum. **"Never take your guard force and security people for granted," he said. "They did exactly what they were supposed to do to protect people in the museum."** The shooting sent shock waves throughout the nation's capital and elsewhere. **"I am shocked and saddened by today's shooting at the U.S. Holocaust Memorial Museum," said President Obama, who just days earlier had spoken emotionally about the Holocaust when he visited Buchenwald, a former Nazi concentration camp with Holocaust survivor and Nobel Peace Prize laureate Elie Wiesel. "This outrageous act reminds us that we must remain vigilant against anti-Semitism and prejudice in all its forms,"** Obama said. "No American institution is more important to this effort than the Holocaust Museum, and no act of violence will diminish our determination to honor those who were lost by building a more peaceful and tolerant world." Israel issued a statement through its embassy, expressing sadness and condemning the attack. Fenty called the shooting "an extremely isolated incident" in the nation's capital, which is a major tourist destination. **"In these days and times, you never know when someone is going to grab a gun and use it in an inappropriate way," he said. The museum canceled a performance scheduled for Wednesday night of a play about racism and anti-Semitism, based on a fictional meeting between Anne Frank and Emmett Till, the teenage victim of a racist killing in the United States. U.S. Attorney Gen. Eric Holder and Rep. Steve Cohen, D-Tennessee, were among those planning to attend the play, which was written by Janet Langhart Cohen, the wife of former Defense Secretary and U.S. Sen. William Cohen. Langhart Cohen told CNN that Anne Frank's young life was ended by people filled with hate. She said it was hard to see that same hate manifest itself at this place of remembrance (CNN, 2009).**

**Title/Headline:** *Prepare For Rebellion, Obama Orders US-Canadian Troops*

**Abstract:** Kremlin position papers presented to Prime Minister Putin today on his upcoming meeting with NATO Secretary General Anders Fogh Rasmussen state that the European-US military alliance has authorized an 'emergency request' from President Obama to utilize American and Canadian NATO troops to put down what is expected to be a "rebellion" after the expected January, 2010 'declaration of bankruptcy' by the State of California. According to these reports, **Obama's fears of rebellion are due to the economic health of California** (the United States largest State) after the 3rd largest US State, New York, declared a 'fiscal emergency' and refused to release to its cities and towns over \$750 Million due them this past week with the Governor of New York, David Paterson, declaring "I can't say this enough: The state has run out of money." New York's fiscal crisis, however, pales in comparison to California's, where new economic data points to its expected 5-year budget deficit reaching the staggering amount of over \$100 Billion which Russian economists warn will result in budget cuts so steep as to create 'social chaos' among this States 36 million citizens. **Reports from the United States are, indeed, confirming the mass movement of military supplies and thousands of Canadian Special Forces Troops to California from the Canadian Forces Base of Petawawa to join their American military counterparts, with 'secondary' reports stating that at least 1,000 tanks are massing their too. Russian Military Analysts are further warning in this report that Obama has decided to implement the feared RAND Corporation (one of the most powerful research arms of the US Military-Industrial-Homeland Security Complex) police state 'blueprint' tilted "Stability Police Force for the United States: Justification and Creating U.S. Capabilities" that has been modeled on the Nazi German secret police forces organization Geheime Staatspolizei (Gestapo) meant to 'control and demoralize' any opposition to the state. Even worse for these American people is the legalization process currently embedded in their new health care legislation which will see everyone of them becoming virtual slaves of their government, and as warned about by the Fox News Service in their report titled "Be Afraid, Be Very Afraid of Obama's Latest Big Brother Plan" and which says: "Under the Democrats' national health care scheme not only would OPM be charged with overseeing and administering federal employees health care but they will have the added charge of administering civilian federal health care as well. What does that mean? Basically, that Americans will be treated as "civil servants." Are you starting to see the danger? The more government seeks to control our lives the more Orwellian it gets. This "big brother" mentality that "government knows best" and that it is their mission to provide cradle to grave "care" of its citizens will doom America as we know it. Under such a system the individual becomes meaningless and the state becomes the entity upon which we are all forced to rely."** Unfortunately, with or without these Americans succumbing to the loss of their Nation through the establishment of a police state, their fate appears to have already been sealed as new reports are showing that by their continued saving they are failing to provide China with the money needed through the buying of goods to purchase US bonds to keep them afloat, and which has led to the incredible circumstance of the United States, through its Federal Reserve and other financial entities, becoming the largest buyers of their own debt. Not being seen in all of these dire events by the American people is that their present collapse as an independent Nation was engineered by their own President Obama, who working in concert with the previous President, George Bush, sold them out to Wall Street by packing his administration with banking insiders have, literally, pillaged the entire

economic future of the United States for the benefit of their elite classes and, incredibly, supported these once collapsing banks with over \$352 Billion in drug money. **And so grave has it become for ordinary Americans that new reports are now showing that in what was once the most powerful Nation on Earth, there now exists an 'epidemic' of child hunger and one their fastest growing cities is a tent-town of newly homeless named "Obamaville" in a stark reminder of the thousands of shanty towns named Hoovervilles built during the Great Depression.** For those American people believing their propaganda media reports that a recovery is underway they couldn't be more mistaken, as newly released data shows that of the millions of jobs lost these past 2 years almost all of them are permanent. And, as always, these people are being kept from knowing the full and brutal truth of their economic collapse with reports also showing that the latest unemployment figures released by the US government were faked. **But to the greatest fears of these Americans should be the newly released information showing that US scientists have perfected, for the first time in history, a new drugless technique to wipe from these people's minds their very own memories, and as we can read: "In a scientific experiment that brings to mind the memory-erasing escapade in the 2004 film "Eternal Sunshine of the Spotless Mind," scientists have blocked fearful recollections in human participants, sans drugs. The results challenge the view that our long-term memories are fixed and resistant to change."** Russian Military Psychologists have long warned that the West's longest term plan to control their soon to be rebellious populations lie in memory altering techniques such as are being perfected in the United States and due to be deployed through their mass media in radio programmes, television, and movie broadcasts outlets as these Nations past reliance on the drugging of their citizens through mass fluoridation is becoming more and more ineffectual. Important to note too is that the economic collapse of the United States is just one of the catastrophic dangers they are facing, as this past week the giant plant genetics company Bayer admitted in a US Federal Court that it has been "unable to control the spread of its genetically-engineered organisms despite 'the best practices' to stop widespread contamination" and which may very well see the destruction of the American's ability to feed themselves as these 'monster plants' reap their destruction on Nature. To all of these events, it is not in our knowing if the American people will awaken from their self induced slumber to arise, as they have many times throughout their history, to reclaim for themselves what is now rapidly being stolen from them. **But, and if their present actions are a predictor to what they may do in the future, one can only fear for them as they are marched in lockstep towards an abyss they only fail to see because they won't open their eyes** (The European Union Times, 2009).

**Title/Headline:** *FBI Chief Tells Congress Terrorist Threat Grows More Worrisome*

**Abstract:** The head of the FBI, Robert Muller, statements that the U.S. faces threats from "homegrown terrorists" who live in the communities they attack and train on their own. Muller also stated that that law enforcement agencies have disrupted terrorist plots in Georgia, Illinois, Massachusetts, Minnesota, Colorado, Texas and elsewhere in the past year, **"We cannot discount the lone offender threat here at home -- the individual who may take up arms and strike without notice."** Muller went on to state that the terror threat increases "with each passing day," and told the Senate Judiciary Committee that law enforcement agencies have disrupted several plots in the past year as terrorists "...remain determined to strike the United States." Mueller testified that, "As the Christmas Day attempted bombing illustrates, the threats we face are becoming more diverse and more dangerous with each passing day. **We not only face threats from Al-Qaeda, but also from self-directed groups not part of Al-Qaeda's formal structure**" (Woellert, 2010).

**Title/Headline:** *Suspect In Recruit Shooting Claims Al Qaeda Ties*

**Abstract:** The man accused of killing one soldier and wounding another outside an Arkansas military recruiting center has asked a judge to change his plea to guilty, claiming ties to Al Qaeda. Abdulhakim Muhammad's attorney, Claiborne Ferguson, said Thursday night that his client sent a letter earlier this month to the judge in his case asking to change his plea to capital murder and attempted capital murder charges. Ferguson said he hadn't discussed the request with his client before the letter was sent. **Under Arkansas law prosecutors would have to agree and waive the death penalty before the judge could consider it, Ferguson said. Pvt. William Long of Conway was killed in the June 1 attack, and Pvt. Quinton Ezeagwula was wounded. Muhammad has called the shootings justified retaliation for U.S. military action in the Middle East. He told The Associated Press in a telephone interview last year that he doesn't believe he's guilty.** The New York Times, which first reported the letter on its Web site Thursday, said Muhammad described himself in the letter as a soldier in Al Qaeda in the Arabian Peninsula and called the shooting "a Jihadi Attack." The group has claimed responsibility for the attempted Christmas Day bombing of a Detroit-bound American airliner. **"I wasn't insane or post traumatic, nor was I forced to do this act,"** Muhammad claimed in the handwritten letter, the newspaper reported. Ferguson said he didn't know how seriously to take Muhammad's claims of terror ties and expressed frustration with his client sending the letter without consulting him beforehand. **"He's said lots of things. None of them seem to be real consistent with each other,"** Ferguson said. **"I'm a little irritated with it."** Pulaski County Prosecutor Larry Jegley did not immediately return a message left on his cell phone Thursday night, but prosecutors have said they plan to seek the death penalty in the case. Muhammad was arrested about eight miles from the recruiting center, on Interstate 630, shortly after the shootings. Police said they recovered Molotov cocktails, three guns and ammunition from his pickup truck. **An internal law enforcement memo said Muhammad may have considered other targets, including military sites and Jewish organizations in the Southeast. A law enforcement official told the AP in June that Muhammad had been under investigation by an FBI-led terrorism task force since he returned to the United States from Yemen in 2008.** Muhammad, who was born Carlos Bledsoe, had moved to Little Rock to work in his father's Memphis-based tour bus company as it branched out. Muhammad, who has called the AP twice since his arrest, has claimed responsibility for the shooting and said it was justified because of what he called American-directed hostilities toward the Muslim world. Last week, Pulaski County Circuit Judge Herbert Wright Jr. ordered the state public defenders commission to pay some of the legal bills for Muhammad's trial, which is scheduled to begin in June. Ferguson was hired by Muhammad's family to represent him (Fox News, 2010).

**Title/Headline:** *Bin Laden Claims Responsibility For Christmas Day Bomb Attempt*

**Abstract:** Usama bin Laden claimed responsibility for the failed attempt to bomb a Detroit-bound airliner on Christmas day, releasing a new audio message Sunday threatening more attacks on the United States. A senior U.S. intelligence official in Washington called the latest message "curious," commenting that the tape is uncharacteristically brief and shows efforts by bin Laden to attach himself to Palestine's cause. **The official also said there is no evidence that bin Laden had any involvement on the Christmas Day attack — or even knew about it beforehand — but that perhaps the leader hopes to attach himself with a "successful" operation by Al Qaeda.** The message suggests the Al Qaeda leader wants to appear in direct command of the terrorist group's many affiliates around the world at a time when some analysts have suggested he is mostly a figurehead. In the minute-long recording carried by Al-Jazeera Arabic news channel, bin Laden addressed President Obama saying the Christmas attack was meant to send a message similar to that of the Sept. 11 attacks. "The message delivered to you through the plane of the heroic warrior Umar Farouk Abdulmutallab was a confirmation of the previous messages sent by the heroes of the Sept. 11," he said. **"America will never dream of security unless we will have it in reality in Palestine," he added. "God willing, our raids on you will continue as long as your support for the Israelis continues."** White House Press Secretary Robert Gibbs said the tape has yet to be authenticated, but wouldn't offer an opinion on whether bin Laden had any role in the Christmas Day bombing. "I think everybody in this world understands that this is somebody that has to pop up in our lives over an audio tape because he's nothing but a cowardly, murderous thug and a terrorist that will someday, hopefully soon, be brought to justice," Gibbs told "Fox News Sunday." **On Christmas Day, Nigerian Abdulmutallab attempted to blow up his Northwest Airlines flight as it approached Detroit Metro Airport. But the explosive powder he was hiding in his underwear failed to detonate.** He told federal agents shortly afterward that he had been trained and given the explosives by Al Qaeda in the Arabian Peninsula, an Al Qaeda affiliate in Yemen. The U.S. intelligence official said the Yemen-based group is linked with the central Al Qaeda group that bin Laden heads and recent intelligence indicates there are ongoing contacts between Al Qaeda in Yemen and Pakistan. **He spoke on condition of anonymity because of the sensitive nature of the information. Bin Laden's message, coming long after AQAP gave its own claim of responsibility, appears to be an effort on his part to stay relevant, said Rohan Gunaratna, author of "Inside Al Qaeda: Global Network of Terror."** "The training and the definition of the attack was by the local leaders of Al Qaeda in the Arabian Peninsula, so in many ways you can say bin Laden is exploiting for his benefit this particular attack," he said. "Bin Laden still wants to claim leadership for the global jihad movement." **Of all the various offshoots and branches of Al Qaeda around the world, Gunaratna said the group in Yemen is one of the closest to bin Laden since it is made up of bodyguards and associates of the organization's top ideologues. Yemen is bin Laden's ancestral homeland.** "Today the operational relationship has somewhat suffered, but the ideological relationship is very strong and that is why bin Laden claimed this attack," Gunaratna said. Two of the group's top members were former detainees released in November 2007 from the U.S. military prison Guantanamo Bay. Since the Christmas Day attempt, the Yemeni government, at the U.S.'s urging has stepped up its attacks on the group's hideouts in the rugged country's remote hinterland. Analysts have long debated how much control bin Laden, who is believed to be somewhere in Afghanistan-Pakistan border region, really has over the various organizations using his group's name (Fox News, 2010).

**Title/Headline:** *U.S. Mulls Legality of Killing American al Qaeda "Tumcoat": Opportunities to "Take Out" Radical Cleric Anwar Awlaki In Yemen May Have Been Missed*

**Abstract:** White House lawyers are mulling the legality of proposed attempts to kill an American citizen, Anwar al Awlaki, who is believed to be part of the leadership of the al Qaeda group in Yemen behind a series of terror strikes, according to two people briefed by U.S. intelligence officials. **One of the people briefed said opportunities to "take out" Awlaki "may have been missed" because of the legal questions surrounding a lethal attack which would specifically target an American citizen.** A spokesperson said the White House declined to comment. While Awlaki has not been charged with any crimes under U.S. law, intelligence officials say recent intelligence reports and electronic intercepts show he played an important role in recruiting the accused "underwear bomber" Umar Farouk Abdulmutallab. Awlaki also carried on extensive e-mail communication with the accused Fort Hood shooter, Major Nidal Hasan, prior to the attack that killed 12 soldiers and one civilian. **According to the people who were briefed on the issue, American officials fear the possibility of criminal prosecution without approval in advance from the White House for a targeted strike against Awlaki.** An American citizen with suspected al Qaeda ties was killed in Nov. 2002 in Yemen in a CIA predator strike that was aimed at non-American leaders of al Qaeda. The death of the American citizen, Ahmed Hijazi of Lackawanna, NY, was justified as "collateral damage" at the time because he "was just in the wrong place at the wrong time," said a former U.S. official familiar with the case. In the case of Awlaki, born in New Mexico and a college student in Colorado and California, a strike aimed to kill him would stretch current Presidential authority given to the CIA and the Pentagon to pursue terrorists anywhere in the world (Cole, Esposito & Ross, 2010).

**Title/Headline:** *Man With Weapons, Map Of Military Base Arrested*

**Abstract:** A man was arrested Monday after police found an arsenal of high-powered weapons and a map of a U.S. military base in his New Jersey hotel, authorities said. Lloyd R. Woodson, 43, was arrested and faces multiple weapons charges after an investigation into his suspicious behavior at a store in Branchburg, New Jersey, said local prosecutor Wayne J. Forrest. Woodson, wearing a military jacket, went to a store called Quick Chek on Monday afternoon and was acting suspiciously, Forrest said in a statement. The clerk called authorities. When officers arrived, Woodson ran into the woods. He was subdued after wrestling with officers, the statement said. During the struggle, officers noticed that Woodson was wearing a bulletproof vest and carrying an assault rifle in his coat. Officers searched Woodson's hotel room and found another assault rifle, a grenade launcher, a police scanner, another bulletproof vest, a map of a U.S. military base, hundreds of rounds of ammunition and a Middle Eastern-style headdress, the statement said (CNN, 2010).

**Title/Headline:** *The Jihadist Next Door*

**Abstract:** Omar Hammami had every right to flash his magnetic smile. He had just been elected president of his sophomore class. He was dating a luminous blonde, one of the most sought-after girls in school. He was a star in the gifted-student program, with visions of becoming a surgeon. For a 15-year-old, he had remarkable charisma. In the thick of his adolescence, he was fearless, raucously funny, rebellious, contrarian. **"It felt cool just to be with him," his best friend at the time, Trey Gunter, said recently. "You knew he was going to be a leader."** A decade later, Hammami has fulfilled that promise in the most unimaginable way. Some 8,500 miles from Alabama, on the eastern edge of Africa, he has become a key figure in one of the world's most ruthless Islamist insurgencies. **That guerrilla army, known as the Shabab, is fighting to overthrow the fragile American-backed Somali government. The rebels are known for beheading political enemies, chopping off the hands of thieves and stoning women accused of adultery. With help from Al Qaeda, they have managed to turn Somalia into an ever more popular destination for jihadis from around the world.** More than 20 of those fighters have come from the United States, many of them young Somali-Americans from a gritty part of Minneapolis. But it is Hammami who has put a contemporary face on the Shabab's medieval tactics. In a recent propaganda video viewed by thousands on YouTube, he is shown leading a platoon of gun-toting rebels as a soundtrack of jihadi rap plays in the background. **He is identified by his nom de guerre, Abu Mansoor Al-Amriki, "the American," and speaks to the camera with a cool, almost eerie confidence. "We're waiting for the enemy to come," Hammami whispers, a smile crossing his face. Later he vows, "We're going to kill all of them."** In the three years since Hammami made his way to Somalia, his ascent into the Shabab's leadership has put him in a class of his own, according to United States law-enforcement and intelligence officials. **While other American terror suspects have drawn greater publicity, Hammami exercises a more powerful role, commanding guerrilla forces in the field, organizing attacks and plotting strategy with Qaeda operatives,** the officials said. He has also emerged as something of a jihadist icon, starring in a recruitment campaign that has helped draw hundreds of foreign fighters to Somalia. **"To have an American citizen that has risen to this kind of a rank in a terrorist organization — we have not seen that before,"** a senior American law-enforcement official said earlier this month. Not long ago, the threat of American-bred terrorists seemed a distant one. Law-enforcement officials theorized that Muslims in the United States — by comparison with many of their European counterparts — were upwardly mobile, socially integrated and therefore less susceptible to radicalization. **Perhaps the greatest proof of this came with the absence of domestic terrorist attacks following 9/11, a period that has brought Europe devastating homegrown hits in Madrid and London. America is now at a watershed. In the last year, at least two dozen men in the United States have been charged with terrorism-related offenses. They include Najibullah Zazi, the Afghan immigrant driver in Denver who authorities say was conspiring to carry out a domestic attack; David Coleman Headley, a Pakistani-American from Chicago who is suspected of helping plan the 2008 attacks in Mumbai; and the five young men from Virginia who, authorities say, sought training in Pakistan to fight American soldiers in Afghanistan.** These cases have sent intelligence analysts scurrying for answers. The American suspects come from different backgrounds and socioeconomic strata, but they share much in common with Europe's militants: they tend to be highly motivated, even gifted people who were reared in the West with one foot in the Muslim world. Others may see them as rigid or zealous, but they envision themselves as deeply principled, possessing what Robert Pape, a professor at the University of Chicago, calls "an altruism gone wildly wrong." **While their religious piety varies, they are most often bonded by a politically driven anger that has deepened as America's war against terrorism endures its ninth year. The presence of Western troops in Afghanistan and Iraq has brought those conflicts closer for many Muslims in America.** Through satellite television and the Internet, the distance between here and there — between Fort Hood, Tex., and Yemen, between Daphne, Ala., and Somalia — has narrowed. For Omar Hammami, the war in Iraq provided a critical spark as he turned toward militancy. In an e-mail message in December, Hammami responded to questions, submitted to him through an intermediary, about his personal evolution and political views. **"We espouse the same creed and methodology of Al Qaeda," he wrote. Of Osama bin Laden, he said, "All of us are ready and willing to obey his commands." Did Hammami, like bin Laden, consider America a legitimate target for attack? "It's quite obvious that I believe America is a target,"** he wrote. Hammami's life in Somalia appears to be more precarious than he let on. He spends much of his time shuttling between villages in southern Somalia, where many of the Shabab's camps are based, according to Somali intelligence officials. In addition to his role as a military tactician, they said, Hammami helps guide the Shabab's recruitment strategy and

management of money — exercising surprising power after landing in Somalia as a 22-year-old rookie. **The Somali government is seeking increased American aid to fight the Shabab and may have reason to play up the threat of foreigners like Hammami. But they were adamant about his role. “This guy is dangerous,” says Abdullahi Mohamed Ali, the Somali minister of national security. “He’s a threat to the region. I want him to be eliminated.”** When Hammami engages in combat, he makes an impression on other militants, said a former Shabab commander, Sheikh Mohamed Sheikh Abdullahi Sheikh Mohamed. **“He doesn’t blink in the face of the enemy,” said Mohamed, who recalled four battles in 2008 and 2009 in which he and Hammami took part. In combat, Hammami used a sharpshooter’s rifle, firing calmly and with precision,** said Mohamed, who spoke to me by telephone this month from a government compound in Mogadishu after defecting to the government’s side. Somali officials said they were keeping him there for his protection. **Until recently, the few visible images of American jihadis were of young men on the margins: John Walker Lindh, a Californian loner who wandered into Afghanistan to join the Taliban; or Adam Gadahn, now a Qaeda spokesman, who grew up home-schooled on a goat farm and channeled his teenage energies into death-metal music.** If Omar Hammami followed his own compass, others followed him. Years later, more than one of his classmates compared him to the incongruous high-school hero of the 1986 film “Ferris Bueller’s Day Off.” Hammami’s journey from a Bible Belt town in America to terrorist training camps in Somalia was pieced together from interviews with his parents, sister, best friends and law-enforcement officials, as well as hours of home videos and passages from his e-mail messages, journal entries and hundreds of his postings on an Internet forum. If anything has remained a constant in Hammami’s life, it is his striving for another place and purpose, which flickered in a poem he wrote when he was 12: **“My reality is a bore. I wish, I want, I need the wall to fall and the monster to let me pass, the leash to snap, the chains to break. . . .“I’ve got a taste of glory, the ticket, but where is my train?”** That trademark smirk — the same one that would later appear in the Shabab’s propaganda — **hinted early at Hammami’s delight in causing trouble.** He was exceedingly smart but easily bored and short-tempered, once turning over his desk in second grade. His teachers tired of his endless questions. **“He had a big mind in a small-minded place,”** Dena says (Elliot, 2010).

**Title/Headline:** *‘Anarchist’ Detained In La Junta*

**Abstract:** Police arrested a 64-year-old New Jersey man in Colorado for allegedly **threatening to blow up an Amtrak passenger train.** Ojore Nuru Lutalo of Elizabeth, N.J., was taken into custody at the La Junta train station when Amtrak officials called police to report a suspicious passenger **making terrorist threats** on the train. An affidavit signed by two train passengers stated that they allegedly overheard Lutalo talking on a cell phone saying, "Haven't killed anyone yet." They also allegedly heard him say, "Are you willing to go to jail with me? **This Homeland Security thing is serious.** They are going to do to you what they did to me. **We have to work in small groups.** They can hold you for 18 months. Do they have security on these trains? **Are you with me or not?"** The passengers also stated that **Lutalo allegedly mentioned Al Qaeda** and said, **"17th century tactics won't work, we have 21st century tactics."** The conductor said Lutalo had a tan blanket over his entire body so she could not see what he was doing. Police said they found what they called a large amount of propaganda recruiting materials from the Afrikan Liberation Army, including **photos of President Barack Obama and other items that raised suspicions.** A background check showed that Lutalo has **ties to the Afrikan Liberation Army** and that he had a violent criminal past. Several sources on Google that claim Lutalo was a **"political prisoner," and that he is an anarchist.** According to several websites, Lutalo was held in Trenton State Prison in Trenton, N.J., for "actions carried out in the fight for black liberation." According to Copwatchla.org, **Lutalo is a New Afrikan Anarchist/Black Liberation Army member who was released from prison Aug. 28 after serving 28 years.** Another site, Denver Anarchist Black Cross, said in December 1975 that Lutalo and BLA member Kojo Bomani Sababu were arrested after they attempted to rob a bank to fund revolutionary projects, which ended in a shootout with the police (Mestas, 2010).

**Title/Headline:** *Unarmed Amtrak Passenger Arrested After Alleged Threat*

**Abstract:** Ojore Nuru Lutalo, was freed on \$30,000 bond and now in Denver, and denies mentioning Al Qaeda or making any threats. Bonnie Kerness, a member of the American Friends Service Committee Prison Watch Program, said that Lutalo was returning to New Jersey from a speaking engagement at a book fair in Los Angeles and had spoken with him by phone several times while he was on the train. **"It seems like so much ado about nothing,"** she said from the group's offices in Newark, N.J. (USA Today, 2010).

**Title/Headline:** *Al Qaeda Looking To Recruit English Speakers, Women*

**Abstract:** Al Qaeda in Yemen is actively recruiting English-speaking individuals, intelligence officials told Fox News, saying that investigators are looking for people who are more like Americans, having been born in the United States or Canada. "Anyone who can fit in and not attract suspicion" is desirable to the terror network right now, said one official. An investigative source also said that

among those attracting attention by the intelligence community are women recruits. **The next wave of terrorists may include Western women, possibly Canadian, with forged documents.** The use of women would be seen an evolution in Al Qaeda's strategy from the failed Christmas Day attack by accused "underpants bomber" Umar Farouk Abdulmutallab. Cleric Anwar al-Awlaki is considered the top "talent spotter." He is tied to three of the Sept. 11, 2001, hijackers, the Fort Hood shooting and Flight 253, which carried Abdulmutallab. **A former senior intelligence official who first identified Awlaki as a threat in 2008 said he believes Awlaki has hundreds of followers in the United States, so the focus of the intelligence community is not solely on overseas operatives but on people inside the United States.** Abdulmutallab, who is educated and born into a wealthy Nigerian family, told investigators that about 20 or 30 more people like him were training in Yemen. Yemen is also where English-speaking, Muslim converts go to learn Arabic, so one U.S. official said Abdulmutallab's information will be vetted thoroughly. However, that official said just because someone is studying Arabic in Yemen doesn't mean he or she has made the leap to terrorism. **"I think we constantly have to be on our guard, the enemy is adapting,"** said Rep. Peter King, the top Republican on the House Homeland Security Committee. **"We have to look for not just the usual suspects, if you will, but obviously Al Qaeda is going to try to find people who would blend into our society, people who can speak English, speak it fluently, and you know not give the appearance of what we identify as the traditional Al Qaeda suspect."** Meanwhile, one woman was questioned at length off the Amsterdam-Detroit flight that came in Saturday. That's the same flight Abdulmutallab took when he tried to set off a bomb as the plane descended into Motor City. **The initial reporting was that she had some kind of incendiary device with her but that turned out to be a medical device** (Fox News, 2010).

**Title/Headline:** *Father Of Terror Suspect Zazi Gets Bail*

**Abstract:** A Colorado man accused of trying to destroy chemicals and other evidence in the terror case against his son was granted bail Thursday, but ordered not to speak to his son. As part of a deal reached in federal court in Brooklyn, Mohammed Wali Zazi must post \$50,000 bond signed by his wife and daughter and secured by \$20,000 cash. **He also will be subject to electronic monitoring when he returns to his home in suburban Denver,** possibly as early as Friday. The judge also barred the one-time New York City cab driver from having phone or other contact with four people — his jailed son, Najibullah Zazi, and three whose names were not made public. Both Zazis have pleaded not guilty. The father "intends to fight the case and we'd ask the public to withhold judgment until the facts are revealed," his attorney, Deborah Colson, told reporters outside court. **The government alleges Najibullah Zazi, who was an airport shuttle driver, and others bought beauty supplies in Colorado to make peroxide-based bombs and that he tried to mix the explosives in a hotel room there.** Last fall, he drove to New York, where investigators say they lifted notes on bomb-making from his computer. Authorities have said they believe the son, who remains in custody in New York following his arrest in September, wanted to attack the city's transit system. At the time of the arrest, Attorney General Eric Holder called the terrorism case the most serious since the Sept. 11, 2001, attacks. **FBI agents arrested Zazi's father on obstruction charges, alleging he conspired with others to destroy or hide "glasses, masks, liquid chemicals and containers" that were evidence in the case. Two New Yorkers have also been charged but were not directly linked to the foiled bomb plot. Authorities have said the two, Adis Medunjanin and Zarein Ahmedzay, traveled to Pakistan, where Zazi allegedly received training in explosives from al-Qaida.** Ahmedzay, Medunjanin and Najibullah Zazi are former high school classmates in Queens. They have denied wrongdoing (New York Post, 2010).

**Title/Headline:** *Joseph Stack And Right-Wing Terror: Isolated Incidents Or Worrying Trend?*

**Abstract:** Thursday's antitax domestic terror attack on an IRS building in Austin, Texas, may reopen a debate that's been quiet since last summer: are violent incidents against the federal government on the rise? **The notion of far-right terror was much discussed following the June incident at the Holocaust Memorial Museum in Washington, D.C., in which white supremacist James von Brunn killed a security guard and injured two other people. That followed on the brutal February murder of abortion provider Dr. George Tiller in Wichita, Kansas, by a militant abortion foe.** Meanwhile, there had been a spike in threats against Barack Obama since his inauguration. Suddenly much of the media was in an uproar about a new domestic terror threat, with Fox News' Shep Smith offering a stunningly frank and heartfelt statement of concern live on the air. And then things quieted down. Joseph Stack's suicide note, a lengthy screed posted online—it's since been removed but can be viewed here—shows signs of both right- and left-wing extremism. **The tax protest movement has historically been linked to right-wing groups like the Sovereign Citizen movement, white supremacist groups, and militias.** Stack mentions meetings with groups that meet that rubric, and his antigovernment rhetoric fits that mold too. But he also takes traditionally left-wing swipes at corporations for keeping the little guy down, and signs off, **"The communist creed: From each according to his ability, to each according to his need. The capitalist creed: From each according to his gullibility, to each according to his greed."** Groups that track extreme right-wing violence say they see a definitive spike in activity. **"This attack comes in the context of an absolute explosion in militias and the larger antigovernment 'patriot' movements in the last 12 to 18 months,"** says Mark Potok, director of the Intelligence Project at the Southern Poverty Law Center. **"This has been driven initially by nonwhite immigration for the last 10 years, which is reflected in the person of Barack Obama, which represents a very real and irreversible demographic change. Second, the economy has played a role. Unemployment has stayed high. There's a huge amount of anger about bonuses for bankers, at the same time that most middle-class and working-class Americans don't see things getting better, and in fact getting**

worse." In a report tracing far-right terror between the Oklahoma City bombings and fall 2009, SPLC found six cases of attacks targeting the Internal Revenue Service. More important, 12 of the 75 overall incidents documented have happened since Obama's election, or else happened prior but involved Obama (as a motive or a target) anyway. Potok says the level of violence is reaching levels last seen during the 1990s, when a wave of militias arose—especially in states like Montana and Michigan—of people who believed they needed to protect themselves from the government. **But that activity was fed by fears of large government, and especially confrontations involving the government at the Branch Davidian compound in Waco, Texas, and in Ruby Ridge, Idaho. Although left-wing administrations are a common denominator, these groups didn't like the Bush administration's record on civil liberties, either. It's just that after the movement ran out of gas in the 1990s, the economic crisis provided a new burst of energy.** Mark Pitcavage, the director of investigative research at the Anti-Defamation League, also says that Obama's election has "energized" the extreme right. In strict numbers of members, he says the biggest increases are in antigovernment groups, while white-supremacist groups, though more active, have seen less growth. **Pitcavage, who has recently begun tracking the number of domestic terror incidents, says there was a marked increase in such attacks in 2009—33 attacks (a figure that includes Islamist attacks at Fort Hood and in Little Rock, Ark., as well as a suspected left-wing attack in Seattle) as compared with 13 in 2008, 21 in 2007, and 14 in 2006.** But he warns against assuming that the difference between the Obama and Bush administrations is too vast. **"In terms of violent incidents, they did not stop [when Bush was in office]," he says, adding that the number of hate-related incidents tend to be undercounted—the motives often aren't clear, they don't become clear until later. "A lot don't get covered beyond local and regional news" (Graham, 2010).**

**Title/Headline:** *Profile: 'Jihad Jane' From Main Street.*

**Abstract:** The blonde middle-aged woman apparently raised no concerns with her boyfriend or her neighbours on Main Street, Pennsburg, near Philadelphia. But online she had allegedly agreed to kill in the name of holy war, believing her European looks would allow her to blend in among Swedes as she homed in on her target. Colleen LaRose, according to a US court indictment, posted messages online under the name Jihad Jane, expressing her desire to participate in jihad, or holy war. **Arrested in October 2009, Ms LaRose had exchanged emails over 15 months to recruit fighters for "violent jihad".** Her activities apparently came as a surprise to her boyfriend Kurt Gorman, whom she met in 2005. Mr Gorman told Associated Press: "She was a good-hearted person. She pretty much stayed around the house." She looked after his father until his death in August 2009, but left their residence a day after the father's funeral, taking Mr Gorman's passport with her, allegedly to give to a contact in South Asia she had agreed to marry. "I came home and she was gone. It doesn't make any sense," he said. **Having left the US in August, by the end of September, she had allegedly written online that it would be "an honour & great pleasure to die or kill for" her intended spouse, the indictment said. "Only death will stop me here that I am so close to the target!"** she is accused of writing. A Department of Justice statement said Ms LaRose and five others **"recruited men on the internet to wage violent jihad in South Asia and Europe, and recruited women on the internet who had passports and the ability to travel to and around Europe in support of violent jihad".** Ms LaRose, a US citizen born in 1963, is charged with "conspiracy to provide material support to terrorists, conspiracy to kill in a foreign country, making false statements to a government official and attempted identity theft." She was apparently approached by others after she posted a video on YouTube in June 2008, saying she was "desperate to do something somehow to help" ease the suffering of Muslims, the indictment said. Web images show her wearing a Muslim headscarf, but Mr Gorman said he never saw anything like that at their home, nor did she attend any religious services. **Unknown to him, she had allegedly agreed to travel to Sweden and kill Swedish artist Lars Vilks, who had angered Muslims by drawing the Prophet Muhammad with the body of a dog.** She denies soliciting funds for terrorist groups and of being the Jihad Jane of online postings, the indictment said. Very few women have been charged with terrorism in the US, the Justice Department said (BBC News, 2010).

**Title/Headline:** *Al Qaeda-Linked New Jersey Man Sharif Mobley, Arrested In Yemen, Worked In Nuclear Power Plants*

**Abstract:** A New Jersey man charged in Yemen as an Al Qaeda member worked at nuclear power plants in the U.S., officials said Thursday. Sharif Mobley, a 26-year-old American native of Somali heritage, was arrested in Yemen this month in a roundup of

suspected Al Qaeda members. He was being treated at a hospital in San'a when he killed one guard and wounded another in an escape attempt, officials said. Before Mobley moved to Yemen two years ago, ostensibly to learn Arabic and study the Koran, he worked for several contractors at three nuclear power plants in New Jersey from 2002 to 2008, PSE&G Nuclear spokesman Joe Delmar said. Mobley carried supplies and did maintenance work at the plants on Artificial Island in Lower Alloways Creek and worked at other plants in the region as well, Delmar said. He satisfied federal background checks as recently as 2008, Delmar said. Mobley was always supervised, caused no problems and was not believed to have breached security at the plants, said Mike Drewniak, a spokesman for New Jersey Gov. Chris Christie. Mohammed Albasha, spokesman for the Yemeni Embassy in Washington, said there was no immediate connection between Mobley's activities or capture in Yemen and his work at the plants. It was not immediately clear if Mobley worked at any of the region's other power plants. Joe Szafran, a spokesman for Exelon Corp., which owns nuclear plants at three facilities in eastern Pennsylvania, referred questions to the FBI. The FBI declined to comment on the case. **"We don't know nothing. We're trying to hear something," Mobley's father, Charles Mobley, told New Jersey's WMGM-TV. Sharif Mobley is the latest example of what anti-terrorism experts fear is a growing trend: the radicalization of American Muslims who join overseas terrorist groups.** Yemeni groups are of special concern, as are Somali-Americans. The Al Qaeda branch in Yemen was linked to the failed Christmas Day bombing of a Detroit-bound airliner. Maj. Nidal Hasan, the Army psychiatrist accused of killing 13 people in the Fort Hood shooting spree, exchanged e-mails with an extremist cleric in Yemen. Young Somali-American men have been traveling from the U.S. to fight jihad in Somalia, raising fears they are receiving terror training. Mobley graduated from high school in 2002 in the rural southern New Jersey town of Buena and lived in Philadelphia and Newark, Del. In recent years, Mobley organized religious pilgrimages to the Middle East for other Muslims. Umar Hassan-El, assistant imam at the Islamic Society of Delaware's mosque in Wilmington, Del., told the Associated Press he roomed with Mobley during a 2004 pilgrimage to Mecca. **"He gave no indication that he would join a group that he's alleged to be a part of right now,"** said Hassan-El. "I never heard that boy ever talk about shooting anybody, killing anybody." Roman Castro, 25, a high school classmate who served with the Army in Iraq, told the Associated Press that the last time he saw Mobley, about four years ago, Mobley yelled, "Get the hell away from me, you Muslim killer!" **Former classmate Dawn Bass said she was "shocked" to learn of the allegations against Mobley, who she said was a "sweetheart" who was "always showing off in the back of the classroom doing his karate moves and stuff."** She said, Mobley "was just a regular kid, he was always talking to everybody - he was not shy" (Kates, 2010).

**Title/Headline:** *U.S. Army Trains To Confront Tea Party 'Terrorists'*

**Abstract:** In a shocking development that outstrips even the infamous MIAC report, it has emerged via whistleblowers that the U.S. Military in Kentucky is training to confront Tea Party protesters and anti-government demonstrators, who in official intelligence advisories are described as bomb-making terrorists. On April 17, the Courier-Journal in Louisville, Kentucky, reported on a military exercise dubbed "Mangudai," named after the special forces of Genghis Khan's Mongol army who could fight for days without food or sleep. The Kentucky newspaper portrayed the exercise as an effort to train soldiers to battle the Taliban in Afghanistan. "Designed to test the limits of officers' physical, mental and emotional endurance, the emerging Army exercise offered a revealing window onto modern combat training in the era of Iraq and Afghanistan," Chris Kenning wrote for the newspaper. **"Over three days last week, participants had to crawl on their bellies under real machine-gun fire, shimmy commando-style over a single rope high in the air and march for more than 22 miles through forests.** But according to information received by The Patriot Post blog, there is another aspect to the military exercises not reported by local media. "This week, I was contacted by a number of military personnel, enlisted and officer ranks, who expressed concern about a military exercise underway at Ft. Knox, the U.S. Bullion Depository. As with most such exercises, the Ft. Knox alert occurred in stages, as if real time intelligence was being provided at various intervals," writes Mark Alexander. Alexander cites an intel advisory issued on Friday, April 23, 2010, that identifies terrorist threat adversaries as "Local Militia Groups / Anti-Government Protesters / TEA Party". In short, the military was training in Kentucky to take on mythical militias — no word if they were of the FBI-created variety — and remarkably the non-violent Tea Party movement. "Anti-Government – Health Care Protesters have stated that they would join the TEA Party as a sign of solidarity" during a protest at Fort Knox. The Tea Party "groups are armed, have combative training and some are former Military Snipers. Some may have explosives training / experience," according to the intel report. An intel report update, dated Monday, 26 April 2010, noted that a "rally at the Militia compound occurred," and "Viable threats ... have been made... Many members were extremely agitated at what they referred to as Government intervention and over taxation in their lives. Alcohol use 'fanned the flames.' Many military grade firearms were openly carried. An ad hoc 'shoot the government agent' event was held with prizes (alcohol) given for the best shot placement." In addition to being drunkards, the report describes the Tea Party as bomb-throwers. "Components of bomb making are reported to have been on the site. Some members have criminal records relating to explosive and weapons violations." In response to the this "immediate threat," the military established concentration camps for "mass arrests." QRF, short for the Quick Reaction Force of the 16th Cavalry Regiment and the 194th Armored Brigade were placed on two hour recall. **"The 26 April order gives specific instructions for the 5-15 CAV (a 16th Cavalry battalion) to have weapons, ammo, vehicles and communications at ready, and it places the other 2,200 members of the units on two-hour recall. In other words, these orders are to gear up for defending Ft. Knox against Tea Party folks and their co-conspirators who oppose nationalization of our health care sector,"** writes Alexander. Military officers and enlisted personnel told Alexander about their concerns: As one put it, the exercise "misrepresents freedom loving Americans as drunken, violent racists — the opponents of Obama's policies have been made the enemy of the U.S. Army." **They were equally concerned that command staff at Ft. Knox had signed off on this exercise, noting, "it has been issued and owned by field grade officers who lead our battalions and brigades,"** which is to say many Lieutenant Colonels saw this order before it was implemented. In fact, we can assume this "exercise" was orchestrated at the highest levels in the Pentagon. Lieutenant Colonels merely carry out orders. An Army document entitled "Army Continuity of Operations Program (COOP)" spells out the militarization of the U.S. "Homeland" under Northcom. **In July, 2009, Infowars reported on a Missouri National Guard unit out of Camp Crowder engaged in a training exercise designed to take on a fictitious militant group. An earlier exercise in the Black Hills of South Dakota trained soldiers to confront an "insurgent group" with "a**

reputation for harassing convoys with ambushes and improvised explosive devices.” In September, 2008, the Pentagon announced the 3rd Infantry Division’s 1st Brigade Combat Team would be deployed in the United States under the control of Northcom. “They may be called upon to help with civil unrest and crowd control or to deal with potentially horrific scenarios such as massive poisoning and chaos in response to a chemical, biological, radiological, nuclear or high-yield explosive, or CBRNE, attack,” the Army Times reported. (Emphasis added.) Since the end of the Civil War deployment of the U.S. military inside the U.S. has been prohibited under The Posse Comitatus Act. In early 2006, the 109th Congress passed a bill containing controversial provisions granting the president the ability to use federal troops inside the United States in emergency situations. These changes (in Section 1076) were included in the John Warner Defense Appropriation Act for Fiscal Year 2007. **In 2008, Congress restored many of the earlier limitations on the president’s ability to deploy troops within the United States, but Bush issued a signing statement indicating he was not bound by the changes. Obama has taken up with signing statements where Bush left off. A report issued in 2008 by the U.S. Army War College discussed the use of American troops to quell civil unrest brought about by a worsening economic crisis.** The report from the War College’s Strategic Studies Institute warned that the U.S. military must prepare for a “violent, strategic dislocation inside the United States” that could be provoked by “unforeseen economic collapse” or “loss of functioning political and legal order.” **For more than a decade the Pentagon has endeavored to acclimate Americans to the presence of troops on the streets. Instances of the Pentagon putting troops on the streets are numerous and have increased in frequency over the last few years. In March of 2009, Infowars reported on U.S. Army soldiers dispatched in Samson, Alabama, supposedly in response to a rampaging gunman. In December, 2008, the Marine Corps Air and Ground Combat Center and the local California Highway Patrol worked together “in a joint effort to reduce accidents and drinking and driving” in San Bernardino County, a blatant violation of Posse Comitatus. The Iowa National Guard planned an exercise in the small town of Arcadia but rolled back the invasion after citizens complained about soldiers patrolling the streets of an American town. Military police were positioned at the 2009 Kentucky Derby and in April of the same year 400 National Guard Combat Support Battalion troops were dispatched to “maintain public order” at the Boston Marathon. In April of 2009, an Infowars reader sent a page taken from the Hardeman County, Tennessee, Bulletin Times announcing a seat belt checkpoint to be conducted on April 4 “in conjunction with a Homeland Security training exercise by the 251st Military Police in Bolivar who recently returned from Iraq.” On April 15, 2009, we reported on how the Maryland National Guard was put on alert in anticipation of Tax Day nationwide Tea Party protests. A Force Protection Advisory issued on April 11 instructed the National Guard to be on alert during the Tea Party protests because Guardsmen and Guard facilities might become “targets of opportunity.” It was later learned that the Department of Homeland Security had put the protesters under surveillance. Adding the Tea Party to the list of “insurgents” is a new and especially surreal development, but hardly an unexpected one considering the fear of the establishment to this growing political movement. A poll conducted earlier this month found supporters of the Tea Party to be primarily white, male, married and older than 45. “Of the 18 percent of Americans who identified themselves as supporters, 20 percent, or 4 percent of the general public, said they had given money or attended a Tea Party event, or both. These activists were more likely than supporters generally to describe themselves as very conservative and had more negative views about the economy and Mr. Obama. They were more angry with Washington and intense in their desires for a smaller federal government and deficit,” the New York Times reported. They are not, as the DHS and the Southern Poverty Law Center would have it, disgruntled returning veterans, white supremacists, and violent militia members who hate Obama because of his skin color. Over the last several months the government and corporate media have endeavored to portray this demographic as potentially violent and has fallaciously connected it to white supremacists and a mythical militia movement that is supposedly gearing up to attack the government. If we are to believe the above report, the U.S. military is preparing to attack Tea Party supporters. All that will be required is an appropriate false flag event to set this act in motion (Nimmo & Watson, 2010).**

**Title/Headline:** *Brooklyn Men Accused of Helping Al Qaeda*

**Abstract:** A chilling plan exposed has landed two local men in handcuffs. The pair stands accused of trying to give al Qaeda a 21st century upgrade, to make terrorism more modern. CBS 2 HD caught up with their neighbors and families in Brooklyn. They were buying Casio digital watches over the Internet and using sophisticated computer software to communicate. **That's just some of the ways the feds said the two suspects were trying to modernize al Qaeda from New York City.** "Obviously it's pretty scary," said Kyle Miller, a neighbor of one of the suspects. Scary said neighbors at the thought there may be enemies living among us. "What he did, he hurt me. I can't accept that," said Waheiz Mohmand, the suspect's tenant. **Mohmand and his family rent a house in Queens from suspect Sabirhan Hasanoff, who on Friday was accused of being paid \$50,000 by a co-conspirator, travelling to New York to perform tasks for al Qaeda and allegedly instructing by a co-conspirator not to fill his U.S. passport with stamps to retain the passport's value to al Qaeda.** "If it's true, then shame on him because what he did, he didn't do it for himself, he did it for all Muslims and respect for his family," Mohmand said. Hasanoff's alleged partner is Wesam El-Hanafi, who prosecutors said took an al Qaeda oath of allegiance, travelled to Yemen to meet with al Qaeda, purchased sophisticated software to enable secret communication over the Internet and bought seven watches to be delivered to his home in Brooklyn. On Friday night El-Hanafi's relatives were watching out for our cameras but not coming to the door. While some weren't surprised at El-Hanafi's alleged connection, not everyone is ready to convict. "You see activity that's not normal. Lot of single guys come in and out of the place," neighbor Hector Martinez said. "I would give him the benefit of the doubt until all the facts are in," neighbor James Lum added. Police Commissioner Ray Kelly said the case is a reminder the city faces a constant threat from al Qaeda. Both men are being held in Virginia but will be tried here in New York. **El-Hanafi, 33, is a U.S. citizen who was born and lived in Brooklyn. Hasanoff, 34, is a dual citizen of the United States and Australia, who also resided in Brooklyn. The defendants are each charged with one count of conspiracy to provide material support to a foreign terrorist organization, and face up to 15 years in prison (Hennessey, 2010).**

**Title/Headline:** *Two Brooklynites Accused Of Plotting To Aid Al Qaeda By Modernizing A Cell In Yemen*

**Abstract:** Two dapper Brooklyn professionals were accused yesterday of being homegrown terrorist agents who pledged allegiance - and technical help - to Al Qaeda. One is a computer engineer, the other an accountant. They sported French cuffs and polished shoes when they were hauled from Dubai, United Arab Emirates, to the U.S. to face charges yesterday. They have degrees from Baruch, impressive résumés, wives and children - and neighbors who never suspected a thing. **"There are people among us who are plotting with Al Qaeda,"** Police Commissioner Raymond Kelly said as charges were announced in Manhattan after a joint NYPD-FBI probe. **A federal indictment charged Wesam (Khaled) El-Hanafi, 33, and Sabirhan (Tareq) Hasanoff, 34, with trying to modernize an Al Qaeda cell in Yemen.** The vaguely worded court papers raise as many questions as they answer, but sources said the two were to act as technical attachés for Al Qaeda. **"They wanted to bring Al Qaeda into the 21st century, to give them the most up-to-date technology,"** said a source briefed on the arrests. Among their duties: buying seven digital Casio watches to be shipped overseas. The indictment doesn't say why, but the timepieces have been used to make bombs. **"They were high-tech guys, and would have wanted more high-tech solutions, but were told to buy Casio because they worked the best - nothing fancier,"** a law enforcement source said. The papers suggest they collected passports for their cohorts, bought encryption software for secret Internet communication and took a \$50,000 payoff from an unnamed co-conspirator. **Each is charged with one count of conspiring to provide material support to Al Qaeda. Because they were extradited from Dubai - where both spent time - they were arraigned in federal court in Virginia, looking more like business travelers than jihadists. They will be brought to Manhattan next week. El-Hanafi is a computer engineer.** Born in Brooklyn, he went to Public School 200, Lafayette High School and Baruch, where he played on the basketball team. He later worked for Lehman Bros. and was the pride of his Egyptian-born family, neighbors said. **"I know my husband and he's a good man. He's a perfect man," El-Hanafi's wife said at their Bath Beach home. "My husband is innocent. I'm positive he's innocent. We're stepping up for him."** Hasanoff was born in Australia but raised in Brooklyn and Queens. He attended Abraham Lincoln High School and Baruch, where he headed the Alpha Gamma fraternity, sources said. After graduation, he went to work for PricewaterhouseCoopers as an accountant, neighbors said. He's married to an Afghan woman and they have two children. He owns a building in Queens, neighbors said. Susan Naya of Flushing, Queens, who is related to Hasanoff by marriage, said he never discussed politics or said anything critical about the U.S. **"They're such nice people. He has nice kids," she said. "I don't think this is going to be him."** Sources said both men were radicalized while living and working in the United States, and their involvement with Al Qaeda goes back at least three years. **In 2007, Hasanoff allegedly took \$50,000 from the unnamed co-conspirator. Months later, he and El-Hanafi talked about joining Al Qaeda - and El-Hanafi actually went to Yemen, took a blood oath to Al Qaeda and received marching orders, the indictment charges.** The court papers refer to unspecified "tasks" the two carried out but provide few details - but one job may have involved obtaining passports. **In June 2008, Hasanoff told the co-conspirator he shouldn't fill his passport with immigration stamps - a red flag to airport screeners - because it was more valuable to Al Qaeda without them. It's unclear how their activities came to light, but sources said it was not related to the recent arrest of subway bomb plotter Najibullah Zazi. El-Hanafi, his wife and children recently traveled to Dubai for work reasons - and when the family tried to return to Brooklyn, he was yanked off the plane and told he was on the no-fly list, said his lawyer, Victor Knapp. He was not taken into custody while his family tried to get permission for him to fly home. But he was arrested within the past three days and brought to the United States in chains, his lawyer said. Family and friends were in disbelief. "He was a regular, assimilated-into-society guy," said a longtime neighbor, who nevertheless noticed some recent changes. "He was a clean-cut kid, then he started to grow a long beard and his demeanor changed. I asked him, 'Wesam, what happened to you?' he said, 'Nothing, I'm just getting into my religion.'" El-Hanafi's brother, Achmed, said the charges were bogus. "He's lived his whole life here. He grew up here. He wasn't involved. He has nothing to do with Al Qaeda," he said. "He may give money to some Islamic charities, but he's not a terrorist." Both men are charged with one count of providing material support to a foreign terrorist organization, which carries up to 15 years in prison. "These two New Yorkers, who allegedly pledged allegiance to Al Qaeda, will now be held to account for their actions," said Manhattan U.S. Attorney Preet Bharara (Meek, Burke, & Gendar, 2010).**

**Title/Headline:** *American Who Recently Visited Pakistan Eyed In Times Square Bomb Plot*

**Abstract:** Federal authorities have identified a person of interest in the Times Square bomb attempt -- a naturalized American citizen who was in Pakistan for several months and returned to the US recently, investigative sources told Fox News. The latest developments seem to support investigators' suspicions that there was a foreign connection behind the failed car bomb attempt in New York City, senior Obama administration officials told Fox News, shedding light on the growing body of evidence. Sources say that evidence includes international phone calls made by the person of interest, who has not been identified publicly. **The Associated Press identified the person as a man of Pakistani descent, citing unnamed law enforcement sources. Police also have interviewed the registered owner of the bomb-laden sports-utility vehicle. They say he is not a suspect, but he recently sold the dark-colored 1993 Nissan Pathfinder on Craigslist to another individual, whom the Associated Press reports was the Pakistani-American (Fox News, 2010).**

**Title/Headline:** *Senators Say Nation Needs New Defenses Against New Type of Terrorist*

**Abstract:** "Ten days after the attempted car bombing in Times Square and the arrest of Pakistani-American Faisal Shahzad, the Senate Intelligence Committee was formally briefed by the FBI and members of the intelligence community, with both the chairman, Sen. Dianne Feinstein, D-Calif., and ranking Republican, Sen. Kit Bond, R-Mo., calling that unacceptable. "It's very hard to understand why this

briefing was so difficult to come about," Feinstein puzzled, with Bond adding, **"After 10 days, we finally have a briefing. It's very frustrating...I've been kept completely in the dark."** After an hour-and-a-half long briefing Tuesday, both senators emerged to say **the country needs new defenses against a new kind of terrorist**, like Shahzad, and said the nation's citizens should be prepared to put up with more inconveniences to protect the nation with officials trying to balance civil liberties in the course of doing so. **"In this case, Shahzad was almost completely under the radar, which in many ways is even more ominous. We want to improve our defenses. It's clear, we're facing a new kind of attacker who's already here, able to hide in plain sight, and we need to think about new defenses,"** Sen. Feinstein told reporters. The senator targeted the Transportation Security Administration's "No Fly" lists, which recently were updated as a result of the Time Square bomb attempt, to shorten the amount of time by which an airline must update its information once an additional name is added to the list. But the senator said that is not good enough for a tool she called "one of our best lines of defense." **"It's my very strong belief we need to see that the 'No Fly' lists are complete. I understand that occasionally there's a mismatch, and that's very disconcerting to people involved in that mismatch. But there's a certain amount of this that we're going to have to put up with to protect this nation,"** Feinstein said, as she advocated for shrinking that time to just 30 minutes. Bond went even further, advocating for something much more instantaneous. **"It seems to me when you are chasing somebody who you've just identified as attempting to commit a terrorist act who might be leaving the country, you ought to send out something like an all points bulletin. I mean, this is not something that ought to be waiting on a list hours later."** Feinstein said both Shahzad and Christmas Day bomber Umar Farouk Abdulmuttallab are **"the new prototype" of terrorist with respected family backgrounds and "clean" records.** When asked what can be done about this, Feinstein replied, **"What can be done is improving our screening. And this is difficult, because you have 180,000 people going to Pakistan a year, and you've got...60,000 coming back.** And you also have other countries which are of great concern. So, this is not an easy magic solution. And we've got a country that respects individual rights and civil rights, and we don't want to harass people unnecessarily, but there are things we should look at." **Both Feinstein and Bond said another useful tool to finding these lone wolves is, as Feinstein put it, "follow the money."** Terrorists are known to use a complex, informal system of money transfers known as hawalas, something Bond called, "beyond understanding, beyond regulation." But Feinstein said she has some ideas for shedding light on the organizations, but she would give no details. "I think there is a need to go further into how money is transferred from this country into groups, as well as from groups who would do us harm back into individuals here. **We need to have some process of regulation of these money transfers so that they're not all anonymous, unknown, no audit trail, no record,"** the chairman said. **"They don't keep very good records. I don't know what you could do with legislation. If any of you have good ideas, let us know,"** Bond joked with reporters. In a tense moment of disagreement, Bond criticized the administration of playing fast and loose with intelligence. The feisty Republican accused Attorney General Eric Holder of going too far on Sunday directly linking Shahzad and the Pakistani Taliban. "Definitive statements I heard on Sunday have not been confirmed even at this date," Bond accused. Feinstein would only say, "I do not agree with my colleague," and said she would not explain why in a public setting. Feinstein did give a ringing endorsement to a push made by a group of her Democratic colleagues Tuesday for Secretary of State Hillary Clinton to **place the Pakistani Taliban on the Foreign Terrorist Organization list, something the State Department said Tuesday it is discussing.** And Feinstein had another group she would add, an insurgent network in the tribal region of Afghanistan and Pakistan with ties to the Taliban. **"I think there is a very high likelihood that there were interactions between (Faisal Shahzad) and the Pakistani Taliban. I also believe that the Pakistani Taliban ought to be on the designated list, the terrorist list, as well as the Haqqani network ought to be on the designated terrorist list. I just looked at the criteria for that, and I believe they fulfill that. So I think that's something that the Administration should do forthwith,"** Feinstein said" (Turner, 2010).

**Title/Headline:** *Prosecution Rests In Trial Of 5 Americans Charged With Planning Terror Attacks in Pakistan*

**Abstract:** The prosecution concluded its case Saturday against five Americans on trial in a Pakistani court facing life sentences after being charged with planning terrorist attacks in the South Asian country. The men — all Muslims in their late teens or early 20s from the Washington suburb of Alexandria, Virginia — have pleaded not guilty to five charges. The accused were given a last chance to respond to the prosecution before the defense presents its side on June 9, prosecutor Nadeem Akram said. In a written statement, the men said the charges against them were trumped up and police planted discriminating evidence. **"We just wanted to go to Afghanistan to help our Muslim brother on humanitarian grounds,"** they said. The prosecution presented 19 witnesses and evidence including e-mail contacts allegedly with the Pakistani Taliban, and receipts of money they allegedly donated to banned militant groups in Pakistan, Akram said. There was a "strong case" for conviction in the trial being heard by one judge, he said. The case is among several of foreigners allegedly signing up to join insurgents. U.S. and Pakistan are continuing to investigate the Pakistani-American suspect in the botched Times Square bombing on May 1. **Family members have said Faisal Shahzad never exhibited signs of extremism, raising questions as to why men who spent much of their lives in the West would seemingly be drawn to militant Islam.** The five men were arrested in Pakistan in December after being reported missing by their families. One had left behind a farewell video showing scenes of war and casualties and saying Muslims must be defended. Pakistani police have publicly made several accusations against the young men, claiming the suspects contacted Pakistani-based jihadi groups. They accused the five of using the social networking site Facebook and video-sharing site YouTube while they were in the U.S. to try to connect with extremist groups in Pakistan. **Their lawyer has said they were heading to Afghanistan and had no plans to stage attacks inside Pakistan. The trial is taking place inside a high-security prison in the eastern city of Sargodha and media have not been allowed to cover the proceedings. The men have been identified as Ramy Zamzam of Egyptian descent, Waqar Khan and Umar Farooq of Pakistani descent, and Aman Hassan Yemer and Ahmed Minni of Ethiopian descent** (Fox News, 2010).

**Title/Headline:** *Brooklyn Bookkeeper Held Without Bail For Trying To Send Al Qaeda Money, Casio Watches*

**Abstract:** A Brooklyn bookkeeper accused of trying to send Al Qaeda money and Casio watches to build bombs was ordered held without bail Monday. Federal Magistrate Judge James Francis denied a bid to have Sabirhan Hasanoff released to house arrest, citing his technical savvy, conversations about the terror network on the Internet and his purchase of watches prized by terrorist groups. "Were this an individual with minimal skills who perhaps bought digital watches from a street vendor for the benefit of Al Qaeda, it might be a different story," Francis said. Hasanoff, 34, and Wesam El-Hanafi, 33, were busted in Dubai earlier this month and charged with offering Al Qaeda their allegiance and offers of high-tech support. Anthony Ricco, a lawyer for the Australian-born Hasanoff, had argued he should remain free on \$2 million bond and kept under house arrest. Prosecutors also revealed that Hasanoff, a Baruch College graduate, traveled to Syria, Turkey and Yemen and once went to Iraq in hopes of waging jihad. He pleaded not guilty to conspiracy to provide support to Al Qaeda. "The defendant made the decision to join Al Qaeda after being turned on to Al Qaeda in this very city where he used to live," Assistant U.S. Attorney John Cronan said. Cronan said Hasanoff performed "real and tangible work" for Al Qaeda, tasks which allegedly included buying digital watches. "Casio digital watches are very valued by Al Qaeda," Cronan said. "They are part of Al Qaeda's tradecraft because they can be used as timing devices." Hasanoff, a father of two, allegedly used a code while conversing online with El-Hanafi, which included "safari" as a substitute for jihad and "hospitalized" as a term for being in prison (Martinez, 2010).

**Title/Headline:** *Intelligence Chief Acknowledges U.S. May Target Americans Involved In Terrorism*

**Abstract:** Director of National Intelligence Dennis C. Blair acknowledged Wednesday that government agencies may kill U.S. citizens abroad who are involved in terrorist activities if they are "taking action that threatens Americans." Blair told members of the House intelligence committee that he was speaking publicly about the issue to reassure Americans that intelligence agencies and the Department of Defense "follow a set of defined policy and legal procedures that are very carefully observed" in the use of lethal force against U.S. citizens. Blair's unusually frank remarks come as the issue of targeting Americans for lethal action has attracted more notice. As the United States steps up its campaign against suspected terrorists overseas, it has become more apparent that some extremists may be U.S. citizens. The most prominent case to date is that of a U.S.-born cleric, Anwar al-Aulaqi, who lives in Yemen and has been linked to the Army major who allegedly shot and killed 13 people at Fort Hood, Tex., in November, and to the Nigerian accused of attempting to bomb a Northwest Airlines plane on Christmas Day. Aulaqi is a member of al-Qaeda in the Arabian Peninsula, an affiliate of the main al-Qaeda organization, and has been linked to the Fort Hood shooter as well as the Nigerian. He was thought to be meeting with regional al-Qaeda leaders at a compound in Yemen targeted by a Dec. 24 strike. He was not said to be the focus of the strike, and he was not killed. But U.S. officials said at the time that they thought he might have been killed. "I just don't want Americans who are watching this to think that we are careless about endangering -- in fact, we're not careless about endangering American lives as we try to carry out the policies to protect most of the country," Blair said at the annual threat briefing before the panel. He did not specifically refer to the targeting of Aulaqi. In response to questions from Rep. Peter Hoekstra (R-Mich.), the panel's ranking Republican, Blair said: "We take direct action against terrorists in the intelligence community. If that direct action, we think that direct action will involve killing an American, we get specific permission to do that." Hoekstra pressed for clarification of the policy, especially its threshold for targeting Americans for lethal action. "The concern that I have today is that I'm not sure that . . . [it is] very well understood as to what you and the people in your organization can do when it comes to Americans who have joined the enemy," Hoekstra told Blair. The director of national intelligence said the factors that "primarily" weigh on the decision to target an American include "whether that American is involved in a group that is trying to attack us, whether that American is a threat to other Americans" (Nakashima, 2010).

**Title/Headline:** *Your Children Could Be Terrorists*

**Abstract:** In the wake of the Times Square bomb case, the feds just issued a chilling warning to Pakistani leaders: check your family and staff for terrorist ties. The United States has warned civilian and military leaders in Pakistan that they need to worry about a newly uncovered breeding ground for anti-American terrorists—their own families. A senior federal law enforcement official tells The Daily Beast that the Obama administration has sent a "clear, if carefully worded warning" to Pakistani leaders in recent days that their own children and others relatives, as well as their subordinates in the government, should be scrutinized for possible terrorist ties. "We've got elements of the Pakistani gentry—people who can get in and out of the United States with ease, if they're not already citizens here — who are getting roped into terrorism," says an American diplomatic official. The official, who has been briefed on details of the Times Square bombing case, says Pakistanis have also been told that the United States is concerned by the large number of connections between Pakistani military officers and some of the recently uncovered terrorist plots aimed at the United States and its European allies. The warning comes in the wake of the discovery that the son of a retired Pakistani air marshal was the culprit in

the attempted terrorist bombing in Times Square last month, as well as the guilty plea in March by a Pakistani-American man in Chicago who has connections throughout the Pakistan government—including a half-brother who is the prime minister's chief spokesman. **The Chicago man, David Headley, attended one of Pakistan's most elite military academies and had, at least until his arrest, maintained friendships throughout the Pakistani military.** A retired Pakistani army colonel who remains at large has also been indicted in the Chicago case. **"With these two cases, you really see what we're up against,"** said an American diplomatic official, speaking on condition of anonymity because he is not authorized to discuss the terrorism cases publicly. **"We've got elements of the Pakistani gentry—people who can get in and out of the United States with ease, if they're not already citizens here—who are getting roped into terrorism."** As a result of the failed Times Square bombing, the United States has publicly warned Pakistan of severe diplomatic repercussions if Pakistani terrorists attempt to strike again on American soil. Officials say the warnings were delivered as recently as this week, when National Security Adviser James Jones and CIA Director Leon Panetta traveled to Pakistan to meet with their counterparts there. Even as the United States has described Pakistan as a key ally in the fight against Muslim extremism and terrorism, Washington has also long signaled its wariness of the intentions of large elements of the Pakistani military and the country's intelligence agencies. The recent terrorism cases have increased tensions between the two countries—and this latest warning from the United States could further complicate relations. Teresita Schaffer, a retired American diplomat who served in Pakistan, tells The Daily Beast that while it was too soon to suggest that family members of the Pakistani military elite and its civilian gentry pose a special risk of recruitment as terrorists, she could understand why it was of concern to the Obama administration. **"It's something to watch," she said. "There certainly are people in the Army and the intelligence service who have some pretty extreme views" in support of Muslim fundamentalism,** said Schaffer, who now directs the South Asia program for the Center for Strategic and International Affairs in Washington. **The Pakistani-born man who is reported to have confessed to the failed Times Square attack, Faisal Shahzad, 30 years old and a naturalized American citizen, is the son of a retired Pakistani vice air marshal, Bahar ul-Haq.** The father, who is reported to have gone into hiding since his son's arrest, was one of Pakistan's most accomplished pilots and flight instructors; he was stationed overseas in Britain and Saudi Arabia. Several other family members have served in the small, close-knit Pakistani Air Force. **American officials say they are aware of—but have been so far unable to confirm—reports that a Pakistani army major was arrested this week in Pakistan for involvement in the Times Square plot, and that the officer may have been a go-between for Faisal and the Pakistani Taliban.** In the Chicago case, Headley, who changed his name from Daood Gilani to make it easier to cross borders as a terrorist, has confessed to involvement both in the 2008 terrorist attacks in the Indian city of Mumbai and in a foiled plot to attack a Danish newspaper that had ran cartoons of the Prophet Mohammed. In the Mumbai rampage, nearly 170 people were killed, including six Americans. **His ties to the Pakistan elite are deep. His father is a retired Pakistani diplomat who is reported to have served at the Pakistani embassy in Washington. He attended a Pakistani military academy, the Hasan Abdal Cadet College, where he mixed with young men who would later go on to the run key elements of the Pakistani military and the civilian government, including the diplomatic corps.** Another man indicted in the case, Tahawwur Hussain Rana, a Pakistani-Canadian who ran a visa company in Chicago with Headley, also attended the military academy. Rana, who is awaiting trial, has insisted that he is innocent of the terrorism charges (Shenon, 2010).

**Title/Headline:** *Homegrown Terrorist Threat To Be Part Of National Security Strategy*

**Abstract:** Homegrown terrorism will be part of the United States' National Security Strategy for the first time, according to President Barack Obama's chief counterterrorism adviser, who called it a new phase of the terrorist threat. When the Obama administration unveils its National Security Strategy on Thursday, **it will be the first time any president "explicitly recognizes the threat to the United States posed by individuals radicalized here at home,"** National Security Adviser John Brennan said Wednesday. The strategy acts as a blueprint for how a White House administration intends to protect Americans. In the past, it has focused mostly on international threats. But a spate of terror-related plots in the United States recently prompted the Obama administration to include homegrown terrorism in the document, Brennan said. Earlier this month, Pakistani-American Faisal Shahzad was charged with trying to detonate a car bomb in New York's bustling district of Times Square. U.S. Army Major Nidal Malik Hasan is suspected of fatally shooting 13 people at Fort Hood in November. Colorado resident Najibullah Zazi, an Afghan national, pleaded guilty in February for conspiring to detonate explosives in the New York subway system. And David Headley, an American citizen from Chicago, Illinois, is accused of providing surveillance in the Mumbai, India, terrorist attacks that killed 160 people. **"We've seen an increasing number of individuals here in the United States become captivated by extremist ideology or causes,"** Brennan said. **"We have seen individuals, including U.S. citizens armed with their U.S. passports, travel easily to extremist safe havens, return to America, their deadly plans disrupted by coordinated intelligence and law enforcement."** Brennan, who made his comments at the Center for Strategic and International Studies in Washington, said that as the United States has strengthened its defenses against massive attacks like 9/11, al Qaeda has shown itself to be a "resilient, resourceful and determined enemy." Brennan said al Qaeda is recruiting individuals with little training, attempting relatively unsophisticated attacks and seeking people living in the United States to launch such attacks. **"They are seeking foot soldiers who might slip through our defense,"** Brennan said. **"As our enemy adapts and evolves their tactics, so must we constantly adapt and evolve ours."** Brennan did not provide any specific details about the president's strategy for combating al Qaeda and its affiliates, but said it **"will require a broad, sustained and integrated campaign that harnesses every tool of American power, military and civilian, kinetic and diplomatic"** (Benson, 2010).

**Title/Headline:** *Man Accused Of Forming 'Mini-Terror' Cell Denied Bail*

**Abstract:** A U.S. citizen charged with conspiring to provide support to al-Qaeda and creating his "own mini-terror cell" was ordered held without bail after he pleaded not guilty in federal court in New York. Wesam El-Hanafi, 35, poses a danger to the community and is a flight risk, U.S. Magistrate Judge Debra Freeman in Manhattan said today at his arraignment. Assistant U.S. Attorney

John Cronan said **El-Hanafi, who was born and raised in Brooklyn, New York, was “turned on” to al-Qaeda while living in the U.S. and traveled to Yemen in February 2008 to meet the network’s senior leaders. “Mr. El-Hanafi joined the group and he provided very real support to them,”** Cronan said. **“This is someone who knowingly joined a group whose purpose is to attack America.”** El-Hanafi and co-defendant Sabirhan Hasanoff, 34, are charged with agreeing to provide support to a known terror group, the U.S. said in an indictment. If convicted, both men face as long as 15 years in prison. **While in Yemen, El-Hanafi was taken to an al-Qaeda safe house with a hood over his head and met with two senior leaders. Once there, El-Hanafi took an oath of allegiance, called a bayat, to join the group,** Cronan said. Upon his return to the U.S., El-Hanafi “basically formed his own mini-terror cell,” recruiting Hasanoff, Cronan said. The government said it has a cooperating witness who can testify that El-Hanafi provided encrypted software that allowed the group to communicate over the Internet without detection and mask websites and e-mail addresses. **El-Hanafi communicated with other al-Qaeda members through prepaid mobile phones, which he discarded regularly, and sent as much as \$45,000 at a time by wiring funds or using a courier,** Cronan said. Cronan said El-Hanafi and Hasanoff provided computer advice to the group and that El-Hanafi also bought seven Casio digital watches over the Internet on behalf of al-Qaeda. **Al-Qaeda members have used Casio watches on detonators, prosecutors said. Ramzi Yousef, convicted of planning the 1993 World Trade Center bombing in New York, used a Casio watch in 1994 in a bomb that downed a jetliner in the Philippines.** Jane Anne Murray, El-Hanafi’s lawyer, argued her client should be released on bond and kept under house arrest at his family’s home in Brooklyn. With his family, including his wife and three children, living in New York, El-Hanafi has very strong ties to the U.S., Murray said. She also argued he didn’t have the wherewithal to flee the U.S., saying he lost a job he held in Dubai. **“Were he confined to his family’s apartment, he couldn’t be in a position to engage in activities alleged in the indictment,”** she said. Freeman said the government’s evidence convinced her there was no set of circumstances that could guarantee the public’s safety if El-Hanafi was released or prevent him from fleeing. **“The nature of these charges raise a very large specter of a danger to the community,”** Freeman said. “I have determined that detention is warranted.” At a May 17 hearing, Hasanoff was ordered held without bail. Both men are scheduled to appear June 1 before U.S. District Judge Kimba Wood, Cronan said. The case is U.S. v. El-Hanafi, 10-cr-00162, U.S. District Court, Southern District of New York (Hurtado, 2010).

**Title/Headline:** *Fox News Reporting: The American Terrorist*

**Abstract: This Fox News investigative special goes deep inside the mysterious and deadly world of American born terrorist Anwar al-Awlaki.** Fox News correspondents Catherine Herridge and Greg Palkot follow Awlaki's twisted and destructive trail from suburban communities in the U.S. to his hideout in Yemen. **New evidence emerging in the details about the Times Square bomber, the failed attempt to blow up a plane on Christmas Day and the massacre at Fort Hood has put for the first time a U.S. citizen on the CIA's "capture or kill" list.** Evidence includes documents that relate to the investigation of Anwar Al-Awlaki, the Muslim cleric who has been associated with 9/11 hijackers, Major Nidal Hasan, the alleged-Fort Hood shooter, and Umar Abdulmutallab, the so-called Christmas Day bomber. They include declassified memoranda for the record from the 9/11 Commission, the warrant for Awlaki's arrest from June 2002 as well as the motion to dismiss the warrant from October 2002. Also included is the Justice Department's statement to Fox News regarding our inquiry into the decision to rescind Awlaki's arrest warrant. Exclusive interviews with former and current government agents raise several questions: **Was Awlaki part of a terrorist cell within this country that attacked America on 9/11? And following the attacks, was there an attempt by our government to turn Awlaki into an informant or track him for intelligence?** Following last week's original airing of "Fox News Reporting: The American Terrorist," Rep. Frank Wolf, R-Va., wrote a letter to FBI director Robert Mueller where he raised "troubling" issues about the handling of the investigation into terror suspect Anwar Awlaki and called to bring back the 9/11 Commission to review purported flaws in national security. **You will see for yourself how this American terrorist is using our system against us** (Fox News, 2010).

**Title/Headline:** *Ohio Couple Accused Of Helping Hezbollah*

**Abstract: Two residents of Toledo, Ohio, Hor I. Akl, age 37, and his spouse, Amara A. Akl, age 37, both of whom are dual citizens of the United States and Lebanon, were arrested today on charges that they conspired to provide material support to a designated foreign terrorist organization, conspired to launder money, and committed arson relating to an insurance fraud scheme.** Hor Akl is also charged with two counts of bankruptcy fraud and one count of perjury, U.S. Attorney Steven M. Dettelbach announced today. The Akls were arrested this morning without incident and are expected to make their initial appearance in federal court in Toledo at 3:30 p.m. today. **According to the criminal complaint filed earlier today, from on or about Aug. 30, 2009, to the present, the Akls conspired to provide material support to Hizballah, which was designated by the Secretary of State as a Foreign Terrorist Organization in October 1997, and remains so today.** According to the complaint, the Akls agreed to send money to the terrorist organization Hizballah after they were approached by a confidential informant for the FBI who claimed he worked for an anonymous donor eager to support Hizballah. **The couple researched and proposed at least ten different ways in which the money could be shipped to Hizballah, the complaint alleges. The complaint alleges that the Akls ultimately agreed to conceal approximately \$500,000 in the hollow sections of a vehicle and to ship the vehicle to Lebanon, where they would remove the cash and give it to Hizballah officials on behalf of the purported anonymous donors in the United States.** The Akls expected to receive a fee or commission for arranging the transfer of funds. The complaint alleges that in March 2010, Hor Akl traveled to Lebanon to make arrangements for the delivery of the funds to Hizballah. Akl allegedly returned to the United States claiming that he had met with Hizballah officials. **The complaint further alleges that, during the investigation, the Akls discussed multiple criminal violations in the past, including bulk cash smuggling of large amounts of currency to Lebanon, wire fraud, mail fraud, perjury related to bankruptcy fraud, and concealing property in a bankruptcy proceeding.** According to U.S. Attorney Steven M. Dettelbach, **“This case demonstrates our continued commitment to prosecuting**

those who seek to aid terrorists and terrorist organizations, whether they do so from our backyards, or abroad. Furthermore, those who seek to take illegal advantage of our government, judicial and financial institutions, for their personal benefit or for the benefit of others, will not be ignored." C. Frank Figliuzzi, Special Agent in Charge of the Cleveland Division of the Federal Bureau of Investigation said, "Those who willfully work to fund terror with U.S. dollars must understand that the FBI works even harder to ensure that they fail." The maximum statutory penalties upon conviction are: for conspiring to provide material support to a Designated Foreign Terrorist Organization, up to 15 years in prison and a fine of \$500,000; for money laundering conspiracy, up to 20 years in prison and a fine of \$500,000; for each of the offenses of bankruptcy fraud, and perjury, up to 5 years in prison and a fine of \$250,000; and for the arson offense, up to 10 years in prison and a fine of \$250,000. This case is being prosecuted by Assistant U.S. Attorneys Justin E. Herdman, Duncan T. Brown and Thomas E. Getz and Trial Attorney S. Elisa Poteat of the National Security Division, Counterterrorism Section, following an investigation by the FBI, through its Joint Terrorism Task Force, in Toledo, Ohio, and the Internal Revenue Service, Criminal Investigation Division. **The public is reminded that a criminal complaint contains mere allegations. Defendants are presumed innocent and are entitled to a fair trial in which it will be the government's burden to prove guilt beyond a reasonable doubt** (U.S. Department Of Justice, 2010).

**Title/Headline:** *Units Make History With Air Force's First Homeland Defense ORI*

**Abstract:** Three units representing each component of the Air Force made history here May 16 through 23 when they successfully completed the first homeland defense operational readiness inspection. The ORI, held at the Gulfport Combat Readiness Training Center here, was administered by the Air Mobility Command Inspector General on a trial basis, but it may help pave the way for future inspections, officials said. **"For the very first time, the U.S. Air Force has validated a unit's wartime capability to defend the homeland by fighting an enemy right here on U.S. soil,"** said Col. Greg Nelson, the commander of the Kentucky Air National Guard's 123rd Airlift Wing, which served as the lead organization for the ORI. **"That represents a major shift in the way Air Force (leaders evaluate) unit readiness, because it puts the focus in our own backyard, rather than a simulated overseas location where these evaluations are usually staged,"** he said. The inspection was a total force effort, with the 123rd Airlift Wing representing the Air National Guard; the 317th Airlift Group from Dyess Air Force Base, Texas, providing active-duty forces; and the 70th Aerial Port Squadron from Homestead Air Reserve Base, Fla., contributing Air Force Reserve members and equipment. As with traditional ORIs, this one tested the ability of each unit to mobilize Airmen and equipment, fly to a remote site, operate in a hostile environment, defend against enemy attacks, and redeploy back home, all while AMC inspectors evaluated every phase of the operation. **Unlike traditional ORIs, in this one the participants were tasked with supporting civil authorities while fighting an unconventional foe in the United States.** In the past, ORIs have typically required units to deploy to simulated overseas bases and defend against conventional military forces. **"I'm pleased to say that all three units passed this new test with flying colors,"** Nelson said. **"We are ready to perform our mission of theater airlift anytime, anywhere, whether it be in support of our allies abroad or here at home in defense of the United States of America."** The ORI scenario that played out in Mississippi required more than 300 Kentucky Air Guard members to establish operations in concert with about 175 Airmen from the Texas and Florida units, forming the notional 104th Air Expeditionary Wing. **All three organizations worked seamlessly to launch theater airlift and medical evacuation sorties across the Gulf Coast region, supporting U.S. Northern Command missions and civil authorities, while foiling multiple attacks by well-organized terrorists.** The inspection posed an unusually challenging environment because of extreme weather conditions and several eleventh-hour changes caused by the non-availability of infrastructure, Nelson said. **"We didn't flinch. We didn't whine. We didn't push back to any challenge, from changes in taskings, to changes in locations, to changes in facilities at the last minute,"** he said. **"(With temperatures hovering near 100 degrees), it also was the hottest ORI the team chief had even seen. But we maintained a great attitude, we operated safely, and we performed our mission with a level of excellence that makes me proud. Even more significant, this inspection marked the first time that any Air Force unit has been wartime validated in support of the security and defense of the United States of America. That's huge,"** Nelson said. Col. Dan Dagher, the 317th Airlift Group commander, agreed. **"The 317th (AG), 123rd (AW) and 70th (APS) are ready -- and now tested -- to meet the challenge, reduce human suffering and save lives,"** he said. **"If an attack on the homeland happens, we will be the first responders. Americans can sleep better knowing that the 317th (AG), 123rd (AW) and 70th (APS) can provide defense support to civil authorities in the United States, and that the very survival of thousands of Americans rests on our now-tested ability to immediately respond and perform mass-casualty medical evacuations after a chemical attack."** Nelson said the idea for a homeland defense/homeland security ORI originated at the Kentucky Air Guard, whose leaders asked AMC to consider using the alternate approach because it better reflects the realities of a post-9/11 world in which homeland defense has taken center stage. **"Almost everything that an airlift wing would do in support of a real-world homeland security/homeland defense mission, whether it be response to a terrorist attack on U.S. soil or humanitarian aid following a hurricane, would be in support of a lead civilian agency at the federal, state or local level,"** Nelson said. **"As a result, the overall command and control aspects are completely different from those of an overseas operation. So we took our plan to the IG and said, 'You need to evaluate us on this,'"** Nelson said. **"They thought our approach had a lot of merit, and agreed to implement it on a trial basis. A lot of changes were required to make this approach work, but the IG developed new scenarios to test the interoperability of Department of Defense, federal, state and local agencies in defense of the homeland** (Greer, 2010).

**Title/Headline:** *Two Men Arrested Before Boarding Plane To Join Terror Group*

**Abstract:** The FBI arrested Two New Jersey men at JFK International Airport on Saturday night as they were preparing to board separate planes in an alleged terrorism plot tied to a radical Islamic group based in Somalia, Fox News confirmed. Mohamed

Hamoud Alessa, 20, of North Bergen, and Carlos Eduardo Almonte, 26, of Elmwood Park were charged with conspiracy to commit international terrorism and were picked up by the FBI before boarding flights to join the Somali Al Qaeda affiliate Al Shabaab, officials said. **Both men are believed to be American citizens. The two men were arrested following a years-long investigation and were charged with conspiring to commit an act of international terrorism through a group tied to Usama bin Laden's Al Qaeda network,** a federal law enforcement source told Fox News. "FBI New York arrested two men at JFK in support of an ongoing investigation," FBI spokesman Richard Kolko told FoxNews.com. "There was no threat at the airport. No additional information is available at this time." Kolko said the two were arrested in connection with an ongoing investigation and could not provide further details. They are scheduled to appear in court on Monday (Winter, 2010).

**Title/Headline:** *Twelve Americans Detained In Yemen*

**Abstract:** **Yemeni authorities have 12 Americans in custody, and the arrests may be linked to a joint U.S.-Yemeni anti-terror campaign,** a State Department spokesman said Monday. Spokesman PJ Crowley told reporters the U.S. was trying to get more information, but did not provide any further details. The spokesman, P.J. Crowley, declined to provide details about the case, except to say the State Department is aware of the arrests and is seeking more information about the individuals being held. Last Wednesday, **Yemeni security officials said authorities had detained several foreigners, including Americans, Britons and an Australian woman, in connection with an investigation into Al Qaeda's increased activity in the country.** The arrests reported last week were made after foreign intelligence agencies provided lists of names of people they wanted to have detained or put under surveillance, according to two Yemeni security officials, who spoke on condition of anonymity because they are not permitted to brief journalists. It was not immediately clear whether the 12 Americans cited by Crowley were among those reported to have been rounded up last week, but Crowley suggested there may be an anti-terrorism connection. Foreign language schools, and American students in particular, have been targeted as the Yemeni government gets "very serious" about cracking down on the threat posed by terror group Al Qaeda, Fox News Channel reported. **"If you are an American, you are a suspect," a source in Yemen told Fox News.** Asked whether he could confirm a report that the Americans had been picked up in Yemen at the request of the U.S. government, Crowley replied, **"We have great cooperation with the government of Yemen. Together, we are doing our best to help Yemen reduce the threat posed by Al Qaeda in the Arabian Peninsula. That's a threat to Yemen. It's a threat to the United States. But beyond that, I'm not going to talk about specifics"** (Fox News, 2010).

**Title/Headline:** *US Charges 14 Citizens For Aiding Somalia's Shebab Militants*

**Abstract:** **Fourteen US citizens arrested on Thursday have been charged for attempting to join or provide assistance to Somalia's militant, Al-Qaeda-linked group Shebab. Fourteen people, including several US citizens, were indicted on charges of aiding the Shebab, a Somali-based Islamist group linked to Al-Qaeda,** US Attorney General Eric Holder announced Thursday. Some of those charged are believed to be in Somalia fighting for the Shebab, which has claimed responsibility for deadly attacks in Uganda last month. **Holder said four separate indictments unsealed in various locations charge the 14 "with terrorism violations for providing money, personnel, and services" to the group.** The indictments "shed further light on a deadly pipeline that has routed funding and fighters" to the Shebab, Holder said. **Two of those charged were arrested earlier in the day in Minnesota, officials said, including one man and one woman accused of raising money for the Shebab on the pretense of collecting funds "for the poor and needy."** Several of those named in the new indictments had been previously charged by US authorities, and several are believed to be overseas, likely in Somalia where they may be fighting for the Islamist group. **Holder said the latest charges were part of a broader investigation that had charged a total of 19 people, of whom nine had been arrested in the United States or abroad. "Ten of the charged defendants are not in custody and are believed to be overseas,"** he said. One indictment unsealed Thursday in Minnesota charges 10 men, including at least three US citizens, with terrorism offenses for leaving the United States to join the Shebab as foreign fighters, he added. Seven of these had been previously charged by either indictment or criminal complaint. **Also in Minnesota, FBI agents arrested Amina Farah Ali, 33, and Hawo Mohamed Hassan, 63, both naturalized US citizens from Somalia. The woman and man are charged with conspiracy to provide material support to the Shebab.** In two separate cases, two US citizens were charged with providing material support to the Shebab. Both are believed to be in Somalia. The Shebab, an Islamist extremist group that controls most of central and western Somalia, claimed responsibility for the attacks in Uganda's capital on July 11 that killed 76 people gathered to watch the World Cup final. Earlier media reports said 14 Americans had been arrested in the probe. Holder said the Justice Department would continue to pursue cases of so-called homegrown terrorism involving Americans joining foreign extremist groups. **"As demonstrated by the charges unsealed today, we are seeing an increasing number of individuals -- including US citizens -- who have become captivated by extremist ideology and have taken steps to carry out terrorist objectives, either at home or abroad,"** he said. **"It's a disturbing trend that we have been intensely investigating in recent years and will continue to investigate and root out. But we must also work to prevent this type of radicalization from ever taking hold."** In Alabama, prosecutors unsealed a September 2009 superseding indictment against Omar Hammami, 26, a US citizen accused of providing material support to the Shebab. He is believed to be in Somalia. In California, officials today unsealed an October 2009 indictment against Jihad Serwan Mostafa, 28, a US citizen also believed to be in Somalia, on similar charges. In Minnesota, 10 others were named in indictments in addition to the two arrested Thursday. They include three US citizens and four legal US residents, all of whom are believed to be overseas. Among those named are US citizens Abdikadir Ali Abdi, 19, Abdisalan Hussein Ali, 21, and Cabdulaahi Ahmed Faarax, 33; Farah Mohamed Beledi, 26, and Abdiweli Yassin Isse, 26. They are charged with conspiring to kill, maim and injure persons abroad and other charges. Five others who had been previously charged by indictment, on related charges, are Ahmed Ali Omar, 27; Khalid Mohamud Abshir, 27; Zakaria Maruf, 31; Mohamed Abdullahi Hassan, 22; and Mustafa

Ali Salat, 20. Holder said Thursday's arrests and charges served as "an unmistakable warning" to anybody considering joining terrorist groups. "If you choose this route you can expect to find yourself in a US jail cell or a casualty on the battlefield in Somalia," he added. The announcement came a day after a US man was arrested hours before he was scheduled to travel to Somalia to fight with the Shebab. Shaker Masri, 26, was charged with attempting to provide material support to Al-Qaeda and the Shebab (France 24, 2010).

**Title/Headline:** *USNORTHCOM Gears Up For Potential Attack On U.S. Soil*

**Abstract:** USNORTHCOM has admitted that they are preparing military operations within the United States. This is the first time in history this has been done and they will be working with DHS, state and local law enforcement on U.S. soil. The focus of this operation will be in our own back yard. Northcom is planning on defending against enemy attacks and supporting civilian authorities with fighting an unconventional foe, all on US soil. NORTHCOM went on to say that the drill will be in the Gulf area. They anticipate no infrastructure and possible extreme weather conditions. **"Even more significant, this inspection marked the first time that any Air Force unit has been wartime validated in support of the security and defense of the United States of America. That's huge," Nelson said. "The survival of thousand Americans rests on this training".** The Intel Hub believes that there could be a mass evacuation of the Gulf. The chemicals that are being used on this oil spill could, by themselves cause a tremendous amount of various health problems. We will keep you posted. This could be part of Operation Garden Plot. and possibly could be why there has been reports of hardened troops building up in the Gulf. BP is currently saying that the oil spill should be stopped by next week. **One thing is for sure, the dispersant isn't going anywhere in months much less weeks** (Ambellas & Thomas, 2010).

**Title/Headline:** *Man, Woman Accused Of Trying To Enter Air Force Base Illegally With Weapons*

**Abstract:** Military-style gear and weapons were found inside the vehicle of a man and woman who attempted to gain illegal entry to MacDill Air Force Base in Florida on Monday, the military said. The two were in custody after trying to access the base about 5:00 p.m. local time through the Bayshore Gate, according to a United States Air Force statement. Base public affairs officer Senior Airman Katherine B. Holt reports a man and woman were unable to show proper identification Monday evening, and their vehicle was searched. **Security found military-style gear and weapons in the sport utility vehicle but no explosives. Holt says she didn't know how many weapons were removed but they were rifle-type. The suspects names were not released.** The base is home to U.S. Central Command, which runs the U.S. wars in Afghanistan and Iraq. The Bayshore Gate is closed but the rest of MacDill, including the Dale Mabry Gate, is operating normally (Fox News, 2010).

**Title/Headline:** *Man Seized At Army Post Had Land Mine, Laser Scope*

**Abstract:** A former national guardsman was charged with pretending to be a U.S. Army soldier after authorities say he convinced an officer at a military base to give him a sophisticated laser sight. Anthony Todd Saxon, 34, was charged with impersonating an Army master sergeant and stealing the infrared laser targeting sight after he was caught on the east Georgia base with a land mine, several grenades and night vision devices, prosecutors said. Saxon was wearing a full combat uniform, including rank and insignia, when he was stopped at Fort Gordon by military police and questioned about his activities, according to the complaint. After Saxon gave them consent to search his vehicle, authorities said they found several grenades and the land mine, among other equipment. According to the complaint, Saxon told investigators he was able to obtain the laser sight by telling a captain in the base's military police office that he was a master sergeant in the Army's 82nd Airborne Division and that he needed it to train a soldier. **He told investigators he was able to obtain the device after signing a receipt, according to the court documents. He also said he was a member of the Army National Guard between 1993 and 1995, but was medically discharged for heart problems, according to the records.** Florida National Guard spokeswoman Crystal McNairy said that Saxon joined the Guard in 1993 and left with an honorable discharge in 1994. She said his rank was private 1st class, but she would not provide any other details about his service. Fort Gordon spokesman Buz Yarnell said Saxon was stopped on the Army post because his car matched the description of a vehicle suspected in an earlier theft of military equipment from the post in April. **Yarnell would not say what had been stolen. Yarnell said the grenades, called "flash bangs," use blinding light and loud noise to stun people but don't explode into lethal shrapnel. "He couldn't have done any serious damage,"** said Yarnell, who would not say whether the explosives were detonated. Fort Gordon, near Augusta, is home to the Army Signal Corps, which is in charge of the service's global communication and information systems (Brumback, 2010).

**Title/Headline:** *Would-Be Bombers In U.S. Hampered By Logistics*

**Abstract:** For years, officials have predicted that it is only a matter of time before the car bombs and suicide attacks that are commonplace in Afghanistan and Iraq arrive in the U.S. But so far, overseas terrorist groups have had little success in launching those kinds of attacks in America. The latest example: the attempted car bombing May 1 in Times Square. An SUV was loaded with an explosive device that smoked and sparked but never went off. Explosives experts say there are many reasons for the string of bomb failures. Among them: It is hard to get explosive materials in the U.S.; putting together a bomb is a complicated process; and those kinds of attacks require a team to get them off the ground.

**Internet's Role Overstated:** Despite reports to the contrary, experts say the Internet's role in guiding do-it-yourself bomb makers has been highly overstated. There are plenty of video guides and recipes for improvised explosives on the Web. But officials say to suggest watching a video will make you a bomb maker is a little like saying that watching a couple of Major League baseball games on TV will provide everything needed to step up to the plate and connect with a fastball. "It is much harder to actually sit down and build and make a functioning bomb than I think has been represented," says Terry Turchie, the former head of the FBI task force that caught Ted Kaczynski, the so-called Unabomber. "You can obtain and acquire the information you need, but having the technical ability to put these bombs together is a totally different story," he says. The arrest of Kaczynski in 1995 ended a nearly 20-year mail-bomb spree in which Kaczynski targeted university professors, corporate executives and airplane passengers. He killed three people and injured some two dozen more. Kaczynski was a Harvard-educated math genius with anarchist leanings and, alone in a cabin in rural Montana, he taught himself how to make a bomb from scratch. It took him years of research and testing. "There were gaps in Unabomber attacks," Turchie says. "We found out later that was because he was trying to perfect his bomb. He was teaching himself the fundamentals of chemistry and engineering. The fact of the matter is, it takes a long time to learn to assemble a bomb without killing yourself."

**Difficult To Assemble The Materials & Get It Right:** Officials say that while some terrorist operatives have come to the U.S. and gathered the necessary ingredients to make a homemade bomb, the devices rarely work. That's a big reason why the U.S. hasn't seen many successful explosive attacks. The expertise to assemble the components — to get the detonator just right, to insert the timer, to pull together an explosive powerful enough — is very hard to do correctly. Regulations in the U.S. present further obstacles. Bomb makers in Afghanistan and Pakistan have military-grade explosives all around them. In the U.S., explosives are regulated, so terrorists are forced to fashion bombs by boiling down household products like peroxide and hair spray. That's what Najibullah Zazi, the man behind a plot to bomb the New York subway system and other transportation targets in 2009, had to do. He was buying hair dye at a Denver beauty supply store so he could concentrate it into a highly volatile explosive called TATP, or triacetone triperoxide. It is unclear whether he was actually able to do that. Zazi, who pleaded guilty to conspiracy to use weapons of mass destruction among other charges, faces a possible life sentence without parole.

**Lacking Support & Expertise:** Experts say making a bomb is also very hard to do alone. In the Middle East, there are teams of people who are behind bomb plots. "The huge difference between the unsuccessful bombings we've seen here and the highly successful and countless day after day successful bombings we see in Iraq or Afghanistan is that the bomb makers have some significant support with people who knew what they are doing," Turchie says. The teams on the ground include financiers, explosives experts who can predictably turn out devices that work, distributors who get the bombs out to the targets, and people who do reconnaissance. That model was used to successfully attack the U.S. in 1993. An operative named Ramzi Yousef joined forces with a handful of explosives experts to mix a urea nitrate bomb. They put the bomb in a van, drove it into the underground parking garage of Tower 1 of the World Trade Center, and detonated it. The bombing killed six people and injured more than 1,000. Leo West, a former explosives expert with the FBI, says it would be hard to launch that kind of operation now. "The security has improved so much, it has become very difficult for these people to get into the country," he says. Without a team, terrorist groups have been forced to rely on just one or two people at a time, and then hope to get lucky.

**Evading Detection During The Testing Phase:** There is one more hurdle: Even if someone made a bomb, West says, it would need to be tested — and that attracts attention. "That testing phase, as well as the target selection and surveillance phase, those are the phases of the operation where the bomber is most vulnerable to being found out or uncovered," he says. The suspect in the Times Square bombing never tested his car bomb — he just assumed it would work, according to officials close to the case. The fireworks the suspect allegedly hoped to use as part of the detonator wouldn't have ignited in a chain reaction — the safety fuses have to be lit individually. And the fertilizer he allegedly bought wasn't the kind that blew up — the kind that does has been regulated since the Oklahoma City bombing in 1995. All these mistakes were made in spite of the fact that the man accused of the Times Square bombing attempt, naturalized U.S. citizen Faisal Shahzad, allegedly had hands-on training in Pakistan. That isn't to say that terrorist

organizations have given up. U.S. intelligence officials say militant groups are still trying to reach into America and find someone who is capable of succeeding where others have failed (Raston-Temple, 2010).

**Date:** June 21, 2010

**Source:** Fox News, Lee Ross

**Title/Headline:** *High Court: Americans Can't Help Terrorists*

**Abstract:** Over the objections of three justices, the Supreme Court has upheld a federal law prohibiting American citizens from providing "material support or resources" to foreign terror groups. The 6-3 majority opinion from Chief Justice John Roberts is a victory for the government's efforts to fight terrorist organizations. "It is not difficult to conclude, as Congress did, that the taint of [terrorist's] violent activities is so great that working in coordination with them or at their command legitimizes and furthers their terrorist means," Roberts wrote. "Moreover, material support meant to promote peaceable, lawful conduct can be diverted to advance terrorism in multiple ways." A group called the Humanitarian Law Project sought to provide legal training and political advocacy for a pair of groups designated by the State Department as foreign terrorist organizations. Monday's ruling says that support is illegal because "...all contributions to foreign terrorist organizations--even those for seemingly benign purposes--further those groups' terrorist activities." The Humanitarian Law Project claimed the law violated its First Amendment rights to free speech and assembly. The Court's ruling said that was not the case. Justice Stephen Breyer took the unusual step of reading his dissent from the bench, something that is rarely done and often only when a justice feels particularly strong about the outcome of the decision. **Breyer said he could not agree with the Court's conclusion that "the Constitution permits the Government to prosecute the plaintiffs criminally for engaging in coordinated teaching and advocacy furthering the designated organizations' lawful political objectives."** Breyer was joined in dissent by Justices Ruth Bader Ginsburg and Sonia Sotomayor. The case ends 12 years of litigation in which the Humanitarian Law Project had sought to assist the lawful and nonviolent activities of two separatist groups in Turkey and Sri Lanka. Notwithstanding any benevolent activities, the United States government says the groups PKK and LTTE are terrorists groups. **The Project claimed the "material support" law infringed on their First Amendment rights to advocate and speak on behalf of the separatist groups. But the Court concluded that it is "wholly foreseeable" any support for these groups would provide them with "information and techniques that it could use as part of a broader strategy to promote terrorism, and to threaten, manipulate, and disrupt."** It set aside the Project's claims saying its proposals of political advocacy were so broad in scope that they could not prevail on their constitutional claims. Breyer said he does not dispute the Court's concerns about protecting the country from the threat of foreign terrorist groups. But he said he was unable to determine how applying the law actually achieves that purpose. "I believe the Court has failed to examine the Government's justifications with sufficient care. It has failed to insist upon specific evidence, rather than general assertion. **It has failed to require tailoring of means to fit compelling ends. And ultimately it deprives the individuals before us of the protection that the First Amendment demands.**" Supreme Court nominee Elena Kagan argued and won the case for the government (Ross, 2010).

**Title/Headline:** *Pregnant Women Are Being Sent To U.S. To Have Terrorist Babies, Congressman Says*

**Abstract:** A Texas congressman is warning that terror cells are cooking up a patient, complex plot to literally breed future terrorists inside the United States. Republican Rep. Louie Gohmert, speaking on the House floor last week, cited as his source a "retired FBI agent." He said the agent explained to him that foreign terror groups are looking to "game our system" by sending pregnant women to the United States to give birth to terrorists-in-training, who would have the added advantage of U.S. citizenship. Of course, the plot wouldn't come to fruition for decades. "It appeared they would have young women, who became pregnant, would get them into the United States to have a baby. They wouldn't even have to pay anything for the baby," Gohmert said. **"And then they would return back where they could be raised and coddled as future terrorists. And then one day, 20, 30 years down the road, they can be sent in to help destroy our way of life."** Gohmert issued the warning in defense of Arizona's immigration law, which has come under fire by critics who say it will lead to racial profiling. **The Obama administration is planning to sue Arizona over the law, something Gohmert described as the kind of "stupid" approach to immigration that terrorists plan to exploit. "They figured out how stupid we are being in this country to allow our enemies to game our system, hurt our economy, get set up in a position to destroy our way of life, and we won't do anything about it. We'll even sue a state that tries to do something about it,"** he said (Fox News, 2010).

**Title/Headline:** *Terrorism Cases Force More Muslim Americans To Grapple With Homegrown Jihad*

**Abstract:** The scene is becoming too familiar: A young man is arrested for intending to harm innocent people. He may proclaim he's an Islamic soldier, he may say he wants to be a martyr, or he may have planned a trip overseas with the apparent intent of shooting at American soldiers. Such descriptions jibe with a number of recent arrests: of Faisal Shahzad, the failed Times Square bomber from Connecticut who pleaded guilty June 21; of the five American men from Virginia who have been sentenced in Pakistan to 10 years in prison for conspiring to carry out terrorist attacks; and of Najibullah Zazi, the former airport shuttle-bus driver from Colorado who pleaded guilty to involvement in a bomb plot against the New York subway system – a plot that apparently had the involvement of a high-level Al Qaeda operative. Are these simply anomalies, bad apples within the greater law-abiding Muslim population in the United States? Or do they indicate that something more sinister needs to be confronted within this population so that the idea of killing innocent people does not become a misguided act of martyrdom? Answering these questions is one of the most difficult tasks facing the Obama administration. If it decides that some sort of radical form of Islam is making inroads, it risks provoking millions of peaceful Muslims, who may perceive religious persecution. If the administration decides there isn't a problem, it may miss future terrorists. Here's part of the mind-set that the government is grappling with: **When Mr. Shahzad pleaded guilty to planting a weapon of mass destruction in Times Square, he told a federal judge that he viewed himself as a "mujahid, a Muslim soldier."** "I am part of the answer to the US terrorizing the Muslim nations and the Muslim people, and on behalf of that, I'm avenging the attacks," Shahzad said as he explained why he was pleading guilty. Shahzad may not be the only Muslim-American thinking this way, says Asra Nomani, a Muslim-American and author of "Standing Alone in Mecca: An American Woman's Struggle for the Soul of Islam." On a more general level, she says, it's not unusual for young Muslims growing up in the US to have an identity issue: **Do they wear hair coverings? Do they marry the Muslim boy or girl next door? "I know the identity issue because I lived it,"** Ms. Nomani says. "There is this tug of war inside ourselves of trying to reconcile Islam and being an American." The hearts and minds of some of these young people could be an easy target for radical Muslims who use YouTube and other websites to post inflammatory rhetoric. Such rhetoric can be appealing to the young, Nomani says. **"My awakening came after 9/11 and my friend [and Wall Street Journal reporter] Daniel Pearl's kidnapping. And I realized we are asleep at the wheel here, and we have to be honest about the fact we have a problem inside our community,"** she says. However, other Muslim commentators say their community does not endorse radicalism. After Shahzad's bombing attempt in Times Square, the Muslim community condemned his action, says Osama Siblani, publisher of the Arab American News in Dearborn, Mich. "This is an exception, not the rule," he says, and adds, **"I have assured many people from the younger generation: There is a way to express yourself in a democracy ... even with a decision made in the White House."** Some mainstream Islamic groups say that Shahzad's comments are similar to the rhetoric emanating from radical groups for years. **"The only difference is this took place in an American courtroom instead of on a video from some cave in Afghanistan,"** says Ibrahim Hooper, communications director for the Council on American-Islamic Relations in Washington. "I don't think it will resonate." The official view of the US government seems to meld perspectives. The 2010 Annual Threat Assessment, written by Dennis Blair, then director of national intelligence, says that violence from home-grown jihadists will persist, but will be sporadic. **"A handful of individuals and small discrete cells will seek to mount attacks each year, with only a small portion of that activity materializing into violence against the Homeland,"** the assessment said. It does require walking a tightrope, says Michael P. Jackson, deputy secretary of the Department of Homeland Security under the Bush administration. It's fair **"to ask the Muslim community to be sensitive to perversions of their core faith and to teachings of coexistence with other religions,"** says Mr. Jackson, now a founder of Firebreak Partners, a security consulting firm in McLean, Va. Recently, Nomani saw firsthand the efforts to avoid antagonizing certain Islamic groups when she was invited with some think tank analysts to a meeting with Farah Pandith, the US special representative to Muslim communities. (That position was created last year and is part of the State Department.) **"I immediately said that we have to fundamentally challenge the interpretations of Islam that are claiming our youth,"** Nomani recalls. **"And yet as soon as I said that, there was an immediate visceral reaction: [The others there] said oh no, the US government can't get into the business of religion, the business of interpretation."** Nomani left the meeting discouraged. **"I thought to myself, if that's not part of our strategy, we are dead in the water, because we are just letting the poison keep infiltrating,"** she says (Scherer, 2010).

**Title/Headline:** *Terrorist Recruiting In Prison*

**Abstract:** You've heard their names: alQaida, Hamas, Hezbollah, Taliban and Islamic Jihad. What most haven't heard is that these terrorist organizations are setting up shop in U.S. and Latin American prisons under the guise of ministry. Counterfeit chaplains are converting prisoners to an extreme form of Islam with an eye to cultivate terroristic saboteurs and martyrs willing to wrap themselves in explosives and detonate on Main Street U.S.A. The Jihadist endgame is even more diabolical, which is to cause death and disease of biblical proportions to usher in the end of the world and their Messiah, the Al-Imam al-Mahdi, better known as the anti-Christ. Does that sound any more far-fetched than Jihadist hijackers flying into the World Trade Center on their way to an eternal date with 72 virgins? Read on. Dr. J. Michael Waller, Annenberg Professor of International Communication for the Institute of World Politics, warns of the inroads that radical Muslim chaplains are making in American prisons — North, Central and South America included. Testifying before the Senate's Subcommittee on Terrorism, Technology and Homeland Security, Dr. Waller stated that **Muslim chaplaincies are "one of several avenues of infiltration, recruitment, training and operation" for terrorist organizations who are backed by foreign governments like Iran and Syria, who want to gain a foothold in the Western Hemisphere. What begins as a religious conversion may be adulterated into the cultish fervor that is prevalent in many Islamic mosques and madrasah seminaries, radicalizing prisoners into a cadre of militant Muslims who will be soldiers in the ultimate Jihad, or Holy War. Prisoners are pressed into service by threat, or more effectively by bribe paid by the deep pockets of radical Islam.** Various U.S. intelligence sources, including the Israeli Mossad, warn that terror cells are being based throughout Latin America; the highest

concentration being in the tri-bordered area of Argentina, Paraguay and Brazil, known as “The Muslim Triangle,” the Western Hemisphere’s terrorist-central. From here, highly funded terror-brokers are systematically seeding almost 8 million square miles of fertile recruiting ground, building alliances with prison gangs, smuggling rings and drug cartels. As this budding crop of trained terrorists is harvested, their goal will be to mix in with the 3 to 4 million illegals that yearly cross our 1,952-mile backdoor — the Mexican border. The problem of militant Islam has also become a hornet’s nest in U.S. federal prisons, where 9 percent of inmates request Islamic services, most of whom are African-American. The FBI warns that many prisoners are now leaving prison “with extreme Islamist views.” Being that history is known to repeat itself, we could soon experience our own wave of ex-con and illegal immigrant suicide bombings. The loss of life in the U.S. could eventually be staggering and our economy brought to its knees before the altar of radical Islam, which fits comfortably within Mahdistic theology, the messianic doctrine of militant Islam, which also drives Iran’s current foreign policy. In a nutshell, this apocalyptic branch of theology teaches “The world will not come to an end until the Al-Imam al-Mahdi takes charge of the affairs of the world.” The parallels between the Muslim Mahdi and the Christian anti-Christ are notable and disconcerting. If Jihadist Islamists are successful at converting Latino and black martyrs through Mahdistic theology, a race war could ignite within America’s borders that would make the days of segregation pale in comparison. The U.S. waited for the tragedy of Sept. 11 before installing bulletproof cockpit doors to help secure the cockpits on America’s airplanes. What tragedy awaits the U.S. before she is forced to truly secure America’s borders and federal prisons? (Vorhees, 2010).

**Title/Headline:** *FBI: Uganda Attacks Signal Terror Group Potential*

**Abstract:** If the Somali terror group al-Shabab is responsible for the deadly attacks in Uganda, it could mean the group is capable of carrying out successful attacks in Africa and beyond, according to an intelligence assessment by the FBI and Homeland Security Department. Al-Shabab claimed responsibility for the explosions that killed 76 people watching the World Cup final in Uganda on Sunday. Intelligence officials have long warned that sporting events and large gatherings are attractive targets for terrorists. President Barack Obama, in an interview with South Africa Broadcasting Corp., said the statements indicate that al-Shabab and other terrorist organizations see Africa “as a potential place where you can carry out ideological battles that kill innocents without regard to long-term consequences for their short-term tactical gains.” The attack would be al-Shabab’s first successful strike outside of Somalia, according to the July 12 intelligence analysis obtained by The Associated Press. The document is marked for official use only and was distributed to law enforcement officials across the country. U.S. officials have yet to comment publicly on the significance of the attacks. A senior Obama administration official said there are indications that al-Shabab is responsible for the attacks and that the U.S. had no warning of them. The official was not authorized to speak publicly and spoke on condition of anonymity. Obama said the attacks were “tragic and ironic”, coming as Africans celebrated and watched the World Cup in South Africa. “On the one hand, you have a vision of an Africa on the move, an Africa that is unified, an Africa that is modernizing and creating opportunities; and on the other hand, you with forces join to area Minneapolis the left and recruited were men Somali-American 20 about 2008, 2007. Omar Hammami, a U.S. citizen based in Somalia, has appeared in the terror group’s media productions and urged people to travel to Somalia for terror training, according to a May 21 Homeland Security intelligence assessment about the evolution of terror threats to the U.S. “We cannot exclude the possibility that U.S. persons aligned with al-Shabab in the Horn of Africa may return to the U.S., possibly to carry out acts of violence,” said the assessment, also obtained by the AP. In June, two New Jersey men were arrested as they tried to fly from the U.S. to Egypt with plans to continue on to Somalia to join al-Shabab. Shortly before President Barack Obama’s inauguration, U.S. officials were concerned about intelligence they received regarding a potential threat from al-Shabab to the event. By the time Obama was sworn in, the threat had been debunked. Al-Shabab, which means “The Youth,” has been gaining ground as Somalia’s Western-backed government crumbles. The group’s goal is to establish an Islamic state in Somalia. The FBI’s New York office and the New York Police Department said Tuesday that a team of investigators, including forensic experts, from the city’s Joint Terrorism Task Force was en route to Uganda to assist authorities with the probe. The senior administration official said the U.S. will look at what is needed to support the Ugandan government. The bulk of U.S. aid that has recently been sent to Somalia has been delivered to Uganda, Burundi and Djibouti. Several African nations have pledged forces to the African Union’s peacekeeping force in Somalia, known as AMISOM, and there are now more than 5,000 troops stationed in the country. In several previous operations the U.S. has provided intelligence and surveillance information and as recently as last September delivered a surgical strike against a convoy that reportedly killed powerful insurgent Saleh Ali Saleh Nabhan (Sullivan, 2010).

**Title/Headline:** *National Guard Homeland Response Force Coming To Missouri*

**Abstract:** The U.S. Department of Defense announced Monday that Missouri will be one of 10 states to host National Guard Homeland Response Force units to help coordinate federal response to a terrorist attack. The Defense Department will place one unit in each of the 10 Federal Emergency Management Agency regions. Missouri is located in Region VII, which administers FEMA programs and coordinates federal disaster response in Missouri, Iowa, Kansas and Nebraska. The units will include about 570 personnel composed of chemical, biological, radiological, nuclear and high-yield explosive response specialists, as well as command and control and security forces. According to a news release from Rep Ike Skelton’s (D-Mo.) office, the Missouri Homeland Response Force will be established in Fiscal Year 2012. The units will be ready to respond within six to 12 hours of an event, bringing medical, search and extraction, decontamination, security, and command and control capabilities to bear in a regional response. “I am very pleased Missouri will host a National Guard Homeland Response Force. Keeping Americans safe is our number one priority, and this new Homeland Response Force is part of DoD’s efforts to improve emergency response,” Skelton said. According to the DoD announcement, the move came about following the 2010 Quadrennial Defense Review — a congressionally mandated report put together every four years that highlights changes and challenges in national defense strategy. The 2010 report calls for improved coordination

with civilian officials and providing resources for large-scale emergency response. Gov. Jay Nixon applauded the move in a statement released on Monday afternoon. Nixon said the move “will create as many as 90 new full-time National Guard positions under the leadership of Adjutant General Stephen L. Danner, and reaffirms our state’s commitment to supporting and encouraging the United States military here at home.” Scott Holste, a Nixon spokesman, said officials were still reviewing the best community to base the new unit in. **The new units should be established between September 2011 and October 2012. The DoD announced in June that Ohio and Washington would host the first two units, and are slated to be established in FY 2011. In addition to Missouri, Massachusetts, New York, Pennsylvania, Georgia, Texas, Utah and California will host the remaining homeland response forces. The DoD announced in June that Ohio and Washington would host the first two units, and are slated to be established in FY 2011 (Rich, 2010).**

**Title/Headline:** *Mountie Fears More Canadians Taking Up Jihad*

**Abstract:** Increasing numbers of Canadians are becoming radicalized, taking up violent jihad and leading Canada to become an exporter of terrorism, a top Mountie told QMI Agency Tuesday. “We are seeing more and more Canadians being radicalized and deciding to support the (Islamist) cause through violence,” said Gilles Michaud, the RCMP Assistant Commissioner in charge of the force’s national security criminal investigations. “It is a growing trend that we are very concerned about.” Up until recently, officials believed terror threats would come exclusively from outside Canada and efforts were made to beef up the borders, Michaud said. “Now, what we are seeing is that threat is growing from inside and is going elsewhere,” he said. “It’s like we are exporters of terrorism to a certain extent.” Michaud’s comments come as the Al-Qaida-linked and Somali-based Al-Shabaab group claimed responsibility for co-ordinated bomb attacks in the Ugandan capital of Kampala that killed 76 people Sunday. Senior White House administration officials said Tuesday the bombing was Al-Shabaab’s first terrorist act outside Somalia’s borders. **Although they believe Uganda was targeted because of its support for Somalia’s transitional government, other countries, including Western states, could also be attacked by the “exceptionally violent” group, they said. In Canada, at least six young Somali-Canadian men from the Toronto-area are believed to have joined Al-Shabaab. One is presumed to have died overseas. Michaud said there are many more cases of individuals from across the country, including a few Western converts, who travelled abroad to join the jihad movement in places like Pakistan, Afghanistan and Yemen, where Al-Qaida is a serious threat.** He would not give a specific number but said it was less than a hundred individuals. The RCMP attempts to track Canadians abroad by working with local enforcement officials where possible, Michaud said. Under the Criminal Code, officials can prosecute Canadians who perform terrorist acts outside the country’s borders. Michaud conceded officials are hesitant to speak out about national security threats but now believe “Canadians are not necessarily up to speed with the threats that exist in Canada and the threats Canadians pose externally as well,” and are hoping a public education campaign will provide the RCMP and the Canadian Security Intelligence Service (CSIS) with better leads. “We don’t want to be alarmists and create a state of fear,” he said. “But what I do fear is what we don’t know. “Who is out there that we are not aware of that is flying under the radar that is in a position to do something bad?” “Hopefully, the public will be more vigilant and report suspicious behaviour and don’t believe that (CSIS and the RCMP) know everything,” Michaud said. “Yeah, we’ve had some successes but it doesn’t mean we are aware of everything that is going on” (Raj, 2010).

**Title/Headline:** *National Guard’s “Homeland Response Force” To Patrol Missouri, Nine Other States*

**Abstract:** Homeland Response Forces are descending upon Missouri and nine other states, where National Guard units will be the face of Federal power in the regions in the event of a terrorist attack or disaster. The Sedalia Democrat reports that, along with Missouri, the state where the report was written, Massachusetts, New York, Pennsylvania, Georgia, Texas, Utah and California will also host the National Guard *Homeland Response Forces* in the name of fighting terrorism. **A unit will be placed within each of the regions established by FEMA, effectively implementing Federal powers at the state level preemptively.** The U.S. Department of Defense announced Monday that Missouri will be one of 10 states to host National Guard Homeland Response Force units to help coordinate federal response to a terrorist attack. **According to the DoD announcement, the move came about following the 2010 Quadrennial Defense Review — a congressionally mandated report put together every four years that highlights changes and challenges in national defense strategy. The 2010 report calls for improved coordination with civilian officials and providing resources for large-scale emergency response. Other states that have announced participation in the program include Ohio. This ties in with other recent reports of National Guard pitted against the domestic population. Infowars reporters recently exposed the National Guard involvement in Vigilant Guardian exercises training for terrorism & disaster during drills taking place in Chicago, Illinois.** Video footage detailing this activity can be seen exclusively at PrisonPlanet.tv. More shockingly, New York State has further announced the use of National Guard—merged with police—to aid in curbing the drug trade by intervening in local neighborhoods (despite the cynical fact that the CIA and other government agencies enable the importation of narcotics). **The reports state that the National Guard will even scan vehicles for ‘guns and drugs’ using high-tech gamma rays. This roll-out of National Guard is not new, but is being phased in at an accelerated pace. The publicly-presented mandate for these National Guard troops continues to revolve around the “disasters” and “terrorism” theme.** However, the RAND Corp., an authoritative think tank that has proven close to the political agendas actually being implemented, has prepared the nation for riots within the United States and control of widespread domestic unrest. Their 2009 report “*A Stability Police Force for the United States*” [PDF] proposes a “hybrid” military/law enforcement unit that would respond to disasters, but effectively act as a Federally-controlled policing force implemented within the bounds of States under the guise of controlling domestic riots, preparing for terrorism and even training for overseas deployment.

### The RAND report outlines in part:

- “The USMS [U.S. Marshalls Service] hybrid option ... provides an important nondeployed mission for the force: augmenting state and local agencies, many of which currently suffer from severe personnel shortages.”
- “Furthermore, the USMS has the broadest law enforcement mandate of any U.S. law enforcement agency.... [This model] provides significant domestic policing and homeland security benefits by providing thousands of additional police officers across the United States.”

**It is clear that while these events seemingly take place independently, and trickle out of the news without alarm, it is part of a larger plan to implement National Guard in duties never meant for them to undertake across the country, functioning, in essence, as another layer of “authority” over the states and individuals, and taking power under the pretense of national disaster, terror attack, biological or chemical warfare, the drug war or general domestic unrest.** Notice the difference between a response to something that might happen utilizing the National Guard when needed vs. the premeditated deployment of the National Guard along the 10 regional lines drawn by FEMA to serve at any pretext that can be justified. I have included both a RAND Corp. study for integrated National Guard response following Hurricane Katrina as well as an Army report playing out the joint command structures and integrated control of National Guard between Federal and State authorities, all closely paralleling the rise of Fusion Centers to ‘protect the homeland.’ **The table outlines how the effects and response requirements of several scenarios now being envisioned by the U.S. Department of Homeland Security — from radiological, nuclear, and biological terrorist attacks to a major earthquake — would be generally comparable to the effects and response requirements experienced in the wake of Hurricane Katrina.** Thus, the lessons so painfully learned from the hurricane could help America become stronger for all types of future catastrophic domestic emergencies. Numerous difficulties beset the military response. **The initial call-up of the U.S. Army National Guard in Louisiana and Mississippi was hindered by the fact that each state had a brigade, or about 3,000 troops, redeploying from Iraq. It took more than three days for roughly 6,000 backup troops to arrive from other states, because many had neither planned nor exercised for such emergencies.** As the forces flowed into the region, they lacked command and control, because it took more than a week for U.S. National Guard (henceforth national guard) division headquarters staffs to arrive. **Finally, the president did not decide until the end of the first week of the response to send in active-duty land units from the U.S. Army and U.S. Marine Corps, in part because most of these units were either overseas or preparing to deploy.**

**To improve military disaster-response efforts, the U.S. Army should take the following steps:**

- Give state national guard units the federal mission to conduct homeland security activities, as is the case today for planning and funding counterdrug operations.
- Create ten regional national guard rapid-reaction homeland security task forces.
- Collocate these task forces with the regional planning offices of the Federal Emergency Management Agency (FEMA).
- Create opportunities for the regional national guard task forces to train regularly with local first responders, including law enforcement officials, and other local units that are focused on counterterrorism and weapons of mass destruction.
- Train state national guard units for rapid response not only within their states but also for emergencies in other states.
- Prepare governors to call up state national guard units quickly and involuntarily for active-duty, out-of-state emergencies.
- Establish plans to use the Air National Guard or commercial airlines to fly designated national guard units to out-of-state emergencies.
- Prepare state officials to designate backup national guard units that could fill in during disaster response operations for national guard units deployed overseas.
- Assign both national guard and active-duty army units to homeland security missions as part of the army’s routine unit-readiness planning process.
- Prepare state and federal leaders to select quickly from a set of predefined command-and-control alternatives, giving the lead to federal or state task forces, depending on the characteristics of an emergency.

*Excerpts from Army Paper Discussing Use of National Guard for Homeland Disaster & Terrorism Response, Including Debate Over Military Command in Light of State vs. Federal Control*

### Command and Control: Command and Control of Military Forces in the Homeland:

*“To serve in the National Guard is to accept a dual mission. You can be called on to defend the country against enemies abroad, or to protect lives and property here at home in times of local emergency.” ~Richard B. Cheney*

**The U.S. military and state National Guard have a long and proud tradition of defending our nation from attack and assisting civil authority during times of crisis. Notwithstanding their primary Federal purpose of fighting wars, the frequency with which U.S. military forces are employed for missions related to homeland security has risen dramatically since 9/11.** This change is understandable given the increase in the perceived and actual threat to the United States. The American military, which is one of the largest Federal investments, is arguably the most versatile organization in terms of capability and responsiveness. **Fiscal appropriations by**

**Congress for its organizational structure, composition, and equipment are intended to satisfy the current National Military Strategy. In an effort to streamline military roles and responsibilities for homeland defense and civil support, several notable changes have taken place since 9/11.** First, Presidential authority established U.S. Northern Command (USNORTHCOM) in 2002. Second, the National Guard reorganized itself at the state level and launched a series of homeland defense and security programs. Likewise, the National Guard Bureau (NGB) also transformed itself by improving its national coordinating ability and refining its supporting role for state governments and the national defense community. **Finally, Congress changed the Federal law (Title 32) that governs the National Guard to create the legal framework for the executive branch to employ the Guard in homeland defense and civil support actions.**

**Polarizing Domestic Military Assistance:** After witnessing complications in the aftermath of Hurricane Katrina, Governor Rick Perry of Texas was determined to lead the Hurricane Rita response by retaining command and control over the Texas National Guard. In response to a White House request to establish an Active-duty officer as a dual-status commander, Governor Perry requested Presidential authorization for a Texas National Guard officer to be approved as a dual-status commander. **Hurricane Rita did not have the impact on Texas that Katrina had on Louisiana, and significant Federal military support was not required. Nevertheless, Governor Perry's request went unfulfilled, and unity of command under a dual-status arrangement never happened. Federal forces operating in Texas answered to the Federal chain of command that ran back to USNORTHCOM versus integrating with the state military response directly.** The stalemate over C2 left the impression with Governors and Guard members that National Guard dual-status commanders are not trusted to lead both state and Federal forces for a disaster response.

**State Command:** The first option is state command and consists purely of National Guard forces ordered to duty by a Governor. Every aspect of such National Guard employment is in accordance with state law and funded by the state. **Several hundred Guardsmen around the Nation are in state Active-duty status every day performing state missions such as search and rescue, incident response, and critical infrastructure protection. These missions also provide a domestic deterrent against potential attackers and indirectly support the Nation's homeland defense and homeland security missions.** The other status that falls under state command is Title 32, by which Guardsmen perform duties to accomplish training for their Federal mission or execute operational missions approved by the Federal Government, such as counterdrug or homeland defense activities. **The use of state command employs a Joint Force Headquarters-State (JFHQ-State) providing command and control for all in-state National Guard forces. The JFHQ-State can also act as a joint Service headquarters for national-level response efforts during contingency operations.** In this role, the JFHQ-State will generate a tailored JTF to assume tactical control of National Guard units supporting emergency response requirements. For operations that demand a large response force or multiple unique military capabilities, subordinate JTFs may be generated. **The primary advantages of the state command option include the preservation of state sovereignty over the response effort, detailed local area knowledge, clear lines of command, unity of effort, unity of command, avoidance of Posse Comitatus restrictions, and fast response times.** With a state-only Guard response, Governors retain their constitutional authority and control. Additionally, this option maximizes familiarity with local conditions, resources, personalities, and organizations. **Because Governors' constitutional responsibilities span a range of issues from enforcement of civil order to protection of critical infrastructure, the National Guard is a powerful capability in supporting a Governor's ability to discharge the duties of office effectively.**

**Parallel Command:** The second command option introduces Federal military forces under the command and control of USNORTHCOM. For civil support operations, the Federal military responds to DOD-approved requests that originate from an incident command within a state, and USNORTHCOM employs capabilities that operate in parallel with state Guard forces. **The underlying assumption for this approach is that the Federal military is available and prepared to respond.** Additionally, it is assumed that the National Guard will already be operationally engaged, given their proximity and ability to respond rapidly. **Parallel state/Federal commands have been used exclusively since Operation Winter Freeze in 2004 for operations ranging from the deployment of Navy salvage divers to multiple JTFs with thousands of troops.** In all cases, USNORTHCOM operates in support of a Federal agency responsible for an emergency support function (ESF) with the exception of ESF-3, Public Works and Engineering, which is the responsibility of the Army Corps of Engineers. The Federal response usually only occurs in support of the already ongoing state response.

**Dual-status Command:** The dual-status command structure combines the advantages of the state command option and the parallel command option. The dual-status command structure addresses the unity of command dilemma directly. Under this construct, National Guard commanders on Title 32 status are ordered to Federal Active duty (Title 10 status), retaining their state commission when activated. **This dual-status provides the statutory authority for one person to command both state and Federal military forces simultaneously. This permits the dual-hatted commander to control a unified military response at the operational level in support of the state. In figure 4, a notional dual-status command illustrates the chain of command beginning with the President and Governor.** National Guard forces in state Active-duty or Title 32 status perform state missions under the authority of the Governor, and assigned Title 10 Federal forces perform defense support of civil authority for USNORTHCOM. **The advantages of the dual-status command include a Governor retaining authority over the response, clear lines of command, and the ability to integrate Federal military forces operationally to achieve unity of effort.** Conversely, Presidential C2 is preserved. Every advantage previously described for the state command applies to the dual-status command.

**Federal Command:** The final option is a pure Title 10 Federal command. In this arrangement, all National Guard forces are federalized and integrated with Active-duty forces under the command and control of USNORTHCOM. **Resorting to this option is unlikely unless an extreme event unfolds and a state is completely overwhelmed and local government ceases to operate.** Under these conditions, the President is constitutionally obligated to restore public order and enforce the laws of the United States. The Federal Government unilaterally makes decisions, and Presidential involvement is expected to be significant until functioning civil authority is restored in the affected state.

The advantages of a Federal command are that it preserves U.S. sovereignty, leverages the Total Force, and establishes unity of command and effort. The disadvantages include the compromise of state sovereignty, political cost of federalizing the National Guard, and economic cost of taking charge of the response (Dykes, 2010).

**Title/Headline:** *Some Suspects Released With Conditions In Long-Running Investigation Of Minnesota Somalis*

**Abstract:** When Minnesota Somalis began traveling to their war-torn homeland to take up arms nearly three years ago, authorities initially feared they might someday return as domestic terrorists. But recent court activity suggests at least some of the men are not as dangerous as once feared. Five have been allowed to go free with various conditions as their cases work through the court system, including two who admitted spending time in a terrorist training camp. **After months in custody, the pair have gradually received more freedom, and are now living with family members.** "Judges tend to err on the side of caution in these cases," said Stephen Vladeck, an associate law professor at American University in Washington. So for a court to release a terrorism suspect, the judge "found clearly and convincingly that the defendant is not a threat." Roughly 20 men — all but one of Somali descent — left Minnesota from December 2007 through October 2009 to join al-Shabab, a violent group that seeks to establish an Islamic state in Somalia. The federal government designated al-Shabab a foreign terrorist organization in March 2008, and said it has ties to al-Qaida. **The threat posed by al-Shabab took on more urgency last week, when the group claimed responsibility for twin bombings in Uganda that killed 76 people during the World Cup final. It was the first time al-Shabab had struck outside Somalia's borders.** In a new audio message released Thursday, the militant group's leader threatened further attacks. It's unclear whether any Minnesota men were involved in the attack. **The FBI is assisting the investigation in Uganda. Federal officials are still seeking some of the Minnesota suspects, and authorities warn the group could still pose a threat in the future. "These individuals still present a dangerousness because of the ideology involved and the training that they get in camps,"** said E.K. Wilson, an FBI spokesman in Minneapolis. At least initially, many of the men appear to have been motivated not by anger at America but at turmoil in their Somali homeland, which has not had a functioning government since 1991, when warlords overthrew a socialist dictator and then turned on each other, plunging the African nation of 7 million into chaos. In late 2006, Ethiopian soldiers were brought into Somalia by a weak U.N.-backed government that was struggling to regain control of the country. Many Somalis saw that occupation as an invasion, and they viewed the Ethiopian soldiers as abusive and heavy-handed. In Minnesota, home of the largest population of Somali immigrants in the United States, anti-Ethiopian sentiment became commonplace — in coffee shops, households and public venues. **By the fall of 2007, some Somali men were holding secret meetings at Minneapolis mosques and homes, plotting ways to fight the Ethiopians, court documents said. The men were accused of varying degrees of involvement in the movement to return to Somalia.** Court documents say some helped pay for weapons or travel. Another person came up with a fundraising scheme. Others went to Somalia to learn to use machine guns and rocket-propelled grenades. At least one man helped ambush Ethiopian troops. Someone else carried out a suicide bombing. **"Nationalism may have played a role in the initial attraction or initial draw of these individuals, but radicalism and violent extremism at some point was introduced to many of them,"** Wilson said. Charges have been filed against 14 men — including some people who traveled to Somalia and some who did not. Seven of those charged are still at large. One man is in the Netherlands fighting extradition to the U.S., a process that could take many more months. All except one of the men who are in Minnesota were deemed fit for release with some conditions. For instance, Salah Osman Ahmed and Abdifatah Yusuf Isse both went to Somalia and later pleaded guilty to providing material support to terrorists (Fox News, 2010).

**Title/Headline:** *'Scary' Growth Of Gangs In War Zones*

**Abstract:** Chicago cop who served in Afghanistan and Iraq has warning: **Gang members are coming home with military training** Being in a street gang is now forbidden for members of the U.S. armed forces. But you might not guess that if you were to visit U.S. military bases in Iraq and Afghanistan, according to soldiers who have recently served there. Jeffrey Stoleson, a Wisconsin corrections official, returned from Iraq in January with photos of gang graffiti on armored vehicles, latrines and buildings. Stoleson, a sergeant with a National Guard unit, was there for nine months to help the Army set up a prison facility outside Baghdad. **"I saw Maniac Latin Disciples graffiti out of Chicago,"** Stoleson said, adding that there was a lot of graffiti for Texas and California gangs, as well as Mexican drug cartels. A Chicago Police officer -- who retired from the regular Army and was recently on a tour of Afghanistan in the Army Reserve -- said Bagram Air Base was covered with Chicago gang graffiti, everything from the Gangster Disciples' pitchfork to the Latin Kings' crown. **"It seems bigger now,"** said the officer, who previously served a tour in Iraq, where he also saw gang graffiti. Now back in Chicago, the officer said he has arrested high-level gang members who have served in the military and kept the "Infantryman's bible" -- called the FM 7-8 -- in their homes. The book describes how to run for cover, fire a weapon tactically and do the "three- to five-second rushes" seen in war movies. **"It's scary,"** he said. In 2006, Stoleson saw similar graffiti in Iraq during another tour of duty there. That year, the Chicago Sun-Times reported on gangs in the military -- and published several of Stoleson's photos of gang graffiti. Congress eventually banned members of the military from belonging to street gangs. And last November, the Defense Department added the ban to its rules. Spokesmen for the Army and Defense Department said they could not provide figures on how many soldiers have been thrown out of the military or otherwise disciplined as a result of gang membership. Stoleson, who stressed he was not speaking for the Wisconsin Department of Corrections or the Army, said it appears the problem is worse than ever. He warned that soldiers who return to gang life back home are especially dangerous because they know military tactics that they can use against the police and the public -- as a Marine did in 2005 when he killed a police officer and wounded three others in a California ambush.

"Gang members are coming home now with one or two tours," he said. "Some were on the field of battle." Civilian contractors in Iraq are part of the gang problem overseas, Stoleson said. He said he was involved in destroying a large quantity of drugs confiscated from U.S. contractors in Iraq (Main, 2010).

**Title/Headline:** *N. Carolina Man Appears To Be Top Editor Of Al Qaeda Magazine, U.S. Officials Say*

**Abstract:** A young North Carolina man who has moved to Yemen appears to be the editor-in-chief of a flashy new Al Qaeda magazine that features bomb-making instructions and an article by Usama bin Laden, U.S. officials said Monday. Samir Khan, a 24-year-old American citizen who left the country last October, is believed to be the top editor of Inspire, a newly launched online magazine that seeks to recruit members of Al Qaeda in the Arabian Peninsula – the notorious terror group's Yemeni branch that is linked to the attempted bombing of a Detroit-bound U.S. flight last Christmas. The 67-page online publication, written in colloquial English and launched last month, features flashy graphics and punchy headlines like "Make a Bomb in the Kitchen of Your Mom," as well as an article on global warming said to be written by Bin Laden. Anwar Al-Awlaki, an America-born cleric linked to several attacks on the U.S., including the Foot Hood massacre and the failed Times Square car bomb plot, has held a prominent role with the site and was thought to be its key proponent. Al-Awlaki, designated by the U.S. Treasury Department on Friday as a key leader in Al Qaeda in the Arabian Peninsula, recently posted an article on the site titled "May Our Souls be Sacrificed for You," in which he called for the Seattle cartoonist who launched "Everybody Draw Muhammad Day" to be executed. But intelligence sources told Fox News on Monday that they believe Khan, a web-savvy Charlotte, N.C., man who reportedly moved to Yemen to study Arabic, may be the mastermind behind the site – which some in the intelligence community are calling Al Qaeda's most ambitious terrorist recruitment tool to date. Intelligence analysts say Khan represents a new generation of computer-savvy radicals whose online tactics have become increasingly influential in recruiting violent jihadists abroad and promoting acts of terrorism within the U.S. "Khan's capabilities of publishing things fairly quickly and his web savviness elevates him in Al Qaeda's PR media arm," said David Draper, director of strategic operations for NEFA, a U.S. terror-watch group. "The launch of this English magazine is extraordinarily important." Khan first gained attention in 2007 when intelligence officials began monitoring his militant Islamic blog, "Inshallahshaheed" ("A martyr soon if God wills") from his parents' home in Charlotte, N.C. Citing free speech laws, U.S. officials never charged him with a crime, arguing that Khan's website never crossed the line from inflammatory rhetoric to violence. Khan was born in Saudi Arabia and moved to Queens, N.Y., when he was 7. FoxNews.com profiled Khan in 2008, traveling to Charlotte to interview him about his website, which called for the death of U.S. soldiers in Iraq and featured blood-drenched videos of U.S. troops injured in combat. Khan declined to comment, saying only that the messages on his blog "represent Muslims." In a later e-mail sent to FoxNews.com, Khan lashed out at the "arrogance" of the media, saying it should focus instead on converting to Islam. "When you go down in to the earth six feet deep, nothing will matter except what Religion you died upon," he wrote. Draper and other terrorism analysts say Khan's new role with the Al Qaeda website gives U.S. officials ample evidence to charge him with aiding a terrorist organization. Under the Patriot Act, he said, U.S. authorities "have enough to charge him with providing material support." "You do not have the right to aid and abet a terrorist organization in the United States," added Neil Livingstone, chairman and CEO of ExecutiveAction LLC, a security consultancy based in Washington. "You can agree with Al Qaeda's ends and means, but the moment that you start recruiting or sending messages, you've run afoul of the law" (Corbin, 2010).

**Title/Headline:** *FBI Warning Of Al Qaeda Hit Lists, Bomb-Making Tips Led To Shutdown Of Blogging Site*

**Abstract:** A popular website that hosted more than 70,000 bloggers was shut down suddenly last week after the FBI informed its chief technology officer that the site contained hit lists, bomb-making documents and links to Al Qaeda materials, it was reported on Monday. When the WordPress platform Blogetery.com went dead, the initial explanation from the site's host, Burst.net, was that "a law-enforcement agency" had ordered it to shut down, citing a "history of abuse." The explanation caused a wave of conspiracy theories in the blogosphere. But according to a report on CNET Monday, Burst.net shut down Blogetery.com when it became spooked by a letter from the FBI, in which the bureau detailed the presence of terrorist materials among the blog posts. Burst.net CTO Joe Marr explained that the FBI contacted them with a request for voluntary emergency disclosure of information, bringing to their attention that terrorist material presenting a threat to the lives of Americans was found on a server Burst.net hosted. FBI agents said they wanted specific, immediate information about the people who posted the material. Paul Bresson, unit chief for the FBI's national press office, wrote in an email to FoxNews.com Monday that Burst.net shut down the website on its own. "We did not make a request to shut down a website," Bresson wrote. Burst.net executives and public relations staffers were not available for comment; answering machines at the office appeared to be disconnected. Bloggers had been theorizing for days about the shutdown, mostly speculating about conspiracies and anti-piracy movements. File-sharing news site TorrentFreak claimed it was most likely the work of anti-piracy authorities. The site speculated that it could be part of a new initiative called "Operation: In Our Sites," designed to crack down on Internet piracy and counterfeiting under the authority of Vice President Joe Biden and U.S. Intellectual Property Enforcement Coordinator Victoria Espinel. "Operation: In Our Sites" has already targeted numerous sites including TVShack.net, Movies-Links.TV, FilesPump.com,

Now-Movies.com, PlanetMoviez.com, ThePirateCity.org, ZML.com, NinjaVideo.net and NinjaThis.net. Others wondered whether this was a step by the government to assert control over the Web. Just weeks ago, a plan giving the President emergency power to turn off the Internet was approved by the Senate. The reality turns out to be much more serious. A representative for Burst.net said the company had offered Blogetery's operator his money back, but that "should be the least of his concerns." **"Simply put: We cannot give him his data nor can we provide any other details,"** the representative said. **"By stating this, most would recognize that something serious is afoot"** (Fox News, 2010).

**Title/Headline:** *Virginia Man Arrested On Charges He Aided Terror Group*

**Abstract:** The Virginia man who warned on a radical Islamic website that the creators of the cartoon series "South Park" will be targeted for death for their caricature of the Prophet Muhammad has been arrested on charges that he provided material support to the terrorist organization Al-Shabab, federal officials said Wednesday. Zachary Adam Chesser, aka Abu Talhah Al-Amrikee, admitted to federal agents that he attempted on two occasions to travel to Somalia to join Al-Shabab as a foreign fighter. **After he was stopped from boarding a flight from New York to Uganda on July 10, Chesser, 20, allegedly admitted that he intended to travel from Uganda to Somalia. Chesser, of Fairfax County, Va., attempted to board the plane with his infant son; court records allege he intended to use his son as part of his cover to avoid detection. "This case exposes the disturbing reality that extreme radicalization can happen anywhere, including Northern Virginia,"** said U.S. Attorney Neil MacBride. "This young man is accused of seeking to join Al-Shabab, a brutal terrorist organization with ties to Al Qaeda. These allegations underscore the need for continued vigilance against homegrown terror threats." **According to a court affidavit, Chesser allegedly discussed in a series of interviews with law enforcement officials how he has maintained several online profiles dedicated to extremist jihad propaganda. These profiles were allegedly used by Chesser to post pro-jihad messages and videos online. "We can't fight terrorists alone,"** said FBI Assistant Director in Charge Shawn Henry. "Religious leaders of all faiths, family members and particularly the younger members of our communities need to speak up and speak out against individuals who participate in actions like those alleged here." In April, FoxNews.com spoke to Chesser after he posted a warning on the website RevolutionMuslim.com following the 200th episode of "South Park," which included a caricature of the Prophet Muhammad disguised in a bear suit. **The young man, who just two years ago was studying foreign languages at George Mason University, wrote on the site that Trey Parker and Matt Stone, the cartoon's creators, "will probably end up" like Theo van Gogh, a Dutch filmmaker who was murdered in 2004 after making a film critical of Islamic society. "It's not a threat, but it really is a likely outcome,"** Chesser told FoxNews.com. "They're going to be basically on a list in the back of the minds of a large number of Muslims. It's just the reality." Chesser's father, David, said he was unaware of the arrest and declined further comment when reached on Wednesday. Chesser's mother, Barbara, reached at her office in Washington, also declined comment. Chesser is scheduled to make his initial court appearance in U.S. District Court in Virginia on Thursday. **The U.S. Department of State designated Al-Shabab as a foreign terrorist organization on Feb. 29, 2008, describing it as a violent and brutal extremist group based in Somalia with affiliations to Al Qaeda** (Miller, 2010).

**Title/Headline:** *Alaska Pair Pleads Guilty To Lying About Hit List*

**Abstract:** A National Weather Service employee and his British-born wife pleaded guilty Wednesday to domestic terrorism charges of lying to the FBI about a hit list of possible targets who the couple suspected were enemies of Islam. Paul Rockwood Jr. and his wife, Nadia Rockwood, of King Salmon, Alaska, were charged with lying about the list and making false statements about domestic terrorism during interviews with FBI agents in May. The FBI alleged that the list had about 15 targets. Its contents were not made public, but officials said none of those targeted lived in Alaska. Under a plea deal, Paul Rockwood, 35, who worked as a meteorological technician for the weather service, will get eight years in prison, the maximum allowed. **His 36-year-old wife, who is five months pregnant, will be allowed to return to the United Kingdom and serve five years of probation there. Neither was held in custody prior to the hearing.** U.S. District Judge Ralph Beistline did not immediately sign off on the plea deal. He set sentencing for Aug. 23. **Prosecutors alleged that Paul Rockwood, also known as "Bilal," converted to Islam about a decade ago and began studying the teachings of American-born cleric Anwar al-Awlaki, who has professed hatred for the United States and supports acts of terrorism.** According to court documents, Paul Rockwood converted to Islam in late 2001 or 2002, when the couple lived in Virginia. "After his conversion, and while residing in Virginia, Rockwood became a strict adherent to the violent Jihad-promoting ideology of cleric Anwar al-Awlaki," documents said. **"This included a personal conviction that it was his religious responsibility to exact revenge by death on anyone who desecrated Islam."** Federal authorities claimed Rockwood began researching and selecting possible targets for future execution by visiting websites. **They alleged that after he moved to Alaska in 2006, he began researching explosive components, construction of remote triggering devices, such as cell phones, and construction of bombs to be delivered by common mail carriers. Authorities said that in late 2009, he began discussing using mail bombs and possibly killing targets by gunshot to the head.** They said that by early this year, he had formalized his list. Prosecutors said he gave the list of targets to his wife in April, and she carried it with her on a trip to Anchorage, where the FBI obtained it. Officials did not disclose how the FBI got it or how they knew of its existence. Nadia Rockwood admitted in court that she was aware that her husband wanted to seek revenge and knew the purpose of the list. But when questioned by authorities, she denied delivering the list and instead said it was a book or letter. When the FBI interviewed her husband, he denied having created the list, its purpose or ever having had a list. Rockwood will be held in custody until sentencing. **Nadia Rockwood, who holds dual citizenship in the United Kingdom and the U.S., will be released to take care of the couple's 4-year-old child in Anchorage until her sentencing.** U.S. Attorney for Alaska Karen L. Loeffler said the domestic terrorism case was the first of its kind in Alaska. **"I'm comfortable this is a fair and good result,"** she said. King Salmon is a small community of a few hundred people on the Alaska Peninsula (Pemberton, 2010).

**Title/Headline:** *Jihad Wannabe*

**Abstract:** Court documents don't indicate that 26-year-old Shaker Masri had any contacts with the Al Qaeda-affiliated Al Shabab, global jihadist organization. He didn't have any weapons and didn't have substantial money. What he had, according to his criminal complaint, was a desire to join them and a plan to get to Somalia so he could. FBI Special Agent Ross Rice says he is part of a growing trend both locally in the mid-west and nationally. Federal authorities arrested Masri hours before he was scheduled to leave Chicago's Midway airport, en route to Los Angeles. From LA he planned to drive to Mexico. **He believed from Mexico he could travel to Somalia with less scrutiny. Masri faces two charges: Attempting to provide material support to a designated terrorist organization and attempting to provide that support through the use of a weapon of mass destruction.** In this case, the weapon of mass destruction is defined as a suicide bomb. The criminal complaint says Masri told a federal informant that he wanted to become a "Martyr" by wearing a suicide vest. **"I wish to know how to [sic] the explosive belt is made...I will wear one and I will not take it off."** **If convicted, Masri faces a maximum of 15 years in prison for each count.** He is currently being held in Chicago's Metropolitan Correctional Center without bond pending a hearing on Monday, July 9<sup>th</sup> (Tobin, 2010).

**Title/Headline:** *FBI Hunts For Suspected Wisconsin Campus Bomber 40 Years Later*

**Abstract:** Forty years ago Tuesday, a van loaded with explosives rocked the University of Wisconsin-Madison campus, killing one person and wounding three others -- all part of a protest against the war in Vietnam. It was also the biggest domestic terrorism attack until the Oklahoma City bombing 25 years later. Three of four of the anti-war culprits were captured and served time in prison. But 40 years later, the hunt for the fourth suspect -- Leo Burt, a student and aspiring journalist at the time -- continues. **"We're still pursuing leads like he's still alive,"** Bruce Carroll, a campus police detective assigned to the FBI's Joint Terrorism Task Force, told AOL News. **"I've expressed my doubts in the past that he's still alive. It would be very hard to live totally undercover for 40 years. That being said, stranger things have happened. "But we've had a bunch of leads and we still have leads that are active,"** he said. On Monday, the FBI upped the profile of the case, prominently displaying a story on its website that began: "Where is Leo Burt? You can earn up to \$150,000 by helping us find him." **The bombing occurred on Aug. 24, 1970. The country was in turmoil. Richard Nixon was president. The rock 'n' roll landscape was flush with giants like the Rolling Stones and Crosby, Stills, Nash & Young. And campuses like the University of Wisconsin-Madison and the University of Michigan in Ann Arbor were bubbling with the anti-war, anti-establishment sentiments that were polarizing the nation.** According to published reports, the protesters parked a van loaded with 2,000 pounds of ammonium nitrate and fuel oil outside the East Wing of Sterling Hall, which housed the Army Math Research Center that conducted research for the military. **The building also housed the physics department. The potent bomb went off at 3:42 a.m. The bombers said the explosives were never intended to hurt anyone. But the blast killed physics researcher Robert Fassnacht, a father of three, who was reportedly finishing up some work before heading off on a family vacation. It also wounded three others and caused an estimated \$2.1 million in damage to the the university** (Lengel, 2010).

**Title/Headline:** *Man Reportedly Arrested In Terror Probe Appeared On 'Canadian Idol'*

**Abstract:** Two terrorism suspects made a brief appearance in court on Thursday, and a third man, who appeared on Canada's version of "American Idol," has reportedly been arrested as part of an alleged homegrown plot. **Police arrested two Ottawa residents Wednesday and said they expected more arrests.** The Toronto Star reported the third arrest, of Khuram Sher, on Thursday. Sher appeared on the reality show "Canadian Idol" in 2008 in which he sings a comical version of Avril Lavigne's "Complicated," complete with dance moves that include a moonwalk. **He told the judges he's from Pakistan and likes hockey, music and acting. Police didn't immediately respond to messages seeking confirmation Sher was arrested.** Hiva Alizadeh and Ahmed Misbahuddin appeared in court Thursday. A government official has described it as a homegrown plot targeting Canada. The official was not authorized to comment publicly and spoke on condition of anonymity. Officials have declined to specify the allegations. A news conference is planned for Thursday afternoon. **A judge remanded Alizadeh and Misbahuddin in custody until they appear again, by video, next Wednesday. Misbahuddin's lawyer, Ian Carter, said the charges are serious and his client, a husband and father, could be put away "for a long time."** **"He is in shock. That's all I can say,"** Carter said. Police descended on a home in Canada's national capital of Ottawa early Wednesday. **The Royal Canadian Mounted Police said in a news release they were executing search warrants in connection with the case.** Matthew Weiler, a neighbor, said a man and woman had lived at the address for at least six months and that the woman usually was veiled in public. Carolina Ayala, who lives four doors down from the couple, said she saw the man wearing blue hospital scrubs and thinks he may have worked at a hospital. A few miles away a police car sat outside an apartment building where a second raid was carried out. **The arrests come four years after the apprehension of the so-called Toronto 18, suspects in a homegrown terror plot that involved the attempted setting off of truck bombs in front of Canada's main stock exchange and two government buildings. The ringleaders and others have been convicted.** Canadian Security Intelligence Service director Dick Fadden alluded to the possibility of other homegrown terrorist cases in comments to a Parliament public safety committee last month (Fox News, 2010).

**Title/Headline:** *Two Men Arrested On Terror Suspicion On Flight From Chicago To Amsterdam*

**Abstract:** Two men from the Detroit area were arrested in Amsterdam on a flight arriving from Chicago, reportedly suspected of assessing the aviation system for a potential future terror attack. The two men did not have prohibited items on them, a law enforcement official told Fox News, saying that although knives were found in their checked luggage, such checked items aren't prohibited. Law enforcement officials also found several non-functioning cell phones taped together, a phone taped to a Pepto Bismol bottle and a knife and box cutter in checked luggage connected with the men. "Suspicious items were located in checked luggage associated with two passengers on United Flight 908 from Chicago O'Hare to Amsterdam," the Transportation Safety Administration said in a written statement. "The items were not deemed to be dangerous in and of themselves." Law enforcement identified the men as Ahmed Mohamed Nasser al Soofi and Hezam al Murisi. Neither was on the no-fly list, nor were there any active warrants for their arrest. Al Soofi was supposed to fly from Chicago to Washington Dulles International Airport in Virginia, and then on to Amsterdam, the official said. But when he got to Chicago, he changed his travel plans to take a direct flight from Chicago to Amsterdam. Al Murisi also changed his travel plans in Chicago to take a direct flight to Amsterdam, raising suspicion among U.S. officials. Federal Air marshals were on the flight from Chicago to Amsterdam, a law enforcement official said. Homeland Security spokeswoman Amy Kudwa said once officials found suspicious items in luggage associated with two passengers on Sunday night's flight, they notified the Dutch authorities. FBI agents in Chicago are assisting Dutch investigators as needed, an FBI spokesman told Fox News. As of Monday night, the Associated Press reported that FBI agents had visited the Detroit neighborhood where several addresses were found for variations of al Soofi's name, according to neighbors who declined to give their names. ABC News, which first reported the arrests, quoted an unnamed U.S. official saying that the pair were charged by the Dutch with "preparation of a terrorist attack." One of the men initially drew suspicion when boarding a flight from Birmingham, Ala., to Chicago, but authorities allowed him to board, ABC News reports. Another law enforcement official said, as of Monday night, the men had not been charged with anything in the U.S. The law enforcement officials spoke on condition of anonymity to discuss the ongoing investigation and sensitive security issues. Sources told Fox News that the men posed no immediate danger to the flight, but U.S. officials are looking into whether the men were "testing the system" (Fox News, 2010).

**Title/Headline:** *Al Qaeda-Linked American Terrorist Unveiled, As Charges Await Him In U.S.*

**Abstract:** A week after the 9/11 attacks, a young Muslim at the University of South Alabama told the school's newspaper it was "difficult to believe a Muslim could have done this." Now, eight years later, he is professing to launch attacks himself and calling on others to join the fight, as terror-related charges await him at home in Alabama, FOX News has learned exclusively. Abu Mansour al-Amriki — or "The American" — has become one of the most recognizable and outspoken voices of terrorist propaganda. He has been in war-torn Somalia for several years, fighting the secular government there with a group known as al-Shabaab, which has ties to Al Qaeda and was labeled a terrorist organization by the U.S. government last year. Only recently has he taken on a starring — and jarring — role in al-Shabaab's outreach efforts. The Federal Bureau of Investigation has been looking into him for several years. In fact, a grand jury in Mobile, Ala., has already indicted him on charges of providing material support to terrorists, a source said. It's unclear when the indictment was filed. Al-Amriki first surfaced in October 2007, when Al-Jazeera TV aired a report about the "common goal" of Al Qaeda and hard-line militants in Somalia. The report described al-Amriki as "a fighter" and "military instructor," but he concealed his face with a cloth wrap throughout the report. In April, he showed his face for the first time, during a highly-polished, 30-minute recruitment video posted online. It featured anti-American hip-hop and sporadic images of Usama bin Laden. In the video, he purportedly led a group of al-Shabaab militants in an ambush of pro-government forces in Somalia. Speaking about one man killed in the fight, he said, "We need more like him, so if you can encourage more of your children and more of your neighbors, anyone around, to send people like him to this jihad, it would be a great asset for us." (Fox, 2009).

**Title/Headline:** *Report: US Must Deal With Domestic Radical Problem*

**Abstract:** The U.S. was slow to take seriously the threat posed by homegrown radicals and the government has failed to put systems in place to deal with the growing phenomenon, according to a new report compiled by the former heads of the Sept. 11 Commission. The report says U.S. authorities failed to realize that Somali-American youths traveling from Minnesota to Mogadishu in 2008 to join extremists was not an isolated issue. Instead, the movement was one among several instances of a broader, more diverse threat that has surfaced across the country. "Our long-held belief that homegrown terrorism couldn't happen here has thus created a situation where we are today stumbling blindly through the legal, operational and organizational minefield of countering terrorist radicalization and recruitment occurring in the United States," said the report, which was obtained by The Associated Press. As a result, there is still no federal agency specifically charged with identifying radicalization or working to prevent

terrorist recruitment of U.S. citizens and residents, said the report, slated to be released Friday by the Washington-based Bipartisan Policy Center's National Security Preparedness Group. **The group, headed by former 9-11 commission leaders Tom Kean and Lee Hamilton, laid out a detailed description of domestic terror incidents ranging from the Fort Hood, Texas, shooting spree and the attempted Christmas Day airliner attack in late 2009 to last May's botched truck bombing in New York's Times Square. Over the past year, terrorism experts and government officials have warned of the threat posed by homegrown radicals, saying terror recruits who go abroad could return to the U.S. to carry out attacks.** But the U.S., the group said, should have learned earlier from Britain's experience. Prior to the 2005 London suicide bombings, the British believed that Muslims there were better integrated, educated and wealthier than their counterparts elsewhere. Similarly, the U.S. believed that its melting pot of nationalities and religions would protect it from internal radical strife, the report said. **The terrorists, said the report, may have discovered America's "Achilles' heel in that we currently have no strategy to counter the type of threat posed by homegrown terrorists and other radicalized recruits."** U.S. officials have acknowledged the need to address the radicalization problem, and for the first time, the White House this year added combating homegrown terrorism to its national security strategy. The plan includes a "new interagency effort that brings together key stakeholders" and continued "outreach to communities across the country," said Ben Rhodes, the White House's deputy national security adviser. The FBI, meanwhile, has worked to reach out to the Somali communities, in an effort to counter the radicalization of the youth. **The report also points to an "Americanization" of the leadership of al-Qaida and its allied groups, noting that radical cleric Anwar al-Awlaki, who had links with suspects in the failed Times Square bombing and the Fort Hood shootings, grew up in New Mexico. And Chicagoan David Headley played a role in scoping the targets for the Lashkar-e-Taiba attacks on Mumbai in late 2008 that killed more than 160.** Abroad, Al-Qaida, its affiliates and other extremist groups have splintered and spread, seeking safe havens in undergoverned areas of Pakistan, Yemen, Somalia and places in North and East Africa. **That diversified threat has intensified as militants reach out to potential recruits through the Internet. Assessing future threats, the report lists potential future domestic targets, including passenger jets, western or American hotel chains, Jewish or Israeli sites and U.S. soldiers, even at their own bases in America.** And it also warns that it is no longer wise to believe that American extremists will not resort to suicide bombings. As an example they point to Army Maj. Nidal Hasan, who has been charged with killing 13 people and wounding 32 in last year's shootings at Fort Hood, saying he had written about suicide operations in e-mails, and that his attack appeared to be one (Baldor, 2010).

**Title/Headline:** *Former Los Alamos Scientist Indicted On Nuclear Charges*

**Abstract:** A former Los Alamos National Laboratory nuclear scientist and his wife were indicted on charges of trying to provide nuclear secrets to Venezuela, but U.S. officials stressed the Venezuelan government knew nothing about the plans. The officials said they have no information from the undercover operation that Hugo Chavez's government has any plans to try to build a nuclear weapon. Pedro Mascheroni, 75, and Roxby Mascheroni, 67, are U.S. citizens who worked as contractors at Los Alamos in New Mexico, officials said Friday. In 2008, Mascheroni, who had left the laboratory years earlier, had a series of conversations with an undercover FBI agent posing as an official of the Caracas government, according to the indictment. "Mascheroni allegedly said he could help Venezuela develop a nuclear bomb within 10 years and that under his program Venezuela would use a secret underground nuclear reactor to produce and enrich plutonium and an open, above-ground reactor to produce nuclear energy," the Justice Department said. According, to a U.S. Justice Department statement, Mascheroni allegedly asked about obtaining Venezuelan citizenship and described how he expected to be paid for his classified nuclear work for Venezuela. Mascheroni said his fee for producing certain information was \$793,000, the indictment alleges. U.S. Attorney Kenneth Gonzalez said the charges against the couple "are very serious." He said laws were designed to keep "restricted data" from getting to the wrong people (Frieden, 2010).

**Date:** September 17, 2010

**Source:** Fox News

**Title/Headline:** *Ex-Los Alamos Scientist, Wife Indicted in Alleged Atomic Weapon Conspiracy*

**Abstract:** A scientist and his wife who both once worked at Los Alamos National Laboratory before becoming outspoken critics were arrested Friday after an FBI sting operation and charged with trying to sell nuclear secrets to Venezuela. The scientist, Pedro Leonardo Mascheroni, is being detained until a hearing Monday morning in Albuquerque, New Mexico. His wife, Roxby Mascheroni, was released on a variety of conditions, including a monitor attached to her. **The investigation first drew attention last October when federal agents reportedly seized six computers, two cameras, two cellphones and hundreds of files from the scientist, Pedro Leonardo Mascheroni. Mascheroni declared his innocence to The New York Times last year, saying, "If I were a real spy, I would have left the country a long time ago."** After their arrest Friday morning, the two appeared in federal court in Albuquerque, New Mexico and were accused of dealing with an FBI undercover agent posing as a Venezuelan agent. **The government did not allege that Venezuela or anyone working for it sought U.S. secrets. The pair were indicted for allegedly communicating classified nuclear weapons data to a person they believed to be a Venezuelan government official. Accused in a 22-count indictment are Mascheroni, 75, a naturalized U.S. citizen from Argentina, and Marjorie Roxby Mascheroni, 67, a U.S. citizen.** Both were formerly contract employees at Los Alamos. According to the indictment, Mascheroni told an undercover agent he could help Venezuela develop a nuclear bomb within 10 years and that under his program, **Venezuela would use a secret, underground nuclear reactor to produce and enrich plutonium, and an open, aboveground reactor to produce nuclear energy.** In July 2008, the FBI agent provided Mascheroni with 12 questions purportedly from Venezuelan military and scientific personnel. According to the criminal charges, Mascheroni delivered to a post office

box in November 2008 a disk with a coded 132-page document on it that contained "restricted data" related to nuclear weapons. **Written by Mascheroni and edited by his wife, the document was entitled "A Deterrence Program for Venezuela" and it laid out Mascheroni's nuclear weapons development program for Venezuela. Mascheroni stated that the information he was providing was worth millions of dollars, and that his fee for producing the document was \$793,000, the indictment alleges. Earlier in the investigation, Mascheroni allegedly asked the FBI agent about obtaining Venezuelan citizenship. He told the undercover agent he should be addressed as "Luke," and that he would set up an e-mail account solely to communicate with the undercover agent, according to the indictment. Mascheroni used the account to communicate with the agent and to arrange for deliveries of materials at the post office box used as a dead-drop location. If convicted, the couple face up to life in prison. Mascheroni was laid off from Los Alamos in 1988. He filed a discrimination lawsuit against the company in 1994, alleging that he lost favor with his supervisors after he sought to promote one of his projects over one that he criticized. Over the years, he has repeatedly raised questions before Congress about the management of the nation's nuclear laboratories and arsenal and promoted his laser to ensure weapon reliability (Fox News, 2010).**

**Title/Headline:** *FBI Says It Supplied Fake Bomb In Chicago Plot*

**Abstract:** A man arrested for allegedly placing a backpack he thought contained a bomb near Chicago's Wrigley Field got the fake explosive from an FBI undercover agent, authorities say -- a tactic that has been used in other U.S. terrorism cases in recent years. Sami Samir Hassoun, 22, a Lebanese citizen living in Chicago for about three years, was charged Monday with one count each of attempted use of a weapon of mass destruction and attempted use of an explosive device. Hassoun was arrested early Sunday after planting the fake explosive device in a trash receptacle near Sluggers World Class Sports Bar, a popular bar steps from Wrigley Field, FBI Special Agent in Charge Robert Grant said. The Cubs were not playing at their home field; the stadium hosted Dave Matthews Band concerts Friday and Saturday nights. **It wouldn't be the first time FBI agents have posed as terror operatives and supplied suspects with bogus explosives. Last year, authorities arrested a Jordanian national after he allegedly attempted to detonate what he thought was a bomb outside a Dallas skyscraper. In an unrelated case, authorities in Springfield, Ill., arrested another man after he allegedly tried to set off what he thought was explosives in a van outside a federal courthouse. In a similar case in May 2009, four men were arrested after they allegedly tried to detonate fake explosives -- also provided by the FBI -- outside two synagogues in New York City. In the Chicago case, the FBI said an informant tipped investigators about Hassoun nearly a year ago. Grant said Hassoun acted alone and that the undercover agents told him they were from California and unaffiliated with any group. He declined to offer specific details about Hassoun's motivations, but said he believed the agents were ready to give him money if he carried out the attack. "He wanted to transform the city of Chicago, he wanted to make a statement and he wanted to replace the mayor of Chicago," Grant said. "He was unhappy with the way the city was running. He was also unhappy with things that were happening in other parts of world."** At a brief hearing Monday, Hassoun quietly told U.S. Judge Susan Cox that he understood the charges. Hassoun's federally appointed public defender Dan McLaughlin declined to comment on the case, as did several family members who attended the hearing. A message left on an answering machine at Hassoun's home telephone number wasn't returned. Authorities say the informant befriended Hassoun over the course of a year, conducting conversations in Arabic, which were taped and shared with the FBI. Hassoun waffled greatly on his plans, authorities said. Initially, he didn't want to cause violence, suggesting setting off smoking devices in downtown locations near City Hall, authorities said. **"No killing. There is no killing," he told the informant, according to the complaint. But his plans became more grand, as he believed bigger acts would command public attention and embarrass the mayor, according to the complaint. "Little by little, I'm building it up," he said, according to the complaint. "I will shake Chicago."** Hassoun's alleged plots ranged during the investigation. They included talk of plans to unleash a biological virus on Chicago and bombing the Willis Tower, formerly known as the Sears Tower, the complaint said. Hassoun on one occasion told the informant he wanted to paralyze commerce in the city, according to the complaint. Asked how he intended to carry out various suggested attacks, Hassoun responded, **"You park the car, and let it go 'boom,'" the complaint says. Grant said Hassoun wanted to start his own organization and planned to flee to California after the device went off in Wrigleyville. "He was not highly skilled, but I think he was definitely desirous of obtaining the material needed to carry out his attack," Grant said. Shortly before the plot near Wrigley Field, the informant introduced Hassoun to the undercover agents who Hassoun believed were friends and would pay for the attack to be carried out. Chicago authorities said Daley never was in any danger. Police said Daley -- who has been in China for a business trip -- was informed of the plot over the weekend. "We were always in control of this investigation," said Chicago Police Superintendent Jody Weis (Fox News, 2010).**

**Title/Headline:** *Terrorists Trying to Recruit U.S. Residents Is Latest Challenge, U.S. Says*

**Abstract:** Efforts by terrorists abroad to radicalize and recruit U.S. residents present new security threats, three top Obama administration officials told Congress on Wednesday. The threat posed by homegrown extremists shows that the battle against terrorism has become more complex in the past year, underscoring the challenges of pinpointing and blocking plots, said Michael Leiter, director of the National Counterterrorism Center. "Groups affiliated with Al Qaeda are now actively targeting the United States and looking to use Americans or Westerners who are able to remain undetected by heightened security measures," FBI Director Robert Mueller told the Senate Homeland Security and Governmental Affairs Committee. **It appears that "domestic radicalization and homegrown extremism" is becoming more pronounced, Mueller said. Homeland Security Secretary Janet Napolitano said Al Qaeda has inspired an array of terrorist organizations. "We are all seeing more diverse activity" by a more diverse collection of groups, Napolitano said. Leiter said Al Qaeda in Pakistan is at one of its weakest points organizationally. Nonetheless, he said, the terrorist group remains a capable and determined enemy that has proven its resilience over time. Since 2009, at least 63 American citizens have been charged or convicted for terrorism or related crimes, "an astoundingly high number of American citizens who have attacked -- or**

intended to attack -- their own country," said Sen. Joe Lieberman, an independent and the committee's chairman. A year ago, the FBI arrested Michael C. Finton in Illinois and Hosam Smadi in Texas in connection with unrelated bomb attempts. **The bureau used online undercover agents and confidential human sources who monitored Finton and Smadi until their arrests. Several U.S. residents from Somali-American communities in Minneapolis were recruited to fight with the Somali-based terrorist group al-Shabab.** That prompted the FBI to deploy bureau personnel to cities with high ethnic Somali populations in an outreach initiative to community leaders. In his prepared testimony, Mueller said it is possible that more American extremists are feeling increasingly disenchanted with living in the United States or are angry about U.S. and Western foreign policy, "making their decision to leave for extremist opportunities abroad all the more appealing." Omar Hammami, an Alabama man now known as Abu Mansour al-Amriki, or "the American," has become one of al-Shabab's most high-profile members and appeared in a jihadist video in May 2009. **Leiter said the rising profiles of U.S. citizens like Hammami in overseas terrorist groups provide young extremists with American faces as role models. Leiter said plots by homegrown Sunni extremists were disrupted in New York, North Carolina, Arkansas, Alaska, Texas and Illinois in the past year and point to "a collective subculture and a common cause," even though the plots were unrelated.** Napolitano said U.S.-born, Yemen-based Anwar al-Awlaki is an illustration of an English-speaker spreading propaganda over the Internet, an approach she said could be helping to increase the number of homegrown extremists. **Terrorists "are working increasingly to build alliances or essentially recruit soldiers for their army from within the United States," Lieberman said. The panel's ranking Republican, Sen. Susan Collins, said the shootings at a military base in Texas, and the attempted Dec. 25 Christmas Day attack on a Detroit-bound airliner show that the terrorist threat "is evolving and ever-changing" (Fox News, 2010).**

**Title/Headline:** *Feds Deport Al Qaeda Associate To Canada*

**Abstract:** A Somali-born man who trained at an Al Qaeda camp and attended lectures by Usama bin Laden has been sent from the United States to Canada, according to U.S. Immigration and Customs Enforcement. Mohammed Warsame, 37, pleaded guilty in May 2009 to providing material support to Al Qaeda, and he was sentenced to 92 months in prison with credit for time already served. **On Friday, after several years in prison, agents from Immigration and Customs Enforcement accompanied him to Canada in accordance with a federal judge's recent order of removal, according to an ICE press release. "There is no place in this country for anyone who advocates violence by associating, supporting or conspiring with terrorists," ICE Director John Morton said in a statement. "ICE will use every tool at our disposal to protect the American people and remove those who pose a threat to our national security."** Warsame, a naturalized Canadian citizen, was arrested in December 2003, and a month later a grand jury in Minneapolis charged him with "conspiracy to provide material support to Al Qaeda." **He ultimately pleaded guilty to a charge filed in a superseding indictment in June 2005. In March 2000, Warsame traveled to Afghanistan, where he attended an Al Qaeda training camp outside Kabul and received training in physical fitness, the use of weapons and martial arts, according to the Justice Department. That summer he traveled to the al Faruq training camp, where he received more training and met with Usama Bin Laden, the Justice Department said. Over the next year, he traveled to Pakistan and Canada on Al Qaeda's dime, and he sent money to Al Qaeda, according to ICE and the Justice Department. Ultimately Warsame relocated to Minneapolis, where he attended the Minneapolis Community and Technical College. Between 2002 and 2003, he provided information to several Al Qaeda associates, according to the Justice Department (Fox News, 2010)**

**Title/Headline:** *EXCLUSIVE: Al Qaeda Leader Dined At The Pentagon Just Months After 9/11*

**Abstract:** Anwar Al-Awlaki may be the first American on the CIA's kill or capture list, but he was also a lunch guest of military brass at the Pentagon within months of the Sept. 11, 2001, terror attacks, Fox News has learned. Documents exclusively obtained by Fox News, including an FBI interview conducted after the Fort Hood shooting in November 2009, state that **Awlaki was taken to the Pentagon as part of the military's outreach to the Muslim community in the immediate aftermath of the attacks.** The incident was flagged by a current Defense Department employee who came forward and told investigators she helped arrange the meeting after she saw Awlaki speak in Alexandria, Va. **The employee "attended this talk and while she arrived late she recalls being impressed by this imam. He condemned Al Qaeda and the terrorist attacks. During his talk he was 'harassed' by members of the audience and suffered it well," reads one document.** According to the documents, obtained as part of an ongoing investigation by the specials unit "Fox News Reporting," there was a push within the Defense Department to reach out to the Muslim community. **"At that period in time, the secretary of the Army (redacted) was eager to have a presentation from a moderate Muslim." In addition, Awlaki "was considered to be an 'up and coming' member of the Islamic community.** After her vetting, Aulaki (Awlaki) was invited to and attended a luncheon at the Pentagon in the secretary of the Army's Office of Government Counsel." **Awlaki, a Yemeni-American who was born in Las Cruces, N.M., was interviewed at least four times by the FBI in the first week after the attacks because of his ties to the three hijackers Nawaf al-Hazmi, Khalid al-Mihdhar and Hani Hanjour.** The three hijackers were all onboard Flight 77 that slammed into the Pentagon. Awlaki is now believed to be hiding in Yemen after he was linked to the alleged Ft. Hood shooter Major Nidal Malik Hasan, who e-mailed Awlaki prior to the attack. Sources told Fox News that Awlaki, who is a former Muslim chaplain at George Washington University, met with the Christmas Day bomber Umar Farouk Abdulmutallab in Yemen and was the middle-man between the young Nigerian and the bombmaker. Awlaki was also said to inspire would-be Times Square bomber Faisal Shahzad. **Apparently, none of the FBI's information about Awlaki was shared with the Pentagon.** Former Army Secretary Tommy White, who led the Army in 2001, said he doesn't have any recollection of the luncheon or any contact with Awlaki. **"If this was a luncheon at the Office of Government Counsel, I would not necessarily be there," he said. The Pentagon has offered no explanation of how a man, now on the CIA kills or capture list, ended up at a special lunch for Muslim outreach.** After repeated requests for comment on the vetting process beginning on October 13th, an Army spokesman insisted Wednesday that the lunch was not an Army event. **"The Army has found no evidence that**

the Army either sponsored or participated in the event described in this report," spokesman Thomas Collins said. Collins also noted that the FBI document referred to the "Office of Government Counsel" but should read "Office of General Counsel." Collins said he believed the event was sponsored by the office of the Secretary of Defense. A spokeswoman there said she would look into it and get back to Fox News. **A former high-ranking FBI agent told Fox News that at the time Awlaki went to lunch at the Pentagon, there was tremendous "arrogance" about the vetting process at the Pentagon. "They vetted people politically and showed indifference toward security and intelligence advice of others," the former agent said (Herridge, 2010).**

**Title/Headline:** *American Al-Qaeda Spokesman Adam Gadahn Continues Group's Focus On Encouraging Lone Wolf Attacks in West, Calls On Muslims In Detroit, London, And Paris To Carry Out Terror Operations*

**Abstract:** On October 23, 2010, Al-Qaeda's media production company Al-Sahab posted a video featuring American Al-Qaeda operative Adam Gadahn, aka 'Azzam Al-Amriki. The video came out as response to the March 10, 2010 "Mardin: Abode of Peace" conference in Mardin, Turkey, in which a number of Islamic scholars from various countries convened to denounce violent jihad; this was the same conference that was criticized by the radical Yemeni-American cleric in the second issue of Al-Qaeda in the Arabian Peninsula's English-language Inspire magazine. In addition to his comments on the conference, Gadahn devoted much of his talk to calling on Muslims living in the West to carry out attacks in their host countries. **This is another in a series of statements from Al-Qaeda leaders aimed at encouraging "lone wolf" attacks (MEMRI, 2010).**

**Title/Headline:** *VA. Man Arrested For Plotting DC Attacks*

**Abstract:** A Virginia man has been arrested for allegedly trying to help Al Qaeda plan multiple bombings around the nation's capital, according to U.S. officials. Farooque Ahmed, 34, of Ashburn, Va., was arrested today by the FBI and charged with providing material support to terrorists and collecting information for a terrorist attack. "It's chilling that a man from Ashburn is accused of casing rail stations with the goal of killing as many Metro riders as possible through simultaneous bomb attacks," said Neil MacBride, the U.S. Attorney for the Eastern District of Virginia. "Today's arrest highlights ... our ability to find those seeking to harm U.S. citizens and neutralize them before they can act." **According to an indictment filed in U.S. Court for the Eastern District of Virginia, between April 2010 and Oct. 25, Ahmed repeatedly met with individuals he thought were affiliated with Al Qaeda to discuss "jihad."** On May 15, in a hotel room in Sterling, Va., Ahmed told one individual that he might be ready to travel overseas to conduct jihad, but only after he completed the Hajj pilgrimage to Saudi Arabia in November, according to the indictment. In addition, he agreed to watch and photograph Arlington Cemetery Metrorail station and a hotel in Washington, D.C., in order to obtain information about their security and busiest periods. **In fact, on July 7, he participated in surveillance and recording images of Arlington Cemetery Metrorail station. The next month, he allegedly participated in surveillance of the Courthouse, Pentagon City and Crystal City Metrorail stations outside Washington. During a meeting at a hotel in Herndon, Va., on Sept. 28, he suggested that rolling suitcases be used instead of backpacks, and he said that he wanted to kill as many military personnel as possible, according to the indictment.** Officials say that at no time was the public in danger during this investigation. The FBI was aware of Ahmed's activities from before the alleged attempt began and closely monitored his activities until his arrest, according to U.S. officials. Ahmed is set to make his initial appearance Wednesday afternoon in Alexandria, Va. (Levine, 2010).

**Title/Headline:** *San Diego Men Accused Of Helping Terror Group*

**Abstract:** Three San Diego men have been charged with conspiring to route money to a Somalia-based militant group. According to the federal indictment unsealed Tuesday, Basaaly Saeed Moalin, Mohamed Mohamed Mohamud and Issa Doreh coordinated fundraising efforts and money transfers to al-Shabab in 2007 and 2008. Moalin also is accused of providing a house in Somalia for al-Shabab fighters. The U.S. government has declared al-Shabab a terrorist group with ties to al Qaeda. Immigration officials arrested Moalin before he boarded a flight Sunday in San Diego. The other two were arrested Monday. No lawyers were listed for them in the indictment, and calls to the U.S. Attorney's office were not answered Tuesday (CBS News, 2010).

**Title/Headline:** *San Diego Woman Charged In Terrorism Case*

**Abstract:** An indictment charging San Diego resident Nima Ali Yusuf, 24, with conspiracy to provide material support to terrorists, conspiracy to provide material support to al Shabaab, and making false statements to a government agency in a matter involving international terrorism, was unsealed today, Laura E. Duffy, U.S. Attorney for the Southern District of California, announced. With the assistance of Customs and Border Protection, special agents of the FBI arrested Yusuf on Nov. 12, 2010. On Nov. 15, 2010, U.S. Magistrate Judge Nita L. Stormes arraigned Yusuf on the indictment. Yusuf will be held without bail pending a detention hearing scheduled for Nov. 18, 2010. According to U.S. Attorney Duffy, the arrest arises from an investigation by the San Diego Joint Terrorism Task Force. The charge of conspiracy to provide material support to terrorists carries a maximum penalty of 15 years in prison and a \$250,000 fine. The charge of conspiracy to provide material support to a foreign terrorist organization carries a maximum penalty of 15 years in prison and a \$250,000 fine. The charge of making false statements to a government agency in a matter involving international terrorism carries a maximum penalty of eight years in prison and a \$250,000 fine. An indictment itself is not evidence that the defendants committed the crimes charged. The defendant is presumed innocent until the government meets its burden in court of proving guilt beyond a reasonable doubt (National Terror Alert, 2010).

**Title/Headline:** *Somali-American Accused Of Plotting To Bomb Oregon Tree-Lighting Event*

**Abstract:** After enjoying their city's Christmas tree lighting, Portland, Oregon, residents felt a twinge of shock and then a rush of gratitude on Saturday when they learned that law officers foiled a plot to set off a bomb in a state the suspect says "nobody ever thinks about." Mohamed Osman Mohamud, a 19-year-old naturalized U.S. citizen from Somalia, was seized in connection with a

plan to detonate what he believed to be a vehicle bomb at the ceremony on Friday night, the Justice Department announced. Mohamud was whisked away by the FBI and Portland Police Bureau after he attempted to detonate what he believed was an explosives-laden van parked near the tree-lighting ceremony in Portland's Pioneer Courthouse Square, the Justice Department said in a written statement. But the bomb turned out to be fake, thanks to an undercover operation designed to undermine the plotter. Justice Department spokesman Dean Boyd said "the materials were not explosive," and officials said the public was never in danger from the mock device. A resident of Corvallis, Oregon, and a student at Oregon State University, Mohamud -- who now faces a maximum sentence of life in prison and a \$250,000 fine -- was arrested on suspicion of attempting to use a weapon of mass destruction, the FBI said. He will make his initial appearance in federal court in Portland on Monday, the Justice Department said. "It's very difficult for me to comprehend how a young man who this country has given great opportunities to could waste those opportunities and be willing to commit a horrific crime," said Portland Police Chief Michael Reese. "It is very sad." Portland residents who attended the tree lighting were pleased that law enforcement stopped the attack. Sharon Rose said she didn't know about the investigation until she returned home from the tree lighting. "It does make me feel better that the FBI was on the ball in this case and doing some actual work, rather than pretending to look out for us and trying to make themselves look good," the Portland resident told CNN Radio. "Why would anyone mess with Portland? It's such a sweet little town. Obviously somebody wanted to." But Dwight C. Holton, U.S. attorney for the district of Oregon, said in a statement that this "defendant's chilling determination is a stark reminder that there are people -- even here in Oregon -- who are determined to kill Americans." Arthur Balizan, special agent in charge of the FBI in Oregon, called the threat "very real." "Our investigation shows that Mohamud was absolutely committed to carrying out an attack on a very grand scale," Balizan said. "At the same time, I want to reassure the people of this community that, at every turn, we denied him the ability to actually carry out the attack." On his blog, Portland Mayor Sam Adams lauded a "smart" investigation by local, state and federal agencies that led to the capture of someone "bent on mass destruction and murder in the city." The arrest was the culmination of a long-term undercover operation during which Mohamud had been monitored closely as the alleged plot developed, the Justice Department said. According to an arrest warrant affidavit written by an FBI special agent, Mohamud was in e-mail communication in August 2009 with a person believed to be involved in terrorist activities. In December, that person was "located in the northwest frontier province of Pakistan," the affidavit states. The two communicated regularly, the affidavit states, and "using coded language, they discussed the possibility of Mohamud traveling to Pakistan to prepare for violent jihad." Mohamud attempted to contact another associate who he thought would help facilitate his travel overseas, the affidavit states, but "because Mohamud used the wrong e-mail address in his efforts to contact [the second associate], he never successfully contacted him to arrange travel." An undercover FBI employee contacted Mohamud in June under the guise of being affiliated with the associate who was in Pakistan, according to the affidavit. Mohamud met with the undercover operative on July 30 in Portland. Mohamud allegedly told the undercover operative that he had written articles that were published in Jihad Recollections, an online magazine that advocated violent jihad "Mohamud also indicated that he wanted to become 'operational,'" the Justice Department said. "Asked what he meant by 'operational,' Mohamud stated that he wanted to put an 'explosion' together, but needed help." At a meeting in August, the Justice Department said, Mohamud allegedly told undercover FBI operatives he had been thinking of committing violent jihad since the age of 15. According to the affidavit, Mohamud then told undercover operatives that he had identified a potential target for a bomb: the annual Christmas tree lighting ceremony in Portland's Pioneer Courthouse Square. Authorities said an FBI operative pointed out that lots of children would be at such an event, but Mohamud said he was looking for a "huge mass that will ... be attacked in their own element with their families celebrating the holidays." Officials said Mohamud also stated, "... it's in Oregon; and Oregon like you know, nobody ever thinks about it." According to the affidavit, Mohamud and the undercover FBI operatives traveled to a remote area in Lincoln County, Oregon, on November 4 and detonated a bomb hidden in a backpack as a test. During the drive back to Corvallis, the agents asked Mohamud about whether he could look at the bodies of those who would be killed in the upcoming attack in Portland, the Justice Department said. Mohamud replied, "I want whoever is attending that event to leave, to leave either dead or injured," according to the affidavit. On Friday, Mohamud met one of the FBI operatives at a predetermined location, the affidavit states. Mohamud dialed a number "in an unsuccessful attempt to detonate the device." Mohamud allegedly dialed the number again before he was taken custody. Portland police Sgt. Pete Simpson, who said police officers got involved in the investigation several months ago, said the arrest went down several blocks from the tree lighting. "There were a lot of eyes normally not here that were here last night to make sure this operation went off successfully," Simpson told CNN affiliate KGW on Saturday. "There was no danger to the public last night." Muslims in the Portland area decried the alleged plot at a Saturday news conference. "We condemn strongly any act of violence that would target innocent people," said Imam Mikal Shabazz of the Oregon Islamic Chaplain Organization. "We condemn the alleged actions that were thwarted last night." Another leader thanked local police and the community for outreach to and protection of area mosques. "Things like this really set us back," said Shahriar Ahmed of Bilal Mosque in Beaverton. Khalid Luqman of Muslims for Peace spent Saturday handing out information to Portland passers-by. "We need to show the world that Islam can co-exist with the rest of the world peacefully," he said (CNN, 2010).

**Title/Headline:** NCIS: Sailor At Bragg Sold Secret Documents

**Abstract:** A Navy intelligence specialist stationed at Fort Bragg is in custody after an investigation revealed he allegedly sold top secret documents to an undercover FBI agent posing as a foreign intelligence officer. Navy Reserve Intelligence Specialist 3rd Class Bryan Minkyu Martin, of Mexico, N.Y., is being held in custody in Norfolk, Va., said Ed Buice, a public affairs specialist for the Naval

Criminal Investigative Service. Martin, 22, was assigned to the Joint Special Operations Command at Fort Bragg. **Buice said Martin was taken into custody Wednesday by NCIS and the FBI and is being held while investigative materials are being reviewed. No charges had been filed as of Friday night, Buice said. Martin could face charges and a court-martial under the Uniform Code of Military Justice, Buice said. According to a search warrant unsealed in federal court Friday, Martin sold secret and top secret documents in several staged buys of intelligence at two Spring Lake hotels.** According to the search warrant, filed Wednesday by Special Agent Richard J. Puryear with NCIS, Martin was assigned to the Joint Special Operations Command at Fort Bragg on Sept. 16. Two months later, on Nov. 15, Martin met an undercover FBI agent in the lobby of the Hampton Inn on Bragg Boulevard in Spring Lake, according to the warrant. **The special agent, posing as a foreign intelligence officer, brought Martin to his room, where Martin discussed his access to military computer networks and classified networks, according to the warrant.** Martin also told the agent that he was seeking "longterm financial reimbursement," and that he could be very valuable over a 15- or 20-year career, which he expected would take him to the Defense Intelligence Agency, the warrant says. **Martin offered to bring the agent two documents at their next meeting and accepted \$500 in cash from the agent, the warrant says. At a meeting the next day at the same hotel, Martin produced two documents — one labelled "secret" and the other "top secret" and accepted \$1,500 in cash, the warrant says. He agreed to meet the agent again Nov. 19, when he produced 51 pages of secret and top secret documents, according to the warrant. He was paid another \$1,500, according to the warrant.** Martin also failed to report the contacts to any member of his chain of command, the warrant says. The warrant authorized NCIS agents to search the room Martin was using at the Landmark Inn on Fort Bragg and his 2009 gold Nissan Altima. It does not address how Martin came under suspicion or how he came into contact with the undercover FBI agent. Buice would not clarify the matter Friday night, but said, **"We have a high level confidence that classified information was not delivered to any unauthorized person."** Martin enlisted in the Navy on Nov. 30, 2006, and completed basic training on July 20, 2007. He received a top secret clearance on Sept. 20, 2007, and was subsequently assigned to temporary duty with the Defense Intelligence Agency between May 9 and Aug. 22, according to the warrant. A spokesman for the Army's Special Operations Command referred all questions to NCIS. Messages left for Martin's family in New York were not returned Friday night (Military.com, 2010).

**Title/Headline:** *Authorities Make Arrest In Alleged Plot To Blow Up Military Recruitment Center*

**Abstract:** A man was arrested Wednesday for plotting to blow up a military recruitment center in the Baltimore area, authorities said. Antonio Martinez, a Muslim convert who called himself Muhammed Hussain, was arrested and is expected to appear later Wednesday in federal court, Fox News confirms. Martinez, a U.S. citizen, was caught in a sting operation as he tried to detonate a phony bomb at an Armed Forces recruiting station in Catonsville, just outside Baltimore, officials said. **"A Baltimore man has been arrested this morning in connection with a scheme to attack an Armed Forces recruiting station in Catonsville, Maryland, with what he believed to be vehicle bomb,"** U.S. Department of Justice spokesman Dean Boyd said in a statement sent to Fox News. **"There was no actual danger to the public as the explosives were inert and the suspect had been carefully monitored by law enforcement for months."** The suspect was arrested after he tried to set off what he thought was a bomb, according to an official. There was no evidence the plot was linked to recent shootings at military installations in the Washington area, authorities said. Baltimore is about 40 miles (65 kilometers) north of Washington. **The case appeared similar to a recent bomb plot in Portland, Oregon. Last month, a Somali-born teenager was arrested there after using a cell phone to try to detonate what he thought were explosives in a van, authorities said. He thought he was going to bomb a crowded downtown Christmas tree-lighting ceremony.** Like the Baltimore County case, it turned out to be a dummy bomb plot put together by FBI agents. Mohamed Osman Mohamud, 19, was arrested after authorities said he planned the details of the plot, including where to park the van filled with explosives to hurt the most people. **Mohamud allegedly believed he was receiving help from a larger ring of jihadists as he communicated with undercover agents. The incidents are the latest in a string of alleged terrorist plans by U.S. citizens or residents, including a Times Square plot in which a Pakistan-born man tried to set off a car bomb on a busy street. He pleaded guilty earlier this year** (Fox News, 2010).

**Title/Headline:** *Texas Couple Accused Of Funneling Money To Iran*

**Abstract:** A Texas couple and the head of an Oregon charity secretly sent millions of dollars to an Iranian bank and to a contact in Iran for nine years, violating the U.S. embargo on the Middle East country, according to a federal indictment. The indictment describes an alleged scheme in which the Texas couple got tax exemptions for their donations to the Portland-based Child Foundation charity. The head of the charity, Mehrdad Yasrebi, allegedly funneled money that was meant for food and other assistance to his cousin and to a bank controlled by the Iranian government. Working through Iranian corporations and banks in Switzerland and Dubai, the Texas couple and Yasrebi's cousin masked their transfers by using food shipments and other commodities to cover financial donations intended for a sister charity in Iran run by the cousin, federal prosecutors say. **"These defendants are charged with going to extraordinary lengths to conceal the transfer of large sums of money in violation of the Iranian embargo,"** Dwight Holton, the U.S. Attorney for Oregon, said in a statement Thursday. A 26-page indictment alleges the Texas couple, Najmeh Vahid and Dr. Hossein Lahiji, conspired to defraud the government and laundered money by purporting to transfer charitable donations to Iran while actually keeping control of the money. Also named in the indictment as a defendant is Ahmad Iranshahi, cousin of Yasrebi and the

**head of the sister charity started in Iran by the two men and other family members in 1999.** Yasrebi was identified as a coconspirator in the indictment but was not charged. Federal officials allege that since Child Foundation's creation in 1999, it has "funneled the overwhelming majority of its revenue" to the sister charity in Iran, Refah Kudak. They also allege that as Yasrebi was sending money to Iran he was in contact with Iranshahi, 53, who lives in Iran and is considered a fugitive. **According to the indictment, Yasrebi and the Child Foundation transferred a total of \$5.4 million between April 2001 and April 2005 to Refah Kudak through a bank account in Switzerland. Some of that money came from Lahiji and Vahid. The money eventually landed in Bank Melli, an arm of the Iranian government, federal prosecutors alleged.** The indictment alleges that Yasrebi organized the charity "to attract charitable donations in the United States and thereafter transfer virtually all of its revenues from the United States to Iran" through the sister charity there. **Prosecutors charge that Yasrebi sought the approval and financial support for the founding of the charity from members of Hezbollah, as well as Iranian diplomats, ayatollahs and other representatives of the Iranian government.** The indictment never explicitly states any link between the money donated and invested by Vahid and Lahiji and the terrorist group Hezbollah. Vahid answered the phone at her home Thursday but referred all questions to the couple's attorney, Jimmy Parks of San Antonio. Parks did not return a call seeking comment Thursday. Calls to the Child Foundation also were not returned. According to its most recent filings seeking to maintain charitable status, the foundation employs seven full-time employees and raised \$2 million between June 1, 2009, and May 31. **The foundation's goal is to sponsor children "in the form of food, medicine, clothing and educational materials, and in some countries, housing and emergency assistance."** The foundation serves children in Iran, Indonesia and Afghanistan. Lahiji and Vahid are scheduled to appear in federal court in San Antonio during the week of Dec. 20. The charity is not named in the indictment, and none of its officers has been indicted. The U.S. has had a trade embargo against Iran since 1995, the same year the Child Foundation achieved charitable nonprofit status (Fox News, 2010).

**Title/Headline:** *California Man Charged With Trying To Sell Military Jet To Iran*

**Abstract:** Federal agents have arrested a California man who allegedly attempted to export a U.S. military fighter jet to Iran, authorities announced Friday. The arrest followed a seven-month government sting operation, authorities announced. Marc Knapp, 35, also was charged in a criminal complaint with two felony counts of attempting to export other aircraft parts and controlled technology. Knapp has agreed to plead guilty to the charges, according to Assistant U.S. Attorney Robert Kravetz, who is prosecuting the case. **According to unsealed court documents, the case began to unfold after "a cooperating defendant" in the operation introduced Knapp to an undercover agent. As part of the sting, the agent met with Knapp on several occasions at locations in California, Pennsylvania, Delaware, and Budapest, Hungary, the court papers say.** The documents say Knapp broached to an undercover agent the idea of obtaining an F-5B fighter jet from a source in California. **Knapp allegedly told the agent that the "Iranians" might be interested in the fighter jet and other items, and allegedly said he would not be concerned if the jet or the other items ended up in Iran. In July, Knapp allegedly sent a contract for the fighter jet to the undercover agent and demanded a \$3.25 million purchase price. Knapp was arrested in Delaware in July while negotiating plans to fly the aircraft from California to the East Coast, where it subsequently was to be crated and shipped to Hungary and eventually Iran, the documents state.** The Northrop-designed supersonic fighter jet is part of a group of aircraft used by the U.S. Air Force during the Vietnam War and by the Navy and Marines as a stand-in for "aggressor" fighters in training exercises. But it has primarily been an export plane sold to other militaries. **During their meetings, Knapp also informed the agent that he had various defense parts and allegedly admitted procuring an F-14 ejection seat, which was sold to the agent by another source.** Over the course of their interaction, Knapp provided the agent with various lists containing items for sale, including fighter jet emergency manuals, survival radios and antigravity suits, according to court documents. "Homeland Security Investigations will continue to pursue those who are willing to put America's national security at risk," John P. Kelleghan, special agent in charge of U.S. Immigration and Customs Enforcement, said in a news release. **"The export of technology to Iran is prohibited so that our innovations cannot be used to harm Americans or our allies." If convicted, Knapp would face a maximum sentence of 40 years in prison and a \$2 million fine (Wilson, 2010).**

**Title/Headline:** *Former CIA Director Calls Homegrown Terror Threat 'A Witch's Brew'*

**Abstract:** A former director of the CIA described the greater likelihood that terror attacks on U.S. soil would come from an American resident as "a witch's brew." Appearing on CNN's "State of the Union," Michael Hayden, who served under President George W. Bush and stepped down in February 2009, said the "new flavor of threat" was different from "the traditional high-threshold mass casualty attack" that would originate in the al Qaeda stronghold in the tribal regions of Pakistan. **"It's much more difficult for us to defend against those kinds of attacks," Hayden said of terror plots originating from franchises in the U.S. "They will be less lethal if they do succeed," he said. "But they will unfortunately almost certainly be more numerous."** Mike McConnell, the former Director of National Intelligence under Bush, commended the Obama administration for how it has been handling the evolving threats. "My observation is the new administration has been as aggressive, if not more aggressive, in pursuing these issues, because they're real," McConnell said. **"Regardless of which side of the political spectrum you come from or what your political views might be, these threats are very real and very serious and we have to deal with them in a very serious way," he said. Hayden stressed that even**

though the homegrown terrorists would be more amateur in conducting "low-threshold" attacks, the threat was "almost like penalty kicks in soccer." **"No matter how good your goalie is, sooner or later this ball is going to get into the back of the net,"** he said. **McConnell said he would most worry about a chemical or biological attack from al Qaeda. "The most likely event is going to be an explosion. They want death and destruction and blood and mayhem,"** he said. **"That's what they strive for. But there are other things that they could consider. "And of course, one of the things I'm identified with is worrying about someday they'll figure out how to cause us harm through a cyber attack, against what I call the soft underbelly of the country,"** which could disrupt financial or transportation sectors, McConnell added. "We have to take the fight to them, make them spend most of their day worrying about their survival rather than figuring out ways to threaten our survival," Hayden said. Of the White House efforts including drone strikes that continue to rattle Pakistan, Hayden said, **"I've seen over two administrations, and I thank God every day for the continuity"** (Johnson, 2010).

**Title/Headline:** *Indiana Grandmother, A Muslim Convert, Being Investigated For Possible Terror Link*

**Abstract:** A 46-year-old Indiana grandmother is under investigation for her possible ties to suspected and convicted international terrorists, FoxNews.com has learned. Muslim-convert Kathie Smith, 46, a U.S. citizen living in Indianapolis who has blogged about her granddaughter, last year married a suspected German jihadist, and has been flying back and forth between the U.S. and Germany as recently as two weeks ago. A pro-jihadist video featuring Smith and her husband – alongside photos of members of the Islamic Jihad Union charged with plotting failed terror attacks against U.S. targets in Germany -- is being investigated by the **Indiana Intelligence Fusion Center**. The center is a counterterror intelligence clearinghouse staffed by law enforcement officers from local and federal agencies, including the FBI and Department of Homeland Security. "Certainly, it's being looked at and evaluated by Indiana State Police, which runs Indiana Intelligence Fusion Center," Indiana Department of Homeland Security spokeswoman Emily Norcross told FoxNews.com, adding that the video would be passed along to appropriate law enforcement for further investigation. FBI spokeswoman Jenny Shearer said: **"As you're aware, FBI and DOJ policy precludes us from confirming or denying the existence of an investigation."** The Department of Homeland Security (DHS) Washington office did not respond to a request for comment. **Interpol, which helps government law enforcement agencies track crime suspects around the world, declined to comment, citing policy.** The FBI also did not respond to an e-mail from FoxNews.com asking why Smith is not on the federal government's no-fly list. **Smith, meanwhile, said she believes her name is on some kind of government "watch list."** In lengthy e-mail exchanges with FoxNews.com, Smith claimed that she has been repeatedly subjected to hours-long interrogations by Homeland Security every time she travels. **She said her luggage has been subjected to bomb residue tests, and that officials asked her numerous detailed questions about her husband.** She also claims DHS officials on more than one occasion escorted her onto a departing airplane. DHS did not respond to FoxNews.com's request for comment on Smith's allegations. Smith — who now calls herself Zubaida — added that she and her husband were met and interrogated by German police while in a taxi in October 2009. **German police, however, said they were not currently investigating an American woman, but declined to say whether they were aware of Smith.** In lengthy e-mail exchanges with FoxNews.com, Smith alternatively defended her online postings, denied being anti-American, called the Sept. 11 attacks an inside job, the U.S. a terrorist organization and praised the American-born radical Muslim cleric Anwar al Awlaki -- architect, trainer and inspiration for many of the recent terrorist attacks attempted or committed against the U.S. President Obama last April approved Awlaki's inclusion on the CIA's targeted killing list. In one e-mail to FoxNews.com, Smith wrote: "If your neighbor was being attacked by a perpetrator, would you just stand there and say, 'Oh I will let someone come who has a gun to help them'? No, you would rush to their defense. **And use any type of "weapon" to help that person... this is what I am doing. I am defending the defenseless. I am defending my home and family and their right to safety. No matter who it is at my door. These are the rights the Constitution gives me. The very right this Communistic government is trying to take away from me and the rest of the Americans."** In the nearly six-minute video under investigation, Smith and her husband, known online as Salahudin Ibn Ja'far, 28, appear posing and hugging and holding weapons interspersed with photos of known and suspected terrorists and assorted jihadist propaganda, like an Awlaki sermon album cover. **There also are photos of German Taliban Mujahideen -- German nationals who have formed their own splinter group within the Taliban -- and mug shots of members of the Saarland cell of Islamic Jihad Union charged with plotting failed terror attacks against U.S. targets in Germany, including a 2007 plot to bomb the U.S. Air Force base at Ramstein.** Smith said of the Ramstein plotters featured in her video: "The so-called 'jihadists' you have mentioned are actually personal friends of my husband from childhood. In the video he was expressing his love and gratitude to his friends, who have died fighting for freedom. Just like any other American or European citizen who displays pictures of soldiers who have died on their videos. There is no difference in gratitude and love. **It is just that your government has deemed these noble men as 'terrorists' because they are not on the same side. Least us not forget the Mujahideen who fought the Russians for the U.S. They were deemed 'heroes' and lead by Osama Bin Laden at that time, and now because the government says so... they are "terrorists.""** (In a no-longer-active Facebook profile, Smith's husband, Salahudin, listed his current city as Saarbrücken, the capital of the state of Saarland in Germany.) In addition to being close childhood friends of convicted terrorists, Salahudin has posted content from the German Taliban's media outfit and the Islamic Jihad Union on forums and social networking sites. **He's also written in support of his "noble leaders" -- bin Laden, Awlaki, the Sept. 11 hijackers and other terrorist leaders. Salahudin appeared to maintain forums devoted to hosting Awlaki's sermons. Earlier this month he uploaded videos to his since-deleted YouTube account that included German muhajideen training at jihadist camps in Pakistan, and another featuring the widow of a German Taliban jihadist directing the wives of jihadists to fulfill their obligations while their husbands are off fighting.** In other English-language posts, he suggests he himself has trained in these same jihadist camps. On Facebook, he is "friends" with the notorious Al Qaeda English-language online magazine Inspire, thought to be principally authored by American-turned-Muslim radical Samir Khan. Salahudin also has used his online posts to call for the deaths of U.S. citizens, military and government leaders, and recently joined in on another user's thinly veiled threats against Condoleezza Rice, according to postings discovered by FoxNews.com and screen shots provided by the Jawa Report, a watchdog blog that has been following the online activities of Smith and her husband. **His Facebook "friends" make up a who's who of terror groups, many of which his wife is also associated with online.**

He and Smith have been kicked off of Facebook repeatedly over the past month, but both continue to open up new accounts and remain on the social networking site today. On Facebook, Smith "likes" Awlaki, has belonged to a Facebook group called "Al Qaeda in Islamic Maghreb to answer your questions," referring to the North African branch of Al Qaeda. Smith also is Facebook "friends" with pages claiming to be the terrorist groups Al Shabaab and Ansar al Jundullah, in addition to "friends" Sheikh Faisal and Youself al-Khatb, the reported spiritual leader and co-founder of Revolution Muslim, respectively. Her "Likes" and "Groups" are visible to the public; a friend request from this reporter to Smith was not accepted. A Facebook Page provided by Jawa Report shows that Smith warned her husband via Facebook post not to accept FoxNews.com's friend request either. On her MySpace page, currently available for viewing via Google cache, Smith wrote: "As salamu alaikum akhi.. it is time for Jihad and it is now Fard ayn for ALL Muslims whether their in the United Snakes or else where...Insha'Allah!!!!" Smith has lauded Awlaki, celebrated the deaths of U.S. soldiers -- who she called "terrorists" -- at the hands of the Taliban in Afghanistan, and applauded another user's posting of a rendering of the two planes hitting the World Trade Center towers on Sept. 11, 2001. And while she has repeatedly called for jihad against the West, Smith told FoxNews.com: "I am exercising my right, as an American citizen to freedom of speech, religion, and the right to bare arms. I have the right in America to say what ever I want. That is what makes America so great, right?" But a paid government consultant aware of Smith's movements said there's concern that Smith could follow the path of Colleen LaRose, a suburban Philadelphian dubbed "Jihad Jane," who pleaded not guilty in March to conspiracy charges involving a plot to kill a Swedish artist and providing material support to terrorists. "As we saw in the case earlier this year with the arrests of "Jihad Janes" Colleen LaRose and [co-conspirator] Jamie Paulin-Ramirez, Kathie Smith has been exhibiting classic signs of extremism possibly transitioning into violence," the consultant told FoxNews.com, asking not to be identified due to the sensitive nature of his work. "Her online postings on Facebook have been increasingly promoted acts of terrorism and statements by terrorist leaders, such as Anwar Al-Aulaqi," the contractor said. "When her husband released the video earlier this month of the two of them holding weapons and included standard jihad imagery, such as pictures of German jihadists that have left to join terrorist groups in Pakistan and Afghanistan or have been arrested for plotting terror attacks, we were concerned that they might be escalating to an attack themselves," the consultant said. To that concern, Smith replied by e-mail to FoxNews.com: "I live a simple life, a life where I fear Allah first and try hard to do what is right for mankind. I am not some "horribly misguided, or brainwashed" individual. I have lived a long life and have seen many things. And I will always stand up for what is right, no matter who is trying to say the contrary" (Winter, 2010).

**Title/Headline:** *DHS Ties Arizona Attack To "Lone Wolf" Terrorism*

**Abstract:** The Department of Homeland Security and the FBI sent a bulletin to local law enforcement after Rep. Gabrielle Giffords and others were shot in Arizona last week. The bulletin, issued Saturday night, provided information about "lone wolf" attackers, according to Fox News. "We have seen an increase in the lone wolf type attacks, which, from a law enforcement and investigation perspective, are the most challenging," DHS Secretary Janet Napolitano said earlier this year. "Why? Because by definition they're not conspiring. They're not using the phones, the computer networks, or any — they're not talking with others any other way that we might get some inkling about what is being planned." The government has characterized Joseph Andrew Stack, John Patrick Bedell, Johnny Lee Wicks, and others as lone wolf attackers. Stack allegedly plowed a small aircraft into an IRS office building in Austin, Texas. Bedell, described as a mentally ill marijuana user, opened fire outside of the Pentagon in March. Johnny Lee Wicks was killed at federal courthouse in Las Vegas after his Social Security check was reduced. In 2009, a DHS document, "Right-wing Extremism: Current Economic and Political Climate Fueling Resurgence in Radicalization and Recruitment," was leaked to the media. "The possible passage of new restrictions on firearms and the return of military veterans facing significant challenges reintegrating into their communities could lead to the potential emergence of terrorist groups or lone wolf extremists capable of carrying out violent attacks," the report concludes (emphasis added). Michael Leiter, the director of the National Counterterrorism Center, recently told the Senate Homeland Security Committee that the prospect of lone wolf attacks keep him awake at night, according to the Chicago Tribune (Nimmo, 2011).

**Title/Headline:** *FBI: Bomb Found On MLK Parade Route 'Domestic Terrorism'*

**Abstract:** The FBI offered a reward Tuesday for information about a potentially lethal bomb found in a backpack along the downtown route of the Martin Luther King Jr. Day parade. The discovery before Monday's parade for the slain civil rights leader raised the possibility of a racial motive in a region that has been home to the white supremacist Aryan Nations. "The confluence of the holiday, the march and the device is inescapable," said Frank Harrill, special agent in charge of the Spokane FBI office. "But we are not at the point where we can draw any particular motive." He called the planting of the bomb an act of domestic terrorism that was clearly designed to advance a political or social agenda. The suspicious backpack was spotted by three city employees about an hour before the parade was to start, Harrill said. They looked inside, saw wires and immediately alerted law enforcement. The parade route was changed to avoid the device. A bomb disposal unit disabled it without incident, he said. Spokane Mayor Mary Verner said the attempted bombing was unacceptable. "I was struck that on a day when we celebrate Dr. King, a champion of non-violence, we

were faced with a significant violent threat," Verner said. "This is unacceptable in our community, or any community." Harrill declined to release details of the device, other than to call it a functional bomb that could have caused multiple casualties. "The potential for injury and death were clearly present," Harrill said. The FBI received no warnings in advance and did not have a suspect, Harrill said. No one has claimed credit for planting the bomb. **The agency decided to appeal to the public for information and offered the \$20,000 reward for information leading to an arrest and conviction. "Subject should be considered armed and dangerous," the agency said in its announcement.** The agency released photos of the backpack and two shirts found inside. Another explosive device was found March 23 beside the Thomas S. Foley U.S. Courthouse in downtown Spokane. **No arrests have been made in that investigation, Harrill said, and agents didn't know if the two incidents were related. The Spokane region and adjacent northern Idaho have had numerous incidents of anti-government and white supremacist activity during the past three decades. The most visible was by Aryan Nations, whose leader Richard Butler gathered racists and anti-Semites at his compound for two decades.** Butler was bankrupted and lost the compound in a civil lawsuit in 2000 and died in 2004. In 1996, white supremacists placed a pipe bomb outside City Hall. **The bomb exploded, blowing out a window and sending nails and screws across the street into Riverfront Park. There were no injuries. Two men arrested for the blast said it was part of a plot to spark a revolution and set up a whites-only nation. In December, a man in nearby Hayden, Idaho, built a snowman on his front lawn shaped like a member of the Ku Klux Klan holding a noose.** The man knocked the pointy-headed snowman down after getting a visit from sheriff's deputies (Fox News, 2011).

**Conclusion:** From almost every state and from every race, there are alleged terrorists trying to attack America from within. No one is safe from potential persecution until the real terrorists are behind bars. Please take the time to research Chapters 43: *The Unusual Suspects* to learn who the REAL terrorists are and who is really in charge.

## The Nuclear Bible: Terrorism & Mexico

**Intro:** The innuendos regarding the possibility that terrorists from the Middle East, namely Pakistan or Iran, will smuggle a nuclear bomb into the United States via Mexico is increasing at an alarming rate. It appears that Mexico will serve as the conduit for Nuclear Terror, and as a result a North American Union must be formed to prevent it from ever happening again.

TIME

**Date:** November 14, 2004

**Source:** TIME, Adam Zagorin

**Title/Headline:** *Bordering On Nukes?*

**Abstract:** A key al-Qaeda operative seized in Pakistan recently offered an alarming account of the group's potential plans to target the U.S. with weapons of mass destruction, senior U.S. security officials tell TIME. Sharif al-Masri, an Egyptian who was captured in late August near Pakistan's border with Iran and Afghanistan, has told his interrogators of "al-Qaeda's interest in moving nuclear materials from Europe to either the U.S. or Mexico," according to a report circulating among U.S. government officials. Masri also said al-Qaeda has considered plans to "smuggle nuclear materials to Mexico, then operatives would carry material into the U.S.," according to the report, parts of which were read to TIME. Masri says his family, seeking refuge from al-Qaeda hunters, is now in Iran. Masri's account, though unproved, has added to already heightened U.S. concerns about Mexico. Homeland Security Secretary Tom Ridge met publicly with top Mexican officials last week to discuss border security and smuggling rings that could be used to slip al-Qaeda terrorists into the country. Weeks prior to Ridge's lightning visit, U.S. and Mexican intelligence conferred about reports from several al-Qaeda detainees indicating the potential use of Mexico as a staging area "to acquire end-stage chemical, biological, radiological and nuclear material." U.S. officials have begun to keep a closer eye on heavy-truck traffic across the border. The Mexicans will also focus on flight schools and aviation facilities on their side of the frontier. And another episode has some senior U.S. officials worried: the theft of a crop-duster aircraft south of San Diego, apparently by three men from southern Mexico who assaulted a watchman and then flew off in a southerly direction. Though the theft's connection to terrorism remains unclear, a senior U.S. law-enforcement official notes that crop dusters can be used to disperse toxic substances. The plane has not been recovered (Zagorin, 2004).

**Date:** October 12, 2006

**Source:** U.S. Department Of Homeland Security (DHS)

**Title/Headline:** *A Line In The Sand: Confronting The Threat On The Southwest*

**Abstract:** The Subcommittee on Investigations of the Committee on Homeland Security issues this interim report summarizing its findings regarding the criminal activity and violence taking place along the Southwest border of the United States between Texas and Mexico. The Texas-Mexico border region has been experiencing an alarming rise in the level of criminal cartel activity, including drug and human smuggling, which has placed significant additional burdens on Federal, State, and local law enforcement agencies. This interim report will examine the roots of the criminal enterprise and its effects on the local populations, what steps are being taken or should be taken to counter the threat, and the significance of these issues for the overall homeland security of the United States. The United States border with Mexico extends nearly 2,000 miles along the southern borders of California, Arizona, New Mexico and Texas. In most areas, the border is located in remote and sparsely populated areas of vast desert and rugged mountain terrain. Data indicates that there are hundreds of illegal aliens apprehended entering the United States each year who are from countries known to support and sponsor terrorism. U.S. Immigration and Customs Enforcement investigations have revealed that aliens were smuggled from the Middle East to staging areas in Central and South America, before being smuggled illegally into the United States. Members of Hezbollah have already entered the United States across the Southwest border. U.S. military and intelligence officials believe that Venezuela is emerging as a potential hub of terrorism in the Western Hemisphere.

### Subcommittee Staff Finds That:

- Drug trafficking organizations and human smuggling networks are proliferating and strengthening their control of key corridors along our Nation's Southwest border.
- The Mexican drug cartels wield substantial control over the U.S.-Mexican border. Law enforcement on the border agree that very little crosses the respective cartel territories, or "plazas," along the Southwest border without cartel knowledge, approval, and financial remuneration.
- These criminal organizations and networks are highly sophisticated and organized, operating with military style weapons and technology, utilizing counter surveillance techniques and acting aggressively against both law enforcement and competitors.

- Drug trafficking organizations, human smuggling networks and U.S. based gangs are increasingly coordinating with one another to achieve their objectives.
- **Federal, State and local law enforcement report new and ever-increasing levels of ruthlessness and violence associated with these criminal organizations, which are increasingly spilling across the border into the United States and moving into local communities.**
- **Each year hundreds of illegal aliens from countries known to harbor terrorists or promote terrorism are routinely encountered and apprehended attempting to enter the U.S. illegally.**
- The existing resources of the U.S. Border Patrol and local law enforcement must continue to be enhanced to counter the cartels and the criminal networks they leverage to circumvent law enforcement.

**Smuggling Routes Along the Texas-Mexico Border:** Along the Texas-Mexico border, drug cartels and organized criminal groups have established a robust presence in key strategic areas. The Texas-Mexico border is particularly attractive to these criminal networks as it spans approximately 1200 miles, includes 18 Ports of Entry, and has major interstate highways in Brownsville, McAllen, Laredo, and El Paso, thereby providing the organized crime groups with access to the rest of the Nation. The South Texas region covers approximately 625 miles of border territory – a total area of 20,963 square miles and borders three separate Mexican States. Inside the territory are 11 Ports of Entry that include 15 international bridges. Directly across the cities of Brownsville, McAllen, and Laredo are major Mexican cities, each with a population between 600,000 and 800,000. **The El Paso-Juarez corridor in west Texas also serves as the gateway for drugs destined to major metropolitan areas in the United States. Mexican drug cartels transport significant quantities of marijuana and cocaine through the El Paso Port of Entry using major east/west and north/south interstate highways. These highways provide the Mexican cartels with transportation routes for drug distribution throughout the United States. The Laredo Port of Entry is the busiest and most heavily traversed land Port of Entry on the Southwest border, handling approximately 6,000 commercial vehicles a day. Forty percent of all Mexican exports cross into Laredo, Texas, where Interstate 35 connects directly to Dallas, and from there throughout the United States. U.S. Border Patrol Chief John Montoya describes this Port of Entry as “the key ingress into the United States.”** “It’s called a gateway city, not only into Mexico but into the United States as well.”<sup>12</sup> The very conditions that make the Laredo Port of Entry so attractive to legitimate commerce also make the city ideal for the illicit drug and human smuggling trade.

**Vulnerability to Terrorist Infiltration:** The number of aliens other than Mexican (“OTMs”) illegally crossing the border has grown at an alarming rate over the past several years. Based on U.S. Border Patrol statistics there were 30,147 OTMs apprehended in FY2003, 44,614 in FY2004, 165,178 in FY2005, and 108,025 in FY2006. Most of them were apprehended along the U.S. Southwest border.<sup>100</sup> **The sheer increase of OTMs coming across the border makes it more difficult for Border Patrol agents to readily identify and process each, thereby increasing the chances that a potential terrorist could slip through the system.** Moreover, there is no concrete mechanism for determining how many OTMs evade apprehensions and successfully enter the country illegally. **The U.S. Department of Homeland Security (DHS) pays particular attention to OTMs apprehended by the Border Patrol who originate from thirty-five nations designated as “special interest” countries.** According to Border Patrol Chief David Aguilar, special interest countries have been “designated by our intelligence community as countries that could export individuals that could bring harm to our country in the way of terrorism. Though the majority of overall apprehensions made by the Border Patrol occur in the Tucson sector of Arizona, the Texas border – specifically the McAllen sector – far outpaces the rest of the country in OTM and Special Interest Alien apprehensions. **Since September 11, 2001, DHS has reported a 41% increase in arrests along the Texas/Mexico border of Special Interest Aliens. Since September 11, 2001 to the present hundreds of illegal aliens from special interest countries (such as Iran, Jordan, Lebanon, Syria, Egypt, Saudi Arabia, Kuwait, Pakistan, Cuba, Brazil, Ecuador, China, Russia, Yemen, Albania, Yugoslavia and Afghanistan) were apprehended within the South Texas region alone.** A jacket with patches from countries where al Qa’ida is known to operate was found in Jim Hogg County, Texas by the Border Patrol. The patches on the jacket show an Arabic military badge with one depicting an airplane flying over a building and heading towards a tower, and another showing an image of a lion’s head with wings and a parachute emanating from the animal. The bottom of one patch read “martyr,” “way to eternal life” or “way to immortality.” On January 28, 2006, Border Patrol Chief David Aguilar was asked by a reporter from KGNS television station in Laredo, Texas, about the outcome of the investigation of the jacket. **Chief Aguilar responded that the patches were not from al Qa’ida but from countries in which al Qa’ida was known to operate.**

**Alleged Al Qaeda Military Patches Found In Mexico**

According to ICE testimony, on September 8, 2004, ICE agents arrested Neeran Zaia and Basima Sesi. The human smuggling organization headed by Zaia specialized in smuggling Iraqi, Jordanian, and Syrian Nationals and was responsible for the movement of more than 200 aliens throughout the investigation. The investigation was initiated when a confidential informant familiar with the organization reported ongoing smuggling activities by Zaia, who had been previously convicted of alien smuggling. **Investigative efforts revealed that the aliens were smuggled from the Middle East to staging areas in Central and South America. Once in these staging areas, the conspirators would arrange to smuggle the aliens from these sites into the U.S. or its territories. Members of Hezbollah, the Lebanon-based terrorist organization, have already entered to the United States across our Southwest border.** On March 1, 2005, Mahmoud Youssef Kourani pleaded guilty to providing material support to Hezbollah.<sup>111</sup> Kourani is an illegal alien who had been smuggled across the U.S.-Mexico border after bribing a Mexican consular official in Beirut for a visa to travel to Mexico.

**Kourani and a Middle Eastern traveling partner then paid coyotes in Mexico to guide them into the United States.** Kourani established residence among the Lebanese expatriate community in Dearborn, Michigan and began **soliciting funds for Hezbollah terrorists back home in Lebanon.** He is the brother of the Hezbollah chief of military operations in southern Lebanon. In December 2002, Salim Boughader Mucharrafille, a café owner in Tijuana, Mexico, was arrested for illegally smuggling more than two hundred Lebanese illegally into the United States, including several believed to have terrorist ties to Hezbollah.<sup>112</sup> Just last month Robert L. Boatwright, Assistant Chief Patrol Agent of the El Paso Texas Sector, reported, **“We have apprehended people from countries that support terrorism...they were thoroughly debriefed and there was a tremendous amount of information collected from them.”** Statements made by high-ranking Mexican officials prior to and following the September 11, 2001 terrorist attacks indicate that one or more Islamic terrorist organizations has sought to establish a presence in Mexico. In May 2001, former Mexican National security adviser and ambassador to the United Nations, Adolfo Aguilar Zinser, reported, that **“Spanish and Islamic terrorist groups are using Mexico as a refuge.”** Federal Bureau of Investigation Director Robert Mueller has confirmed in testimony **“that there are individuals from countries with known al-Qa’ida connections who are changing their Islamic surnames to Hispanic-sounding names and obtaining false Hispanic identities, learning to speak Spanish and pretending to be Hispanic immigrants. Islamic radical groups that support Hamas, Hezbollah and Islamiya Al Gamat are all active in Latin America.** These groups generate funds through money laundering, drug trafficking, and arms deals, making millions of dollars every year via their multiple illicit activities. These cells reach back to the Middle East and extend to this hemisphere the sophisticated global support structure of international terrorism. **While threats to our nation from international terrorism are well known, lesser known threats spawned by narcoterrorism reach deeply into this country.** It is especially difficult to provide the total number of Special Interest Aliens entering the U.S. illegally because they pay larger amounts of money (\$15,000 to \$60,000 per alien) to employ the more effective Mexican alien smuggling organizations and are less likely to be apprehended. **One thing, however, is known for certain – hundreds of people from countries known to harbor terrorists or promote terrorism are caught trying to enter the United States illegally** along the land border, and the massive flow of immigrants and our porous border create various and abundant opportunities for concealment. Given the ever-present threat posed by al-Qa’ida and other terrorist organizations – a threat that has been underscored by the recent events in London and the vulnerability of our borders – the need for immediate action to enforce our borders could not be more apparent.

**Texas Border Security Initiatives:** In response to the increasing criminal activity and violence along the Southwest border on **February 9, 2006, the State of Texas, in partnership with the Federal government, launched Operation Rio Grande.** The strategy focuses on four key areas:

- 1) Increased patrols and law enforcement presence;
- 2) Centralized of command, control, and intelligence operations;
- 3) Increased State funding and deployment of State resources for border security; and
- 4) Enhanced utilization of technology to fight border crime.

**One of the key cornerstones of Operation Rio Grande is the increased cooperation among Federal, State, and local law enforcement.** During the duration of each regional operation, U.S. Border Patrol and border sheriffs received the support of various and key State. The Federal government has taken positive steps to secure its borders, but much more is needed to combat an increasingly powerful, sophisticated, and violent criminal network which has been successful in smuggling illegal contraband, human or otherwise, into our country. **The growth of these criminal groups, along the Southwest border, and the potential for terrorists to exploit the vulnerabilities which they create, represents a real threat to America’s national security** (DHS, 2006).

**Source:** American Chronicle, Michael Webster

**Title/Headline:** *Dangerous Mexican/U.S. Criminal Enterprises Operating Along The Mexican Border*

**Abstract:** The overwhelming influence and power of the Mexican Drug Cartels who are the Mexican drug trafficking organizations and criminal gangs operating in Mexico and the United States. **They have emerged in recent years as the most dangerous and politically influential drug traffickers in the western hemisphere if not the world. The Mexican cartels have existed for some time, they have become increasingly powerful with the demise of the Medellin and Cali cartels in Colombia and have now come to dominate the U.S. illicit drug market and other criminal enterprises.** According to the National Drug Intelligence Center, Mexican cartels are "the predominant smugglers, transporters, and wholesale distributors of cocaine, marijuana, methamphetamine, and Mexico-produced heroin in the United States" and "are expanding their control over the distribution of these drugs in areas controlled by Colombian and Dominican criminal groups, and now believed to include all of the U.S.A.. **In addition to drug trafficking, cartels have been tied to illegal alien, terrorist, arms smuggling and those proceeds are subsequently laundered through seemingly legitimate local businesses.** The cartels through the criminal gangs who work for them have been involved in kidnappings and military style training camps, some reported to be along the border with the U.S. FBI Director Robert Mueller described U.S. based-gangs as **"more organized, more violent, and more widespread than ever."** The Department of Justice estimates there are approximately 30,000 gangs with more than 800,000 members in the U.S. Mueller believes these violent gangs pose a growing threat to the safety and security of Americans. **As this reporter has documented Mexican Drug cartels are ordering decapitations of cartel enemies, including federal, state and city police officers. Many of these victims were blind folded and hooded before they shoot them.** Other types of violence to murder victims are: Physical beatings, torture, or body dumped on street or lot torture involving beating, tooth removal, appendage removal, death by torture, strangulation, single shot to head and/or multiple shots to head and body. Other tactics were same as above with head and/or face fully or partially wrapped with duct tape or other head wrappings or blind folds. **Bodies often disposed of by the alternate "Pozole" method. The pozole is where they stuff the body sometime still alive into a 55 gallon barrel and pour gas, battery acid and other corrosive terrible chemicals.** The theory being that they think it makes the body easier to dispose of and makes what may remain very difficult to

identify later by authorities. Many were beheaded with or without written messages on bodies or in vehicles. The cartels' methods of torture and killing are particularly brutal. **By using these horrible and terrifying tactics the Cartels are sending a chilling message to the Mexican President Felipe Calderon Administration by adopting methods of intimidation made notorious by Middle Eastern terrorist groups.** Dozens of people have been decapitated in Mexico so far this year, with heads stuck on fence posts, found in trash bags and heads being tossed onto a nightclub dance floor for all to see. Dozens of U.S. citizens have been kidnapped, held hostage and killed by their captors in Mexico and many cases remain unsolved. Moreover, new cases of disappearances and kidnap-for-ransom continue to be reported yet no high level warning has been issued to protect Americans against this world class violence. Many kidnapped victims were held in deplorable jail like metal cages in so called safe houses. U.S. intelligence officials report that human smuggling has become another component of the drug cartels' business. **This fact is of particular import in a post 9/11 environment and at a time in history when the United States is more concerned than ever about securing its borders. Americans Being Kidnapped, Held and killed in Mexico.** FBI Director Robert Mueller described U.S. based-gangs as "more organized, more violent, and more widespread than ever." The Department of Justice estimates there are approximately 30,000 gangs with more than 800,000 members in the U.S. Dangerous Mexican Cartel Gangs. **The number of aliens other than Mexican ("OTMs") illegally crossing the border has grown at an alarming rate over the past several years.** Based on U.S. Border Patrol statistics there were 30,147 OTMs apprehended in FY2003, 44,614 in FY2004, 165,178 in FY2005, and 108,025 in FY2006. 210,027 FY 2007. Most of them were apprehended along the U.S Southwest border. The sheer increase of OTMs coming across the border makes it more difficult for Border Patrol agents to readily identify and process each, thereby increasing the chances that a potential terrorist could slip through the system. Moreover, there is no concrete mechanism for determining how many OTMs evade apprehensions and successfully enter the country illegally. **The U.S. Department of Homeland Security (DHS) pays particular attention to OTMs apprehended by the Border Patrol who originate from thirty-five nations designated as "special interest" countries. According to Border Patrol Chief David Aguilar, special interest countries have been "designated by our intelligence community as countries that could export individuals that could bring harm to our country in the way of terrorism."** Though the majority of overall apprehensions made by the Border Patrol occur in the Tucson sector of Arizona, the Texas border – specifically the McAllen sector – far outpaces the rest of the country in OTM and Special Interest Alien apprehensions. Since September 11, 2001, DHS has reported a 501% increase in arrests along the U.S. Mexican border of Special Interest Aliens. **The data indicates that each year hundreds of illegal aliens from countries known to harbor terrorists or promote terrorism are routinely encountered and apprehended attempting to enter the U.S. illegally between Ports of Entry.** Just recently, U.S. intelligence officials report that seven Iraqis were found in Brownsville, Texas in June 2006. In August 2006, an Afghani man was found swimming across the Rio Grande River in Hidalgo, Texas; 104 as recently as October 2006, seven Chinese were apprehended in the Rio Grande Valley area of Texas. Items have been found by law enforcement officials along the banks of the Rio Grande River and inland that indicate possible ties to a terrorist organization or member of military units of Mexico. **A jacket with patches from countries where al Qa'ida is known to operate was found in Jim Hogg County, Texas by the Border Patrol. The patches on the jacket show an Arabic military badge with one depicting an airplane flying over a building and heading towards a tower, and another showing an image of a lion's head with wings and a parachute emanating from the animal. The bottom of one patch read "martyr," "way to eternal life" or "way to immortality."** Border Patrol Chief David Aguilar was asked by a reporter from KGNS television station in Laredo, Texas, about the outcome of the investigation of the jacket. Chief Aguilar responded that the patches were not from al Qa'ida but from countries in which al Qa'ida was known to operate. According to ICE testimony, on September 8, 2004, ICE agents arrested Neeran Zaia and Basima Sesi. The human smuggling organization headed by Zaia specialized in smuggling Iraqi, Jordanian, and Syrian Nationals and was responsible for the movement of more than 200 aliens throughout the investigation. The investigation was initiated when a confidential informant familiar with the organization reported ongoing smuggling activities by Zaia, who had been previously convicted of alien smuggling. Investigative efforts revealed that the aliens were smuggled from the Middle East to staging areas in Central and South America. Once in these staging areas, the conspirators would arrange to smuggle the aliens from these sites into the U.S. or its territories. **Members of Hezbollah, the Lebanon-based terrorist organization, have already entered into the United States across our Southwest border. On March 1, 2005, Mahmoud Youssef Kourani pleaded guilty to providing material support to Hezbollah.** Kourani is an illegal alien who had been smuggled across the U.S.-Mexico border after bribing a Mexican consular official in Beirut for a visa to travel to Mexico. Kourani and a Middle Eastern traveling partner then paid coyotes in Mexico to guide them into the United States. **Kourani established residence among the Lebanese expatriate community in Dearborn, Michigan and began soliciting funds for Hezbollah terrorists back home in Lebanon. He is the brother of the Hezbollah chief of military operations in southern Lebanon. Salim Boughader Mucharraffile, a café owner in Tijuana, Mexico, was arrested for illegally smuggling more than two hundred Lebanese illegally into the United States, including several believed to have terrorist ties to Hezbollah.** Robert L. Boatwright, Assistant Chief Patrol Agent of the El Paso Texas Sector, reported, **"We have apprehended people from countries that support terrorism...they were thoroughly debriefed and there was a tremendous amount of information collected from them. Statements made by high-ranking Mexican officials prior to and following the September 11, 2001 terrorist attacks indicate that one or more Islamic terrorist organizations has sought to establish a presence in Mexico.** In May 2001, former Mexican National security adviser and ambassador to the United Nations, Adolfo Aguilar Zinser, reported, that "Spanish and Islamic terrorist groups are using Mexico as a refuge." Federal Bureau of Investigation Director Robert Mueller has confirmed in testimony **"that there are individuals from countries with known al-Qa'ida connections who are changing their Islamic surnames to Hispanic-sounding names and obtaining false Hispanic identities, learning to speak Spanish and pretending to be Hispanic immigrants.** These examples highlight the dangerous intersection between traditional transnational criminal activities, such as human and drug smuggling, and more ominous threats to national security. Sheriff Sigifredo Gonzalez summed it up this way: **"I dare to say that at any given time, daytime or nighttime, one can get on a boat and traverse back and forth between Texas and Mexico and not get caught. If smugglers can bring in tons of marijuana and cocaine at one time and can smuggle 20 to 30 persons at one time, one can just imagine how easy it would be to bring in 2 to 3 terrorists or their weapons of mass destruction across the river and not be detected.** Chances of apprehension are very slim." Furthermore, according to senior U.S. military and intelligence officials, Venezuela is emerging as a potential hub of terrorism in the Western Hemisphere, providing assistance to Islamic radicals from the Middle East and other terrorists. General James Hill, commander of U.S. Southern Command, has warned the United States faces a growing risk from both Middle Eastern terrorists relocating to Latin America and terror groups originating in the region. **General Hill said groups such as Hezbollah had established bases in Latin**

America. These groups are taking advantage of smuggling hotspots, such as the tri-border area of Brazil, Argentina and Paraguay, and Venezuela's Margarita Island, to channel funds to terrorist groups around the world. Venezuela is providing support—including identity documents—that could prove useful to radical Islamic groups, say some U.S. officials. The Venezuelan government has issued thousands of cédulas, the equivalent of Social Security cards, to people from places such as Cuba, Columbia, and Middle Eastern nations that host foreign terrorist organizations. The U.S. officials believe that the Venezuelan government is issuing the documents to people who should not be getting them and that some of these cédulas could be subsequently used to obtain Venezuelan passports and even American visas, which could allow the holder to elude immigration checks and enter the United States. Recently, several Pakistanis were apprehended at the U.S.-Mexican border with fraudulent Venezuelan documents. "Hugo Chavez, President of Venezuela, has been clearly talking to Iran about uranium," said a senior administration official quoted by the Washington Times. Chavez has made several trips to Iran and voiced solidarity with the country's hard-line mullahs. He has hosted Iranian officials in Caracas, endorsed Tehran's nuclear ambitions and expressed support for the insurgency in Iraq. The Times reports Venezuela is also talking with Hamas about sending representatives to Venezuela to raise money for the militant group's elected Palestinian government as Chavez seeks to build an anti-U.S. axis that also includes Fidel Castro's Cuba. "I am on the offensive," Chavez said on the al Jazeera television network, "because attack is the best form of defense. We are waging an offensive battle...." Given all that is happening in Chavez's Venezuela, some American officials regret that terrorism is seen chiefly as a Middle East problem and that the United States needs to start looking to protect its southern flank. A U.S. intelligence official expressed concern that "Counterterrorism issues are not being aggressively pursued in this hemisphere." Another intelligence official stated terror suspects held at Guantanamo Bay are not being interrogated about connections to Latin America. The bottom line, when it comes to terrorism so close to U.S. shores, says the official, "We don't even know what we don't know." Islamic radical groups that support Hamas, Hezbollah and Islamiya Al Gamat are all active in Mexico and other Latin American countries. These groups generate funds through money laundering, drug trafficking, and arms deals, making millions of dollars every year via their multiple illicit activities. These cells reach back to the Middle East and extend to this hemisphere the sophisticated global support structure of international terrorism. While threats to our nation from international terrorism are well known, lesser known threats spawned by narcoterrorism reach deeply into this country. Federal law enforcement entities estimate they apprehend approximately 10 to 30 percent of illegal aliens crossing the border. U.S. intelligence officials along the southwest border, on the other hand, are less optimistic. To be sure, it is unclear how many illegal aliens of any nationality evade capture by law enforcement each year and succeed in entering the United States illegally. One thing, however, is known for certain – hundreds of people from countries known to harbor terrorists or promote terrorism are caught trying to enter the United States illegally along the land border, and the massive flow of immigrants and our porous border create various and abundant opportunities for concealment. Given the ever-present threat posed by al-Qa'ida and other terrorist organizations show the vulnerability of our borders – the need for immediate action to enforce our borders could not be more apparent. The Federal government has taken positive steps to secure its borders, but much more is needed to combat an increasingly powerful, sophisticated, and violent criminal network which has been successful in smuggling illegal contraband, human or otherwise, into our country. The growth of these criminal groups, along the border, and the potential for terrorists to exploit the vulnerabilities which they create, represents a real threat to America's national security. It is imperative that immediate action be taken to enhance security along our border with Mexico (Webster, 2008).

**Title/Headline:** *Threat Of Terrorists Crossing The Border*

**Abstract:** The area is the busiest spot in the nation for border patrol. Records show last year, agents caught a quarter of million people trying to enter the U.S. in the Tucson sector alone. According to those documents, a lot are from Mexico or South America, but hundreds of them aren't and are from nations like Pakistan, Afghanistan, Iraq and Iran. Since January, border patrol agents say they have been on the lookout for 23 Somalis with ties to al-Qaida. Jailers released them from a Mexican prison and some law enforcement officials said they think they are headed for the U.S. border. The U.S. government no longer releases a list of what they call "captured O.T.M.s", which stands for "other than Mexicans". Channel 2 Action News obtained it from a congressional staffer (WSBTv News, 2010).

[At 2:48 in WSBTV TV Special entitled "*Threat Of Terrorists Crossing The Border*", the Department of Homeland Security OTM (Other Than Mexicans) list shows 110 Pakistanis were apprehended by the U.S. Border Patrol.]

**Title/Headline:** *Feds Issue Terror Watch for the Texas/Mexico Border*

**Abstract:** The Department of Homeland Security is alerting Texas authorities to be on the lookout for a suspected member of the Somalia-based Al Shabaab terrorist group who might be attempting to travel to the U.S. through Mexico, a security expert who has seen the memo tells FOXNews.com. The warning follows an indictment unsealed this month in Texas federal court that accuses a Somali man in Texas of running a "large-scale smuggling enterprise" responsible for bringing hundreds of Somalis from Brazil through South America and eventually across the Mexican border. Many of the illegal immigrants, who court records say were given fake IDs, are alleged to have ties to other now-defunct Somalian terror organizations that have merged with active organizations like Al Shabaab, al-Barakat and Al-Ittihad Al-Islami. In 2008, the U.S. government designated Al Shabaab a terrorist organization. Al Shabaab has said its priority is to impose Sharia, or Islamic law, on Somalia; the group has aligned itself with Al Qaeda and has made statements about its intent to harm the United States. In recent years, American Somalis have been recruited by Al Shabaab to travel to Somalia, where they are often radicalized by more extremist or operational anti-American terror

groups, which Al Shabaab supports. **The recruiters coming through the Mexican border are the ones who could be the most dangerous, according to law enforcement officials. Security experts tell FOXNews.com that the influx of hundreds of Somalis over the U.S. border who allegedly have ties to suspected terror cells is evidence of a porous and unsecured border being exploited by groups intent on wrecking deadly havoc on American soil.** The DHS alert was issued to police and sheriff's deputies in Houston, asking them to keep their eyes open for a Somali man named Mohamed Ali who is believed to be in Mexico preparing to make the illegal crossing into Texas. **Officials believe Ali has ties to Al Shabaab, a Somali terrorist organization aligned with Al Qaeda, said Joan Neuhaus Schaan, the homeland security and terrorism fellow at Rice University's Baker Institute, who has seen the alert. An indictment was unsealed in Texas federal court earlier this month that revealed that a Somali man, Ahmed Muhammed Dhakane, led a human smuggling ring that brought East Africans, including Somalis with ties to terror groups, from Brazil and across the Mexican border and into Texas.** In a separate case, Anthony Joseph Tracy, of Virginia, who admitted to having ties to Al Shabaab, is currently being prosecuted for his alleged role in an international ring that illegally brought more than 200 Somalis across the Mexican border. Prosecutors say Tracy used his Kenya-based travel business as a cover to fraudulently obtain Cuban travel documents for the Somalis. The smuggled Somalis are believed to have spread out across the United States and remain mostly at large, court records show. **Somalis are classified by border and immigration officials as "special interest" — illegal immigrants who get caught trying to cross the Mexican border into the U.S. who come from countries that are considered a high threat to the U.S., Neuhaus Schaan explained.** DHS did not respond to multiple e-mail and phone requests for comment. In addition to the Somali immigration issue, **Mexican smugglers are coaching some Middle Eastern immigrants before they cross the border — schooling them on how to dress and giving them phrases to help them look and sound like Latinos,** law enforcement sources told FoxNews.com. **"There have been a number of certain communities that have noticed this, villages in northern Mexico where Middle Easterners try to move into town and learn Spanish," Neuhaus Schaan said. "People were changing their names from Middle Eastern names to Hispanic names."** Security experts say the push by illegal immigrants to try to fit in also could be the realization of what officials have feared for years: **Latin American drug cartels are helping jihadist groups bring terrorists across the Mexican border.** J. Peter Pham, senior fellow and director of the Africa Project at the National Committee on American Foreign Policy, said that for the past ten years there's been suspicion by U.S. law enforcement that **drug cartels could align with international terrorist organizations to bring would-be-jihadists into the U.S. That kind of collaboration is already being seen in Africa, said Dr. Walid Phares, director of the Future Terrorism Project at the Foundation for the Defense of Democracies. "Al Qaeda could easily say, "Ok, now we want your help getting these guys into the United States," Phares said. "Eventually the federal government will pay more attention, but there is a window of time now where they can get anyone they want to get in already."** Experts also say the DHS alert and recent court case highlights the threat of terrorists penetrating the Mexican/Texas border — and the growing threat of Somali recruitment efforts to bring Americans of Somali descent back to Somalia for jihadist training, creating homegrown terrorists. Pham says the DHS alert comes too late. "They're just covering themselves for the fact that DHS has been failing to date to deal effectively with this," he said. "They're already here." Michael Weinstein, a political science professor at Purdue University and an expert on Somalia, said, **"In the past year, it's become obvious that there's a spillover into the United States of the transnational revolutionaries in Somalia."** **"It's something that certainly has to be watched, but I don't think it's an imminent threat," he said. "This has to be put in context with people smuggling — everybody and their brother is getting into the United States through Mexico; I read last week that some Chinese were crossing, it's just a big market."** Pham disagrees. "The real danger is 'something along the lines of jihadist version of 'find a classmate,' he said, referring to Al Shabaab's potential to set up sleeper cells in the U.S. **"Most of them rely on personal referral and association. That type of social networking is not beyond their capabilities."** Pham says the DHS alert is too little, too late. **"This is like shutting the barn door after the horses got away," he said (Hoft, 2010).**

**Title/Headline:** *Drug Cartels Smuggling Illegals Create Security Risk, Officials Say*

**Abstract:** Smuggling of potential terrorists across the border is evolving into a billion dollar industry for Mexican drug cartels while posing a significant threat to the United States, according to federal law enforcement officials. That was echoed in a recent assessment by the U.S. military's Southern Command that found **drug cartels are taking advantage of a "largely unregulated" border to create security risk for the United States.** "Of particular concern is the smuggling of criminal aliens and gang members who pose public safety threats to communities throughout the border region and the country," said the Southern Command report obtained by *The Washington Examiner*. **"These individuals include hundreds of undocumented aliens from special interest countries, primarily China, but also Afghanistan, Iran, Iraq, and Pakistan."** Department of Homeland Security policy requires that many illegal immigrants from countries that have been breeding grounds for anti-American sentiment, known as **"special interest aliens,"** be released unless there is specific evidence of threat. Most fail to appear for hearings. **"We don't always know who we have in custody," said a DHS official who asked not to be named.** "We still have a catch and release program, and we don't always know if those are good or bad guys. It's difficult to coordinate with our Mexican counterparts, and many times we have no idea who made it across with the aid of the cartels." Rafael Lemaitre, senior spokesman for U.S. Customs and Border Protection with DHS, said "upon apprehension, DHS makes determinations on admissibility and custody of special interest aliens on a case-by-case basis based on a variety of factors, including legal

status, prior criminality and intelligence." In the first five years after Sept. 11, **DHS reported a 41 percent increase in arrests of illegal immigrants from countries known to have large populations of terrorists from al Qaeda or other anti-U.S. groups.** In 2008, the DHS Office of Immigration Statistics reported that federal law enforcement agencies detained 791,568 deportable aliens. According to the agency, 5,506 of them were special interest aliens. "Available reporting indicates that some alien smuggling organizations (ASOs) in Mexico specialize in moving special-interest aliens into the United States," stated a February 2010 National Drug Threat Assessment by the Department of Justice. **The DOJ threat assessment said no known terrorists had been apprehended at the U.S. border in the past five years.** That did not surprise federal law enforcement agents and intelligence officers interviewed by *The Examiner*. **They pointed out that reports on foreign nationals with terrorist ties caught at the border would not be made readily available to the public.** "As the cartels begin to realize the enormous amount of funding that's available in transporting special interest aliens, they'll do more of it," said a military official with knowledge of cartel operations. **"We need to be mindful because this type of human smuggling is a definite threat to security and human smuggling is a billion dollar industry."**<sup>n</sup> *The Examiner* first reported in March on the apprehension of 23 Somali illegal aliens in Mexico who were released in January by Mexican immigration officials. **It was later discovered by U.S. intelligence and Mexican authorities that one of the men was a member of the Somali terrorist organization al Shabab, which has direct ties to al Qaeda.** So far, the men have not been located. In 2006, a federal report documented that a man who called himself Miguel Alfonso Salinas was apprehended by chance off a deserted highway near the U.S.-Mexico border in New Mexico. He was just one of 165,000 persons from countries other than Mexico who were apprehended that year. Of those, 650 were from special interest countries. After a week of interrogations, the FBI discovered Salinas was really an Egyptian by the name of Ayman Sulmane Kamal. He was taken into custody, and no further information about him has been released by the federal government. The Kamal case was an "example of getting lucky," a U.S. official said. **"Just think, for every one that is captured, maybe two or three people from special interest nations get through. We don't know who they are or if they're planning anything -- we just keep hoping that we'll keep getting lucky"** (Carter, 2010).

**Title/Headline:** *Terrorists Crossing AZ Border Into U.S.?*

**Abstract:** On a single day in April, in a special cell block deep inside the Pinal County Jail, nearly **400 inmates sat awaiting trial or extradition after being detained trying to cross the Arizona border from Mexico. Only about half of them were actually from Mexico.** The cell block, owned by Pinal County, but contracted with the Department of Homeland Security, is a way station in the immigration process, where inmates are held after they are detained by the Border Patrol or Immigration and Customs Enforcement. But it's where the inmates are from that causes concern for some critics and lawmakers. **On that one day in April, according to records obtained by ABC 15, Homeland Security officials were holding inmates from Iran, Iraq, Afghanistan, Pakistan, Egypt, Lebanon, and the Sudan. "They're coming from all over," Arizona Senator Jon Kyl said. "And one wonders whether some of them are coming in here to commit acts of terror."** Kyl has been tracking the problem since 2002, not long after the September 11 attacks. Since that time, according to an investigation by the House Committee on Homeland Security, **intelligence officials have determined members of the terror group Hezbollah have already infiltrated the U.S. by crossing at the southern border.** ICE officials told congressional investigators, undocumented immigrants were smuggled from the Middle East to staging areas in Central and South America, before being smuggled into the U.S. **The report says officials are also concerned about Venezuela emerging as a terrorist "hub," with the government there issuing travel documents that can be used to obtain a U.S. visa.** Border patrol agents have also recovered military-style patches on clothing near the border. One patch contains the word "martyr" in Arabic. Another depicts a plane appearing to fly into sky scrapers. In 2009, according to Homeland Security documents obtained by ABC 15, ICE officials detained 45,279 undocumented immigrants classified as OTM. While the vast majority were from other Central American countries like El Salvador, Honduras and Guatemala, officials also arrested 10 undocumented immigrants from Iran, 10 from Iraq, six from Lebanon and 19 from Pakistan. **Through May of [2010], officials had detained more than 25,000 OTM border crossers.** "There's a procedure which takes place, where, in effect, if we can't send them back, they're let go," Senator Kyl said. "Obviously that creates an illegal immigration problem, but it could... create a problem of terrorism as well" (Irvin, 2010).

**Title/Headline:** *Napolitano: 'You're Never Going To Totally Seal That Border'*

**Abstract:** Department of Homeland Security Secretary Janet Napolitano, whose agency is charged with securing America's borders, told an audience in Washington, D.C., in reference to the U.S.-Mexico border, **"You're never going to totally seal that border."** Napolitano spoke and answered questions at the Center for Strategic and International Studies (CSIS) on "Securing the Border: A Smarter Law Enforcement Approach." When asked if she could give a timeline on when the border would be secured, Napolitano said, "The plain fact of the matter is the border is as secure now as it has ever been, but we know we can always do more. And that will always be the case." **"It's a big border," she said. "It's 1,960 miles across that Southwest border. It's some of the roughest, toughest geographical terrain in the world across that border. And so, the notion that you're going to seal that border somehow is something that anybody who's been involved in the actual doing of law enforcement--the front office work or the front line work of the law enforcement--would say, 'You're never going to totally seal that border.'"** Napolitano was also asked if she thought that Republicans withholding support for comprehensive immigration reform until the border is secured was political posturing. "The notion that you're gonna' somehow seal the border, and only at that point will you discuss immigration reform, that is not an answer to the problem," she said. At a town hall meeting recently, Arizona Sen. Jon Kyl told a group of constituents that in a closed-door meeting with President Barack Obama, the president told him, "The problem is ... if we secure the border, then you all won't have any reason to support comprehensive immigration reform." **"In other words," Kyl said, "they're holding it hostage. They don't wanna' secure the border unless and until it is combined with comprehensive immigration reform"** (Cassandra, 2010).

**Title/Headline:** *Mexico Thwarts Hezbollah Bid To Set Up South American Network*

**Abstract:** Mexico foiled an attempt by Hezbollah to establish a network in South America, a Kuwaiti newspaper reported.

Hezbollah operatives employed Mexicans nationals with family ties to Lebanon to set up the network, designed to target Israel and the West, the Al-Seyassah daily said. According to the report, Mexican police mounted a surveillance operation on the group's leader, Jameel Nasr, who traveled frequently to Lebanon to receive information and instructions from Hezbollah commanders there. Police say Nasr also made frequent trips to other countries in Latin America, including a two-month stay in Venezuela in the summer of 2008. Nasr was living in Tijuana, Mexico at the time of his arrest, the report said. The report follows warnings from the United States that Hezbollah and its backer Iran are stepping up operations in the region. In June, a U.S. congresswoman wrote to the Department of Homeland Security to warn that Hezbollah was increasing its presence in Central and South America. In her letter, Congresswoman Sue Myrick called on the U.S. to work with Mexican forces, as there was intelligence that Hezbollah was working in conjunction with Mexican drug cartels on the U.S.-Mexico border. **"We have seen... an increase in a wide level of activity by the Iranian government in this region," Admiral James Stavridis told the Senate Armed Services Committee. "That is a concern principally because of the connections between the government of Iran, which is a state sponsor of terrorism, and Hezbollah," he said. In February a U.S. court in Miami indicted three men for raising funds for Hezbollah, which the U.S. classifies as a terrorist organization (Haaretz, 2010).**

**Title/Headline:** *Close To Home: Hezbollah Terrorists Are Plotting Right On The U.S. Border*

**Abstract:** Speaking of the Islamist enemy cropping up in unlikely places, Iran's favorite terrorist outfit, Hezbollah - a menace to Israel and Lebanon - has been caught plotting right in our backyard. For years, experts who already have their hands full with the persistent threat of Al Qaeda have warned of the rise of Hezbollah in our midst. The day has arrived. Mexican authorities have rolled up a Hezbollah network being built in Tijuana, right across the border from Texas and closer to American homes than the terrorist hideouts in the Bekaa Valley are to Israel. **Over the years, Hezbollah - rich with Iranian oil money and narcocash - has generated revenue by cozying up with Mexican cartels to smuggle drugs and people into the U.S.** In this, it has shadowed the terrorist-sponsoring regime in Tehran, which has been forging close ties with Hugo Chavez of Venezuela, who in turn supports the narcoterrorist organization FARC, which wreaks all kinds of havoc throughout the region. Adm. James Stavridis, then head of the U.S. Southern Command, which includes Latin America, warned a Senate committee hearing: **"We see Hezbollah acting throughout the region in proselytizing, fund-raising, involved in the drug trade."** Now they are right across the Rio Grande - a stone's throw (NY Daily News, 2010).

**Title/Headline:** *Car Bomb At US-Mexico Border Kills 3*

**Abstract:** The explosion of a car bomb ramming into two police vehicles in northern Mexico has killed three people, including two policemen. Nine people were also wounded in the attack, including seven officers; AP quoted a state police officer as saying. The police official who spoke on condition of anonymity said the car had apparently been carrying some kind of explosive or inflammable device when it rammed the police pickup trucks. Mexican soldiers and law enforcement officers have been attacked with grenades and powerful rifles before but explosives have rarely been used. **According to the Associated Press, throughout the country there have been more than 23,000 killings linked to drug violence since December 2006 (Press TV, 2010).**

**Date:** August 2, 2010

**Title/Headline:** *Congressman Introduces Bill To Force Obama To Deploy At Least 10,000 National Guardsmen At Mexican Border*

**Abstract:** Rep. Ted Poe (R.-Texas), who served for 30 years as a Texas prosecutor and judge before being elected to

Congress, introduced legislation last week designed to force President Barack Obama to deploy a minimum of 10,000 National Guard troops at the U.S. Mexico border for the specific purpose of patrolling the border and intercepting aliens and smugglers attempting to cross illegally into the United States. **"The president could put more than that, but he must put 10,000,"** Poe told CNSNews.com. "The uniqueness of this is they would be paid by the federal government, because everybody says it is the responsibility of the federal government to protect the border. So the federal government will use the resources it already has to pay for those 10,000 National Guard troops, but they will be supervised by the governors of the four states on the border." Poe, who serves on the House Foreign Affairs Subcommittee on Terrorism and the Judiciary Subcommittee on Immigration, told CNSNews.com in a videotaped interview that **America was projecting such a weak image around the world in failing to protect its southern border that people were traveling from all around the world to Mexico so they could enter the U.S. illegally from there. "Every country in the world knows the United States will not protect the sovereignty of its country, and will not protect especially the southern border,"** said Poe. "So, when someone wants to come to the United States, they figure out a way to come to Mexico and then come to the United States." Poe said that the 1,200 National Guard troops that Obama sent to the 2,000-mile-long border region this summer are not actually working to secure the border. "They are not on the border, they are behind the border," said Poe. "They're doing surveillance work, guarding computers, if you will." **By contrast, the 10,000 National Guardsmen that would be deployed by Poe's bill would be charged with defending the border itself. "These troops will be actually on the border and they will do what the National Guard is supposed to do,"** Poe told CNSNews.com. The bill has 20 original co-sponsors. But, so far, has no Democratic co-sponsors. The original co-sponsors are: Rep. Lamar Smith (TX-21), Rep. Pete Sessions (TX-32), Rep. Pete Olson (TX-22), Rep. Sam Johnson (TX-03), Rep. John Carter (TX-31), Rep. Kay Granger (TX-12), Rep. Kenny Marchant (TX-24), Rep. Ralph Hall (TX-04), Rep. Ed Royce (CA-40), Rep. Joe Barton (TX-06), Rep. John Culberson (TX-07), Rep. Louie Gohmert (TX-01), Rep. Kevin Brady (TX-08), Rep. Michael McCaul (TX-10), Rep. Roscoe Bartlett (MD-06), Rep. Pete Hoekstra (MI-02), Rep. John Shadegg (AZ-03), Rep. John Fleming (LA-04), Rep. Sam Graves (MO-06) and Rep. Dana Rohrabacher (CA-46). Poe said he hopes the next Congress will act on his legislation next year (Jeffrey, 2010).

**Title/Headline:** *America's Third War: National Guard's New Mission*

**Abstract:** There are many theories on how to effectively secure the nearly 2,000-mile-long border the United States shares with Mexico. Some believe building a fence to separate us from our southern neighbor is the best route while others think adding additional surveillance equipment and Border Patrol checkpoints will help decrease the number of illegal immigrants and drugs entering America. **One thing virtually everyone close to the border security issue can agree on: America seems to be waging a third war with the Mexican cartels that will stop at nothing to smuggle humans and drugs into our homeland and the national security threat it poses.** One of the more popular ideas on how to secure the region is through the deployment of troops and creation of a strong military presence along the border. In May, **President Obama gave the green light for up to 1,200 National Guard troops to be assigned to the four southwest border states.** In late September, armed troops started trickling in and working alongside U.S. Border Patrol agents, but the ramp up period is a gradual process since it takes a great deal of time to train the soldiers for their new mission. **According to the National Guard Bureau, nearly 1,200 troops are at work on border issues as of Monday: 263 in California, 561 in Arizona, 80 in New Mexico, 284 in Texas and 10 others assigned to border issues at the National Guard Bureau in Virginia.** The deployment is expected to last one year although no official end date has been made public. **The troops are primarily being used in a supportive role by assisting the army of Border Patrol agents already covering the miles of shared border and the 42 U.S.-Mexico crossings.** Their jobs range from keeping a close eye on the border fence in search of people trying to cross illegally, to helping make apprehensions and completing paperwork. The mission is also designed to give Border Patrol some breathing room until it can hire more than 1,000 additional agents for the field. **Soldiers don't have the authority to detain a suspected illegal immigrant. They're essentially acting as extra eyes and ears for the agents and they've certainly got their work cut out for them when you consider close to 1 million illegal immigrants are estimated to attempt entry into the U.S. each year, according to Customs and Border Protection.** Since guardsmen have only been in place for a short time, it's difficult to gauge how much of an impact they're having. History shows that their sheer presence has served as a deterrent in the past. **In 2006, President George W. Bush ordered thousands of National Guard troops to the border, as part of Operation Jump Start. The program lasted two years and at its height, as many as 6,000 soldiers and airmen were deployed at one time. During that period, the number of illegal immigrant arrests went down roughly 24 percent and as much as 70 percent in some sectors of Arizona.** During that mission, soldiers not only assisted Border Patrol agents, but also helped physically build parts of the border fence and additional infrastructure. Many residents in southwest border states are grateful for the additional help and most feel the 1,200 troops are a nice start, but some living in border towns -- where violence is spilling over into their backyards -- say President Obama's administration could be doing more and devoting even more resources. **Sheriff Paul Babeu of Pinal County, Ariz., told Fox News he'd like to see a contingency of troops similar to Operation Jump Start.** Babeu said Arizona needs even more help because the state faces unique challenges since the border there is more porous thanks to the rugged Sonoran desert. Estimates say roughly half of all illegal immigrants entering the U.S. do so through Arizona, which is why Babeu is seeking more assistance. Babeu and U.S. Sen. John McCain have extended an invitation to Obama to visit the situation firsthand but the president has yet to make a trip. Babeu said far more than 1,200 troops will be needed to make a dent in the escalating war between the U.S. and the Mexican cartels. For now, many residents are excited the ball appears to be rolling in the right direction. Most understand securing the border won't happen overnight, but hope it happens sooner than later (Stegall, 2010).

**Title/Headline:** *Iranian Book Celebrating Suicide Bombers Found In Arizona Desert*

**Abstract:** A book celebrating suicide bombers has been found in the Arizona desert just north of the U.S.- Mexican border, authorities tell Fox News. The book, "In Memory of Our Martyrs," was spotted Tuesday by a U.S. Border Patrol agent out of the Casa Grande substation who was patrolling a route known for smuggling illegal immigrants and drugs. Published in Iran, it consists of short biographies of Islamic suicide bombers and other Islamic militants who died carrying out attacks. According to internal U.S. Customs and Border Protection documents, "The book also includes letters from suicide attackers to their families, as well as some of their last wills and testaments." Each biographical page contains "the terrorist's name, date of death, and how they died." Agents also say that the book appears to have been exposed to weather in the desert "for at least several days or weeks." Authorities told Fox News that there were no people in the area at the time the book was found, and no arrests have been made in connection with it. "At this time, DHS does not have any credible information on terrorist groups operating along the Southwest border," a Department of Homeland Security official said in a statement. "We work closely with our partners in the law enforcement and intelligence communities and as a matter of due diligence and law enforcement best practice, report anything found, no matter how significant or insignificant it may seem." Statements from U.S. officials, including FBI director Robert Mueller, have raised serious concerns in recent years over "OTMs" -- or illegal immigrants other than Mexicans -- who have crossed the southwest border at alarming rates. Mueller testified before the House Appropriations Committee in March 2005 that "there are individuals from countries with known Al Qaeda connections who are changing their Islamic surnames to Hispanic-sounding names and obtaining false Hispanic identities, learning to speak Spanish and pretending to be Hispanic." Just last year, the Department of Homeland Security had in custody thousands of detainees from Afghanistan, Egypt, Iraq, Iran, Pakistan, Saudi Arabia and Yemen. U.S. Border Patrol statistics indicate that there were 108,025 OTMs detained in 2006, compared to 165,178 in 2005 and 44,614 in 2004. Authorities would not release a picture of the book to Fox News, or reveal how long they believe it was lying in the desert. Immigration officials have previously discovered items along the U.S.-Mexico border from Middle Eastern origin, including Iranian currency in Zapata, Texas, and a jacket found in Jim Hogg County, Texas, that was covered in patches including an Arabic military badge that illustrates an airplane flying into a tower (La Jeunesse, 2011).

**Conclusion:** It is no wonder why the U.S./Mexican border has been left virtually open for the last 30 years, for it will serve its purpose when an alleged nuke is smuggled across the border. The only way Americans will accept the North American Union (merger of the US, Mexico, and Canada) is if a nuclear terror attack occurs and is blamed on the open border with Mexico. In order to be safe, Americans will accept anything, even at the detriment of their own Nation's sovereignty.

## The Nuclear Bible: Terrorism & Sports

**Intro:** The amount of terrorist acts at sporting events has increased tremendously in the last couple of year and is reaching a pinnacle. Starting with Black September in 1972, terrorists and their handlers appear to be salivating at the thought of a nuclear detonation within a stadium, so long as it's on LIVE TV!

## The Nuclear Bible: Sport's History of Terror

**Source:** Wikipedia

**Location:** Munich, Germany

**Alleged Terrorist(s):** Black September

**Offense(s):** Mass-Murder, Massacre, Hostage Taking

**Incident Name:** *1972 Munich Olympics Massacre*

**Abstract:** The Munich massacre is an informal name for events that occurred during the 1972 Summer Olympics in Munich, Southern Germany, when **members of the Israeli Olympic team were taken hostage and eventually murdered by the terrorist group Black September**. Members of Black September contended that Yasser Arafat's Fatah organization secretly endorsed the operation. Fatah, however, disputed the accusation. Black September called the operation "Ikrit and Biram". By the end of the ordeal, the **terrorists had killed 11 Israeli athletes and coaches and 1 West German police officer**. Five of the eight members of Black September were killed by police officers during a failed rescue attempt. The three surviving terrorists were captured, but later released by West Germany following the hijacking by Black September of a Lufthansa airliner. Israel responded to the massacre with Operation Spring of Youth and Operation Wrath of God, as well as a series of airstrikes and killings of those suspected of planning the kidnappings (Wikipedia, 2010).

**Location:** Atlanta, Georgia, USA

**Alleged Terrorist(s):** Eric Robert Rudolph

**Offense(s):** Pipe Bombing

**Incident Name:** *Centennial Olympic Park Bombing*

**Abstract:** The Centennial Olympic Park bombing was a terrorist bombing on July 27, 1996 in Atlanta, Georgia, United States during the 1996 Summer Olympics, the first of four committed by Eric Robert Rudolph. **Two people died, and 111 were injured**. Centennial Olympic Park was designed as the "town square" of the Olympics, and thousands of spectators had gathered for a late concert by the band Jack Mack and the Heart Attack. Sometime after midnight, **Rudolph planted a green U.S. military ALICE pack (field pack) containing three pipe bombs surrounded by nails underneath a bench near the base of a concert sound tower**. He then left the area. The pack had a directed charge and could have done more damage but it was tipped over at some point. **It was the largest pipe bomb in U.S. history, weighing in excess of 40 pounds**. It used a steel plate as a directional device. Investigators were later to tie the Sandy Springs and Otherside bombs together with this first device because **all were propelled by nitroglycerin dynamite, used an alarm clock and Rubbermaid containers, and contained steel plates**. Security guard Richard Jewell discovered the bag and alerted Georgia Bureau of Investigation officers; 9 minutes later, Rudolph called 911 to deliver a warning. Jewell and other security guards began clearing the immediate area so that a bomb squad could investigate the suspicious package. At 1:20 AM, the bomb exploded. An Albany, Georgia woman, Alice Hawthorne, was killed by a nail that struck her in the head. The bomb wounded 111 others. Turkish cameraman Melih Uzunoyol died from a heart attack he suffered while running to cover the blast (Wikipedia, 2010).

**Source:** TIME, Glen Levy  
**Location:** Bernabau, Spain  
**Alleged Terrorist(s):** ETA: Euskadi Ta Askatasuna  
**Offense(s):** Car Bombing  
**Incident Name:** *Real Madrid's Champions League Car Bombing*

**Abstract:** The beautiful game turned ugly in 2002 when Basque separatist group E.T.A. detonated a car bomb close to Madrid's main stadium, the Bernabau, hours before the start of Real Madrid's Champions League semi-final against arch rivals Barcelona. **The bombing came shortly after the arrest of 11 Batasuna (a political party linked to E.T.A.) members**, but it wasn't clear if it was directed against the team, which is supported by many of Spain's ruling elite. As it turned out, Madrid went on to win that season's competition. They continue to be a major force in soccer and E.T.A are still operating (Levy, 2010).

**Date:** May 8, 2002  
**Source:** TIME, Glen Levy  
**Location:** Karachi, Pakistan  
**Alleged Terrorist(s):** Unknown  
**Offense(s):** Car Bomb  
**Incident Name:** *Terror Attack at Cricket Match In Pakistan*

**Abstract:** The Australian cricketing authorities might well be tempted to declare, "told you so" in regards to their long standing **adversity to touring in Pakistan**, where they've not played since 1998 due to safety concerns. This reticence also extends to their having pulled out of a World Cup cricket match in Sri Lanka in 1996 because of the Central Bank bombing which took place that year in Colombo, the island-nation's capital. Australia's neighbor, New Zealand, has nearly suffered at the hands of terror too. In 2002, a **suicide bomb blast outside the team's hotel in the southern Pakistani city of Karachi left players unhurt but killed 11 French Navy experts**, two Pakistanis and the team's physiotherapist (Levy, 2010).

**Date:** January 30, 2006  
**Source:** World Net Daily  
**Title/Headline:** *Super Bowl Sunday: Terror Chatter High*

**Abstract:** **There is a high likelihood of a major terrorist attack next Sunday, say international terror analysts and intelligence sources.** There is increased "chatter" in the terrorist world about a major new attack in the West – a sign often leading to an impending strike; The date Feb. 5 has been specifically referenced in some of this chatter; The date is significant to Osama ; **Much of the western world will be watching television that day;** The release of al-Qaida videotapes seems to provide clues about the dates of future attacks and, in this scenario, Feb. 5 becomes the most likely near-term terror strike date. Terror attacks seem to follow the release of al-Qaida about 30 days. Some intelligence analysts are noting the significance of the release of videos recently by both Osama bin Laden and Ayman al-Zawahiri. Zawahiri released his last video Jan. 6, making Feb. 5 the most likely target date, according to past attacks. Some analysts suggest the release of communiqués by both al-Zawahiri and **bin Laden might be the precursor to a mega-attack – something even rivaling Sept. 11 in scope and devastation.** That, suggests some analysts, makes Feb. 5 a likely target date. Interestingly, it is also a significant date to bin Laden. Feb. 5, 1989, was the day the last Soviet troops withdrew from Kabul, Afghanistan, signaling their defeat at the hand of the mujahedeen. Kabul was the capital of Osama's adopted country and was a major win for him and Islam. Significantly, perhaps, in bin Laden's audio release he referenced the U.S. withdrawing from Iraq and Afghanistan. **It also happens to be Super Bowl Sunday, when the eyes of the entire world will be watching America.** Authorities in Detroit, where the Super Bowl will be played, are certainly taking the threat of terrorism seriously. **According to the FBI and Detroit police, the game will be the focal point of one of the largest security operations in U.S. history, guarding against any threats to Super Bowl XL and aided by more than 50 federal, state and local law enforcement agencies. Including private security guards, there will be about 10,000 security personnel on duty, more than for any other one-day event in U.S. history. Radiation detectors will be stationed near the stadium. SWAT teams, bomb removal and other specialized law enforcement officials will be on hand. Despite the recent taped messages, authorities say there are "no credible threats against the Super Bowl" (World Net Daily, 2006).**

**Title/Headline:** *German Official Says World Cup Terror Attack Narrowly Avoided*

**Abstract:** German security authorities were proud of having pulled off a safe and successful 2006 Soccer World Cup. Now a German security official has revealed that a major attack on the tournament may have been averted -- but the suspect got away. Ever since the 2006 World Cup came to an end, Germany has been basking in the glow of having pulled off a wildly successful tournament. **But according to Bavaria's interior minister, it almost ended in explosive failure. Joachim Herrmann, of the**

conservative Christian Social Union, told German television news channel N-TV that police foiled a terror attack planned to be carried out in Munich on the first day of the World Cup in June 2006. He said that the public was deliberately not informed of the possible threat at the time to prevent panic. According to the station, a spokesman for the **Bavarian Interior Ministry said that police began intensive observations of a lone man thought to be "associated with Islamist extremism" who was noticed acting suspiciously near Munich's Allianz Arena soccer stadium.** In the course of the surveillance, according to the spokesman, the suspect left Germany, perhaps as a result of growing suspicious that he was being watched. The spokesman did not reveal the man's nationality or current place of residence. **The man was thought to be a member of a group that had cased the arena prior to the games,** according to the *Süddeutsche Zeitung*. Herrmann made the comments in the US, where he is holding a round of meetings this week with the FBI, the CIA, the US State Department, the Pentagon and the Department of Homeland Security to discuss security issues, exchange information about suspected terrorists and strengthen terror-prevention ties between the countries. Herrmann delivered a speech to the German Marshall Fund Foundation Thursday in Washington, D.C., in which he warned of the "danger of attacks from home-grown networks" and the "formation of parallel societies in large cities and urban areas." "We can't just ignore the fact," Herrmann said, "that there is drastic distance between some Muslims and our system of values" (Spiegel News, 2008).

**Source:** NBC Sports

**Title/Headline:** *Grocery Store Clerk Arrested In Stadium Hoax*

**Abstract:** 'Dirty bombs' threat against stadiums was inspired by 'writing duel'. A 20-year-old grocery store clerk who authorities say amused himself by posting prank Internet warnings of terrorist attacks against NFL stadiums was arrested Friday on federal charges that could bring five years behind bars. **Jake J. Brahm was accused of writing that radioactive "dirty bombs" would be detonated this weekend at seven football stadiums.** He admitted posting the same threat about 40 times on various Web sites between September and Wednesday, authorities said. The Wauwatosa man surrendered to federal authorities and appeared in court in Milwaukee later in the day. **"These types of hoaxes scare innocent people, cost business resources and waste valuable homeland security resources. We cannot tolerate this Internet version of yelling fire in a crowded theater in the post-9/11 era,"** said U.S. Attorney Christopher Christie in Newark, N.J., where Brahm was charged in a sealed complaint. **One of the stadiums mentioned was Giants Stadium in East Rutherford, N.J. Brahm was charged with making a terrorist threat over the Internet, which carries a maximum five-year prison sentence and \$250,000 fine.** When the potential sentence was read in court Friday afternoon, his mother, Valerie Brahm, with whom he lives, closed her eyes and put her hand over her mouth. Richard Ruminski, the FBI agent in charge of the Milwaukee office, said Brahm thought posting the threats would be funny. **"As I understand it, Mr. Brahm had put out this threat thinking it was so preposterous that no one would take it seriously,"** Ruminski said. "Unfortunately, he was wrong." The warnings briefly set off a scare this week, before federal authorities announced the warnings were a hoax. An FBI official in Washington, who spoke on condition of anonymity because the case is still under investigation, told **The Associated Press that Brahm acknowledged doing it as part of a "writing duel" with a man from Texas to see who could post the scariest threat.** One of the threats, dated Oct. 12, appeared on the Web site "The Friend Society," which links to various online forums and off-color cartoons. Its author, identified in the message as "javness," said that **trucks would deliver radiological bombs Sunday to stadiums in Miami, Atlanta, Seattle, Houston, Cleveland, Oakland, Calif., and the New York City area, and that Osama bin Laden would claim responsibility.** Erik Vasys, an FBI spokesman in San Antonio, said there would be no charges against the Texas man because he did not take part in the writing of the threats (NBC Sports, 2006).

**Source:** National Terror Alert, U.S. Department of Homeland Security (DHS)

**Title/Headline:** *Threat Level Raised For Super Bowl*

**Abstract:** The National Football League has boosted the law enforcement budget and heightened the security threat level for Super Bowl 41 because of terrorism fears. The Super Bowl has been raised to a level one national security event, putting it on par in terms of manpower and resources with the US President's State of the Union speech and the 2002 Salt Lake City Olympics. **"We consider the Super Bowl so high profile that we see it as attractive to terrorists,"** said Milt Ahlerich, NFL vice-president of security.

The last Super Bowl to be given a level one security designation was the 2002 New Orleans Super Bowl held three months after the September 11, 2001, terrorist attacks upon New York and Washington (DHS, 2007).

**Date:** January 21, 2008

**Source:** National Terror Alert, U.S. Department of Homeland Security

**Title/Headline:** *Super Bowl Security Described As Unprecedented*

**Abstract:** Security for Super Bowl XLII, to be played at the University of Phoenix Stadium Feb. 3, is being described as “unprecedented,” and will include both covert and overt measures like ATF bomb-sniffing dogs trained to ferret out liquid explosives. Although there is no specific terror threat, security officials are concerned due to the high visibility of the game and the propensity of al Qaeda to strike such targets. But the federal government’s terrorism threat assessment of the upcoming game between the New England Patriots and New York Giants outlines concerns about stolen official law enforcement credentials, uniforms, weapons, and other equipment that could be used to “infiltrate” the stadium complex to carry out an attack. “High-profile” events like this, which the Arizona Counterterrorism Information Center said is expected to draw over half-a-million visitors, “make [them] a desirable target for domestic or international terrorists,” the Department of Homeland Security (DHS) threat assessment says. While the assessment makes clear that the Intelligence Community “has not identified a credible terrorist threat to Super Bowl XLII and its related events,” one of the three “key findings” of the nine-page threat assessment, a copy of which was obtained by HSToday.us, is that “the threats of greatest concern” during events like this “include individuals impersonating law enforcement and other security personnel and insiders to facilitate attacks.” “Numerous thefts of government and law enforcement property that could be used to facilitate unauthorized entry have been reported in Arizona,” the assessment points out. “Since October 2004 the Arizona Counterterrorism Information Center has received more than 300 reports of thefts from fire, first responder, military, and police personnel, including from those in the Phoenix area” (DHS, 2008).

**Date:** January 25, 2008

**Source:** Jihad Watch, Audrey Hudson

**Title/Headline:** *Super Bowl Deemed A Target In Federal Threat Assessment*

**Abstract:** The upcoming Super Bowl game will be a desirable target for terrorists, according to a threat assessment by federal security officials, which outlines several scenarios of possible attacks and security precautions for the Feb. 3 event. “Among the threats of greatest concern to high-profile events like the Super Bowl are the placement of explosive devices in heavily trafficked areas in and around the event site, to include individuals impersonating law enforcement and other security or service personnel and insiders to facilitate attacks,” the threat assessment said. “Al Qaeda and other Islamic terrorists may view sporting events as acceptable targets: the al Qaeda Training Manual specifically lists ‘... blasting and destroying the places of amusement, immorality, and sin ... and attacking vital economic centers’ as a required mission of the al Qaeda military organization,” the assessment said. “The Super Bowl’s stature as a major media event probably increases its attractiveness to homegrown terrorists, whether acting alone or as part of a group, who understand the economic as well as symbolic importance of the game and surrounding activities to many in the homeland,” the report said. FBI spokesman Richard Kolko said threat assessments are prepared for every major national security event as a “useful method of sharing information among federal and state law enforcement officers.” “We have no significant threats at this point, but certainly an event of this size is a viable target and any threat will be taken seriously,” he said. “It is important to remember that terrorists are trained to ‘blend in’ and assimilate to their surroundings,” the center said (Hudson, 2008).

**Source:** Thaindian News

**Title/Headline:** *Terror Attack On 2006 World Cup Was Averted'*

**Abstract:** Berlin, March 29 (DPA) German security forces had scotched possible terrorist plans to attack the Munich stadium on the

occasion of the opening game of the 2006 football World Cup, Bavarian Interior Minister Joachim Herrmann has claimed. "People were observed who were quite clearly monitoring the stadium with the possible intention of carrying out an attack," Herrmann told national commercial news broadcaster n-tv, acknowledging the incident for the first time. One person regarded as a potential security threat had been deported, he said. News of the possible threat had been kept from the public "because we did not want to spread unnecessary fear", Herrmann said. Germany beat Costa Rica 4-2 in the June 19, 2006, opening game of the tournament that passed off without incident and was seen as a major public relations success for Germany (Thaindian News, 2008).

**Date:** April 6, 2008  
**Source:** BBC  
**Title/Headline:** *China 'Fails Olympic Terror Plot'*

**Abstract:** China says it has cracked a terror plot to kidnap athletes, journalists and tourists at August's Beijing Olympics. The security ministry said 35 arrests had been made in recent weeks and explosives seized in the north-western Xinjiang province. It said 10 others were held when police smashed another plot based in Xinjiang back in January to disrupt the Games. The province is home to many Muslim Uighurs, some of whom want independence in the region they call East Turkestan. **Uighur activists have accused the Chinese authorities of fabricating terror plots to crack down on the people of the region and prevent them airing legitimate grievances.** Thursday's development was announced by a Ministry of Public Security spokesman at a news conference. Wu Heping was quoted by AFP news agency as saying: **"The violent terrorist group plotted to kidnap foreign journalists, tourists and athletes during the Beijing Olympics."** Mr Wu said two terror rings had been smashed by the authorities and that militants had planned to launch attacks to disrupt the Olympics from next month. In recent weeks, he said, **police had seized nearly 10kg (22lb) of explosives and "jihadist" literature during raids in Xinjiang's capital, Urumqi.** He said the militants had sought volunteers to carry out suicide bombings in Urumqi and other Chinese cities. Mr Wu also provided more details on another alleged plot, which the authorities said they had smashed last month. **He said those militants had planned to attack hotels and government offices in Beijing, Shanghai and other cities. Poisonings and remote-control bombings were planned and 13 practice explosions had already been carried out,** he said (BBC, 2008).

**Title/Headline:** *Stadiums And Terrorism*

**Abstract:** The public's right to know or the public's right to be safe? Preserve civil liberties at all costs or err on the side of caution? These questions, honestly asked, are at the heart of debates over how best to preserve both our safety and our liberties in an age of terrorism and violence. Some time ago, an ideal test case for these questions played out here in Texas, where the Dallas Cowboys tried to fight requests (that entered the legal system and fast became demands) for public release of the plans for their new \$650 million stadium in Arlington. **Their rationale? Both security and business concerns. The problem? At least \$325 million, and likely a lot more, is coming out of taxpayer pockets, and the city used eminent domain to force homeowners to sell their property to make way for the new stadium.** Whoever has their name on the lease, the stadium is in many ways public property and should be considered only nominally the Cowboys' property. **The Cowboys and their advocates argued that both proprietary business interests and security concerns should have allowed them to keep the information secret.** Yet, for the public, the Cowboys sacrificed their proprietary business claims as soon as they stuffed their snouts in the public trough. **The Cowboys' claim so reeked of arrogance that it almost overwhelmed all of the other arguments about security. It is increasingly common for professional sports teams to suckle at the public teat and then turn around and pretend that they owe that same public nothing because they are fundamentally engaged in private enterprise.** Billionaire owners want to have the public pay for their opulent facilities, in which the former will charge exorbitant prices for tickets and concessions. The public is slowly learning, just like the poor guy who stands in line at halftime to spend \$60 for a gelatinous pile of food and drinks, that there is no such thing as a free lunch. Or a half-billion dollar stadium. **Stadiums on game day or concert night are among the most vulnerable targets for terrorist attacks.** But the other claims, those tied to security, are less temporal and thus gave pause. After all, we now know the plans for the stadium, but security will be an enduring concern. **I've argued for years, even before 9/11 and the occasional recent news of potential attacks at football games (always revealed to have been a hoax, but such hoaxes still remain all too credible), that stadiums on game day or concert night are among the most vulnerable targets for terrorist attacks:** tens of thousands of people in a celebratory mood, unwary and focused on something else; screaming crowds; loud public address announcers; amps at rock shows; lots of drunk people; showy but largely perfunctory security. Providing diagrams and blueprints to terrorists, whether Islamist or of the home grown variety (Many in the U.S. seem to have forgotten about the Eric Rudolph, Ku Klux Klan, Tim McVeigh, Unabomber, Charles Whitman types), does appear shortsighted at first blush. The public does not have the right to know everything. **Then again, someone with malicious forethought can take plenty of time to plan an attack upon an open stadium.** Providing diagrams that, once a stadium opens, will be available anyway hardly seems like a serious breach of either public safety or security. **The danger will not come from terrorists simply knowing a stadium's layout, however essential that might be to a planned attack, but rather from terrorists who are able to identify and exploit weaknesses and security flaws.** In terms of odds, I would surmise that an attack at a big game will more likely come from someone wielding a gun than someone wielding a half-empty bottle of water. **Texans take football seriously. They take travel seriously. They take terrorism seriously.** But there is a difference between serious and foolish. The Cowboys finally released the plans to the enormous new stadium, as was inevitable. Thus far, nothing bad has happened to Jerry Jones' gleaming jewel. **And if terrorists ever do attack the new stadium, the blame will fall on our scattershot, improvised, shoddy policies and lack of foresight because we were preparing for the last attack rather than the next one.** Derek Charles Catsam is an associate professor at the University of Texas of the Permian Basin. He has been a fellow with the Foundation for the Defense of Democracies, a Washington-DC- based anti-terrorism organization (Catsam, 2008).

**Title/Headline:** *No Credible Terror Threats Seen For Super Bowl*

**Abstract:** A U.S. intelligence report says there is no credible threat of terrorist attacks at the Feb. 1 Super Bowl, but police said that visitors should still expect the type of heavy security typical of every Super Bowl since the Sept. 11, 2001, terrorist attacks. While no specific threat was identified, a joint FBI and Homeland Security intelligence assessment obtained by The Associated Press cautions that Raymond James Stadium, the Super Bowl site, does not have the typical security features of permanently secure buildings, such as jails or military bases. However, the report noted, **"the visible presence of hundreds of well-equipped security officers, standoff barriers and other security measures likely will serve as deterrents to attack."** Tampa police spokeswoman Laura McElroy said Raymond James Stadium is as secure as any other NFL venue and noted that local law enforcement is accustomed to securing the stadium and keeping large crowds safe. **"On Super Bowl Sunday, the safest place in the country will be inside Raymond James Stadium or inside the security footprint of the Super Bowl,"** McElroy said. She said local officials have been working with the Department of Homeland Security and other agencies on the security plan for the past two years. **A litany of state and federal agencies are assisting local law enforcement, but McElroy declined to provide numbers of officers involved or other specifics of the plan for security reasons.** A spokeswoman for the Super Bowl Host Committee referred all security questions to McElroy. A similar security report typically has been issued for the event in recent years. The federal report, dated Tuesday, said **officials are also concerned that terrorists or criminals could impersonate government or military officials because some Florida law enforcement badges and uniforms were stolen in 2008.** The report says there is no credible information about impersonation plots. **The report referred to a large number of credentials, uniforms sets and other law enforcement equipment that went missing last year from the Hillsborough County Sheriff's Office, which patrols unincorporated areas around Tampa.** The Super Bowl is one of the biggest television events of the year, and more than 100 million people in 232 countries are expected to watch, the assessment said. **Because of the high profile nature of the event, intelligence officials say they cannot discount the potential for a terrorist attack.** Terrorists are expected to continue to see stadiums and arenas as potential targets, according to a March 2008 intelligence assessment. **"Al-Qaida could meet its objectives of mass casualties, economic damage, and psychological impact with an attack against a stadium or arena during an event in the United States,"** the 2008 assessment said. The Federal Aviation Administration plans to issue a temporary flight restriction in the area around the Tampa stadium on Feb 1. The threat assessment says the regional bus system will not provide public transit to the stadium on game day. In addition, **the Bureau of Alcohol,**

Tobacco, Firearms and Explosives is providing advanced training for local Florida bomb-sniffing dogs in preparation for the event. The Super Bowl threat assessment is based on information from local law enforcement, the FBI, Homeland Security Department, National Counterterrorism Center, United States Northern Command, National Geospatial-Intelligence Agency and the Florida state intelligence fusion center (NBC Sports, 2009).

**Title/Headline:** *NFL Exempt From Terrorism Lawsuits*

**Abstract:** The National Football League and dozens of other companies and organizations have won exemption from lawsuits under a post-9/11 law that prohibits them from being sued if terrorists attack a site they are protecting. The law, called the SAFETY Act (Support Anti-terrorism by Fostering Effective Technologies), aims to help security providers by guaranteeing they will not pay any claims that terror victims might file after an attack. The law was created in 2002 in response to multibillion-dollar lawsuits filed after the 9/11 attacks that left companies afraid they would be sued if security equipment failed to stop terrorists. **The protection extends only to companies' services or equipment that the Homeland Security Department has approved as being effective in anti-terrorism.** Among those with top-tier protection is the NFL, which in December received liability exemption against future claims stemming from an attack at any of the nation's football stadiums. The law requires a court to dismiss lawsuits against companies whose products have Homeland Security's highest reliability rating. The NFL got the protection after the government approved the league's nine-page stadium-security guidelines. The benefit to the NFL is "fairly obvious," said NFL security chief Milt Ahlerich. **"An attack from a terrorist organization could put us out of business."** League guidelines, developed shortly after 9/11, include digital security cameras in stadiums, quick searches on entering spectators and barriers that keep cars and trucks 100 feet from a stadium (Frank, 2009).

**Title/Headline:** *Gunmen Shoot Sri Lanka Cricketers*

**Abstract:** Gunmen attacked a bus carrying the Sri Lankan cricket team on its way to play in the Pakistani city of Lahore. At least six policemen escorting the team bus were killed, along with a driver, and seven cricketers and an assistant coach were injured. Pakistani officials said about 12 gunmen were involved and grenades and rocket launchers have been recovered. Officials said the incident bore similarities to deadly attacks in Mumbai in India. **The Mumbai attacks were blamed on Pakistan-based Islamic militants.** Pakistani cricket was already suffering from serious security concerns. The Pakistani politician Imran Khan, a former captain of the country's cricket team, said the Sri Lankan visitors had been given inadequate protection. **"This was one of the worst security failures in Pakistan,"** he said. **"The Pakistan government guaranteed the Sri Lankan cricket team that they would provide them security." None of the attackers was killed or apprehended at the scene.** Grenades and rocket launchers were found there, police said, and a manhunt is under way. But a Pakistani minister, Sardar Nabil Ahmed Gabol, reportedly told privately owned Geo TV **that evidence suggested the attackers came across the border from India.** He said the assault came in reaction to the Mumbai attacks, and was a **"declaration of open war on Pakistan by India"** (BBC, 2009).

**Title/Headline:** *Police Prep For Stadium Security Alert*

**Abstract:** Arlington - North Texas visitor, Mamie Dorris stood outside the new Cowboys Stadium in Arlington snapping pictures. **She didn't know federal officials had issued a terrorist security alert for stadiums. "That is very unnerving", says Dorris. Dorris knows the horror of a terror attack.** She survived the 9/11 attack on the pentagon, after a plane piloted by al-Qaida terrorists crashed directly into her office. She says no threat can be taken lightly. **"I think anytime there is a threat on our grounds, it needs to be taken seriously".** Police say they are taking notice of several security alerts issued by the FBI and Homeland Security. **Officials say terrorists may attempt to use homemade backpack bombs, car bombs or even airplanes to attack crowded, public places. Arlington police say they received the alerts and are taking that into consideration to insure the safety of fans during upcoming Cowboys games at the new stadium.** Already on game days, all bags are searched. Authorities use bomb-sniffing dogs to inspect vehicles parked close to the stadium. Security experts say they aren't surprised by the stadium alerts. **"Anytime you have a large venue event that you have a lot of people then it will be attractive to terrorists",** says Former FBI Special Agent in Charge, Danny Defenbaugh. The former federal agent says since 9/11 busy public places, like stadiums have been on the terror radar. Defenbaugh says proper training for event staff members is important to protect against the threat of attack. **"They need to be suspicious and look for unusual behavior",** says Defenbaugh. **A few months ago, Arlington Police and several other agencies conducted a massive training exercise at the new stadium, to test out their preparedness for a real emergency.** Dorris says that everyone should learn to be on alert at all times and report anything suspicious. She says she is living proof that an attack can happen to anyone. **"I was just fortunate it wasn't my time"** (Tongish, 2009).

**Source:** CBS 11 TV News, Jay Gormley

**Title/Headline:** *Cowboys Stadium Security Heeding FBI Alert*

**Abstract:** Counter-terrorism officials have issued security bulletins about possible terrorist attacks on sports stadiums, entertainment complexes, and hotels throughout the United States. The FBI and Homeland Security Department sent out two bulletins, with no specific details. However, Arlington police say they're taking the warning seriously. Neither police nor stadium officials

will give specifics to any changes or improvements being added for this Monday night's game between the Dallas Cowboys and the Carolina Panthers. **Some security experts say there can be a disadvantage to securing a brand new stadium. Former Dallas FBI agent Danny Defenbaugh says both employees and security officers are still learning the 'ins and outs' of the new Cowboys facility.** "You can look at the analogy of the old Texas Stadium; where the engineers knew if a stone was out of place in the boiler room," said Defenbaugh. **"But here [at the new stadium], it's a learning experience for everyone. I think that's one reason why they had the crisis management exercise six to eight months ago; so they could have that familiarity."** When asked about the federal warnings Arlington police issued the following statement: **"The Arlington Police Department has been made aware of the alert and understands that no specific venues or geographic regions have been targeted. But we are still taking the information seriously and it is being considered as we prepare for our next football game at Cowboys Stadium on Monday"** (Gormley, 2009).

**Title/Headline:** *U.S. Terror Alert Expands To Transit And Stadiums*

**Abstract:** The U.S. government expanded a terrorism warning from transit systems to sports stadiums, hotels and entertainment complexes this week, as federal investigators look into a possible plot to set off bombs hidden in backpacks. **Federal bulletins were sent to police departments this week saying that while no specific plots against stadiums and other entertainment venues were known, police officers and private companies were cautioned to be vigilant. The warnings come after the arrest on Saturday of three men, including Najibullah Zazi, a 24-year-old Denver airport-shuttle driver who authorities say received al-Qaeda training in Pakistan and who was found entering New York City two weeks ago with bomb-making instructions on his computer.** Zazi, his father and a local imam in New York face charges of lying to authorities in a continuing terrorism investigation. **'Something very organized was underway'.** Authorities claim in court documents that Zazi played a direct role in the alleged terror plot, although officials have said they don't know the timing or location of any planned attack. **"It's not totally clear to us at this point what it is they had in mind, though I think it is clear that something very serious and something very organized was underway,"** Attorney General Eric Holder told CBS. The bulletins to stadiums note that al-Qaeda's training manual makes specific instruction for "blasting and destroying the places of amusement, immorality and sin ... and attacking vital economic centers." **Sports officials from the major hockey, football, baseball and basketball leagues in North America said they were confident they had adequate measures in place to thwart a potential attack.** "We are aware of the memos from the federal government, including that there is no information specific to any sports stadium," National Football League spokesman Greg Aiello said. "This underscores the high levels of stadium security that are maintained and will continue to be maintained at every NFL game for the safety of our fans and teams" (CBC News, 2009).

**Title/Headline:** *Xmas Bomb Attempt Prods Super Bowl Security Change*

**Abstract:** Dozens of federal agencies, including the FBI and the Bureau of Alcohol, Tobacco, Firearms and Explosives, local police and two private security firms were handling security for the Super Bowl, and that Al Qaeda training manual lists "blasting and destroying the places of amusement, immorality, and sin" as one of the terrorist group's missions. That assessment also says a jihadist message board carried a posting in 2006 with information about how to **conduct an attack on a sporting event** using more than one suicide bomber, inside the venue and near exits. The FBI and Miami-Dade Police Department are running separate centers to collect and disseminate intelligence, but that **might not uncover a person acting alone** — the kind of threat that most worries the FBI's Gillies and James Loftus, interim director of the Miami-Dade Police Department. "I'm not an alarmist, but **we worry about the lone guy** with the rifle. That's where our attention is," Loftus said. "That's the guy who is not e-mailing, who is not networking." Loftus said another concern is someone **who might try to use a false police or firefighter uniform to gain unauthorized access** (Fendrich, 2010).

**Date:** January 31, 2010

**Source:** CTV Globemedia, Associated Press, Curt Anderson

**Title/Headline:** *F-16s, Bomb Dogs Among Security Measurers At The Super Bowl*

**Abstract:** Security operation protecting the Super Bowl consisted of Air Force F-16s patrolling the skies above Miami on game day to a buffer zone extending at least 100 meters out from the stadium. "We collect intelligence from all over the world and then we disseminate it, so that everyone knows what's going on," said William Maddalena, a top Miami FBI official in charge of special events. "We'll have daily briefings to put out the latest information we have." But all that intelligence-gathering may not uncover **a single person acting alone who wants to attack or disrupt the game** or surrounding events. James Loftus, interim director of the Miami-Dade Police Department, said that's what keeps Super Bowl security planners awake at night. **"The biggest problem that we have is the lone wolf. They operate by themselves. They operate in seclusion. They don't discuss their plans or potential threats to anyone else,"** John Gillies, special agent in charge of the FBI's Miami field office, said in an interview (Anderson, 2010).

**Date:** February 2, 2010

**Source:** CBS News, Associated Press

**Title/Headline:** *Bomb Dogs, Robots Ready For Super Bowl*

**Abstract:** **Several dozen bomb-sniffing dogs, robots that defuse explosives and police bomb squads are being deployed to protect the Super Bowl.** The federal Bureau of Alcohol, Tobacco, Firearms and Explosives showed reporters how the dogs can detect even minute amounts of bomb compounds. Four dogs easily found a small amount of residue hidden in a closed car trunk. **Miami ATF chief Hugo Barrera says the dogs can smell 19,000 different bomb components.** The ATF puts them through a 16-week training course before they're ready for duty. **Some of the ATF dogs deployed for the Super Bowl are veterans of the Iraq and Afghanistan wars.** Dogs from the Miami-Dade Police Department and Broward Sheriff's Office also are on duty for Sunday's game. After touring a rain-soaked Sun Life Stadium on Monday, U.S. Homeland Security Secretary Janet Napolitano said that preparations are in place to thwart any terrorist threat or safety problem at the Super Bowl. **"We are doing everything we can think of in preparation to make sure it is a great event,"** Napolitano told reporters. "I'm here today to see the operation myself. I thought it was important to get down here." Milt Ahlerich, the NFL's vice president for security, said **Napolitano's tour of the stadium** in nearby Miami Gardens **was the first time a Homeland Security secretary had visited a Super Bowl site before game day.** **About 1,000 federal, state and local law enforcement and security personnel are working Sunday's game** and events leading up to it, said James Loftus, director of the Miami-Dade Police Department. **Even though the FBI reports no credible threat against the Super Bowl, al Qaeda and other terror groups have frequently expressed interest in attacking a major U.S. sporting event.** **"Rest assured, we're going to look out for you,"** Loftus said of what fans attending the game can expect. **"We do this stuff week in and week out, and we're good at it."** The nerve center for security is the FBI-run Joint Operations Center, which includes representatives from 64 agencies at all levels of government, said John Gillies, agent in charge of the FBI's Miami field office. He said preparations have included intensive training and tabletop exercises involving various

threat scenarios. "There's security that the public will see, and there's security the public will not see," Gillies said. Fans themselves can also play a role by reporting any suspicious activity or unattended bags, Ahlerich said. **And Napolitano said there will be a number flashed on screens at the stadium where fans can send a text message if they see anything amiss** (CBS News, 2010).

**Date:** February 3, 2010

**Title/Headline:** *Security Will Be High At The 2010 Super Bowl*

**Abstract:** If I were attending Super Bowl XLIV, I'd feel security measures the NFL has taken, in spite of a nerve-racking statement from someone who, thank goodness, has no affiliation with the NFL, yet pretends to know something about security. I think that NFL vice-president of security Milt Ahlerich, will do a fine job. Ahlerich had this to say: **"There won't be any problems,"** Ahlerich said. "This security plan is very robust and very well coordinated. We have a lot of confidence in how it is organized and how well it will be executed." What scares the hell out of me is this statement: **"We're looking forward to a great and safe Super Bowl 44."** **"We're grateful for the remarkable cooperation we've seen up and down the line. We're doing everything we can in preparation to make sure it's a great event."** That statement was made by Department of Homeland Security head Janet Napolitano. The same Janet Napolitano who, when a jihadist set his ass on fire trying to blow up an airplane on Christmas day, said **"the system worked."** **Football fans can, however, breathe a sigh of relief, knowing that Napolitano is not in charge of overseeing security measures at the world's biggest one-day sporting event.** Because if Napolitano paid as much attention to potential security threats as she did to President Obama's State Of The Union address, this is what we'd see (The Freedom Medium, 2010).

**Title/Headline:** *Super Bowl Security Enhanced By FBI, ATF K-9 Units*

**Abstract:** Not everyone participating in this year's Super Bowl is a football player. **The Bureau of Alcohol, Tobacco Firearms and Explosives (ATF) and the Federal Bureau of Investigation have fielded their best players to help prepare for a safe and secure Super Bowl XLIV.** These pros include ATF K-9 explosives detection teams that have been deployed to Miami from around the country. The K-9 teams are working side-by-side with other federal, state and local law-enforcement officers to keep the football teams and fans safe throughout this event. The Federal Bureau of Investigation is continuing its preparation for the Super Bowl. **"Our tactical teams have been training throughout the year for different scenarios -- active shooter, bombs, and other hazards related to chemical, biological, radiological, or nuclear threats,"** said John Gillies, the FBI special agent in charge. **"We have hundreds of agents and professional staff prepared to respond.** For example, we have SWAT, Evidence Response Teams, and hostage negotiators to name a few. Many have traveled from other FBI offices across the country," he said. **"The K-9 teams that are here in Miami for the Super Bowl are the best of the best,"** said Hugo Barrera, Special Agent in Charge of the ATF Miami Field Division. **"Like the football teams that will be playing in the Super Bowl, these handlers and their K-9 partners have been training and preparing all year for this event,"** Barrera further stated. "We are proud to say that the only thing the fans have to worry about is whether their team wins or loses." One of the teams working in Miami is ATF Special Agent Canine Handler L.A. Bykowsky and her new partner "Darel", a 16-month-old yellow Labrador retriever. SACH Bykowsky and K-9 Darel are based in South Florida and recently returned from Virginia, having successfully completed four months of training at ATF's Explosives Detection Canine Handler School. **They will assist at this year's Super Bowl to help locate any type of explosive, which may be in close proximity to the stadium or any other venue relating to the big game.** ATF has used its explosives detecting canines at other special events including the Republican and Democratic National Conventions, the Presidential Inauguration, the G-8, the World Series, NASCAR, the 2002 Salt Lake City Olympics **and of course, the Super Bowls** (Kouri, 2010).

**Title/Headline:** *Texas-Sized Super Bowl Terror Target?*

**Abstract:** Terror has become a backyard issue for North Texans. Mass murder occurred at Fort Hood and a would-be terrorist was recently arrested for an alleged downtown Dallas plot. Both incidents have people wondering: what's next? One possible target: next year's Super Bowl in Arlington. Stadium security is starting from the sky with no fly-zones and security sweeps for anyone attending the game. An estimated 1,500 private aircraft will touch down for the Super Bowl. They'll be carrying titans of industry on corporate jets as well as wealthy fans from around the world. No matter who they are, if they don't get to the airports near stadium by 4 p.m. on Super Bowl Sunday, they'll be locked out of the skies. The FAA's enforcing a no fly zone until midnight, within a 10 mile radius of the stadium. **It's also restricting flights up to 30 miles away.** Everyone from dignitaries to assistants will have to go through a security screening to get back on their planes. On the ground, representatives of major area law enforcement agencies will be in undisclosed locations ready to direct any response needed with massive manpower. **"Every officer in North Texas will somehow be connected to the Super Bowl on game day,"** noted Arlington Police Chief Theron Bowman. Cities will direct their own security, but they'll also take direction from the Executive Public Safety Committee made up of police chiefs from Arlington, Dallas, Irving, and Fort Worth, along with the FBI Chief Bowman addressed North Texans sensitive to possible threats after enduring both the Fort Hood killings and the recent alleged terrorist plot against a downtown building. **"I can assure you although while we are aware of what's going on we are working diligently to ensure this is the absolutely safest place it can possibly be,"** said Bowman. "We don't worry about those scenarios here." Chief Bowman tells us metroplex police chiefs have been planning the security of the Super Bowl since the bid was first announced (Bartlett, 2010).

**Title/Headline:** *Pittsburg Marathon Bomb: Explosive Device Found On Course Of Pittsburg Marathon*

**Location:** Pittsburg, Pennsylvania

**Alleged Terrorist(s):** Unknown

**Offense(s):** Attempted Bombing

**Incident Name:** *2010 Pittsburg Marathon Bombing Attempt*

**Abstract:** A suspicious device near the finish line of the Pittsburgh Marathon prompted police to briefly stop the race after it had begun. The device was disabled and police said it was not believed to have been an actual explosive. **The device, in a small microwave oven, was spotted Sunday morning on the sidewalk next to the Greyhound bus station after the race leaders had finished the course,** police Lt. Kevin Kraus said. The bomb squad determined there were contents that resembled an explosive, and the area was evacuated, Kraus said. He declined to describe the materials that concerned authorities pending a further evaluation. **"Certainly, from what we did see on the X-rays, we were highly concerned,"** he said. **The disruption came a day after a car-bomb scare in New York emptied Times Square, clearing thousands of tourists from the streets for 10 hours.** "After we witnessed what happened in New York City last night, we took (this) very seriously," Police Chief Nate Harper said. Kraus said police stopped the 26.2 mile race in the area for 10 to 12 minutes. The competition resumed after the bomb squad used a robot to disable the device and the area was cleared shortly before 11 a.m., he said. **"At this point, we believe it was not an actual explosive device, but we are still evaluating the microwave and its contents,"** Kraus said. He said surveillance cameras in the area were being examined to try to find out who put the device there (Yates, 2010)

**Location:** Tal Afar, Iraq

**Alleged Terrorist(s):** Unknown

**Offense(s):** Car Bombing

**Incident Name:** *2010 Iraqi Football Stadium Bombing*

**Abstract:** A suicide bombing at a football stadium in northern Iraq has killed 10 people and injured 120 others, police say. An attacker detonated explosives hidden inside a vehicle at the entrance to the stadium in Tal Afar, a mainly Shia Turkmen town west of Mosul. **"Many people were gathered to watch the match,"** Hussein Nashad, who attended the game, told the AFP news agency by telephone from a hospital in Tal Afar where he was being treated for shock. **"We heard a loud explosion and the people behind me shielded me from the shrapnel.** I ran away, but then I heard someone shout 'Allahu Akbar', and then there was another explosion," he said. Another spectator, Ali Jaafar, told the Reuters news agency: **"Suddenly we saw a pick-up in the middle of the field. The players were suspicious so they ran and as expected it turned out to be a suicide car bomber. The spectators began to run away but two suicide bombers were in the crowd"** (BBC, 2010).

**Title/Headline:** *Iraq Says It Uncovered Al Qaeda Plot On World Cup*

**Location:** Johannesburg, South Africa

**Alleged Terrorist(s):** Al Qaeda

**Offense(s):** Terror Plot

**Incident Name:** *2010 World Cup Terror Plot*

**Abstract:** A senior Al Qaeda militant suspected of planning an attack targeting the soccer World Cup in South Africa next month has been detained, an Iraqi official says. Maj. Gen. Qassim al-Moussawi, a spokesman for Baghdad security services, says the militant was an officer in the Saudi army. **Abdullah Azam Saleh al-Qahtani is suspected of planning a "terrorist act" in South Africa during the World Cup beginning June 11**, al-Moussawi said at a press conference on Monday. He added that al-Qahtani entered Iraq in 2004 and is suspected in several attacks in the capital and elsewhere in the country. Al-Moussawi said the 30-year-old Saudi national, who was in charge of "security" for the terror network in Baghdad, was in contact with Al Qaeda number two Ayman al-Zawahiri to "organize the plan," AFP reported. In Johannesburg, meanwhile, **South African police were reportedly investigating the alleged terror plot at the month-long tournament, the world's biggest sporting event which starts on June 11.** The World Cup is expected to attract more than 370,000 foreign fans. "The South African police are still working on getting confirmation," Nonkululeko Mbatha, spokeswoman for the national police chief, told AFP. Despite the killing last month of Al Qaeda in Iraq's two top figures in a U.S.-assisted military operation, attacks blamed on the group have continued (Fox News, 2010).

**Title/Headline:** *Al-Qaeda Number Two Plotting World Cup Terrorist Attack*

**Abstract:** Osama bin Laden's closest al-Qaeda lieutenant has been plotting a terrorist attack on the World Cup, Iraqi police said. According to investigators, **Ayman al-Zawahiri, bin Laden's number two, was conspiring with an al-Qaeda operative who was arrested in Baghdad two weeks ago.** The operative, named as Abdullah Azzam Saleh Misfar al-Qahtani and said to be a former Saudi army colonel who had travelled to Iraq and become security chief for al-Qaeda's local branch, has been accused of organising suicide bombings in two cities south of Baghdad. Major General Qassim Atta, head of security in Baghdad, said he was also believed to have made contact with al-Zawahiri, the man generally regarded as al-Qaeda's second-highest leader after bin Laden. "He participated in the planning of a terrorist act in South Africa during the World Cup," Maj Gen Atta said. **"He was in contact with the terrorist Ayman al-Zawahiri to organise the plan hatched by al-Qaeda."** Maj Gen Atta gave no details of what the plot was or how far it had been developed. **But last month a jihadist website published a statement in which al-Qaeda in the Islamic Maghreb, the North African branch, suggested an attack might be made on England's opening game, against the United States.** The bulk of South Africa's police work in advance of the World Cup, starting next month, has been aimed at controlling high rates of violent crime. Precautions have been laid against terrorist attacks, but police said they were still investigating the latest claims. **"The South African police are still working on getting confirmation,"** Nonkululeko Mbatha, a spokeswoman, said (Spencer, 2010).

**Title/Headline:** *US State Department Issues South Africa Alert*

**Abstract:** The U.S. State Department has issued a travel alert to U.S. citizens living in South Africa or traveling there for the World Cup. "There is a heightened risk that extremist groups will conduct terrorist acts within South Africa in the near future," the department said in an alert Thursday. "While a number of terrorist threats against the World Cup in South Africa have appeared in the media in recent weeks and months, the U.S. government has no information on any specific, credible threat of attack that any individual or group is planning to coincide with the tournament." The State Department said it would make any information public on "a specific and credible threat." U.S. citizens were advised to keep car doors and windows locked while driving and not to leave valuables in plain view or to wear expensive jewelry. **The alert said public transportation is "poorly developed" and advised using rental cars or private transport instead. And when stopping at intersections at night or in isolated areas, it suggested leaving room for a "quick exit."** The State Department says its alerts are "about short-term conditions" in a country "that pose imminent risks to the security of U.S. citizens." **Its warnings are "to describe long-term, protracted conditions that make a country dangerous or unstable"** (ABC News, 2010).

**Title/Headline:** *South Africa Refutes World Cup Terror Report*

**Abstract:** South Africa's National Joint Operational and Intelligence Structure (Natjoints) on Sunday refuted media reports about a terror threat to next month's the 2010 FIFA World Cup in South Africa. The move came after the Sunday Times in Johannesburg, the biggest Sunday newspaper in South Africa, carried an extensive story on the subject as their main item. It quoted experts as saying South Africa is vulnerable to some form of terrorist attack during the June 11 to July 11 tournament. However, South Africa's Natjoints said in a statement to the South African Press Association (SAPA) **"The security forces can firmly state that there is no known specific terror threat against the 2010 FIFA World Cup."** It "strongly disputed" the Sunday Times's claim that South Africa had drawn up a watch-list of 40 terror suspects. The newspaper said it had received two separate accounts of "at least one arrest linked to World Cup threats." **The Sunday Times also said that "operational militant training camps" were set up in several provinces.** In response Natjoints said that the newspaper report was riddled with inaccuracies and most comments were from anonymous sources. **"Although the Natjoints is not prepared to discuss intelligence matters for obvious reasons, we can categorically deny the existence of a 'watch-list of 40 terror suspects' or the arrest of any person directly targeting the World Cup.** Natjoints also disputed the existence of operational militant training camps in several provinces in South Africa. Earlier the Sunday Times had quoted among others, Frank van Rooyen, senior researcher at the South African Institute of International Affairs. **"We are definitely vulnerable to suicide bombers and car bombs. All the signs are there that al-Qaeda is planning one of these attacks on the World Cup,"** said Van Rooyen, who is also a former South African naval officer (Xinhau News, 2010).

**Title/Headline:** *South Africa Plays Down World Cup Terror Threat*

**Abstract:** South Africa's police minister has claimed there is currently no terrorist threat to the upcoming World Cup. Nathi Mthethwa sought to refute recent media reports alleging that South Africa is vulnerable to some form of terrorist attack during the June 11 to July 11 tournament. He said South African police have been working closely with intelligence agencies in each of the 31 countries sending teams to South Africa. **"It would be folly for any country to grandstand and proclaim that it is immune to terror attacks,"** Mthethwa told reporters in Johannesburg on Monday. **But "there is no threat to South Africa as we speak now."** Mthethwa played down last week's warning by the U.S. government to its citizens that South Africa faces a heightened risk of terrorism during the World Cup. Mthethwa his forces would be ready to deal with any threat that might emerge. **"Each country has the right to say whatever they want to say to their citizens,"** he said. **"All we are saying in South Africa is that together with the security forces of U.S., UK and others, we have prepared ourselves for any eventuality."** Meanwhile, on the pitch, there was a major boost for the host nation as South Africa recorded their biggest victory since returning to international football in 1992 with a 5-0 thrashing of Guatemala. Katlego Mphela scored twice from the penalty spot, while Reneilwe Letsholonyane, Surprise Moriri and Bernard Parker were also on the scoresheet as Bafana Bafana warmed up for the showpiece in style. Captain Aaron Mokoena became the first South African to win 100 caps, while striker Benni McCarthy was an unused substitute. **The victory extends South Africa's unbeaten run to 11 matches under Brazilian coach Carlos Alberto Parreira** (CNN, 2010).

**Title/Headline:** *Heinz Field Arrests Spur Terror Response*

**Abstract:** Two Carnegie Mellon University students caught trying to sneak into Heinz Field in the middle of the night -- purportedly to film a music video -- prompted an anti-terrorist response that included pumped-up security at yesterday's Steelers game against the Broncos. The two young men were being held last night in the Allegheny County Jail on \$1 million straight bond each. **Although explosives-sniffing canines found nothing of interest around the football stadium, an affidavit said the dogs registered two separate "positive hits for explosives" in the Lexus sport utility vehicle the men were driving.** What might have fallen under the prank category in pre-9/11 days was treated as anything but that by authorities, who conducted full searches of the students' apartments and heightened security throughout the afternoon around the stadium on the North Shore. "We take everything seriously, especially in today's light," Pittsburgh Police Chief Nate Harper said at a morning news conference, while the suspects were still being questioned by agents from the Joint Terrorism Task Force. Arrested outside Heinz Field around 2 a.m. yesterday were Sudeep Paul, 21, of Woodbury, N.Y., and Anand Shankar Durvasula, 20, of Morgan Hill, Calif. Chief Harper said they are U.S.-born. **Both were charged with criminal conspiracy, and Mr. Durvasula with criminal trespass. The \$1 million straight bond has to be paid in full for release.** Heinz Field security officers spotted the men on a security camera trying to enter the stadium, a Steelers spokesman said. They first opened an exterior door at Gate B without going inside, police said. They then took a folding chair to the fence at Gate 5 on Art Rooney Drive, and Mr. Durvasula allegedly stepped up on the chair to scale the fence. Heinz Field security officers then approached the pair, and as they tried to walk away, they were apprehended by Pittsburgh police officers who had been summoned. **They told police initially they were trying to check out the stadium because they had tickets to yesterday's 4:15 p.m. game against the Denver Broncos,** Chief Harper said. He said they told investigators later that Mr. Paul was trying to complete a music video featuring Mr. Durvasula, and they intended to do the last scene inside Heinz Field. **A video camera and tripod were found inside the vehicle, parked nearby, which police towed away.** The affidavit said the vehicle was registered to Paul Swapn Kumar, 41, of Woodbury, N.Y., but it could have meant Kumar Paul, as police initially referred to Sudeep Paul as Paul Sudeep. "We don't know exactly what their intentions were," Chief Harper said. But, he said, it was unwise for them to attempt to break into the stadium at about 2 a.m. There was no evidence the men had been drinking, he said. Kumar Paul, who was unaware of the son's troubles, said he gave his son the Lexus. "He's such a good kid," said Mr. Paul. "He's a bright student and an honor student." A

Carnegie Mellon spokeswoman declined comment on the incident, other than to confirm both men are seniors at the school, with Mr. Paul a business student and Mr. Durvasula in the humanities and social sciences program. University-related Web sites suggest that both men have been active, involved students. Mr. Paul is listed as activities director of the Undergraduate Finance Association, and Mr. Durvasula as a committee chairman of the Undergraduate Entrepreneurship Association. **Both also were involved in Carnegie Mellon's Mock Trial competition, a program in which students take on judicial roles to practice their speaking and analytical skills.** Mr. Paul, on his own Web home page, lists his grade point average as 3.7 out of 4.0. He made the dean's list last spring (Rotstein & Guidry, 2010).

**Title/Headline:** *Terror Group Lashkar-e-Taiba 'Planning Paraglider Attacks'*

**Abstract:** Indian intelligence officials suspect that the terrorist group behind the 2008 Mumbai attacks is planning another audacious strike on the country — this time from the air, using suicide bombers flying paragliders. U. K. Bansal, an Indian Home Ministry official, told reporters that the Pakistan-based Lashkar-e-Taiba faction was thought to have acquired a number of the gliding parachutes. **"We have intelligence reports that LeT has purchased 50 paragliding kits from Europe with an intention to launch attacks on India," he said. No other details were given, but security levels have been hiked across the country ahead of tomorrow's Republic Day celebrations, one of India's biggest holidays. If accurate, the intelligence would mark a radical new tactic.** Experts said the potential threat posed by jihadist paragliders would have to be considered seriously as LeT — which murdered 166 people in Mumbai in a sophisticated commando-style raid — has already proven itself highly innovative. **"The Mumbai attack [where ten LeT gunmen sailed to Mumbai from Karachi, murdering the crew of a fishing boat en route], was the group's first act of sea-borne terrorism,"** said B. Raman, a former counter-terrorism chief in the Indian foreign intelligence service, the Research and Analysis Wing. **"It would be natural for them to plan another spectacular attack from the air. The warning has to be taken seriously."** Paragliders usually do not have an engine but can — in skilled hands and in the right conditions — cover large distances. The world record for flying a paraglider is more than 460km (285 miles). However, they usually need to be launched from a high point, or towed by a boat or car, which could limit their effectiveness. **The latest alert came after the US Defence Secretary Robert Gates warned last Wednesday that a syndicate of terrorist groups could trigger a war between Pakistan and India through a "provocative act".** Relations between India and Pakistan, nuclear armed neighbours which have gone to war three times, deteriorated sharply in the wake of the Mumbai attacks. **LeT has been active since the early 1990s and is said to have been created with the help of Pakistan's powerful spy agency, the Directorate of Inter-Service Intelligence.** It was founded to try and free Kashmir from Indian control, and came to specialise in the type of suicidal raid that shocked the world over a 60-hour period when Mumbai was attacked in November 2008. **The organisation was banned in Pakistan in 2002. Indian officials also warned last week that a terrorist group — possibly LeT or al-Qaida — was poised to hijack an Indian passenger plane.** On Friday, an Indian Home Ministry official confirmed that security had been tightened at all airports. Officials said that sky marshals would be deployed on flights around the region. Indian officials have feared the possibility of an air attack for some time. **Eight days after the Mumbai attacks, the Defence Ministry ordered the nation's armed forces to be on guard against "terror strikes from the air".** At that time, the India Bureau for Civil Aviation is thought to have been given warning of plans to capture one or more planes at Delhi, Mumbai, Bangalore or Chennai airports, the country's main transport hubs. Officials said that credible intelligence indicated a plan to attack a major population centre using an airliner in an assault that would resemble those made on New York in 2001. **There were also fears that one of India's nuclear facilities could be targeted.** The last time an Indian passenger plane was targeted was Christmas Eve 1999, when an Indian Airlines flight was hijacked by Pakistani nationals as it flew from Kathmandu to Delhi. That plane landed in Afghanistan, where the hostages were released in exchange for three Islamist extremists (Blakely, 2010).

**Title/Headline:** *Pakistan Terror Suspect Held In Zimbabwe*

**Abstract:** A Pakistani suspect in the 2008 Mumbai attacks has been arrested in Zimbabwe as he tried to cross into World Cup host South Africa, police and state media say. Imran Muhammad, 33, was arrested at the Beitbridge border post along with another Pakistani national, the state-run Herald newspaper reported, saying Muhammad was wanted for the Mumbai attacks. **"Indications were that... Muhammad (is) wanted in Pakistan (as he) was allegedly involved in the terror attacks that rocked Mumbai, India in November 2008,"** the daily said. Police spokesman Wayne Bvudzijena said the two were arrested on June 20 after they were found using fake Kenyan passports. "Investigations are still being carried out through Interpol to see who these people are," he told AFP. **"We will have to get information from the Pakistani authorities to see what they have on these two."** According to unnamed sources quoted by the Herald, Muhammad was normally based in the Chilean capital Santiago. The daily said Muhammad and 39-year-old Chaudry Parvez Ahmed flew from Saudi Arabia to Tanzania, before connecting to Zimbabwe by road. Bvudzijena would not comment on why the two were travelling to South Africa. **"This is part of our investigations. We will only be able to know why they wanted to travel to South Africa once our investigations are completed,"** he said (The Sydney Morning Herald, 2010).

**Title/Headline:** *Two Pak Men Charged With Using Forged Travel Documents In Zim*

**Abstract:** Two Pakistani men, one of whom was initially thought to be linked to the Mumbai terror attack, have been charged in a Zimbabwe court with using forged travel documents to enter South Africa. The two Pakistani men, who were arrested at a border post in Zimbabwe while trying to cross into South Africa illegally were produced in court yesterday and charged with breaching immigration laws. **The arrest had raised an alarm over the possibility of terror groups trying to target the FIFA World Cup in South Africa.** The state media had initially linked one of the two arrested men to the Mumbai terror attack, but police is yet to verify any such links. Imran Muhammad (33) and Warraich Chaudhry Pervez Ahmed (39) were arrested while trying to cross into South Africa at Beitbridge Border Post last month. The two appeared in court and were charged with contravening sections of the Immigration Act, Zimbabwe Herald reported. **The two men were found to be in possession of fake travel documents by immigration officials at the border check post while trying to enter the country on June 20.** The paper said they were found in possession of forged Tanzanian Emergency Travel Documents whose names did not tally with those on their Pakistani passports. They have been remanded in custody to July 22 because a Pakistani interpreter is needed for the proceedings as the two men are not conversant in English. The prosecutor told the court that the two men were being charged under the Immigration Act, **"after they failed to present themselves to an immigration officer and possession of travel documents to which they were not entitled"** (ZEE News, 2010).

**Title/Headline:** Ugandan Toll In World Cup Bombings Rises To 74

**Abstract:** An al-Qaida-linked Somali militant group suspected in twin bombings in Uganda's capital that hit crowds watching the World Cup final endorsed the attacks Monday but stopped short of claiming responsibility, while the death toll rose to 74. The blasts came two days after a commander with the Somali group, al-Shabab, called for militants to attack sites in Uganda and Burundi, two nations that contribute troops to the African Union peacekeeping force in Somalia. **The attacks on two soft targets filled with civilians also raise concerns about the capabilities and motives of al-Shabab, which the U.S. State Department has declared a terrorist organization.** If confirmed that the group carried out the attacks, it would be the first time al-Shabab has struck outside Somalia. Sheik Yusuf Sheik Issa, an al-Shabab commander, told The Associated Press that he was happy with the attacks in Uganda but refused to confirm or deny that al-Shabab was responsible. "Uganda is one of our enemies. Whatever makes them cry, makes us happy. May Allah's anger be upon those who are against us," Sheik said. Kampala's police chief, Kale Kaihura, said he believed al-Shabab could be responsible. One of the targets was an Ethiopian restaurant - a nation despised by the al-Shabab militants. **The attacks appeared to represent a dangerous step forward by al-Shabab,** analysts said, and could mean that other East African countries working to support the Somali government will face attacks. **"Al-Shabab has used suicide bombers in the past and shown no concern about civilian casualties in its attacks,"** said David Shinn, a former U.S. ambassador to Ethiopia and a professor at George Washington University. **"Some elements of al-Shabab have also prohibited the showing of television, including the World Cup, in Somalia."** At a wrap-up news briefing Monday in South Africa, FIFA President Sepp Blatter denounced the violence against fans watching the game. **"Can you link it to the World Cup? I don't know... Whatever happened, linked or not linked, it is something that we all should condemn,"** he said. Al-Shabab, which wants to overthrow Somalia's weak, U.N.-backed government, is known to have links with al-Qaida. **Al-Shabab also counts militant veterans from the Iraq, Afghanistan and Pakistan conflicts among its ranks. Their fighters also include young men recruited from the Somali communities in the United States.** Ethiopia, which fought two wars with Somalia, is a longtime enemy of al-Shabab and other Somali militants who accuse their neighbor of meddling in Somali affairs. Ethiopia had troops in Somalia between December 2006 and January 2009 to back Somalia's fragile government against the Islamic insurgency. In addition to Uganda's troops in Mogadishu, Uganda also hosts Somali soldiers trained in U.S. and European-backed programs. **Officials said the Sunday attacks will not affect the African Union summit being held in Uganda from July 19-27. Many African leaders are expected to attend (Delany & Straziuso, 2010).**

**Title/Headline:** M16-Toting Fan Gets Inside Michigan Football Game

**Abstract:** A full-time National Guardsman toting two unloaded M16 assault rifles was allowed onto the Michigan Stadium field before the Michigan-Michigan State football game. Security officials allowed the man into the stadium, where more than 113,000 people had gathered, because his weapons were empty and no ammunition was found. A member of the color guard reported the impostor, who was escorted out by police. Diane Brown, a spokeswoman for the university's department of public safety, told MyFoxDetroit.com that school officials do not believe anything was done **"incorrectly or improperly by police in any of the checkpoints."** Brown said the unidentified man cooperated with police, and told officers he used his uniform as a ruse because he wanted to attend the Oct. 9 game but could not get a ticket. **"We escorted him out. He was very compliant and he just continued to explain that he wanted to come to the game,** but couldn't get a hold of a ticket and thought he'd use his uniform to be able to do that," she told the website. Michigan fans told the website they were very surprised about the incident. **"Whether it was good or bad, in a stadium filled with 113,000-plus, I don't think that's the way to handle such a situation,"** Alex Mandel told the website. **"It's really disappointing because usually the security's really good at the games,"** Julianne Patterson said. The man was arrested and released pending a further investigation (Fox News, 2010).

**Title/Headline:** Terror Attacks 'Likely' In India During Commonwealth Games

**Abstract:** The Commonwealth Games is likely to trigger a new round of terrorist attacks in India, a security expert has predicted. Fears about the safety of competitors, together with concerns about sanitation in the athletes' village, prompted a number of teams to think carefully about taking part in Delhi. All nations have now confirmed their participation, although stars such as Geraint Thomas, Phillips Idowu and Elena Baltacha have withdrawn from the competition, which is set to get underway on October 3rd. **Although most athletes**

have been persuaded to compete, leading international security firm Control Risks has now warned that terrorists are likely to target India during the event. Chietigj Bajpae, a senior analyst for Control Risks, told the Observer: 'I think there is a relatively high likelihood of attacks taking place, but these attacks may not target the Games venues themselves.' He advised that athletes should avoid using public transport or visiting tourist attractions and markets. Mr Bajpae added that as Indian authorities planned to use most of their security resources guarding the venues, terrorists would find that other parts of Delhi were more vulnerable to attacks (Metro News, 2010).

**Title/Headline:** *DoD Alert: Marine Marathon Could Be Target*

**Abstract:** Senior officials are worried that the person responsible for at least three military-related shootings near the nation's capital could target Sunday's Marine Corps Marathon in Washington, saying in an alert Friday morning that the recent shootings "are a cause for concern" and could be build-up to a Sunday attack. The FBI has confirmed that the same weapon was used in three recent incidents: one shooting more than a week ago at the Marine Corps Museum in Triangle, Va., one two days later at the Pentagon, and one earlier this week at a vacant Marine recruiting station in Chantilly, Va. The FBI is still trying to confirm that a fourth shooting Friday morning is connected. "All three shootings prior to [Friday's] shooting had the USMC [Marine Corps] as a common link," said the note, issued by the U.S. Army's Criminal Investigation Command to other parts of the military. "We cannot discount the three incidents as being a warning to the USMC to not run the marathon." While the alert noted that the incidents "occurred at night with no personnel on duty at the time," yet another shooting confirmed from the same weapon "may indicate an emboldening of tactics, perhaps with an end state of taking operational action during the Marine Corps Marathon," said the alert, obtained exclusively by Fox News (Levine, 2010)

**Title/Headline:** *Honduras: At Least 14 Massacred On Football Field*

**Location:** Tegucigalpa, Honduras

**Alleged Terrorist(s):** Unknown

**Offense(s):** Drive By Massacre

**Incident Name:** 2010 Honduras Football Massacre

**Abstract:** A carful of attackers armed with assault rifles drove up to a football field in a poor Honduran neighborhood Saturday and opened fire, killing at least 14 people. Armando Calidonio, vice minister of security, said the gunmen shot from point-blank range at the victims, who were known to gather there to play football. Ten were killed at the scene and four died as they were being taken to the hospital. More were wounded -- some gravely, Calidonio said, though the number was not clear. The attackers numbered about five, but police did not have any suspects. "We still do not know the motive of this tragedy," Calidonio told reporters. The massacre took place in Colonia Felipe Zelaya, a crowded, violent neighborhood in the northern city of San Pedro Sula that is home to hundreds of gang members. Mass shootings are not uncommon in Honduras. "Maras" -- street gangs that grew out of Los Angeles and spread to Central America -- are blamed for rampant violent crime, extortion and more recently acting as enforcers for drug cartels. In September, gunmen mowed down 18 shoe factory employees in San Pedro Sula in a shooting blamed on gang rivalries. Six youths were slain in a home last month, also in San Pedro Sula. Authorities linked that massacre to the drug trade (Fox News, 2010).

**Title/Headline:** *Big Sis Set To Expand Spy Program To Sports Stadiums*

**Abstract:** If you thought seeing Big Sis urging Americans to "report suspicious activity" at Wal-Mart checkouts was creepy enough, you ain't seen nothing yet. Homeland Security announced yesterday that the program was set to be expanded to include 9,000 federal buildings, as well as sports stadiums, businesses and communities in general. Despite the official Homeland Security You Tube channel being bombarded by almost 6,000 profanity-filled comments from Americans outraged that their country is sinking into

a decrepit Soviet-style informant society, Janet Napolitano announced yesterday that the **“If you see something, say something,”** campaign will be extended to include around 9,000 federal buildings across the country. **“In the coming weeks, “If You See Something, Say Something”** public awareness materials designed to help America’s businesses, communities and citizens remain vigilant and play an active role in keeping our homeland safe will be posted in approximately 9,000 federal buildings throughout the country,” states a DHS press release. **“Signage will appear at FPS guard stations at each facility, and any calls reporting suspicious activity will be directed to the existing national network of FPS call centers, which operate 24 hours a day, seven days a week.”** The memo also indicated that the campaign would be extended to sports stadiums, labeled **“sports and general aviation industries”** in the press release, as well as businesses and communities in general – so before too long expect to see and hear Big Sis reminding you that you live in a Sovietized police state wherever you happen to be. **“In the coming months, the Department will continue to expand the “If You See Something, Say Something” campaign nationally with public education materials and outreach tools designed to help America’s businesses, communities and citizens remain vigilant and play an active role in keeping the country safe,”** states the release (Watson, 2010).

**Title/Headline:** *S.C. Mayor: Odor Sickens Basketball Players, Fans*

**Abstract:** Dozens of fans were being screened Friday night by emergency responders after odor from a ventilation unit sickened several players and spectators at a high school basketball game. At least two people were taken to the hospital after the odor spewed from the heating and air conditioning unit at Ridgeland High School in the southeastern part of the state, Mayor Gary Hodges told The Associated Press. No serious injuries were reported, and he did not suspect foul play. **Between 200 and 300 people were at the game when the unit at the three-year-old school turned on, sickening a basketball player and then others, the mayor said. Illnesses ranged from naseau, vomiting to skin irritation. “We don’t know what we’re dealing with,”** Hodges said. The players and fans were moved from the gym to another part of the school, and small groups were going through a decontamination process that involves answering questions from emergency responders. **Those feeling ill must go through a more rigorous process that involves taking off their clothes to look for redness and spots. Irritation subsided for the several people who initially had it after they left the gym.** Hodges said local hazardous materials teams were on hand, and the state Department of Health and Environmental Control was on its way. **“We’re going to be here for hours finishing this decontamination process,”** he said (Fox News, 2010).

**Conclusion:** Terrorist acts and warnings are everywhere for sporting events and the biggest sporting event is the Super Bowl. A match made in heaven for the “terrorists” and hell on earth for the victims in the stadium and the viewers on TV.

## The Nuclear Bible: Terrorism & Texas

**Intro:** Terror is nothing new in Texas, as it's been happening since 1963. Every form of terror including a Presidential Assassination, a Football Franchise, Shootings, Massacres, Horror movies, and Plane Attacks, terror is always bigger in Texas.

**Title/Headline:** *The Texas Chainsaw Massacre Franchise*

**Abstract:** The Texas Chainsaw Massacre is an American horror franchise consisting of six slasher films, comics and a video game adaptation of the original film. The original film, The Texas Chain Saw Massacre, directed by Tobe Hooper and written and produced by Hooper and Kim Henkel, was released in 1974. Hooper also directed the first sequel to the original film, however, the other sequels have had various writers and directors attached to them. **Hooper has not had any direct involvement with the rest of the sequels, however, he did co-produce the original film's remake and also produced its prequel, along with Henkel. The films have grossed over \$203 million at the worldwide box office.** Leatherface and his family are the antagonists in all of the films in the franchise. The film series is ranked eighth at the United States box office – in adjusted 2008 dollars – when compared to other American horror franchises. **The franchise began when a video game adaptation of The Texas Chain Saw Massacre appeared eight years after the release of the film, followed by various comic books, three sequels, a remake, and a prequel to the remake** (Wikipedia, 2010).

**Title/Headline:** *Nuclear Attack Warning Story Dismissed*

**Abstract:** If you are reading this, you survived a predicted nuclear attack on Texas City. Recent weeks have seen the city mentioned as the subject of rampant Internet and e-mail claims suggesting that emergency management officials were preparing for some form of attack. Officials with several agencies said those reports are false. Shauna Dunlap, a spokesman for the FBI, said that there are "no credible or corroborated threats to the area." **That attack was to have taken place Tuesday, based on those reports. A report filed on the Arctic Beacon Web site as well as the site owner's Internet radio show had warned of a pending nuclear attack on the city — not from terrorists, but the federal government.** Basing his information on a report from a man claiming to be a former U.S. Army intelligence officer, show host Greg Szymanski reported that the area was likely the target for a government-led nuclear attack. The report quickly made the rounds via e-mail and blog sites. Attempts to reach Szymanski to comment on his report were unsuccessful. **On Wednesday, people driving along Galveston's Seawall Boulevard could see unmarked black trucks and sport utility vehicles bearing government license plates near crews setting up what appeared to be satellite or radar gear on the beach.** The crews were wearing shirts embossed with the words, "Weapons of Mass Destruction Civil Support Team," a branch of the U.S. Defense Department. **It was enough to get even the most timid conspiracy theorist thinking something was up. But local homeland security officials as well as the FBI said the Internet story and the arrival of the Weapons of Mass Destruction team are little more the coincidental training exercises that may have been blown out of proportion.** Bruce Clawson, director of homeland security for Texas City, said he was alerted to the online report and passed the information to the FBI. He said it was a routine measure. **"Based on what we know, we are not aware that this (report) had any basis in fact," said Clawson. "Anyone indicating anything other than training is seriously misinformed."** Members of the Weapons of Mass Destruction team told The Daily News they were calibrating equipment for an upcoming drill. Team members said they were participating in a series of seminars at the San Luis Hotel & Conference Center, not far from where they had set up shop (Aulds, 2006).

**Title/Headline:** *Massacre Leaves 13 Dead At Fort Hood*

**Abstract:** A mass shooting rocked one of the nation's largest military posts after a U.S. Army psychiatrist allegedly opened fire inside Fort Hood in Texas. Thirteen people were killed and 30 people were injured according to U.S. military officials. Most of the victims were U.S. military personnel. **One U.S. soldier, armed with at least two handguns, including a semiautomatic weapon, started firing around 1:30 p.m. local time before he was eventually shot four times by emergency personnel** responding to the incident, Lt. Gen. Robert Cone said. Military officials said the alleged shooter, identified as Maj. Nidal Malik Hasan, 39, was unconscious and on a ventilator. **Cone initially told reporters that the suspect had been killed, but offered updated information at a second press conference that Hasan, a psychiatrist working at Fort Hood, had survived.** The accused shooter, however, is not talking to investigators, according to Cone. **Authorities said they took three other U.S. soldiers into custody in the initial aftermath of the incident, but they were all quickly released.** A senior U.S. official told The Associated Press that investigators have not ruled out the possibility that some casualties may have been victims of "friendly fire," shot by authorities amid the mayhem and confusion at the scene. **Hasan was a psychiatrist at Walter Reed Army Medical Center for six years before being sent to Texas in July.** He was apparently upset about being scheduled to deploy overseas, according to Sen. Kay Bailey Hutchinson of Texas, who told Fox News that she was told he may have been targeting specific individuals. A source tells NPR's Joseph Shapiro that Hasan was put on probation early in his postgraduate work at the Uniformed Services University of the Health Sciences in Bethesda, Md. **He was disciplined for proselytizing about his Muslim faith with patients and colleagues, according to the source, who worked with him at the time.** As the attack

unfolded, military officials immediately locked down the sprawling post, which covers some 335 square miles in central Texas. **The lockdown was lifted several hours later, but the post continues to operate at a heightened level of security.** In Washington, President Obama expressed his sympathies to the wounded and the families of the slain soldiers, and he pledged a full inquiry. "It's difficult enough when we lose these brave Americans in battles overseas," he says. **"It is horrifying that they come under fire at a military base on American soil"** (Whitelaw, 2009).

**Title/Headline:** *Officials: U.S. Army Told Of Hasan's Contacts With Al Qaeda*

**Abstract:** U.S. intelligence agencies were aware months ago that Army Major Nidal Malik Hasan was attempting to make contact with an individual associated with al Qaeda, two American officials briefed on classified material in the case told ABC News. According to the officials, the Army was informed of Hasan's contact, but it is unclear what, if anything, the Army did in response. Investigators want to know if Hasan maintained contact with a radical mosque leader from Virginia, Anwar al Awlaki, who now lives in Yemen and runs a web site that promotes jihad around the world against the U.S. In a blog posting titled "Nidal Hassan Did the Right Thing," Awlaki calls Hasan a "hero" and a "man of conscience who could not bear living the contradiction of being a Muslim and serving in an army that is fighting against his own people." Sen. Joseph Lieberman (D-CT) called for an investigation into whether the Army missed signs as to whether Hasan was an Islamic extremist. **"If Hasan was showing signs, saying to people that he had become an Islamist extremist, the U.S. Army has to have a zero tolerance,"** Lieberman told Fox News Sunday (Esposito, Cole, & Ross, 2009).

**Title/Headline:** *Texas Terrorist' Posts Death Threat Against Obama*

**Abstract:** A Dallas man describing himself as a terrorist threatened to kill President Barack Obama in an online posting because he was upset about health care reform, according to a criminal complaint. Brian Dean Miller, 43, faces one count of making threats against the president, which carries a maximum sentence of five years in prison and a \$250,000 fine. He is scheduled for arraignment in federal court Friday. His public defender and his mother did not return phone messages Thursday. According to a criminal complaint, Miller made the death threats March 21 on Craigslist under a posting titled **"Obama must die." The posting said he was following through on a promise to become a terrorist if the federal health care bill passed. "I am dedicating my life to the death of Obama and every employee of the federal government,"** the posting said. It ended with a call to arms: **"This is war. Join me. Or don't. I**

don't care. I'm not laying down anymore." He said, "Today I become a terrorist." In a separate post the same night, Miller essentially dared others to turn him in to the Secret Service, according to the complaint. He allegedly wrote that others should "feel free to notify them if it helps you sleep better tonight. You should tell them I threatened to kill the president and destroy the U.S. government. Maybe you would like to quote the post as your evidence." **A resident of Arlington, Texas, reported the threats to the Secret Service. Agents tracked down Miller at his Dallas home**, where he lives with his mother, according to the complaint. Police arrested Miller and seized his computer. They found no weapons in the residence. Miller's mother told agents her son is "frequently depressed, prone to verbal outbursts and may be suicidal," according to the complaint. Her son initially refused to answer questions, then acknowledged he made the threats. He said everything posted on Craigslist was "fictional." According to the complaint, when the agents asked if Miller wanted to kill the president, he told them: **"Yes, I would kill him, if I were a different person. I would kill them all"** (Carlton, 2010).

**Source:** KHOU News, Shern-Min Chow

**Title/Headline:** *Homeland Security Alert: Terror Suspect May Be Headed To Texas Through Mexico*

**Abstract: A Homeland Security Alert is asking Houston police and Harris County Sheriff's deputies to keep their eyes open for a potential terrorist.** The alert focuses on Mohamed Ali, a suspected member of the terrorist group Al Shabaab. It indicates he may be traveling to the U.S. through Mexico. **Al Shabaab is a terrorist group based in Somalia with links to the Somali attacks dramatized in the movie "Blackhawk Down."** A few months ago, the group announced its allegiance to Al Qaeda and Osama Bin Laden. **"[Al Shabaab operatives] are certainly a real threat to U.S. security and an increasing threat to U.S. security,"** said Rice University Baker Institute Fellow Joan Neuhaus Schaan. Schaan is an expert on Homeland Security and terrorism, and her research is reviewed by the U.S. government, military and civil authorities. She said Al-Shabaab trains extremists and wants to turn Somalia into the next Afghanistan. "Similar to the set up in Afghanistan in 2001 when Al Qaeda and Osama bin Laden had a strong relationship with the Taliban that allowed them free reign in Afghanistan," Neuhaus Schaan said. **The route from Somalia to Texas is shorter than Americans would like to think. It goes through Mexico.** Two weeks ago, a federal indictment was filed in San Antonio against a Somali citizen. It alleges Ahmed Muhammed Dhakane led a "large-scale smuggling enterprise," moving east Africans into the U.S., including members of a terrorist group called AIAI. "It was hundreds of individuals," Neuhaus Schaan said, in reference to the indictment. The current indictment has three counts for making false statements in regard to immigration for allegedly lying about his ties to terrorist groups. The U.S. Attorney's office in the Western District indicates the investigation is ongoing. **Why would Al Shabaab come to the U.S? "Either to recruit provide more funding or serve as operatives or sleepers for some future activity,"** Neuhaus Schaan said. It's not a melodramatic spy movie. **It's reality. In 2007, former Houstonian Daniel Joseph Maldonado was brought back to Houston by the U.S Attorney in the Southern District after he was captured in Somalia reportedly training with terrorist groups.** "He had initially been on the frontlines of Al Shabaab, but when they realized he was an American, they pulled him back because they had plans for him to come back to the U.S. and recruit female suicide bombers," said Neuhaus Schaan. U.S. Homeland Security officials confirmed the Muhamed Ali alert, but declined to comment on it. They did not indicate that this report would jeopardize any ongoing investigation. If authorities are right, **Mohamed Ali is hardly alone and a terror network is following well-worn human smuggling routes into the Lone Star State.** "There would be a reasonable chance to have him [Mohamed Ali] coming through Houston," Neuhaus Schaan said. **"They [Al Shabaab] have been pretty busy in Texas"** (Chow, 2010).

**Title/Headline:** *Jordanian Man Pleads Guilty In Dallas Bombing Plot*

**Abstract:** Hosam Smadi parked a sport-utility vehicle in the garage beneath a Dallas skyscraper, activated a timer connected to what he thought was a bomb and used a cell phone to try remotely detonating the explosive he had spent months working to obtain. Smadi, 19, who pleaded guilty to attempted use of a weapon of mass destruction, had hoped the bomb would bring down the 60-story building, kill thousands of office workers and create financial havoc. Instead, he was arrested, having been supplied with a fake truck bomb by undercover FBI agents posing as al-Qaida operatives. The charge is punishable by life in prison, but if Lynn accepts the plea agreement, Smadi would serve no more than 30 years and then be deported. Prosecutors have agreed to drop a charge accusing him of bombing a public place. **"Today's guilty plea underscores the continuing threat we face from lone actors who, although not members of any international terrorist organization, are willing to carry out acts of violence in this country to further the terrorist cause,"** said David Kris, the assistant attorney general for national security. Smadi said he came to the United States when he was 16 and was educated here through the 11th grade. **The FBI said it had been monitoring Smadi after discovering him on an extremist website last year. Investigators said he acted alone and wasn't affiliated with any terrorist organizations** (Carlton, 2010).

**Title/Headline:** *Czech Military To Help National Guard Establish "Chemical Warfare Unit" In Texas*

**Abstract:** According to Texas National Guard chief commander Adjutant General Jose S. Mayorga, soldiers from the Czech military 31st brigade of radiation, chemical and biological protection will help their US counterparts establish a similar unit in Texas. He made the statement to the Czech News Agency (CTK) on June 22, while visiting with Czech chief-of-staff Vlastimil Picek on his invitation. "Since the Texas guard is considering establishing a similar unit, Mayorga said he would like to see how the Czech unit, seated in Liberec, north Bohemia, is organized and how it prepares for emergency situations, and also its way of reacting to them", reports the Prague Daily Monitor. It is interesting to note that the Nuclear Threat Initiative's (NTI) news outlet reported on March 16 2009 that this very chemical warfare unit would be assigned to "help protect" President Obama during his visit to the EU-USA summit held in Prague in April of that year. Now I don't know about you, but since when does a 'chemical warfare unit', specialized in such things as tracking down anthrax-facilities and other devilries, get to "protect" an American president visiting? "The plan of security measures to accompany the EU-USA summit reckons with us.", NTI reported the head of the 31st brigade of radiation, chemical and biological protection, Miroslav Knopp, as saying. "However", said Knopp, **"I must not disclose any details as the [plan] is secret. Our role will be similar to our assistance in the protection of then U.S. President George Bush during his visit to Prague, and at the NATO summits in Istanbul and Riga". "The Czech chemical warfare unit is world-renowned.**

This April it protected the U.S.-Russian summit in Prague. Previously it ensured the security of the Olympic Games in Athens and was deployed in the Gulf War and other conflicts.” It’s a strange thing, is it not, that some Czech chemical warfare unit- operating from a relatively second-rate nation in Europe, protects US presidents, provides security for the Olympic Games and is involved in combat-operations overseas. **It’s even more strange that the unit will now help the Texas National Guard establish a replica of itself in the great state of Texas** (Maessen, 2010).

**Exactly 6 months prior to Superbowl XLV (2011) in Arlington, Texas on February 6, 2011, the following exercise “Operation Lone Star” took place in Texas.**

**Title/Headline:** *Texas Guard, Czech Army Trains For Disaster In Operation Lonestar*

**Abstract:** For the joint members of the Texas Military Forces, the Department of State Health Services and local civil agencies, preparedness means more than a ready standing force. With the persistent threat of hurricanes, flooding and seasonal pandemics, preparedness requires a fully trained, joint force capable of engaging a large-scale incident anywhere in the state. **"What we do and what we're training for is a mass casualty,"** said Texas State Guard Capt. James R. Owens, a registered nurse with the DFW Medical Group. **"It's about taking care of the population." This year, these state assets used the annual humanitarian event Operation Lone Star to conduct a complete exercise simulating a mass casualty incident.** Providing the Rio Grande Valley with immunizations, physicals and various other medical services, the mission sought to stress and challenge the capabilities of state military and civilian departments, as well as reinforce their cooperation and inter-agency communication. **"At one level, we provide free care,"** said Dr. Brian R. Smith, lead for the public health agency sponsoring OLS and the regional medical director for Health Service Region 11. **"At the same time, it provides a preparedness exercise for those of us in public health and the Texas Military forces to work together and to practice together in a major event."** Among the state agencies supporting the operation is the Texas Medical Assistance Team (TexMAT-1), populated by paramedics and medical practitioners from through the state. **"It's an opportunity under a training scenario to see a lot of people at one time,"** said Charles A. Neely, an EMT paramedic with TexMAT-1. "It just improves our capabilities in the long run." The two-week operation, running from July 26 through August 6, featured sites in Brownsville, Palmview, Raymondville and San Juan during the first week and will include Laredo, Rio Grande City and Zapata during the second week. **Many OLS locations rotate from year to year, but tend to stay centralized in local high schools or elementary schools.**

Flag of Czechoslovakia

Flag of Chile

Flag of Texas

Further bridging the spirit of cooperation, even **service members from the Czech Republic and Chilean armies supported OLS this year.** **"We need to practice for any kind of mass casualty occasion, too,"** said Capt. Petra Matulkova, an epidemiologist with the Czech Army, which is part of the State Partnership Program with Texas. **"We need to know these things, being military doctors."** With so many organizations working together, key leaders placed a premium on clear and effective communication throughout the operation. "A lot of the training that we're doing is being able to communicate," said Owens. "At any level, at any issue, we will have to be able to communicate." **This finely tuned coordination allowed OLS to process 12,645 area residents in 2009, a number that event organizers expect will only grow in 2010 and future years.** Spanning six counties in Texas, Operation Lone Star functions as an ideal execution of a real-time public health crisis, uniting disparate agencies for a common and worthy goal. "We set it up just as if we may have a thousand people or one person that needs the services," said Owens. **"It may be small at one area or larger at another, but in the grand scheme of things, it provides a very good and very applicable training exercise for our units"** (Griego, 2010).

**Title/Headline:** *Unguarded Bridges Along Border Are Potential Illegal Route Into U.S.*

**Abstract:** On each side of a towering West Texas stretch of the \$2.4 billion border fence designed to block people from illegally entering the country, there are two metal footbridges, clear paths into the United States from Mexico. "Technically speaking it's not a bridge, it's a grade control structure," said Sally Spener, spokeswoman for the International Boundary and Water Commission, which maintains the integrity of the 1,200-mile river border between the U.S. and Mexico. The structures under the spans help prevent the river -- and therefore the international border -- from shifting. Whatever they're called, there are fresh sneaker tracks on the structures -- indicating they're being used as passages into the country. **"This is outrageous and yet another example of the federal government failing miserably in its duty to secure the border from those who wish to do us harm, and they need to take immediate action to address this situation,"** Katherine Cesinger, spokeswoman for Texas Gov. Rick Perry, said in a statement. **"If we are spending so much money on a fence, why**

not put some into cutting (the bridges) out, eliminating an easy access at a place that is not a port?" said Don Reay, executive director of the Texas Border Sheriff's Coalition. "If he can do it, so can drug cartels with loads of narcotics of any kind," Hudspeth County Sheriff's Lt. Robert Wilson said. **"Even a terrorist could pass here with weapons of mass destruction and be in the United States and up on the interstate and gone in a short time."** The crossings are owned by both the United States and Mexico and are needed for workers to maintain and occasionally fix cement structures that support the bridge, Spener said. **Any changes to the structures, she said, would have to be approved by officials in both countries.** And no one has ever asked to secure the bridges or remove them, she said. **"We would be happy to work with Border Patrol if they have security concerns they've identified,"** Spener said. "It would be a challenge, but we'd be happy to discuss it." Cordero said he's not aware of any requests by Border Patrol or the Department of Homeland Security to secure the crossings. But still, he concedes, it would be nice if there was more security around the remote crossing. "Obviously this is where technology and the experience of our agents comes into play," Cordero said. **"Do we have to pay more attention here? Yes, because we're talking seconds that they can get in"** (Fox News, 2010).

**Title/Headline:** *2 Shot, Gunman Killed At Texas Army Base*

**Abstract:** A person opened fire at a convenience store on Fort Bliss, injuring two people before being killed by responding officers, the commander of the West Texas Army post said. Col. Joseph A. Simonelli Jr. declined to discuss the conditions of the victims or other details of the shooting. Simonelli said the area was roped off for an FBI investigation, but the sprawling facility next to El Paso never was under lockdown. **"Our law enforcement agents took it upon themselves to react immediately and aggressively, and I think that's the main reason why this didn't escalate further than it is right now,"** Simonelli said (Winter, 2010).

**Date:** September 21, 2010

**Source:** Fox News, Associated Press

**Title/Headline:** *Authorities ID Fort Bliss Gunman As Retired Army Sergeant*

**Abstract:** The FBI is investigating why a retired Army sergeant walked into a Fort Bliss convenience store and shot two employees, one fatally, before he was gunned down by responding officers, the agency. **Authorities did not know whether gunman Steven Kropf, 63, of El Paso, had any relationship with either victim, the FBI said in a Tuesday statement, which described the Monday shooting at the West Texas Army post as an isolated incident.** Bettina Maria Goins, 44, of El Paso was pronounced dead at a military hospital where she was rushed immediately after the shooting, and another woman remained hospitalized with serious injuries, the FBI said. Both women were civilian employees of the Army & Air Force Exchange Service, which runs merchandise operations for the military, including fast-food restaurants and convenience stores. **Post commander Col. Joseph Simonelli Jr. said officers responded to reports of the shooting in less than three minutes and killed the gunman.** The post was not put on lockdown, but traffic was directed around the store where the shooting occurred, Simonelli said (Fox News, 2010).

**Title/Headline:** *Revealed: Texas Officials Covered Up Dangerously Radioactive Tap Water For Years*

**Abstract:** Texas officials charged with protecting the environment and public health have for years made arbitrary subtractions to the measured levels of radiation delivered by water utilities across the state, according to a series of investigative reports out of Houston. Those subtractions, based on the test results' margin of error, made all the difference for the Texas Commission on Environmental Quality (TCEQ): **without the reduction, demonstrated levels of dangerous radiation would have been in excess of federal limits for years.** This was being done in direct contravention of an order by the US Environmental Protection Agency, which told state regulators in 2000 to stop subtracting the margin of error. The findings are part of an investigation by Houston CBS affiliate KHOU. Confronted by reporter Mark Greenblatt, **TCEQ staffer Linda Brookins claimed that the radiation was "natural" and people shouldn't be concerned.** She also refused to read on camera the EPA's order to stop subtracting margins of error from radiation test results. KHOU called it "Texas math," in part two of its ongoing series. Thanks to the TCEQ's under-reporting of radioactive content, one particular water provider in Harris County was able to skirt needed maintenance for years, even though uncensored tests showed radiation was almost always above legal limits. **Independent tests, the station noted, showed that some of the radiation contained harmful alpha particles, which can cause cell mutations and increase the risk of cancer. The practice of under-reporting radiation continued until last year, when the EPA once again demanded Texas comply with the law.** "What was illegal and a bad idea yesterday is illegal and a bad idea today," TCEQ chairman Bryan W. Shaw told The Dallas Morning News. **"We won't see any environmental benefits from this. We'll just see the additional bureaucracy associated with permitting in this state and across the U.S." In an editorial, the paper called Republicans' fight to protect industry over environmental regulations a "dangerous roll of the dice" when it comes to federal dollars, noting that new regulations require the state to create a permitting authority to govern emissions, but it refuses.** When the new rules take effect next year, the state's energy industry could effectively be brought to a standstill, with no new construction being permitted. And now water standards, it would seem, may be the next major clash between Texas regulators and federal authorities. **"Is this what [Governor] Rick Perry means when he talks about standing up to the feds?"** The Texas Observer asked. This video is part one of an investigative series by CBS affiliate KHOU, aired Nov. 9, 2010 (Webster, 2010).

**Title/Headline:** *Two Injured In Texas Plant Explosion*

**Abstract:** An explosion has injured two people at a plant in Crosby, Texas, police said Friday. All of the employees at the plant were accounted for after the blast, according to the Harris County Sheriff's Office. Hazardous materials teams were called in, but no evacuations were required as a result of the explosion, sheriff's officials noted (CNN, 2010).

**Conclusion:** Outside of New York City, the state of Texas is terror central. Interestingly, Ron Paul, and Alex Jones come from the state where the nuclear terror attack at the Super Bowl will likely occur. A coincidence? Not a chance.

## The Nuclear Bible: The Chicago “Windy City” Bio Attack?

**Intro:** Should a nuclear terror attack transpire in America, it is highly likely that it will be followed up by a bio terror attack, similarly to the Anthrax Attacks after 9/11. While there is no way to be for certain, the 11<sup>th</sup> and the 26<sup>th</sup> of each month would be likely dates. Unfortunately, recent events point towards a potential false-flag bio attack in the Chicago area, due to revelations surrounding Larry Silverstein's (owner of the Twin Towers) purchase of the Sears tower and soon to be Chicago mayor Rahm Emanuel. These two unapologetic Zionists look hell bent on terrorizing America in a whole new sick and twisted manner. Do your part to save the lives of millions, and forward this information as soon as possible.

**Event:** 2001 Anthrax Attacks

**Abstract:** The 2001 anthrax attacks in the United States, also known as Amerithrax from its Federal Bureau of Investigation (FBI) case name, occurred over the course of several weeks beginning on September 18, 2001, one week after the September 11 attacks. Letters containing anthrax spores were mailed to several news media offices and two Democratic U.S. Senators, killing five people and infecting 17 others. The ensuing investigation became "one of the largest and most complex in the history of law enforcement." Media reports focused on other possible suspects for years, but **FBI files show that the investigation began to focus on Bruce Edwards Ivins as early as April 4, 2005, when Dr. Ivins told the FBI he would not talk any further without his lawyer present. On April 11, 2007, Dr. Ivins was put under periodic surveillance because "Bruce Edwards Ivins is an extremely sensitive suspect in the 2001 anthrax attacks". Ivins was a scientist who worked at the government's biodefense labs at Fort Detrick in Frederick, Maryland. In June 2008, Ivins was told of the impending prosecution, and on July 27, 2008 he committed suicide by an overdose of acetaminophen. On August 6, 2008, federal prosecutors declared Ivins to be the sole culprit of the crime. Two days later, Sen. Charles Grassley and Rep. Rush Holt called for hearings into the DOJ and FBI's handling of the investigation. On February 19, 2010, the FBI formally closed its investigation.** A review of the science used in the investigation is under way at the National Academy of Sciences. Some information about the case related to Ivins' mental problems is still "under seal. Lawsuits filed by the widow of victim Bob Stevens have not yet been settled (Wikipedia, 2010).

**The Sears Tower in Chicago is owned by Larry Silverstein, the owner of World Trade Center # 7, the 3<sup>rd</sup> WTC Tower that was demolished on September 11, 2001.**

**Title/Headline:** Building 7 "Pull It" Comment: Silverstein Responds

**Abstract:** For a year and a half since this website first gave traction to the story, the Internet and talk radio has buzzed with speculation on what Larry Silverstein meant when he admitted on a September 2002 PBS documentary, 'America Rebuilds' that he and the NYFD decided to 'pull' WTC 7 on the day of the attack. We have been resolute in pointing out that to 'pull' a building means to demolish it. The very same PBS documentary features demolition experts using the term 'pull it' as they discuss controlled demolitions of buildings. Speculation around the issue has only increased with Silverstein's refusal to explain his comments. The question is, if Silverstein didn't mean that "pull it" meant to demolish the building then what did he mean? It's obvious that the kid's been caught with his hand in the cookie jar and he's trying to make excuses. Was Silverstein simply talking about evacuating the building? We know for a fact that although the building had been evacuated there were still secret service personnel in the building who died when it collapsed. They weren't told to evacuate. **Whatever Silverstein meant by the term "pull it," the fact remains that the**

**building collapsed exactly like a controlled demolition and it wasn't even hit by a plane. It was 'pulled' in the true sense of the term, by well placed explosives.** So the fact that Silverstein hasn't made the effort to make this justification in the wider media, and was only willing to comment on it when pushed, tells us that he's not comfortable in being questioned on this, in the face of what now must be hundreds of people calling his office asking about it. **We need a clear and concise answer. What are we to expect next? Cornered animals are very unpredictable. We're waiting for the day when they hold their hands up and say 'you're right, explosives brought down the buildings!' Al-Qaeda had their agents wire the buildings before the attacks!** It takes demolition experts weeks and sometimes months to successfully wire a building, the supposition that Mohammed Atta's motley crew could have pulled it off under cover is too absurd to contemplate. Our focus remains steadfast. These criminals are under a relentless barrage of questioning. **Criminals in the spotlight cannot commit more crimes and get away with it. They would love dearly to carry out another terror attack and have everyone worship them again as they did after 9/11. But our hard work in keeping them on the back foot is saving lives and liberties in the long term. Keep working hard and stay in the fight** (Prison Planet, 2005).

**Title/Headline:** *Government Biological Weapons Legislator: Anthrax Inside Job Cover Up Continuing*

**Abstract:** A former government biological weapons legislator appeared on the nationally syndicated Alex Jones show yesterday to discuss his detailed knowledge of the cover up of the 2001 anthrax attacks, which he is adamant were perpetrated by criminal elements of the US government in an attempt to foment a police state by killing off opposition to hardline post 9/11 legislation. Dr Franics A. Boyle literally helped write the law with regards to terrorism, as he was responsible for drafting the Biological Weapons Anti-Terrorism Act of 1989 that was passed unanimously by both Houses of Congress and signed into law by President Bush Snr. Professor Boyle teaches international law at the University of Illinois, Champaign. **He holds a Doctor of Law Magna Cum Laude as well as a Ph.D. in Political Science, both from Harvard University.** He has also served on the Board of Directors of Amnesty International (1988-1992), and represented Bosnia- Herzegovina at the World Court. In light of the latest developments with the FBI Anthrax investigation, the professor joined Alex Jones on air to re-cap the story that made waves in late 2006. **In October 2001 when the anthrax attacks took place and it was revealed that the spores were super weapons grade anthrax at one trillion spores per gram created with special electro-static treatment, Dr Boyle says it became obvious to him that there was nowhere it could have come from other than a government lab. Dr Boyle proceeded to call a very high level official in the FBI who deals with terrorism and counter-terrorism, Spike Bowman, whom he had met at a terrorism conference at the University of Michigan Law School. Dr Boyle went through all the names, the contractors and the labs for Anthrax work with the FBI's Bowman. Bowman then informed Dr Boyle that the FBI was working with bio-lab Fort Detrick on the matter, to which he responded that Fort Detrick could really be the main problem. "I told Mr Bowman in October of 2001 that the only people that had the capability to do this would be those individuals working at either United States Government labs, or private contractors and things of this nature, and it obviously seemed to me that this was U.S. government related."** the University of Illinois Professor told listeners. It was documented at the time that the anthrax strain used was military grade. This was later widely reported in 2002 in publications such as the New Scientist. **"At that point I assumed good faith on the part of the FBI in this investigation because it had killed several people, it had shut down the United States Congress, which I think was probably the greatest political crime ever inflicted on our Republic in its history. But then I read that the FBI had authorized the destruction of the U.S. government's Ames strain collection."** Boyle continued. The destruction of the anthrax culture collection at Ames, IA., from which the Ft. Detrick lab got its pathogens for U.S. biowarfare programs, was blatant destruction of evidence as it meant that there was no way of finding out which strain was sent to who to develop the larger breed of anthrax used in the attacks. The trail of genetic evidence would have led directly back to a secret but officially-sponsored US government biowarfare program that was illegal and criminal. "I knew a cover up was underway because legitimate scientific researchers could have taken that collection and used it to genetically re-construct precisely where and when and how the weapon came from. This was clearly a federal crime in its own right." Boyle stated. The Professor explained that the motive behind the attacks was clear: **"I believe the first anthrax attack was designed to ram through the PATRIOT ACT because Senators Daschle and Leahy were holding it up and once the anthrax occurred it rammed right through, indeed, on the renewal of the USA PATRIOT ACT, Senator Feingold was holding it up and all of sudden out of nowhere some white powdered substance appeared at one of the Senate office buildings, and all of a sudden the renewal of the PATRIOT ACT went through."** The evidence becomes more compelling when you take into consideration the fact that the White House was on anthrax fighting antibiotics weeks prior to the attacks. The professor stressed that a criminal cover up took place and that it is ongoing: **"They are still doing it today, if you read the investigation, the press conference they heard the other day, it does not add up, if you read the article in today's New York Times it does not add up, it appears that the FBI set the investigation up by scientists in such a way that no one knew exactly what they were doing, they could not communicate with anyone else and only communicated with and took samples from the FBI."** "There is today in existence a stock pile of super weapons grade anthrax that is under the control of the original perpetrators of the anthrax attacks of October 2001 and that stock pile can and will be used again when their masters decide it would be politically convenient to scare and terrorize the American people." "They could launch another attack on us, including Congress, the Judiciary, the media." The professor warned. **"I think what we need to do now is insist upon a full scale Congressional investigation, not some type of presidential commission cover up along the lines of the 9/11 report."** Professor Boyle concluded. Dr Boyle also covered the new evidence suggesting that Dr Ivins, the man the FBI named as the leading suspect in their investigation two weeks ago, has been used as a patsy in the cover up. "Ivins is only the latest dead microbiologist." Boyle stated, **"You also have to tie into this the large numbers of dead microbiologists that have appeared since around the summer before these events, when the New York Times revealed the existence of the covert anthrax weapons programs run by the CIA, and that too is in the public record."** Boyle stressed (Watson, 2008).

**Title/Headline:** *Obama's First Appointment Is Son Of Zionist Terrorist*

**Abstract:** Rahm Emanuel's father was member of militant terror group that bombed hotels, massacred villagers – Obama pick is keen supporter of lobbying group aimed at creating militarized youth brigades President elect Barack Obama's first appointment, Rahm Emanuel, who is set to become chief-of-staff, is the son of a member of the Zionist terrorist group Irgun, which was responsible for bombing hotels, marketplaces as well as the infamous Deir Yassin massacre, in which hundreds of Palestinian villagers were slaughtered. Revelations about Obama's relationship with Bill Ayers, a Weather Underground domestic terrorist, which dogged him during the final weeks of the campaign trail, pale in significance to his selection of Emanuel, whose father, Benjamin M. Emanuel, was an Irgun member. Irgun has been labeled a terrorist organization by both The New York Times newspaper and by the Anglo-American Committee of Enquiry. Irgun was closely affiliated with the widely feared hardcore terrorist Stern Gang, an organization that carried out assassinations, train bombings and bombed police stations in an attempt to pave the way for unrestricted immigration of Jews into Palestine. Irgun operated in Palestine between 1931 and 1948. Following the ideology of right-wing Revisionist Zionism, Irgun's doctrine was that, "Every Jew had the right to enter Palestine; only active retaliation would deter the Arabs and the British; only Jewish armed force would ensure the Jewish state". This manifested itself by way of terror attacks such as the July 1946 bombing of the King David Hotel in Jerusalem, which killed 91 people. In 2006, Israelis including former Prime Minister Benjamin Netanyahu and former members of Irgun, attended a 60th anniversary celebration of the bombing organized by the Menachem Begin Centre. Buses and marketplaces were also a target for Irgun, who were widely chastised for favoring attacks against civilian targets. The widely condemned Deir Yassin massacre, which occurred in April 1948, involved Irgun working in consort with the Stern Gang and going house to house slaughtering Palestinian villagers. Eyewitness accounts of spies working for mainstream Jewish authorities, such as Meir Pa'il, reported Irgun members running around shooting civilians "full of lust for murder". "I saw the horrors that the fighters had created. I saw bodies of women and children, who were murdered in their houses in cold blood by gunfire, with no signs of battle and not as the result of blowing up the houses," said eyewitness Eliahu Arbel. "[One body was] a woman who must have been eight months pregnant," noted Jacques de Reynier, a French-Swiss Representative of the International Red Cross, "He hit in the stomach, with powder burns on her dress indicating she'd been shot point-blank.". The son of a man who helped carry out this slaughter has now been selected by Obama to be his chief-of-staff. Cries of "sins of the father" lose their gusto when one considers the fact that, after the 1996 re-election of Bill Clinton, Rahm Emanuel "Was so angry at the president's enemies that he stood up at a celebratory dinner with colleagues from the campaign, grabbed a steak knife and began rattling off a list of betrayers, shouting 'Dead! ... Dead! ... Dead!' and plunging the knife into the table after every name." Sounds like a nice guy. Rahm Emanuel is also an enthusiastic supporter of the United States Public Service Academy Act, a lobbying group founded in 2006 in order to promote the foundation of an American public service academy modeled on the military academies – a youth corps whose students would be trained in "civilian internship in the armed forces". This rings the alarm bells when we recall Obama's pledge to create a "civilian national security force" that is "just as powerful, just as strong, just as well-funded" as the U.S. military. A creepy You Tube video of a brown-shirt style Obama youth brigade chanting and marching military style emerged last month, raising fears about where the messianic cult-like status of Obama's image could eventually lead (Watson, 2008).

**Title/Headline:** *Rahm Emanuel's Father: An Israeli Terrorist?*

**Abstract:** The appointment of Rahm Emanuel triggered widespread interest in Israel, the native country of his former Jewish underground fighter father. The older Emanuel, a paediatrician born in Jerusalem, was a member of Irgun, the hard-line militant group which fought for Jewish independence until 1948. It was described as "terrorist" at the time by Britain. Mr Emanuel's appointment could reassure Israel that Mr Obama will continue America's close alliance. The Ynet news service quoted Michael Kotzin, a leader of the Jewish Federation of Metropolitan Chicago, as saying Mr Emanuel is a frequent attendee at Israel-related events. He co-sponsored a Bill defending Israel against a world court advisory opinion in 2004 criticising the route of the military's separation barrier for cutting deep into the West Bank, and co-sponsored another Bill congratulating Israelis and Palestinians who work together for peace. He is credited with choreographing the famous handshake between Yasser Arafat and Yitzhak Rabin on the White House lawn in 1993 (Belfast Telegraph, 2008).

**Title/Headline:** *Is A Bioterrorism Attack In The U.S. Imminent?*

**Abstract:** As India picks up the pieces of last week's deadly terrorist attacks in Mumbai, a congressional study warns of a possible bioterror strike in the U.S. by 2013. In fact, biological weapons—anthrax, Ebola, influenza, and other pathogens—are more likely than nuclear weapons to be used to initiate the attack, according to CNN, which obtained an early copy of the study, which officially released today by the Commission on the Prevention of Weapons of Mass Destruction Proliferation and Terrorism. Former Florida Sen. Bob Graham, chair of the panel created earlier this year to probe the possibility of terrorist hits in the U.S., told CNN that if such an attack were to occur, it would be "9/11 times 10 or a hundred in terms of the number of people who would be killed." Biological weapons are a more likely choice than nukes, he said, because their ingredients are easier to obtain and such an attack "would be easier to carry out." The commission's recommendations, according to CNN: the U.S. government must impose tight security at U.S. labs with such poisons on hand (a measure that might have helped prevent the 2001 anthrax mailings or at least helped law enforcement catch the culprit sooner), strengthen international treaties so that other countries also improve safeguards, enhance surveillance to detect early signs of an attack, and develop better ways to track the source of any biological weapons. Some scientists have also been pushing for the U.S. to vaccinate millions of citizens in advance of an attack, while others say only doctors, paramedics, nurses and other first-line responders should be vaccinated to help limit damage in the event of a bioterror attack. Critics, however, caution that widespread vaccination might not be effective if a disease-causing pathogen mutates and becomes resistant to a vaccine. Though he stressed the threat of a bioterror attack, Graham did not rule out a nuke strike, noting that as more countries develop their nuclear arsenal it becomes more likely that terrorists will also get their hands on the technology and materials. The bipartisan report faults the Bush administration for failing to devote enough resources toward preventing such an attack, the *Washington Post* reported Sunday. The *Post* adds that, according to the report, U.S. policies have at times "impeded international biodefense efforts while promoting the rapid growth of a network of domestic laboratories possessing the world's most dangerous pathogens." According to the *New York Times*, the report also singled out Pakistan, which has nuclear capability, as a security priority for the incoming Obama administration. Not surprising given that the Mumbai terrorist attacks are believed to have been executed by Pakistani militants (Greenemeier, 2008).

**Title/Headline:** *Chicago Cops Dodge Blagojevich/Sears Tower Investigation*

**Abstract:** A Chicago Police Department official, who refused to be identified by name, stated that city law enforcement would avoid investigating allegations against embattled Illinois Governor Rod Blagojevich and Mayor Richard M. Daley. Former Army intelligence officer Capt. Eric H. May, military/political editor of the *Lone Star Iconoclast*, recently repeated that the governor and mayor were co-conspirators in a May 2-4, 2006, attempt to sabotage Chicago's Sears Tower. The 110-story building was bought on the day of the March 11, 2004, Madrid bombing by Larry Silverstein. Even with recent revelations of widespread corruption and conspiracy by Illinois and Chicago officials, the former NBC editorial writer's allegations would seem outlandish – were they not backed up by a document trail connecting everyone from top government officials to media mainstays and even active-duty military intelligence. All of them coalesced into an informal alliance against the governor, the mayor and Homeland Security director Michael Chertoff, who was heading up exercises set to simulate the collapse of an unnamed downtown Chicago skyscraper. All of them believed that the chance of an attack against the Silverstein property was real. The documents tell the tale. On April 26, 2006, advised of a possible attack by inside sources, May put in calls to Illinois National Guard Public Affairs Officer Col. Tim Franklin and Chicago Police Public Information Officer Laura Kubiak. Both confirmed the existence of terror exercises rehearsing the demolition of Sears Tower. Alarmed,

May issued RED ALERT: "CHICAGO 911" CONFIRMED, which was quickly posted worldwide. **The next day, April 27, the Illinois governor's office issued a press release confirming the just-exposed exercises, revealing that the exercises, involving up to 2,000 participants, had been in the works – unannounced – for seven months.** Shortly afterwards, May wrote Blagojevich directly. He copied contacts in the Defense and State Departments, stating his conviction that there was a treasonous plot afoot. After two days of silence from the governor's office, May began to give interviews, expressing his doubts about Blagojevich and Daley. The Chicago mayor was curiously absent from the city at the time on a first-ever visit to Israel, in the company of Israeli intelligence. "The Edge," hosted by radio journalist Daniel Ott, spread word about the suspicious exercises widely throughout the Midwest. **It may seem inconceivable that Chicago police would still shy away from investigating or even discussing the possibility of an official conspiracy, but May isn't surprised. "We should remember just how dangerous government can be. Every great American since the Founding Fathers has agreed on that point.** No one should be surprised that 'Blago' and company are part of a conspiracy. It wasn't so long ago that Illinois officials conspired with Al Capone. The Chicago cops stood by and played dumb then, too." Decorated Vietnam combat veteran Merlin Neadows, who was part of what has since come to be called the "Chicago Mayday Mission," is even harsher with Windy City law enforcement: "They're a disgrace," the former infantryman said. **"They know that we did their job while they hid back in 2006, and they're still hiding. If it hadn't been for us Internet infowarriors, Chicago would have had a terror attack for sure"** (Fox, 2008).

**Title/Headline:** *Obama Orders US Government To Begin Preparing For Biological Attack*

**Abstract:** The US Post Office could play a key role in distributing medical aid in the event of a biological attack, according to an executive order released by the White House. The order signed by President Barack Obama directs government agencies, local law enforcement and the US Post Office to work on a model for distribution of medical countermeasures in the wake of a biological attack. "This policy would seek to: (1) mitigate illness and prevent death; (2) sustain critical infrastructure; and (3) complement and supplement State, local, territorial, and tribal government medical countermeasure distribution capacity," the order said. "The US Postal Service has the capacity for rapid residential delivery of medical countermeasures for self administration across all communities in the United States," the order added. The US Health and Human Services Secretary Kathleen Sebelius and Homeland Security Secretary Janet Napolitano were instructed to work with the post office to develop a "dispensing model for US cities to respond to a large-scale biological attack, with anthrax as the primary threat consideration." The order calls for the model to be drawn up within 180 days, but gives no details as to whether the idea of using the US postal system to assist Americans in the wake of a biological attack is a new one. **The United States has sought to bolster its capacity to respond to biological attacks since 2001, when anthrax-laced letters mailed to people across the United States led to five deaths.** The order came amid heightened security concerns here following an attempt to bring down a US-bound jetliner on Christmas Day. A 23-year-old Nigerian has been charged in the case (The European Union Times, 2010).

**Title/Headline:** *Obama Gets 'F' on Stopping Spread Of Weapons Of Mass Destruction*

**Abstract:** A bipartisan, independent commission on stopping the spread of weapons of mass destruction says that the Obama administration has failed in its first year in office to do enough to prevent a germ weapons attack on America or to respond quickly and effectively should such an attack occur. In a 19-page report card being published Tuesday, the Commission on the Prevention of Weapons of Mass Destruction, Proliferation and Terrorism, chaired by former Senators Bob Graham, a Democrat from Florida, and Jim Talent, a Missouri Republican, gives the new administration the grade of "F" for failing to take key steps the commission outlined just over a year ago in its initial report. Specifically, the commission concludes that the Obama administration, like the three administrations before it, has failed to pay consistent and urgent attention to increasing the nation's ability to respond quickly and effectively to a germ attack that would inflict massive casualties on the nation. **The commission repeated its warning that unless nations acted decisively and urgently, it was more likely than not that a WMD will be used in a terrorist attack somewhere in the world by the end of 2013, and that the terrorists' weapon of choice would be biological, rather than nuclear.** The administration's delayed response to the H1N1 virus, the report concludes, demonstrated that the United States was "woefully behind in its ability to rapidly produce rapidly vaccines and therapeutics, essential steps for adequately responding to a biological threat, whether natural or man-made." Even with time to prepare, the report noted, the epidemic peaked "before most Americans had access to vaccine."

**And a bio-attack, it warned, would have no such warning.** The administration's lack of urgency was also reflected in its lack of priority on producing and distributing enough vaccines and other medical countermeasures for Americans, its reluctance to insist that hospitals have enough surge capacity to treat people who would be infected in a bioterror attack, and the lack of a national plan to coordinate federal, state and local efforts following a bioterror strike, the document asserts. **Ultimately, the commission chairman and vice chairman say, the "lack of preparedness" and "consistent lack of action" reflect "a failure of the U.S. government to grasp the threat of biological weapons."** Unlike its effort to prevent a nuclear attack, the Obama administration has shown "no equal sense of urgency" about preventing or responding to germ warfare that might cause comparable death and suffering, the commission concludes. **The report assigns 17 grades that it says highlight the issues of greatest priority in protecting Americans from WMD. The commission gave the administration a "D+" for its efforts to tighten oversight of high-containment labs in which experiments involving the deadliest pathogens are conducted.** There were still far too many Federal, state, and local agencies regulating germs in sometimes conflicting ways, it states. The commission also gave Congress a failing grade for failing to consolidate the estimated 82 to 108 committees and subcommittees that oversee some part of the Department of Homeland Security. **"Virtually no progress has been made since consolidation was first recommended by the 9/11 Commission in 2004," the report asserts.** The Obama administration disputed the findings of the report Tuesday, arguing that the president has accomplished a "great deal" in his first year in office. **White House spokesman Nick Shapiro cited a recently signed executive order establishing "federal capability to rapidly provide medical countermeasures to supplement state and local response in the event of a large-scale biological attack."** He said Obama would launch a new initiative aimed at addressing potential "public health threats" during his State of the Union address Wednesday. The Graham/Talent WMD Commission, as it is known, is a legacy of the 9/11 Commission, which recommended its creation to examine WMD proliferation threats in its own report. **In December, 2008, the WMD commission concluded in its final report that American national security faced ever growing threats from unconventional weapons, and from biological weapons in particular. Its report, "World at Risk," unanimously concluded that bioterrorism was the most likely WMD threat the nation confronted given the exponential growth of biological technology and the stated desire of Al Qaeda and other terrorist groups to acquire such weapons.** It called upon the administration to take 13 steps to reduce America's vulnerability to such an attack. The new report card assesses the progress that the Obama administration has made in implementing its recommendations. **The report is not uniformly negative. It gives the Administration high marks -- an "A" -- for the reviews it has conducted into how best to store and secure dangerous pathogens, and two "A-minus" grades for appointing a WMD coordinator and restructuring how the White House oversees homeland security issues.** But it warns that such steps are not commensurate with the threat the nation faces from terrorist groups searching for unconventional weapons in asymmetrical warfare. Robert Kadlec, **President Bush's former special adviser on bio-defense policy,** declined to comment on the commission's failing grade in the area in which he worked, saying there was still "ample opportunity to provide more focus and resources" for bio-preparedness in the administration's remaining three years. **"This is a hard problem which deserves high priority,"** he said. Two defenders of the administration's policies, both of whom asked not to be identified by name because they were speaking without authorization, said that the **Obama White House gave bio-defense and countering nuclear proliferation high priority. One official said that Obama's second presidential security directive -- the first being the reorganization of the White House national security apparatus -- mapped out a national strategy to defend the nation against biological attacks.** He also predicted that the administration would seek increases in its new budget for bio-defense and global surveillance programs. Having been extended for one more year of work in 2009, the 9-member WMD Commission is disbanding after issuing this final report card. **But staff members said that its chairman and vice-chairman intend to form a non-profit organization to continue pressing the government to do more to counter WMD threats** (Miller, 2010).

**Title/Headline:** *Massive Emergency Drills Planned In Chicago, Oak Lawn, Bridgeview, Elk Grove Village And Bensenville*

**Abstract:** **Imagine a bomb blast, a plane crash, a hazardous materials spill and a CTA derailment, all in the same week.** That's the set-up for a massive joint training exercise that's set to start Sunday. The drill is designed to stretch first responders to the breaking point. **Dozens of local, state and federal agencies will respond, and seven hospitals will be ready for casualties.** Anyone who sees the drill might think it's the real thing; Oak Lawn Police Lt. Arthur Clark says it will be very realistic. **"People who live in buildings across the street when they look out their window will see over 300 first responders and over 50 pieces of fire and emergency equipment,"** he said. **"They're going to see people who will be simulated injured."** And that's just for starters. At least seven different scenarios will play through Thursday in Oak Lawn, Bridgeview, Elk Grove Village, Bensenville and in Chicago. One event will be at Soldier Field, another will take place on a stretch of CTA track at 15th Street. There are bound to be traffic tie-ups, and frightening scenes of survivors and victims. **So if you see one, remember this story before you call 911. About 1500 people will be part of this. The folks putting this together say it's one of the biggest exercises ever coordinated in our area.** Volunteers from Great Lakes Naval base will play the injured. **Mannequins will play the fatalities, and they're being dressed for the occasion by the Salvation Army stores** (Chacon, 2010).

**Title/Headline:** *What Do The Sears Tower, WTC, and Terror Drills Have In Common?*

**Abstract:** Larry Silverstein, owner of Silverstein Properties, Inc. and the man who leased the World Trade Center Towers also happens to be the owner of the Sears Tower in Chicago. The complex was renamed the Willis Tower on July 16, 2009 and is insured by global insurance broker Willis Group Holdings. The insurer is very important in the grand scheme as can be seen with the WTC, whose insurance settlement amounted to a cool 4.68 billion dollars. A company named Kroll is the company tasked with providing security for the Sears Tower. After 9/11, Kroll purchased Convair, the very company that was responsible for recovering data from WTC hard drives. Kroll also managed the bunker in the WTC and is known to have had a hand in the London 7/7 bombings. The Willis Tower just so happens to have an asbestos problem much like the one that plagued the World Trade Center. Contrary to what many claim, there is clear evidence that shows the asbestos problem within the Willis Tower. Remember that on September 11, 2001, NORAD was conducting a war games drill that simulated planes flying into towers. There is at the very least, a very eerie correlation with the upcoming terror drills that will be conducted in Chicago from June 13 through June 17. This terror drill is slated to be a full scale event carried out over a five day period and will include a simulated airplane crash, terror attack, and the release of a bio weapon. Just a thought (Ambellas & Thomas, 2010).

**Title/Headline:** *Rahm Emanuel Announces Run For Chicago Mayor*

**Abstract:** Rahm Emanuel officially announced Saturday what everyone has known since he quit his job as White House chief of staff, hugged President Obama and returned to Chicago: He's in. To the surprise of no one, Emanuel, who has long talked about his desire to be mayor, told a packed auditorium at a school on Chicago's North Side that he is running to succeed retiring Mayor Richard Daley. The election is Feb. 22. Emanuel represented the city's North Side in Congress before he went to the White House. He has been actively campaigning in the city since his return about two months ago. "Only the opportunity to help President Obama as his chief of staff could have pried me away from here," Emanuel said Saturday. "And only the opportunity to lead this city could have pried me away from the president's side." Since his return, Emanuel also has been courting donors who can add to the \$1.2 million left from his congressional campaign fund. He is one of about a half dozen candidates who have either formally announced or are about to. During his announcement speech, Emanuel pledged not to raise taxes and to award city contracts to the lowest bidder. "Our first responsibility is to make the tough choices that have been avoided too long because of politics and inertia," he said (Fox News, 2011).

**Date:** January 27, 2011

**Source:** Fox News

**Title/Headline:** *Missing Vial Of Nerve Agent Forces Lockdown At Utah Army Base*

**Abstract:** Officials say a missing vial of nerve agent is responsible for a lockdown overnight at a Utah military base that carries out tests to protect troops against biological attacks, Fox13now.com reports. The Army says Dugway Proving Ground, where military weapons are tested, was locked down for hours over a missing vial of VX "nerve agent." The amount missing was less than one fourth of a teaspoon and it was recovered at around 3 a.m., according to the station. VX nerve agent affects the body's ability to carry messages through the nerves. The Army says no one was in danger and the lockdown was ordered as a precaution. Between 1,200 and 1,400 people were inside the facility at the time. Dugway is about 85 miles southwest of Salt Lake City. A news release from the base on Thursday said, "during a routine inventory of sensitive material in the chemical laboratory, Dugway officials discovered a discrepancy between the records and the agent on-hand. As a precaution, the commander immediately locked down the installation and began efforts to identify the cause of the discrepancy." No employees on the base were injured, a spokeswoman for Dugway told the station (Fox News, 2011).

**Conclusion:** A plane crashing into the Sears tower oozing a green mist in the Windy City is not imaginary at this point, but the EXACT drill that took place in Chicago on June 9, 2010!. Bringing all the media attention to this possible bio attack is the only real effective means of thwarting it. If it does happen in this manner, the American public will know who to blame this time around. Please see Chapter 43: The Unusual Suspects for more info...

## The Nuclear Bible: The End of the Internet

**Intro:** The biggest thorn in the side of the Globalists is the internet and there are now rumors that the world may be in the process of going to Internet 2, a highly controlled internet with Chinese style censorship. In 2009, Jay Rockefeller, stated that **“The internet never should have been invented”** (YouTube, 2009). On January 15<sup>th</sup>, 2010, Paul Joseph Watson reported that the controversy surrounding White House information czar and **Harvard Professor Cass Sunstein’s blueprint for the government to infiltrate political activist groups has deepened**, with the revelation that in the same 2008 dossier **he also called for the government to tax or even ban outright political opinions of which it disapproved**. Sunstein was appointed by President Obama to head up the Office of Information and Regulatory Affairs, an agency within the Executive Office of the President.

On page 14 of Sunstein’s January 2008 white paper entitled **“Conspiracy Theories,”** the man who is now Obama’s head of information technology in the White House proposed that each of the following measures **“will have a place under imaginable conditions”** according to the strategy detailed in the essay.

- Government might ban conspiracy theorizing. (most of which occurs online)
- Government might impose some kind of tax, financial or otherwise, on those who disseminate such theories (which would most likely be levied based on online behavior)

Watson went on to state, **“That’s right, Obama’s information czar wants to tax or ban outright, as in *make illegal*, political opinions that the government doesn’t approve of”** (Watson, 2010).

These statements shows the disdain for the internet by the powers that be, because more and more people worldwide are tuning out of the mainstream media and onto the internet for their news and information, due to the corporate media’s unwillingness to speak the truth about a number of issues, particularly, **the North American Union, the New World Order, WMD’s, 9/11 Truth, vaccines, and countless other topics**. Should China be implicated in a “Cyber Attack” of some sort that enables the nuclear terrorism on February 7, 2010, or in the near future, we can say goodbye to the free internet as we know it.

**Title/Headline:** *US Needs Plan For Online Terrorism Recruiting, Expert Says*

**Abstract:** The U.S. government lacks a plan to counter terrorist recruiting efforts online, even though such efforts by jihad groups are growing, one terrorism expert told U.S. lawmakers. The U.S. government doesn't make an effort to engage with people who may be open to terrorist recruiting efforts and dissuade them from joining, Bruce Hoffman, a professor in the School of Foreign Service at Georgetown University, told lawmakers Wednesday. **The U.K. government has a program that works with local communities to identify possible targets for terrorism recruiting, said Hoffman, a former scholar in residence at the U.S. Central Intelligence Agency. "Very clearly, our adversaries have a communications strategy,"** Hoffman told a subcommittee of the House of Representatives Homeland Security Committee. "Lamentably, we don't." Instead of on-the-ground programs working with potential targets of terrorism recruiting, U.S. agencies have, in some cases, tried to control terrorism communications on the Internet, Hoffman said. "We shouldn't be censoring the Internet," he said. **"I think the problem is we default toward these very intrusive approaches." While most witnesses at the hearing agreed that the U.S. government shouldn't be censoring Web sites linked to terrorism,** John Philip Mudd , a senior research fellow at the Counterterrorism Strategy Initiative at the New America Foundation, suggested that taking down terrorism recruiting Web sites may be helpful. Internet service providers should have protection from lawsuits if they take down terrorism-related Web sites, said Mudd, a former counterterrorism official with the CIA and the U.S. Federal Bureau of Investigation. **"We're not going to stop Internet recruitment and radicalization,"** he said. **"We can work on it, we can chip away at it, but it's not going to stop."** Members of the subcommittee decried the ability of terrorists to recruit followers online, but several lawmakers also said they want to be careful that the U.S. government doesn't trample on free speech rights when it tries to counter terrorism recruiting activity online. There's an active debate in the U.S. security community about whether law enforcement agencies should attempt to take down Web sites recruiting terrorists, but by taking down sites, investigators could lose valuable information, said Representative Michael McCaul , a Texas Republican. Mudd seemed to disagree. Keeping terrorism Web sites online may give investigators short-term gains, he said. **"But in general, I'd say, make sure they can't spread the ideology, because that's spreading the revolution,"** he said. The U.S. government has, at times, been too heavy-handed in its antiterrorism efforts, but there's also a proliferation of terrorism recruiting materials online, McCaul said. More than 5,000 Jihadist Web sites and discussion forums are online, he said. **"I don't think anyone here disputes that the terrorists are successfully using the Internet to help spread their message,"** he said. **"Terrorists once had to travel to terror camps in Pakistan to receive indoctrination and training. Now, aspiring terrorists only need to open their laptop and connect to the Internet."** Representatives of the American Civil Liberties Union (ACLU) and the Center for Democracy and Technology said that U.S. courts have established clear rules for when it's appropriate for government law enforcement agents to take away free speech rights. A 1969 Supreme Court case established that subversive speech was protected by the First Amendment to the U.S. Constitution unless it incited "imminent lawless action," said Anthony Romero , the ACLU's executive director. In many cases,

terrorism Web sites don't rise to that level, Romero suggested. While several lawmakers expressed concerns about terrorism recruiting online, Brian Jenkins, a senior advisor at research and analysis firm **The RAND Corp.**, suggested that **terrorism recruiting efforts in the U.S. since the Sept. 11, 2001, attacks have been limited. RAND found that only about 125 people in the U.S. were recruited to terrorism groups between Sept. 11, 2001, and 2009, he said. "There are veins of extremism, there are handfuls of hotheads, but no apparent deep reservoir from which Al-Qaeda can recruit,"** he said. Terrorists have gotten to the implementation stage in only three plots, including a failed car bombing in New York City May 1, in the U.S. since Sept. 11, Jenkins said. An online recruitment campaign is "producing very few active terrorists," Jenkins added. **"The number of English language Web sites vastly exceeds the number of terrorists it has produced. As a marketing effort, it would be judged a failure"** (Gross, 2010).

**Title/Headline:** *FBI Warning Of Al Qaeda Hit Lists, Bomb-Making Tips Led To Shutdown Of Blogging Site*

**Abstract:** A popular website that hosted more than 70,000 bloggers was shut down suddenly last week after the FBI informed its chief technology officer that the site contained hit lists, bomb-making documents and links to Al Qaeda materials, it was reported on Monday. When the WordPress platform Blogetery.com went dead, the initial explanation from the site's host, Burst.net, was that "a law-enforcement agency" had ordered it to shut down, citing a "history of abuse." **The explanation caused a wave of conspiracy theories in the blogosphere. But according to a report on CNET Monday, Burst.net shut down Blogetery.com when it became spooked by a letter from the FBI, in which the bureau detailed the presence of terrorist materials among the blog posts.** Burst.net CTO Joe Marr explained that the FBI contacted them with a request for voluntary emergency disclosure of information, bringing to their attention that terrorist material presenting a threat to the lives of Americans was found on a server Burst.net hosted. FBI agents said they wanted specific, immediate information about the people who posted the material. Paul Bresson, unit chief for the FBI's national press office, wrote in an email to FoxNews.com Monday that Burst.net shut down the website on its own. **"We did not make a request to shut down a website," Bresson wrote. Burst.net executives and public relations staffers were not available for comment; answering machines at the office appeared to be disconnected.** Bloggers had been theorizing for days about the shutdown, mostly speculating about conspiracies and anti-piracy movements. File-sharing news site TorrentFreak claimed it was most likely the work of anti-piracy authorities. **The site speculated that it could be part of a new initiative called "Operation: In Our Sites," designed to crack down on Internet piracy and counterfeiting under the authority of Vice President Joe Biden and U.S. Intellectual Property Enforcement Coordinator Victoria Espinel. "Operation: In Our Sites" has already targeted numerous sites including TVShack.net, Movies-Links.TV, FilesPump.com, Now-Movies.com, PlanetMoviez.com, ThePirateCity.org, ZML.com, NinjaVideo.net and NinjaThis.net. Others wondered whether**

this was a step by the government to assert control over the Web. Just weeks ago, a plan giving the President emergency power to turn off the Internet was approved by the Senate. The reality turns out to be much more serious. A representative for Burst.net said the company had offered Blogetery's operator his money back, but that "should be the least of his concerns." **"Simply put: We cannot give him his data nor can we provide any other details,"** the representative said. **"By stating this, most would recognize that something serious is afoot"** (Fox News, 2010).

**Source:** San Diego State University, Gina Jacobs

**Title/Headline:** *Mapping Cyberspace*

**Abstract:** A \$1.3 million grant from the National Science Foundation will help SDSU researchers create new ways to analyze the spread of information and ideas on the Internet. The multidisciplinary cyber-infrastructure innovation project will map cyberspace by tracking the flow of information and monitoring its movement on the Internet. **"The spread of ideas in the age of the Internet is a double-edged sword; it can enhance our collective welfare, as well as produce forces that can destabilize the world,"** said Ming-Hsiang Tsou, associate professor of geography and the project's lead investigator. **"This project aims at understanding the process by which the impact of co-related events or ideas disperse throughout the world over time and space."** The project seeks to map both the geography and the chronology of ideas over cyberspace, as the ripples of information radiate outward from a given event epicenter. By mapping and analyzing such ripples, researchers hope to better understand the role of new media in biasing, accelerating, impeding or otherwise influencing personal, social and political uses of such information.

**Tracking Terrorist Ideas Online:** One application of the project will be to track terrorist and extremist ideas on the web to see where the information originates and how it spreads. As an example, the news of an obscure preacher's intention to burn the Koran spread like wildfire in various media throughout much of the world in general, and in the Islamic world in particular. **"This singular announcement by a solitary person touched off violent protests that took the lives of many and threatened further escalation of tensions and rifts between the West and the Islamic world,"** said Dipak Gupta, co-investigator on the project and professor of international security and conflict resolution. **"This episode illustrates the potential of relatively isolated events for destabilizing the world in unforeseen ways and with far-reaching consequences."** By identifying the path of information online, researchers hope to learn what makes a place more prone to the spread of any particular idea. In addition to terrorist ideas, the project also seeks to establish ways to map the spread of information on other ongoing topics, such as epidemics and global climate change, and other event-based topics, such as wildfires, earthquakes and hurricanes.

**Diffusion of Information:** **"Understanding information diffusion and acquisition—e.g., searching, sending—patterns in response to such disasters and epidemics may significantly facilitate intervention responses, and eventually, prevention responses,"** Tsou said. The first phase of the project will develop basic language analysis tools creating semantic maps—words, phrases and patterns of language use—which characterize the seed sites in the spread of ideas. **Using these maps to guide web searches will provide a detailed picture of how seed sites are reporting an event.** By using this linguistic framework, a sophisticated web search will indicate how these seed sites and their social networks of users are reporting an event and influencing each other. In the second phase of the project, researchers will collect data on the spread of words, phrases and patterns of language use on websites over time and space. By mapping these sites on a world map, visualization will show how the ideas are spreading. In the third phase of the project, statistical analyses will seek to understand the reasons for a particular course along which an idea spreads. **In other words, potential factors that cause "susceptibility" to and "immunity" from a particular set of ideas will be identified. This project will continue for four years, collecting and analyzing data, and developing a theoretical structure on the spread of ideas.**

**Understanding 'Collective Thinking':** **"This project will help us to better understand the 'collective thinking' of human beings and minimize misunderstandings between different groups and people,"** Tsou said. *Mapping Cyberspace to Realspace: Visualizing and Understanding Spatiotemporal Dynamics of Global Diffusion of Ideas and the Semantic Web* was funded for four years starting Oct. 1 (Jacobs, 2010).

**Source:** Sacramento Press, Hal Silliman

**Title/Headline:** *CIA Director Tells Cap-To-Cap Delegates: Cyber Attack Could Be Next "Pearl Harbor"*

**Abstract:** Central Intelligence Agency director Leon Panetta told 300 Sacramento Metro Chamber Cap-to-Cap delegates that the next "Pearl Harbor" is likely to be an attack on the United States' power, financial, military and other Internet systems. Panetta addressed the Sacramento delegation that includes 43 elected officials and hundreds of business and civic leaders who are in Washington D.C. for the annual program that advocates for the region's most pressing policy issues. He spoke on Monday, April 19, during the Cap-to-Cap opening breakfast. **"Cyber terrorism" is a new area of concern for the CIA, Panetta said. The United States faces thousands of cyber attacks daily on its Internet networks. The attacks are originating in Russia, China, Iran and from even hackers. "The next**

Pearl Harbor is likely to be a cyber attacking going after our grid...and that can literally cripple this country,” Panetta said. “This is a whole new area of threat.” But cyber terrorism is just one of four primary missions for Panetta, who took over directing the CIA last year after appointment by President Obama. **The CIA is also focusing on counter-terrorism, reducing the proliferation of weapons of mass destruction and fighting narcotics trafficking. Al Qaeda is becoming a viscous target, and as CIA and military operations tamp it down in Pakistan, Afghanistan and Iraq, the terrorist elements are moving to places like Somalia, Yemen and North Africa—as well changing its tactics, he said. “The president’s direction...is we must dismantle and destroy Al Qaeda and its known elements,” he said. “It’s a fundamental mission....The primary effort takes place in Pakistan and tribal areas. We are now focused on Afghanistan and have increased our presence there.”** Meanwhile, CIA is working to help Iraqis fight Al Qaeda. **“Even as our military draws down in Iraq, we’ll keep our presence there...to provide intelligence to the Iraqis so they can secure their own country.”** **Worrisome, he added, is how Al Qaeda is “coming at us in other ways.”** These include using individuals who have clean records and are not being tracked; individuals who are already in the U.S.A. and in contact with Al Qaeda; and individuals who decided to “self-radicalize” and are easily and quickly recruited as terrorists. Previously, Panetta served as a congressional representative from the Monterey area, rising to the House Budget committee chair, and then latter as President Clinton’s Director of the Office of Management and Budget. **“I’ve spent most of my life on budget issues,” he said, noting the “work we did eventually produced a balanced budget for the country.”** When he’s asked why he took on the job at the CIA, he told the group, **“Because considering the size of the federal deficit, I’d rather fight Al Qaeda”** (Silliman, 2010).

**Title/Headline:** *Facebook Shutting Down Rumor Goes Viral: Site Said To Be Ending March 15, 2011*

**Abstract:** It's not clear how it started, but a ridiculous rumor that Facebook is shutting down is spreading fast on social networks. The hot rumor -- evidenced by Google Trends and gaining traction on Twitter -- says that on March 15, 2011, Facebook will be closing down. Not taking a day off, not undergoing maintenance, but ending entirely. The rumor has led to such frantic tweets as, "Facebook will be shutting down on March 2011? I hope not!" (@MissAyl) and "So the rumor is Facebook is shutting down....please don't jump to twitter & ruin my social networking experience" (@jjelksboss). Facebook users are also concerned. Says one: "Facebook is shutting down on March 15, 2011 for good D: Is there any way we can stop this!?!?" And a group has already started to stop Facebook from shutting down. Ironically, Yahoo announced last month that its "Yahoo Video" will be closing down on the date in question, March 15, 2011, and videos can be seen for the last time on March 14. But that hardly means it's taking the rest of the Internet down with it. Just a day ago, an opinion piece published on CNN said that the recent Goldman Sachs investment was the "beginning of the end" for Facebook. That post went viral with more than 5,000 Facebook "likes" and could be partially to blame for the ensuing panic. Whatever the reason for this rumor, it's safe to say that as a site with more than 500 million users and a \$500 million investment from Goldman Sachs recently, Facebook won't be shutting down anytime soon.

**UPDATE (3:30 p.m. ET):** ABC News speculates that the rumor started with this post published Jan. 8 by the satirical Weekly World News. Facebook has yet to officially respond to the rumor.

**UPDATE (6 p.m. ET):** Facebook has officially responded to the rumors with a tweet: **"We didn't get the memo about shutting down, so we'll keep working away. We aren't going anywhere; we're just getting started."** A company spokesman also dismissed the rumors as "silliness."

**Conclusion:** If the internet shuts down, there will be so many angry and irate people that a new form of communication will take its place. That being said, the Internet MUST stay up if there is any chance of changing the world for the better.

## The Nuclear Bible: The Inside Scoop

**Intro:** *The Nuclear Bible: A False-Flag Nuclear Terror Conspiracy* is a book comprised of news and information regarding an upcoming False-Flag Nuclear Terror Attack. This book is NOT finished, but was sent out before Time is of the essence and Super Bowl XLV is less than 2 weeks away. Due to the massive amount of data and information available on this specific topic, articles have been liberally edited for content and structure. Please Google the “Title/Headline” for quickest route to the original article. It is imperative that you research the claims submitted in this text for yourself and that you act accordingly. Albert Einstein is alleged to have said “**Those privileged enough to know have a duty to inform.**” While the information enclosed is not 100% comprehensive, most relevant evidence and information has been documented accordingly.

*The Nuclear Bible* will be published in every language possible, so any help regarding this process is appreciated. ## **The Nuclear Bible: The Who, What, When, Where, How & Why of Nuclear Terror**

The following "Who, What, When, Where, How, and Why" synopsis attempts to portray the basics of *The Nuclear Bible*. This is a very deep, devious, and developed conspiracy between many individuals, governments, organizations, and political entities that will finally be brought into the Light. Any help in bringing this plot to the attention to the good men and woman of America and the World is greatly appreciated.

**WHO: Criminal Globalist Elements.** Located within European Royalty, International Banking Houses, Secret Societies and the U.S., British, and Israeli governments, this rogue network of individuals will attempt to set off a nuclear device in a false-flag terror attack that will ultimately be blamed on Al Qaeda, Pakistan and potentially Russia, China, Iran, and multiple countries in Africa.

As Globalist David Rockefeller stated: **"We are on the verge of a global transformation. All we need is the right major crisis and the nations will accept the New World Order."** Please see Chapter 43: *The Unusual Suspects* for more info...

**WHAT: A Nuclear Terror Attack.** The warnings of an impending terror attack are numerous and the references to stadiums, nuclear terror, Al Qaeda, and Pakistan are exhaustive. Please see Chapter 14: *Pakistan & Nuclear Proliferation*, Chapter 15: *Pakistan & Terrorism* Chapter 16: *Pakistan & World War III* for more info...

**WHEN:** Soon.

**2011 NFL Super Bowl** (XLV), February 6, 2011 in Arlington (Dallas), Texas, USA

**Date: 6/11      The Day After: 7/11**

Please see Chapter 30: *Nuclear Terror Dates, Targets & Scenarios*, Chapter 31: *Nuclear Terror Target # 3: The World Cup*, Chapter 32: *Nuclear Terror Target# 2: The Olympics* & Chapter 33: *Nuclear Terror Target # 1: The 2011 Super Bowl* for more info...

**WHERE:** **Live TV.** A nuclear blast is only visible to the naked eye for approximately 30 to 60 seconds. In order to have its desired terrorizing effect on its victims, a nuclear detonation **MUST** be seen by a live global TV audience, preferably in the hundreds of millions. The top three venues for nuclear terrorism are the World's most watched sporting events: The Super Bowl, the World Cup, and the Summer Olympics.

Please see Chapter 38: *Nuclear Terror & LIVE TV* for more info...

**HOW:** **Hijack & Scapegoat.** The Criminal Globalist Elements has successfully set up the State of Pakistan as the scapegoat of all terrorism and nuclear proliferation, while they themselves have hijacked (6) U.S. 150 kiloton thermo-nuclear weapons in 2007 during a routine weapons transfer from Minot Air Force Base in South Dakota to Barksdale Air Force Base in Louisiana. Please see Chapter 18: *Nuclear Hijack: Top Secret* for more info...

**WHY:** **Control.** Anytime a new theory is presented, one must address and answer the proverbial question of "Why?" In order for the Globalists to remain credible, relevant, and in control, the 9/11 Truth movement, the Ron Paul Revolution, and the Internet as we know it must be eliminated. The aforementioned grassroots movements are waking up millions of people and the Unconstitutional Federal government of the United States is running scared. The powers that be must dismantle, disarm, and force America into the North American Union before it can truly experience its destined neo-renaissance of Freedom and Liberty. The Globalists have been exposed by the freedom of information on the internet and are rushing to complete their sinister plans for global domination. As Obama's Foreign Policy Advisor Zbigniew Brzezinski stated in May of 2010, **"For the first time in all of human history mankind is politically awakened – that's a total new reality – it has not been so for most of human history"**

### **A False-Flag Nuclear Terror Attack Equals:**

- The end of the 9/11 Truth Movement
- 100% Globalist Control over the Internet
- Emergence of the (NAU) North American Union as the "Solution" to Nuclear Terrorism
- Martial Law & Citizen Crackdowns in America
- World War III & Global Government

[www.ae911truth.org](http://www.ae911truth.org)

**The 9/11 Truth Movement:** The Globalists have been exposed at the perpetrators behind the attacks of 9/11, as well as the Mumbai Attacks of 26/11, the London Attacks of 7/7, the Financial Crisis, the Housing Crisis, Geo-Engineering, Eugenics, Climatgate and a host of other atrocities. This final act of Nuclear Holocaust will usher in a rabid fascist corporatist One World Government/New World Order system that is hell-bent on invading or nuking any Nation that stands in its way. World Government has been the quest of tyrants and despots for millennia. Should this event transpire, it would be the single greatest catalyst for world domination known to modern man.

**The Internet:** Long credited for the current global awakening, the Internet will likely be shut down just prior to or right after a nuclear attack. This act will hamper and diminish efforts by politicians, law enforcement and citizen from exposing the true nature of the attacks. Therefore, if you find the information enclosed relevant and credible, it is imperative that *The Nuclear Bible* is downloaded, printed, and circulated immediately. As Senator Jay Rockefeller told Congress in 2009, "It really almost makes you ask the question: Would it have been better if we never had invented the internet...?"

**North American Union (Proposed Flag)**

**The North American Union (NAU):** A false-flag nuclear attack on American soil is likely to bring about the emergence of the North American Union (NAU), the political union of Mexico, Canada, and the United States of America. It is highly likely that alleged "terrorists" from all three Nations will be fingered in the false-flag nuclear attack, thus making it an attack upon all North American Nations. Politicians and the corporate media will attempt to deceive and convince the people of North America that they are safer and more secure with a "nuclear terrorist stopping" security perimeter around all three Nations. The end result of the NAU is the disintegration and obliteration of the people and the traditions that are woven into The United States of America. More importantly, the Constitution of the United States and the American People's Bill of Rights will be null and void, thus rendering the American people politically naked and enslaved.

**Martial Law & Citizen Crackdowns:** A massive nuclear terror attack would empower and enable the U.S. Federal Government to crack down on its civilian population which is in the genesis of all-out revolution. Patriot civilians will likely be rounded up, incarcerated, and ultimately eliminated should these events transpire.

**World War III:** As 9/11 gave reason to the invasion of Afghanistan and Iraq, a nuclear terror attack will give the Obama Administration the "green light" to nuke or invade any Nation that doesn't cower, surrender, and submit to the New World Order/One World Government system. A false-flag nuclear attack will likely be blamed on Pakistan, the greatest documented purveyor of terror and nuclear proliferation on record. The Pakistani scapegoat has been beautifully groomed by the West for the last 30 odd years and is ready to be slaughtered. A nuclear terror attack would be retaliated upon by the United States, which would likely go on a nuking spree of the Middle East, inevitably starting WWII.

**Conclusion:** If you find the information within *The Nuclear Bible* alarming, relevant, and reliable, please see to it that it is forwarded to all:

- 1) **Public Officials:** Local, State, Federal & International (police, sheriff, FBI, CIA, politicians)
- 2) **News Media:** Local, National & International (tv, radio, newspapers, and internet)
- 3) **Sports Media:** Local, State, National & International
- 4) **The Public:** Classmates, Colleagues, Family, Friends, Neighbors & Fellow Church Goers
- 5) **Texas:** Businesses, Churches, Sports Bars, Local Governments in the Dallas/Arlington, Texas area
- 6) **NFL Athletes:** Whether on the Packers or Steelers, forward this information to any known current or retired NFL players

**SAVE, PRINT & FORWARD TODAY:** Due to the unreliability of the internet, especially in the case of a nuclear terror attack, please download and print a physical hard copy of *The Nuclear Bible: A False-Flag Nuclear Terror Conspiracy* today.

## The Nuclear Bible: The NFL & Co.

**Intro:** The following NFL authorities that would be responsible for investigating a nuclear terrorist attack on the Super Bowl, appear to be chosen by the Globalists for such a day. They are associated with certain agencies, governments, corporations, and connections that have been implicated in the attacks of 9/11.

**A few pertinent questions:** Why did the NFL suddenly change its logo? Why did the NFL suddenly change its Super Bowl logo? Who really is the NFL Commissioner? Who was his father? Who is he married to? Who is his wife's father? What did Roger Goodell say in his first press conference as NFL Commissioner? Will a former NFL quarterback lead the Democrats in the U.S. House of Representatives in 2011 to stymie and real investigation? Where will Roger Goodell be on Super Bowl Sunday in Texas?

**Date:** August 9, 2006

**Source:** NBC Sports, Associated Press

**Title/Headline:** *Goodell, From PR Intern To Commissioner: 47-Year-Old Becomes Only Third Top Man Since Rozelle Took Post In 1960*

**Abstract:** The knock on Roger Goodell's hotel room door came almost three hours to the minute after NFL owners began voting for a new commissioner. When he opened it, there stood the Steelers' Dan Rooney. He didn't have to say a word. "When I saw Dan smiling, I knew it wasn't bad news," Goodell said Tuesday. **And right then, in a seamless transition that followed a swift, unanimous selection, the symbol of the NFL's storied history embraced the league's future.** Favored for months to succeed Paul Tagliabue, the 47-year-old Goodell said he expects to begin serving a five-year term before the regular season starts Sept. 7. Goodell, who never stopped rising through the ranks during his lifelong service to the NFL, was chosen on the fifth ballot, beating four other contenders in a vote that took only three hours. He becomes just the fourth commissioner since World War II, having started his NFL career as a public relations intern a quarter-century ago and having served as Tagliabue's second-in-command for most of the last decade. "We've had the two greatest sports commissioners in the history of professional sports, Paul Tagliabue and Pete Rozelle, and I was fortunate to work for both of them," said Goodell, who shook every owners' hand afterward. "I look forward to the challenge and thank them again for their confidence." Goodell remained the favorite even through a four-month search conducted by a committee headed by Rooney and Carolina's Jerry Richardson. **There was no question that he was the choice of the league's most important owners all along, but none declared any allegiance until the finale. "I said from the beginning that we were going to look for the man to lead us,"** Rooney said he told the owners during the voting Tuesday afternoon. "I said that when we finished, I had no doubt that that was Roger Goodell." New England's Robert Kraft, one of the most influential of the newest owners, said: **"Roger got his MBA from Pete Rozelle and Paul Tagliabue. That's not a bad education."** The son of former U.S. Sen. Charles Goodell of New York, Goodell had been Tagliabue's top assistant on expansion and stadium construction. He also was the contact man with union head Gene Upshaw during the recent labor talks. In 2001, he became the NFL's chief operating officer. League revenues have skyrocketed during the 17 years under Tagliabue, who said he would leave his post after brokering new television and labor deals. The NFL will collect about \$10 billion in TV rights fees during the next six years, and enjoys labor peace with the players' association under an agreement completed in March. The owners believed Goodell would carry on in that tradition. **"The continuity was very important to me," said John Mara of the New York Giants, whose family, along with the Rooneys, represent the NFL's founding generation. "Roger has an awareness of the history and the tradition that the league represents."** Goodell beat four other finalists: lawyers Gregg Levy and Frederick Nance; Fidelity Investments vice chairman Robert Reynolds; and Constellation Energy chairman Mayo Shattuck III. Goodell's election was much less complicated than Tagliabue's in 1989, when it took owners seven months to select a successor to Rozelle. Originally, the top choice appeared to be Saints president Jim Finks, who was recommended by an advisory committee. **But many of the newer owners would not back Finks, favored by most old-liners. It took 12 ballots — six of them on Oct. 26, 1989 — to finally elect Tagliabue. Goodell's selection was over in less time than it takes for a long, leisurely lunch. "The process was good in that it got everyone looking ahead and not just at the circumstances in their own city," Tagliabue said.** Tagliabue simply introduced Goodell as the new commissioner, then stepped aside as he took the podium. "I spent my life following my passion," Goodell said. "The game of football is the most important thing. You can never forget that." Giants general manager Ernie Accorsi said, **"Those of us who have been around a long time were rooting for someone from inside the (NFL) family. "He's always been aggressive and always had a presence about him. He's obviously bright. He couldn't be more qualified for this job."** Goodell, born in Jamestown, N.Y., is married and has twin daughters (NBC Sports, 2006).

**Roger Goodell in his first speech as NFL Commissioner:** “I think we gotta lot of challenges to face, and the good news is that we’ll face them together, with 32 owners that are focused and prepared. Cause I think the process allowed us to talk about a lot of those issues, and what we need to do together to address those” (NBC Sports, 2006).

#### A Few Questions, Mr. Commissioner:

- What exact “challenges” does the NFL face?
- Why do we need to face them “together”?
- What exactly will all 32 NFL teams have to focus and prepare for all at the same time?
- What “issues” are so important that all 32 owners and teams are on board?

**Do tell Roger. Your words tease the mediocre minds of football fans worldwide, and anything short of a nuclear terror attack on the Super Bowl would not suffice.**

**Date:** August 31, 2007

**Source:** USA Today, Michael McCarthy

**Title/Headline:** *NFL To Revamp Shield With Redesigned Logo*

**Abstract:** The National Football League is launching a makeover of its red, white and blue "NFL Shield" logo that adorns everything from player jerseys to fan T-shirts and hats. The league is creating a leaner, meaner version of the iconic logo that will debut at the NFL draft in April, 2008. The revamped shield will be slightly taller and thinner, with a new football, fewer stars and darker colors, says Lisa Baird, the NFL's senior vice president of marketing. The redesign marks the first changes to the shield since 1980. At the NFL's annual meeting this spring, commissioner Roger Goodell talked about the NFL Shield as the "envy of the sports world." The league has been careful to make an "evolutionary, not a radical change," says Baird. **The new shield features eight stars (representing the eight AFC and NFC divisions) vs. 25 on the current logo. Why 25? It's a mystery.** After researching the shield's origins, the designers could find no reason for 25 stars, says Jaime Weston, director of brand and creative operations. The shield logo was first used around 1940, two decades after the NFL's founding in 1920. The football at the center has been redesigned to resemble the ball atop the Vince Lombardi championship trophy, says Baird. It replaces the old-fashioned pigskin nicknamed the "Hamburger" inside league offices. NFL vendors will probably thank the league for switching to fewer stars. Some vendors, without permission, have used fewer stars rather than shoehorning 25 tiny stars into smaller shields on hats and T-shirts. **Tinkering with one of the country's most powerful and ubiquitous sports brands will be a risky and expensive business.** NFL sponsors such as Reebok, Riddell, Wilson and EA Sports will have to switch shields on everything from uniforms (players wear three logos at the neck and waistlines and on the helmet) and licensed merchandise to the official "Duke" game ball and Madden video game. Even groundskeepers will have to adopt the new shield at NFL stadiums. **But Baird believes the cleaner, more modern symbol will "pop" better during TV telecasts.** The less-busy logo will also show up better on "third screens" increasingly used by sports fans: cellphones, laptops, iPods and PDAs. **During testing with focus groups, consumers liked the switch to eight stars for eight divisions, she says. "People felt that made more sense than tying in to 32 teams,"** says Baird (McCarthy, 2007).

**Although the NFL says that the 4 and 4 star logo is representative of the four divisions within the NFC and AFC Conferences, the NFL is seriously looking into franchises in Europe, so that particular concept will only be valid for a couple of years. More than likely, the 4 and 4 is representative of the 44<sup>th</sup> President of the United States: Barack Hussein Obama.**

**Date:** February 5, 2010

**Source:** ESPN, Calvin Watkins

**Title/Headline:** *2011 Logo Is First Of NFL's Standard Look*

**Abstract:** The North Texas Super Bowl Committee and the NFL unveiled the logo for Super Bowl XLV on Thursday morning, displaying Cowboys Stadium in the background with the Vince Lombardi Trophy sitting on top of the Roman numerals for the game. **There is a new logo for every Super Bowl, but starting with the 2011 Super Bowl, the theme of the logo will basically remain the same. The only differences from year to year are the stadium backdrop and the Roman numerals for the game.** NFL officials looked at eight designs before recently finalizing their choice. The NFL didn't present it to North Texas officials until last week. **"It's a unique mixture of icons that represents what this whole thing is all about. It's well done,"** said Bill Lively, the president and CEO of the North Texas Super Bowl XLV Host committee. **"We've approached our mission not just for 45 but for many, many [Super Bowl] games to come."** The NFL also announced it's changing its postseason logo system and trophies. The AFC and NFC Championship Game trophies will change from a brown base with an 'A' or 'N' on top of it surrounded by players layered on a wall, to silver trophies in the make of a football. Playoff logos also will change to reflect the football as a trophy. All of the new logos and trophies will take effect starting with the 2010 season. **"We feel that 45 is a special year,"** said Mark Waller, chairman of marketing for the NFL. **"It feels like it's the perfect time to launch it"** (Watkins, 2010).

**The logo is clearly more marketable on a global scale, and fits into the plans for global expansion after the then infamous nuclear attack. Who knows, the NFL may take on the nickname: *The Nuclear Football League*.**

## **The Nuclear Bible: The NFL's First Family**

**Rodger Goodell & Jane Skinner**

**Date:** November 5, 2010

**Source:** Wikipedia

**Title/Headline:** *Rodger Goodell*

**Abstract:** Rodger Goodell was born in Jamestown, New York, **the son of the late United States Senator Charles E. Goodell, a Republican from New York (notable for coming into both offices under special circumstances following the deaths of his predecessors)** and the late Jean Rice Goodell of Buffalo, New York. Goodell was heavily involved in the negotiation of the league's current collective bargaining agreement. He had worked extensively with Tagliabue since the latter became commissioner in 1989. **Goodell has played an extensive role in league expansion, realignment, and stadium development,** including the launch of the NFL Network and securing new television agreements as well as the latest collective bargaining agreement with the National Football League Players Association. **Rodger Goodell is married to former Fox News Channel anchor Jane Skinner** and they have twin daughters. Rodger has four brothers; among them are Tim, who has recently transferred his employment to **work at the Hess Corp. (a leading global independent oil/energy company based in New York City)**; and Michael, long-time partner of Jack Kenny, creator of the short-lived NBC series *The Book of Daniel*. The Goodell family was the inspiration for the Webster family on the show. His wife Jane Skinner received her Bachelor's and Master's degrees from Northwestern University. **Her father is Sam Skinner, former Secretary of Transportation and White House Chief of Staff under President George H.W. Bush** (Wikipedia, 2010).

**Date:** June 24, 2010

**Source:** The Huffington Post

**Title/Headline:** *Jane Skinner Leaving Fox News*

**Abstract:** Fox News anchor Jane Skinner is leaving the network after 12 years, she announced on-air Thursday. The co-anchor of Fox News' 11AM-1PM show, "Happening Now" — who is married to NFL Commissioner Roger Goodell — told viewers that Thursday would be her final day on-air at the network and that she is taking a break from the news business. **"This is my last day on the air at Fox,"** she said. **"It's been a thrill to have been a part of the incredible success of this place over the past 12 years that I've been here.** My life in the 12 years I have been here has changed significantly in wonderful ways and they've created a lot of new responsibilities. **I added a husband who has in the last couple of years become the NFL commissioner, and has a job even busier than mine.**

**I have twin daughters, so to do justice to this new life I've decided to take a break from the business."** Skinner joined Fox News as a general assignment reporter in 1998 (The Huffington Post, 2010).

**Why did Jane Skinner leave a great job at Fox News roughly 8 months prior to Super Bowl XLV? Does she know something we don't?**

**Date:** November 5, 2010

**Source:** Wikipedia

**Title/Headline:** Charles E. Goodell

**Abstract:** Rodger's father **Charles E. Goodell** was a congressional liaison assistant for the Department of Justice in 1954–1955. He won a special election on May 26, 1959, as a Republican to the 86th United States Congress to fill the vacancy caused by the death of Daniel A. Reed. Goodell was re-elected in November 1960 to the 87th Congress, and re-elected three times thereafter. **He resigned on September 9, 1968, to accept an appointment, effective September 10, made by Governor Nelson A. Rockefeller to fill the vacancy caused by the assassination of Robert F. Kennedy** (Wikipedia, 2010).

**Date:** November 5, 2010

**Source:** Wikipedia

**Title/Headline:** Samuel Knox Skinner

**Abstract:** Rodger Goodell's father-in-law is no other than Samuel Knox Skinner, an American politician, lawyer and businessman. **Skinner was instrumental in developing President Bush's National Transportation Policy and the Intermodal Surface Transportation Efficiency Act (ISTEA),** which served as the catalyst for the whole ITS industry. From 1977 to 1989, Skinner practiced law as a **senior partner in the Chicago law firm Sidley & Austin,** where he served on the firm's executive committee. From 1984 to 1988, while practicing law full-time, he also served as Chairman of the Regional Transportation Authority of northeastern Illinois, the nation's second largest mass transportation district. Also during that time, **President Reagan appointed Mr. Skinner as Vice Chairman of the President's Commission on Organized Crime.** From 1968 to 1975, Skinner served in the office of the United States Attorney for the Northern District of Illinois and, in 1975, **President Gerald Ford appointed Mr. Skinner United States Attorney.** **Skinner has held various sales and management positions with the IBM Corporation from 1960 to 1968,** and in 1967, IBM selected him Outstanding Salesman of the Year. He was President of Commonwealth Edison, CEO of US Freightways, on the board of directors of Odetics ITS, and on the board of directors of Dade Behring. Skinner also practiced with the Chicago-based law firm Hopkins & Sutter. He is currently a shareholder (partner) with the law firm of Greenberg Traurig, LLP, and a **Commissioner of the Department of Defense's Base Realignment and Closure Commission,** as well as an Adjunct Professor of Management and Strategy at the Kellogg School of Management at Northwestern University (Wikipedia, 2010).

**If a nuclear terror attack occurs at the Super Bowl, chances are the NFL will have a key insider in the U.S. Congress to make sure no real investigation occurs.**

**Date:** November 5, 2010

**Source:** Wikipedia

**Title/Headline:** Heath Shuler

**Abstract:** **Joseph Heath Shuler (Born December 31, 1971)** is a businessman, a former NFL quarterback, and the U.S. Representative for North Carolina's 11th congressional district, serving since 2007. He is a member of the Democratic Party. The district covers the Blue Ridge Mountains in western North Carolina and the largest city in the district is Asheville. Shuler's athletic career began at Swain County High School. **A standout quarterback who led his team to three state championships and was named the North Carolina High School Player of the Year,** he drew plenty of scout attention and accepted an athletic scholarship to the University of Tennessee in 1990. At Tennessee, Shuler gained national attention as one of the SEC's top quarterbacks. He held nearly all Volunteer passing records at the end of his career, although most of them have since been eclipsed by Peyton Manning. In 1993, he came in second in the vote for the Heisman Trophy. **Shuler was a first-round selection in the 1994 NFL Draft, taken by the Washington Redskins with the third overall pick.** ESPN rated him the 4th biggest NFL Draft bust of all time.[2] He held out of training camp until he received a 7-year, \$19.25 million contract.. As a pro, his career passer rating was a 54.3 and in 2004 ESPN rated him the 17th biggest 'sports flop' of the past 25 years. After retiring from the NFL, Shuler returned to the University of Tennessee and completed his education, graduating with a degree in psychology. He then became a real estate professional in Knoxville. **His real estate company is one of the largest independent firms in East Tennessee. In 2003, Shuler moved to Waynesville, North Carolina, where he lives today** (Wikipedia, 2010).

The  
Miami  
Herald

**Date:** November 9, 2010

**Source:** Miami Herald, McClatchy Newspapers, Barbara Barrett

**Title/Headline:** *N.C. Rep. Shuler May Challenge Pelosi For Minority Leader*

**Abstract:** Will U.S. Rep. Heath Shuler of North Carolina take on Speaker of the House Nancy Pelosi in a showdown for the role of top Democrat next year? Shuler, of Waynesville, said in a debate in October - when he was defending his seat in his conservative mountain district - that he would not support Pelosi's re-election to her leadership post. He said then he would run himself before supporting her. He echoed those remarks to **The Associated Press, saying he thought that there were other contenders but that he would run if there were no "viable alternative."** Pelosi announced that despite losing control of the House, she'll run to be House minority leader for next term. No one else has announced a candidacy. Shuler repeated his pledge Thursday to Roll Call, a Capitol Hill newspaper. National outlets are predicting a candidacy. Shuler certainly offers an alternative. **He is a conservative Democrat who supports gun ownership and opposes abortion rights. He voted against the health care overhaul and the stimulus bill. He is the whip for the Blue Dog caucus of conservative Democrats.** Shuler could find support in a fellow Blue Dog, Rep. Mike McIntyre of Lumberton. McIntyre said in a statement last week that he wouldn't support Pelosi, saying the party needs a moderate to conservative leader. "It is time to move forward in a different direction," he said (Barrett, 2010).

**NFL Coaching Exodus:** Super Bowl winning coaches have made a mass exodus from the NFL as of late: Joe Gibbs, Mike Ditka, Bill Parcells, Jimmy Johnson, Barry Switzer, Dick Vermeil, Mike Holmgren, Brian Billick, Jon Gruden, Bill Cowher, and Tony Dungy along with other winning coaches like Marty Schottenheimer, Dan Reeves, Marv Levy, Don Shula, Wade Phillips, no longer coach in the league.

**The question remains: Why? Does the league have better coaches available, or does the NFL want to make sure that there are no respected coaches question the actions of the NFL in a nuclear crisis?**

**Title/Headline:** *Antrel Rolle Compares Booing Players To Booing Soldiers Coming Home From Iraq, Later Apologizes*

**Abstract:** Antrel Rolle admits that he is a "bigmouth" and is unapologetic about it. Thursday, however, the Giants' safety put his foot in that mouth and had to issue a scripted apology shortly after he compared his teammates to American troops returning from Iraq. In an attempt to defend ripping Giants fans Tuesday for booing the team, Rolle said: **"They want to make it that guys paid this much money for a ticket. Yeah, I understand that, I understand completely. We risk ourselves out there on the field each and every day also. When soldiers come home from Iraq you don't boo them. I look at it the same way. I take my job seriously."** Later, in a statement released by the team, Rolle said: **"I used a very poor, inappropriate example earlier today to demonstrate how seriously I take my job. Obviously there is no comparison between the men and women of our military putting their life on the line defending our country and what I do. "They risk their lives and that gives me the opportunity to play a game for a living. After I made my earlier comments, somebody even said to me: how would your father, who is the chief of police in Homestead (Fla.) and puts himself at risk every day, feel about the comparison you made? Again, it was a very poor, very inappropriate choice of words."** This is not the first time Rolle has created controversy with his mouth. His complaints after a Week 2 loss in Indianapolis about the "controlled"

environment and lack of leadership in the Giants organization made headlines. **"Blame my mom, I am not a politically correct guy," Rolle said. "Not my father, it's my mother's fault. You ask me a question I am going to give you an answer, an honest answer. My coaches ask me, my girlfriend asks me, I am going to give them an honest answer. I don't sugarcoat anything."** Rolle, a former Arizona Cardinal who is in the first year of a five-year deal with the Giants, believes he is speaking up for some of his teammates. **"When I speak I am not speaking on behalf of Antrel Rolle, I speak on behalf of the New York Giants. I know for a fact I am not the only guy that feels that way,"** Rolle said. **"But once again, me as the bigmouth, I am the one that says something."** Rolle does not speak for all his teammates. Defensive end Osi Umenyiora, for one, said he understood the fans' frustration with the Giants' first-half performance on Sunday against Jacksonville. "That's just the way the fans are," Umenyiora said. **"They have every right to be that way. They are paying \$120 a ticket to come watch us play. You can't go out and stink it up like that, especially in New York. As long as they are coming to watch us play, they can boo, they can do whatever they want to do. That's well within their rights to do that"** (Ackert, 2010).

**Conclusion:** If a nuclear terrorist attack does occur during the Super Bowl, the U.S. Government and the corporate media will need a "hero" like on 9/11, when then New York Mayor Rudy Giuliani, paraded in front of the cameras and painted a feel-good story for all of America to unite around. Apparently, Roger Goodell and his lovely wife will be there for America in its greatest time of need. On the flip side, the U.S. government must have individuals in key power positions that follow orders, fall in line, and don't ask any questions about what actually transpired and who is truly responsible. Should a nuclear false-flag attack take place at Super Bowl, we can be 100% sure that a fraudulent investigation will take place by the powers that be.

## The Nuclear Bible: The NFL & Human Sacrifices?

**Intro:** If there is to be a false-flag nuclear attack at the Super Bowl, then it would make sense that the event would be preceded with blood sacrifices on certain dates and in certain locations. While it is impossible to know for sure which suspicious deaths were actual sacrifices, the following information is shocking to say the least. Three former U.S. military personnel that played in the NFL have also died in suspicious manners. Apparently, the NFL and the U.S. government doesn't want anyone questioning their policies and actions.

**Title/Headline:** Pat Tillman

**Date of Death:** April 22, 2004

**Location of Death:** Sperah, Afghanistan

**Age at Death:** 27

**Days to Super Bowl XLV:** 2,481 (354 Weeks & 3 Days)

**Abstract:** Patrick Daniel "Pat" Tillman (November 6, 1976 – April 22, 2004) was an American football player who left his professional career and enlisted in the United States Army in June 2002 in the aftermath of the September 11, 2001, attacks. He joined the Army Rangers and served several tours in combat before he died in the mountains of Afghanistan. The Army at first reported that Tillman had been killed by enemy fire, and Lieutenant General Stanley A. McChrystal approved the award of a Silver Star. **The actual cause of Tillman's death was later recognized as resulting from friendly fire (Wikipedia, 2010).**

**Date:** August 12, 2010

**Source:** Huffington Post, Sam Stein

**Title/Headline:** *Pat Tillman's Father To Army Investigator: 'F--- You... And Yours'*

**Abstract:** There always was a dark cinematic thread to the story of Pat Tillman: the football star imbued with post-9/11 patriotism who was killed in a friendly-fire incident in the Afghan mountains and the allegations of a massive bureaucratic cover-up involving the highest levels of the U.S. Army in the wake of the tragedy. So it wasn't terribly shocking when word broke this past winter that "The Tillman Story," a documentary film, was being purchased by the powerhouse Weinstein Company. The story, even without a director applying his artistic license to the script, obviously had many elements of a political thriller. As the release date approaches -- the film will premiere in Los Angeles and New York on August 20 -- those elements are becoming a bit clearer and more intriguing. The Weinstein Company sent the Huffington Post two previously unseen letters written by Tillman's father at the peak of frustration with the army's investigation into his son's death. **The notes, penned to Brigadier General Gary M. Jones (the man spearheading the investigation) as well as the Senate Armed Services Committee (which oversaw Jones's work), paint a picture of a man increasingly convinced that a massive conspiracy was emerging around the death of his son. "You are a General," Tillman's father writes Jones after being presented with a briefing book of his findings. "There is no way a man like you, with your intelligence, education, military, experience, responsibilities (primarily for difficult situations), and rank... believes the conclusions reached in the March 31, 2005 Briefing Book. But your signature is on it. I assume, therefore, that you are part of this shameless bullshit. I embarrassed myself by treating you with respect [on] March 31, 2005. I thought your rank deserved it and anticipated something different from the new and improved investigation. I won't act so hypocritically if we meet again."**

**"In sum: Fuck you... and yours."**

The two letters are worth a read, if only for the insight they provide into how haphazard and mismanaged (deliberately or not) the investigations were. **Tillman's father comes off as emotional, for good reason. But the questions he raised -- while conspiratorial in tone -- offer compelling drama (both real life and for the upcoming movie). Take, for instance, the notion that the shooters of his son may have been blinded by the glare of the sunset. "The shooters were always looking North or Northwest," Tillman's father writes. "Even in Afghanistan, the sun sets in the West - Southwest. How on God's green earth can you add in a "glare factor" looking away from the sun that has set? Immediately after the sunset, facing the wrong direction (North vs. Southwest), the glare impaired their vision? Don't you need sun to have glare?" By the spring of 2007, indeed, evidence emerged that some of Pat Tillman senior's larger fears were driven not by emotion-driven conspiracy theories but by legitimate holes in the Army's story (Stein, 2010).**

**Source:** Wikipedia

**Title/Headline:** *Reggie White*

**Date of Death:** December 26, 2004

**Location of Death:** Cornelius, North Carolina

**Age at Death:** 43

**Days to Super Bowl XLV:** 2,233 (319 Weeks & 0 Days)

**Abstract:** Reginald Howard "Reggie" White (December 19, 1961 – December 26, 2004), nicknamed "The Minister of Defense", was a professional American football player who played defensive end for 15 seasons in the National Football League for the Philadelphia Eagles, Green Bay Packers and Carolina Panthers becoming one of the most decorated players in NFL history. He also played for two seasons in the United States Football League for the Memphis Showboats. The 2-time NFL Defensive Player of the Year, 13-time Pro Bowl and 12-time All-Pro selection holds 2nd place all-time amongst career sack leaders with 198.5 (behind Bruce Smith's 200 career sacks) and was selected to the NFL 75th Anniversary All-Time Team, NFL 1990s All-Decade Team and the NFL 1980s All-Decade Team. **During his professional career, he became famous not only for his outstanding play, but also for his Christian ministry as an ordained Evangelical minister. This led to his aforementioned nickname, "The Minister of Defense".** White's retirement was not without controversy. He created a stir in March 1998 with his comments before the Wisconsin state legislature, invoking racial stereotypes of Latinos, Asians, whites, blacks, and Native Americans. **He stated that these diverse "gifts" of each race, "formed a complete image of God [...] because He was trying to create Himself". An image that society had pushed aside, leading to the aversion of racial unity. He specified that "without assimilation there's no desegregation, nor is there integration, because people of all ethnic backgrounds have to be able to compete economically in order to build their families."** White was enshrined in the Pro Football Hall of Fame in 2006, two years after his death. **On the morning of December 26, 2004, White was rushed from his home in Cornelius, North Carolina, to a nearby hospital in Huntersville, North Carolina, where he was pronounced dead. White had suffered a fatal cardiac arrhythmia.** The most likely cause of this, according to the Mecklenburg County Medical Examiner's Office, was the cardiac and pulmonary sarcoidosis that he had lived with for years. It was also stated that sleep apnea, which White was known to suffer from[7] may have contributed to his death. His grave site is situated at Glenwood Memorial Park, Mooresville, North Carolina (Wikipedia, 2010).

**Title/Headline:** Sam Mills  
**Date of Death:** April 17, 2005\*  
**Location of Death:** Charlotte, North Carolina, USA  
**Age at Death:** 45  
**Days to Super Bowl XLV:** 2,121 (303 Weeks & 0 Days)

**Abstract:** Samuel Davis "Sam" Mills, Jr. (June 3, 1959 - April 18, 2005) was an American football linebacker who played twelve seasons in the National Football League for the New Orleans Saints and Carolina Panthers. Mills was diagnosed with intestinal cancer in August 2003. Though he was told he had only a few months to live, he underwent chemotherapy and radiation and continued to coach. He was an inspirational force in the Panthers' post-season run to Super Bowl XXXVIII. His plea to "Keep Pounding" in an emotional speech before the Panthers' victory over the Dallas Cowboys later became the name of a fund to sponsor cancer research programs. Mills died at his home in Charlotte, North Carolina on the morning of April 18, 2005. He was 45 (Wikipedia, 2010).

\*Mills was found dead on the morning of April 18<sup>th</sup>, 2005, but likely died in his sleep, thus putting the date of death on the 17<sup>th</sup> of April 2005.

**Source:** Wikipedia  
**Title/Headline:** Thomas Herrion  
**Date of Death:** August 21, 2005\*  
**Days before Super Bowl XLV:** 1,995 (285 Weeks & 0 Days)  
**Location of Death:** Denver, Colorado, USA  
**Age at Death:** 23

**Abstract:** Thomas Herrion (December 15, 1981 – August 20, 2005) was an American football player for the San Francisco 49ers. Born in Fort Worth, Texas, Herrion, a 6-foot-3 (190 cm), 310-pound (140 kg) guard, played college football first at Kilgore College at the junior college level before transferring to the University of Utah where he blocked for current San Francisco 49ers quarterback and number one draft pick Alex Smith. He was signed to a reserve/futures contract with the 49ers on January 5, 2005 and spent one season playing in NFL Europe with the Hamburg Sea Devils. **Shortly after an exhibition game against the Denver Broncos on August 20, 2005, Herrion collapsed in the locker room and was transported to St. Anthony's Central Hospital in Denver where he was pronounced dead. The cause of death was later determined to be Ischaemic heart disease, or (according to a subsequent examination of the autopsy report) hypertrophic cardiomyopathy**

\*Although Wikipedia reports that Herrion's death occurred on August 20<sup>th</sup>, 2005, it is quite possible that he died on the 19<sup>th</sup> of August, due to the fact that the game is listed as "San Francisco at Denver, 9:00 p.m." in the 2005 NFL pre-season schedule. Since all NFL times are EST (Eastern Standard Time), and games usually last 3 hours, there is little chance that the given date time is correct.

**Source:** Wikipedia  
**Title/Headline:** Hank Stram  
**Date of Death:** July 3, 2005\*  
**Location of Death:** Covington, Louisiana  
**Age at Death:** 82  
**Days before Super Bowl XLV:** 2,044 (292 Weeks & 0 Days)

**Abstract:** Henry Louis "Hank" Stram (January 3, 1923 – July 4, 2005), was an American college and Professional Football coach. He is best known for his fifteen-year tenure with the American Football League's Dallas Texans/Kansas City Chiefs and the Chiefs of the NFL. Stram won three AFL Championships (more than any other coach in the league's history) and Super Bowl IV with the Chiefs. He also coached the most victories (87), had the most post-season appearances (6) and the best post-season record in the AFL (5–1). Stram is largely responsible for the introduction of Gatorade to the NFL due to his close association with Ray Graves, coach at the University of Florida during Gatorade's development and infancy. Hank Stram never had an offensive coordinator, defensive coordinator, or special teams coach during his legendary career with the Dallas Texans/Kansas City Chiefs (Wikipedia, 2010).

**Date:** February 23, 2007  
**Source:** Wikipedia  
**Title/Headline:** Damien Nash  
**Date of Death:** February 24, 2007\*  
**Location of Death:** St. Louis, Missouri, USA  
**Age at Death:** 24  
**Days to Super Bowl XLV:** 1,444 (206 Weeks & 2 Days)

**Abstract:** Damien Darnell Nash (April 14, 1982 – February 24, 2007) was an American football player who was a running back for the Denver Broncos of the National Football League. He died after the 2006-2007 season, his only season with the Broncos. **Nash collapsed suddenly following a celebrity charity basketball game at Riverview Gardens High School on February 23, 2007.** He was found unresponsive at a residence in suburban St. Louis and was later pronounced dead. The charity event was a fundraiser to benefit the Darris Nash Find A Heart Foundation, a charity which raises funds for heart transplant research. Nash had created the charity in honor of his older brother, Darris, a recent heart transplant recipient. Sergeant Ed Douglas of the Ferguson, Missouri, police department said in a telephone interview that Nash was transported by ambulance to Christian Hospital Northeast. **Douglas said the case was still under investigation. Nash was pronounced dead at 6:41 p.m. MST.** An autopsy confirmed that no drugs or unnatural substances were present in Nash's body at the time of death. **While being a natural death of cardiac origin, the exact cause of death remains undetermined.** He leaves behind his wife, Judy Nash and a daughter Phaith Nash.

**\*Despite the time of Nash's death being 6:41pm on the evening of the collapse, Wikipedia states that Nash died the next day.**

**Date:** February 25, 2007

**Source:** ESPN, Len Pasquarelli

**Title/Headline:** *Nash Collapses And Dies After Charity Basketball Game*

**Abstract:** Denver Broncos reserve tailback Damien Nash collapsed and died Saturday night after an appearance in a charity basketball game in St. Louis. Nash, a two-year NFL veteran, was 24. Agent David Canter confirmed his client's death, as did Denver team officials. **"The Broncos family has suffered a great loss with the passing of Damien Nash,"** coach Mike Shanahan said from Indianapolis, where he was attending the NFL's scouting combine along with general manager Ted Sundquist. **"I am stunned and deeply saddened by this tragedy, and send my deepest condolences to Damien's family."** Canter, who is attending the annual NFL scouting combine in Indianapolis, was contacted after ESPN.com received reports of Nash's death from people close to other players who had participated in the basketball game. During a telephone interview, Canter, who was unaware of the incident, received a call from Denver officials confirming Nash's death. **"It's true," an obviously distraught Canter said. "It's true. I don't know what more to say right now, OK?"** Details of the incident were not yet available, and an official with the St. Louis police said an investigation was in its "very earliest" stages. The proceeds of the event were to benefit the Darris Nash Find A Heart Foundation, which raises money for heart transplant research. The foundation was created last month after Darris Nash, 25, the older brother of Damien Nash, received a heart transplant. Former Missouri receiver Sean Coffey was at the event with Nash and told the St. Louis Post-Dispatch there was no indication anything was wrong. **"Everything was normal. ... We were playing around at the game. ... He was fine," Coffey told the newspaper. "I give my best to his family. This is crazy. I can't believe this is happening. It was the first time I had seen him in a couple of years. I can't believe he's gone. I'm so happy I got to see him one last time."** Lee Baker, who was teammates with Nash at Coffeyville Community College in Kansas, was supposed to have dinner with Nash after the basketball game. One of Baker's friends received a call that Nash had collapsed a short time after leaving the event. **"We still don't know what happened. He looked in great shape. He had four 3-pointers [in the game]. He had a big smile on his face. There was no indication" anything was amiss, Baker told The Associated Press. "He was a great guy. It's hard to believe. I want to think I'm dreaming. I was looking at him today, and thinking how proud I was of him. I was so happy for him."** One of Baker's final memories of Nash was of him holding his infant daughter after the game. "I feel fortunate to have met him," Baker said. "At the game, you saw the looks on people's faces and how much they appreciated him." A former University of Missouri standout, Nash entered the NFL as a fifth-round choice of the Tennessee Titans in 2005. He played three games with the Titans as a rookie, and then signed with Denver as a free agent last August. In his one season in Denver, he appeared in three games, rushing 18 times for 66 yards. **"The Denver Broncos organization is once again struck with profound sadness over the tragic loss of one of our players,"** team owner Pat Bowlen said in a statement. **"This is a tremendous tragedy and our hearts go out to the entire Nash family."** Nash is the second Broncos' player to die since the end of the 2006 season. Two-year veteran cornerback Darrent Williams was shot to death in a limousine after leaving a Denver-area nightclub Jan. 1 (ESPN, 2007).

**Date:** November 26, 2007

**Source:** Wikipedia

**Title/Headline:** *Sean Taylor*

**Date of Burglary:** November 18, 2007

**Days to Super Bowl XLV:** 1,176 (168 Weeks & 0 Days)

**Date of Attack:** November 26, 2007

**Days to Super Bowl XLV:** 1,168 (166 Weeks & 6 Days)

**Date of Death:** November 27, 2007\*

**Days to Super Bowl XLV:** 1,167 (166 Weeks & 5 Days)

**Location of Death:** Miami, Florida

**Age at Death:** 24

**Abstract:** Sean Michael Maurice Taylor (April 1, 1983 – November 27, 2007) was an American football free safety who played for the Washington Redskins of the National Football League. Taylor was drafted in the first round (fifth overall) of the 2004 NFL Draft by the Redskins. He played college football at the University of Miami and Hurricanes' 2001 National Championship team. **Due to his ferocious style of hitting, several of his pro teammates nicknamed him "Meast," an abbreviation for the term "half man, half beast."** Taylor died at the age of 24 on November 27, 2007, from critical injuries due to gunshots by intruders at his Miami area home. **Eight days after the original burglary, on November 26 at 1:45am EST, Taylor was shot in the upper leg by an armed intruder at his home in Palmetto Bay, Florida, where he had been recuperating from a football injury. He was mortally wounded in his femoral artery.** His longtime girlfriend, Jackie Mofett (a niece of actor Andy García), hid under the bedding with their 18-month-old daughter Jackie. Mofett then called 9-1-1 from her cell phone. Taylor was airlifted to the Ryder Trauma Center at Jackson Memorial Hospital in Miami, where he underwent surgery. He emerged from surgery about 12:30pm. He had lost a significant amount of blood and remained in a coma. His doctors speculated he may have suffered brain damage due to the blood loss, and an unnamed Redskins source reported that **Taylor's heart stopped twice during the emergency surgery. The next day, on November 27, Taylor died at the hospital at 3:30am.** His death led to an outpouring of national support and sympathy, especially in the Washington area, where Taylor had been a fan favorite as a Redskin and the Miami area, where Taylor had starred collegiately for the Miami Hurricanes. **Police detectives who examined the evidence and the crime scene had suggested that Taylor was the victim of professional thieves who were armed and dangerous.** In the immediate aftermath of Taylor's death, speculation on the Internet and within the media suggested that the details surrounding Taylor's death were especially sinister.

#### **Among The Rumors Were:**

- **That a knife was left on Taylor's bed during the November 18 intrusion as a "message."** Sharpstein recently clarified that the knife was a kitchen knife used by the intruders to pry things open during the first invasion and was tossed aside on the bed of Taylor's sister.
- That the phone lines to Taylor's home had been cut prior to the November 26 invasion in which he was shot. **This was refuted by police investigators, who clarified that the residential phone simply was not working.**
- **That the intruders did not steal or intend to steal anything during either invasion of Taylor's home.** The first police report did not address whether anything was stolen from Taylor's home. Although the police report mentioned that the desk and bed in Taylor's bedroom were rifled through, it did not specify if anything was stolen, presumably because when his mother filed the police report Taylor was not present to indicate if any of his belongings had been taken (Wikipedia, 2010).

**\*It appears that Taylor was supposed to die on November (11) 26<sup>th</sup>, 2007, but do to him fighting back with a machete, he was able to hold on to the next day. Washington D. C., the capitol of the United States, will eventually be replaced as the capitol of the U.S. when Denver, Colorado, becomes the new capital of the North American Union. Interestingly, these two cities feature prominently in the deaths of NFL players.**

**Date:** December 19, 2007

**Source:** ESPN, Associated Press

**Title/Headline:** *Four Suspects In Taylor's Killing Plead Not Guilty To Murder, Armed Burglary*

**Abstract:** Four suspects accused in the killing of Redskins Pro Bowl safety Sean Taylor have filed written not guilty pleas to first-degree felony murder and armed burglary charges. The filing of a written plea usually means defendants do not appear in person at an arraignment, said Ed Griffith, spokesman for State Attorney Katherine Fernandez Rundle. The arraignment hearing in the case is set for Friday. The four suspects from the Fort Myers area are charged with breaking into Taylor's Miami home Nov. 26 and shooting him during a confrontation in his bedroom. Taylor, who grew up in this area and played at the University of Miami before being drafted by the Redskins, died the next day at age 24. **Jailed without bond in the case are Eric Rivera Jr., 17; Charles Wardlow, 18; Jason Mitchell, 19; and Venjah Hunte, 20. Their written not guilty pleas were filed last week, according to court records. At least two of the defendants have confessed to taking part in the attempted burglary and a grand jury indictment identified Rivera as the one who shot Taylor (ESPN, 2007).**

**Days to Super Bowl XLV:** 900 (128 Weeks & 4 Days)

**Abstract:** With his union preparing for another contract negotiation with owners, Gene Upshaw died on August 20, 2008, at age of 63 due to pancreatic cancer. **His death stunned the NFL because almost nobody knew he had been ill.** Upshaw was found to have cancer only three days prior, when his wife took him to the hospital while the family was on vacation. **His death was so unexpected that earlier this week, the union had scheduled a news conference for him on Sept. 4 to discuss labor issues.** Upshaw died with his wife and three sons beside him at his home in the Lake Tahoe region of California (Batista, 2008).

**Title/Headline:** *Survivor Nick Schuyler Speaks About Missing NFL Players, Says They Removed Life Vests*

**Date of Death(s):** March 1, 2009

**Location of Death:** Gulf of Mexico

**Age at Death:** Marquis Cooper: 26

**Age at Death:** Corey Smith: 29

**Days before Super Bowl XLV:** 707 (101 Weeks & 0 Days)

**Abstract:** Nick Schuyler, the only man rescued after a fishing-party that included NFL players went missing Saturday, spoke about what happened to the other men. **The St. Petersburg Times reported on what Schuyler told the Coast Guard, warning that the story is "strange" and shouldn't be taken at face value considering Schuyler had spent two days in cold water.** Read what Schuyler said below and see a slideshow of the players' families awaiting news on their loved ones. Schuyler told investigators that about two to four hours after their boat flipped in rough seas, one of the two National Football League players on board gave up hope and let himself be swept away, according to relatives briefed by the Coast Guard. A few hours later, the second one did the same. **"We were told that Nick said the two NFL players took their life jackets off and drifted out to sea,"** said Bob Bleakley, whose son Will, 25, a former University of South Florida football player, is also still missing. With former Tampa Bay Buccaneers Marquis Cooper, 26, and Corey Smith, 29, gone, only Schuyler and Will Bleakley remained clinging to the boat. **Then, sometime early Monday, Will Bleakley thought he saw a light in the distance. He decided to take off his life jacket and swim to it,** hoping to get help, Bob Bleakley said. Schuyler told the investigators Private boats and planes searched Wednesday for two NFL players and a third man missing for four days since their boat capsized in the Gulf of Mexico off Florida, family members said. **The Coast Guard called off the official search Tuesday for Oakland Raiders linebacker Marquis Cooper, who owned the boat, free-agent NFL defensive lineman Corey Smith and former South Florida player William Bleakley.** But their families appealed for help to keep hunting (Zaleski, 2009).

**Title/Headline:** *Widow Attacks Nick Schuyler's Story Of Capsize*

**Abstract:** Four men went to sea and only one returned. The survivor's harrowing story of a calamitous boating accident has become an American bestseller — to the dismay of some of the families whose men did not come home. **The book by Nick Schuyler, a sports trainer who was plucked from the capsized hull of a small fishing boat 75 miles off the coast of Florida in February last year, recounts in chilling detail the fight for life of four young athletes thrown into the waters of the Gulf of Mexico after a botched attempt to dislodge a trapped anchor.** One by one, Schuyler's friends succumbed to hypothermia as they clung to the overturned hull. By the time the boat was spotted by US Coast Guard searchers 43 hours later, only Schuyler, 25, was still alive. **His story has attracted doubt, suspicion and controversy ever since. In Not Without Hope, ghost-written by a New York Times sports writer, Schuyler declares that "the accident follows me like the wake of [the ill-fated] boat, churning, foaming, pushing toward the horizon of every day".** The book has received intense US media attention, partly for its searing account of the dying moments of the delirious victims as a storm blew up and body temperatures dropped in the winter waters; but also because two of the men on board were professional American football players in peak physical condition. The owner of the boat was Marquis Cooper, 26, a fast, defensive

player with the Oakland Raiders. Also on board was Cooper's friend, Corey Smith, 29, a tackler with the Detroit Lions. They were joined by Will Bleakley, 25, a former college football star who was Schuyler's best friend. The four had met in Tampa, where Schuyler trained athletes at a gym. **Schuyler said last week that one of his main aims in writing the book was to dispel malicious rumours that have spread across the internet, fuelled by a common feature of accidents at sea — the bodies of the other three men have never been found. It has variously been suggested that the men were drunk; that they may have fought in the water over lifejackets or for the best position on the upturned hull; that one of them gave up, took off his lifejacket and drowned; and that another swam away to his death.** Yet nothing has been more damaging to Schuyler's book than a statement by Cooper's widow, Rebekah, who accuses the author of "greatly exaggerating" his relationship with her late husband; of changing his story about what happened; and of "financially exploiting the deaths of others". Rebekah Cooper has branded the book a "one-sided account that has never been scrutinised against objective investigation", and has defended her husband against suggestions that he was an "inexperienced boater" who had failed to prepare properly for the trip. **"Marquis knew the water like the back of his hand,"** said Cooper, who attacked Schuyler's "ever-evolving recreation of events". The Coopers had a four-year-old daughter, Delaney. Schuyler described the book as his "best recollection" of what had happened and added: "If I was making stuff up, I guess I would have buttered myself up a little more." He also said that all proceeds from the book would go to charity. He writes that it was **Bleakley's idea to undo the anchor line at the bow of the boat and tie it to the stern in the hope of jerking the anchor free by gunning the motor in reverse. Instead, the line dragged the stern down and flipped the bow high in the air.** The four men were thrown in the water. Mortified by his error, **Bleakley dived under the hull to retrieve the lifejackets that none of them had been wearing. He found three, and used a buoyant seat cushion for himself.** By Schuyler's account, Cooper was the first to suffer after hours in the water. **At first the men had huddled together "like puppies" to conserve body heat, but after 15 hours Cooper began to hallucinate and tried several times to rip off his lifejacket — a feature of hypothermia that is apparently known as "paradoxical undressing".** As the men repeatedly fell off the hull and climbed back on amid 15ft waves, Cooper died in Schuyler's arms. By then, Smith was behaving bizarrely, attempting to throw himself off the hull, and screaming abuse at his friends. **"It wasn't Corey. It was like evil Corey, like Corey's demon,"** says Schuyler, who had been clinging to Cooper's body but was forced to let it float away as he struggled to control Smith. Bleakley lasted a second night, but died 18 hours before Schuyler was rescued. "I was just lucky, I guess," he said (Allen-Mills, 2010).

**Title/Headline:** *Jack Kemp*

**Date of Death:** May 2, 2009

**Days before Super Bowl XLV:** 645 (92 Weeks & 1 Day)

**Age at Death:** 73

**Location of Death:** Bethesda, Maryland, USA

**Abstract:** Jack French Kemp (July 13, 1935 – May 2, 2009) was an American politician and a collegiate and professional football player. A Republican, he served as Housing Secretary in the administration of President George H. W. Bush from 1989 to 93, having previously served nine terms as a congressman for Western New York from 1971 to 89. He was the Republican Party's nominee for Vice President in the 1996 election, where he was the running mate of presidential nominee Bob Dole. Kemp had previously contended for the presidential nomination in the 1988 Republican primaries. **Before entering politics, Kemp was a professional quarterback for 13 years. He played briefly in the National Football League (NFL) and the Canadian Football League (CFL), but became a star in the American Football League (AFL).** He served as captain of both the San Diego Chargers and Buffalo Bills and earned the AFL Most Valuable Player award in 1965 after leading the Bills to a second consecutive championship. He played in the AFL for all 10 years of its existence, appeared in its All-Star game seven times, played in its championship game five times, and set many of the league's career passing records. Kemp also co-founded the AFL Players Association, for which he served five terms as president. **During the early part of his football career, he served in the United States Army Reserve. On January 7, 2009, Kemp's office issued a statement announcing that he was battling cancer; the type of cancer and the anticipated treatment were not announced.** His diagnosis and prognosis were never publicly disclosed. However, he continued to serve as chairman of his Washington-based Kemp Partners consulting firm and continued his involvement in charitable and political work until his death. **On May 2, 2009, Kemp died at his home in Bethesda, Maryland, from cancer; he was 73. President Barack Obama praised Kemp's work on race, adding that Kemp understood that divisions involving race and class stood in the way of the country's common goals.** Former President George W. Bush said that Kemp "will be remembered for his significant contributions to the Reagan Revolution and his steadfast dedication to conservative principles during his long and distinguished career in public service" (Wikipedia, 2010).

**Title/Headline:** *Rookie Charged With Assaulting Officer*

**Abstract:** Baltimore Ravens rookie linebacker Tony Fein said Monday night he will be exonerated of charges he allegedly assaulted a police officer once his side of the altercation is made public. Fein, however, refused to discuss specifics of the skirmish, which occurred inside a Johnny Rockets restaurant in Baltimore's Inner Harbor tourist district. **"I'm just saying I'm innocent," said Fein in the locker room following the Ravens' 24-23 preseason victory over the New York Jets. "I'm not going to get into the details of it, but**

**the truth will come out.**" The arrest of Fein, an Iraq war veteran, was the result of police profiling, the linebacker's agent said Monday. **Fein was charged Sunday with the misdemeanor assault of a Baltimore City officer who confronted him after a security guard thought he saw Fein pass a handgun to a friend at the restaurant counter, said police spokesman Anthony Guglielmi.** The item was a cell phone. **"Tony's never owned a weapon in his life,"** Fein's agent, Milton Dee Hobbs, said. **"That weapon was a cell phone."** Hobbs said police approached Fein because he was a black man wearing a sweatsuit with a hood. Guglielmi disputed the claim that this was a case of racial profiling. **"It doesn't matter if you're black, white, green or blue, if you push an officer, you're going to get arrested."** Guglielmi said. **"He can take concerns up with the judge."** Fein would not address whether he believed he was a victim of profiling. While Fein spoke, nearby teammates offered profanity-laced support for the rookie and chastised media members for not asking questions related to the Ravens' victory. Fein said he had never been in trouble with the law before. **"I'm 110 percent innocent and once the facts come out, I'll be proven [innocent],"** he said. Ravens wide receiver Jayson Foster, who acknowledged he was with Fein when the scuffle took place, is cooperating with the investigation. **"I already gave my report to the police. You'll have to pretty much check with them to see what they say,"** said Foster. When pressed about details, Foster said he didn't know that Fein had been charged with a crime. **"I don't know the charges,"** Foster said. **"We'll wait for the [police] report to come out. How it ends up is how it will be."** Baltimore police recently stepped up security at Harborplace, a shopping and dining complex that is a major tourism draw for the city, after a shooting at the same building a week earlier. When police questioned Fein, 27, he became belligerent and shoved the officer, Guglielmi said. According to a police report, Sgt. Joseph Donato loudly told Fein: **"Stand up, turn around and keep your hands where I can see them."** Fein reacted by pushing Donato with one hand while turning around from the restaurant counter, police said. Donato was knocked to the ground and hurt his right elbow, the report said. Donato grabbed Fein by his **"F Troop, 9th Cavalry, Ft. Hood, Texas"** sweatshirt, forced him to the ground and he and other officers handcuffed him, the report stated. Fein was not injured, police said. The police report noted the officer was concerned about "a recent shooting at this pavilion" and that Fein's sweatshirt "did not seem weather-appropriate." **Hobbs said it was the officer who was aggressive and that Fein didn't shove him.** **"Tony's a good kid,"** Hobbs said. **"He's not going to disrespect an officer."** Hobbs said Fein has not been arrested before and Maryland's courts database does not have any record of previous arrests or charges against Fein. The police department's internal affairs unit does not have any sustained complaints against Donato on file, Guglielmi said. **Fein was released about 1 a.m. Monday and slept at a downtown hotel with the rest of the team, something the team does the night before a game, according to Kevin Byrne, a Ravens vice president.** **"Like all citizens, Tony will get his due process and have his opportunity to explain,"** Byrne said in a statement. "There are two sides to every story." Fein served in the Army for more than three years before playing college ball. In two seasons at Ole Miss, he had 136 tackles (77 solo) in 24 games, according to the Ravens Web site. Fein was signed as a free agent in June following a minicamp tryout (ESPN, 2009).

**Although the previous article states that Fein "slept at a downtown hotel with the rest of the team", he was allegedly staying at a "friend's house" as reported in the next article, and mysteriously died on the way to the hospital after being apparently poisoned. It is possible that Fein was murdered in police custody, and dropped off at another location. Regardless, foul play in this case is obvious, and due to Fein's stint in the U.S. military, it is highly likely that he was murdered in an attempt to keep him from going public about the war and why he decided leave the military.**

**Date:** October 7, 2009

**Source:** ESPN, Associated Press

**Title/Headline:** *Fein Death Being Investigated*

**Date of Poisoning:** October 5, 2009

**Days before Super Bowl XLV:** 489 (69 Weeks & 6 Days)

**Date of Death:** October 6, 2009

**Location of Death:** Seattle, Washington, USA

**Age at Death:** 27

**Days before Super Bowl XLV:** 488 (69 Weeks & 5 Days)

**Abstract:** Tony Fein, an Iraq war veteran and NFL rookie linebacker who played with the Baltimore Ravens during the preseason, has died of unexplained causes after collapsing at a friend's house in what his agent said appears to be "an accidental situation." Fein, 27, an undrafted rookie free agent from Mississippi, was lying face down and unconscious, vomiting and barely breathing when medics arrived at a house outside Port Orchard on the Kitsap Peninsula just before 9 a.m. PT Tuesday, said Mike Wernet, a battalion chief and medical officer with South Kitsap Fire & Rescue. **The medics put a breathing tube down Fein's throat after he stopped breathing and administered medication, but he went into cardiac arrest during the drive to Harrison Medical Center in Bremerton,** across Puget Sound from Seattle, and was pronounced dead at the hospital at 9:48 a.m. PT Tuesday, Wernet told The Associated Press. **A man and woman who were present described Fein as a friend who was staying with them. They told the aid crew they awoke to find him unresponsive and vomiting. "They didn't really give us a lot of information about what had happened the night before," apparently because they were upset, Wernet said. "They didn't indicate anything out of the ordinary." There were no obvious wounds or signs of alcohol or other drug abuse, and nothing indicated foul play,** he added. Kitsap County sheriff's Deputy Scott E. Wilson said a detective was assigned to the case Wednesday because the death seemed unusual. **"We don't have any indication of anything suspicious ... or foul play,"** Wilson said. Fein's agent, Milton D. Hobbs, a lawyer in Oxford, Miss., said he knew of no medical condition or previous severe illness in Fein. "As I understand it, it was an accidental situation," Hobbs said. "As far as I understand it from family members, there's nothing to indicate that he intended to hurt himself." **An autopsy won't be conducted before Thursday and no report will be issued before all toxicology and other tests are complete, likely in six to eight weeks,** said Allen G. Gerdes, Kitsap County chief deputy coroner. Fein, a native of Port Orchard, was released by the Ravens in their last major round of roster cuts on Sept. 5. **"Tony Fein was a really good teammate, a tremendous American, a tremendous young man ... just a really good person,"** Ravens coach John Harbaugh said before Wednesday's practice in Owings Mills, Md. **"We were proud to have him here as part of our team. We're unbelievably disappointed about the news."** Hobbs said he last spoke with Fein on Friday and since the death had talked

with the Fein's sister, mother and some friends. He would not discuss a possible cause of death. "He was working out and we were discussing football opportunities. That was still his goal," Hobbs said. "We talked about Canada." Some Canadian Football League teams had expressed interest in Fein before he joined the Ravens but there had been no contacts since he was cut, the agent said. **Fein was arrested on Aug. 23 and charged with misdemeanor assault on a police officer after an incident at a restaurant at Baltimore's Inner Harbor in which the officer reportedly mistook his cellular telephone for a handgun. A trial was scheduled Wednesday, but prosecutors notified Fein's attorney last Thursday that they planned to dismiss the case because of conflicting witness accounts, state's attorney spokeswoman Marty Burns said. Fein played quarterback for South Kitsap High School before graduating in 2000. At age 19 he enlisted in the Army and spent 2½ years in Iraq as a 19 Delta reconnaissance scout. He later enrolled at Scottsdale, Ariz., Community College, became one of the nation's top junior college recruits and played for Ole Miss in 2007 and 2008. In two seasons at Ole Miss, he had 136 tackles (77 solo) in 24 games, according to the school's Web site. "A humble young man," Baltimore linebacker Ray Lewis said. "Our hearts definitely go out to his family because it's such a tragedy for a man to be that young and go through the things he's been through" (ESPN, 2009).**

**As documented in the following article, Fein was poisoned. Chances are, he was poisoned while in jail, but did not die until the next day.**

**Date:** November 25, 2009

**Source:** ESPN, Associated Press

**Title/Headline:** *Tony Fein Died Of Overdose*

**Abstract: Former NFL player Tony Fein died of an accidental drug overdose, the Kitsap County coroner said Wednesday. Coroner Greg Sandstrom said that toxicology tests showed "acute opiate [morphine] intoxication" with the added effect of Alprazolam, a drug used to treat anxiety. Sandstrom says Fein also vomited and aspirated that material. Fein collapsed Oct. 6 at a friend's house near Port Orchard and died at Harrison Medical Center in Bremerton. The 27-year-old from Port Orchard was an Army veteran who served in Iraq. The linebacker was an undrafted rookie free agent from the University of Mississippi who played for the Seattle Seahawks and Baltimore Ravens in the preseason (ESPN, 2009).**

**If ESPN reports are to be believed, Fein was arrested for a cell phone that was thought to be a gun, tackled and taken into custody, (despite witnesses reporting that Fein never resisted arrest), was released later that evening, spent the night in two different places (friend's house and with his team in a hotel), where he took allegedly took deadly cocktail of drugs, survived until morning, and died the next day on the way to the hospital.**

**Title/Headline:** *Gaines Adams*

**Date of Death:** January 17, 2010

**Location of Death:** Greenwood, South Carolina, USA

**Age of Death:** 26

**Days before Super Bowl XLV:** 385 (55 Weeks & 0 Days)

**Abstract: Gaines Adams (June 8, 1983 – January 17, 2010) was an American football defensive end in the National Football League. He was drafted by the Tampa Bay Buccaneers in the first round in the 2007 NFL Draft and in 2009 was traded to the Chicago Bears. He played college football at Clemson. Adams was taken to the emergency room in Greenwood, South Carolina on the morning of January 17, 2010, after his girlfriend found him at home. **He was pronounced dead at 8:21 a.m. ET. The coroner confirmed, after an autopsy, that Adams died of cardiac arrest due to an enlarged heart.** Neither Adams nor his relatives knew about any kind of medical condition he may have had. At the time of his death, neither drug abuse nor foul play was suspected (Wikipedia, 2010).**

**Title/Headline:** *Keli McGregor*

**Date of Death:** April 20, 2010

**Location of Death:** Salt Lake City, Utah, USA

**Age of Death:** 47

**Days before Super Bowl XLV:** 292 (41 Weeks & 5 Days)

**Abstract:** Keli McGregor (January 23, 1963– April 20, 2010) was a professional football player in the NFL and was president of the Colorado Rockies from 2001 until his death. On April 20, 2010, he was found dead at the age of 47 in a Salt Lake City hotel room while on a business trip. He was in his seventeenth season with the Rockies, his ninth as club president. Initial indications were that he died of natural causes. Other major figures in the game paid tribute to him as the news of his death became public. **On August 30, 2010 it was announced that McGregor died of a rare virus that infected his heart muscle. The infection caused lymphatic myocarditis, killing an otherwise healthy McGregor. "In an unusual manifestation of a viral illness, this organism infiltrated his heart muscle and disrupted the electrical pathways that signal the heart to beat properly,"** a statement from his family said. "The heart muscle may have recovered from the viral attack had these electrical pathways not been destroyed, but the muscle may have been permanently weakened and destined for eventual heart failure." **It continued, "Just as a healthy brain can be infected with viral meningitis, a healthy heart can be infected with viral myocarditis,"** the McGregor family stated. "Fortunately, the vast majority of viral illnesses do not damage the heart or the brain" (Wikipedia, 2010).

**Title/Headline:** *Longtime Oakland Raiders Defender Jack Tatum Dies At 61*

**Date of Death:** July 26, 2010?

**Location of Death:** Oakland, California

**Age of Death:** 61

**Days before Super Bowl XLV:** 195 (27 Weeks & 5 Days)

**Abstract:** Longtime Oakland Raiders defender Jack Tatum has died. His former teammate at Ohio State, John Hicks, confirmed the death to WBNS-TV in Ohio. Tatum was 61. He died of a heart attack. Tatum was a three-time Pro Bowler in nine season with the Raiders from 1971-1979. He finished his career with one season with the Houston Oilers. The NFL Network ranked him as the sixth-most feared defender in league history in a panel last summer. **His hit on Darryl Stingley in 1978 left the Patriots wideout paralyzed. Tatum later wrote a book titled "They Call Me Assassin."** The Raiders released a statement mourning Tatum's passing. It read: "We are deeply saddened by the news of Jack Tatum's passing. Jack was a true Raider champion and a true Raider warrior." Tatum suffered from diabetes and had five toes amputated from his left foot. He was a product of Ohio State, whose coach, Jim Tressel, released this statement about his passing: "We have lost one of our greatest Buckeyes. When you think of Ohio State defense, the first name that comes to mind is Jack Tatum. His loss touches every era of Ohio State players and fans" (Leahy, 2010).

**\*Although Tatum's date of death is listed July 27, 2010, due to his body being found that day, it is probable to assume that he may have died the previous night, thus making his time of death on 26<sup>th</sup> of July, 2010.**

**Title/Headline:** Kenny McKinley

**Date of Death:** September 19, 2010\*

**Days to Super Bowl XLV:** 140 (20 Weeks & 0 Days)

**Location of Death:** Centennial (Denver), Colorado, USA

**Age of Death:** 23

**Abstract:** Kenny McKinley (January 31, 1987 – September 20, 2010) was an American football wide receiver for the Denver Broncos of the National Football League. He was drafted by the Broncos in the fifth round of the 2009 NFL Draft. He played college football at South Carolina. **McKinley was found dead on September 20, 2010, from an apparent self-inflicted gunshot wound. His death was reported as a suicide by local media, and later confirmed by members of the Arapahoe County Sheriff's office.** A 131-page report was released by the Arapahoe County Sheriff's Department on December 1st 2010, concluding the investigation into McKinley's death. It stated that depression over debt, injury and his post-playing career was the main factor for his suicide. The report stated that McKinley had a gambling problem and was deep in debt (Wikipedia, 2010).

**\*Although McKinley's date of death is listed September 20<sup>th</sup>, 2010, due to his body being found that day, it is probable to assume that he may have died the previous night, making it exactly 20 weeks prior to Super Bowl XLV.**

**Date:** September 21, 2010

**Source:** The Huffington Post, Associated Press

**Title/Headline:** *Kenny McKinley Did Not Show Signs He Was Suicidal, Say Broncos Teammates, Coaches*

**Abstract:** Denver Broncos wide receiver Kenny McKinley, who is thought to have killed himself with a gunshot to the head, had made previous statements about committing suicide, according to a sheriff's investigative report released Tuesday. The Arapahoe County Sheriff's report quoted one investigator as saying McKinley had been depressed over a knee surgery he had a month ago. "He had made statements while playing dominoes shortly after the surgery that he should just kill himself," the officer reported. "No one believed he was serious." The report provided no explanation for the source of the investigator's information. The report also said

McKinley had made statements about not knowing what he would do without football. It said McKinley had flown to South Carolina 10 days earlier to see his young son and had brought him back with him to Denver on Sunday night. **Two female friends who were taking care of his son discovered McKinley's body Monday and called 911. Detectives who responded to his home a few miles from the Broncos headquarters found McKinley's body with a pillow over his head and a semiautomatic pistol on top of the pillow.** They also noted a strong odor of freshly burned marijuana, according to the report. Arapahoe County Coroner Michael Dobersen said Tuesday that McKinley died of a gunshot wound to the head. **He said a preliminary investigation "suggests the wound to be self-inflicted."**

**McKinley's teammates and coaches said Tuesday that they didn't see any hint the gregarious 23-year-old wide receiver was suicidal. Neither did the players at his alma mater, South Carolina, when he visited them earlier this month. "I actually saw Kenny a week and a half ago. He was over here picking up some stuff out of his locker," Broncos linebacker Wesley Woodyard said. "He was always a guy that used to love to joke with me and I would joke back and forth with him. But he had a big smile on his face. He just walked out of the building. "And that's the last thing we remember, that huge smile. Like coach said, he always showed every tooth in his mouth, just smiling and being happy." This is the third time in four years the Broncos have had to deal with the death of a teammate under stunning circumstances. Cornerback Darrent Williams, 24, was slain in a drive-by shooting on New Year's Day 2007, and three months later running back Damien Nash, 24, collapsed and died after a charity basketball game in St. Louis.**

Broncos coach Josh McDaniels said in a tearful news conference Tuesday that nobody with the Broncos sensed any warning signs from McKinley about his state of mind. **"We've all seen him recently. He's been the same person every time we see him. Liked junk food and chips and things like that," McDaniels said. "He was in the cafeteria, or in the training room, when we were seeing him the last so many weeks here. Nothing that would alarm us to anything like this."** Woodyard said McKinley was his usual joking and jovial self in recent weeks even as he was recovering from his second knee operation this year. **"Every memory that we have of Kenny is a joke and a big smile,"** Woodyard said. Woodyard said despite what it might look like to fans, NFL players have lots of pressures in their lives even though they're living the dream. **"Well, you know, football's a stressful job," he said, adding that players have to reach out for help. "It's the same thing with people in everyday life, you've got to talk to somebody in your life, so just to help you work out those problems."** McKinley was a fifth-round draft choice out of South Carolina in 2009. He remains South Carolina's all-time leading receiver with 207 catches for 2,781 yards. He returned to the school earlier this month, watching the Gamecocks beat Georgia 17-6 and visiting with his college coach, Steve Spurrier. **None of his old friends in Columbia, S.C., sensed anything was wrong. "No, all of our players said the same thing. When he was here, he was happy, smiling, the usual Kenny," Spurrier said. "In fact, I think he watched the Georgia game from up in my office there (in Williams-Brice Stadium) because he was on crutches from his knee surgery. I saw him up there right after the game. He was his usual self. It's hard to comprehend how that can happen."** People who are dealing with depression or suicidal thoughts aren't always outwardly despondent, said Dr. Michael Allen, director of research at the University of Colorado Denver Depression Center. He said suicidal individuals don't always reach out for help, even to those closest to them. **"Warning signs depend on the run up," Allen said, adding that suicidal people who have been depressed and thinking about killing themselves for weeks may sometimes reach out, or have trouble keeping a happy face to cover up their feelings. "For many people in the mild to moderate range you wouldn't know they're depressed. They're able to put up a good front of joviality,"** Allen said. Allen, who wasn't addressing McKinley's death specifically, said reaching out can be difficult for those in the military or on sports teams: **"In any group of men where toughness is valued, talking about anything that may be viewed as weakness goes against the grain,"** Allen said. The Broncos gathered Tuesday morning on their normal day off and met with grief counselors to help them deal with the death of their friend, who was on injured reserve after hurting his left knee in August. **"We prayed for his family and him," McDaniels said. The players decided to leave McKinley's locker in place for the remainder of the season as a shrine to their teammate. There will also be a moment of silence Sunday before their game against Indianapolis and players will wear white decals with No. 11 in navy on their helmets.** McDaniels said there's no way to make this a normal work week in preparing for the Colts, suggesting every player and coach will grieve in their own way. **"We've got to play with him on our shoulders and in our hearts,"** Woodyard said. **News of his suicide touched players across the NFL. "Kenny was such a good guy, such a fun guy to be around," said Minnesota Vikings receiver Sidney Rice, a college teammate of McKinley. "He was a happy guy who had a great sense of humor and he's going to be missed by so many people. He was funny and always kept people around him upbeat. I'm shocked he's gone."** McKinley played in eight games as a rookie in 2009 with seven kick returns for 158 yards before going on injured reserve with a left knee injury on Dec. 29. He recovered and participated in the team's offseason workouts but got hurt again during the first week of training camp and was placed on IR on Aug. 5. McDaniels said McKinley took the news well when he went on IR again, ending his season. **"It was really a decision that we made together. He knew the extent of his injury. It was really a choice he was very involved in,"** McDaniels said. **"There's situations where you could try to do something else, fight through it and all that, or you could try to have the operation and then go ahead and be ready to go for the next year. That's what we chose together. He was very much a part of that decision. He was working hard with his rehab."** McKinley's agent, Andrew Bondarowicz, said family and friends are at a loss to explain the death of a young man "who had such a love for life." **He said everyone has their theories, whether it was injuries, finances or something else. "There's nothing that we can point to and say, you know what, that's the sign that something was wrong or that he was struggling,"** Bondarowicz said. "At the end of the day, he was still an NFL player. Even the theories of financial difficulties, it was not like he was cut from the roster. You still get paid on injured reserve." **McKinley signed a four-year deal worth just under \$2 million last year after the Broncos selected him in the fifth round of the draft. The deal included a \$200,000 signing bonus and a \$310,000 rookie salary. He was making \$395,000 this season even though he was hurt.** Travis Shelton, a rookie receiver with McKinley in Denver before being waived, said he had spoken by phone with his friend earlier this month and McKinley was looking on the bright side of being out for the season. **"He was telling me he got time to spend with his son,"** Shelton said (The Huffington Post, 2010).

**Date:** December 6, 2010

**Source:** NFL, Associated Press

**Title/Headline:** *Former Cowboys QB, MNF Personality Don Meredith Dies At 72*

**Date of Death:** December 5, 2010

**Location of Death:** Santa Fe, New Mexico, USA

**Age at Death:** 72

**Days to Super Bowl XLV:** 63 (9 Weeks & 0 Days)

**Abstract:** Don Meredith, one of the most recognizable figures of the early Dallas Cowboys and an original member of ABC's Monday Night Football broadcast team, died Sunday. He was 72. Meredith's wife, Susan, told The Associated Press on Monday her husband died in Santa Fe after suffering a brain hemorrhage and lapsing into a coma. She and her daughter were at Meredith's side when he died. "He was the best there was," she said, describing him as kind, warm and funny. **"We lost a good one."** She said a private graveside service was being planned and that family members were traveling to Santa Fe. Meredith played for the Cowboys from 1960-1968, becoming the starting quarterback in 1965. **While he never led the Cowboys to the Super Bowl, Meredith was one of the franchise's first stars. "Don Meredith was a Dallas Cowboys original,"** Cowboys owner Jerry Jones said in a statement released by the team. **"His wit, charm, and strength of personality were matched only by his wonderful leadership, toughness and athletic skill.** The Cowboys legacy has been built by dynamic and colorful personalities who could also compete at the highest level. No one fit that description better than Don Meredith. **"Few men have contributed, both on the field and as a broadcaster, to the impact that the NFL currently has on our country today more than Don. "Our thoughts and prayers are with his family and friends, and his spirit will be with Cowboys players and fans forever."** Over his nine-year career, Meredith threw for 17,199 yards and 111 touchdowns. **He retired unexpectedly before the 1969 season.** Just two years after retiring from football, Meredith joined Keith Jackson and Howard Cosell in the broadcast booth as part of the Monday Night Football crew. **He quickly became one of the most popular broadcasters in sports because of his folksy sayings and country humor. Meredith's signature call was singing the famous Willie Nelson song "Turn Out the Lights" when it appeared a game's outcome had been determined.** Meredith left ABC after the 1973 season for a three-year stint at NBC. He returned to the MNF crew in 1977 before retiring in 1984, one year after Cosell left the team. "Don Meredith was one of the most colorful characters in NFL history," Commissioner Roger Goodell posted on his Twitter account Monday. **"He was a star on the field who became an even bigger star on TV. Don brought joy to football fans, from his play in historic NFL games like the Ice Bowl to his great personality that helped launch the success of Monday Night Football."** Before a generation knew Meredith for his colorful broadcasting career, he was one of the most recognizable figures of the early Dallas Cowboys teams. Meredith was drafted in the third round by the Chicago Bears in 1960 and was traded to the expansion Cowboys franchise for future draft picks. "Dandy Don", as he was affectionately known, shared time under center with Eddie LeBaron before winning the starting job in 1965. **Meredith led the Cowboys to three straight division titles and to consecutive NFL Championship games in 1966 and 1967. Dallas lost both games though to eventual Super Bowl winners Green Bay. In 1966, Meredith guided the Cowboys to their first-ever winning season (10-3-1). He was named NFL Player of the Year after throwing a career-high 24 touchdown passes and 2,805 yards. Meredith was one of nine Dallas players selected to the Pro Bowl that year -- the first of his two Pro Bowl years.** (NFL, 2010).

**Conclusion:** If these deaths are indeed a ritualistic human sacrifice, the NFL is offering up the best talent and personalities the can offer. With the players involved in suspicious deaths, one could assemble the best team on the planet. Aside from the three U.S. Military veterans deaths, some of the most famous TV personalities and sportsmen of the NFL met strange and suspicious deaths. Were all these deaths just by chance, fate, and natural causes, or is there something more sinister going on here?

## The Nuclear Bible: The NFL & International Expansion

**Intro:** Should a nuclear attack occur at the Super Bowl, the NFL would become a household name worldwide by the next day. People in every country of every religion and of every language would be talking about the Super Bowl. In order to cash in on its new found popularity, the NFL will likely expand into Europe, Canada, and possibly even Mexico. Just on time, many franchise stadiums have collapsed or teams existing stadium contracts have expired. Since there is likely to be a 2011 NFL lockout, the NFL will have an entire year to sort out the details of their new franchises abroad. When play resumes in 2012, the NFL will likely be an international league and it's dream of becoming a global league will finally be realized.

**Date:** 1991-2007

**Source:** Wikipedia

**Title/Headline:** *NFL Europe*

**Abstract:** NFL Europe was an American football league which operated in Europe from 1991 until 2007. Backed by the National Football League (NFL), the largest professional American football league in the United States, it was founded as the World League of American Football (WLAF) to serve as a type of spring league. In 1995, when the league was revamped after a two-year hiatus, the league name was shortened to the World League. In 1997, the league rebranded itself as the NFL Europe League or NFL Europe, which it held for most of the rest of its lifetime. For the league's last season, it would officially change its name to NFL Europa. At the time of its disbanding, there were six teams in the league: five based in Germany and one in the Netherlands. Players in NFL Europa were predominantly assigned by National Football League teams who wanted these younger, "developmental" players to get additional game experience and coaching. The expenses of these players and their coaches while living in Europe were assumed by the league. **On 29 June 2007, the NFL announced NFL Europa would immediately cease operations** (Wikipedia, 2010).

**Title/Headline:** *Cardinals Handle 49ers In Mexico 31-14*

**Abstract:** Robert Griffith sprinted out of the giant inflatable helmet, charging through the smoke and the corridor of cheerleaders. The Cardinals safety was screaming -- and wildly waving a Mexican flag. Needless to say, the biggest regular-season crowd in NFL history went loco. Judging from the vibrant colors in the stands and the beautiful halftime show, the NFL's first regular-season game outside the United States was a phenomenal fiesta for the 103,467 fans -- even if the Arizona Cardinals' 31-14 victory against the San Francisco 49ers wasn't exactly the most savory version of "futbol americano." Josh McCown passed for a career-high 385 yards and two touchdowns against the Niners' pathetic pass defense, and Neil Rackers kicked a career-best six field goals through the 7,700-foot air while Arizona's defense shut out San Francisco's offense. **But the sloppy play and one-sided result in a game between two of the NFL's worst teams seemed secondary to the goodwill and international exposure of a foreign venture the league hopes to turn into an annual affair.** "The experience in Mexico City has been wonderful, and this capped it off," said Rackers, who fell one short of the NFL record for field goals in a game. "It was wonderful. They're great fans, really into the game, more knowledgeable than I thought they would be. It was probably the best crowd I've been around." The cavernous arena was packed to the rafters with a crowd that exceeded the league's most optimistic projections two days ago, proving the sport's avid following in Mexico is second to none outside the United States. The NFL is widely popular south of the border, with nearly one in five Mexicans claiming an interest in the league. The NFL opened an office in Mexico in 1998, with an eight-person staff overseeing its growing profile. The league's popularity was evident to visitors arriving at Azteca, where the number of fans wearing replica jerseys -- more Dallas Cowboys than Niners or Cardinals -- nearly outnumbered the hundreds of police and security officials ringing the stadium. Only a few empty seats were visible in the upper deck of the famed soccer venue. Mexican fans showed they know football, cheering for surging ball-carriers and whistling at San Francisco's poor offensive execution. **And when the game got a bit dull early in the second quarter, they did "La Ola" -- the wave. When McCown made a spinning move to dodge a tackler in the fourth quarter, the fans shouted "Ole!"**

"Fans around the world can take notice of the way these people are, their passion about the game," 49ers coach Mike Nolan said. "It was exciting to play the game for both teams today, and they certainly latched on to the team that was ahead at the end, because early on, we had them on our side" (NFL, 2005).

**Title/Headline:** *NFL's Popularity In Mexico Continues To Grow*

**Abstract:** The United States' southern neighbor is home to millions of the league's fans. Could it get a team someday? A week from Sunday, Carlos Meza will join nearly two dozen friends and family members in front of the TV in his stepfather's tiny second-floor apartment. They'll gather behind tables filled with takeout pizza, tacos and sushi, and coolers filled with beer and soda, to watch the Indianapolis Colts battle the New Orleans Saints for the NFL title. "This year is going to be my 20th Super Bowl in a row," Meza, 28, said proudly. **Nothing unusual about that. Last year's Super Bowl telecast drew a record 98.7 million viewers in the United States.** But Meza won't be watching in the U.S. His stepfather's apartment is in a middle-class neighborhood in downtown Mexico City, where futbol is more commonly played with a round ball. In recent years, however, the city has also become home to a loyal, passionate -- and rapidly growing -- NFL fan base. **T-shirts, sweaters and replica jerseys bearing the emblems of the Dallas Cowboys, Pittsburgh Steelers and Miami Dolphins -- the country's most popular teams -- have become commonplace all over Mexico, where the NFL Network is now available on basic cable and 40 movie theaters in 10 cities show Monday night games live on the big screen.** What Mexico lacks, however, is a franchise. And Meza, a film distributor for Paramount Pictures, says that's a mistake. **"Here in Mexico there are a lot of fans of the NFL," said Meza, a die-hard backer of the Jacksonville Jaguars. "I think an NFL franchise here in Mexico would be a great idea."** Futbol Americano has a long history in Mexico, dating to 1896 and the first official game in Veracruz. Mining businesses soon helped to popularize the game, organizing competitions between company teams. By the early part of the 20th century a professional championship had been played, and the National Student Organization of American Football -- the Mexican version of the NCAA -- was established to regulate the sport in schools. **The NFL's popularity in Mexico is more recent, dating to the 1970s, when broadcasting giant Televisa began airing games in Mexico. Most of those early contests featured the Cowboys and Steelers, which explains those teams' continuing popularity. But the telecasts coincided with a huge increase in Mexican immigration to the U.S., with a Pew Research Center finding that 11% of the people born in Mexico now live on the northern side of the border.** That's led to an unprecedented wave of cultural sharing that has popularized many U.S. staples, from Taco Bell to tackle football, in Mexico. **Although the league claims more than 16.5 million fans in Mexico -- the largest concentration outside the U.S. and Canada -- that doesn't necessarily move the country to the top of a growing list of nations hoping to lure the NFL for even a game, let alone a franchise.** "We've started to make real progress there in terms of sponsorship, broadcast, etc.," said Chris Parsons, the NFL's vice president for international business. "But we're still a little ways off of having everything aligned and ready to go for games to go back into the Mexico market. We feel confident that we could do very well with a game in Mexico. We just want to make sure we do it at the right time with the right partners, the right support and the right sort of scale of fans that are avid in the marketplace that we can build off." **The league has international offices in five countries on three continents and has staged regular-season games before sellout crowds in London's Wembley Stadium in each of the last three years, and will be back for a fourth in October. It has also played 14 exhibition games in Japan and nearly staged a 2007 preseason matchup between the Seahawks and Patriots in China, where more than 7 million people watch the NFL on television. Six games have been staged in Mexico City between 1994 and 2005, drawing an average crowd of 100,392. A 2005 game between the Arizona Cardinals and San Francisco 49ers drew 103,467 fans into Estadio Azteca, at the time a record for a regular-season game. The NFL record for any game was also set at Azteca when a 1994 preseason game between the Houston Oilers and Dallas drew 112,376. "Obviously, the fan base is already in place," said Rolando Cantu, the first Mexican-born offensive lineman in NFL history and now an executive with the Arizona Cardinals, one of two teams that broadcast their games on radio in Mexico. "People are hungry for American football down there, especially on a professional level." Placing a team in either Monterrey or Mexico City -- Mexico's largest football hotbeds and the most likely sites for a franchise -- would do little to complicate travel since nearly half the NFL's teams are closer to both cities than they are to Buffalo, N.Y. "It will be a perfect fit," said Cantu, who said his team has season-ticket holders in Mexico and regularly welcomes fans who travel to Phoenix from the northern Mexican state of Sonora. "The challenge that we've got in Mexico is lining everything up to make sure that everyone is supporting the initiative in the same way that we get that partner support" in the United Kingdom, Parsons said. "We have no shortage of people and stadia and everything else, countries, wanting to host an NFL game and even have a team. But the business of what we do, we have to be absolutely sure that as we make those kinds of commitments that we're seeing the business side of that playing back to us. And we're very mindful of that." "The challenge that we've got in Mexico is lining everything up to make sure that everyone is supporting the initiative in the same way that we get that partner support" in the United Kingdom, Parsons said. "We have no shortage of people and stadia and everything else, countries, wanting to host an NFL game and even have a team. But the business of what we do, we have to be absolutely sure that as we make those kinds of commitments that we're seeing the business side of that playing back to us. And we're very mindful of that" "Mexico is an important market for the NFL," said Darin Perry, the L.A.-based director of brand and sponsorship marketing with the Marketing Arm, a leading international consulting agency. "The world, as we know it, is getting smaller. The boundaries of all kinds are disappearing. And as that happens, whether you're a corporate brand or a sports league, there's a push to reach new growth opportunities. "Tapping into that new world market is just a natural progression" (Baxter, 2010).**

**Title/Headline:** *Quick Facts: History Of NFL Games Outside The United States*

**Abstract:** With the Giants and Dolphins playing in London this week as part of the NFL's International Series, here are some quick facts NFL games abroad.

#### New York Giants Abroad:

- The Giants are 3-2 in international games
- The Giants defeated the CFL Ottawa Rough Riders in Ottawa in 1950 and 1951
- The Giants lost to Chicago, 16-7, in Toronto in 1960
- The Giants lost to the Steelers in Montreal in 1969
- The Giants defeated San Diego, 28-20, in Berlin, Germany, in 1994

#### Miami Dolphins Abroad:

- The Dolphins are 4-0 in international games, including 1-0 in London
- The Dolphins defeated the 49ers, 27-21, in London on July 31, 1988 (American Bowl)
- The Dolphins defeated the Raiders, 19-17, in Tokyo, Japan, in 1991
- The Dolphins defeated Denver, 31-27, in Berlin, Germany, in 1992
- The Dolphins defeated the Broncos, 38-19, in Mexico City, in 1997

#### NFL International Games:

- This marks the second regular-season game played outside of the U.S. (the first was in Mexico City in 2005; Cardinals defeated 49ers)
- It's the first regular season game outside of North America
- This will be the 10th NFL game played in London
- It will be the 19th NFL game played in Europe (1 in Sweden; 1 in Ireland; 2 in Spain; 5 in Germany)
- This marks the 58th NFL game played on foreign soil (including 6 NFL-CFL games and 1 AFL-CFL game played in Canada)
- The first NFL game played outside of North America was on Aug. 16, 1976 in Tokyo, Japan (St. Louis Cardinals defeated Chargers, 20-10)

#### The Breakdown of Non-European Countries:

**Canada:** 16 NFL Games

**Japan:** 14 NFL Games

**Mexico:** 8 NFL Games

**Australia:** 1 NFL Game

**Mexico City, Mexico:** The Cardinals-49ers game at Mexico City's Azteca Stadium had the largest attendance for a regular-season game in NFL history - 103,467.

#### Wembley Stadium, London, England:

- Seating capacity is 90,000 seats, second-largest in Europe
- The first game played in London (Wembley Stadium) and Europe was Aug. 6, 1983 (Vikings defeated St. Louis Cardinals, 28-10)
- The NFL's American Bowl series has been played 40 times, 8 times in London. The first American Bowl was played Aug. 3, 1986 - Chicago defeated Dallas, 17-6.

**Title/Headline:** *NFL To Kick Off Countdown To 2008 Beijing Olympics When Patriots Face Seahawks In First-Ever NFL Game In China*

**Abstract:** **NFL to kick off countdown to 2008 Beijing Olympics when Patriots face Seahawks in first-ever NFL game in China.** The National Football League - America's most popular sports attraction - has been selected by the city of Beijing to stage a game in the Chinese capital city that will serve as the kickoff of the one-year countdown to the opening of the XXIX Olympic Games in China. The National Football League - America's most popular sports attraction - has been selected by the city of Beijing to stage a game in the Chinese capital city that will serve as the kickoff of the one-year countdown to the opening of the XXIX Olympic Games in China. NFL Commissioner Roger Goodell announced Sunday night that the New England Patriots and Seattle Seahawks will play in the first NFL game in China -- the world's fastest growing market -- when the teams meet in Beijing on Wednesday, August 8, 2007. Also taking part in the press conference prior to the Denver at New England game were Patriots Chairman & CEO Robert Kraft, NBC Universal Sports & Olympics Chairman Dick Ebersol, and Miss Ren Jun, who represented the Beijing Sports Competition Management Center. "We are very excited and proud to be bringing our game to China," said Commissioner Goodell. "We thank the Patriots and Seahawks for agreeing to take part in this historic game. We are also grateful to our broadcast partner -- NBC and its parent company GE -- and to the Beijing Municipal Sports Bureau and the Beijing Sports Competition Management Center. This promises to be a memorable event." The game will be televised live in China in primetime by China Central Television (CCTV) at 8:30 PM. CCTV is China's largest national TV network. NBC will carry the game live in the United States at 8:30 AM ET. **With a capacity of 60,000, Beijing's Workers Stadium - site of the soccer competition at the 2008 Summer Olympics - will play host to the matchup between the Patriots and Seahawks, two of the NFL's most exciting teams.** The Seahawks played in last season's Super Bowl after winning their first National Football Conference championship. Seattle is one of the top contenders to represent the NFC again at Super Bowl XLI, which will be played on February 4 in South Florida. Led by reigning Associated Press NFL Most Valuable Player Shaun Alexander and quarterback MATT HASSELBECK, Seattle is aiming for a third consecutive NFC West championship under head coach Mike Holmgren. Seattle previously participated in the NFL's international American Bowl games in Vancouver, Canada and Tokyo, Japan. In their first international game since 1998 (Vancouver), the Seahawks will seek their first victory outside the United States. "The Seahawks are honored to be one of the teams selected to represent the NFL in this prestigious event," said Seattle Chairman Paul Allen. "We are proud of the Pacific Northwest's deep cultural and business ties to China. We look forward to developing relationships surrounding this game that will have a lasting impact and will serve as a legacy of our participation in this historic event." Led by head coach Tom Belichick and quarterback Tom Brady, New England has enjoyed unparalleled success in recent years, capturing three NFL championships in four seasons from 2001-04, by winning Super Bowls XXXVI, XXXVIII and XXXIX. **The Patriots have taken part in two international games since the American Bowl series of preseason games was instituted in 1986. They played in Montreal, Canada in 1990 and in Mexico City, Mexico in 1998. The trip to China will be the team's first game outside of North America. "My family has been doing business in China for nearly 20 years and we are proud that The Kraft Group is New England's number one exporter to China," said the Patriots' Kraft. "Based on our own experiences in China and the growing interest in American sports there, we launched a Patriots website in Chinese in 2004. It was the first of its kind. It is a privilege and an honor to be selected to participate in the NFL's inaugural China Bowl in 2007. I think our players and staff will be terrific ambassadors for the game of football and I hope that it will be an experience that they will never forget. I look forward to developing new relationships and building a legacy for the Patriots and the NFL in such a great country."** Fans in China will be familiar with the Patriots and Seahawks. CCTV is broadcasting the NFL's schedule of Sunday Night Football games live in China throughout the 2006 season, culminating with an on-site telecast of Super Bowl XLI. Seattle and New England each will appear on Sunday night at least twice this year. **The game in China will mark the 42nd international contest for the NFL in the American Bowl era. There have been 40 international preseason games and one regular-season NFL game since 1986. The regular-season game took place last year in Mexico City, where a record crowd of 103,467 in Azteca Stadium watched the Arizona Cardinals top the San Francisco 49ers 31-14 (New England Patriots, 2006).**

**Source:** China Sports Review

**Title/Headline:** *NFL Cancels China Bowl, Again*

**Abstract:** **The N.F.L., widely considered the most successful sports league in North America, will reduce its staff by about 150 employees after the Super Bowl in response to the slumping economy, Commissioner Roger Goodell told staff members in a memo Tuesday.** The N.F.L. has a total of 1,100 employees at its New York headquarters, at NFL Films in New Jersey and at the Los Angeles offices of the NFL Network and NFL.com. Although voluntary buyouts are being offered now, the league will not determine the breakdown of cuts until after the championship game on Feb. 1. Some franchises have started to trim their staffs, as well. The Denver Broncos made cuts earlier this year, and the New England Patriots recently laid off about 5 percent of the staff from Gillette Stadium -- about two dozen people -- in anticipation of reduced trade-show and special-event business there next year. **The Patriots also closed their one-person China office, which opened when the team was scheduled to play a game there. With the N.F.L. focusing its overseas plans on regular-season games in Europe, the China game has been canceled. This is actually the second cancellation of the NFL China game this year. The 2008 game, which scheduled for August 9 between New England Patriots and Seattle Seahawks, was called off by NFL this April, with the reason that they wanted to concentrate their "global resources" on next October's regular season game in London.** NFL China has been concentrating on developing grassroots fans in local colleges by staging various events and also marketing themselves on TV and the Internet. Chinese fans can now watch games on CCTV and Shanghai TV, and a live game is also available once a week on Sina.com, a major Chinese web portal. **We're surprised by the Patriots' pullback from Beijing. But it all makes sense when looking at a bigger picture, where Honda's withdrawal from F1, MLB's recent job cuts and Arena Football League's possible suspension in 2009 are all considered (China Sports Review, 2008).**

**Date:** January 15, 2010

**Source:** NFL, Associated Press

**Title/Headline:** *49ers To Play Broncos In London In 2010*

**Abstract:** The San Francisco 49ers will play the Denver Broncos next season at Wembley Stadium, **the fourth straight year the NFL will stage a regular-season game in the British capital.** "For the past three years we have seen the extraordinary passion that exists for NFL football in the U.K.," NFL commissioner Roger Goodell said in a statement. "We want to continue to build on that passion by strengthening our ties to our existing U.K. fans and creating new ones." The game between the five-time Super Bowl champion 49ers and two-time winner Broncos may not be the only one in Britain next season. "The NFL will continue to explore the possibility of playing a second game in the UK in 2010," the NFL said. The NFL has played games at Wembley for the last three seasons, with more than 80,000 fans at each game. **Manchester and Glasgow, Scotland, are being looked at as potential venues to host NFL games.** In October, before the New England-Tampa Bay game, Goodell said the idea of eventually **putting an expansion team in London was of "tremendous interest" to the NFL.** He gave no timeline when such a decision might be taken (NFL, 2010).

**Date:** October 29, 2010

**Source:** Sports Illustrated, Associated Press

**Title/Headline:** *Roger Goodell: NFL Supports Expansion Into Europe*

**Abstract:** Football is in the land of futbol to stay - and with an even bigger presence if NFL Commissioner Roger Goodell has his way. **When the San Francisco 49ers take on the Denver Broncos at Wembley Stadium on Sunday, they'll be the latest teams that went across the Atlantic to do their part in helping the league grow its international fan base.** And despite the long travels and disrupted team schedules such a trip brings, the NFL is charging ahead with plans to increase the number of games it plays overseas. **This Sunday marks the fourth regular-season game to be played in London, and Goodell said the success of the previous three sellouts has buoyed his hopes to succeed with his ultimate expansion goal - having a full-time franchise in London.** "Each year, the different barometers indicate that our popularity continues to rise," Goodell said at an annual sports conference the NFL organizes together with The Economist magazine in London. **"I think the next step will be multiple games (in Europe). And if that's successful then I think the idea of a franchise here is realistic."** He just has to get the players and teams on board first, which may not be all that difficult. Like the teams that came before them, the Niners and Broncos have only had good things to say about their trans-Atlantic trip - focusing more on the team-building opportunities than the jet lag and time spent away from home. **"I've never been out of the country, so this is definitely a good experience and opportunity," Niners cornerback Nate Clements said. "And I look to take advantage of this and make the most of it."** Of course, it's not exactly easy to bring the full NFL circus abroad. Traveling logistics are one of the biggest challenges for teams coming over for games, highlighted by the Niners (1-6) and Broncos (2-5) choosing drastically different strategies for how to approach Sunday's matchup. San Francisco arrived on Monday and has spent the week in a five-star hotel in the countryside outside London, getting adjusted to the time difference and practicing on a field with the same wet and slippery conditions expected at Wembley. The Broncos, meanwhile, chose to stay home longer and only arrived Friday. **"Everyone was kind of like walking zombies off of the flight," Broncos offensive lineman Chris Kuper said. "Once we catch up on sleep we should be fine. We got two days to catch up on sleep."** The Niners have the added disadvantage of being listed as the home team, meaning they get one less game to play in San Francisco. But with the city turning the spotlight to the Giants playing in the World Series, it's not a bad time for the struggling football team to explore new surroundings. **"When you look at where we are right now as a team, it is nice to be able to get away and come here, and be able to sort of regroup as a team internally,"** head coach Mike Singletary said. Goodell acknowledged it's "painful" for teams to give up a home game, and said that's one of the reasons the NFL is considering expanding its regular season schedule to 18 games. That would let teams have eight home games even if they go abroad. Sending teams so far to play in front of foreigners may seem extreme, but Goodell insists it's the best way to connect with international fans - especially because most of them never have a chance to play the sport themselves. **"That is one of our challenges, how do we promote a sport that is not played by the youth in each of those markets?" he said. "But I think that's where media and bringing our game to those markets meets those challenges. We've seen it here in this marketplace, we've seen it in Japan, Mexico and Canada."** Goodell would not give any hints about a timeline for putting a team in London, "other than as fast as is practical." **"Once we've got the logistics, which I think we have, then it's just a question of the growth of the marketplace,"** Goodell said. **"And that's where we believe playing multiple games will demonstrate that there is a strong foundation for American football. Fans want to see it, there are partners that will support it. ... And when you can get to that point, I think you've given yourself a great deal of confidence that a franchise here would be successful."** So would players be willing to come play for a team based in England? Broncos quarterback Kyle Orton thinks so. **"London is a great place because you're going to have to find a combination of a city where people want to live and play for that team and I think this would be a great choice,"** Orton said. **"You've got to find a city that you can get 53 guys that kind of want to live over here. London's a great city and I think you'd have a lot of interest from players"** (Sports Illustrated, 2010).

## The Nuclear Bible: Stadium Debacles

**Date:** December 13, 2010

**Source:** Los Angeles Times

**Title/Headline:** *The Metrodome Collapse And The Shifting Symbolism Of The Domed Stadium*

**Abstract:** There was a time when the domed stadium was a leading architectural symbol of modernity and American building prowess. When Houston's Astrodome opened in 1965, for example, it was hailed as an engineering breakthrough and as the Eighth Wonder of the World; its clear span of 642 feet was more than double the size of any interior space ever built. **In recent years, however, the dome -- as a building type and a representation of American might -- has been taking it on the chin.** The Astrodome has been abandoned and is now used to store idle vans and trucks as Houston architects debate possible future uses for it. **In New Orleans, meanwhile, the Superdome became synonymous with despair and destruction when its roof was torn off by Hurricane Katrina and a few days later began serving as a leaky, squalid and dystopian temporary home for residents displaced by the storm.** The latest sign of the dome's demise as a symbol of progress and expertise came this weekend, when a heavy snowfall caused the roof of the Metrodome in Minneapolis -- designed by Skidmore, Owings and Merrill and completed in 1982 -- to collapse. **The damage means the Minnesota Vikings, the dome's key remaining tenant after the Twins moved to a new baseball-only stadium, will be forced to play a "home" game Monday night against the New York Giants at Detroit's Ford Field (Los Angeles Times, 2010).**

**Title/Headline:** *Roof Collapse Could Be End Of NFL In Minnesota*

**Abstract:** Zygi Wilf has campaigned for public funding for a new football stadium ever since he bought the Minnesota Vikings for \$600 million in 2005. The state has put out money for new venues for the Minnesota Wild, Minnesota Twins and Minnesota Golden Gophers football team that have all opened over the past decade. **Yet the state legislator has refused to play ball with Wilf on a new building as it deals with a budget forecast showing a deficit of \$6.2 billion over the next two years.** All of Wilf's stadium campaigning can't touch the powerful video of the Hubert Humphrey Metrodome roof collapsing under the weight of two feet of snow early Sunday morning. **It marked the fourth time the roof had collapsed although the first time since 1983.** Luckily no one was hurt and the impending game between the Vikings and New York Giants was moved to Detroit to be played Monday night. Like most things in the NFL the choice of Detroit was based on television. The NFL said that Detroit was the best logistical fit since Fox camera crews were already in the Motor City for the Lions-Packers game on Sunday. **If Wilf can't get public funding for a new stadium after Sunday's collapse, Minneapolis can kiss the NFL goodbye. The NFL is headed to Los Angeles at some point. It is no longer a question of if, but when the league looks to reenter the second biggest TV market in the U.S. Many L.A. questions remain for the NFL.** Do they follow the stadium plan of billionaire Ed Roski or Anschutz Entertainment Group's Tim Leiweke? Should a stadium house 1 or 2 NFL teams? **And the all important question: what team or teams should move? The Vikings and San Diego Chargers are presumed to be the favorites as they along with the Oakland Raiders are the only NFL teams left that need major stadium upgrades.** The Vikings more than any other NFL team need a new stadium from a financial perspective and now apparently from a structural perspective (Minnesota officials are optimistic the roof can be repaired in time for next Monday's game against the Chicago Bears). **The Vikings' stadium revenues including premium seating, concessions, parking, sponsorships and non-football events were the lowest in the NFL last year at \$19 million.** The league average for stadium revenues was more than three times that amount at \$60 million. Top teams like the Dallas Cowboys, New England Patriots and Washington Redskins generate more than \$150 million annually from their stadium excluding tickets. The Cowboys generate more than \$50 million annually just from its cadre of sponsors including Bank of America, Ford, Miller and PepsiCo. The Vikings' paltry stadium revenues are going to affect the team's on-field performance before long as the salary cap rises and the team struggles to keep up. **Fans are weighing in on the Star Tribune's website in a new poll that shows that 72% of fans want a new stadium, although only 6% say the roof collapse swayed their previous vote.** If the Vikings can't get public funding to partially support a new stadium, the roof collapse gives the team cover to walk away from the Metrodome and head for L.A. Vikings President and co-owner Mark Wilf wasn't touching the new stadium issue yesterday saying, **"I'm not going to comment on [the stadium issue]. For right now, we're focused on the Giants game tomorrow. There will be a proper time to discuss such things."** Time is running out to discuss things. The Vikings lease at the Metrodome expires after the 2011 season (Badenhausen, 2010).

A year before the “Big Bang” of NFL international expansion, there just happens to be a TV show about American football that is being broadcast in at least 37 countries. This is an obvious attempt to popularize the game in foreign markets, teach the basic rules and positions, and to sell the younger generation on the game of American football.

**Title/Headline:** Blue Mountain State

**Abstract:** Blue Mountain State is an American comedy series that premiered on Spike TV on January 11, 2010. The series producers include Chris Romano and Eric Falconer of It's Always Sunny in Philadelphia, Channel 101 and The Sarah Silverman Program. It is produced by Lionsgate Television.

The series is a takeoff of National Lampoon's Animal House and Van Wilder focusing on the football-centric university, Blue Mountain State, and its rather awkward team "The Goats". It covers topics of college life, including football, scoring with women, drinking binges, wild partying, and hazing.

**Conclusion:** It is clear that should the Super Bowl be attacked by a nuclear device, the entire world would have an interest in what happened, and the game would take on a whole new global identification. When looking at motives for this attack, NFL expansion would be a prime one.

**International Expansion Guesses:**

- London Lions
- Mexico City Raiders
- Hamburg Seahawks
- Berlin Chargers
- Toronto Bills
- Frankfurt Vikings
- Barcelona Buccaneers
- Amsterdam Redskins

## The Nuclear Bible: The NFL, NBA, MLB & NHL Lockout of 2011

**Intro:** Just in time for the 2011 nuclear detonation at the Super Bowl, the four major sports leagues of the United States, the NFL, NBA, MLB and NHL, just happen to be having a lockout, all simultaneously! Is this sheer coincidence, or does NFL Commissioner Roger Goodell, NBA Commissioner David Stern, MLB Commissioner Bud Selig, and NHL Commissioner Gary Bettman have foreknowledge regarding the nuclear attack, and are they complicit in the planning and executions of the subsequent aftermath?

**Date:** October 19, 2010

**Source:** The Washington Times, Jon Krawczynski

**Title/Headline:** *Union Says NFL Will Stop Health Care In March*

**Abstract:** The NFL has told the players' union that it will stop providing health care for players and their families in March if the two sides do not reach a new collective bargaining agreement. During an appearance with Minnesota Vikings fans on Tuesday, NFLPA executive director DeMaurice Smith said he was working to figure out a plan to ensure medical coverage for players and their families should they be locked out. Smith said he is dealing "with players where some of them have children who need heart transplants. We have several players who have children who are on kidney dialysis. We will have over 100 players who will have children who are born in the March, April, May timeframe. Right now all of those players need health insurance." NFL spokesman Greg Aiello said it's one more reason to reach an agreement. He also pointed to the federal COBRA law that allows employees to continue their existing coverage without interruption at their own expense or the expense of their union. "This means that no player or family member would experience any change in coverage for so much as a single day because of a work stoppage," Aiello told The Associated Press in an e-mail. "The union surely knows this and there is no excuse for suggesting otherwise." During the NHL lockout in 2004-05, the NHL players' union paid for substitute coverage. That will be one of several options the union will consider as it continues to prepare for a lockout. NFL owners spoke in optimistic tones at their fall meetings last week in Chicago, with many saying they believed a new deal could be reached without a work stoppage. New England Patriots owner Robert Kraft said he wanted to get something done by the holidays and NFLPA President Kevin Mawae echoed that desire. But Smith spoke a little less glowingly on Tuesday. "From a seriousness standpoint, the players believe this lockout is going to occur," Smith said (The Washington Times, 2010).

It is likely that should a nuclear detonation take place at the Super Bowl, hundreds of NFL players will seek psychological counseling and the NFL has decided that they will not pay for it. Aside from this point, many players have injuries that need year-round attention. Obviously, the NFL does not care about the health and well-being of their players, despite raking in billions in revenue due to their players.

**Title/Headline:** *NFLPA To Players: Save Your Pay For Possible 2011 Lockout*

**Abstract:** The NFL players' union has advised its members to prepare for a lockout that it expects to come in March, telling players to save their last three game checks this year in case there isn't a 2011 season. In a letter to the players that was seen by The Associated Press, NFL Players Association executive director DeMaurice Smith said the union had an "internal deadline" for agreeing to a new collective bargaining agreement. "That deadline has now passed," Smith wrote. "It is important that you protect yourself and your family." It wasn't clear what effect the passing of the self-imposed deadline would have on negotiations. NFLPA spokesman George Atallah said in an e-mail to The AP that he wouldn't comment because the letter was supposed to be internal, but he later took to Twitter to explain the situation. Atallah tweeted that the letter provided "an internal deadline to prepare, not for CBA negotiations." He also revealed that the league and union met Friday. NFL Network insider Jason La Canfora confirmed the meeting through a source with knowledge of the situation. It was the sides' second sit-down in the last two weeks -- a rarity so far. Previously, they had talked every 4 to 6 weeks. Copies of the NFLPA's letter, which was dated Wednesday, were strewn across a table in the New England Patriots' locker room Saturday and were visible to players, reporters and team officials. After a reporter asked players about the letter, a Patriots spokesman flipped the copies face-down. NFL spokesman Greg Aiello called the union's stance "disappointing and inexplicable, especially for fans." "We hope this does not mean the union has abandoned negotiating in favor of de-certifying and litigating," he said. "We are ready to meet and negotiate anytime and anywhere. But it takes sustained effort and shared commitment to reach an agreement. One side can't do it alone." It wasn't clear when the union's self-imposed deadline was or what has changed now that it has passed. NFLPA spokesman George Atallah didn't immediately return calls seeking clarification. The NFL hasn't missed games due to labor strife since 1987, when owners responded to a player strike by continuing the season with replacement players. But the prospect of a lost season in 2011 intensified when owners opted out of the collective bargaining agreement in 2008. Smith has said that he believes the owners opted out with the goal of locking out the players. The NFLPA's home page features a "Lockout Watch" that counts down the days, hours, minutes and seconds until the CBA expires on March 3. The one-page letter on NFLPA stationery said the union expects the lockout to come March 4 and that players should work with their advisers to prepare for an impending lack of income. The letter also said the league is planning to cancel the players' health insurance. The union said it is filing a grievance to contest the cancellation, citing a section of the collective bargaining agreement that states:

**"Players will continue to receive the benefits provided in this article through the end of the Plan Year in which they are released or otherwise sever employment."** Dennis Curran, NFL senior vice president for labor litigation and policy, told the union in October that an employer isn't obligated to provide wages or salary or to pay for certain continued benefits for employees during a work stoppage. Curran added that under federal law, employees are entitled to continue their employer-provided health insurance coverage at their own or their union's expense. At that time, Aiello also pointed to the federal COBRA law, which allows employees to continue their existing coverage without interruption at their own expense or the expense of their union. **"This means that no player or family member would experience any change in coverage for so much as a single day because of a work stoppage,"** Aiello told The AP in an e-mail. "The union surely knows this and there is no excuse for suggesting otherwise." Patriots offensive lineman Matt Light, one of the team's player representatives, said Saturday that players understand the nature of the business, but canceling health insurance is a different matter. **"You're going to cancel somebody's health insurance and maybe they've got a baby that's due in the offseason?" he said. "Yeah, it gets personal."** Light said he is doing his best to educate his teammates on how to prepare. **"They've got to look at it like they're going into a period in which they are going to change their financial situation," he said. "Nobody knows what's going to happen. But if you're going to go a year without getting paid, you need to prepare accordingly."** Under the deal agreed to in 2006, the players receive 59.6 percent of designated NFL revenues. The owners opted out of that deal beginning next year, arguing they have huge debts from building stadiums and starting up NFL Network that make it impossible to be profitable. The two sides met last month and said they made "some progress" on proposals involving an 18-game regular season and limiting offseason workouts. Players have taken their case to the public in recent weeks, briefing Congress on the job loss and other economic impact of a lockout and even drafting letters for lawmakers to send to the league. **Using many of the same studies the NFL relies on when trumpeting public subsidies for new stadiums, an economist commissioned by the union estimated an average of about \$160 million in local spending and 3,000 jobs would be lost in each league city if the full 2011 season were wiped out.** The NFL called the figures "a fairy tale." Patriots linebacker Tully Banta-Cain said he already was squirreling away his savings in case of a lockout. Banta-Cain said he also was working on his outside businesses, which include a clothing line and a music label. **"I'm trying to prepare," he said. "And I'm trying to establish my off-the-field businesses and make sure I can make money in the offseason"** (NFL, 2010).

**NFL PLAYERS**  
ASSOCIATION

**Date:** June 20, 2010

**Source:** USA Today

**Title/Headline:** *National Football League Players Association*

**Abstract:** The NFLPA and the league have extended their 1993 agreement five times, most recently in March 2006 when it was extended through the 2011 season after the NFL owners voted 30-2 to accept the NFLPA's final proposal. However, in May 2008 the owners decided to opt out of this agreement and play the 2010 without a bargaining agreement in place. **This means the 2010 season will be played without a salary cap (or floor), and there is the looming possibility of no play at all in 2011 if an agreement cannot be reached** (USA Today, 2010).

**Abstract:** The current CBA expires on December 11, 2011: **2007-2011 BASIC AGREEMENT:** This Agreement, effective December 20, 2006, is between the 30 Major League Clubs and the Major League Baseball Players Association (hereinafter referred to as the "Players Association" or the "Association"). In making this Agreement the Association represents that it contracts for and on behalf of the Major League Baseball Players and individuals who may become Major League Baseball Players during the term of this Agreement, and the Clubs represent that they contract for and on behalf of themselves, any additional Clubs which may become. (MLB, 2006).

**Date:** July 29, 2005

**Source:** National Basketball Association Players Association (NBAPA)

**Title/Headline:** *NBA Collective Bargaining Agreement: Article XXXIX*

**CBA Expiration Date:** June 30, 2011

**Abstract:** The National Basketball Association and the National Basketball Players Association today announced that a new six-year collective bargaining agreement has been ratified and signed. As part of the agreement, the NBA also announced that the Salary Cap for the 2005-06 season is \$49.5 million. The mid-level exception for the upcoming season is \$5.0 million (NBA, 2005).

**Expiration Date:** This Agreement shall be effective from July 29, 2005 and, unless extended or terminated pursuant to the provisions of this Article XXXIX, shall continue in full force and effect through June 30, 2011. **Section 5. Termination by NBA/Force Majeure:**

(a) "Force Majeure Event" shall mean the occurrence of any of the following events or conditions, provided that such event or condition either (i) makes it impossible for the NBA to perform its obligations under this Agreement, or (ii) frustrates the underlying purpose of this Agreement, or (iii) makes it economically impracticable for the NBA to perform its obligations under this Agreement: wars or war-like action (whether actual or threatened and whether conventional or other, including, but not limited to, chemical or biological wars or war-like action); sabotage, terrorism or threats of sabotage or terrorism; explosions; epidemics; and any governmental order or action (civil or military); provided, however, that none of the foregoing enumerated events or conditions is within the reasonable control of the NBA or an NBA Team.

(b) In addition to any other rights a Team or the NBA may have by contract or by law, if a Force Majeure Event occurs and the NBA, as a result, ceases or suspends its operations for a definite or indefinite period and directs that no games (whether Exhibition, Regular Season, or Playoff games) be played by NBA Teams during such period (the "Force Majeure Period"), then, for each missed Exhibition, Regular Season, or Playoff game during the Force Majeure Period, the Compensation payable to each player who was on a Team roster at the time of the Force Majeure Event shall be reduced by 1/94.6th of the player's Compensation (NBAPA, 2010).

**Title/Headline:** *Players Union Chief '99 Percent Sure' A Lockout Looms*

**Abstract:** NBA players association executive director Billy Hunter said Monday he is "99 percent sure" there will be a lockout next summer. "I think it's highly probable that there will be a lockout and that's what I'm preparing for because I don't see anything else right now," Hunter said. With negotiations toward a new collective bargaining agreement to replace the one that expires next summer going nowhere, Hunter said he's been instructing his players to save their money. There was no breakthrough in the latest meeting with league representatives last week, and the sides hope to meet again next month. But Hunter said the owners aren't budging on their demands for cuts in salaries, contract lengths and guarantees, annual raises, and the rookie salary scale. "What's left?" Hunter said in a conference room at the union's headquarters after helping distribute turkeys to 2,000 families outside. The sides have been negotiating for more than a year, but Hunter agreed with Commissioner David Stern that there's been no progress. And the players are no closer to agreeing to the cuts that the league is seeking. "I don't really see that the argument's all that compelling for the changes that they're asking for," Hunter said. The league is calling for a reduction in player salary costs of \$700 to \$800 million and is seeking a hard salary cap to replace the system which now allows for certain exceptions. The players counter that the current system has worked, pointing to record revenues and ticket sales, and strong TV ratings. They say the total of negotiated salaries has dropped for three straight seasons and forecast a 3 to 5 percent increase in revenues in 2010-11. "It seems like things are doing all right and so our position is that we want to do what's best for the game," said Knicks guard Roger Mason Jr., a member of the players

executive committee. **"Any way that we can make the game better as players, speaking for a lot of the guys, we're all for it. But we don't want to have a deal that's just not fair and that's what we think is being presented to us right now."** Hunter said the league has given no feedback on the proposal the union submitted in July. He offered no specifics of it, other than to say the players could be open to negotiating their guarantee of 57 percent of the revenues -- which Stern has said is a central issue in the next CBA. **Hunter added that the players believe their proposal resonated with some owners, but blames others -- he called them a hawkish group -- for pushing Stern toward a deal Hunter says he won't get, one that would guarantee each owner a minimum annual profit of \$10 million.** And Hunter, who has been mostly silent while Stern and deputy commissioner Adam Silver revealed items from their wish list last month, decided it's time to speak out to them. **"I think the message has to be driven home to I guess that hawkish group of owners that if they're inclined, if they want to lock us out -- because we're not going to strike -- if they want to lock us out and they want to pull the roof down on themselves, then hey, have at it,"** Hunter said. Both Hunter and Stern have said progress must be made by February's All-Star break to reduce fears of the first work stoppage since 1998. **Hunter isn't sure it'll come by then, saying he's "waiting for some sign, some movement from the owners that they want to reach a reasonable deal. "Right now they're being unreasonable and I can't tell you when reason's going to set in,"** he said (CBS Sports, 2010).

**Conclusion:** The players of the four major leagues should vacate their respective treacherous organizations and form their own leagues with better pay and better healthcare. As for the commissioners of these leagues, they should be charged with conspiracy and tried in a court of law.

## The Nuclear Bible: Dictionary

**Black Operation/Black Op(s):** Is a covert operation typically involving activities that are highly clandestine and, often, outside of standard military protocol or even against the law. A key factor in making an operation "black" is that it is carried out with great secrecy; in many cases no records of the operation are kept. Similarly, a secret budget (such as for military or intelligence operations) is called a "black budget" (Wikipedia, 2010).

**Coup d'état:** Known as a coup, putsch, and overthrow—is the sudden, illegal deposition of a government, usually by a small group of the existing state establishment—typically the military—to replace the deposed government with another body; either civil or military. A *coup d'état* succeeds when the usurpers establish their legitimacy if the attacked government fails to thwart them, by allowing their (strategic, tactical, political) consolidation and then receiving the deposed government's surrender; or the acquiescence of the populace and the non-participant military forces. Typically, a *coup d'état* uses the extant government's power to assume political control of the country. In *Coup d'État: A Practical Handbook*, military historian Edward Luttwak says, "A *coup* consists of the infiltration of a small, but critical, segment of the state apparatus, which is then used to displace the government from its control of the remainder", thus, armed force (either military or paramilitary) is not a defining feature of a *coup d'état* (Wikipedia, 2010).

**False-Flag Terrorism:** False-Flag operations are covert operations designed to deceive the public in such a way that the operations appear as though they are being carried out by other entities. The name is derived from the military concept of flying false colors; that is, flying the flag of a country other than one's own. False flag operations are not limited to war and counter-insurgency operations, and can be used in peace-time (Wikipedia, 2010).

**Full Spectrum Dominance:** A military concept whereby a joint military structure achieves control over ALL elements of the battlespace using land, air, maritime and space based assets. Full spectrum dominance includes the physical battlespace; air, surface and sub-surface as well as the electromagnetic spectrum and information space (Wikipedia, 2010). Unseen TOTAL control over both sides of a perceived conflict (i.e. Al Qaeda and the Pentagon).

**Globalists:** (The New World Order/Nuclear World Order) European Royalty, The Vatican/The Church, The Illuminati, The Rothschilds, The Rockefellers, The Anglo-European/American Establishment, The Zionist Establishment, The Tri-Lateral Commission, Bilderberg, The Council On Foreign Relations, The Club of Rome, Goldman Sachs, J.P. Morgan, etc.

**Hegelian Dialectic:** (Problem, Reaction, Solution) Usually presented in a three-fold manner, was stated by Heinrich Moritz Chalybäus as comprising three dialectical stages of development: a thesis, giving rise to its reaction, an antithesis, which contradicts or negates the thesis, and the tension between the two being resolved by means of a synthesis (Wikipedia, 2010).

**Nucflash:** Refers to detonation or possible detonation of a nuclear weapon *which creates a risk of an outbreak of nuclear war*. Events which may be classified *Pinnacle - Nucflash* include:

- Accidental, unauthorized, or unexplained nuclear detonation or possible detonation.
- Accidental or unauthorized launch of a nuclear-armed or nuclear-capable missile in the direction of, or having the capability to reach, another nuclear-capable country.
- Unauthorized flight of, or deviation from an approved flight plan by, a nuclear armed or nuclear-capable aircraft with the capability to penetrate the airspace of another nuclear-capable country.
- Detection of unidentified objects by a missile warning system or interference (experienced by such a system or related communications) that appears threatening and could create a risk of nuclear war.

This term (*Pinnacle Nucflash*) is a report that has the highest precedence in the OPREP-3 reporting structure. All other reporting terms such as *Broken Arrow*, *Empty Quiver*, etc., while very important, are secondary to this report. (Reference Air Force Instruction 10-206, dated 4 October 2004) (Wikipedia, 2010).

**Nuclear Proliferation:** A term now used to describe the spread of nuclear weapons, fissile material, and weapons-applicable nuclear technology and information, to nations which are not recognized as "Nuclear Weapon States" by the *Treaty on the Nonproliferation of Nuclear Weapons*, also known as the Nuclear Nonproliferation Treaty or NPT. Proliferation has been opposed by many nations with and without nuclear weapons, the governments of which fear that more countries with nuclear weapons may increase the possibility of nuclear warfare (up to and including the so-called "countervalue" targeting of civilians with nuclear weapons), de-stabilize international or regional relations, or infringe upon the national sovereignty of states. Four nations besides the five recognized Nuclear Weapons States, none of which signed or ratified the NPT, have acquired, or are presumed to have acquired, nuclear weapons: India, Pakistan, North Korea, and Israel. One critique of the NPT is that it is discriminatory in recognizing as nuclear weapon states only those countries that tested nuclear weapons before 1968 and requiring all other states joining the treaty to forswear nuclear weapons (Wikipedia, 2010).

**Nuclear Terrorism (A):** Denotes the use, or threat of the use, of nuclear weapons or radiological weapons in acts of terrorism, including attacks against facilities where radioactive materials are present. In legal terms, nuclear terrorism is an offense committed if a person unlawfully and intentionally "uses in any way radioactive material ... with the intent to cause death or serious bodily injury; or with the intent to cause substantial damage to property or to the environment; or with the intent to compel a natural or legal person, an international

organization or a State to do or refrain from doing an act”, according to 2005 United Nations International Convention for the Suppression of Acts of Nuclear Terrorism. The notion of terrorist organizations using nuclear weapons (especially very small ones, such as suitcase nukes) has been a threat in American rhetoric and culture. It is considered plausible that terrorists could acquire a nuclear weapon (Wikipedia, 2010).

### **Nuclear Terrorism (B):**

- Steal, buy or otherwise acquire fissile material and fabricate a crude nuclear bomb
- Steal, buy or otherwise acquire a ready-made nuclear weapon; or take over a nuclear-armed submarine, plane or base.
- Attack a nuclear reactor or waste fuel cooling pond.
- Disrupt critical inputs for the safe running of a nuclear reactor e.g. water supply for cooling, electrical power supply systems.
- Attack or steal nuclear fuel or waste containers, most likely in transit.
- Make and detonate a radiological weapon, or ‘dirty bomb’, to spread radioactive material (Ruff, 2006).

**Example:** On August 29<sup>th</sup>, 2007, (6) U.S. nuclear tipped AGM-29 (150 kiloton) warheads went missing on a B-52 flight from North Dakota’s Minot Air Force Base to Barksdale Air Force Base in Louisiana. To date, it has been impossible to account for all six nuclear weapons, due to the suspicious deaths of all nine U.S. airmen who were involved in the unprecedented incident.

**Pro-Active Journalism:** The act of writing about an event prior to it actually taking place. The process embodies the calculation, correlation and analyzation of news, propaganda, information and social trends in an attempt to predict future events. Over time, the quantitative “connecting of the dots” begets a rather predictable reality with endless possibilities.

**State-Sponsored Terrorism:** A term used to describe terrorism sponsored by nation-states. As with terrorism, the precise definition, and the identification of particular examples, are subjects of heated political dispute. In general *state-sponsored terrorism* is associated with paramilitaries. It is also frequently used in conjunction with state terrorism, which is (an accusation of) terrorism committed by governments (Wikipedia, 2010). Please watch the best documentary available on State Sponsored Terror entitled “*Terrorstorm*” for free on Google video...

**Zionism:** The word “Zionism” has a lot of connotations to it that go beyond that simple definition. Those connotations mainly revolve around the Jewish religion and ethnic culture. The term “Zionist” has become almost synonymous with the word “Jew” in our culture, making it difficult to oppose political Zionism without being labeled an anti-Semite. This disconnect has added an emotional tag to the purely political movement that is Zionism. Whether that tag was inserted on purpose, conspiratorially, or as an uncontrolled social phenomenon is a matter of debate as well, but is not the point here. Regardless, Zionism is a political movement that happens to be centered around a specific culture. That does not make Zionism equal to that culture, however. No one would claim that all Republicans are fascists, for instance, just because a subset of them advocate fascist concepts—and be serious about the claim, anyway. There are two aspects to Zionism that are important to include in any conversation on the subject. The first, of course, is the political movement that started before the turn of the century and culminated in the creation of the State of Israel in Palestine. That political subject now (aka “Modern Zionism”) has evolved into a discussion of the policies of the State of Israel. The other aspect is the cultural phenomena that surround Zionism itself. Besides the political creation of Israel and the ethnic connections the word has, there are also the highly-charged emotional and almost fanatical religious beliefs that surround the idea of Zionism as well. All of these things come together to define Zionism as we see it today, much of it driven by several of the factors mentioned herein. On the flip side of that coin, many people who are anti-Zionists are also fanatically obsessed with anti-Semitic thought. These people feed directly into the notion that Zionism is equal to Judaism. In the United States, Zionism takes on a whole new set of baggage. Christian fundamentalists in America have a large group following that believes that Zionism (the creation of a Jewish State or Israel) is not only prophesied in the Bible, but that it must happen in order for Armageddon and the rapture to come to pass. This has led to a large corps of unexpected support for the Zionist cause. On another front, the Israeli lobby (aka AIPAC) is extremely strong and well-funded in the U.S. The United States government gives unprecedented and, to most people, unquestioning support to the State of Israel. This support is a bone of contention in all U.S. foreign policy, but is never changed. Currently, the U.S. government gives about 1/3 of its total foreign aid to Israel. Through direct cash handouts to military supplies and information to loans that are later written off as grants, the United States gives more to Israel than we do to the entire continent of Africa, the whole of South America, and more. Finally, the world seems to almost entirely oppose the State of Israel and its actions on both military and political foreign relations fronts. Israel is accused of war crimes, genocide, theft and bribery, ignorance of diplomacy, breaking treaties, and more. Without wavering, the United States backs up Israel in every argument. Even to the point of using our special veto power in the United Nations to shut down anti-Israeli measures. Almost all politicians of any size in the U.S. receive funding, donations, and support from AIPAC. None dare oppose them for fear of political ruination and being labeled “anti-semitic.” All of this adds up to an unprecedented amount of control over politics, political discussion, cultural aspects (as related to Zion), and more in the name of Zionism (Truth-It, 2010).

## The Nuclear Bible: The Unusual Suspects

**Intro:** Based on the information available, if there is a false-flag nuclear attack at the Super Bowl, World Cup or Olympics, rest assured that Jews and Israelis are to blame. While the Holocaust (meaning burnt offering) was succesful in deflecting critiscim and prosecution of Jews in the past, it is no longer the case. The evidence that these individuals are conspiraing against the good people of the world is now crystal clear, and it is high time that Americans take over the leadership of their own contry. While I am sure to be labled, libeled, and potentially attacked for this book and especially this chapter, it is neccesarry that this Jewish Mafia be brought to Justice. I am not anti-semtic, but rather 25% Jewish by blood. Just as I condemn the acts of Germany in World War II, depseite the fact that I am 50% German, I will also codem the acts of genocide, rape, and murder committed by the Jewish people and the State of Israel. Jews don't run the world, they own it, outright. The Jews have been so succesful in their grand conspiracy due to the Christain religion, which it's main tennat being that "The Jews are God's chosen people". If that is truly the case, then the god the are refering to is a false god hell bent on causing destruction, death and mayham world-wide.

**Title/Headline:** *USS Liberty Incident*

**Abstract:** The *USS Liberty* incident was an attack on a United States Navy technical research ship, *USS Liberty*, by Israeli Air Force jet fighter aircraft and motor torpedo boats, on June 8, 1967, during the Six-Day War. The combined air and sea attack killed 34 crew members (naval officers, seamen, two Marines, and one civilian), wounded 170 crew members, and severely damaged the ship. At the time, the ship was in international waters north of the Sinai Peninsula, about 25.5 nmi (29.3 mi; 47.2 km) northwest from the Egyptian city of Arish. Both the Israeli and U.S. governments conducted inquiries and issued reports that concluded the attack was a mistake due to Israeli confusion about the identity of the *USS Liberty*. **Some survivors, in addition to some U.S. diplomats and intelligence officials involved in the incident continue to dispute these official findings, saying the Israeli attack on the *USS Liberty* was not a mistake, and it remains "the only maritime incident in U.S. history where [U.S.] military forces were killed that was never investigated by the [U.S.] Congress."** In May 1968, the Israeli government paid US\$3,323,500 as full payment to the families of the 34 men killed in the attack. In March 1969, Israel paid a further \$3,566,457 in compensation to the men who had been wounded. **On 18 December 1980, it agreed to pay \$6 million as settlement for the U.S. claim of \$7,644,146 for material damage to the *Liberty* itself. On December 17, 1987, the issue was officially closed by the two governments through an exchange of diplomatic notes** (Wikipedia, 2010).

**Title/Headline:** *USS Liberty Attack Tapes Released*

**Abstract:** Tapes released by the National Security Agency shed new light on the 1967 Israeli attack on the *USS Liberty* that killed 34 Americans and is one of the most controversial mysteries in U.S. Navy history. The attack, which took place in international waters off the Sinai Peninsula on June 8, 1967, during the Six Day War, also left 171 Americans injured. The Israelis have always

said the attack on the Liberty, which was monitoring communications in the war, was a tragic accident. **But some survivors and senior U.S. officials at the time have said they believe the attack was a deliberate effort to stop American surveillance of Israeli activities during the conflict.** The NSA on Tuesday released audiotapes of Israeli pilots and ground control speaking in Hebrew, along with English transcripts. The recordings were made by a nearby American surveillance aircraft in the immediate aftermath of the attack. "For your info, it is apparently an Arab ship," says ground control. "Roger," says the pilot. "It is an Egyptian supply ship," says ground control. "Roger," comes the response. The NSA released the tapes and transcripts under the Freedom of Information Act in response to a request from Miami Judge Jay Cristol. An author of a book on the attack, Cristol said the tapes show it was a tragic accident in a time of war -- that the Israelis mistook the ship for an Egyptian one. "I don't think there's any question that anyone who reads these tapes would be absolutely convinced there was the fog of war out there," Cristol said. Later on the tape, the Israelis sound confused and concerned. Ground control orders the helicopter pilots to look for survivors and to check their nationality. "If they speak Arabic -- Egyptians -- you're taking them to Al-Arish. If they speak English -- non-Egyptians -- you're taking them to Lod. Is that clear?" says ground control. "Roger," says the pilot. **James Bamford, the author of a history of the NSA, believes the tapes suggest the Israelis may have deliberately attacked the U.S. spy ship, perhaps fearing -- for some reason not known -- that it was spying on them.** "Here the transcripts are saying, 'Well, you know, there may be people speaking English on this ship,'" Bamford said. "Why would you say that if it's an Egyptian ship, carrying horses?" On the tape, after the rescue helicopter pilot tells ground control he sees an American flag on the ship, he receives an order in return. "They request that you make another pass and check once again whether it is really an American flag," ground control says. The order suggests the Israelis were surprised at word of a U.S. flag, but it also runs counter to what Israeli fighter pilots and torpedo boat crews have always insisted: **That they could not see an American flag.** "Clearly the flag was there," Bamford said, "because the intercepts show that the helicopter pilots saw it immediately, before they ever even got up to the ship." The ship's flag now hangs in the National Cryptologic Museum in Fort Meade, Maryland, adjacent to NSA headquarters. "I think this is probably the most important link in the evidence that ought to bring closure to this matter," Cristol said. Surviving members of the Liberty crew argue that -- far from putting the matter to rest -- the tapes only underline the continuing need for a full, public U.S. investigation. "A simple investigation -- that's all they have to do," said Joe Meadors, a Liberty survivor. "Find out what happened. If anybody did anything wrong, punish them." In a letter to Cristol, the NSA said that contrary to rumors there was no U.S. submarine in the area watching, and the Liberty itself made no relevant recordings. Israeli Embassy spokesman Mark Regev said the tapes are "further evidence that the Liberty incident was a terrible and tragic case of mistaken identity" (CNN, 2003).

**Title/Headline:** *The Power Of Israel In The United States*

**Abstract:** James Petras is Professor Emeritus of Sociology at Binghamton University, New York. He's a noted academic figure on the US Left and a well-respected Latin American expert and longtime chronicler of the region's popular struggles. He's also an advisor to the landless workers in Brazil and the unemployed workers movement in Argentina. **Along the way, he managed to find time to write many hundreds of articles and 62 books published in 29 languages including his latest one in which he discusses another vital world region he has extensive knowledge of and has written frequently about - the Middle East and specifically the state of Israel and its relations with its neighbors, the Palestinians and, most importantly and the subject of this book, the US.** Petras' powerful new book is titled *The Power of Israel in the United States*. It's a work of epic writing and essential reading documenting the enormous influence of the Jewish Lobby on US policy in the Middle East. **It focuses like a laser to assure that policy conforms with Israel's long-term goal for regional hegemony. The Lobby's influence is broad and deep enough to include officials at the highest levels of government, the business community, academia, the clergy (especially the dominant Christian fundamentalists/Christian Zionists) and the mass media.** Petras shows how together they're able to assure the full and unconditional US support for all elements of Israel's agenda going back decades even when that agenda harms our interests such as the unwinnable war in Iraq, any future one against Iran if it's undertaken, and the appalling and brutal subjugation and colonization of the Palestinian people that serves no US interest whatever. In spite of it, the Lobby is able to get the US to go along with Israel unconditionally with no serious opposition to it tolerated. The book is divided into four parts. This review will cover each one in detail, and what's discussed will likely surprise any reader unfamiliar with the thoroughly documented account presented in it so compellingly. Petras sets the table in his introduction for what's to come in the later chapters. He notes what author JJ Goldberg reported in his book *Jewish Power: Inside the Jewish Establishment*. **Goldberg wrote in the early 1990s that 45% of the Democrat Party's fundraising and 25% of that for the Republicans came from Jewish-funded Political Action Committees (PACs).** Petras then updates the numbers using the ones Richard Cohen published in the *Washington Post* showing them now at 60% and 35% respectively, and that this funding relates to a single core issue - unconditional US support for Israel's agenda including those parts of it human rights activists and observers of conscience judge most egregious and illegal. Petras stresses that no other single US lobby including Big Pharma, Big Oil, agribusiness, or any other one has this kind of dominant influence over the political process here. **He refers to "Zioncon" ideologues and policymakers whose main goal is to make the Middle East into a "US-Israeli Co-Prosperity Sphere" under the fraudulent cover of promoting democracy in the region - but doing it through the barrel of a gun.** Petras explains the root of the Lobby's power lies in the high proportion of Jewish families who are among the wealthiest and most influential ones in the country. **He cites Forbes magazine that reported 25 - 30% of the wealthiest families here are Jewish despite the small percentage of Jews in the population overall. They include billionaires with enormous influence, and along with all others comprising the Jewish Lobby, have created a "tyranny of Israel over the US" with consequences grave enough to threaten world peace and stability, the global economy, and the very future of democracy in this country. That democracy and our**

constitutionally protected rights now hang by a thread after the recent passage of the Military Commissions Act (aka the "torture authorization act" or more accurately the "US Constitutional annulment act") that makes everyone everywhere an "enemy combatant" subject to arrest and detention out of sight anywhere in the world without regard for our (no longer) constitutionally guaranteed rights. The new law also applies to US citizens as the Jose Padilla case showed. We've effectively lost our habeas and due process rights even though technically we still have them. Because of the Lobby's power, Petras reports, the US has unconditionally supported Israel's wars of aggression since 1967. Its influence also led to the US Gulf war in 1991 and the second Iraq war begun in 2003, now raging out of control and seen by some noted analysts as unwinnable and causing potential irreparable economic and political harm to the nation. Nonetheless, it persists with no plan agreed on to end it. The Lobby also guaranteed this country's unconditional support for Israel's illegal wars of aggression against Lebanon and Palestine with all the devastation they caused and the horrendous consequences from them unresolved. **The Palestinian conflict still rages under the radar and the status in Lebanon hangs by a hair trigger ready to erupt again anytime Israel decides to resume hostilities. But inflaming the Middle East powder keg to a near boiling point is the strong possibility the US and/or Israel will attack Iran because Israel wants it and the Jewish Lobby put its powerful support behind it.** More on this, Palestine and Lebanon below. Today the situation in the Middle East is so dire, Petras reports a large majority of Europeans and a growing number of Americans believe Israel is the greatest of all threats to world peace and stability. Nonetheless, the Bush administration, in acquiescence to the Lobby, has "bludgeoned" its European partners to go along with its uncompromising support for the Jewish state despite all the obvious perils from it. In this country, open debate is stifled, public figures and academics daring to air one truthfully are pilloried, ridiculed, called anti-Semitic and even threatened, and no serious dissent is ever tolerated in the corporate-run media or their funded and controlled so-called public radio or PBS parts of it. No publication is more servile to, supportive of, or more influential than the nation's so-called "paper of record" publishing "All the News That's Fit to Print" - the New York Times. It's important because the stories it features prominently resonate around the country and the world. **This dominant newspaper pledges unconditional support and fealty to the state of Israel whatever it does. The rest of the major media go along unquestioningly putting out regular one-sided pro-Israel uber alles propaganda with no opposition voices allowed to represent other points of view. We call that a free press - but only for those who own one. The state of the corporate-controlled media in this country is now so pathetic that Reporters Sans Frontieres (Reporters without Borders - for press freedom) just ranked the US 53rd in the world in press freedom behind countries like Benin, Namibia, Jamaica, France and Bolivia.** James Petras is a courageous independent voice who bucks this disturbing trend and refuses to go along. He proves it in his powerful and carefully documented new book that gives no quarter countering the mendacity, deceit and danger of the Lobby, its acolytes and hangers-on, and the corrupted major media. **In his introduction, he calls for a "counter-hegemonic movement" to free us from our destructive "Israeli entanglements."** It's needed to begin rebuilding our democracy and freedoms that are somewhere between life support and the crematorium. This book, he says, is his modest effort toward that goal. Because of the important information in it, it's considerably more than that. It needs widespread exposure so people will know about it. Hopefully this review will help arouse some of them to want to find out in more detail.

**Part I - Zionist Power In America:** Petras begins with a discussion of who fabricated the lies about Iraq's threat to our security and why. He mentions two competing channels of policy makers and advisors - the long-in-place formal structure of career military and civilian professionals in the Pentagon and State Department and a parallel one Bush administration neocons set up for this one purpose in the Pentagon, staffed by political appointees, and called the Office of Special Plans (OSP). It was the OSP's job to cook the books, come up with the idea of weapons of mass destruction while ignoring the clear evidence to the contrary and contrive a fraudulent case for war against Iraq. The people in it were those in Donald Rumsfeld's and Paul Wolfowitz's chain of command and were closely connected to a number of influential neoconservative and pro-Israel organizations. **They planned a war agenda based on lies because Israel wanted it for its security and hegemony in the region - beginning with the overthrow of Saddam Hussein followed by regime change in Syria, Lebanon, Iran and even Saudi Arabia. Petras points out, contrary to popular belief, this war happened largely due to the efforts of the Jewish Lobby representing the interests of Israel.** Big Oil opposed the idea because it feared attacking Iraq would jeopardize its business prospects with other oil-producing states in the region. **Still, Israel and the Jewish Lobby got their war, and aside from the gain from high oil prices, Big Oil may end up a longer-term loser from it. US oil interests always prefer stability and normal relationships with countries where they operate or wish to and were quite comfortable dealing with Saddam Hussein without wanting to risk a war that might upset an otherwise profitable arrangement.** Their fears proved justified as the war they feared created such unresolved turbulence in Iraq, it's become too dangerous and unprofitable to undertake new ventures there except perhaps in parts of the Kurdish-controlled north. Big Oil also chafes at not being allowed to deal with the Iranians for contracts now let to its European and other competitors because US sanctions prevent them from doing business there. It's hard to imagine those interests would ever go along with US - Israeli belligerence in the Middle East, but they dare not oppose it publicly. Petras observes there's never a public discussion allowed about that relationship in the mainstream nor will there ever be any, especially any hint the US attacked Iraq in service to Israel. **There should be plenty of it though because the Iraq and Afghanistan wars have enraged hundreds of millions of Muslims and all people of conscience worldwide.** They've caused the US to be seen as a pariah state and George Bush as a dangerous and morally depraved president of a failed administration. **He and those closest to him like Richard Cheney and Donald Rumsfeld are reviled around the world and increasingly here at home as witnessed by the many thousands who took to the streets on October 5 in over 200 US cities on The World Can't Wait Day - Drive Out the Bush Regime.** The cost of Bush's wars far exceed any possible future benefits from them, our security has been jeopardized, the nation's status has been compromised, and some analysts believe the total dollar cost of the Iraq adventure may eventually top \$2 trillion - an amount extremely harmful to the nation's economy that's now worrying key business leaders and responsible people in government. The only clear beneficiary of the Bush war agenda is Israel. It removed its main adversary in the region and cut off the political and economic support it gave the Palestinians. **Petras points out that Iraq along with Iran and Syria comprised the core resistance to Israel's expansionist plans to crush the Palestinians (one down, two to go), ethnically cleanse them from their homeland and seize their land as one part of a long-term goal for a greater Israel and unchallengeable dominance in the region. Israel is the only country in the world with undeclared borders. It's kept that status to give itself maximum latitude to annex all the territory it can toward the goal of a greater "Eretz Israel" Zionists want that includes the ancient lands of "Judea" and "Summaria," the West Bank biblical parts of Israel Palestinians claim as their homeland. With US help,**

Israel removed one threat to its plan for regional supremacy, but it still faces determined resistance from the Palestinians in spite of having crushed its democratically elected Hamas government. It also faces a resilient Hezbollah in Lebanon that humiliated the Israeli Defense Forces (IDF) in the summer war there as well as opposition from Iran and Syria. In addition, there's internal opposition within Israel over its war and colonization agenda because of its enormous cost plus the added insecurity it causes. **It's resulted in a level of out-migration now exceeding new arrivals as well as an erosion of the nation's social programs because the state needs the resources for its aggression and annexation agenda. It's much like what's happening under the Bush administration where the people pay the price for imperial wars abroad and the moral decay and authoritarianism at home.** Obstacles and setbacks aside, Israel has pursued its goal to "democratize" the region through a belligerent policy of neutralizing its enemies in it by force. **The plan they crafted is for a series of wars with its US ally taking the lead and the eventual goal of joint US - Israeli control over the entire region. Making it work depends on getting US administrations to go along, which so far hasn't been a problem and has never been easier with the Bush administration in power and the high-level pro-Zionist officials in it with long-standing ties to Israel.** They have the most important policy-making positions in government or are closely associated with the ones who do. These officials have a history of dedication to Israel's interests even when they conflict with those here at home. **They're in the administration, the Congress as well as in the most influential Jewish organizations and lobbying groups like the Conference of Presidents of Major Jewish Organizations, the Anti-Defamation League and what some observers believe is the single most powerful lobby in Washington - AIPAC.** Committed support for Israel also comes from the "Jewish Diaspora" that comprises thousands of dedicated activists here - doctors, dentists, philanthropists, key individuals on Wall Street, the major banks and the Federal Reserve and other key segments of business, the major media, the clergy and academics and journalists given special prominence because of their willingness to corrupt their integrity in return for the handsome benefits they get for their unconditional public support and contrived rationalizations for the US -Israeli agenda. **This kind of influence and support has made Israel by far the largest recipient in the world of US financial aid that amounts upfront to about \$3 billion a year with more forthcoming any time as needed in added funding, weapons transfers and large low or no-interest loans that may never have to be repaid.** Israel also gets the unheard of advantage of receiving the latest and most advanced US arms and technology, unrestricted US market access for its products and services, free entry of its immigrants, unconditional support for its aggressive wars and colonization of the Palestinians and South Lebanese, and guaranteed US vetoes in the Security Council against all UN resolutions unfavorable to its interests. It's also able to get prominent Washington officials and the dominant corporate-run and funded media to label all criticism of Israel anti-Semitic and freely uses this ruse whenever it serves its purpose. **Israel is allowed to get away with its intelligence operations here as well including its covert penetration of military bases, the FBI, IRS, INS, EPA and many other government agencies. In addition, it's believed its agents knew in advance about the 9/11 attack but withheld the information knowing it would serve its interests to let it happen.** There's also considerable evidence high US officials either knew about it themselves or were complicit in carrying it out because they also knew it would allow them the kind of reckless free reign at home and abroad they never could have gotten any other way. This is a story that won't go away nor should it, and one day we may finally learn all the parts of it we can only speculate about now. Because of Israel's unparalleled ties to the centers of power and dominant media, **Petras notes it's able get back \$50 in return for every dollar it spends. That's how it's able to finance its military and colonial settlements in the Occupied Palestinian Territories (OPT) on annexed land. The Jewish networks here support these practices as justifiable compensation allowed victims of the "Holocaust" (the ones noted author John Pilger calls "worthy victims") and circulate that ideology in the corporate media. They also reinforce anti-Muslim hysteria labeling all Arabs untrustworthy, radical Islamic fundamentalists or Islamo-fascists ("unworthy" victims for John Pilger), claiming the right to arrest, torture and mete out summary justice to them in military tribunals or just attack and kill them in imperial wars of "liberation."** The result for Israel and its people has been disastrous because the Palestinians have refused for almost six decades to accede to this abuse and have waged two Intifadas to end it. **With little more than a fierce determination, their bodies and crude weapons, they've fought back with suicide bombings and attacks on public facilities in Israel knowing what harsh retaliation they'll face afterward. People in the US have also paid a heavy price in the erosion of democracy and freedom. It's evidenced by the Bush administration's harsh legislation beginning with the infamous USA Patriot Act passed in short order right after the 9/11 attack, followed by other repressive laws and practices allowed like illegal surveillance and secret renditions of anyone targeted to torture-prisons with court acquiescence or silence about most of them.** Petras points out that none of this deters powerful supporters of Israel who raise billions of dollars to support the country's war machine and finance its colonization of annexed Palestinian land plus the Golan Heights (with its invaluable water resources) seized and never returned to Syria after the 1967 war. **Israel's economy is not self-sufficient, and without this aid, it would have to make unacceptable cuts in social services, reduce its military budget and curtail its expansionary plans. With it, plus the \$3 billion a year direct US contribution and lots more help, US taxpayers (like it or not) have the burden of funding Israel's belligerence and colonization agenda.**

#### **Israeli Costs To America:**

- 1) \$3 billion annually in direct aid
- 2) Billions more in loans as needed.
- 3) Millions annually for resettlement help for Soviet (now Russian) and Ethiopian immigrants

**A \$10 billion loan guarantee in 1990 and a further \$9 billion one in 2004 plus billions more for the asking and to be forthcoming to pay the costs of the 2006 Lebanon and Palestine wars. Since 1981, economic aid made in cash transfers, and since 1985 military aid done the same way. \$45 billion in repayment waved loans since 1974 and billions more for the asking - free money at US taxpayer expense. Since 1982, ESF cash transfers in one early in the fiscal year lump sum with no strings attached while other countries receiving them are paid quarterly with their use monitored. Israel invests the money in US treasuries costing US taxpayers millions more annually and also gets special FMS funding arrangements costing US taxpayers well over \$1 billion since 1991. Other privileged benefits include financial aid to develop Israel's defense industry, transfer of state-of-the-art technology and the latest US weapons, US guarantee for Israel's access to oil, and the likely massive aid still to come to defray the country's "special costs" for its Gaza**

**"disengagement plan" morphing into the colonization of whatever parts of the OPT Israel wishes to annex for new settlements US taxpayers pay for. Add to this some \$22 billion Israel got over the past 50 years through the sale of its below-market interest paying bonds that have financed half of its development - meaning the colonization of annexed Palestinian lands and military funding for its predatory imperial wars.** Petras explains the Zionist power structure in the US makes it all possible, but its reach extends well beyond the so-called "Jewish Lobby." **He identifies a "Zionist power configuration (ZPC) that includes AIPAC as one part of a "complex network of interrelated formal and informal groupings, operating at the international, national, regional, and local levels" unconditionally supporting the state of Israel and all its policies including its wars, colonization and oppression. Its power is like a cancer infecting the highest levels of government and all the other centers of power and influence as already explained. It controls the selection of political candidates and can defeat incumbents or aspirants daring to criticize Israel. It also shapes the reporting on Israel in the mass media suppressing any of it that's unsupportive or critical. And it's powerful enough to get "uncooperative" journalists, and even some academics, fired and banished from the mainstream for daring to step out of line.** Petras reports the power of the ZPC was evident in the run-up to the Iraq war and the Gulf war before it in 1991. **Going back to the GHW Bush administration, the US wanted regime change in Iraq, but that decision was heavily influenced by the ZPC that considered Saddam a mortal enemy of Israel who had to be removed. He managed to survive through the 1990s despite our efforts to destabilize the country and bring it to its knees.** But once the GW Bush administration neocons took over in 2001, the ugly business of war planning and occupation took hold to complete what the Gulf war left unfinished, and powerful Zionists (like Paul Wolfowitz and Connecticut Senator Joe Lieberman - the senator from AIPAC) in key policy-making positions invented the threat to bring it about in March, 2003 - all based on lies, deceit and subservience to Israel's imperial agenda. The US military finally removed Saddam and conducted a scorched-earth campaign to destroy Iraqi society, its infrastructure and historical treasures to "dismantle the secular state (and) turn the country in a desert kingdom - a loose collection of at least three 'tribal' client mini-states based on ethnicities, religious-tribal loyalties (and no viable threat against) Israeli expansionism, particularly in Northern Iraq." **The effort to do this is now underway after the Iraq puppet parliament's passage of its federalism bill to take effect in 18 months that will effectively divide the country into the three US-ordered, designed and supposedly more easily governed parts it wants. It's unlikely this can work, but it's clearer than ever now what the human cost of the war has been for Iraqis. It caused the violent deaths of about 655,000 of them attributable to the war according to a shocking new study published by the noted Lancet British medical journal which updated their two earlier ones done after March, 2003.** The study used the statistically reliable technique known as random households "cluster sampling" with personal interviews conducted across the country that used death certificate verification in the great majority of cases to come up with the total. **It's likely the true number of deaths is even much higher than this appalling number as the interviewers were unable to include in their count the most dangerous and violent parts of the country like Fallujah, Ramadi and other areas of al Anbar province where mass killing still goes on daily as well as families (likely in the thousands) in which all the members were killed.** This new information, just out and covering a period since March, 2003, compares to Human Rights Watch's estimate of 250,000 - 290,000 people killed by Saddam Hussein's Baathist regime over its 20 year existence. It amplifies the outrageous crime of this barbarous adventure to achieve a "Greater Middle East US-Israel Co-Prosperity Sphere" and to give Israel access to the extra water, oil, capital and markets it lacks. It was also part of Israel's greater agenda under the Sharon Likud, and now Olmert Kadima, governments to have free reign to pursue their stated policy of "annexation and separation" in the OPT. **The Zionist influence in the Bush administration is so entrenched, it assured there'd be no opposition to it then or now. It's all gone on in spite of mass anti-imperial resistance to what's seen as an arrogant disregard for the standards and norms of international behavior and laws in the pursuit of an expansionist agenda.** Israel and the US today willfully violate the UN Charter, the Hague Regulations and Geneva Conventions relative to the conduct of war and when it may be legally waged, the treatment of prisoners, the use of torture, destruction of infrastructure and historical sites, and plunder of natural resources to establish client puppet-run regimes exploiting their people in service to the dominant capital and political interests of their imperial conquerors. **Then to quell resistance and tighten security, the US and Israel resort to the most extreme methods including mass arrests and detentions and the free use of torture and targeted assassinations as state policy.** Amnesty International reports since the passage of the Military Commissions Act of 2006, the US and Israel are the only two countries in the world to have legalized the use of torture. Petras and others report the top leaders in the Pentagon up to Donald Rumsfeld specifically ordered its use **"while the Justice and Defense Departments insisted that the President could override any laws - international or national as well as the US Constitution - in defending the empire."** These top officials in key areas of government have audaciously given the President "de facto and de jure dictatorial powers" to do whatever he chooses to establish "Imperial Security." **It makes our citizens at home no safer than the victims of US and Israeli imperial aggression in Iraq, Lebanon, Palestine or anywhere else in the world. But Petras reports it's even worse than that as the expose of torture in Iraq revealed a highly organized network of US and Israeli assassins worldwide.** They operate as international death squads engaged in "killing, kidnapping and torturing 'suspects' and sympathizers of resistance movements." Petras calls this a US-sponsored "Murder Incorporated" that's composed of Army Special Forces, Navy Seals and a DELTA force operating in a Special Agency Program (SAP). **It follows the same practices long engaged in by Israel's Institute for Intelligence and Special Operations known as the Mossad, and its aim is to remove all opposition by whatever extralegal methods it chooses while ignoring international law. It then justifies this activity at the highest levels of government as a matter of policy.** Petras further points to the UN's International Leadership report on the destruction of civilian and military infrastructure in Iraq (much like what Israel did in the OPT discussed below). **It showed "84% of Iraq's higher learning institutions have been burnt, looted or destroyed."** Archeological museums and historic sites, libraries and archives have also been plundered, and targeted assassinations have been carried out against academics, other teachers, senior military personnel, journalists and other professionals including doctors. **In addition, there are random or targeted daily terror killings by US-directed "Salvador option" death squads as well as thousands of kidnappings and other systematic horrors making life intolerable for most everyone in the country outside the four square kilometer fortress-like Green Zone HQ in central Baghdad for "coalition" officials and the puppet "Iraq interim government."** It's all part of Washington's design to destroy the country's cultural identity as an Arab state, separate its oil resources from any large population base, and divide the nation into more easily governed parts just the way it was done in the breakup of Yugoslavia in the 1990s. It's now been reported that longtime Bush family consigliere James Baker, co-chairing an Iraq Study Group, will formerly propose the kind of plan the Iraq puppet government just passed putting a quasi-official US imprimatur on it as part of a **US - Israeli divide and conquer strategy that may not be as easy to pull off as the one in the former Yugoslavia or in the simple north - south divisions of Korea and**

Vietnam after WW II. What's happening today in Iraq and Palestine is so outrageous and chaotic, Petras refers to a "House of Horrors" in both countries with the Zionist militarists at the Pentagon and their Israeli counterparts in charge of their respective "Horror Shows....under the big tent of a 'Mid-East Democratic Reform Initiative.'" This is the modus operandi of empire building and colonization - blast and tear a nation to shreds so it can never again exist as it once did. Then terrorize the people into submission and kill off all the ones who resist. It's a barbaric thumb in the eye to humanity, but this is the way rogue empires do things, especially when they're too powerful to challenge. The US-led killing machine is in full operation in Iraq, and so is the Israeli one in the OPT. Petras calls the one there "Israel's Final Solution" or the "Palestinian Holocaust," and it's focal point is in Gaza which even unoccupied is the world's largest open-air prison for its 1.45 million people in the most densely populated space of its size in the world. Today the Strip and the West Bank are Israeli-directed killing fields targeting Palestinian civilians helpless to stop it beyond their courageous acts of desperation with crude weapons and their bodies against tanks, F-16s, helicopter gunships, and illegal and immoral terror weapons like white phosphorus bombs and shells, cluster bombs that never stop killing and maiming, and experimental new weapons that don't have publicly-known names yet. Israel's war on Palestine has gone on for nearly six decades, and September 28 marked the sixth anniversary of the al-Aqsa Mosque Intifada resistance against it that began with Ariel Sharon's provocative visit to the holy site in 2000. **Israel dramatically escalated the conflict after the minor June 25, 2006 incident at an Israeli military post near Kerem Shalom crossing killing two IDF soldiers, injuring several others and capturing a third still held whose name the corporate media made sure everyone knows but won't ever reveal any of over-10,000 names of Palestinian prisoners held (the fate of "unworthy victims").** The June clash followed a series of bloody earlier in the month Israeli attacks on Gaza including the widely reported beach shelling that killed eight Palestinians and injured 32 others including 13 children. Much as it did in Lebanon (discussed below), Israel's response was swift, deadly, disproportionate to what happened and planned months in advance as revealed by General Yoav Galant, in charge of Gaza, in a candid interview he gave in Israel's Maariv daily.

**The Palestinian Centre for Human Rights (PCHR) documented it all including the devastation of the past six years. Overall it created a state of mass-immiseration for the Palestinian people in Gaza and the West Bank:**

- 1) Essential infrastructure affecting power, clean water and sanitation destroyed
- 2) Mobility restricted or denied
- 3) Imposition of an embargo threatening the collapse of an already weak economy creating unemployment up to 80% of the population
- 4) Hostile incursions into the OPT, daily killings, and frequent extra-judicial assassinations
- 5) Home and property demolitions
- 6) Mass arbitrary arrests, administrative detentions of thousands of Palestinians without charge, and the systematic use of torture on those held including against women and children

The destruction of a viable Hamas-led Palestinian Authority (PA) through imprisonments of its democratically elected members held without charge or on contrived ones against them as well as the destruction of its civil and security facilities. **All this and much more has been done (as in Iraq) to destroy the cultural identity and very existence of the Palestinian people to prevent them from ever having a viable independent state of their own as well as force a mass-Palestinian exodus to other Arab states willing to help them escape their intolerable situation in the OPT.** The plan to crush these defenseless people now includes credible evidence that the Bush and Olmert administrations have been arming, training and plotting with Palestinian President Mahmoud Abbas and his Fatah followers to lead a civil uprising against the Hamas-led Palestinian Authority (PA) and destroy it by force. It follows the Palestinians failed efforts to form a national unity government because Hamas refused Fatah's demand to govern as Israel's enforcer and abandon its own pledge to serve the welfare of its people. **Now in an interview on October 8 in the London Sunday Times, Fatah militia leader Tawfig Tirawi, inflamed matters by accusing Hamas of "accumulating weapons" and that "a full-scale civil war can break out at any moment." He earlier said "civil war is inevitable."** The paper also reported President Abbas "notified the US, Jordan and Egypt that he is preparing to take action against Hamas." These statements defy Hamas Prime Minister Ismail Haniyeh who firmly said he'll never allow a civil war to happen, and it's unimaginable the Palestinian people want one. **But Haniyeh and his people may have no choice as this seems to be the current joint US-Israeli strategy to destroy Palestinian resistance and do it with help from Fatah President Abbas.** This is the same man who pledged his fealty to Israel as a participant in crafting the Oslo Accords sellout of his people and being a principle in the Arafat-led corrupted and mismanaged Palestinian Authority until Hamas won a majority of the seats in the January, 2006 Palestinian Legislative Council (PLC) elections. **The Bush and Olmert governments wouldn't tolerate that outcome, and the New York Times reported right after the election US and Israeli officials met at the "highest level" to plan the destruction of Hamas by "starving" the PA and making the people in the OPT pay the greatest price.** For Israel, this is part of its state policy of ethnic cleansing by slow-motion genocide and out-migration all leading to the destruction of the Palestinian identity. It wants to co-opt a corrupted PA leadership of its choice to act as Israel's enforcer and partner in the destruction of its own people. **It's to fulfill the intent of what former Israeli Prime Minister Golda Meier meant by her racist comment that "There are no Palestinians" and what Prime Minister David Ben Gurion earlier said after Israel brutally expelled the Palestinians from their homes and land in the 1948 war establishing the state of Israel: "We have come and we have stolen their country....We must do everything to insure they (the Palestinians) never do return....(and 10 years earlier had written his son) We will expel the Arabs and take their places....with the force at our disposal."** He and his successors planned to include all the land of biblical Eretz Israel (the land of Israel) within the final fixed borders of a greater Israeli state whenever they're finally declared. The US unconditionally supports Israel's plan to do this as well as its policies of plunder and exploitation, but as Petras explains: **"No one in their right mind can claim that the Israeli assault on Gaza advances US policies, interests or US imperial power."** It doesn't matter because the power of the Jewish Lobby got the full support of the Bush administration for it anyway as well as the near unanimity for it in the Congress.

**The Rape Of Lebanon:** What Israel did to the Palestinians in the OPT over decades, it did to Lebanon in 1978, 1982 and in about a five week blitzkrieg beginning July 12, ending formally but fragily with a UN-brokered ceasefire on August 14. Petras compares the assault to the Nazi's November 9 and 10, 1938 infamous Kristallnacht pogrom in the German Reich against the Jews calling that event a "garden party" compared to the rape of Lebanon and vast devastation from it. **It began with Hezbollah's cross-border incursion on July 12, killing eight IDF soldiers in the exchange that followed and capturing two others. There's still a dispute over which side of the Lebanese border the incident took place as for years Israel routinely makes hostile incursions into Lebanon by land and air, and still illegally occupies the 25 square kilometer Shebaa Farms area of South Lebanon it never relinquished after seizing it in the 1967 war.** As against Gaza, Israel again responded swiftly and disproportionately in a reign of terror against the Lebanese people by land, air and sea. It killed and wounded thousands and displaced a million or more Lebanese civilians. **It also systematically destroyed the country's essential to life and other vital infrastructure and created an amount of physical devastation that could take a generation to recover from if Israel even allows it to happen. It was done in part to destroy Hezbollah as a political entity and as an effective resistance force against Israel's imperial designs on the country.** But Israel's plans are much more far-reaching than that as explained below. Petras reported Middle East expert Juan Cole claims Israel wanted the war and planned it at least a year in advance. Matthew Kallman of the San Francisco Chronicle Foreign Service also found and reported evidence that preparations for it began in May, 2000, immediately after Israel ended its occupation of the country that began with its invasion and brutal assault in 1982 that killed about 18,000 Lebanese. Kallman also reported that over a year before the conflict began a senior IDF official gave "PowerPoint presentations" off the record to US and other officials and unnamed journalists and think tanks explaining how the attack would unfold "in revealing detail." **Again, Israel got the full backing, funding and arming as needed from the Bush administration to carry it out, effectively making this gruesome adventure a joint US-Israeli operation. Besides wanting to neutralize Hezbollah's resistance, the goal was to destroy Lebanon as a functioning country and ethnically cleanse the southern part of it up to the Litani River Israel wants to control and eventually annex and keep as it did the Golan after the 1967 war.** Israel claims this area (like the Golan) is important for security reasons, but its greatest value (again like the Golan) is as a source of fresh water from the Litani and from the Wazzani springs that feed into the Hasbani River that's a tributary of the Jordan River. The Hasbani flows into Israel two miles downstream from the Wazzani and runs into the Sea of Galilee that's Israel's largest source of fresh water. **Israel has had designs on Lebanon for 40 years or more and has kept the country in a state of instability, partial occupation and conflict over most of that time. Now the state of the country is a devastated near-wasteland monitored by so-called (Israel-approved and friendly) UN Blue Helmets and Lebanese Armed Forces replacing the IDF on the ground under a fragile UN brokered ceasefire arrangement that could end any time Israel wishes again to unleash its war machine and on any pretext.** There's nothing to deter Israel from doing it as it has the unconditional support of the Jewish Lobby and whatever US administration is in power. Unless this changes, the people of Lebanon, like those in Iraq and Palestine, can only look ahead to more conflict and the pain and suffering from it. That's because there's still unfinished business for both empires, and it's not likely either one will soon give up on what they're determined to achieve. So even though Iraq is a hopeless quagmire, the Bush administration says it will "stay the course." **And as long as Israel has full US backing, it will continue pursuing its imperial agenda even though Hezbollah humiliated the IDF in Lebanon and the Palestinians show no signs of ending their determined resistance short of mass-annihilation or forced expulsion.** But it's not all smooth sailing as the unholy US-Israeli alliance faces a threat it can't ignore that could derail it. It's a growing broad-based worldwide anti-imperialist movement against these two partnered pariah states. **It remains to be seen how far it will go, whether it can achieve critical mass in the US and in Israel, and if it can succeed in changing the direction of these two belligerents so far unstoppable and determined to go on unchecked by what passes for the civilized western world.**

**Part II - Israel & Middle East Warfare:** It now looks like the only lesson the US and Israel learned from past failure is to press on with a new adventure. It appears the likely prime target is the Islamic Republic of Iran, as ill-advised as it will be to attack it. Petras explains that **"Israel's political and military leadership have repeatedly and openly declared (their intention) to attack Iran in the immediate future."** And once again it looks like the power of the Jewish Lobby in the US has the Bush administration thinking the same way to help its Israeli partner free itself from another "irritant" in the region that stands in the way of both countries' imperial aims. Petras calls Israel's Iran-directed war preparations "the greatest immediate threat to world peace and political stability (today)." It's hard to disagree. That threat was heightened following North Korea's nuclear test which Israeli officials were quick to jump on suggesting it will benefit Iran. It came from an inflammatory statement by Miri Eisin, Prime Minister Olmert's spokeswoman, who told the AP: **"We should remind ourselves that the North Koreans have already been suppliers of launching platforms which could reach Europe and certainly Israel. As such, they have already shown their willingness to be suppliers to Iran."** Then Israel's UN Ambassador Dan Gillerman went further on Israel's Channel 2 TV referencing North Korea's nuclear activity and adding: **"what Iran is about to do could be much worse, much more frightening and much more dangerous."** This language practically demands an attack on Iran to destroy its presumed "nuclear threat" even though Iran is no threat to any country and the real threat is a growing likelihood of an Israeli and/or US attack on Iran or any other country in the region targeted as an enemy. The US and Israel are allowed to get away with these kinds of outrageously stark and provocative statements even though the only pretext either country can fabricate is the baseless claim that Iran's legitimate right to enrich uranium for commercial use means the country has embarked on a nuclear weapons program that will threaten Israel. In fact, Iran is a signatory to the Nuclear Non-Proliferation Treaty (NPT), and, from all the evidence uncovered from years of monitoring by the UN International Atomic Energy Agency (IAEA), is in full compliance with it. It has every legal right to pursue its commercial nuclear program and nuclear enrichment for it. **Israel, on the other hand, never signed the treaty, is known to have two to three hundred or more sophisticated nuclear weapons and launching systems for them, has stated its intention to use them if it chooses to, and is a nuclear outlaw - but one with an important ally the Iranians lack.** Today the debate in Israel is only over the method and timing of attacking Iran. Petras explains the Israelis have been pushing the US to do it for over a decade with the power of the Jewish Lobby in full support claiming the Islamic Republic threatens Israel's security and its dominance in the region. **It doesn't matter that Iran never attacked its neighbors and isn't likely to undertake a military action except in self-defense as it did against Iraq in the 1980s. Further, it's an Israeli and made-in-America agitprop fabrication that Iranian President Ahmadinejad threatened "to wipe Israel off the map."** The president said a number of things including...."this regime that is occupying Jerusalem must vanish from the page of time" meaning an illegal racist colonial one, but he didn't say or mean it should be removed by force or that Jews

**should be expelled from Israel.** Further proof of Iran's intentions came from Grand Ayatollah Khamenei's public pledge never to attack another country. He also condemned the development and use of nuclear weapons as being against Islam. The Western media was careful to suppress Khamenei's pledge and instead published false reports that he threatened the US to heighten the tension between the two countries. **It's all part of the scheme to get full US support for Israel's intended war plans and the long held desire of both countries for regime change in Iran.** Petras lays out a dire scenario if a US, Israeli or joint attack is launched. It will be especially bad if the US does it using so-called "mini-nuke robust earth penetrator bunker-buster" munitions which are weapons that can be made to any desired potency and are likely to be from one-third to two-thirds as powerful as the Hiroshima bomb. In other words, there's nothing "mini" about them. Aside from the catastrophic level of immediate and long-term casualties from nuclear annihilation and radiation in Iran and beyond, Petras explains such an attack will only be a "pyrrhic victory." **If Israel does it alone, it may set off a chain "political conflagration (to) unseat the rulers of Jordan, Egypt, Syria and Saudi Arabia."** If the US attacks, it "would be even worse: major oil wells burning, US troops in Iraq surrounded (with the catastrophic consequences of far greater loss of life on both sides), long-term relations with Arab regimes undermined and increased oil prices (possibly high enough to cause a worldwide economic calamity) and supplies disrupted." **It's almost certain this would inflame or enrage public opinion in the US and Israel that could lead to the ouster of the ruling parties in both countries.** It would also likely undermine Big Oil's existing and desired major oil exploration projects and cause the Israelis to crack down harder on the Palestinians and make them face forced massive ethnic cleansing expulsion from their homeland. **Further, it would almost certainly get a response from Hezbollah or other resistance in South Lebanon, reignite the conflict there, unleash the Israeli killing machine all over again and cause more mass displacement and reoccupation by the IDF as the UN Blue Helmets and Lebanese forces evacuate the conflict zone.** And it would lead to a growing threat of retaliatory terror attacks in the US, other Western countries and in Israel and would likely strengthen the resolve of other nations feeling potentially threatened by a hostile US, Israel and the West to seek defensive economic and military alliances in a structure like the Shanghai Cooperation Organization (SCO) that was formed in 2001 for political, diplomatic, economic and security reasons to act as a counterweight to NATO which the US dominates. **Still, with all the hazards of attacking Iran clearly in the minds of US policy makers, the momentum for it is moving ahead. It's happening in spite of serious high-level dispute in Washington about undertaking it.** The Pentagon has war plans for it to include NATO, Israel and Canada, and it currently has a major US naval strike group deployment in the Persian Gulf and Eastern Mediterranean. Part of it is permanently stationed in the region, and in early October, The powerful Eisenhower Carrier Strike Group got "prepare to deploy" orders, headed there on October 3 and is now in place for whatever action may be intended. It joins the Enterprise and Iwo Jima Expeditionary Strike Groups making a total of three US naval task forces in position opposite Iran for whatever purpose may be planned and will shortly be joined by a fourth Boxer Expeditionary Strike Group that left Singapore on October 16 for the region. Naval forces already there have been engaged in what the Iranian foreign ministry calls "dangerous and suspicious" exercises in the Gulf practicing intercepting and searching ships for potential WMDs and missiles. This all may be just a saber-rattling bluff, but if it's more than that it could unfold as a late October or early November "surprise" ahead of the November 7 congressional elections now only days away and be initiated in response to a manufactured incident on the order of the August, 1964 Gulf of Tonkin one or the blowing up of the USS Maine in February, 1898 in Havana Harbor. **It's never hard for an aggressor to find reasons for war if it wants one and just needs a convenient excuse to start it.** The Bush administration and Israelis may get their wish if the Navy goes ahead with its reported plans to blockade Iranian oil ports. This action will be an act of war if it's done that Iran will have a legal right to respond to in self-defense under Article 51 of the UN Charter but will surely be met with a "shock and awe" counterattack against about 400 Iranian target sites already designated as ones to destroy in the event of hostilities. None of this guarantees an attack is imminent, but it shows a real possibility one may be coming. It also shows the power of the Jewish Lobby in the US that supports Israel's long-term aim to attack Iran no matter how grim the fallout from it may be. **There's so much open speculation about this, it's gotten saner military, political and economic analysts here to believe this would be an act of insanity with the kind of potentially catastrophic consequences Petras outlined above. Will it happen? We can only hold our breath waiting to find out, but it may not be long before we do.**

**Part III - Experts On Terror Or Terrorist Experts:** In this part of his book, Petras goes head-to-head with the so-called self-styled "terrorist experts" (TE) and clearly comes out ahead with his incisive dissection of them explaining why they're prominently featured in the major media. **He calls them the "set-up" people - there to play a role to "motivate the colonial and imperial conquerors and reinforce their idea that the terrorists are not worthy of ruling or being ruled," so we have to get rid of them.** It doesn't matter that the so-called "war on terrorism" is a shameless overused but very effective ruse scare tactic. It's always used because the public never catches on no matter how many times before supposed threats turned out to be another scam to get them to go along with whatever schemes our government had in mind to undertake. It never ceases to amaze how short an attention span the public has, but it's clear the power of the corporate-run media has a lot to do with it. It led author Studs Terkel to refer to a national Alzheimer's disease and author and political critic Gore Vidal to subtitle his 2004 book Imperial America - Reflections on the United States of Amnesia. **It gives the whole propaganda apparatus and the TE an open field to manipulate the public mind and get it to believe most anything. Petras calls these people "verbal assassins" who can't or won't understand that people pummeled by "shock and awe" attacks, their countries plundered in the name of "liberation," their people mass-murdered, raped, arrested and tortured might be desperate and motivated enough to strike back in retaliatory self-defense.** It follows logically from Newton's law that for every action there's a corresponding reaction. In 1954, the CIA understood this and invented a term for it (no self-respecting TE will touch). **The agency called it "blowback" referring to the unintended consequences from US hostile acts abroad like overthrowing legitimate or otherwise constituted governments as it did against Mohammed Mossadegh in Iran in 1953 ushering in the 25 year terror reign of the Shah.** It finally led to the "blowback" 1979 revolution, and it causes other instances of retaliation now ongoing in Iraq and Afghanistan and for nearly six decades in Palestine. **But prominent TE featured in the major media have a different diagnosis of resistance fighters. They call them "incurable psychopaths (who are) extremely dangerous when at large (so we must flush them out to) capture, confine, torture or kill (them)."** A convenient division of labor is then arranged to do it and the TE play their assigned role along with the military, recruited satraps, prison commandants, interrogators, guards and assorted other functionaries. They're team member hegemon-devil's disciples turning "victims into executioners and the executioners into victims." They do it by dehumanizing the legitimate resistance they label Islamo-fascists, Islamic fundamentalists, terrorists or other invented designations of inferiority or implied threat that must be

destroyed. **It's incomprehensible to the TE that almost any act of retaliatory self-defense might be justifiable resistance given the level of state-directed violence used against them mercilessly.** In Israel, and now in Iraq and Afghanistan it led to the phenomenon of suicide bombings which Petras calls "a form of individual sacrifice, of individual resistance taken in the name of the collective." He explains further that in the West individual sacrifice is rewarded with medals, but in the Middle East and specifically in the case of suicide bombers the reward is martyrdom for giving their lives in the cause of national liberation against a superior hostile force. This is a phenomenon common throughout history when a people face an overpowering conqueror and occupier. **Petras explains "there have always been and always will be self-sacrificing individuals or (whole populations)....prepared to defend nation and home....and to use (their) body as a missile or weapon (to do it)."** Petras also explains there are different forms of imperial conquest and subjugation, and the one the US uses in Iraq and Afghanistan and that Israel uses against the Palestinians is a cruel and dehumanizing "process of destruction, degradation, and exploitation followed by efforts to 'reconstruct' a colonized military, police, and political structure willing and able to repress and contain anti-colonial resistance." **It's a doctrine of "total war" against target nations too weak to fight back except by asymmetrical guerilla warfare means that include tactics like car and suicide bombings. Petras calls this practice "one of the ultimate forms of rejection of tyranny" that will only end when "total war" does. And that will only happen when the "colonial revivalist strand of imperialism in....its US, European and Israel variants" are defeated....Peace and reconciliation is only possible if justice is meted to the architects and practitioners of total war and human degradation."** A long and painful struggle for liberation may be ahead before that goal is ever achieved.

**Part IV - Noam Chomsky & The Pro-Israel Lobby:** In the book's final part, Petras challenges a man who may best be described as an iconic figure on the Left, an anti-war activist, and much more but not one unused to being challenged and sometimes harshly. **Petras points out that Chomsky has been a sharp critic of Israeli policies through the years and has been strongly attacked for his views by pro-Israeli organizations and the major media on the rare times his name is even allowed in it. Still he defends the existence of the Zionist state and has a different view than Petras on the power and influence of the Jewish Lobby in shaping US policy toward Israel.** Petras lists what he calls Chomsky's fifteen erroneous theses reflecting his long-held belief that the Lobby isn't as potent as the strong case Petras makes in this book that it is. Not wishing to take sides with two distinguished men this writer holds in high esteem, the points of disagreement will only be listed so the reader can decide who makes the better case.

#### **Noam Chomsky's 8 "Dubious Propositions:"**

- 1) The pro-Israel Lobby is like any other one.
- 2) The Lobby's backers have no more power than other pressure groups.
- 3) **The Lobby succeeds because its interests coincide with those of the US.**
- 4) **Israel is a tool of the US empire and used as needed.**
- 5) "Big Oil" and the "military-industrial complex" are the major forces shaping Middle East policy.
- 6) US and Israeli interests usually coincide.
- 7) The Iraq war and threats to Iran and Syria stem from the "oil interests" and "military-industrial complex."
- 8) **US behavior in the Middle East is the same as what it practices worldwide.**

Petras then uses the above list to discuss what he calls Chomsky's 15 theses and uses the persuasive evidence presented in his book to take issue with them, one by one. He sums up his case stating he's done this because of Chomsky's enormous stature making whatever his views are stand out prominently. **It's a matter of consequence when a man like Noam Chomsky believes the Jewish Lobby is like all others which in Petras' view gives a "free ride to the principal authors, architects and lobbyists in favor of the (Iraq) war (and is an) obstacle to achieving clarity about whom we are fighting and why.** To ignore the pro-Israel Lobby is (also) to allow it a free hand in pushing for the invasion of Iran and Syria (and any other regime in the region Israel may wish to remove)." **Petras sums up saying that "the peace and justice movements, at home and abroad, are bigger than any individual or intellectual - no matter what their past credentials." In this battle of noted titans on the Left, it's for the reader to decide who's right.**

**Summation - Confronting Zionism and Reclaiming American Middle East Policy:** Petras has written a powerful and important new book that needs broad exposure and resonance. But he'll never get its content past the corporate gatekeepers controlling the major media because of his courage to reveal what others fear to do - confront **Zionism, its agenda of aggressive wars and colonization, and the power of the Jewish Lobby to assure Israel gets the full and unconditional support of every US administration regardless of whether what it does serves the interests of this country.** That Lobby power reached its apogee and full fruition with the ascent of the Bush administration neocons that effectively pledge their fealty to the rulers of the Israeli state and prove **Ariel Sharon may have been right when he once arrogantly boasted about his relationship with George Bush saying: "We have the US under our control."** The result has been disastrous for this country and the sacred principles on which it was founded. In partnership with Israel, the US began tearing apart the Middle East and Central Asia by attacking and occupying Iraq and Afghanistan. **It now threatens to inflame the whole region enough to make it explode if we go ahead with plans to attack Iran, do it with nuclear weapons, and then move on to Syria and even Saudi Arabia while continuing to hold Lebanon hostage and under siege in a state of interregnum awaiting the next inevitable trigger igniting the whole ugly business there all over again. The Bush administration "long war" against Islam enraged 1.8 billion Muslims worldwide growing in unity against us.** It's also destroying our freedom and democracy at home in the process threatening everyone with the emerging power of a national security police state that spells tyranny with an out-of-control president usurping the dictatorial power of a "unitary executive" claiming the right to go around the law of the land and its international obligations to govern as he pleases. **Petras sounds the alarm and asks how did we get into this debacle, and who's responsible for it. He stresses the need for a full-scale Congressional investigation to find out, but laments it's not likely to happen as long as the Bush neocons have their way.** The central thesis of his book is that the Jewish Lobby serves the interests of Zionism and acts as agents for the state of Israel. It co-opted the Bush administration, all others preceding it, and the key centers of power and influence in the country leading us to

the disaster we now face because of our misguided Middle East adventurism. He equates our actions in league with Israel to the Nazi war crimes committed in WW II, saying **"These are the highest crimes against humanity."** Referring to the crime of aggression, the Nuremberg Tribunal called it the **"supreme international crime,"** and those Nazis found guilty of it were hanged. Petras explains that the **"worst crimes are committed by those who claim to be a divinely chosen people, a people with 'righteous' claims of supreme victimhood."** He goes on to say: **"Righteous victimology, linked to ethno-religious loyalties and directed by fanatical civilian militarists with advanced weaponry, is the greatest threat to world peace and humanity."** Petras makes an impassioned plea for progressives (really all people of conscience) to reject the imperial agenda of all nations, and in the case of Israel, to stand firm against inevitably being labeled anti-Semitic. Scurrilous name-calling is another refuge of scoundrels that shouldn't be tolerated or allowed to deter our committed assault against the forces of darkness that will destroy us unless we stand firmly against them. **Petras tells us it won't be easy, and we can expect forceful ideological attacks against us premised on the notion that Israel is the embodiment of "democracy, liberty and justice" and those daring to criticize the Jewish state will be called supporters of "Arab dictatorships, repression, injustice and terrorism."** The stakes are much too high to let them get away with it using scurrilous name-calling in defense of it. In Petras' words: **"Israel and its overseas network in the US....(threatens) not only the oppressed people of Palestine (and Iraq, Iran, Lebanon, Syria and any other state Israel takes aim at) but the rights of people throughout the world."** He stresses we have mass public opinion on our side nearly everywhere outside the US, and it's gaining resonance here as well. It sees Israel and our actions in support of the Jewish state as the greatest of all threats to world peace and stability. Petras ends his book with one final impassioned call to arms: **"Let's move ahead and de-colonize our country, our minds and politics as a first step in reconstituting a democratic republic, free of entangling colonial and neo-imperial alliances."** Wise thoughts from a wise and courageous man. We can't ignore them lest we pay the supreme price of the loss of our freedom (and maybe our lives) because we didn't know it was being taken from us until it was too late to act to save it (Lendman, 2006).

**Source:** Viewzone, Dan Eden

**Title/Headline:** *Dual Citizenship: Loyal To Whom?*

**Abstract:** Someone wrote and asked me, **"Why are there Israeli- but not Mexican-American Dual Nationals?"** Well, here's my take on this. I'd also like your views and opinions. Before I begin I'd like to say something important. There is a new law -- the so-called **"Hate Speech" law, that just passed the House and is expected to pass the Senate and become law very soon. It was originally designed to guard against discrimination of oppressed minorities but was soon recognized as a way for Israel to forever end any criticism of the state of Israel and Zionism.** When it is law, this page, and many like it will be deleted from the internet as yet another mile marker of the infringement of truth and free speech by certain dual-nationals at the expense of true and patriotic Americans. Enough said. Unless we are Native American Indians, all Americans have their origins in some other country. Both of my parents were from England. They were proud to be "British" but they were most proud of achieving their American citizenship. Sure, we had pictures of the Queen and nick-nacks with the Union Jack on them. My mother even celebrated the traditional 4 o'clock tea time and was good at making Yorkshire Pudding. In the late 60's my older brother served in the US Army and did his tour in Viet Nam. When it came down to "allegiance," we were all patriotic Americans. Period. **The word "allegiance" means that we promise loyalty. It also carries with it the expectation that this loyalty will be exclusive and unrestrained. In the case of a declared war or real threat or conflict, for example, our allegiance to America should preclude any other interest, be it another country or political ideology. When they took their oath to become American citizens, my parents had to pledge their "allegiance" exclusively to America and renounce their allegiance to "any and all foreign governments."** That included Great Britain, one of our strongest allies. Before Viewzone asked me to research the meaning of "dual citizenship," I had never heard of the term. **How could someone be a citizen of two countries at the same time? But I was just ignorant. Dual nationalities and citizenships are quite common.** From my internet research, I learned that in 1997, a French Canadian with a U.S. passport ran for mayor of Plattsburgh, N.Y. He argued that the incumbent spoke French too poorly to be running a city so close to Quebec. He lost. Also in 1997, a retired top American official for the U.S. EPA (Environmental Protection Agency) ran for president of Lithuania. He was inaugurated in February to a burst of fireworks! In 1996, Dominicans from New York not only could vote in the Dominican Republic's presidential elections for the first time, they could vote for a fellow New Yorker. Multiple nationalities have become so commonplace that some analysts fear the trend is undermining the notion of nationhood, particularly in the place with the most diverse citizenry on Earth: the United States. Debate over the issue intensified in the late 1990s, when Mexico joined the growing list of poor nations that say it's OK for their nationals to be citizens of the countries to which they have migrated. Under the law that took effect in 1998 Mexicans abroad -- most of them in the United States -- will be able to retain Mexican citizenship even if they seek U.S. citizenship. And naturalized Americans of Mexican descent will be able to reclaim their original citizenship. The Mexican government stopped short, for now, of giving expatriates the right to vote.

**Security Issues:** Since citizenship carries with it a responsibility to be exclusively loyal to one country, the whole concept of dual citizenship and nationality raises questions about which of the dual citizenships have priority. This is extremely important when the two countries have opposing interests. It can be a deadly problem when a dual citizen is in a high position within our American government. Can one imagine a Japanese citizen serving in the Pentagon during WWII? Or how about a citizen of the Soviet Union holding a cabinet position in the White House during the Cold War? **Today's conflicts are centered in the Middle East. America needs to balance foreign policies towards oil producing Arab nations with our goal being peace and stability in the region. This places a burden on our government to be even-handed in our dealings with the Arab world and Israel. While the Iraq War was waged on**

lies about Weapons of Mass Destruction and revenge for 911, the real reason has emerged as a well designed global plan to improve the power and leverage of Israel. Added to this policy is yet another potential blow to American interests and security -- the impending War with Iran. This war will be waged for the security of Israel and will be paid for by the blood of American soldiers and the hard-earned money of American citizens whose quality of life is inversely tied to the cost of petroleum. Recently, in their much lauded paper, **The Israel Lobby and U.S. Foreign Policy**, Harvard professor, Stephen Walt, and University of Chicago professor, John Mearsheimer, focused attention on the strong Israeli lobby which has a powerful influence over American foreign policies. They detail the influence that this lobby has exerted, forming a series of international policies which can be viewed as in direct opposition to the interests and security of the American people. These acts and policies are more often than not carried out by US government appointees who hold powerful positions and who are dual American-Israeli citizens. Since the policies they support are often exclusively beneficial to Israel, often to the detriment of America, it has been argued that their loyalties are misdirected.

**Jonathan Jay Pollard:** Jonathan Jay Pollard was an American-Israeli citizen who worked for the US government. He is well known because he stole more secrets from the U.S. than has any other spy in American history. During his interrogation Pollard said he felt compelled to put the "interests of my state" ahead of his own. Although as a U.S. Navy counter-intelligence specialist he had a top-secret security clearance, by "my state" he meant the state of Israel. Literally tens of thousands of Americans holding U.S. passports admit they feel a primary allegiance to the state of Israel. In many instances, these Americans vote in Israeli elections, wear Israeli uniforms and fight in Israeli wars. Many are actively engaged both in the confiscation of Palestinian lands and in the Israeli political system.

**Three Examples Come To Mind:** One is Rabbi Meir Kahane, who founded the militant Jewish Defense League in the U.S. in the 1960s, then immigrated to Israel where, eventually, he was elected to the Knesset. Until he was shot and killed at one of his U.S. fund-raising rallies in 1990, the Brooklyn-born rabbi shuttled between Tel Aviv and New York, where he recruited militant American Jews for his activities in Israel against Palestinians. He claimed to be a "dual citizen" of America and Israel. Another Jewish American, James Mahon from Alexandria, Virginia, reportedly was on a secret mission to kill PLO Chairman Yasser Arafat when he was shot in 1980 by an unknown assailant. When he was shot, Mahon held an American M-16 in his hand and a U.S. passport in his pocket. Then there was Alan Harry Goodman, an American Jew who left his home in Baltimore, Maryland, flew to Israel and served in the Israeli army. Then, on April 11, 1982, armed with an Uzi submachine gun, he walked, alone, to Al-Aqsa, Jerusalem's most holy Islamic shrine, where he opened fire, killing two Palestinians and wounding others. Both the U.S. and Israeli governments played down the incident, as did the media. Most recently, US Navy Petty Officer, Ariel J. Weinmann, while serving at or near Bahrain, Mexico, and Austria, "with intent or reason to believe it would be used to the injury of the United States or to the advantage of a foreign nation (Israel), [attempted] to communicate, deliver or transmit classified CONFIDENTIAL and SECRET information relating to the national defense, to a representative, officer, agent or employee of a foreign government." Weinmann was apprehended on March 26 after being listed as "a deserter by his command," according to the US Navy. The information he gathered was supplied to Israel. Ben-Ami Kadish, a Connecticut-born U.S. dual citizen who worked in New Jersey was arrested and charged with giving top secret nuclear information and details about the US Patriot Missile to an Israeli agent -- the same agent involved with the Jay Pollard case. The espionage charges reportedly stem from acts committed in the 1980s. These activities, like the ones with convicted spy Pollard, were immediately denied by Israel (Pollard pleaded guilty in 1986). It is further reported that Israeli officials instructed Kadish to lie to US investigators. Kadish was scheduled to be arraigned on April 22, 2008 at U.S. District Court in Manhattan.

**Congresswomen Jane Harman & Israeli Knesset Speaker, Dalia Itzik:** In 2009 it was revealed that the NSA had secretly taped conversations of Congresswomen Jane Harman [pictured above on the right with Israeli Knesset Speaker, Dalia Itzik] negotiating with two AIPAC spies accused of giving sensitive information about US military activities to the Israeli government. In the taped conversation she is being asked to dismiss their espionage charges in return for large political contributions and (are you ready) a chairmanship of the US Intelligence Committee! One has to assume that they thought they could actually "arrange" for this to happen. This information was secretly revealed by the NSA to Nancy Pelosi prior to the selection of the committee chairman and was a factor (let's hope, anyway) in Harmon's failure to obtain this highly sensitive position. After all was said and done, however, the case against the two Israeli lobbyists was dismissed -- against the insistence of the FBI. No satisfactory reason has been given for this. Unfortunately, such an act of treason remains unchallenged and Jane Harman remains at her congressional job and enjoys being the third wealthiest member of Congress. Only in America! The examples of Kahane, Mahon, Goodman and Weinmann raise the question of when a U.S. citizen ceases to be, or should cease to be, a U.S. citizen. U.S. Law at one time clearly stated that an American citizen owed first allegiance to the United States. A U.S. citizen should not fight in a foreign army or hold high office in a foreign country without risking expatriation. What the heck happened?

**The 1940 Nationality Act:** Section 401 (e) of the 1940 Nationality Act provides that a U.S. citizen, whether by birth or naturalization, "shall lose his [U.S.] nationality by...voting in a political election in a foreign state." This law was tested many times. In 1958, for instance, an American citizen named Perez voted in a Mexican election. The case went to the Supreme Court, where the majority opinion held that Perez must lose his American nationality. The court said Congress could provide for expatriation as a reasonable way of preventing embarrassment to the United States in its foreign relations. But then something very odd happened. **In 1967 an American Jew, Beys Afroyim received an exemption that set a precedent exclusively for American Jews. Afroyim, born in Poland in 1895, emigrated to America in 1912, and became a naturalized U.S. citizen in 1926. In 1950, aged 55, he emigrated to Israel and became an Israeli citizen. In 1951 Afroyim voted in an Israeli Knesset election and in five political elections that followed. So, by all standards he lost his American citizenship -- right? Wrong.** After living in Israel for a decade, Afroyim wished to return to New York. In 1960, he asked the U.S. Consulate in Haifa for an American passport. The Department of State refused the application, invoking section 401 (e) of the Nationality Act -- the same ruling that had stripped the American citizen named Perez of his U.S. citizenship. Attorneys acting for Afroyim took his case to a Washington, DC District Court, which upheld the law. Then his attorneys appealed to the Court of Appeals. This court also upheld the law. The attorneys for Afroyim then moved the case on to the Supreme Court. Here, with Supreme Court Justice Abe Fortas, Lyndon Johnson's former attorney and one of the most powerful Jewish Americans, casting the swing vote, the court voted five to four in favor of Afroyim. The court held that the U.S. government had no right to "rob" Afroyim of his American citizenship! **The court, reversing its previous judgment as regards the Mexican American, ruled that Afroyim had not shown "intent" to lose citizenship by voting in Israeli elections. Huh? While Washington claims it has a "good neighbor" policy with Mexico, the U.S. does not permit Mexicans to hold dual nationality. The US makes them become either U.S. or Mexican -- you can't be both. But the U.S., in its special relationship with Israel, has become very sympathetic to allowing Israeli-Americans to retain two nationalities and allowing U.S. citizens not only to hold public office in Israel, but to hold US government positions as well! No other country holds this special exception to our laws of citizenship.**

So, you might ask, are there any other dual Israel-American citizens who hold US government positions that could compromise American security? Yes. Consider the following list that I obtained on the web:

**Michael Mukasey:** Recently appointed as US Attorney General. Mukasey also was the judge in the litigation between developer Larry Silverstein and several insurance companies arising from the destruction of the World Trade Center on 9/11/2001.

**Michael Chertoff:** Former Assistant Attorney General for the Criminal Division, at the Justice Department; now head of Homeland Security.

**Richard Perle:** One of Bush's foreign policy advisors, he is the chairman of the Pentagon's Defense Policy Board. A very likely Israeli government agent, Perle was expelled from Senator Henry Jackson's office in the 1970's after the National Security Agency (NSA) caught him passing Highly-Classified (National Security) documents to the Israeli Embassy. **He later worked for the Israeli weapons firm, Soltam. Perle came from one the above mentioned pro-Israel think-tanks, the AEI. Perle is one of the leading pro-Israeli fanatics leading this Iraq war mongering within the administration and now in the media.**

**Paul Wolfowitz:** Former Deputy Defense Secretary, and member of Perle's Defense Policy Board, in the Pentagon. Wolfowitz is a close associate of Perle, and reportedly has close ties to the Israeli military. His sister lives in Israel. Wolfowitz came from the above mentioned Jewish think-tank, JINSA. Wolfowitz was the number two leader within the administration behind this Iraq war mongering. He later was appointed head of the World Bank but resigned under pressure from World Bank members over a scandal involving his misuse of power.

**Lawrence (Larry) Franklin:** The former Defense Intelligence Agency analyst with expertise in Iranian policy issues who worked in the office of Undersecretary of Defense for Policy Douglas Feith and reported directly to Feith's deputy, **William Luti**, was sentenced January 20, 2006, "to more than 12 years in prison for giving classified information to an Israeli diplomat" and members of the pro-Israel lobbying group American Israel Public Affairs Committee (AIPAC). Franklin will "remain free while the government continues with the wider case" and his "prison time could be sharply reduced in return for his help in prosecuting" former AIPAC members Steven J. Rosen and Keith Weissman, [who] are scheduled to go on trial in April [2006]. Franklin admitted that he met periodically with Rosen and Weissman between 2002 and 2004 and discussed classified information, including information about potential attacks on U.S. troops in Iraq. Rosen and Weissman would later share what they learned with reporters and Israeli officials."

**Douglas Feith:** Under Secretary of Defense and Policy Advisor at the Pentagon. He is a close associate of Perle and served as his Special Counsel. Like Perle and the others, Feith is a pro-Israel extremist, who has advocated anti-Arab policies in the past. **He is closely associated with the extremist group, the Zionist Organization of America, which even attacks Jews that don't agree with its extremist views. Feith frequently speaks at ZOA conferences. Feith runs a small law firm, Feith and Zell, which only has one International office, in Israel. The majority of their legal work is representing Israeli interests. His firm's own website stated, prior to his appointment, that Feith "represents Israeli Armaments Manufacturer." Feith basically represents the Israeli War Machine. Feith also came from the Jewish think-tank JINSA. Feith, like Perle and Wolfowitz, are campaigning hard for this Israeli proxy war against Iraq. Feith was investigated by the FBI under suspicion of leaking classified information to Israel, being that he was Larry Franklin's boss when Franklin leaked those documents to Rosen and Weissman of AIPAC. For that he was forced to leave the National Security Council. Feith was also investigated by the Senate Intelligence Committee for sexing up 'intelligence' that was used to justify invading Iraq.**

**Edward Luttwak:** Member of the National Security Study Group of the Department of Defense at the Pentagon. Luttwak is reportedly an Israeli citizen and has taught in Israel. **He frequently writes for Israeli and pro-Israeli newspapers and journals. Luttwak is an Israeli extremist whose main theme in many of his articles is the necessity of the U.S. waging war against Iraq and Iran.**

**Henry Kissinger:** One of many Pentagon Advisors, Kissinger sits on the Pentagon's Defense Policy Board under Perle. For detailed information about Kissinger's evil past, read Seymour Hersch's book (Price of Power: Kissinger in the Nixon White House). **Kissinger likely had a part in the Watergate crimes, Southeast Asia mass murders (Vietnam, Cambodia, Laos), Installing Chilean mass murdering dictator Pinochet, Operation Condor's mass killings in South America, and more recently served as Serbia's Ex-Dictator Slobodan Milosevic's Advisor. He consistently advocated going to war against Iraq.** Kissinger is the Ariel Sharon of the U.S. Unfortunately, President Bush nominated Kissinger as chairman of the September 11 investigating commission. It's like picking a bank robber to investigate a fraud scandal. He later declined this job under enormous protests.

**Dov Zakheim:** Zakheim is an ordained rabbi and reportedly holds Israeli citizenship. Zakheim attended Jew's College in London and became an ordained Orthodox Jewish Rabbi in 1973. He was adjunct professor at New York's Jewish Yeshiva University. Zakheim is close to the Israeli lobby. Dov Zakheim is also a member of the Council on Foreign Relations and in 2000 a co-author of the Project for the New American Century's position paper, Rebuilding America's Defenses, advocating the necessity for a Pearl-Harbor-like incident to mobilize the country into war with its enemies, mostly Middle Eastern Muslim nations. He was appointed by Bush as Pentagon Comptroller from May 4, 2001 to March 10, 2004. At that time he was unable to explain the disappearance of \$1 trillion dollars. Actually, nearly three years earlier, Donald Rumsfeld announced on September 10, 2001 that an audit discovered \$2.3 trillion was

also missing from the Pentagon books. That story, as mentioned, was buried under 9-11's rubble. **The two sums disappeared on Zakheim's watch. We can only guess where that cash went.** Despite these suspicions, on May 6, 2004, Zakheim took a lucrative position at Booz Allen Hamilton, one of the most prestigious strategy consulting firms in the world. One of its clients then was Blessed Relief, a charity said to be a front for Osama bin Laden. Booz, Allen & Hamilton then also worked closely with DARPA, the Defense Advanced Research Projects Agency, which is the research arm of the Department of Defense. **Judicial Inc's bio of Dov tells us Zakheim is a dual Israeli/American citizen and has been tracking the halls of US government for 25 years, casting defense policy and influence on Presidents Reagan, Clinton, Bush Sr. and Bush Jr. Judicial Inc points out that most of Israel's armaments were gotten thanks to him. Squads of US F-16 and F-15 were classified military surplus and sold to Israel at a fraction of their value.**

**Kenneth Adelman:** One of many Pentagon Advisors, Adelman also sits on the Pentagon's Defense Policy Board under Perle, and is another extremist pro-Israel advisor, who supported going to war against Iraq. Adelman frequently is a guest on Fox News, and often expresses extremist and often ridiculous anti-Arab and anti-Muslim views. **Through his racism or ignorance, he actually called Arabs "anti-Semitic" on Fox News (11/28/2001), when he could have looked it up in the dictionary to find out that Arabs by definition are Semites.**

**Lewis "Scooter" Libby:** Vice President Dick Cheney's ex-Chief of Staff. As chief pro-Israel Jewish advisor to Cheney, it helps explain why Cheney is so gun-ho to invade Iran. Libby is longtime associate of Wolfowitz. Libby was also a lawyer for convicted felon and Israeli spy Marc Rich, whom Clinton pardoned, in his last days as president. Libby was recently found guilty of lying to Federal investigators in the Valerie Plame affair, in which Plame, a covert CIA agent, was exposed for political revenge by the Bush administration following her husband's revelations about the lies leading to the Iraq War.

**Robert Satloff:** U.S. National Security Council Advisor, Satloff was the executive director of the Israeli lobby's "think tank," Washington Institute for Near East Policy. Many of the Israeli lobby's "experts" come from this front group, like Martin Indyk.

**Elliott Abrams:** National Security Council Advisor. He previously worked at Washington-based "Think Tank" Ethics and Public Policy Center. During the Reagan Administration, Abrams was the Assistant Secretary of State, handling, for the most part, Latin American affairs. He played an important role in the Iran-Contra Scandal, which involved illegally selling U.S. weapons to Iran to fight Iraq, and illegally funding the contra rebels fighting to overthrow Nicaragua's Sandinista government. He also actively deceived three congressional committees about his involvement and thereby faced felony charges based on his testimony. Abrams pled guilty in 1991 to two misdemeanors and was sentenced to a year's probation and 100 hours of community service. A year later, former President Bush (Senior) granted Abrams a full pardon. **He was one of the more hawkish pro-Israel Jews in the Reagan Administration's State Department.**

**Marc Grossman:** Under Secretary of State for Political Affairs. He was Director General of the Foreign Service and Director of Human Resources at the Department of State. Grossman is one of many of the pro-Israel Jewish officials from the Clinton Administration that Bush has promoted to higher posts.

**Richard Haass**: Director of Policy Planning at the State Department and Ambassador at large. He is also Director of National Security Programs and Senior Fellow at the Council on Foreign Relations (CFR). **He was one of the more hawkish pro-Israel Jews in the first Bush (Sr) Administration who sat on the National Security Council, and who consistently advocated going to war against Iraq. Haass is also a member of the Defense Department's National Security Study Group, at the Pentagon.**

**Robert Zoellick**: U.S. Trade Representative, a cabinet-level position. **He is also one of the more hawkish pro-Israel Jews in the Bush (Jr) Administration who advocated invading Iraq and occupying a portion of the country in order to set up a Vichy-style puppet government. He consistently advocates going to war against Iran.**

**Ari Fleischer**: **Ex- White House Spokesman for the Bush (Jr) Administration. Prominent in the Jewish community, some reports state that he holds Israeli citizenship.** Fleischer is closely connected to the extremist Jewish group called the Chabad Lubavitch Hasidics, who follow the Qabala, and hold very extremist and insulting views of non-Jews. Fleischer was the co-president of Chabad's Capitol Jewish Forum. He received the Young Leadership Award from the American Friends of Lubavitch in October, 2001.

**James Rodney Schlesinger**: One of many Pentagon Advisors, Schlesinger also sits on the Pentagon's Defense Policy Board under Perle and is another extremist pro-Israel advisor, who supported going to war against Iraq. Schlesinger is also a commissioner of the Defense Department's National Security Study Group, at the Pentagon.

**David J. Frum**: White House speechwriter behind the "Axis of Evil" label. He lumped together all the lies and accusations against Iraq for Bush to justify the war.

**Joshua Bolton**: White House Deputy Chief of Staff, Bolton was previously a banker, former legislative aide, and prominent in the Jewish community.

**John Bolton:** Former UN Representative and Under-Secretary of State for Arms Control and International Security. Bolton is also a Senior Advisor to President Bush. Prior to this position, **Bolton was Senior Vice President of the above mentioned pro-Israel think-tank, AEI.** He recently (October 2002) accused Syria of having a nuclear program, so that they can attack Syria after Iraq. He must have forgotten that Israel has 400 nuclear warheads, some of which are thermonuclear weapons (according to a recent U.S. Air Force report).

**David Wurmser:** Special Assistant to John Bolton the under-secretary for arms control and international security. Wurmser also worked at the AEI with Perle and Bolton. **His wife, Meyrav Wurmser, along with Colonel Yigal Carmon, formerly of Israeli military intelligence, co-founded the Middle East Media Research Institute (Memri), a Washington-based Israeli outfit which distributes articles translated from Arabic newspapers portraying Arabs in a bad light.**

**Eliot A. Cohen:** Member of the Pentagon's Defense Policy Board under Perle and is another extremist pro-Israel advisor. Like Adelman, he often expresses extremist and often ridiculous anti-Arab and anti-Muslim views. More recently, he wrote an opinion article in the Wall Street Journal openly admitting his racist hatred of Islam claiming that Islam should be the enemy, not terrorism.

**Melvin Floyd Sembler:** President of the Export-Import Bank of the United States. A Prominent Jewish Republican and Former National Finance Chairman of the Republican National Committee. The Export-Import Bank facilitates trade relationships between U.S. businesses and foreign countries, specifically those with financial problems.

**Steve Goldsmith:** Senior Advisor to the President, and Bush's Jewish domestic policy advisor. He also served as liaison in the White House Office of Faith-Based and Community Initiatives (White House OFBCI) within the Executive Office of the President. He was the former mayor of Indianapolis. He is also friends with Israeli Jerusalem Mayor Ehud Olmert and often visits Israel to coach mayors on privatization initiatives.

**Adam Goldman:** White House's Special Liaison to the Jewish Community.

**Joseph Gildenhorn:** Bush Campaign's Special Liaison to the Jewish Community. He was the DC finance chairman for the Bush campaign, as well as campaign coordinator, and former ambassador to Switzerland.

#### Other Israeli/Jewish U.S. Politicians:

- **Christopher Gersten:** Principal Deputy Assistant Secretary, Administration for Children and Families at HHS. Gersten was the former Executive Director of the Republican Jewish Coalition, Husband of Labor Secretary
- **Mark Weinberger:** Assistant Secretary of Housing and Urban Development for Public Affairs,
- **Samuel Bodman:** Deputy Secretary of Commerce. He was the Chairman and CEO of Cabot Corporation in Boston, Massachusetts
- **Bonnie Cohen:** Under Secretary of State for Management
- **Ruth Davis:** Director of Foreign Service Institute, who reports to the Office of Under Secretary for Management. This Office is responsible for training all Department of State staff (including ambassadors)
- **Daniel Kurtzer:** Ambassador to Israel,
- **Cliff Sobel:** Ambassador to the Netherlands
- **Stuart Bernstein:** Ambassador to Denmark
- **Nancy Brinker:** Ambassador to Hungary
- **Frank Lavin:** Ambassador to Singapore
- **Ron Weiser:** Ambassador to Slovakia
- **Mel Sembler:** Ambassador to Italy
- **Martin Silverstein:** Ambassador to Uruguay
- **Lincoln Bloomfield:** Assistant Secretary of State for Political Military Affairs
- **Jay Lefkowitz:** Deputy Assistant to the President and Director of the Domestic Policy Council.
- **Ken Melman:** White House Political Director
- **Brad Blakeman:** White House Director of Scheduling

**I don't know about you, but dual citizenship is fine with me for an ordinary citizen. But if you hold an official position that demands that you put American interests above all else -- if you should look transparent and fair to the rest of the world regarding your formation of Middle East foreign policies, then this is a dangerous trend.** Even if there were no pro-Israeli agenda, the fact that decision makers have a bias or an allegiance to one of the parties involved in the current conflict should have raised red flags long before now.

If you think we're being unfair here, ask yourself: **How you would react to the Head of Homeland Security if he or she were a dual national with citizenship in Iran, Lebanon or Saudi Arabia? Ask yourself why you don't feel the same about Israeli dual citizenship.** Then you will understand how powerful the Israeli lobby has been in "adjusting" your acceptance of their special status. Hey, I could be way off on this. Let's hear from you. FBI arrests US scientist on spying charges In Jerusalem, Israeli government officials had no immediate comment. **A scientist credited with helping discover evidence of water on the moon has been arrested on charges of attempting to pass on classified information to an FBI agent posing as an Israeli intelligence officer.** The US justice department said Stewart David Nozette, 52, was charged with attempting to communicate, deliver and transmit classified information to an individual he believed to be an Israeli intelligence officer. The criminal complaint against Nozette does not allege that Israel's government or anyone acting on its behalf violated US law. In Jerusalem, where the story broke late at night, Israeli government officials had no immediate comment. Nozette, from Maryland, was arrested yesterday by FBI agents. He is expected to appear in federal court in Washington today.

**David Nozette**

**In an affidavit supporting the complaint, Leslie Martell, a FBI agent, said that on 3 September, Nozette received a telephone call from an individual purporting to be an Israeli intelligence officer. The caller was an undercover FBI agent. Nozette agreed to meet**

with the agent later that day at a hotel in Washington. During the meeting the two discussed Nozette's willingness to work for Israeli intelligence. **The scientist allegedly said that he had, in the past, held top security clearances and had access to US satellite information**, the affidavit said. Nozette also was alleged to have said he would be willing to answer questions about this information in exchange for money. **According to the affidavit, the agent explained that the Israeli intelligence agency, Mossad, would arrange for a communication system so Nozette could pass on information in a post office box. Nozette agreed to provide regular, continuing information and asked for an Israeli passport, the government alleged.**

**The affidavit then alleged the following sequence of events:**

- **September 4:** Nozette and the agent met again in the same hotel. The scientist allegedly said that while he no longer had legal access to any classified information at a US government facility, he could, nonetheless, recall classified information by memory. He allegedly asked when he could expect to receive his first settlement funding, saying he preferred cash amounts "under ten thousand" so he didn't have to report it. (Anti-money laundering laws require that all transactions of \$10,000 (Â£6,000) or more must be reported to the US tax authorities). Nozette allegedly told the agent, "Well, I should tell you my first need is that they should figure out how to pay me ... They don't expect me to do this for free."
- **September 10:** Undercover FBI agents left a letter in the designated post office box, asking Nozette to answer a list of questions about US satellite information. The agents provided a \$2,000 cash payment. Serial numbers of the bills were recorded.
- **September 16:** Nozette was captured on videotape leaving a manila envelope in the post office box. The next day, agents retrieved the sealed envelope and found, among other things, a one-page document containing answers to the questions and an encrypted computer thumb drive. One answer contained information, classified as secret that concerned capabilities of a prototype overhead collection system.
- **September 17:** Agents left a second letter in the post office box with another list of questions about US satellite information. The FBI also left a cash payment of \$9,000. Nozette allegedly retrieved the questions and the money the same day.
- **October 1:** Nozette was videotaped leaving a manila envelope in the post office box. FBI agents retrieved it and found a second set of answers. The responses contained information classified as top secret and secret, involving US satellites, early warning systems, means of defense or retaliation against large-scale attack, communications intelligence information, and major elements of defense strategy.

**Nozette had worked in varying jobs for the department of energy, the national aeronautics and space, and in the national space council in the president's office in 1989 and 1990. The scientist developed the Clementine bistatic radar experiment that purportedly discovered water on the south pole of the moon.** He worked from approximately 1990 to 1999 at the department of energy's Lawrence Livermore National Laboratory in California, where he designed highly advanced technology. **At the department of energy, Nozette held a special security clearance equivalent to the defense department top secret and "critical nuclear weapon design information" clearances.** Department of energy clearances apply to access to information specifically relating to atomic or nuclear-related materials. **Nozette also held top offices at the Alliance for Competitive Technology, a nonprofit company that he organized in March 1990. Between January 2000 and February 2006, Nozette, through his company, had several agreements to develop advanced technology for the US government.** He performed some of the research and development at the US Naval Research Laboratory in Washington, the Defense Advanced Research Projects Agency in Arlington, Virginia, and at NASA's Goddard Space Flight Centre in Greenbelt, Maryland.

**March 2010: Four-fifths of the U.S. House and Senate recently declared in correspondence to Secretary of State Hillary Clinton that the U.S. must reaffirm its "unbreakable bond" with Israel.** What persuaded our Congress to proclaim their loyalty to Israel while our military is waging war in the Middle East based on fabricated intelligence? **Any sober assessment of this bond must concede a need to reappraise its cost in blood and treasure. Yet the Congress - our Congress - opposed that reassessment even as our commander-in-chief seeks to end a brutal Israeli occupation of Palestine that has provoked worldwide outrage for more than six decades. The Congress and the president are sworn to the same oath of office. That oath obliges them to protect the U.S. from all threats, both foreign and domestic. The facts confirm a common pro-Israeli source of the phony intelligence that took our military to war in Iraq. All the evidence points to Israel or its surrogates, including those in the Congress. Is that why the Israel lobby pressed the Congress for a pledge of allegiance to Israel?** (Eden, 2010).

**Title/Headline:** *Pennsylvania Homeland Security Employed Israeli Company To Suppress American Political Dissent*

**Abstract:** On the Alex Jones Show yesterday, investigative journalist Wayne Madsen discussed the involvement of a shadowy Israeli company in an effort by Pennsylvania's Homeland Security to spy on activists exercising their First Amendment. On Wednesday, Infowars.com reported that Pennsylvania paid a Philadelphia-based nonprofit \$125,000 to compile a list of activists as part of the state Homeland Security's federally mandated mission to protect public infrastructure. Madsen, citing a story published on late Wednesday by the Philadelphia Citypaper, revealed that the "non-profit" operates not only out of Philadelphia, but Israel as well. Research conducted by Citypaper journalist Isaiah Thompson shows that the company, the Institute of Terrorism Research and Response (ITRR), in fact does not operate under non-profit status, as reported yesterday by the Pittsburgh Tribune-Review. **"Although the group claims nonprofit status on its website and is listed as a nonprofit corporation by the Pennsylvania Department of State, a search on websites Guidestar.org and IRS.gov yielded no indication that the organization enjoys tax-exempt status. An email seeking clarification of the group's nonprofit status was not returned,"** writes Thompson. ITRR's website describes the company as "the

preeminent Israeli/American security firm providing training, intelligence and education to clients across the globe.” ITRR categorizes itself as a “Targeted Action Monitoring Center” that does not function as a “clipping service, but a powerful fusion center of battle-tested operatives, analysts, and researchers who have real-life experience fighting both terrorists and criminal entities [...] distinguished among other agencies by its access to a vast network of on-the-ground key-sources in virtually every region of the world.” For a company boasting specialized counter-terror services, there is virtually no information available on it in the mainstream media. Citypaper’s research turned up a scattering of lackluster ITRR reports published in trade publications, primarily dealing with international terrorism. One report, authored by an intern, details the use of Twitter by “religious, anarchists, anti-government, and anti-globalization” activists who are described as extremists. In addition, ITRR participated in a 2008 Philadelphia “Emergency Preparedness and Prevention and Hazmat Spills Conference” sponsored by the EPA. According to the ITRR website, courses offered by the company “are approved by the Israeli Department of Defense (note: this page has since been removed from the website) and ITRR shares a relationship with the Israel Export & International Cooperation Institute, an organization promoting trade opportunities, joint ventures, and strategic alliances between international businesses and Israeli companies. Interestingly, ITRR also shares a partnership with Philadelphia University. ITRR’s two principals are Aaron Richman, a former Israeli police captain, and Michael Perelman, a former York police commander. The Associated Press yesterday cited an interview conducted in 2007 with Perelman where he admitted ITRR information came from news and internet sites, as well as “on the ground” sources who check on travel routes used by company clients including Harvard University and the United Nations. The ITRR, however, does more than scour the internet and news services and repackaging information for its clients. Pennsylvania Homeland Security director James F. Powers Jr. told the Philadelphia Inquirer in July that ITRR operatives posed in chat rooms as people opposed to last year’s G-20 summit in Pittsburgh and compromised the Pittsburgh Organizing Group, an anarchist organization. “We got the information to the Pittsburgh Police, and they were able to cut them off at the pass,” Powers told Inquirer columnist Daniel Rubin. On Thursday, the scandal widened when Pittsburgh officials refused to comment on the role ITRR played in tracking and disabling activist groups that planned to protest the 2009 G20 summit in their city. Police Chief Nate Harper and Mayor Luke Ravenstahl’s spokeswoman, Joanna Doven, said they could not talk about information provided by ITRR, according to the Pittsburgh Tribune-Review. The evolving scandal reveals how far the state of Pennsylvania and apparently the city of Pittsburgh will go in order to deny citizens their First Amendment right to protest and petition the government and demonize disfavored political groups. ITRR’s connection to Israel also raises the specter that the company is a front for an Israeli intelligence operation and the Israelis gained more than they gave in the relationship with Pennsylvania’s Homeland Security and apparently the city of Pittsburgh. The use of an Israeli company is especially egregious considering the track record of Israel in violating the civil and human rights of the Palestinians and its far reaching global intelligence operations, including the assassination of activists in foreign countries. From dancing Israelis on September 11, 2001, to Israeli spies posing as art students and Israeli intelligence operatives shadowing and presumably handling Mohammad Atta and other supposed hijackers in Florida, there is evidence of Israel spying on Americans and running intelligence operations on U.S. soil. The Lawrence Franklin espionage scandal, otherwise (and more accurately) known as the AIPAC espionage scandal, remains largely unpunished to this day. Lawrence Franklin, a policy analyst under Under Secretary of Defense for Policy Douglas Feith and then-Deputy Secretary of Defense Paul Wolfowitz — both key pro-Israel neocons in the Bush administration — passed on a classified presidential directive and other sensitive documents pertaining to U.S. deliberations on foreign policy regarding Iran to AIPAC and subsequently to the Israeli government. False flag events staged by Israel against the United States are legendary. In fact, the Israeli Mossad admits it uses false flag in most of its operations to cover its tracks. On June 8, 1967, during the Six-Day War, Israel directly attacked a United States Navy technical research ship, the USS Liberty, and killed 34 crew members and wounded 170. The attack was swept under the rug and never appropriately investigated. Less deadly instances of Israeli treachery continue unabated. On September 7, the American-Arab Anti-Discrimination Committee accused Israeli agents of posing as FBI agents in an effort to harass and intimidate Muslims. The ADC called on the Department of Justice, Department of State, and other federal agencies to investigate. “Israel’s undercover operations here, including missions to steal U.S. secrets, are hardly a secret at the FBI, CIA and other U.S. intelligence agencies. From time to time, in fact, the FBI has called Israeli officials on the carpet to complain about a particularly brazen effort to collect classified or other sensitive information, in particular U.S. technical and industrial secrets,” Jeff Stein wrote for the Washington Post on September 2. Stein quotes a CIA official as stating that Israeli intelligence operatives are “all over the place” in the United States (Nimmo, 2010).

**Title/Headline:** *Can America Stop An Israeli 'Nuclear' 9/11?*

**Abstract:** For years, America’s military has been divided, competent military professionals and patriots on one side and Christian Zionists, loyal to Israel and addicted to a propaganda “dreamworld” on the other. Americans sat, on 9/11, with their military “asleep at the switch,” their president in a daze and Secretary of Defense Rumsfeld, perhaps out of confusion, we may never know, talking about airliners being shot down and the Pentagon being attacked by missiles. Yes, he said these things, things he couldn’t “unsay” but things the press showed once and quickly buried. **Something terribly wrong happened, something years in planning, but not planned in a cave in Afghanistan.** Everywhere investigators look, one thing pops up, Israel. **The moment that door is opened, it is slammed shut, often with threats, often with more than threats. We may never know the full extent of the brutality used against those who have spoken up. We know that Arab leaders can be assassinated anywhere, any time. America will remain silent and the news will always**

support Israel. Israel owns the news. What about the “suicided” British scientist Dr. David Kelly, the man responsible for moving the Israeli nukes out of South Africa? Reliable sources tell us he was ready to come forward with the facts about a massive political scandal, a cover-up of lost nuclear weapons, blackmail and bribery. Do we really believe that there are so many unlucky United States senators? Crashes of small aircraft has done more to control the US Senate than any election, control used to set the stage for a generation of wars. With AIPAC capable of buying any election, capable, willing and doing it, not an American organization at all but a lobby for a foreign government, one that likes America “not so much” as we are led to believe, is representative government in the United States dead? When someone swears an oath to protect and defend the Constitution of the United States, is it meaningless when the government itself is no longer “American?” Control of America, or, more appropriately, control of America’s vast military, tired and worn as it is, represents the key to ruling the world. Fooling the people, buying the government and duping America’s military through infiltrating every level of critical decision making and communications is a task, not only attempted but one long since accomplished. Problem is, even with, not only control of the press, but powerful news organizations directly under foreign control like Fox News, word is getting out. The American people are afraid, they see disaster coming. Everyone is waiting to see what city is chosen to be sacrificed. Will it be Phoenix or Sacramento or perhaps Atlanta? This is the real fear, the “not so secret” fear in the heart of every American. When and if it happens, Americans are not so willing to believe a few goatherds in a cave 8,000 miles away planned it, not anymore. Why do you think Senator Lieberman has demanded a “kill switch” on the internet? Why do you think “censorship czar” Cass Sunstein has asked to have accusations of Israeli complicity in 9/11 made a criminal act and openly advocated infiltration of groups pushing for an honest investigation. Who is the real “conspiracy theorist” now? With thousands of of military and intelligence officials, retirees openly, others hiding their rage, aware of the decades of Israeli spying and the 9/11 cover-up, this divide has never been so strong. What we don’t know is how many serving today have the personal courage to speak out openly. Now the threat is nuclear weapons, not just a “shoebox dirty bomb” but full sized nukes, the weapons we have been hunting for years, claiming Saddam was prepared to use them “at 45 minutes notice,” the same nukes “sent to Syria by ambulance.” They could be anywhere and anyone could be ready to use one. There is only one possible culprit capable of doing this, however, only one country with something to gain and the willingness to act. “We have hundreds of nuclear warheads and missiles that can reach different targets in the heart of the European continent, including beyond the borders of Rome, the Italian capital . . . our armed forces, however, are not the thirtieth strongest in the world, but rather the second or third. We have the capability to take the world down with us.” (Israeli military historian, Martin van Creveld) Today, America may be facing the nuclear holocaust Creveld describes and there is no reason to trust that our military, intelligence and law enforcement, the dozens of agencies, bureaus and commands tasked with defending America are willing to do so if the attack comes from Israel. In fact, some leaders, even a former head of the Department of Homeland Security, could be on a list of those that might be one of the America’s greatest terrorist threats. How can perceptions differ so much? If perceptions are based on information and that information is pure propaganda, consistent, continual and skillfully presented, not only in news format but reinforced in movies, television series and anyone publicly questioning the “message” is attacked and destroyed, and they are, perceptions can be assumed to be false. Thus, the general basis for the public’s ideas about who Israel is, what Zionism advocates and what Islam is really about will be unreliable. When you add control of universities, all academic publishing and even total disruption of free speech, the most extreme ideas can be accepted as fact. They have been. A substantial evidentiary trail exists that places Israel’s possible involvement in 9/11 on the table, with dozens of suspects questioned and more and more of the “facts” about 9/11 now proving, as with the Kennedy assassinations, to be lies. Real theories, not “conspiracy,” tell us that 9/11 was planned to get America to attack Iraq, part of Israel’s long term strategy for the region, leaving them, not only the only nuclear power, but an armed aggressor afloat in a sea of broken nations occupied by American troops, troops who take orders from politicians who take orders from Israel. However, after the massive Bush administration blunders in Iraq and Afghanistan and the virtual destruction of a military incapable of sustaining a decade long war, the planned Israeli attack using American troops, again, isn’t moving forward as we all know it was planned to. This time, after America was so badly burned, pushed by the Bush security team, almost all Israeli citizens, many of them still around, running America for Obama, into two insane “Vietnams” it will take more than 3000 murders. With the “duping of America” over 9/11 coming unraveled, something horrendous is in the planning. There is an obvious next step and it has to be nuclear. Anything less would bring an outcry against Israel immediately. Only the “unthinkable” combined with a strong public relations campaign and a cover story with a “do it yourself” terrorist group, like so many of the “just add water” terrorist organizations the Mossad has organized for just such an occasion, will sell the lie, this and the press, not just in America but the other real voice of Israel, the BBC. The stories about the mobile labs, the “yellow cake” uranium were lies, pap fed to a willing and complicit press. However, the threats are real but how does America protect herself when those tasked with that duty turn a blind eye to the biggest threat. In 1967, Israel was allowed to kill or wound 201 of 296 Americans on the USS Liberty. Surviving crewmen are still threatened by Israeli security for speaking up, as Philip Tournay and his wife will gladly tell you. Captain McGonagle, who won the Medal of Honor working to save his crew from hours of brutal attacks, cried out for justice to his dying day. The American military stood silent as it did on 9/11, as it did on that day in 1967 and as it may have done many times since. Those among America’s military in 1967, those willing to send the planes from the carriers America and Saratoga to bomb Egypt on behalf of Israel received the thanks of a grateful nation. Too bad that nation was not the United States of America. Only when Israel informed Washington that it had failed to both sink the USS Liberty and effect a takeover of the ship, killing the entire crew, did Admiral McCain order planes headed toward Egypt to return. It had been previously believed these planes were meant to help the USS Liberty. We have since been reliably informed by sources within the Navy that the planes were armed for ground attack. Thus, as early as 1967, America was willing to see its own troops butchered “for the good of Greater Israel.” Proof of this is incontrovertible and witnesses on both the Liberty and Saratoga have come forward. We will never know for sure, what secrets are stolen, what weapons given, what enemies aided, what American interests betrayed. With dozens of organizations demanding 9/11 be investigated and the lowest estimate of those who no longer believe the cover story at 30 percent, not a single active duty military officer, not one member of congress nor a single member of the mainstream press has said a word about it. How can thousands of prominent Americans demand that their country begin defending itself and it be covered up? Who has that power? America has lost at least six nuclear weapons since 1990, maybe more, not Russia or some “breakaway republic,” once part of the Soviet Union. Three were American hydrogen bombs off Somalia, no longer usable but with enough plutonium in them to build many fission weapons. Three more were part of 9 produced by Israel in South Africa back in the 80s, all supposedly sent to America for dismantling. Three of

the containers were filled with concrete blocks. They had been consigned to “friends of Israel” for shipment and were stolen from an unguarded facility in Oman after having been abandoned for months. This would be a wild claim if we hadn’t interviewed those involved in the project and been made privy to a well-documented and detailed history of the operation. **These “attributable” nukes have only one purpose, to be used in a terrorist attack on the United States, a “false flag” attack, to drive America to attack Iran and Pakistan.** How many loyal Americans, FBI, Homeland Security and other agencies are searching the nation, warehouses, ports, looking for the blue 20 foot shipping containers? **How many “dual citizens” are tasked with some other purpose? Are our “protectors” really “ours” or do they work for the same pack that bought our congress? Will we find out when a mushroom cloud appears over one of our cities?** Today, America is facing the biggest threat since World War 2. Nothing will be in the news, nothing will ever be in the news, not the truth anyway. When it happens, the news will be ready, like on 9/11 when it was called on to talk Arabs and box cutters, a childish conspiracy theory millions still believe. **It was ready to talk weapons of mass destruction and when that turned out to be a lie, it was ready to sit silent for its complicity in war crimes. “War crimes” seems like a harsh term but the definition fits.** Invading Iraq on, not a whim, but a series of lies orchestrated by a criminal conspiracy is a war crime. Less obvious to many, the takeover of Afghanistan as a drug production facility or a base for destabilizing Pakistan or an operation center for gas pipelines, whichever reason you choose, was justified by lies as serious as those used to justify Iraq.

**For those who follow such things, real leaks are proving two things:**

- Osama bin Laden never stopped working for the Central Intelligence Agency and their “regional affiliates.”
- Bin Laden was murdered to silence him after 9/11 just as Benazir Bhutto was murdered to silence her.

**Real news never reaches America, news that shows terrorism, corporate banditry and the biggest drug cartel in history, tied to American allies, some Muslim but one worse than all combined, Israel.** Even today, the mythology of “threatened” Israel and the rockets raining down on their cities, all imagination, is still believed by many in our military. **When 9/11 came, be it radio controlled planes, missiles, controlled demolition, our military was on “stand down,” ordered to let the attacks move forward and then roll across the Middle East, an Army hijacked by Israel to help them start their long planned world conquest.** Today, America basks in defeat and humiliation and Israel laughs. We have continual debates about religion in the military. Should Christian sects be able to force troops to prayer? **Is America a Christian nation, is this what the founding fathers meant? What if, let’s say, these sects were not loyal to the United States but rather constituted a national threat? Is an officer belonging to a Christian Zionist church likely to pass secrets on to Israel? Will they obey orders from the Mossad above their own commanders? Will a Christian Zionist with nuclear access follow his religious calling and cause a nuclear war to bring about Armageddon? What if their power in the military was that great, part of a systematic infiltration of the military through an extremist take-over of the chaplain’s services and eventually admissions and curriculum of the service academies themselves? What else could explain the total silence we have seen when torture, kidnapping, illegal invasions and “stand downs” to allow terrorist attacks are the norm. How many officers have violated the Geneva Convention, their oaths and the Uniform Code of Military Justice because they felt obliged to a “higher power” to exhibit extreme cruelty, cleansing the world of “infidels?”** Those in the military that feel, as Christians, they are tied to Israel, have lost their minds. Islam and Judaism are much closer than Christianity and Judaism. **With the advent of the trinity, both Jews and Muslims see Christians as, not only polytheistic, worshiping 3 gods, not one, but idolaters as well. To both Jews and Muslims, these issues alone are enough to make Christianity an enemy.** Islam, a religion totally based on Judaism, an Abrahamic faith, built on the foundation of the books of Moses, sees itself as a reform movement stressing moral values as outlined in the Koran and the teachings of the prophet, Mohammad (peace be on him). **To a Christian with a real education, the struggle between the Jews and Muslims is a “family matter.”** Jews are the beloved children of Islam who have yet to accept the reforms that defined the true religion. **We must remember, without Judaism and g-d’s covenant with Israel, there would be no Islam. Christianity is seen as a Hellenistic bastardization of biblical teachings watered down to sell to the pagan Roman Empire.** You won’t hear it, not publicly, but it is exactly what is taught to every student, Jew, Muslim -- this is their belief. **Muslims have “jihad” and Jews were chosen by g-d to rule the world. Ninety percent of the most serious accusations each makes of the other are, actually, part of the religion of both, only Jews are much better at public relations. After all, they own 90 percent of the world’s media, print, broadcast, even much of the Internet.** How do we trust military leaders who don’t know that “goyim” means “cattle?” If you are “cattle” and you believe those who see you as such are your best friends, you are not dealing with reality. Perhaps we should teach The Scorpion and the Toad at West Point. This should be the start of the first day’s lecture on America’s Strategic Security in the 21st Century:

The scorpion, in the course of a long journey, encounters a river. The scorpion cannot swim and so he is momentarily stymied until he spies the toad, on the opposite river bank. “Toad!” the scorpion calls out, “will you please let me ride on your back to the other side of the river because, you see, I cannot swim.” “No way,” replied the toad, “if I let you ride on my back you will sting me!” To which the scorpion replied, “But if I am riding on your back and I sting you then we will both die because I cannot swim.” After thinking on it for a moment or two the toad agrees, swims over to the opposite bank of the river where the scorpion jumps onto his back and he turns to swim to the other side. When the toad, with the scorpion riding on his back, gets to the middle of the river, the scorpion stings him. “Scorpion!” Exclaimed the toad, “Why did you sting me? Now we both die.” **“Because it is in my nature.” Was the scorpion’s response.**

**Should we be sick of watching our troops walk through poppy fields, knowing the heroin being produced is destroying the United States, filling our prisons but, at the same time, filling the pockets of, well who? Who is getting a cut of the \$65 billion dollars a year earned from the partnership in Afghanistan? Israel is the money end, the CIA does transportation, the Afghan government runs production, but who does distribution? Do the planes really land on military bases? We have already found bales of cash leaving Afghanistan heading for Dubai. This is only a small part of the money involved. It is this money, combined with the billions we give Israel, the billions they**

take out of the American economy through control of the Federal Reserve System (a quasi-governmental scheme of banks with Rothschild lineage that control America) that makes it impossible to get honest news, elect honest politicians and even trust our own military. In fact, a large majority of Americans openly admit, on every opinion poll, that they don't trust our congress, our president or any American institution. Nobody asks them why. Would they know? **Is it because a foreign country controls our banks, our news, our congress, our military, our foreign policy? Is it because the only reason politics exist in America is so the greedy can line up at the trough, not caring who is pouring the slop, as long as they get theirs first?** No American has a clue where President Obama came from. Many believe he is foreign born, many more think he is Muslim and some believe he is a space alien. **In 250 years, documents will be declassified that will either prove or disprove that former President Bush belonged in prison, not the White House, guilty of not AWOL (absent without leave) but desertion during wartime.** There is no reasonable doubt of his guilt, only that he used his power to prevent arrest and prosecution. After 9/11, no more questions were asked, and no more witnesses had to receive new homes, fat government jobs or have mysterious heart attacks. **For the Bush years, it was made clear that a military career had to be built on loyalty to Israel, even though their nuclear arsenal and their ethnic cleansing of Palestine are the root of every conflict confronting America today. There is no military alliance with Israel. America has no potential enemies. In fact, every nation in the region is either controlled by the United States, occupied or frightened to death.** Iran trying to stand against America is the equivalent of Denmark standing against Hitler's blitzkrieg. The view of the state of affairs taught our military is childishly stupid. **How many of our military leaders are childishly stupid also?** (Duff, 2010).

**Both Adam Gadahn and founder of the MEMRI are Jewish.**

**Title/Headline:** *American Al-Qaeda Spokesman Adam Gadahn Continues Group's Focus On Encouraging Lone Wolf Attacks in West, Calls On Muslims In Detroit, London, And Paris To Carry Out Terror Operations*

**Abstract:** Al-Qaeda's media production company Al-Sahab posted a video featuring American Al-Qaeda operative Adam Gadahn, aka 'Azzam Al-Amriki. The video came out as response to the March 10, 2010 "Mardin: Abode of Peace" conference in Mardin, Turkey, in which a number of Islamic scholars from various countries convened to denounce violent jihad; this was the same conference that was criticized by the radical Yemeni-American cleric in the second issue of Al-Qaeda in the Arabian Peninsula's English-language Inspire magazine. In addition to his comments on the conference, Gadahn devoted much of his talk to calling on Muslims living in the West to carry out attacks in their host countries. **This is another in a series of statements from Al-Qaeda leaders aimed at encouraging "lone wolf" attacks** (MEMRI, 2010).

**Title/Headline:** *Jews In The Media*

**Abstract:** **Jews have made war on their neighbors since their beginnings. In ancient times they were known as destroyers.** Since their expulsion from Jerusalem in 70 AD the Jews have maintained their nation inside other nations but their primary loyalty is always to the Jewish people, to Israel. In many places they have allied themselves with the government and acted as tax collectors in other places, such as Russia, they have been the primary force in the overthrow of the government. **Communism was Jewish in origin and Jews occupied positions of great power throughout European communism. Israel is a religious state that pays the rabbi's salary and grants rights to Jews that are denied to the original inhabitants, the Palestinians. It is a state that began with ethnic cleansing which continues to this day with our tax money of over 3 billion dollars each year providing the financial basis of all its actions.** For the Jews the people are the nation, the people are Israel, the people are the Divine Whole. **The people, Israel, is pure, the "other", the goim, you and me, are impure.** The Jews form an Ethnic Intelligence Apparatus in any nation in which they exist in any numbers to pursue the aims of their people/nation, Israel and to fight against the enemies of Israel. They do this today in America. Do you doubt this Ethnic Intelligence Apparatus? **Turn on your television. Check out the news and shows. Watch Wolf Blitzer turn to Schnecher and Ali Kashvili, all Jews, then there's Mike Wallace and Leslie Stahl, Heraldo Rivera and Barbara Walters. And: William Safire, Alan Colmes, A. M. Rosenthal, Charles Krauthammer, Martin Perez, Daniel Pipes, Dick Morris, Lawrence Kaplan, William Kristol, Robert Kagan, Mortimer Zuckerman, David Gelernter, John Podhoretz, Mona Charen, Morton Kondracke, Sid Zion, Yossi Klein Halevi, Norman Podhoretz, Jonah Goldberg, Jeff Jacoby, Rich Lowry, Seth Lipsky, Irving Kristol, John Fund, Ben Wattenberg, Lawrence Kudlow, Alan Dershowitz, David Horowitz, Jacob Heilbrun, Michael Ledeen, Uri Dan, Thomas Friedman, Richard Cohen, Avishai Margolit, David Remnick, Eric Alterman to name a few** (Wake Up America, 2010).

**Date:** January 16, 2011

**Source:** Infowars, Kurt Nimmo

**Title/Headline:** *Confirmed: Stuxnet Was False Flag Launched By Israel And U.S.*

**Abstract:** On Saturday, the Gray Lady of establishment propaganda, the New York Times, passively admitted that the Stuxnet virus responsible for crippling Iran's nuclear energy program was engineered by Israeli and U.S. intelligence. "Officially, neither American nor Israeli officials will even utter the name of the malicious computer program, much less describe any role in designing it," writes the Times. "But Israeli officials grin widely when asked about its effects." A number of computer scientists, nuclear enrichment experts and former officials, say the covert race to create Stuxnet was a joint project between the Americans and the Israelis, with help from the Germans and the British. The effort to sabotage Iran began during the Bush administration. In early 2009, Bush signed off on an effort to undermine the electrical and computer systems around Natanz, Iran's major enrichment center. Obama was briefed on the plan before he took office. In addition to gumming up Iran's enrichment hardware, the U.S. and Israel have engaged in an assassination campaign aimed at the country's scientists. In November of last year, Iranian president Ahmadinejad accused Israel and the United States of killing a nuclear scientist and wounding another with a pair of bomb attacks. In January of 2009, a senior physics professor was assassinated. In 2007, Iranian state TV reported that nuclear scientist, Ardeshtir Hosseinpour, died from gas poisoning. Israel's Mossad was suspected. During the news conference, Ahmadinejad also admitted to the Stuxnet attack. In November, it was reported that the Stuxnet virus had infected 44,000 computers worldwide. Stuxnet is a double-edged sword. In addition to setting back Iran's nuclear program, the sophisticated malware engineered by the U.S. and Israel at the Dimona complex in the Negev desert has been exploited to push for restrictive cybersecurity measures in the United States. "The very fact that Stuxnet exists shows that we can no longer pretend that a cyber attack on our critical infrastructure is hypothetical and hyperbolic," declared Senate Homeland Security and Governmental Affairs Committee chairman Joe Lieberman in November. "You're talking about a very well-resourced and structured adversary." Lieberman and Susan Collins, the panel's ranking Republican, used Stuxnet to push for their cyber-security bill, entitled The Protecting Cyberspace as a National Asset Act of 2010. The bill would amend the Homeland Security Act of 2002 and extend the already-broad definition of "critical infrastructure" to the internet and would allow Obama to shut down not only entire areas of the internet, but also businesses and industries that fail to comply with government orders following the declaration of a national emergency, thus increasing fears that the legislation will be used as a political tool (Nimmo, 2011).

## The Nuclear Bible: Quotes on Jews, Israel, & Judaism

**Kadmi Cohen (1929):** "The Jews are not a part of a vast Whole which they re-integrate in dying, but they are a Whole in themselves, defying space, time, life, and death. Can God be outside the Whole? If he exists, necessarily he confounds himself with this Whole...Thus Divinity in Judaism is contained in the exaltation of the entity represented by the Race - passionnel entity, eternal flame, it is the Divine essence. It must be preserved and perpetuated, therefore the idea of pure and impure was created."

**The Talmud: Baba Mezia (114b):** "The Jews are called human beings, but the non-Jews are not humans. They are beasts."

**The Talmud: Midrasch Talpioth (fol. 225d):** "God created them [Jews] in the form of men for the glory of Israel. But Akum were created for the sole end of ministering unto them [the Jews] day and night. Nor can they ever be relieved from this service. It is becoming to the son of a king [an Israelite] that animals in their natural form, and animals in the form of human beings should minister unto him."

**David Ben Gurion:** "The image of the world...as traced in my imagination -- the increasing influence of the farmers and workers, and the rising political influence of men of science, may transform the United States into a welfare state with a planned economy. Western and Eastern Europe will become a federation of autonomous states having a socialist and democratic regime. With the exception of the U.S.S.R. as a federated Eurasian state, all other continents will become united in a world alliance, at whose disposal will be an international police force. All armies will be abolished, and there will be no more wars. In Jerusalem, the United Nations (A truly United Nations) will build a shrine of the Prophets to serve the federated union of all continents; this will be the seat of the Supreme Court of mankind, to settle all controversies among the federated continents."

**Samuel Roth: "Jews Must Live":** "What the Jew really wants and expects to achieve through the instrumentality of the Hebrew school is to cultivate in his son the sharp awareness that he is a Jew and that as a racial Jew-apart from all the other races-he is waging an old war against his neighbors."

**Ariel Sharon:** "Every time we do something, you tell me Americans will do this and will do that. I want to tell you something very clear: Don't worry about American pressure on Israel; We the Jewish people control America and the Americans know it."

**Alfred Lilienthal (1978): *The Zionist Connection II* (pp. 218-219):** "The most effective component of Jewish connection is probably that of media control. It is well known that American public opinion molders have long been largely influenced by a handful of powerful newspapers, including the New York Times, the Washington Post, and the St. Louis Post-Dispatch, owned respectively by the Sulzbergers, Meyers, and the Pulitzers (all Jewish families)."

**Babha Kama: Talmud:** "The name of God is not profaned when, for example, a Jew lies to a Goi by saying: 'I gave something to your father, but he is dead; you must return it to me,' as long as the Goi does not know that you are lying."

**Louis D. Brandies, Justice of the Supreme Court of the United States:** "Let us all recognize that we Jews are a distinct nationality of which every Jew, whatever his country, his station, or shade of belief, is necessarily a member."

**Edward Gibbon, Eighteenth-Century English Historian:** "Humanity is shocked at the recital of the horrid cruelties which they committed in the cities of Egypt, of Cyprus, and of Cyrene, where they dwelt in treacherous friendship with the unsuspecting natives; and we are tempted to applaud the severe retaliation which was exercised by the arms of the legions against a race of fanatics, whose dire and credulous superstition seemed to render them the implacable enemies not only of the Roman government, but of human kind."

**F. Trocase, L'Autriche juive, 1898, A. Pierret, ed., Paris; The Secret Powers Behind Revolution, by Vicomte Leon De Poncins, pp. 175-176):** "The Jewish Press of Vienna sold everything, put everything at a price, artistic fame as well as success in business. No intellectual production, no work of art has been able to see the light of day and reach public notice, without passing by the crucible of the Jewish Press, without having to submit to its criticism or to pay for its approval. If an artist should wish to obtain the approbation of the public, he must of necessity bow before the all powerful Jewish journals. If a young actress, a musician, a singer of talent should wish to make her first appearance and to venture before a more or less numerous audience, she has in most cases not dared to do so, unless after paying tribute to the desires of the Jews. Otherwise she would experience certain failure. It was despotic tyranny re-established, this time for the profit of the Jews and brutally exercised by them in all its plenitude. Such as it is revealed by its results, the Viennese Press dominated by Judaism, has been absolutely disastrous. It is a work of death which it has accomplished. Around it and outside it all is void. In all the classes of the population are the germs of hatred, the seeds, of discord and of jealousy, dissolution and decomposition."

**Samuel Roth, Jews Must Live (1934):** "My earliest knowledge of the Jewish attitude towards their gentile neighbors came from listening at our Inn to the stories of Jewish travelers (who stopped with us for a drink or a night's lodging) about their business dealings with the goyim. To my innocent brain it appeared that the whole purpose of a Jew in business was to get the best of the goy. When the goy had been cheated business was good. When the Jew had just come out even, business was very bad indeed. For the greater harm he had done in a business transaction with a goy, the deeper appeared the narrative delight of the Jew to whom I was listening. I could not help feeling towards the goyim some of the pity I had felt for Esau when he let out that bitter cry on discovering the duplicity of Jacob."

**M.A. Levy, Secretary of the World League of Liberal Jews, in a speech in Los Angeles, California (August, 1949):** "Today the Gentile Christians who claim of holy right have been led in the wrong path. We, of the Jewish Faith have tried for centuries to teach the Gentiles a Christ never existed, and that the story of the Virgin and of Christ is, and always has been, a fictitious lie. In the near future, when the Jewish people take over the rule of the United States, legally under our god, we will create a new education system, providing that our god is the only one to follow, and proving that the Christ story is a fake...Christianity will be abolished."

**Bernard Lazare, L'Antisemitism, *The Secret Powers Behind Revolution*, by Vicomte Leon De Poncins (p. 183):** "If this hostility, even aversion, had only been shown towards the Jews at one period and in one country, it would be easy to unravel the limited causes of this anger, but this race has been on the contrary an object of hatred to all the peoples among whom it has established itself. It must be therefore, since the enemies of the Jews belonged to the most diverse races, since they lived in countries very distant from each other, since they were ruled by very different laws, governed by opposite principles, since they had neither the same morals, nor the same customs, since they were animated by unlike dispositions which did not permit them to judge of anything in the same way, it must be therefore that the general cause of anti-Semitism has always resided in Israel itself and not in those who have fought against Israel."

**George Washington, in *Maxims of George Washington* by A.A. Appleton & Co.:** "They {the Jews} work more effectively against us, than the enemy's armies. They are a hundred times more dangerous to our liberties and the great cause we are engaged in...It is much to be lamented that each state, long ago, has not hunted them down as pests to society and the greatest enemies we have to the happiness of America."

**Why the Jews: by Denis Prager and Joseph Telushkin (1985):** "Once we perceive that it is Judaism which is the root cause of anti-Semitism, otherwise irrational or inexplicable aspects of anti-Semitism become rationally explicable...Only something representing a threat to the core values, allegiances and beliefs of others could cause such universal, deep and lasting hatred. This Judaism has done..."

**Jesus Christ:** "By their fruits ye shall know them." (Wake Up America, 2010).

## **The Nuclear Bible: Jewish & Israeli Celebrities**

**Tucson Shooter Jared Lee Loughner**

As one can see by the following article, Jews have been the cause of, or next to major national tragedies such as (JFK, 9/11, War in Iraq, War in Afghanistan), political scandals (Monica Lewinsky, Chandra Levy, Elliot Spitzer), shooting tragedies (Columbine Shooting, Tucson Shooting), celebrity deaths (Michael Jackson, Kurt Cobain, Anna Nicole Smith), TV trial (O.J. Simpson, Scott Peterson, Phil Spector), character assassinations (Tiger Woods, Brett Favre?), vile filth in American media (Howard Stern, Rosanne Bar, Joe Francis of Girls Gone Wild, Jerry Springer), sports commissionerhip (NBA, MLB) and are in every key media position in America. To say that there is a Jewish Conspiracy is an understatement.

"It's not a Jewish conspiracy, Ok. Get over it. I'm sorry. Hook nosed people don't run the world in some kind of cave while they suck the blood out of babies in some weird ritual....I'm sorry, it doesn't work like that...It's people of all races, of all religious backgrounds, of all creeds, of all colors...Give me a break...Please go hang yourself! It is so beyond ridiculous...It's unbelievable...The question is, if you're asking that question, why are you still breathing? I mean, why haven't you just really taken a toaster oven and thrown it in the bathtub with yourself and had a party? Because that's what you need to do!" ~Jason Bermas of Infowars.com

## The Nuclear Bible: US, EU, & Israeli Nuclear Proliferation

Study Estimating Thyroid Doses of I-131 Received by Americans From Nevada Atmospheric Nuclear Bomb Test, National Cancer Institute (1997)

**Intro:** Nuclear proliferation and negligence by nations of the West is continuing even today. The fact that the U.S. Government and the E.U. are even talking about Iran, North Korea, or Pakistan's nuclear ambitions and proliferation is comical and hypocritical in every sense. The United States along with Britain, France, South Africa and Israel have done more to contaminate and radiate more people and environments than all the Middle East Nations combined. The following nuclear incidents are only the incidents that have been declassified to date, but it is highly likely that many accounts of proliferation and negligence are still classified.

**Date:** August 6, 1945 (Super Bowl XLV (45) is on February 6, 2011)

**Source:** Wikipedia

**Title/Headline:** *The Atomic Bombing of Hiroshima*

**Abstract:** The release at 08:15 (Hiroshima time) went as planned, and the gravity bomb known as "Little Boy", a gun-type fission weapon with 60 kilograms (130 lb) of uranium-235, took 43 seconds to fall from the aircraft flying at 31,060 feet (9,470 m) to the predetermined detonation height about 1,900 feet (580 m) above the city. The Enola Gay had traveled 11.5 miles away before it felt the shock waves from the blast. Due to crosswind, it missed the aiming point, the Aioi Bridge, by almost 800 feet (240 m) and detonated directly over Shima Surgical Clinic. It created a blast equivalent to about 13 kilotons of TNT (54 TJ). (The U-235 weapon was considered very inefficient, with only 1.38% of its material fissioning.) The radius of total destruction was about one mile (1.6 km), with resulting fires across 4.4 square miles (11 km<sup>2</sup>). Americans estimated that 4.7 square miles (12 km<sup>2</sup>) of the city were destroyed. Japanese officials determined that 69% of Hiroshima's buildings were destroyed and another 6–7% damaged. **According to the U.S. Department of Energy the immediate effects of the blast killed approximately 70,000 people in Hiroshima. Estimates of total deaths by the end of 1945 from burns, radiation and related disease, the effects of which were aggravated by lack of medical resources, range from 90,000 to 166,000. Some estimates state up to 200,000 had died by 1950, due to cancer and other long-term effects.** Another study states that from 1950 to 1990, roughly 9% of the cancer and leukemia deaths among bomb survivors was due to radiation from the bombs, the statistical excess being estimated to 89 leukemia and 339 solid cancers. At least 11 known prisoners of war died from the bombing. **70,000–80,000 people, or some 30% of the population of Hiroshima were killed immediately, and another 70,000 injured.** Over 90% of the doctors and 93% of the nurses in Hiroshima were killed or injured—most had been in the downtown area which received the greatest damage. Although the U.S. had previously dropped leaflets warning civilians of air raids on 35 Japanese cities, including Hiroshima and Nagasaki, **the residents of Hiroshima were given no notice of the atomic bomb** (Wikipedia, 2010).

**Date:** August 9, 1945

**Source:** Wikipedia

**Title/Headline:** *The Atomic Bombing of Nagasaki*

**Abstract:** On the morning of August 9, 1945, the U.S. B-29 Superfortress Bockscar, flown by the crew of 393rd Squadron commander Major Charles W. Sweeney, carried the nuclear bomb code-named "Fat Man", with Kokura as the primary target and Nagasaki the secondary target. The mission plan for the second attack was nearly identical to that of the Hiroshima mission, with two B-29s flying an hour ahead as weather scouts and two additional B-29s in Sweeney's flight for instrumentation and photographic support of the mission. Sweeney took off with his weapon already armed but with the electrical safety plugs still engaged. At about 07:50

Japanese time, an air raid alert was sounded in Nagasaki, but the "all clear" signal was given at 08:30. **When only two B-29 Superfortresses were sighted at 10:53, the Japanese apparently assumed that the planes were only on reconnaissance and no further alarm was given. A few minutes later at 11:00, The Great Artiste, the support B-29 flown by Captain Frederick C. Bock, dropped instruments attached to three parachutes. These instruments also contained an unsigned letter to Professor Ryokichi Sagane, a nuclear physicist at the University of Tokyo who studied with three of the scientists responsible for the atomic bomb at the University of California, Berkeley, urging him to tell the public about the danger involved with these weapons of mass destruction.** The messages were found by military authorities but not turned over to Sagane until a month later.[63] In 1949, one of the authors of the letter, Luis Alvarez, met with Sagane and signed the document.[64] At 11:01, a last minute break in the clouds over Nagasaki allowed Bockscar's bombardier, Captain Kermit Beahan, to visually sight the target as ordered. The "Fat Man" weapon, containing a core of ~6.4 kg (14.1 lbs.) of plutonium-239, was dropped over the city's industrial valley. It exploded 43 seconds later [11:01:44] at 469 meters (1,540 ft) above the ground exactly halfway between the Mitsubishi Steel and Arms Works in the south and the Mitsubishi-Urakami Ordnance Works (Torpedo Works) in the north. This was nearly 3 kilometers (2 mi) northwest of the planned hypocenter; the blast was confined to the Urakami Valley and a major portion of the city was protected by the intervening hills. The resulting explosion had a blast yield equivalent to 21 kilotons of TNT (88 TJ). **The explosion generated heat estimated at 3,900 degrees Celsius (4,200 K, 7,000 °F) and winds that were estimated at 1005 km/h (624 mph). Casualty estimates for immediate deaths range from 40,000 to 75,000. Total deaths by the end of 1945 may have reached 80,000. At least eight known POWs died from the bombing and as many as 13 POWs may have died: One British Commonwealth citizen died in the bombing.** Seven Dutch POWs (two names known) died in the bombing. At least two POWs reportedly died postwar from cancer thought to have been caused by the atomic bomb. **The U.S. expected to have another atomic bomb ready for use in the third week of August, with three more in September and a further three in October.** On August 10, Major General Leslie Groves, military director of the Manhattan Project, sent a memorandum to General of the Army George Marshall, Army Chief of Staff, in which he wrote that "the next bomb . . should be ready for delivery on the first suitable weather after 17 or August 18." On the same day, Marshall endorsed the memo with the comment, "It is not to be released over Japan without express authority from the President." There was already discussion in the War Department about conserving the bombs in production until Operation Downfall, the projected invasion of Japan, had begun. "The problem now [August 13] is whether or not, assuming the Japanese do not capitulate, to continue dropping them every time one is made and shipped out there or whether to hold them . . . and then pour them all on in a reasonably short time. Not all in one day, but over a short period. And that also takes into consideration the target that we are after. In other words, should we not concentrate on targets that will be of the greatest assistance to an invasion rather than industry, morale, psychology, and the like? Nearer the tactical use rather than other use (Wikipedia, 2010).

**Date:** February 13, 1950

**Source:** Wikipedia

**Location:** British Columbia, Canada

**Proliferator:** United States of America

**Proliferation:** Loss of (1) Mark IV atomic bomb

**Name:** 1950 B-36 Nuclear Incident

**Abstract:** On February 13, 1950, a Convair B-36B, serial number 44-92075 assigned to the 7th Bomb Wing at Carswell Air Force Base, crashed in northern British Columbia after jettisoning a Mark IV atomic bomb. This was the first such nuclear weapon loss in history. **The Convair had been en route from Eielson Air Force Base near Fairbanks, Alaska to Carswell AFB in Fort Worth, Texas, on a mission that included a simulated nuclear attack on San Francisco, California** (Wikipedia, 2010).

**Date:** April 11, 1950

**Source:** Wikipedia

**Location:** Albuquerque, New Mexico, USA

**Proliferator:** United States of America

**Proliferation:** Loss and recovery of nuclear materials

**Name:** B-29 Nuclear Disaster & Cover-up

**Abstract:** Three minutes after departure from Kirtland Air Force Base in Albuquerque a USAF B-29 bomber carrying a nuclear weapon, four spare detonators, and a crew of thirteen crashed into a mountain near Manzano Base. The crash resulted in a fire which the New York Times reported as being visible from 15 miles (24 km) **The bomb's casing was completely demolished and its high explosives ignited upon contact with the plane's burning fuel. However, according to the Department of Defense, the four spare detonators and all nuclear components were recovered.** A nuclear detonation was not possible because, while on board, the weapon's core was not in the weapon for safety reasons. All thirteen crew members died (Wikipedia, 2010).

**Date:** July 13, 1950

**Source:** Wikipedia

**Location:** Lebanon, Ohio, USA

**Proliferator:** United States of America

**Proliferation:** Non-nuclear detonation of an atomic bomb

**Name:** 1950 USAF B-50 Nuclear Incident

**Abstract:** USAF B-50 aircraft on a training mission from Biggs Air Force Base with a nuclear weapon flew into the ground. High explosive detonation, but no nuclear explosion (Wikipedia, 2010).

**Date:** November 10, 1950  
**Source:** Wikipedia  
**Location:** Rivière du Loup, Québec, Canada  
**Proliferator:** United States of America  
**Proliferation:** Non-nuclear detonation of an atomic bomb  
**Name:** *1950 USAF B-50 Nuclear Incident*

**Abstract:** Returning one of several U.S. Mark 4 nuclear bombs secretly deployed in Canada, a USAF B-50 had engine trouble and jettisoned the weapon at 10,500 feet (3,200 m). The crew set the bomb to self-destruct at 2,500 ft (760 m) and dropped over the St. Lawrence River. **The explosion shook area residents and scattered nearly 100 pounds (45 kg) of depleted uranium used in the weapon's tamper. The plutonium core ("pit") was not in the bomb at the time** (Wikipedia, 2010).

**Castle Bravo Nuclear Test, 1954**

**Date:** March 1, 1954  
**Source:** Wikipedia  
**Proliferator:** United States of America  
**Proliferation:** Nuclear test accident  
**Location:** Bikini Atoll, Republic of the Marshall Islands (Trust Territory of the Pacific Islands)  
**Name:** *The Castle Bravo Nuclear Fallout Pattern*

**Abstract:** During the Castle Bravo test of the first deployable hydrogen bomb, a miscalculation resulted in the explosion being over twice as large as predicted, with a total explosive force of 15 megatons of TNT (63 PJ). Of the total yield, 10 Mt (42 PJ) were from fission of the natural uranium tamper, but those fission reactions were quite dirty, producing a large amount of fallout. Combined with the much-larger-than-expected yield and an unanticipated wind shift radioactive fallout was spread eastward onto the inhabited Rongelap and Rongerik Atolls. **These islands were not evacuated before the explosion due to the financial cost involved, but many of the Marshall Islands natives have since suffered from radiation burns and radioactive dusting and also similar fates as the Japanese fisher-men and their children and grand-children have suffered from birth defects and have received little if any compensation from the federal government.** A Japanese fishing boat, Daigo Fukuryu Maru/Lucky Dragon, also came into contact with the fallout, which caused many of the crew to take ill with one fatality. The test resulted in an international uproar and reignited Japanese concerns about radiation, especially with regard to the possible contamination of fish. **Personal accounts of the Rongelap people can be seen in the documentary Children of Armageddon** (Wikipedia, 2010).

**Date:** March 10, 1956  
**Source:** Wikipedia  
**Proliferator:** United States of America  
**Proliferation:** Loss of (2) Nuclear Weapons Capsules  
**Location:** Atlantic Ocean  
**Name:** *The 1956 B-47 Nuclear Disappearance*

**Abstract:** The 1956 B-47 disappearance occurred on March 10 over the Mediterranean Sea. Four B-47 Stratojets took off from MacDill Air Force Base in Florida for a non-stop flight to Ben Guerir Air Base, Morocco and completed their first aerial refueling without incident. After descending through solid cloud to begin their second refueling, at 14,000 ft, the Boeing B-47E-95-BW Stratojet, manned by Captain Robert H. Hodgin (31, commander), Captain Gordon M. Insley (32, observer), and 2nd Lt. Ronald L. Kurtz (22, pilot) failed to make contact with its tanker. **The unarmed aircraft was carrying two capsules of nuclear weapons material in carrying cases (a nuclear detonation was not possible). Despite an extensive search, no debris was ever found, and the crash site has never been located** (Wikipedia, 2010).

**Proliferation:** Loss of two 24-megaton nuclear bombs  
**Name:** *1961 B-52 Nuclear Incident*

**Abstract:** A USAF B-52 bomber caught fire and exploded in midair due to a major leak in a wing fuel cell 12 miles (19 km) north of Seymour Johnson Air Force Base, North Carolina. Five crewmen parachuted to safety, but three died—two in the aircraft and one on landing. The incident released the bomber's two Mark 39 hydrogen bombs. Three of the four arming devices on one of the bombs activated, causing it to carry out many of the steps needed to arm itself, such as the charging of the firing capacitors and, critically, the deployment of a 100-foot (30 m) diameter retardation parachute. The parachute allowed the bomb to hit the ground with little damage. The fourth arming device — the pilot's safe/arm switch — was not activated preventing detonation. The second bomb plunged into a muddy field at around 700 mph (300 m/s) and disintegrated. Its tail was discovered about 20 feet (6 m) down and much of the bomb recovered, including the tritium bottle and the plutonium. However, excavation was abandoned due to uncontrollable ground water flooding. Most of the thermonuclear stage, containing uranium, was left in situ. It is estimated to lie around 55 feet (17 m) below ground. The Air Force purchased the land and fenced it off to prevent its disturbance, and it is tested regularly for contamination, although none has so far been found (Wikipedia, 2010).

**Proliferation:** Destruction, loss and recovery of nuclear bombs

**Name:** Palomares Nuclear Incident

**Abstract:** A USAF B-52 carrying four hydrogen bombs collided with a USAF KC-135 jet tanker during over-ocean in-flight refueling. Four of the B-52's seven crew members parachuted to safety while the remaining three were killed along with all four of the KC-135's crew. The conventional explosives in two of the bombs detonated upon impact with the ground, dispersing plutonium over nearby farms. A third bomb landed intact near Palomares while the fourth fell 12 miles (19 km) off the coast into the Mediterranean sea. The US Navy conducted a three month search involving 12,000 men and successfully recovered the fourth bomb. The U.S. Navy employed the use of the deep-diving research submarine DSV Alvin to aid in the recovery efforts. During the ensuing cleanup, 1,500 tonnes (1,700 short tons) of radioactive soil and tomato plants were shipped to a nuclear dump in Aiken, South Carolina. The U.S. settled claims by 522 Palomares residents for \$600,000. The town also received a \$200,000 desalinization plant. The motion picture Men of Honor (2000), starring Cuba Gooding, Jr., as USN Diver Carl Brashear, and Robert De Niro as USN Diver Billy Sunday, contained an account of the fourth bomb's recovery (Wikipedia, 2010).

**Location:** North Star Bay, Greenland

**Proliferator:** United States Of America

**Proliferation:** Rupture and/or Loss of (4) B28FI Thermonuclear Bombs

**Name:** 1968 Thule Air Base B-52 Crash

**Abstract:** The Thule affair or Thule accident was an accident on January 21, 1968, involving a United States Air Force (USAF) B-52 bomber. The aircraft was carrying four hydrogen bombs on a Cold War "Chrome Dome" alert mission over Baffin Bay when a cabin fire forced the crew to abandon the aircraft before they could carry out an emergency landing at Thule Air Base. Six crew members ejected safely, but one who did not have an ejection seat was killed while trying to bail out. The bomber crashed onto sea ice in North Star Bay, Greenland, causing the nuclear payload to rupture and disperse, which resulted in widespread radioactive contamination. The United States and Denmark launched an intensive clean-up and recovery operation, but the secondary of one of the nuclear weapons could not be accounted for after the operation completed. USAF Strategic Air Command "Chrome Dome" operations were discontinued immediately after the incident, which highlighted the safety and political risks of the missions. Safety procedures were reviewed and more stable explosives were developed for use in nuclear weapons. In 1995, a political scandal resulted in Denmark

after a report revealed the government had given tacit permission for nuclear weapons to be located in Greenland, in contravention of Denmark's 1957 nuclear-free zone policy. Workers involved in the clean-up program have been campaigning for compensation for radiation-related illnesses they experienced in the years after the incident. **In March 2009, *Time* identified the accident as one of the world's worst nuclear disasters** (Wikipedia, 2010).

**Location:** Nevada, USA

**Proliferator:** United States of America

**Proliferation:** Accidental venting of nuclear explosion. Baneberry's radioactive plume rises from a shock fissure. Contaminants were carried in three different directions by the wind

**Name:** *1970 Baneberry Nuclear Disaster*

**Abstract:** In Area 8 on Yucca Flat, the 10 kiloton "Baneberry" weapons test of Operation Emery detonated as planned at the bottom of a sealed vertical shaft 900 feet below the Earth's surface but the device's energy cracked the soil in unexpected ways, causing a fissure near ground zero and the failure of the shaft stemming and cap. A plume of hot gases and radioactive dust was released three and a half minutes after ignition, and continuing for many hours, raining fallout on workers within NTS. Six percent of the explosion's radioactive products were vented. The plume released 6.7 MCi of radioactive material, including 80 kCi of Iodine-131 and a high ratio of noble gases. After dropping a portion of its load in the area, the hot cloud's lighter particles were carried to three altitudes and conveyed by winter storms and the jet stream to be deposited heavily as radionuclide-laden snow in Lassen and Sierra counties in northeast California, and to lesser degrees in northern Nevada, southern Idaho and some eastern sections of Oregon and Washington states. The three diverging jet stream layers conducted radionuclides across the US to Canada, the Gulf of Mexico and the Atlantic Ocean (Wikipedia, 2010).

**Date:** May 24, 2010  
**Source:** Fox News, Associated Press  
**Title/Headline:** *Israeli President Denies Newspaper Report He Offered South Africa Nuclear Warheads In 1975*

**Abstract:** Israeli President Shimon Peres on Monday categorically denied a report that he offered nuclear warheads to South Africa in 1975, when he was defense minister. The report published in the British newspaper The Guardian is based on an American academic's research and claims to cite secret minutes of a meeting Peres held with senior South African officials. Peres said Israel never negotiated the transfer of nuclear weapons to South Africa. "There exists no basis in reality for the claims published this morning by The Guardian that in 1975 Israel negotiated with South Africa the exchange of nuclear weapons," the president said in an English-language statement. "Unfortunately, **The Guardian elected to write its piece based on the selective interpretation of South African documents and not on concrete facts.**" The article is based on a series of documents the South African government declassified in response to a request from American academic Sasha Polakow-Suransky, who is writing a book called "The Unspoken Alliance" about the close relationship between the Israel and South Africa. Appearing alongside the article, the partially censored documents show a formal request from the South Africans for nuclear-capable warheads, and minutes of meetings in which then-Defense Minister Peres listed weapons available for sale. But they do not appear to confirm any transfer of weapons, or any explicit offer from the Israelis to sell nuclear materials or nuclear-capable weapons to the South Africans. **The documents accompanying the story do show Peres' signature on minutes from a meeting where the then-defense minister discussed payloads available in "three sizes,"** one of several phrases that Peres said The Guardian misconstrued. In response to the article, the South African government said it has dismantled all its nuclear weapons but did not relate to the 1975 claim. The British paper did not call the Israeli government for a response to the article, Peres said, adding that his office "intends to send a harsh letter to the editor of The Guardian and demands the publication of the true facts." **The Guardian claims the documents offer the first documentary evidence of Israel's nuclear program. In 1986, another British newspaper, the Sunday Times, published pictures and descriptions from a former technician at Israel's main nuclear reactor, leading experts to estimate that Israel had the world's sixth-largest nuclear arsenal.** According to its policy, Israel has never acknowledged or denied possessing nuclear weapons, though it is widely assumed to have them (Fox News, 2010).

**Proliferation:** Illegal burn of radioactive material

**Name:** 1994 Rocky Flats Nuclear Incident

**Abstract:** Two scientists, Otto K. Heiney, 52, of Chatsworth and Larry A. Pugh, 51, of Thousand Oaks, were killed when the chemicals they were illegally burning in open pits exploded. After a grand jury investigation and FBI raid on the facility, three Rocketdyne officials pleaded guilty in June 2004 to illegally storing explosive materials. The jury deadlocked on the more serious charges related to illegal burning of hazardous waste. At trial, a retired Rocketdyne mechanic testified as to what he witnessed at the time of the explosion: "I assumed we were burning waste," Wells testified, comparing the process used on July 21 and 26, 1994, to that once used to legally dispose of leftover chemicals at the company's old burn pit. As Heiney poured the chemicals for what would have been the third burn of the day, the blast occurred, Wells said. "[The background noise] was so loud I didn't hear anything ... I felt the blast and I looked down and my shirt was coming apart." When he realized what had occurred, Wells said, "I felt to see if I was all there ... I knew I was burned but I didn't know how bad (Wikipedia, 2010).

**Date:** January 8, 2001

**Source:** BBC, Alex Kirby

**Title/Headline:** Israel Denies Depleted Uranium Use

**Abstract:** As debate intensifies in Europe over the risks of depleted uranium (DU) weapons, Israel has insisted that it is not using them. It has rejected an allegation by a Palestinian minister that its forces are firing them in the current wave of violence. Israel is known to possess DU munitions, and a reluctance to use them now could indicate an awareness of the risks involved. And even some critics say it would gain nothing from resorting to DU weapons. A Ramallah newspaper, al-Hayat al-Jadidah, accused the Israelis on 19 December of using DU. It said the Palestinian Interior Minister, Dr Yusuf Abu-Safieh, had "confirmed that the occupation authorities have started using radioactive uranium ammunition to suppress the intifada". The minister said the Palestinian President, Yasser Arafat, was assembling a committee "to examine the situation". But the Israeli Embassy in London told BBC News Online the report was completely without foundation, and the Israel Defense Forces (IDF) were not using DU. It did not say why the IDF were not using DU munitions, nor whether they might do so in the future. Last November the independent Palestinian Human Rights Monitoring Group (PHRMG) asked the IDF about reports that Israeli helicopters had been using DU ammunition throughout the West Bank and Gaza Strip. An IDF spokesman said no such ammunition had been used. The same month a US group, the International Action Center (IAC), called for an inquiry into what it said was Israel's use of DU weapons. IAC members say they picked up shell casings and metal fragments around Nablus and Ramallah which they believe contained DU. But the debris was confiscated from them as they were leaving Israel, so they were unable to test it for radioactivity. More than 350 people have been killed in the last three months in the violence between Palestinians and Israelis. Most of those who died have been Palestinians. Depleted uranium is a heavy substance, 1.7 times as dense as lead, and used in armour-piercing munitions. Many veterans of the Gulf War believe it is implicated in a range of medical problems they are suffering from, known collectively as Gulf War Syndrome. And members of the armed forces of several European countries who served in Bosnia and Kosovo now say they believe DU may have made them ill. Because of its ability to punch through armour, DU is prized as a highly effective anti-tank weapon. In its natural state, it is only mildly radioactive. On impact with a solid object it turns into a burning vapour. The US Defense Department and the UK Ministry of Defence accept that the resulting

dust can be dangerous, and say troops entering vehicles hit by DU weapons need to take precautions. But they say the dust soon ceases to be a significant problem, and is unlikely to move far from the site of the explosion, though independent authors have found it can be blown many miles. **The US and UK military authorities say any risk from DU comes from its toxicity as a heavy metal, and that its radioactivity is negligible** (Kirby, 2001).

THE  
INDEPENDENT

**Date:** October 28, 2006

**Source:** The Independent, Robert Fisk

**Title/Headline:** *Mystery Of Israel's Secret Uranium Bomb*

**Abstract:** Did Israel use a secret new uranium-based weapon in southern Lebanon this summer in the 34-day assault that cost more than 1,300 Lebanese lives, most of them civilians? We know that the Israelis used American "bunker-buster" bombs on Hizbollah's Beirut headquarters. We know that they drenched southern Lebanon with cluster bombs in the last 72 hours of the war, leaving tens of thousands of bomblets which are still killing Lebanese civilians every week. And we now know - after it first categorically denied using such munitions - that the Israeli army also used phosphorous bombs, weapons which are supposed to be restricted under the third protocol of the Geneva Conventions, which neither Israel nor the United States have signed. But scientific evidence gathered from at least two bomb craters in Khiam and At-Tiri, the scene of fierce fighting between Hizbollah guerrillas and Israeli troops last July and August, suggests that uranium-based munitions may now also be included in Israel's weapons inventory - and were used against targets in Lebanon. According to Dr Chris Busby, the British Scientific Secretary of the European Committee on Radiation Risk, two soil samples thrown up by Israeli heavy or guided bombs showed "elevated radiation signatures". Both have been forwarded for further examination to the Harwell laboratory in Oxfordshire for mass spectrometry - used by the Ministry of Defence - which has confirmed the concentration of uranium isotopes in the samples. Dr Busby's initial report states that there are two possible reasons for the contamination. "The first is that the weapon was some novel small experimental nuclear fission device or other experimental weapon (eg, a thermobaric weapon) based on the high temperature of a uranium oxidation flash ... The second is that the weapon was a bunker-busting conventional uranium penetrator weapon employing enriched uranium rather than depleted uranium." A photograph of the explosion of the first bomb shows large clouds of black smoke that might result from burning uranium. Enriched uranium is produced from natural uranium ore and is used as fuel for nuclear reactors. A waste product of the enrichment process is depleted uranium, it is an extremely hard metal used in anti-tank missiles for penetrating armour. Depleted uranium is less radioactive than natural uranium, which is less radioactive than enriched uranium. Israel has a poor reputation for telling the truth about its use of weapons in Lebanon. In 1982, it denied using phosphorous munitions on civilian areas - until journalists discovered dying and dead civilians whose wounds caught fire when exposed to air. I saw two dead babies who, when taken from a mortuary drawer in West Beirut during the Israeli siege of the city, suddenly burst back into flames. Israel officially denied using phosphorous again in Lebanon during the summer - except for "marking" targets - even after civilians were photographed in Lebanese hospitals with burn wounds consistent with phosphorous munitions. Then on Sunday, Israel suddenly admitted that it had not been telling the truth. Jacob Edery, the Israeli minister in charge of government-parliament relations, confirmed that phosphorous shells were used in direct attacks against Hizbollah, adding that "according to international law, the use of phosphorous munitions is authorised and the (Israeli) army keeps to the rules of international norms". Asked by The Independent if the Israeli army had been using uranium-based munitions in Lebanon this summer, Mark Regev, the Israeli Foreign Ministry spokesman, said: "Israel does not use any weaponry which is not authorised by international law or international conventions." This, however, begs more questions than it answers. Much international law does not cover modern uranium weapons because they were not invented when humanitarian rules such as the Geneva Conventions were drawn up and because Western governments still refuse to believe that their use can cause long-term damage to the health of thousands of civilians living in the area of the explosions. American and British forces used hundreds of tons of depleted uranium (DU) shells in Iraq in 1991 - their hardened penetrator warheads manufactured from the waste products of the nuclear industry - and five years later, a plague of cancers emerged across the south of Iraq. Initial US military assessments warned of grave consequences for public health if such weapons were used against armoured vehicles. But the US administration and the British government later went out of their way to belittle these claims. Yet the cancers continued to spread amid reports that civilians in Bosnia - where DU was also used by Nato aircraft - were suffering new forms of cancer. DU shells were again used in the 2003 Anglo-American invasion of Iraq but it is too early to register any health effects. "When a uranium penetrator hits a hard target, the particles of the explosion are very long-lived in the environment," Dr Busby said yesterday. "They spread over long distances. They can be inhaled into the lungs. The military really seem to believe that this stuff is not as dangerous as it is." Yet why would Israel use such a weapon when its targets - in the case of Khiam, for example - were only two miles from the Israeli border? The dust ignited by DU munitions can be blown across international borders, just as the chlorine gas used in attacks by both sides in the First World War often blew back on its perpetrators. Chris Bellamy, the professor of military science and doctrine at Cranfield University, who has reviewed the Busby report, said: "At worst it's some sort of experimental weapon with an enriched uranium component the purpose of which we don't yet know. At best - if you can say that - it shows a remarkably cavalier attitude to the use of nuclear waste products." The soil sample from Khiam - site of a notorious torture prison when Israel occupied southern Lebanon between 1978 and 2000, and a frontline Hizbollah stronghold in the summer war - was a piece of impacted red earth from an explosion; the isotope ratio was 108, indicative of the presence of enriched uranium. "The health effects on local civilian populations following the use of large uranium penetrators and the large amounts of respirable uranium oxide particles in the atmosphere," the Busby report says, "are likely to be significant ... we recommend that the area is examined for further traces of these weapons with a view to clean up." This

summer's Lebanon war began after Hizbollah guerrillas crossed the Lebanese frontier into Israel, captured two Israeli soldiers and killed three others, prompting Israel to unleash a massive bombardment of Lebanon's villages, cities, bridges and civilian infrastructure. **Human rights groups have said that Israel committed war crimes when it attacked civilians, but that Hizbollah was also guilty of such crimes because it fired missiles into Israel which were also filled with ball-bearings, turning their rockets into primitive one-time-only cluster bombs.** Many Lebanese, however, long ago concluded that the latest Lebanon war was a weapons testing ground for the Americans and Iranians, who respectively supply Israel and Hizbollah with munitions. Just as Israel used hitherto-unproven US missiles in its attacks, so the Iranians were able to test-fire a rocket which hit an Israeli corvette off the Lebanese coast, killing four Israeli sailors and almost sinking the vessel after it suffered a 15-hour on-board fire. **What the weapons manufacturers make of the latest scientific findings of potential uranium weapons use in southern Lebanon is not yet known. Nor is their effect on civilians** (Fisk, 2008).

**Proliferation:** Nuclear Site Breached

**Location:** Pelindaba, South Africa

**Name:** 2007 South African Nuclear Site Incidents

**Date:** December 20, 2007

**Source:** Washington Post, Micah Zenko

**Title/Headline:** *A Nuclear Site Is Breached: South African Attack Should Sound Alarms*

**Abstract:** An underreported attack on a South African nuclear facility demonstrates the high risk of theft of nuclear materials by terrorists or criminals. Such a crime could have grave national security implications for the United States or any of the dozens of countries where nuclear materials are held in various states of security. **Shortly after midnight on Nov. 8, four armed men broke into the Pelindaba nuclear facility 18 miles west of Pretoria, a site where hundreds of kilograms of weapons-grade uranium are stored.** According to the South African Nuclear Energy Corp., the state-owned entity that runs the Pelindaba facility, these four "technically sophisticated criminals" deactivated several layers of security, including a 10,000-volt electrical fence, suggesting insider knowledge of the system. Though their images were captured on closed-circuit television, they were not detected by security officers because nobody was monitoring the cameras at the time. So, **undetected, the four men spent 45 minutes inside one of South Africa's most heavily guarded "national key points" -- defined by the government as "any place or area that is so important that its loss, damage, disruption or immobilization may prejudice the Republic."** Eventually, the attackers broke into the emergency control center in the middle of the facility, stole a computer (which was ultimately left behind) and breached an electronically sealed control room. After a brief struggle, they shot Anton Gerber, an off-duty emergency services officer. Gerber later explained that he was hanging around because he believed (reasonably, in retrospect) that his fiancée -- a site supervisor -- was not safe at work. Although badly injured, Gerber triggered the alarm, setting off sirens and lights and alerting police stationed a few miles away. **Nevertheless, the four escaped, leaving the facility the same way they broke in.** Amazingly, at the same time those four men entered Pelindaba from its eastern perimeter, a separate group of intruders failed in an attempt to break in from the west. **The timing suggests a coordinated attack against a facility that contains an estimated 25 bombs' worth of weapons-grade nuclear material.** On Nov. 16, local police arrested three suspects, ranging in age from 17 to 28, in connection with this incident. In response to the successful attack, the South African Nuclear Energy Corp. suspended six Pelindaba security personnel, including the general manager of security, and promised an "internal investigation which will cover culpability, negligence and improvements of Security Systems." It should be noted that Pelindaba's security was considered to have been upgraded after a break-in there two years ago (one individual was detained shortly after breaching the security fence). It is still unclear why the two groups of intruders sought to break into this particular facility. More important, however, is that **had the armed attackers succeeded in penetrating the site's highly enriched uranium storage vault, where the weapons-grade nuclear material is believed to be held, they could have carried away the ingredients for the world's first terrorist nuclear bomb.** As this incident shows, nuclear terrorism is a global issue, extending far beyond the familiar policy talking points of U.S. cooperation with Russia over its nuclear stockpiles, the security of Pakistan's nuclear arsenal in the face of threats from Islamic extremists, and concerns that if Iran acquires nuclear capabilities it could provide a bomb to sympathetic terrorist organizations (Zenko, 2007).

**Title/Headline:** *Israel Using Depleted Uranium Against Gaza Victims*

**Abstract:** Medics have found traces of depleted uranium in victims of Israel's brutal attack on Gaza, according to a Press TV report, meaning the ultimate death toll could be far higher as future generations are plagued by cancers and birth defects. "Norwegian medics told Press TV correspondent Akram al-Sattari that some of the victims who have been wounded since Israel began its attacks on the Gaza Strip on December 27 have traces of depleted uranium in their bodies," states the article. Following the conclusion of the first Gulf War in 1991, in which depleted uranium was used by U.S. forces, cancers and birth defects in Iraq soared and many veterans organizations agree that the weapon was responsible for the emergence of Gulf War Syndrome that has plagued hundreds of thousands of Gulf War veterans. **Depleted uranium shell holes at the infamous Highway of Death in Iraq showed measurements 1,000 times more radioactive than background radiation.** The residue of a DU weapon can be spread by the wind and infect humans not in the immediate area as well as the entire food chain. In 1999, the UN called for the use of depleted uranium to be banned worldwide but efforts to downplay its effects led by the Pentagon have blocked such a ban. Former head of the Pentagon's 1994 U.S. Army Depleted Uranium Project Maj. Doug Rokke has faced constant harassment, including murder attempts, after going public in 1997 to expose the health effects from depleted uranium that the U.S. government and the World Health Organization

have consistently dismissed. **Israel's use of depleted uranium against victims of the Gaza bombing campaign provides further evidence that war crimes are being committed with the tacit approval of both the current administration as well as president elect Barack Obama** (Watson, 2008).

**Proliferation:** Unguarded Secret Shipments of Weapons-Ready Plutonium

**Location:** Cumbria, England en route to Cap la Hague, France

**Name:** *Secret British Plutonium Shipments Exposed By France*

**Date:** July 27, 2008

**Source:** The Independent, Geoffrey Lean

**Title/Headline:** *Ferry Shipments Of 'Terror-Threat' Plutonium End*

**Abstract:** **Top-secret shipments of weapons-ready plutonium through British waters have been stopped, after their exposure by The Independent.** The Department for Transport (DFT) said that it had taken "regulatory action" to prohibit the shipments from Sellafield to Normandy on an unarmed old roll-on, roll-off ferry, with few safety or security features. The prohibition, the first of its kind, was imposed after complaints by the French nuclear safety authorities. **The shipments – denounced by nuclear weapons experts as "madness" and "totally irresponsible" – were carrying hundreds of kilograms of plutonium-dioxide powder, described as the ideal material for terrorists seeking to create a nuclear explosion or make a dirty bomb. Only 10kg of the plutonium, experts claim, would be needed to make a terrorist atomic weapon.** John Large, an independent nuclear expert, called it **"the most dangerous and worst possible material you could ship"**. The first shipment – in the converted ferry Atlantic Osprey – was about to leave Cumbria for a French nuclear complex at Cap la Hague in March, when the plan was exposed in The Independent. Peter Ainsworth, the Conservative environment spokesman, and Steve Webb, his Lib-Dem counterpart, **condemned the shipment as a threat to national security and it was delayed for two months, finally taking place secretly on 21 May.** The DFT refused to explain why it had acted, apart from saying that **"the company failed to abide by the terms of its certificate of approval"**. Sellafield Ltd has said it is appealing against the decision. It said: "We take this matter very seriously", adding: "We are unable to comment any further." Mr Baker, the Lib-Dem transport spokesman, said: **"The Government was very lax in allowing this material to be shipped on such an unsuitable vessel"** (Lean, 2008).

**Title/Headline:** *Depleted Uranium Is Destroying Life*

**Abstract:** I have long heard sound-bites or seen passages about depleted uranium that sounded more than dire. But given my own cognitive dissonance, and the fact that I was writing about many other dire topics at the time, I filed depleted uranium in my cranium for future investigation, which, given the human aversion to bad news, could have been never. But never was over in an exchange of emails about nuclear missiles in Israel's arsenal. I received some startling nuclear information from San Francisco Bay View writer, Bob Nichols. It was an illumination long-time coming. I started at the end of Bob's article to find out who he was. His credits read "Bob Nichols is a Project Censored Award winning writer and a San Francisco Bay View correspondent. A former bomb maker in a U.S. government factory in rural Oklahoma, he reports on the two nuclear weapons labs in the Bay Area. He can be reached at duweapons@gmail.com." His credentials were impressive and so was the article he sent, PTSD, infertility and other consequences of war. In several, follow-up phone calls, Bob, in his gentle, mid-western drawl, filled me in on **the picture of the imposing disasters caused by depleted uranium in Central Asia and in the Mid-East, in which hundreds of thousands of tons of depleted uranium had been dropped in the past 20 years.** Bob pointed out that San Francisco itself was receiving fallout from the Berkeley National [Nuclear Weapons] Lab, and from the Livermore Laboratory in the South Bay area, managed by San Francisco-based Bechtel, a nuclear-capable corporation, boosted by San Francisco's "Nuclear Nancy" Pelosi and her friends at Bechtel" as Bob commented. The University of California at Berkeley now earns more from weapons than from students. The San Francisco facilities have been part of the Manhattan Project, operating from pre-1945, contributing a dangerous amount of radiation to the area with weapons testing and leakages of material into the Bay. It was for this reason, Nichols told me, that he still lives in Oklahoma, though he has a real love affair with San Francisco. Yet he fears for its human and natural safety due to poisoning by the nuclear projects. In fact, he bemoaned the occasion of "Fleet Week," "the happy boys sent off to war by Mayor Gavin Newsom's Fleet Week – an event responsible for a big chunk of the enlistments in the US Navy and marines – who will probably come in deadly contact with another Bay Area product: depleted uranium, aka DU, and weaponized ceramic uranium oxide gas and aerosols, UO." As he wrote, **"Iraq and virtually all the rest of the Middle East and Central Asia have been continually dosed for almost 20 years with thousands of tons of weaponized ceramic uranium oxide gas, also known as depleted uranium. "When used as directed, the depleted uranium bullets, shells and bombs become a lethal uranium gas or aerosol. The poison uranium oxide gas aerosols last for billions of years and never stop indiscriminately maiming and killing, which is a war crime in itself."** That was shocking to hear. So I did a bit of research to corroborate Bob's claims and came upon a number of YouTube pieces, one particularly powerful ten-minute piece called Depleted Uranium – The Ultimate Dirty Bomb. It features Dr. Doug Rokke, US Army Health Physicist and Nuclear Medicine Sciences Officer, as well as the internationally known Geological Scientist and International Radiation Expert Leuren Moret. Please take ten minutes to listen to it. **Dr. Rokke explains that as far back as 1973 [the Yom Kippur War], radioactive materials carpeted Kuwait, Saudi Arabia, and Iraq.** He mentions too that DU radioactive contamination makes food and water unusable. He explains how the huge jolts of electrical energy in a small amount of depleted uranium can destroy human cells. **Most notably, Dr. Rooke estimates that from October/November 1991 in Gulf War 1, 160,000 US soldiers were permanently disabled by US use of some 340 tons of depleted uranium. Ten years later that number had climbed to 221,000 and left 10,000 dead.** Dr. Rooke, a victim himself of the lack of proper

post-battle examinations for DU poisoning, spoke with a tempered but deliberate anger and frustration at the damage done to all, including civilian populations, combatants, and himself. **Lauren Moret pointed out that as far back as 1943 depleted uranium usage, aka "poison gas warfare" was encouraged in a government memo shown on screen. She also tells us that the UN Human Rights Commission declared depleted uranium as illegal. The ultimate irony she points out is that in 2003 we attacked Iraq and Saddam Hussein for possessing Weapons of Mass Destruction, which turned out not to be true. Yet when we attacked Iraq in 2003, we dropped between 1000 to 2000 tons of depleted uranium, a known Weapon of Mass Nuclear Destruction in a three-week period. This is a war crime unto itself. This all jibed with Bob Nichol's writings, especially the fact that the damage of depleted uranium is forever, lasting billions of years in the atmosphere, the earth and water, as it lasts on clothing, the skin, the human body, destroying vital organs, causing birth defects of all kinds, cancers, infertility, damage to the bones, brains, testicles and ovaries, which applies to civilians and animals as well. As Nichols writes, "Uranium munitions, containing weaponized uranium oxide gas and aerosols, are used by presidential order in US war zones. Privates and corporals do not decide to use these poisonous uranium gas weapons on their own. No, that order comes from the American president." "Uranium oxide gas weapons are called 'genocidal weapons.' They maim and kill millions of people, their animals and their land. The actual targets by the US Expeditionary Forces are the populations of Central Asia and the Middle East, about a billion people."** Remember that US forces themselves are the victims as well of these weapons, the worst imaginable blowback. In fact, Nichols points us towards a "Middle Eastern country that requires all 18-year olds to join national service for several years. This country even has a roughly comparable health care system to America for a population of 7,233,701, according to the CIA World Factbook. This country is Israel." Bob sent along an article from the noted Israeli paper, Haaretz, dated 3/21/2010: Study: **Quality of Israeli sperm down 40% in past decade. Bob claimed the number was fudged somewhat because from 2004-2008 there was a 10 million sperm a year drop-off. Taken to 2015, all of the nation would be infertile.** The motility of the tested sperm also indicated a drop-off. These samples were taken from healthy young people who do not smoke. "In Israel, too," Haaretz writes, a study was published about a year ago, showing an increase of about 30 percent in defects in the male reproductive system. In addition, in the past decade, the number of cases of testicular cancer has doubled." Haaretz goes on to attribute the sperm drop to "chemicals in the ground and in drinking water...as impacting hormone levels and secondary sexual characteristics." The paragraph concludes with **"Studies published in Britain have highlighted a clear connection between continual decline in sperm counts and chemicals in the environment."** In the next to last paragraph of Bob Nichols' article, he writes of the Israeli situation, **"Since 20 percent live sperm is considered to be the beginning of infertility, Israel will be sterile in less than 10 years at this rate of decline. The estimated 7 million Israeli Jews will have no more children after that.** This catastrophic development has already occasioned legislative hearings in Israel's Knesset... Israeli sperm concentration is just an example of what is happening to human sperm all over the Middle East and Central Asia, by the choice and force of will of successive US presidents." **The 800-pound gorilla in the room here is that young people tested (both men and women) are performing in the Israeli Defense Forces, and face massive amounts of depleted uranium in the US manufactured weaponry being used in the ongoing conflict with the Palestinians. The land, animals, and those involved in the conflict on both sides must be, by definition, poisoned by these toxic weapons of nuclear destruction.** That's the real story. The Israelis have performed a service in a way just by conducting a bona fide scientific analysis of the situation. In nearby Iraq, three-headed babies are turning up and a virtual Pandora's Box of birth defects that you can see here. Caution: these are not pretty pictures, but they are true pictures of what the future could be as the present. Again, please read the entire Haaretz article and view the YouTube piece. Or check the more conservative Wikipedia for the 38-page article (which includes 13 pages of footnotes) linked here on Depleted Uranium. You can verify the information presented above and find more information as well. **In fact, the first DU, which uses radioactive isotope-238 was "manufactured in the 1940's when the US and USSR began their nuclear weapons and nuclear power programs."** P.S. Depleted uranium bombs were also used on Serbia in the Bosnian War by President Clinton. **The total world inventory of depleted uranium stands at 1,188,273 tonnes as of 2002. That is enough to wipe out life on the planet for billions of years. The United States leads the pack with 480,000 tonnes; Russia closely follow with 460,000 million tonnes; France, 190,000 tonnes; United Kingdom, 30,000 tonnes, etcetera. As to the Legal Status of DU, Wiki reports, "In 1996 the International Court of Justice (ICJ) gave an advisory opinion on the 'legality of the threat or use of nuclear weapons'. [29] This made it clear, in paragraphs 54, 55 and 56, that international law on poisonous weapons—the Second Hague Declaration of 29 July 1899, Hague Convention IV of 18 October 1907 and the Geneva Protocol of 17 June 1925—did not cover nuclear weapons, because their prime or exclusive use was not to poison or asphyxiate. This ICJ opinion was about nuclear weapons, but the sentence 'The terms have been understood, in the practice of States, in their ordinary sense as covering weapons whose prime, or even exclusive, effect is to poison or asphyxiate,' also removes depleted uranium weaponry from coverage by the same treaties as their primary use is not to poison or asphyxiate, but to destroy material and kill soldiers through kinetic energy" (Mazza, 2010).**

**Title/Headline:** *IAEA To Focus On Israeli Nukes In June*

**Abstract:** "The International Atomic Energy Agency (IAEA) will discuss Israel - the owner of Middle East's sole atomic arsenal -- and its nuclear activities. The IAEA is allowed to refer nuclear proliferation concerns to the UN Security Council. The issue, which has always eluded IAEA's agenda with the help of the United States, has been included in the list of items to be brought up at the agency's gathering on June 7, the Associated Press reported. **The matter is to be discussed under the subject of Israel's "nuclear capabilities" at the request of the body's 18 Arab members. The organization has avoided the issue since its inception and for more than half a century amid Israel's insistence on maintaining a policy of nuclear "ambiguity," under which the regime neither confirms nor denies having nuclear weapons.** Tel Aviv has repeatedly brushed aside international calls for joining the Nuclear Non-Proliferation Treaty (NPT). **Since 1958, when Israel began building the Dimona plutonium and uranium processing facility, it has allegedly manufactured scores of nuclear warheads, earning reputation as the sole owner of such weapons in the Middle East.** Former US President Jimmy Carter has attested to the existence of the arsenal, which he said includes between 200 to 300 warheads. According to AP, the June meeting's agenda could change, should Washington and other Israeli allies raise strong objections to the measure" (Press TV, 2010).

**Title/Headline:** *Iran Haze Contains Depleted Uranium*

**Abstract:** An Iranian lawmaker says the haze that arrives in Iran from Iraq is polluted with depleted uranium due to the U.S. military's use of the prohibited weapon in the neighboring country. MP Mohammad-Mehdi Shahriari called for urgent measures to prevent the diffusion of the Iraqi haze over Iran. "This is not an issue that can be easily neglected," said Shahriari, who is a member of the Majlis National Security and Foreign Policy Committee. "Everyone knows that the United States has used depleted uranium during the occupation of Iraq, and this has contaminated the Iraqi soil, which arrives in Iran once in a while and pollutes Iranian soil," the Iranian MP told the Mehr News Agency on Monday. "The results of this polluted soil will be seen in the agricultural products in the coming years, it endangers people's health, and its harmful impact could be transferred to the next generation," he added. "Silence on this issue could create a humanitarian catastrophe in the country," the Iranian lawmaker stated. The aerosol produced during impact and combustion of depleted uranium munitions can potentially contaminate wide areas around the impact sites or can be inhaled by civilians and military personnel. Experts have calculated that from all sources that between 1,000 to 2,000 tons of depleted uranium munitions were used during a three-week period of conflict in 2003 in Iraq, mostly in cities, The Guardian reported in an article published in 2003 (Tehran Times, 2010).

**Date:** July 10, 2010

**Source:** Voice Of America News (VOA)

**Title/Headline:** *4 Arrested In South Africa Trying To Sell Nuclear Device*

**Abstract:** South African police say they have arrested four men in the capital, Pretoria, for attempting to sell what they describe as an industrial nuclear device to undercover officers. The men - all South Africans - were arrested Friday at a Pretoria gas station, where they attempted to sell the device for about \$6 million. Police say Interpol was also involved in the operation. **They did not say where the device came from or for what industrial purpose it is used, but did say it contained radioactive material.** The officials say the four will appear in court soon to face charges of possession of a radioactive device, as well as health code violations for handling radioactive material in public (VOA, 2010).

**Date:** July 23, 2010

**Source:** Nuclear Engineering International, Steven Kidd

**Title/Headline:** *Nuclear Proliferation Risk – Is It Vastly Overrated?*

**Abstract:** The recent well-publicised outpourings of anxiety about the potential consequences of nuclear terrorism overlook the fact that nuclear weapons are usually a matter for states, rather than individuals. By Steve Kidd A significant amount of media attention has recently attached itself to the nuclear security meeting convened by US president Barack Obama and the five-yearly review conference for the Treaty on the Non-Proliferation of Nuclear Weapons, which followed soon afterwards. **The fear of so-called 'rogue nations' acquiring nuclear weapons, or terrorist organisations creating outrages by misuse of nuclear materials, clearly remains strong.** Many column inches also continue to be devoted to various North Korean nuclear activities and to Iran's alleged intentions to pursue a weapons programme. **There therefore remains a fear that this may cast a shadow over the nuclear renaissance, particularly as many people clearly believe that nuclear energy and bombs are merely two faces of the same coin. But it is surely not unreasonable to question whether these fears are being substantially inflated and possibly manipulated by various interest groups in order to suit their own purposes.** There is, however, no doubt that nuclear materials could conceivably be diverted from a civil nuclear power programme into the production of nuclear weapons or alternatively, major fuel cycle processes (notably enrichment and reprocessing of used fuel) could be employed to produce weapons rather than fuel for civil reactors. Similarly, it is understandable that concerns over the security of civil nuclear facilities have multiplied since the 9/11 terrorist attacks in New York. The possibility of aircraft crashing into such plants has naturally now been raised, as have possible terrorist incursions at plants either to acquire materials for weapons or to misuse the facility to create an explosion or a major radioactive release. Rather like the risks of operating nuclear power plants themselves, these possibilities largely boil down to assessing very low probability events which may have big consequences. Human beings are notoriously bad at this and frequently reach what seem to be illogical conclusions. This is highlighted by a recent book by a US academic, John Mueller, Atomic Obsession–Nuclear Alarmism from Hiroshima to Al-Qaeda. **Mueller argues very persuasively (but certainly also**

controversially) that the impact of nuclear weapons has been substantially overstated both in terms of their likely destructive power (in the hands of any party other than one of the five recognised nuclear weapons states) but also in their real impact on human history since 1945. He emphasizes how slow proliferation of weapons has been in reality, partly because the difficulties of acquiring nuclear materials and developing weapons technology are much greater than commonly stated, but also because all but a few countries have no real interest in acquiring weapons, as they make little sense beyond supposedly increasing national prestige. Similarly, the task of the atomic terrorist is far from simple. If it were as easy as many people claim, why haven't there been any incidents, even when the controls on nuclear materials were far looser than today? And why do terrorist incidents (with the possible exception of the sarin gas attack on the Tokyo subway in 1995) usually involve low tech methods, such as people attaching bombs to themselves or taking over commercial airlines armed with box cutters and then flying them into prominent buildings? **There may not be, in reality, any substantive black market in nuclear materials, despite the stories we regularly hear of nuclear trafficking.** The comparison sometimes made with narcotic drugs is not reasonable; although drug seizures are known to be the tip of a very large iceberg, controls on the production, trade and transport of nuclear materials are much stiffer and potential buyers are very limited in number. First, security considerations have been addressed by deploying additional armed personnel at facilities and by other measures to prevent incursions, while new nuclear plants are designed with the possibility of an aircraft impact much in mind. **Although such events are clearly not impossible, the entire 50-year history of civil nuclear power contains nothing to suggest that the risks are other than very remote.** Little can be done other than what has been accomplished already and the risks should certainly not be allowed to dominate the assessment of potential future actions. **Indeed, critics of nuclear power are very bad at keeping things in perspective and fail to apply similar degrees of scrutiny to other plans.** For example, should football stadiums not be licensed for 80,000 fans, simply because a direct aircraft strike during a game could conceivably kill many thousands? Should the walls of the stadium have to be several metres thick? Proliferation of nuclear materials and technology and their integration into weapons are notably more substantive risks, particularly as they will likely involve sovereign states with their greater resources above those of a terrorist organisation. **Critics of nuclear power emphasise that designing a nuclear bomb itself is not particularly difficult (even if, as Mueller emphasises, actually manufacturing and delivering a weapon certainly is).** So much of the world anti-proliferation regime is based on controls on fissile materials; if the necessary plutonium or highly enriched uranium is not available either by diversion from civil uses or production in a local facility, a weapon is impossible. It is therefore necessary for nuclear power critics to focus on alleged weaknesses in the international nuclear safeguards regime or in the security of nuclear materials transport, plus the possible spread of enrichment and reprocessing technologies to countries who may have an interest beyond normal civil uses. **While there is no room for complacency, the real risks are actually as remote as those associated with nuclear facility security and mean that attempts to stiffen safeguards even further will encounter reasonable objections.** Nevertheless, over the past 35 years, the International Atomic Energy Agency's (IAEA) safeguards system under the Nuclear Non-proliferation Treaty (NPT) has been a conspicuous international success in curbing the diversion of civil uranium into military uses. **Most countries have indeed renounced nuclear weapons, recognising that possessing of them would threaten rather than enhance national security. They have therefore embraced the NPT as a public commitment to use nuclear materials and technology only for peaceful purposes.** Parties to the NPT agree to accept technical safeguards measures applied by the IAEA, complemented by controls on the export of sensitive technology from countries such as UK and USA through voluntary bodies such as the Nuclear Suppliers' Group (NSG). Safeguards require that operators of nuclear facilities maintain and declare detailed accounting records of all movements and transactions involving nuclear material. The aim is to deter the diversion of nuclear material from peaceful use by maximising the risk of early detection. At a broader level they provide assurance to the international community that countries are honouring their treaty commitments to use nuclear materials and facilities exclusively for peaceful purposes. In this way safeguards are a service both to the international community and to individual states, who recognise that it is in their own interest to demonstrate compliance with these commitments (Kidd, 2010). **All NPT non-weapons states must accept these full-scope safeguards, while facility-specific safeguards apply in the five weapons states (USA, Russia, UK, France and China) plus the non-NPT states (India, Pakistan and Israel).** Iran and North Korea illustrate both the strengths and weaknesses of international safeguards. While accepting safeguards at declared facilities, Iran has allegedly set up equipment elsewhere in an attempt to enrich uranium to weapons grade [see also 'Figuring out Fordow,' NEI March 2010, pp20-2]. North Korea used research reactors (not commercial electricity-generating reactors) and a reprocessing plant to produce some weapons-grade plutonium. The weakness of the NPT regime lies in the fact that no obvious diversion of material has been involved. In both countries, the uranium used as fuel probably came from indigenous sources, and the countries themselves built the nuclear facilities concerned, without being declared or placed under safeguards arrangements. **The greatest risk of nuclear weapons proliferation has traditionally rested with countries which have not joined the NPT and which have significant unsafeguarded nuclear activities. India, Pakistan and Israel are in this category.** While safeguards apply to some of their activities, others remain beyond scrutiny. A further concern is that countries may develop various sensitive nuclear fuel cycle facilities and research reactors under full NPT safeguards and then subsequently opt out of the NPT. This is the argument for moving to some kind of intrinsic proliferation resistance in the fuel cycle, where there are a number of ideas, previously floated many years ago, which keep on being revamped. One key principle is that the assurance of non-proliferation must be linked to assurance of supply and services in the nuclear fuel cycle to any country embracing nuclear power. Various proposals for fuel banks and multinational fuel cycle centres may aim to guarantee the supply of nuclear fuel and services for bona fide uses, thereby removing the incentive for countries to develop indigenous fuel cycle capabilities. Yet there is clearly a risk here of dividing the world into 'good guys' and 'bad guys,' in a politically discriminatory way. Already, some international fuel cycle proposals have raised the ire of major developing countries like Brazil and South Africa. **The real problem is that nuclear non-proliferation and security have powerful lobby groups behind them, largely claiming to have nothing against nuclear power as such, apart from the dangers of misuse of nuclear technology. In fact in Washington DC, home of the US federal government, there is a cottage industry of lobby groups dedicated to this. Those who oppose their scaremongering (and it essentially amounts to no more than this) are castigated as being in the industry's pocket or acting unresponsively to allegedly genuinely expressed public fears.** Pointing out that very few new countries will acquire nuclear power by even 2030, and that very few of these will likely express any interest in acquiring enrichment or reprocessing facilities, seems to go completely over their heads. In any case, nuclear fuel cycle technologies are very expensive to acquire and it makes perfect sense to buy nuclear fuel from the existing commercial international supply chain. This already guarantees security of supply, so moves towards international fuel banks are essentially irrelevant, while measures supposedly to increase the proliferation resistance of the fuel cycle are unwarranted, particularly if

they impose additional costs on the industry. **It is likely that more countries will foolishly choose to acquire nuclear weapons. If they are really determined to do so, there is little really that the world can do to prevent them—the main effort has to be in dissuading them from this course of action.** How many countries will have nuclear weapons by 2030 is hard to say, but there could well be a total of 15 by then. Mueller argues that this increase, in itself, will neither prevent nor cause wars, but will impose substantial costs on the countries concerned. Apart from the costs of weapons programmes diverting needed economic resources away from more productive activities, such countries are likely to be faced with economic sanctions which would create severe economic hardship for their citizens but be unlikely to deter them. So there has to be a better way. **The problems of regions such as the Middle East will have to be resolved by negotiation, as the presence of many nuclear weapons states will solve nothing. In the absence of leadership by madmen, the spectre of mutually-assured destruction will merely maintain the status quo; acquiring nuclear weapons will grant a country more criticism than international prestige. Meanwhile, the commercial nuclear sector will hopefully be allowed to flourish without too many people chipping away at the margins by raising unwarranted fears about its activities (and imposing additional financial costs, which is what it eventually amounts to)** (Kidd, 2010).

**Title/Headline:** *Crash Of Airbus 320 Outside Islamabad Now Believed Hijacked, Heading For Nuke Facility*

**Abstract:** Informed sources in the Government of Pakistan have told Veterans Today that they are developing “hard evidence” indicating the Air Blue Airbus 320 that crashed July 28th outside Islamabad was a terrorist hijacking tied to rogue American security forces operating inside that country. Sources indicate that the plane crash was an unsuccessful hijacking attempt intended to crash into the nuclear weapons facility at Kahuta, outside Islamabad. Such an attack may have been blamed on India and would likely have led to retaliation which could easily have escalated to a nuclear exchange between these two nations that have spent decades at each other's throats. **Suspicious were raised inside Pakistan's military and intelligence organizations when American military contractors employed by Blackwater/Xe showed up on the scene immediately after the crash, seizing the black box and “other materials.”** There is no confirmation that parachutes or electronic equipment had been removed when Blackwater/Xe security relinquished control of the crash scene to Pakistani investigators. Royal Television in Islamabad, owned by the brother of the head of Pakistan's powerful JI (Jamate Islami), the Islamic political party, has reported that investigations are underway tying American based contractors to the planning of the attack. **Pakistan's ISRP (Inter-Services Public Relations) has failed to confirm this but private sources indicate that an active investigation of these allegations is, not only underway but has established ties between an American group and the hijackers.** Military and intelligence officials inside Pakistan, in concert with the American embassy, are withholding all official details of the investigation and are likely to continue doing so. **This same facility had been the subject of an armed penetration by American contractors, believed to be employed by the State Department, in 2009. Four Blackwater employees, armed and possessing explosives were arrested outside the Kahuta nuclear facility in 2009. The four, driving a Jeep 4x4 and possessing advanced surveillance and jamming equipment of Israeli manufacture, were intercepted 1.5 miles from the Kahuta nuclear facility.** The four spoke fluent Pushtu and were dressed in a manner as to resemble Taliban fighters. The order for their release, given by Minister of the Interior Rehman Malik, is an issue of considerable controversy between the civilian government in Pakistan and the powerful military. **The passenger jet with 152 on board slammed into a hillside in what was believed to be Pakistan's most serious air crash. At least 2 Americans were believed to be on board but, a month later, the US Embassy in Islamabad has left this unconfirmed. Reports received today, however, confirm that at least 5 Americans, military contractors said to be employed by Xe, may also have been on the craft but could not be identified as they had been traveling in local garb and had boarded with false identification. Xe is an American based military and intelligence contracting firm formerly known as Blackwater and has been the subject of considerable controversy for activities inside Pakistan.** Sources indicate that the attackers stormed the cockpit in a hijacking attempt. **The pilot is said to have jammed the flight controls, careening the Airbus 320 and all aboard into a hillside rather than allowing the plane to be used in a “9/11” type attack inside Pakistan or flown into Indian air space for a repeat of the 2008 Mumbai attack.** Pakistan has, at times in error, referred to American contractors employed by the Departments of Defense, State or the Central Intelligence Agency as Blackwater. However, it is believed the majority of such employees are, in fact, members of that organization or is derivative, Xe. **The same group, often criticized for irregularities in Iraq, has been contracted by the Central Intelligence Agency to operate Predator drones inside Pakistan, operations that have resulted in a significant number of civilian deaths and said by political leaders of several factions to do little but recruit terrorists** (Duff, 2010)

**Title/Headline:** *Nuclear Weapon Drivers Sometimes Got Drunk*

**Abstract:** Federal agents hired to transport nuclear weapons and components sometimes got drunk while on convoy missions, a government watchdog said. In an incident last year, police detained two agents who went to a bar during an assignment. **The Energy Department's assistant inspector general, Sandra D. Bruce, said her office reviewed 16 alcohol-related incidents involving agents, candidate-agents and others from the government's Office of Secure Transportation between 2007 through 2009.** Nearly 600 federal agents ship nuclear weapons, weapon components and special nuclear material across the U.S. **Two incidents in particular raised red flags, the report said, because they happened during secure transportation missions while agents checked into local hotels while on extended missions. In these cases, the vehicles were placed in “safe harbor,” meaning they were moved to secure locations.** In one case, in 2007, an agent was arrested for public intoxication. The other occurred last year, when police handcuffed and temporarily detained two agents after an incident at a bar. **“Alcohol incidents such as these, as infrequent as they may be, indicate a potential vulnerability in OST's critical national security mission,”** the report warns. The report did not identify the locations for either incident, and the inspector general's office declined to identify them Monday, citing the safe harbor locations. The findings alarmed some lawmakers on Capitol Hill. **“I was appalled to learn that some couriers responsible for transporting nuclear weapons and material were found to**

**be drinking on the job,"** said Rep. Jim Langevin, D-R.I., who chairs the House Armed Services strategic forces subcommittee. He said he would seek a full briefing from the inspector general. **"We cannot tolerate any behavior that falls short of the level of excellence required and expected when it comes to protecting and handling our nation's most powerful and dangerous weapons,"** Langevin said. Rep. Edolphus Towns, D-N.Y., chairman of the House Oversight and Government Reform Committee, is seeking more information on the report and will be monitoring implementation of the recommendations, a committee spokeswoman said. **"As the report suggests, a potential vulnerability in the secure transportation of nuclear materials is entirely unacceptable,"** said Towns. The Energy Department's National Nuclear Security Administration, which oversees the agents, stressed that the report found no evidence of them driving drunk while on duty, or of a systemic problem. **"NNSA's Office of Secure Transportation maintains a highly trained, highly professional force that has safely and securely transported nuclear materials more than 100 million miles without a single fatal accident or any release of radiation,"** said NNSA spokesman Damien LaVera. "Of hundreds of agents," he added, "the report identifies just two cases involving NNSA personnel being intoxicated while on overnight stops during official missions." LaVera said that the agency takes the cases seriously, and is working to evaluate the report and make additional improvements. He declined to say whether anyone was fired as a result of the incidents detailed in the report, saying he couldn't comment on personnel matters. The report says that current guidelines call for alcohol testing at least once a year and when there is reasonable suspicion of alcohol use; a ban on consuming alcohol within 10 hours before scheduled work; and sending home agents who have an alcohol concentration of 0.02 or more. **"When alcohol-related incidents have occurred, OST officials told us that they have taken immediate action to include removal of agents from mission status,"** the report states. **The report recommends that officials consider actions such as a "zero tolerance" policy for alcohol incidents** (Frommer, 2010)

**Title/Headline:** *Nuclear Smuggling: The Expert View*

**Abstract:** Insider thieves are the new nuclear threat. Protect the materials and prevent the terrorism. The dark netherworlds of nuclear smuggling still pose a terrible danger to us all. Terrorists are seeking nuclear weapons and the materials to make them. Unfortunately, it doesn't take a Manhattan Project to make a crude nuclear bomb – numerous government studies have warned that a sophisticated terrorist group might pull it off, if they could get enough nuclear material. And with bits of highly enriched uranium (HEU) continuing to show up in the hands of hustlers and smugglers, the obvious question is: of which iceberg are we seeing the tip? Fortunately, controlling the essential ingredients of nuclear weapons – plutonium and HEU, neither of which occur in nature – offers a choke point on the pathway to the bomb. **If we can keep terrorists from getting these materials, we can prevent nuclear terrorism.** Already, years of co-operative efforts under the US Nunn-Lugar programme and related efforts have dramatically improved security for nuclear weapons and materials at scores of sites. Potential nuclear bomb material has been removed from dozens more, cutting out the risk of nuclear theft at those sites. These successes represent, in a real sense, bombs that will never go off. In Washington in April, leaders from 47 countries agreed to secure all vulnerable nuclear stockpiles in four years. Now the time has come to flesh out the specifics and move from words to deeds. **The world needs to forge agreement that all nuclear warheads, plutonium, and HEU must have at least a common baseline of nuclear security measures in place – for example, protection against a couple of small teams of well-armed, well-trained outsiders, or a well-placed insider thief.** Countries where terrorists and thieves can pose more substantial threats need still higher levels of security. **New measures to protect against insider thieves – who have perpetrated nearly every known nuclear material theft to date – must be put in place.** Every country that has these materials needs an urgent review of each site where they exist, to assess whether the continuing use of these materials at that site is worth the costs and risks, and whether security there can provide effective protection. **Over time, the world should phase out the civilian use of HEU, which is still used to fuel more than 100 research reactors around the world, many with minimal security measures in place.** Overcoming complacency is the key to success. Many policymakers and nuclear managers around the world wrongly dismiss the danger, arguing that since they have never had an incident at their facility there is no need to upgrade security, and that in any case terrorists could not possibly make a nuclear bomb. They are wrong. **Al-Qaida's nuclear bomb programme was in earnest, and progressed as far as carrying out explosive tests in the desert in Afghanistan before the 9/11 attacks. Nuclear security measures around the world are demonstrably insufficient to cope with the capabilities and tactics terrorists and thieves have already used in non-nuclear attacks.** We need a broad range of steps to counter this deadly complacency, from detailed briefings on the real threat to "red team" exercises, in which well-trained teams test security at nuclear sites. **Another nuclear security summit is slated for 2012 in Seoul. The world needs intensive diplomacy and action on the ground between now and then, so that the leaders there will be able to say that the steps already taken and the further steps agreed to at that summit will be enough to keep the essential ingredients of nuclear bombs out of terrorist hands** (Bunn, 2010).

**Title/Headline:** *The Military Is Secretly Trucking Hundreds Of Nuclear Warheads Across The U.S.*

**Abstract:** Nondescript 18-wheelers are secretly transporting nearly 1,000 of the U.S. Navy's 100-kiloton W76 nuclear warheads from a submarine base near Seattle to a plant in Texas. Worse news? It's by an agency recently investigated for problems with alcohol abuse. An item in Washington's Kitsap Sun this weekend confirms something we all expect to be true but is rarely talked about: the transportation of nuclear weapons across the United States. **The quantity of nuclear warheads is astounding, with the report indicating as many as 1,000 of the approximately 30-year-old 100-kiloton W76 warheads are being transported from Naval Base Kitsap-Bangor near Seattle to the Pantex Plant in Amarillo, Texas, nearly 1,800 miles away, for updates that'll extend the life of the weapon by 30 years.** The W76 warheads, currently used as the main warhead for the Trident 1 and Trident II Submarine-launched missiles, are designed to create a fireball more than half-a-mile in diameter if exploded. Transportation of these items will be carried out by the Department of Energy's National Nuclear Security Administration (NNSA) Office of Secure Transportation. **Convoys of escorted and**

**unmarked nuke trucks like the ones pictured above will carry them on their journey. Numerous safeguards are in place according to the NNSA, including bulletproof sleeper areas in all trucks and a requirement that agents don't go for more than 32 hours without 8 hours of "stationary bed rest."** Here's them bragging: "The federal agents who do this work are trained to defend, recapture, and recover nuclear materials in case of an attack. Because of the highly skilled agents, NNSA was able to safely and securely complete 100 percent of its shipments without the compromise or loss of any nuclear weapons and components or a release of radioactive material" (Hardigree, 2010).

**Conclusion:** Clearly, the US and its allies are the greatest purveyors of nuclear proliferation and negligence on the planet. Even more disturbing is the fact that a great many of these so called nuclear "accidents" occurred on the 11<sup>th</sup> and the 26<sup>th</sup> of the month. Please see Chapter 44: *Numerology of 26 & 11* (Date of Super Bowl XLV) for more info...
